Hon. HOWARD METZENBAUM,
U.S. Senate,
Washington, D.C.

DEAR HONORABLE SENATOR METZENBAUM: Please support the add-on plant to be built at the Goodyear Atomic Plant at Piketon, Ohio. The Portsmouth area is depending on our political leaders to do as much as possible to influence the decision of the plant to be built here.

There are many families and homes that will greatly suffer over the loss of the add-on plant if it is not built in Piketon. There is such a great demand for more jobs in this area caused from the closing of many factories and industries.

I am employed by the Kentucky Bureau of Vocational Education and I know that vocational schools all around the Porsmouth area are doing as much as possible to train students to meet the needs of business and industry. But what need is there to train them when there are no job opportunities and they have to move away from home in order to be mployed?

Please support the add-on plant to be built in Piketon.

Very truly yours,

Mrs. DEBBIE TAYLOR.

[Mailgram]
INTERNATIONAL UNION
OF OPERATING ENGINEERS,
LOCAL UNION 18,
Toledo, Ohio, April 25, 1977.

Senator HOWARD METZENBAUM,
Senate Office Building,
Washington, D.C.:

We in the construction industry in Ohio have waited several years for relief for our unemployed needless to say we felt that with the election of a democratic president Ohio would start moving again when heard of the proposed expansion of the atomic energy plant at Piketon our spirits were raised this project meant getting off the dole and back on the job now we hear this project is being considered for the Oakridge, Tennessee area based on the amount of Federal dollars already spent in the past at Oakridge in comparison to southern Ohio makes this consideration patently unfair having designated Piketon as the site for this project and then removing it to Tennessee because wages are lower there and therefore Federal money will be saved makes it unbearable please help keep this project in Ohio we have waited long

RAY FRANKHOUSE,
JAMES MCMAHON,
BOYD RADER,
FRED HOHMAN,
GEORGE TACK,
Business Representatives.

PORTSMOUTH AREA,
CHAMBER OF COMMERCE,
April 21, 1977.

Senator HOWARD METZENBAUM,
Russell Office Building,
Washington, D.C.:

We urge you to use the influence of your office to urge President Carter to construct the proposed nuclear centrifuge plant at the Portsmouth Area A Plant the Energy Research and Development Administration determined that this site has met all of the specifications for an uranium enrichment facility the unemployment rate for this 5 county area is 15 percent. Millions of dollars have been spent on preliminary work for the gaseous defusion plant. In his presidential campaign, his press release of October 29, 1976 from Atlanta stated "I will ask the Congress to authorize the 4 billion in funding needed to complete construction of the Portsmouth add-on" the centrifuge plant should be constructed at Portsmouth the people of this area and of Ohio need this plant.

WILLIAM J. RICHARDS,
President.

OHIO STATE BUILDING AND CONSTRUCTION TRADES COUNCIL,
Columbus, Ohio, April 24, 1977.

Senator HOWARD METZENBAUM,
Senate Office Building,
Washington, D.C.:

On behalf of the 100,000 building tradesmen in Ohio we call upon you to focus your attention and efforts in restoring Portsmouth power plant project to Ohio. You are aware of the severe unemployment problem we have in our State. This project would benefit the entire State and boost the economy of the Portsmouth area where unemployment now stands at 15%. This project would provide employment for approximately 10,000 persons with half that total directly involved in the actual construction. Cancellation of this project is a devastating blow to construction and related industries.

In addition to the loss of jobs for Ohioans, the question of integrity is raised. President Carter, as a candidate, promised his support for the project. Carter, as President,, has now sanctioned the cancelling of this project and has supported the recommendation that this addition be built in Tennessee.

It is one thing to be ignored on political appointments and "patronage" as Ohio surely has been by this administration, but grave potential of the cancellation of this project in terms of the loss of jobs, industrial growth, and economic development for our State goes far beyond petty politics and is an inexcusable horror.

We will be in contact with you regarding this matter in the near future. We would sincerely appreciate counting on your support to help see that this project is restored for Ohio.

Very truly yours,

JOSEPH F. SEDIVY,
Secretary-Treasurer.

UNITED SHOE WORKERS,
Portsmouth, Ohio, April 24, 1977.

Senator HOWARD METZENBAUM,
U.S. Senate,
Washington, D.C.:

It is critical that the Portsmouth area receive confirmation that the Carter administration will locate the atomic energy plant at the present Piketon, Ohio location. President Carter promised during the campaign he supported this location southern Ohio gave him superior support in November. If the new facility is not located at Piketon, Ohio a democrat will never be elected in southern Ohio or possibly Ohio. Repeat it is highly urgent that the administration confirm its original plans for the location of the atomic facility in our area.

J. T. MCCULLOUCH, *President.*

PIKETON PARLEY SET AT WHITE HOUSE

(By George Embrey)

WASHINGTON.—President Carter has invited U.S. Sens. John H. Glenn Jr and Howard M. Metzenbaum, both D-Ohio, to meet with him at the White House Wednesday on the controversial decision to change and possibly relocate a $4.4 billion southern Ohio project.

U.S. energy officials confirmed in Columbus Saturday the Carter administration move to revoke the earlier decision to expand the U.S. Energy Research and Development Administration (ERDA) factory at Piketon.

Instead of enlarging the gaseous diffusion plant to expand U.S. atomic fuel production, the President has decided to shift to a different process, a centrifuge method, for making atomic fuel.

ERDA's acting administrator, Robert Pri, said in Ohio Saturday the project may be shifted to ERDA facilities at Oak Ridge, Tenn., where work has begun on the centrifuge system.

At stake are thousands of construction jobs and future atomic plant jobs for southern Ohio.

The Piketon plant, located halfway between Chillicothe and Portsmouth employs several thousand workers who live and shop money throughout that area.

Also at stake are the political reputations of Ohio's two Democratic senators, both firmly pledged toward getting the $4.4 billion project for Ohio. A former Republican president approved the Piketon site but now a Democratic president threatens to take it away.

An aide to Glenn said while it would take an act of Congress to undo the government decision to move ahead with the $4.4 billion Piketon "add-on," Congress probably would not stand in Carter's way if he decided to move it to Tennessee.

William R. White, Glenn's administrative assistant, said Congress which authorized the southern Ohio project and appropriated initial funds, probably would respect the President's desires to pick the site.

Meanwhile The Dispatch has learned that ERDA officials are studying the possibility of splitting the $4.4 billion project between the Piketon and Oak Ridge sites.

A study reportedly was requested to determine the cost and other factors in dividing the number of centrifuge processes ERDA needs for atomic fuel production between the two places.

FARM CRUNCH RESULTS FROM DOUBLE PINCH

Mr. YOUNG. Mr. President, I was real pleased to read Eliot Janeway's column entitled "Farm Crunch Results From Double Pinch" in the Washington Star of Sunday, April 24.

It is highly encouraging to read a column such as this by an economist of national reputation, one who has not forgotten the Great Depression of the thirties and the major reasons for it. Mr. Janeway's column very excellently discusses and compares the economic situation of the 1920's and early thirties with the conditions of today as they relate to agriculture and the Nation's economy as a whole.

Mr. President, there is a saying to the effect that those who refuse to learn from history are forever condemned to relive it. If the political leaders of this Nation fail to heed warnings such as those contained in Mr. Janeway's col-

umn, the American people may again be in deep economic trouble.

Mr. President, I ask unanimous consent to have printed in the RECORD the column by Eliot Janeway from the Sunday, April 24, Washington Star.

There being no objection, the column was ordered to be printed in the RECORD, as follows:

FARM CRUNCH RESULTS FROM DOUBLE PINCH

(By Eliot Janeway)

Santayana's famous warning, that those who refuse to study history will be condemned to relive its failures, applies with particular force to the credit crunch now pinching the Farm Belt.

At first blush, it seems a historical first; after all, it is the direct result of the cost inflation which has been galloping across the economic terrain ever since OPEC's declaration of economic war on its commercial customers, its financial custodians, its technological benefactors, and, last but not least, its impoverished neighbors in the Third World.

The Farm Belt credit crunch, however, is the result of a double pinch. Inflation of costs is accounting for only half the damage; deflation of incomes for the other half. This one-two punch from cost inflation and income deflation takes a crueler toll of its victims than the familiar rhetoric of "stagflation" would suggest.

Such are the workings of progress that stagflation has evolved from a bold and sardonic concept to a cliche, which understates the problem of the Farm Belt, because it assumes the failure of productivity and incomes to rise.

The dealers in cliches who take stagflation for granted have not yet caught up with the fact that stagflation would be a lesser evil to settle for, because it would describe a state of affairs in which incomes were still rising, although costs were rising faster.

In the Farm Belt today, however, incomes are falling while costs are not merely rising, but rising faster than ever.

The only exception is the cost of money. Increasingly, farm borrowers able to pay interest are becoming scarce. The two special conditions which always come into play during a bankruptcy crisis are developing.

Commercial banks are giving their good borrowers whose loans are in bad shape lower rates and longer payouts. They're giving their bad borrowers moratoria—a term forgotten since the Depression—even on interest, let alone principal.

The concept of a moratorium on debt was last aired during the early 1930s—more precisely, during the preliminaries to the Great Depression, which was touched off by the argument over how to get out from under the unmanageable burden of war debt.

Foreign government borrowers first agitated for a moratorium, then domestic farm borrowers imposed it. Finally, foreign government borrowers, led by Hitler, followed the American Farm Belt borrowers' initiative.

The study in historical contrast is arresting; and it is not reassuring. Post-mortems of the disaster of the '30s all agree on three striking divergences of the Coolidge boom.

In the first place, industrial investment and urban construction not only participated in the boom, but were directly responsible for the records it set. However, the farm depression of the late 1920s was every bit as striking a phenomenon of the Coolidge years. In fact, the measure of the strength of the Coolidge boom was that it asserted its force despite the severity of the farm depression, coating it over without alleviating it.

In the second place, a striking characteristic of the Coolidge boom was the absence of any domestic price inflation to erode its vigor. This meant that the drop in farm incomes took its toll relative to a more or less fixed level of costs levied on farm purchasing power. The devastating crisis which developed in the Farm Belt was, therefore, mitigated because farm costs were fixed relative to the cost of what farmers had to buy.

Nevertheless, the entire system was turned upside-down by the irresistible demand of the farm bloc for parity between farm and industrial purchasing power. The Farm Bloc in Congress gave the Republican party a mule's kick which split it wide open.

The Farm Bloc in Congress is poised to strike again. It's all the more powerful and, for once, all the more righteous, because of the double pinch of falling incomes and rising costs. Never mind that industrial profiteering is not an offset to farm cost inflation.

The relative position of the farm economy is deteriorating much more drastically (as the direct and inescapable result of industrial inflation) than it did on the eve of the crisis of the 1930s.

The third divergence pinched the sensitive debt nerve. On the eve of the crisis in the 1930s, farm debt, along with international debt and stock market margin debt, was inflating dangerously.

Now, providentially, a wealth of liquidity is available, not only to manage the international debt structure, but also to support an altogether new stock market boom unclouded by debt overextension. This divergence, while troublesome, is still encouraging, because it is limited to farm debt.

But the main lesson bequeathed by the dire experience of the late 1920s and early 1930s is that boom conditions in the industrial economy, and in the stock market, will not be sustained if depression conditions are tolerated in the farm economy. This lesson, if pondered and acted on, will prevent the clear and present danger of a repeat performance of the last Depression.

At that time, the one statesmanlike voice that was heard, but heeded too late, was that of the late, great Eugene Meyer, the most practical financier of his day, and, therefore, the most frustrated.

He was the prophetic dissenter of the Hoover years, when he served as chairman of the Federal Reserve Board. He saw clearly, and warned incessantly, that if a farm depression were allowed to develop, it would pull the props out from under a top-heavy debt structure in the industrial economy and in the stock market.

It was Meyer's far-sighted counsel to lay the unobstrusive but very effective vice chair-farm economy that Hoover ignored and Roosevelt followed. Carter's ability to survive is likely to hinge on his instinct to commit himself to the same priority.

Meanwhile, it is reassuring to report that the Burns Board has been quick to check the severity of the present farm credit crunch. Great credit is due Steve Gardner, the unobstrusive but very effective vice chairman of the board (a graduate banker himself) for his diligence and practicality in confirming the facts and figures of the crisis conditions with which the Farm Belt bankers are now coping.

Another forgotten lesson rooted in the history of the Federal Reserve System is emerging from the expedient which the system is adopting. It is rising to its responsibilities by pumping drafts of emergency credit into Farm Belt districts, without prejudice to its over-all stance of moderation.

There's no danger of nationwide inflation in the Fed's prompt response to the emergency need to counteract regional deflation in the Farm Belt.

It is important to recall, however, that the original responsibility given the Federal Reserve by Congress, in the days when the supply of credit was still considered limited, was to provide relief to regions suffering from credit stringency by redirecting surplus liquidity from regions enjoying it.

It is instructive to recall that the initial form taken by the bank failures of the early 1930s was regional. The system as a whole never recovered from the shock administered by the debacle in the Farm Belt, which New York—that is, Wall Street—minimized because it happened to be enjoying a borrowing boom at the time.

The Federal Reserve System has fallen back on its original charter in devising a rationale for coming to the aid of the Farm Belt. It is empowered to provide seasonal credit regionally, but not to try to run the government. In the case of the farm crisis, all it can do is buy time for the executive and legislative branches to go to the underlying problem of falling incomes and rising costs. The expedient of playing the immediate crunch as a regional and seasonal is only that, and nothing more.

If the business cycle were still operative, serious students of its workings would be alarmed at the fact that the Farm Belt banks have been squeezed out of lending power at the outset of a new crop year.

If all were well in the moneyed world, and the banking system were providing the neat and orderly adjustments expected of it, the Farm Belt banks would be chock-a-block with excess liquidity to begin sending to cities. The fact that they are as tight in April as they normally expect to be in September is a warning even if the farm economy were self-financing on a seasonally self-adjusting basis, as it clearly is not.

The stubborn error of omission which flaws conventional economic thinking, and the conventional government policy-making behind it, envisions the domestic economy in a purely domestic frame of reference, subject to purely domestic cross-tugs of supply and demand.

The American farm economy is the one conspicuous exception. Where the American industrial economy is no more than 10 percent export-dependent, if that, the American farm economy is at least as export-dependent as all the industrial economies in the rest of the world.

It is a useful fiction for conventional thinkers to maintain that pumping credit contra-seasonally into the Farm Belt will buy time and leave it better off by October. presuming the new farm export strategy is not adopted between now and then. If it is not, the seasonal period of reckoning that will arrive at harvest time will find the farm crunch more intolerable than it already is.

Historians of the Hoover debacle remind us that the farm dissidents of that deflationary period in farm income pressed for more than the then puzzling concept of parity with industrial income; they also advocated a strident new approach to crop export marketing.

It would be a mark of progress if our policymakers today were to pick up from where our farm bloc dissenters left off nearly half a century ago, and push for an assertive new farm export program.

The farm credit crunch of 1977 came to a head before Carter devised his crazy-quilt energy program.

If he knows what's good for him, and not intolerable for the rest of the country, his next move will be to offer the Farm Bloc an overriding exemption from his invitation to share the joys of sacrifice.

NURSING OUR CITIES BACK TO HEALTH

Mr. HUMPHREY. Mr. President, with all the bad news and gloomy forecasts emanating from and about so many of our Nation's cities, it is with great enthusiasm that I read the attached article by Paul R. Porter in the Washington Post on April 19.

Mr. Porter believes that municipal

planning should be encouraged through grants by the Federal Government. Subsequently, pilot cities should be selected and provided with technical and financial assistance to accomplish their selected goals. The Federal Government and other cities could, thus, draw on the experience of these pilot cities. Mr. Porter feels, based on this format, that within 20 years a deteriorated city could be turned around and, in fact, could prosper.

Mr. Porter, having been one of the architects of the Marshall plan for Europe, is certainly qualified to make this judgment. It is truly heartwarming to read such an upbeat article written by a man with Mr. Porter's experience and ability to judge the future of our cities.

Mr. President, I ask unanimous consent that the article by Mr. Porter be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

NURSING OUR CITIES BACK TO HEALTH

(By Paul R. Porter)

Our cities can regain capability to prosper, to end their dependence upon subsidies, to manage their own affairs, and to match their suburbs in residential appeal.

Even the most crippled cities can reach this recovery goal in 20 years or so, or about the time it takes to plan, finance, and build a subway. In that time or less, the cities' poor can cease to be poor.

This prospect contradicts the now-fashionable doctrine of falling expectations. Whether the hopeful or the dour prospect will prevail is the opportunity of the Carter administration to decide.

The central problem in achieving the recovery of cities is to correct two major maladjustments that have developed in the evolution of large urban settlements. These two cause or amplify so many other maladjustments that we may rightly call them *primary*. They are:

First, cities have lost competitiveness as a place to live. A dwindling population usually causes a fiscal crisis that in turn causes still more residents to leave. Another result is excessive transportation, wasting scarce energy and capital.

Second, cities have become burdened with an endemic structural unemployment in the wake of a profound change in the job-base of cities. Managerial, professional and other white-collar jobs have expanded, but manufacturing jobs have flowed outward, taking a toll in family incomes and morale that has aggravated the fiscal crisis and a host of social ills.

Also, the post-war baby boom has produced a surplus of beginners in the labor force. Now at its peak, it will disappear in about a decade. While it lasts, youth without hope of work turn to apprenticeship in crime.

Making the city once again an appealing place to live is the way to regain a lost competitiveness. Then, many who work in the city will choose to live in it; its tax-base will be decisively broadened; better services can be provided at a tolerable level of taxation; all residents, old and new, poor and affluent, will benefit. Moreover, sensibly, less transportation will be part of the solution to the transportation problem.

We should not expect a large-scale return by families with children in suburban schools. The city should make its principal bid to newly-formed families, who will increase in number.

To win them, cities need two housing goals. Alongside the old one of decent housing for every family, they must offer enough housing of a kind that will make cities truly competitive with suburbs—especially those that need not be built if the city can serve the new-family market.

To hold them, city schools must become as good as suburban schools, but they should in any case. That will require more teachers per pupil, but teachers are already in surplus because of the falling birth rate. The huge public investment in their training is now a wasting asset. More teachers for city schools would be a worthy use of money saved by shortening distances between homes and workplaces.

If a city gains appeal, its future population will correspond more to the higher-income job-base it has acquired. This presents a dilemma. All residents would benefit from a stronger tax-base, but some low-income residents could be crowded out of their neighborhoods if the change came too fast or if sole reliance were placed on housing rehabilitation, excluding new construction.

The dilemma is manageable. A shortage of higher-income housing can be avoided by a flexible mix of the new and the preservable old. Also, a too-rapid transition is unlikely. The recovery of cities will come in gradual increments from the ever-continuing stream of young people reaching maturity.

The exodus of blue-collar jobs poses a separate problem. The departure of factories can be slowed—and should be. But to believe that very many can be brought back is an illusion.

This, then, is the long-term job outlook for inner-city youth: Through education, some will move into the managerial-professional class. Through attrition, some will fill blue-collar jobs that remain in cities. But some cannot become self-supporting while they remain in cities. They need help in following relocated jobs.

It can be given by linking it to what should be done in any case to help unemployed youth. They should be gotten off the streets into useful public service jobs. They should be trained for future jobs. Then they should be offered jobs somewhere—in the city, elsewhere in the metropolitan area, or beyond. A vigorous national economy, of course, is a prerequisite.

What can the Carter administration do to get recovery started? Since any city's recovery must be tailor-made, it can begin by offering planning grants to cities for preparation and casting of recovery programs as a redirection of present programs. From these, several pilot cities could be chosen.

We need not await their full recovery before judging results. A few years' experience should provide a basis for beginning recovery in other cities.

If the new administration is willing to be bold, it can offer the recovery of cities as a practical alternative to their permanent dependence upon grudging and uncertain subsidies.

HOW TO USE CREDIT WISELY

Mr. DANFORTH. Mr. President, young people are one of America's greatest assets for the future. Therefore, it is vitally important that they have a proper understanding of the role of business, and that they have confidence in business. The work of Missouri's Consumer Credit Association has done much to advance this goal.

Three years ago, Virginia Rutledge of St. Louis, now regional education director of the association, initiated a statewide program for high school seniors to bring about their better understanding of the wise use of consumer credit. As attorney general of Missouri for the past 8 years, I know very well how important an understanding of credit is to persons who are joining the work force.

The results of this statewide essay and speaking contest have been very successful. Students throughout our State have become interested in the consumer credit industry through their independent research on the subject.

The essay contest also is sponsored by the International Consumer Credit Association, under the direction of William Henry Blake, the executive vice president.

It is fitting that the award be made during National Consumer Credit Week, and I am proud to take this opportunity to request unanimous consent that this year's first place essay be printed in the RECORD. It is a tribute not only to the consumer credit industry, but also to Mr. Mark Bradshaw, a student at Southwest High School of St. Louis, who was inspired by what these men and women of business had to say.

There being no objection, the essay was ordered to be printed in the RECORD, as follows:

HOW TO USE CREDIT WISELY

(By Mark Bradshaw)

Every family needs credit. Everyone enjoys the advantages of credit because they won't have to save year after year in order to pay for something with cash.

Some people don't think they need or use credit just because they don't have credit cards. That's not true, because you use credit every time you turn on a light or use your stove. You don't pay for it until you get your utility bill, so that's using credit. It's called Service Credit.

Just about everyone knows about charge accounts. You are able to buy clothes, furniture, or just about anything you want without paying cash for it, if you have the right charge cards.

Another type of charge card is a bank card, such as the Bank-Americard. With this card you are able to get loans and do some shopping with places which accept this card.

Installment Credit is when you pay for something over a period of time. As when you would buy a car or house, you spread out the amount of the price and pay it in monthly installments.

The other type of credit is Personal Loans. One out of every five families use credit in this way, such as when they need to obtain cash for necessities.

Young adults can now have credit, too. Many retailers are making credit privileges available to them, even though they are not necessarily working full time.

They are given a type of revolving charge with a very modest top limit on the amount which can be owed. The monthly payments in each case are scaled to what the young adult is actually earning at an after-school job or receiving in allowance. Some stores will open a young adult account only if parents already have a charge account at the store. Most require the permission of parents, because few high school students hold regular jobs. Experience shows that these young consumers take credit responsibilities seriously.

In order to get credit you have to go through a credit investigation. You usually go through this each time you apply to have an account at different credit companies.

You will probably have to fill out a form or credit application, which will ask for such information as; the amount of money you make in a year, your present and previous address, and if you have any other types of credit.

Once you have been accepted as a credit

customer you must be sure to keep it good. Be sure to pay all of your bills on time and never promise to pay more than you can afford. If you can't make a payment when it's due, report the circumstances to your source of credit.

Any time you apply for more credit, they will check into your past credit record. That record will stay with you for the rest of your life. It is a good idea to keep your rating good, for you will probably use cedit for the rest of your life.

STAFF RESPONSIBILITIES UNDER THE SENATE CODE OF OFFICIAL CONDUCT

Mr. STEVENSON. Mr. President, I and Senator SCHMITT, for the Select Committee on Ethics, have signed and ordered mailed in the next few days to some 6,600 Senate employees a letter stating in general terms the responsibilities of staff under the new Senate Code of Official Conduct.

Some staff not paid by the Senate, but who work in Senate offices, also are covered by the Code of Official Conduct. Inasmuch as such persons are not on the list of Senate-paid employees, the committee next week will write Senators and others who are supervisors, asking them to advise appropriate staff under their supervision of the provisions of the code and requesting of Senators and other supervisors the report of Senate personnel paid by others required by rule 49, paragraph 6.

I ask unanimous consent that the text of the letter to employees be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

SELECT COMMITTEE ON ETHICS,
Washington, D.C., April 26, 1977.

DEAR SENATE EMPLOYEE: On April 1, the Senate agreed to Senate Resolution 110 which provides nine new "ethics" Rules for the official conduct of Senate members and employees. It also strengthens the enforcement responsibilities of the Select Committee on Ethics.

In January of this year, the Senate also passed S. Res. 4 which created an entirely new Ethics Committee to enforce both the new Code of Official Conduct subsequently approved in S. Res. 110 and the portions of the previous ethics Rules which continue in effect.

Some of the provisions of the new Code of Official Conduct take effect immediately. Others take effect later this year, next year, and in January, 1979. Some present ethics Rules remains in effect until they are replaced by the new Rules. Some aspects of ethical conduct subject to the review of the Ethics Committee, which are in law or part of Senate Rules and Standing Orders and not stated as part of the Code of Official Conduct, were unaffected by S. Res. 110. These include the unauthorized disclosure of intelligence information in the possession of the Select Committee on Intelligence as provided for in S. Res. 400, 94th Congress, and franked mail as provided for in Public Law 93-191. Most of the new Ethics Rules apply to all Members and officers of the Senate. Some apply to their spouses and dependents, and to candidates for election to the Senate as well.

EMPLOYEES COVERED

If you are a senior Senate employee, paid for more than 90 days at an annual rate exceeding $35,000, you must comply with all the ethics Rules applicable to staff. If your compensation is at a rate exceeding $25,000, you are covered by all the rules applicable to staff except Rule 44 which regulates outside earned income. If your compensation is at a rate of $25,000 or less, you must comply with all the new Rules applicable to staff except Rule 44, Rule 42 which requires public financial disclosure, and paragraphs 6, 7 and 8 of Rule 45 which forbid certain business and professional activities and may require (of committee staff only) divestiture of financial holdings. Some of the rules may also apply to your spouse and other relatives. For example, if you meet the income test for public financial disclosure ($25,000 under Rule 42), you must report interests of your spouse (unless you are living separate and apart) and dependents if such interests are within your constructive control. Spouses also are covered under the gifts section (Rule 43).

You are subject to the Code of Official Conduct and other ethics Rules even if your salary is not paid by the Senate and you are, for example, an employee of an agency detailed to work in a Senate office, or serving in a Senate office under an educational program. Moreover, retired federal annuitants working on Senate staffs now must add the amount of their annuity to their salary to determine if they are covered by Rules affecting employees with salaries above $25,000 and $35,000.

Staffs of joint committees and other Congressional offices are covered by Senate or House ethics Rules, although staff of independent offices may not be subject to either set of ethics Rules. Those joint staffs paid by the Senate and hence subject to the Senate Code include: the staffs of the Joint Committees on: Atomic Energy, Economics and Printing; the American Indian Policy Review Commission; and the Capitol Guide Service. Staffs subject to House Rules include those of the Joint Committees on Taxation, Defense Production and Congressional Operations, and of the Congressional Budget Office.

Staffs apparently not covered under Senate or House ethics Rules include those of the Architect of the Capitol, the Office of the Attending Physician, and the Office of Technology Assessment.

These groups may adopt Senate or House ethics rules, or be brought under similar coverage by legislation now before the Governmental Affairs Committee.

EMPLOYEES STILL COVERED BY SOME "OLD" CONDUCT RULES

The new Code of Official Conduct also continues the present requirement under "old" Rules, if your rate of salary exceeded $15,000 and you were employed by the Senate for 90 days or more in 1976, that you make public disclosure before May 15 of the contributions you received and expended and the honoraria you received during 1976 and file, also before May 15, in a sealed envelope (to be opened only in the case of an investigation), your income tax returns and other information about gifts and financial interests. Forms and instructions for these reports may be ordered from the Select Committee on Ethics.

NEW RULES FOR ALL EMPLOYEES IN EFFECT ON APRIL 2, 1977

The new Rules now in effect prohibit you from:

Accepting a gift from anyone with an interest in legislation before the Congress or from a foreign national, with certain exceptions subject to the approval of the Ethics Committee (as described in Rule 43).

Taking a bribe or using your official position to advance legislation which furthers your own pecuniary interest;

Engaging in outside paid employment which is in conflict with official duties;

Engaging in outside employment unless you report your outside employment to the Senator you work for immediately upon taking such employment and on May 15 of each year (you may secure forms for this report from the Select Committee on Ethics);

Receiving contributions in so-called unofficial office accounts (after the end of this year, the Rules forbid the use of such accounts altogether, although an account may be maintained by a political committee if it is disclosed under F.E.C. regulations and its funds are spent for approved purposes);

Securing reimbursement from two sources for the same foreign travel expense;

Assisting a Senator or former Senator in converting campaign funds to their personal use;

Assisting a lame duck Senator to travel at government expense after certain "cut-off" dates;

Performing services for any Member, committee, or office of the Senate for a period in excess of four weeks (and for more than eight hours a week)—if you receive compensation therefor from any source other than the U.S. Government—unless your supervisor reports to the Ethics Committee how your services are used: (a) when you begin; (b) at the end of each quarter; and (c) when you stop;

Using travel funds for other than actual travel expenses (and require unused balances to be returned to the government).

NEW RULES FOR ALL EMPLOYEES WHICH TAKE EFFECT AFTER APRIL 2

Other major provisions of the Code of Official Conduct will have these effects on and after the dates shown:

On May 1, 1977, you may not:

Solicit campaign funds;

Receive, be custodian of, or distribute any campaign funds unless you are one of no more than two employees (in the personal office) of a Senator, who receives an annual salary of $10,000 or more and who files a comprehensive financial disclosure statement each year, whom the Senator formally has designated with the Secretary of the Senate to do so.

On October 1, 1977 (with the first filing on May 15, 1978, or on any date immediately after October 1 if you leave Senate employment) you must, if your compensation is $25,000 or more:

Publicly disclose the details of your earned income, honoraria, gifts, real and personal property, personal liabilities, transactions in securities or commodities futures and purchase or sale of real property;

File your income tax returns with the General Accounting Office in a sealed envelope to be opened only in the case of an investigation.

On January 1, 1978, you may not assist a Senator to:

Use the frank for mass mailing 60 days before the date of a primary or general election in which the Senator is a candidate (and Senators must register mass mailings, newsletters, for example, periodically with the Secretary of the Senate so that the public may inspect them);

Use campaign or personal funds to buy paper for mass mailings;

Use the Senate computer facilities to store, maintain, or otherwise process lists of names and addresses identifying individuals as campaign workers or contributors, as members of a political party or by any other partisan political designation; nor to produce mailing labels or computer tapes except for use in Senate facilities;

Use the radio and TV facilities in the Capitol for 60 days preceding a primary or general election in which he is a candidate.

On April 1, 1978, you:

May not, if your Senate salary exceeds $25,000, provide professional services for compensation, such as engaging in the practice of law, in affiliation with a firm, partnership, association or corporation; permit the use of your name by a law firm or other business; practice a profession for compensation during regular working hours; or serve as an officer or director of a publicly-held business,

with minor exceptions (as stated in Rule 45, paragraph 7);

May be required, if a committee employee with a salary exceeding $25,000, to divest yourself of financial holdings which may be affected by the actions of the committee for which you work, unless the Ethics Committee and your supervisor approve otherwise (as stated in Rule 45, paragraph 8);

May not, for a period of one year after leaving your position, lobby certain members and employees of the Senate (as stated in Rule 45, paragraph 10).

On May 15, 1978:

Your public financial disclosure statements are subject to audit.

On January 1, 1979, if your Senate salary exceeds $35,000:

Your outside earned income may not exceed 15 percent of your Senate salary, with exceptions for income from advances and royalties on books and from the sale of creative or artistic works, and for income from buy-out arrangements, family enterprises, and distributive shares of partnership income if certain tests are met (as stated in Rule 45, paragraph 3).

After January 3, 1979:

You may not, as a supervisor, engage in (and as an employee you may seek Ethics Committee investigation and other action regarding) discrimination in Senate employment on the grounds of race, religion, sex, national origin, age or state of physical handicap.

S. Res. 110 also assigns to several committees, including the Ethics Committee, the task of studying supplementary rules and regulations designed to foster ethical conduct. Such new provisions may be added to the Code throughout the coming year.

This summary does not include precise details, exceptions and explanations, but it does describe the principal features of this strong Code of Official Conduct.

We encourage you to consult the full text of each new Rule, available from the Senate document room or this Committee. The Ethics Committee plans to distribute additional information to assist you in complying with the Code, as soon as it can be prepared. If you have questions about the application of the Code to you, please address them in writing to the Committee.

Sincerely,

ADLAI E. STEVENSON,
HARRISON SCHMITT.

THE REPUBLICAN PARTY

Mr. MATHIAS. Mr. President, a vigorous and healthy two-party system has been one of the bulwarks of our democracy. Anything that threatens the effective functioning of this system threatens our democratic processes as well.

In recent years an imbalance has been growing between our two parties until, finally, it has come to assume very troubling proportions. The Republican Party—my party—now claims the allegiance of only 18 percent of the electorate.

I believe that thoughtful Republicans and Democrats alike are concerned about this development. And it is for this reason that I commend to the attention of colleagues on both sides of the aisle a very cogent article entitled "Blacks and the GOP," written by Vernon E. Jordan, Jr., executive director of the National Urban League. Mr. Jordan's advice to the GOP on how to broaden its base is important and timely. I ask unanimous consent that his article from the New York Times of March 28, 1977, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

BLACKS AND THE GOP

(By Vernon E. Jordan, Jr.)

The Republican Party, stripped of the White House, a minority in the Congress and among state governors, and facing a continued hemorrhaging of supporters, is preoccupied with an internal debate over its future. Unless the party courts black voters and associates itself with their needs and aspirations, that future may be bleak.

Some Republicans suggest that the party write off the black vote and pursue white ethnics, stressing so-called "social issues." Such a strategy implies careful cultivation of racial hostility, elimination of "social" programs, and marshaling of anti-Government feelings.

That sounds like a prescription for reducing the party to a permanent fringe group. It was tried by Richard M. Nixon and Gerald R. Ford and was a factor in last fall's election defeat. It falsely assumes that racism is more endemic among ethnics than among whites in general, and it fails to locate the identity of economic interests between blacks and white ethnics. Both sectors are working-class, disproportionately poor, and urban.

Other Republicans see prospective votes in a supposedly conservative black middle class partial to "law-and-order" anticrime appeals. But this view betrays an ignorance of the black community and represents a false hope for the party.

Middle-class blacks are middle class economically because of multi-earner families, and they retain family, friendship and neighborhood ties to their less-fortunate brothers and sisters. This "middle class" has none of the economic security and status of the white middle class, and it is conscious of the role that activist Federal policies have played in giving black people better economic opportunities.

Concern with crime is real and understandable, but so too is the reluctance to support white-initiated "law-and-order" campaigns they know will translate into "sweeps" of black communities and restrictions on their freedoms. It is not uncommon for blacks living in white suburbs to be stopped by policemen suspicious of their presence there.

The Republican Party does have a chance to slice enough black votes away from the Democrats, but it won't get them through continuation of malign neglect or courting a nonexistent conservative black middle class.

If the party is serious about wanting black votes, it will have to endorse programs and policies needed by the black community; it will have to nominate black candidates and admit blacks into prominent internal party positions of real authority, and it will have to take a more positive approach toward urban and poverty problems that affect blacks.

This does not mean that the Republican Party necessarily has to abandon its traditional position to the right of the Democrats. There is plenty of room for the party to move toward the center and to enunciate creative programs within its traditional philosophy.

The Republican stress on private enterprise calls for formulation of Federal laws and programs that will better enable the private sector to help solve serious urban, social and economic problems. And long-standing suspicion of central government does not have to mean support of bloc grants and community-development laws such as those passed during the last Administration that take money from poor cities and give it to better-off suburbs.

If the party philosophy is truly viable in today's interdependent, mixed-economy, pluralistic society, then it must escape a negative approach and come up with programs consistent with that philosophy yet relevant to the needs of poor people and minorities.

If it can do that, it stands a chance to chip away enough black voters from the Democrats to elect a Republican President again. Black voters hold the balance of power in nearly all the populous Eastern and Northern states, and hold the key to the South. President Carter's razor-thin margin last November was provided by solid black support—a swing of just a few percentage points in black votes to the Republicans would have elected Mr. Ford.

Black voters fully understand the dangers of putting all their electoral eggs in one basket, but to date it's been the only basket available, as the Republican Party has pursued policies perceived by blacks and whites alike as antiblack.

Changing those policies holds the key to a Republican resurgence in American politics; continuing them means reducing the party to permanent minority status.

ALL-OUT EFFORT CUTS HEART ILLNESS

Mr. KENNEDY. Mr. President, I ask unanimous consent to have printed in the RECORD an article from the April 3 edition of the New York Times entitled "All-Out Effort Cuts Heart Illness."

There being no objection, the article was ordered to be printed in the RECORD, as follows:

ALL-OUT EFFORT CUTS FINNS' HEART ILLNESS—HIGHEST ATTACK RATE IN THE WORLD IS REDUCED 40 PERCENT FOR MEN AFTER COUNTRYWIDE CAMPAIGN

HELSINKI, April 3.—A rural county in eastern Finland has for years recorded one of the world's most morbid statistics: More people died there from heart disease than proportionally anywhere else in the world. But no longer.

A five-year program of preventive medicine involving the whole population of 180,000 in North Karelia has decreased heart disease significantly. The heart attack rate for males has dropped 40 per cent, and the 30-year annual increase of heart disease incidence has been stopped.

"Nowhere else in the world has there been a program like this," said Dr. Pekka Puska, 31 years old, the project's principal investigator since it began in 1972.

Finland has the worst rate for heart disease of all developed nations, but it was in North Karelia, where 70 per cent of the population do farm work or forestry, that the mortality rate was at its worst. Now, North Karelia has dropped to fifth place among Finnish counties.

GOVERNMENT AND W.H.O. HELP

Concerned community leaders petitioned the national government for help, and in 1972 the state-financed program began with assistance from the World Health Organization.

Dr. Puska said: "We knew from many studies that three factors working independently—smoking, high blood cholesterol and high blood pressure—were major causes of heart disease. Those causes seemed to hold true for North Karelia. They smoked too much, they had high blood cholesterol and they had high blood pressure. We had to change that entire situation."

He did that by involving the entire community in various projects. A team of 15—half medical and the rest economists, sociologists, psychologists and similar professions—evaluated the results at the University of Kuopio.

Laws were passed forbidding smoking in public buildings and on public transport, and many private offices voluntarily joined the campaign. Newspapers and radio stations,

leaflets and posters all publicized the danger to the heart from smoking.

Preliminary results now show that 44 per cent of the male population still smoke, compared with 54 per cent when the project began.

Reducing the fat in the blood stream was difficult because the North Karelian diet is traditionally based on fatty foods using local products.

NONFAT MILK PROMOTED

"We worked with the dairy which was a key source of the fat. We wanted people to switch from regular milk to low fat milk. The dairy people were very helpful and they promoted low fat milk and eventually nonfat milk," Dr. Puska said.

People also liked to spread thick butter on their bread. "We asked the community to use margarine. We wanted to mix vegetable oil in butter, but there were legal complications now being resolved in Parliament," he said.

Grilled sausages were a popular food, especially after an exhausting steaming sauna. But the local product contained too much fat and it took several experiments until a substitute was found using mushrooms growing freely in the surrounding forests.

Sausages are now made with a 25 percent mushroom content. "They're delicious and sell very well," Dr. Puska said.

Fresh vegetables were rarely seen on the dinner table. Housewives were urged to buy vegetables and a major campaign was began to have everyone start a vegetable patch.

DECLINE IN USE OF BUTTER

Preliminary evaluations showed users of low-fat milk increased from 17 to 56 percent and users of butter decreased from 86 percent to 69 percent.

But preventing high blood pressure was not possible. "There is no real knowledge of how to prevent high blood pressure from starting. We don't really know what causes it, but we could help by detecting problems earlier than before," Dr. Puska said.

Everyone had his blood pressure taken at frequent intervals, a register was kept and drug treatment was given in a number of cases.

After four years, the percentage of men receiving hypertension treatment increased from 3 to 10 and in women from 9 to 14—an indication the disease was being discovered at an early stage, allowing for better treatment.

Mr. KENNEDY. Mr. President, this brief clipping recounts the results of a truly remarkable 5-year program which reduced the incidence of heart attacks by 40 percent in one county in Finland. The Finns accomplished this feat through elementary techniques of preventive medicine. Through persuasion and advertising, the investigators involved were able to cut cigarette smoking, change diets to reduce blood cholesterol, and convince the target population to seek medical attention for high blood pressure.

These relatively simple interventions produced a truly remarkable improvement in health status. In this country we have only begun to understand the power of preventive medicine to ease the burden of illness under which we labor, and I commend Finland and the investigators involved for documenting the potential benefits of changing personal behavior for the purpose of saving lives.

ORBITER IS FIRST SPACECRAFT DESIGNED FOR SHUTTLE RUNS

Mr. GOLDWATER. Mr. President, appearing in the May issue of the Smithsonian magazine is an extremely interesting, well-written article about the spacecraft that will be flying shuttle runs within a few years to different satellites or workshops in space. This article was written by Michael Collins, who not only is one of our most famous astronauts, but who also runs the finest air and space museum in the world which is located at the Smithsonian Institution. Because the orbiter will become the part of the greatest step forward that man has ever undertaken, I believe the article is deserving of perusal by the Members of this body. I ask unanimous consent that this article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

ORBITER IS FIRST SPACECRAFT DESIGNED FOR SHUTTLE RUNS

(By Michael Collins)

When I was a kid reading Buck Rodgers, the spacecraft all looked like bullets or saucers, with sweeping fins and fancy tail skids. The real thing turned out to be more prosaic, but as Phase I of the space era winds down and Phase II begins, perhaps we are beginning to see Buck's dream emerge in the squat but elegant space shuttle, NASA's "flying brickyard."

The shuttle, also known as the orbiter, rockets into orbit but glides back to Earth. Proponents claim it will usher in a whole new era of routine space operations. Critics say it's unnecessary. Designed to be the country's space workhorse for years to come, the shuttle is a fascinating combination of old and new concepts, at once daring and conservative in design.

The basic idea behind the shuttle is simple enough: a craft that can be used over and over again, instead of falling into the ocean and being discarded, as rockets are. An early shuttle design featured a two-stage vehicle, each with a human crew. When the first stage ran out of fuel, it released the second, which continued its climb into orbit while the first returned to land on a runway. This concept was abandoned, primarily because of high initial cost, and the manned first stage was replaced by a pair of gigantic solid-propellant rockets. These rockets will fall into the sea when empty, as their predecessors have done, but they will descend via parachute and be recovered for use again.

The shuttle will continue under its own power, three rocket engines churning away—using fuel stored in a huge external belly tank that will be discarded before the ship reaches orbit. The principle of recycling has not been followed completely, since the external tank is lost. But the shuttle itself can make as many as a hundred flights between overhauls.

The first orbiter, Serial Number 101, was rolled out of its hangar at Palmdale, California, on September 17, 1976, amidst great fanfare. Senator Barry Goldwater blessed it, as did Olin (Tiger) Teague of Texas and a bevy of other politicians, bureaucrats and community leaders. NASA had intended to name 101 the *Constitution*, but the White House got so many letters from *Star Trek* fans that the name was changed to *Enterprise* in honor of Captain Kirk's starship.

The orbiter is generally described as about the size of a small jetliner, which is true in terms of length and width, but it is much bulkier and far more complex than any aircraft ever built. It must carry equipment needed not only to navigate and maneuver in space, but also to survive the searing heat of reentry into the atmosphere. In addition, the shuttle must be able to glide back to a safe landing, decelerating from an orbital speed of 17,000 miles per hour to about 180 knots as it touches the end of the runway. The rules of flight change radically as the craft passes from one aerodynamic regime to another. The complex sweep of the orbiter's delta wings and the exaggerated height of its vertical tail indicate the designers' concern about its ability to maneuver successfully from the hypersonic through the supersonic into the subsonic range.

Beneath its skin one finds equipment common to both airplanes and spacecraft. The flight controls, for example, are a combination of aerodynamic and reaction control systems. Above the atmosphere, maneuvering must be done by firing small rocket motors; in the atmosphere, conventional rudders and elevons are employed. In the middle speed and altitude range, during reentry, rocket and aerodynamic controls must be skillfully blended. The pilot is aided in this task by sophisticated computers, which decide just how much to move the control surfaces or how long to fire the rockets in order to change direction. Without them, the orbiter might lurch out of control into a hypersonic spiral from which the pilots could not recover before the craft exceeded its structural or thermal limits. The computers also perform a host of other chores, from keeping track of the fuel supply to remembering the orbital parameters of satellites that the crew may need to inspect or repair.

The orbiter needs electrical and hydraulic power, just as conventional jetliners do, for operating landing gear and flaps, but here electricity is provided by three lightweight fuel cells that use liquid hydrogen and oxygen, as in the Gemini and Apollo spacecraft. Hydraulic power is provided by ordinary pumps, but space temperatures are so low that the fluid must be heated or it will freeze in the lines. The cabins of airliners are pressurized so that passengers may breathe, but in the vacuum of space the orbiter must carry its own air supply.

The crew will be comfortable in their shirt sleeves, breathing 20 percent oxygen and 80 percent nitrogen at a pressure of 14.7 pounds per square inch—conditions like those we enjoy at sea level. The cabin of the orbiter will be quite similar to that of a jetliner, with pilot and copilot sitting side by side; seats behind them are provided for a mission specialist and a payload expert. Underneath this flight deck is a compartment with room for six additional seats, so that a total of ten people can be accommodated if required for a rescue mission. The crew can be as few as two, for the early test flights, or as many as seven, including scientific and technical people to care for a variety of payloads. A typical mission will stay in orbit a week, but if extra supplies are provided it can be stretched perhaps to 30 days.

The orbiter's bay is huge by present space standards, stretching for 60 feet along the fuselage. Clamshell doors swing outward to provide easy access to the 15-foot-wide cavity. The bay can handle cargo loads up to 65,000 pounds, some of which can be jockeyed around by the crew with manipulator arms. Two people at a time, protected by space suits, can inspect or repair payloads.

Satellites are very much a part of our daily lives, giving us ringside seats at the Olympics, tracking hurricanes, monitoring missile firings, identifying potential oil-bearing formations, seeking out subsurface water, mineral deposits and earthquake fault zones, and helping us predict the volume of spring run-

off by calculating the accumulation of snow in the mountains. Satellites can pinpoint sources of pollution, chart ocean currents, show where deserts are spreading and identify some crop diseases. But they must also be extraordinarily reliable, because they cannot be repaired or retrieved once in orbit. In the future, shuttle crews will be able to bring them back to Earth for repair. Thus, the shuttle will allow us to perform tasks which heretofore have been too expensive with one-shot expendable boosters and payloads.

ZERO GRAVITY EXPERIMENTS

The European Space Agency is producing a cylindrical spacelab, tailor-made to fit into the orbiter's cargo hold. It will accommodate as many as four scientists for a month of varied astronomical observations, physical and chemical experiments under zero-gravity conditions, and complex studies of the medical effects of prolonged weightlessness on the human body.

The Earth's atmosphere blocks out most of the electromagnetic radiation coming to us from the rest of the universe. After centuries, earthbound astronomers are increasingly anxious to break through this semi-opaque screen. Optical, infrared and ultraviolet observations aboard the shuttle and spacelab could begin in the near future.

How much does NASA expect to save with a reuseable vehicle? The real cost of a launch depends mainly on how one amortizes the initial research and development, but NASA recently has told potential foreign and commercial users to expect a price tag of approximately $20 million per shuttle mission, while U.S. government users will pay $17 million per flight. By comparison the shuttle's chief competitor, the Air Force's Titan III rocket, costs $46 million per launch, yet carries a substantially smaller payload.

Potential users, primarily the Department of Defense, were asked to list their needs for the Eighties and Nineties. The results of this survey indicate that approximately one launch per week should suffice, assuming the shuttle replaces all expendable boosters with the exception of the lightweight Scout. NASA would like to see more launches, which would reduce the unit price, and the Department of Defense foresees a need for some additional capacity in the 1983–91 period. But, Defense asks, what happens if they want to get a satellite up in a big hurry? Will NASA drop everything else to meet their needs? What happens if some defect turns up that grounds the five-shuttle fleet? What about sabotage? Shouldn't Defense keep an independent launch capability for emergency use? NASA wonders if the nation can afford to keep a redundant launch capability that might never be used. The total cost of designing and building the shuttle fleet and putting it into service is now estimated at $9.5 billion.

As a former astronaut and test pilot, however, it's not financing the shuttle that really interests me, but flying it. Although it won't go into orbit until 1979, its glide tests will begin this summer at Edwards Air Force Base, California. The *Enterprise* will be carried aloft by a Boeing 747 jumbo jet and released at 22,000 feet. For the first five of these flights, the orbiter has been modified slightly from its space configuration: a special streamlined tailcone has been added to reduce aerodynamic drag and improve glide characteristics. With the tailcone, flight time from release to touchdown is about five minutes. Without this device, the orbiter glides like a skipping stone and stays aloft only two minutes. The last three test flights will be without the tailcone. Another modification for the early tests is the addition of two ejection seats; accordingly, the crew will be limited to two. During the brief moments after they are freed from the 747, the pair will earn their pay, going through a fast-paced but elaborate series of maneuvers to measure the subsonic handling qualities of this 150,000-pound glider.

DEAD-STICK LANDING AT 180 KNOTS

With very little margin for error, and with no chance to compensate for a serious goof, the last 60 seconds of the shuttle test flights will be exciting indeed. Coming down at an angle of ten degrees with the tailcone on or 22 degrees with tailcone off, and a speed of about 240 knots, the pilot aims for a point just short of the runway When he reaches approximately 1,500 feet above ground he starts to flatten the glide path to 1.5 degrees, creating a stress 1.7 times the force of gravity. At no less than 300 feet, he lowers the landing gear. His craft is now decelerating rapidly as it crosses the runway threshold and approaches the selected touchdown point. As indicated, landing speed will be 180 knots when the orbiter is empty, slightly higher when it is carrying a load. All this with no engine power to correct for mistakes!

A power-off glide to a precision landing is not quite as death-defying as one might imagine, however. With computers to help, both on the ground and aboard the orbiter, the pilot will know whether he is on the proper glide path. Corrections back to the ideal path can be made by varying airspeed, making S turns or using the speed brake. Completely automated landings, with no help from the pilot, will be possible ultimately, even under the worst weather conditions.

After the *Enterprise* leaves Edwards in 1978, two years of ground tests will measure system stresses under simulated flight conditions. In March 1979 the second orbiter, as yet unnamed, will be first to venture into space with human beings aboard from Pad 39 at Kennedy Space Center, the old Apollo moon-launch site. Again a crew of two, sitting in ejection seats, will be employed.

In former times, putting men aboard a test vehicle that had never been in space would have seemed daring. But NASA is more confident now than in the days of Saturn V. Without crews, both flight sequences would have had to be automated, including the tricky reentry and landing at Edwards. The idea of an unmanned test orbiter zooming in from the Pacific and zipping over southern California at 1,700 miles per hour made planners a little edgy.

The airplanelike shape of the orbiter, its external belly tank and the two solid rocket motors combine to create the most complex configuration ever rocketed from Kennedy Space Center. This lack of symmetry puts an extra burden on the shuttle's control systems during launch, for as it gains speed and its wings produce more lift, it will tend to veer off, so it must be pulled back into line by swiveling the rocket engines to the opposite side. As it passes the speed of sound, the orbiter's shock waves will interact with those produced by the external tank and the solid rockets.

Predicting what will happen then is more of an art than a science, but it is believed no dangerous vibrations or oscillations will result. If they do, the crew can probably eject to safety. If the shuttle is going to act up, we hope it will do so early in the flight test program, because after the first four flights from Kennedy Space Center, out come the ejection seats, and in goes the normal crew of four or more. Then they will be at the mercy of the solid rockets, for once they ignite the crew has no choice but to hang on for the ride. After the solids burn out at an altitude of 25 miles, the crew can turn around and head back to Kennedy if things don't look right. This arrangement makes an old pilot like me nervous, but solids have a very good safety record, and a low altitude abort capability may be simply an outmoded vestige of the early days of space flight.

Previous manned vehicles have controlled thermal buildup by shedding tiny chunks of incandescent heat shield. The orbiter has no shield of this type, but its belly is protected by semipermanent silicacoated ceramic blocks designed to radiate heat back into the atmosphere. Their checkerboard finish gives the orbiter the bizarre look of a flying brickyard.

Who will fly this strange craft? Initially, the same group of astronauts and test pilots we have become familiar with over the years. Commander of the first drop test at Edwards will be Fred Haise, who limped back from the moon aboard Apollo 13 after its oxygen tanks exploded. The captain of the second Edwards test will be Joe Engle, veteran of a dozen X-15 hypersonic research flights. The first orbital crew has not yet been picked, but they probably will be familiar names. Beyond that point a newer generation doubtless will begin to emerge.

NASA has realized that it needs more crew members and has issued invitations for both pilots and mission specialists to apply, but no later than July 1, 1977. The agency is looking for young, well-educated, highly motivated specialists, male or female, to usher in Phase II of America's adventure in space. The machine they fly certainly will be different, combining such daring features as a manned first launch and a power-off landing with the more conventional aircraft systems. It sounds so promising and so much fun that maybe even a broken-down former astronaut or two will slip application papers into the pile.

DEFENSE MANPOWER PAY AND COMPENSATION

Mr. MUSKIE. Mr. President, during the past several years, I have become increasingly aware of the concern of our Nation's servicemen that defense manpower pay and compensation is being diminished piecemeal by Congress, with no attempt to relate partial changes in the system to their overall effect on the living standards of servicemen and their families.

The issue is vital, not only because manpower costs consume a sizable proportion of our defense budget, but also because of the interest we all have in maintaining a high degree of professionalism and dedication in our armed services.

There is a clear need for a reform of manpower pay and compensation policies which can lead to substantial savings in the military manpower budget. Without such reforms, I am concerned about the potential rate of outyear cost increases for manpower accelerating, and this rate of momentum cannot continue without seriously undermining our ability to build and maintain the needed improvements in our defense forces.

At the same time, it is impossible for our service members to maintain their morale and dedication when they fear that their concerns are being ignored by Congress, and their compensation whittled away without regard to their needs.

That is why I welcome the President's decision to appoint a commission to study the total compensation package of the uniformed services and to recommend necessary adjustments within the framework of the total system.

One of my constituents, Captain Wallace of the U.S. Navy, has expressed far better than I could the feelings of the career serviceman as he faces the

future. I ask unanimous consent that this letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

ANNANDALE, VA.,
March 17, 1977.

Hon. EDMUND S. MUSKIE,
U.S. Senate,
Russell Office Building,
Washington, D.C.

DEAR SENATOR MUSKIE: I very much appreciated receiving your recent mailing detailing your remarks on the economic stimulus package. It is not often that those of us serving in the Armed Forces outside of Maine are included on the mailing lists of our Senators or our Representative. I would personally appreciate being retained on your mailing list if possible.

As a career naval officer with over twenty years of service, I wish to address to you a matter of great personal concern to me and many of my fellow servicemembers. Hopefully, my thoughts will be of some value to you as the issue I am about to discuss is debated in the Senate during the 95th Congress. The issue to which I am referring is the ever-mounting criticism of the proportion of total Defense spending allocated to manpower costs, and from my perspective, the mistaken resultant conclusion that military personnel are overpaid.

I wish to preface my remarks by assuring you that I, personally, do not consider myself underpaid. If that were so, I would quite likely have left the Navy long before now. On the other hand, I do not consider myself to be lavishly compensated when I view the demands of a service career relative to alternative professions. On the opposite end of the spectrum from myself as a relatively senior officer are the junior enlisted members who, relative to many of our fellow citizens of Maine, are also reasonably well compensated for their service. However, these servicemembers are not lavishly paid either, as attested to by the difficulties facing the Services in attracting adequate numbers of recruits even during the prevailing period of high national unemployment.

I know you are well aware of the inequitable tax that the draft formerly imposed upon the young men of this nation. When we abolished the draft in favor of an All Volunteer Force concept, we accepted the fact that as a nation we would all have to share in the payment of this tax by providing our first-term personnel equitable wages. This was a relatively expensive decision, but in the aftermath of Vietnam, one which was readily made by a war-weary and conscience-stricken nation. To date the All Volunteer Force concept has enjoyed a measure of success many of us doubted possible; however, in my opinion, this success has been due in large part to a sustained high unemployment rate and a concurrent major force reduction. Recent trends and future prospects cause me to be less than sanguine about the viability of the concept in the years ahead unless we squarely face difficult compensation equity questions.

In January of 1972, the Department of Defense reported to Congress that military pay had attained "reasonable competitiveness" with the private sector. Over 60% of those of us on active duty today were recruited into the All Volunteer Force and entered military service since that time. These volunteers were recruited on the promise of continued equitability of pay and an advertised "fringe benefits" package that marked the military as a model employer at that time. In the intervening five years employers in the industrial sector of the private economy with whom the Services compete for manpower have developed fringe benefits packages that now rival or exceed that of the military. Largely as a result of union-negotiated labor contracts, employees of these firms have also received basic wage increases which have not only kept up with skyrocketing inflation but also provided a modest measure of real growth in purchasing power.

Over this same period Federal employees, including the military, have had their wage growth restrained in an effort to hold down Federal spending, and as noted by the President in 1975, to set an example of fiscal responsibility for the nation. Unfortunately, the example was not widely emulated, and Regular Military Compensation has suffered a decline in purchasing power since 1972 while gains were being realized in the private sector. It is against this backdrop of hard economic reality that the servicemember has viewed the raging debate over excessive manpower costs and the need to reduce overly-generous fringe benefits. It has been a disheartening and demoralizing experience to many, and the direct cause of failure to reenlist, resignation and early retirement for others.

Virtually every major military pay and benefit area has either been altered or totally withdrawn over the last five years: retirement, medical care, education, leave, specialty pays, reenlistment bonuses, and even the method of applying the annual "comparability" raise. Some of these same elements and others as yet untouched have been under continual review and threat of cut: retirement, commissaries, medical care, housing and tax-free allowances. The result of these uncoordinated piecemeal, changes, real or only threatened, has been a growing anxiety among servicemembers over the future security offered by a military career. A recent DOD survey reveals that 85% of the 20,500 enlisted members surveyed believe their pay and benefits to have been eroded over the last four years. This view was held by 23 out of every 24 members surveyed in paygrades E–4 through E–9.

I believe the Services and DOD have acted responsibly in attempting to address the problem of rising manpower costs. We developed and proposed a retirement reform in 1972 which at the time was viewed as a drastic benefit cut by our people, but which has recently been characterized as not drastic enough by many critics. Nonetheless, failure to act on the proposal has already cost taxpayers over $3 billion in potential savings through the year 2000. In 1974 the Services also supported a change in the law to terminate the so-called "Rivers Amendment" which placed all of the annual comparability raises in basic pay, thereby further escalating retirement costs. In 1976 we supported elimination of the 1% add-on increase in each retired pay adjustment which had unduly escalated retirement annuities during our recent inflationary years.

Throughout this time frame the Services have been appealing for definition of a comprehensive military compensation policy, including an agreed-to, defined standard against which to judge the adequacy of total military pay and benefits. Somehow this determination has always been too difficult to make; and lacking it, the random, uncoordinated changes to pay and benefits have continued in the hope that, while making apparently reasonable economies, we weren't inflicting a fatal blow on the All Volunteer Force.

President Carter has now announced his intention to establish a Blue Ribbon Panel to review the findings of the recent Defense Manpower Commission, Third Quadrennial Review of Military Compensation and other relevant studies. The Panel is to report its recommendations for a comprehensive military compensation policy to the President on or about 1 September 1977 with the intent of implementing recommended changes, if any, beginning in FY 79. Speaking as a career serviceman with a great love of the Navy and a strong desire to continue serving until forced into retirement, I fervently hope this time we will allow the Panel to conclude its deliberations and then act to implement its recommendations.

We careerists aren't adverse to change. We are merely frustrated and disheartened as a result of remaining under continued fire from the public we have chosen to serve. Whatever recommendations the Panel should make, I am certain the career servicemembers will support them provided they include an agreed-to standard against which to evaluate pay and benefits in the future; a standard which guarantees the reasonable expectations of career servicemembers for their own and their dependent's or survivor's future security.

Senator Muskie, I urge you to speak out from your influential position in the Senate in favor of a moratorium on further pay and benefits changes until such time as the President's Blue Ribbon Panel can conclude its deliberations and the Congress can act upon its recommendations to establish a comprehensive military compensation policy that is both fiscally responsible and in the best interest of national security. I am convinced that only in this way can we traditional Service leaders in the Congress, the Administration, and the Services themselves restore the confidence of our people that we are prepared to represent them in their aspiration to preserve military service as an honored and attractive profession. Failing this, I fear that none of us will succeed in stemming the rising sentiment favoring military unionization; an eventuality I believe would irrevocably alter the two hundred year tradition of Service to Nation which has been the hallmark of the U.S. Armed Forces.

Thank you for taking time to consider this lengthy letter. It need not to be answered or acknowledged unless you choose to, as I have provided it merely to acquaint you with my views on an issue of personal concern to me.

Sincerely yours,

RICHARD J. WALLACE,
Captain, U.S. Navy.
Permanent Residence: Topsham, Maine.

CIVIL DEFENSE: WE NEED IT

Mr. GOLDWATER. Mr. President, for many years the nuclear strategy of the United States has been based on the theory of "assured destruction." The belief has long been that a first strike by either of the world's leading nuclear powers would bring such destructive retaliation that neither side would ever resort to such a course. Now the question arises as to what would happen if either the United States or Russia could be assured of withstanding to an acceptable degree a retaliatory assault by the other. Mr. President, what I am getting at here is the problem arising from the Soviet Union's great emphasis on civil defense at the present time. The new phase of Russian activity has led to an interesting scenario recently released by the Pentagon. Suppose in some future confrontation between this country and Russia, the Soviets simply evacuate their cities and then threaten to bomb American cities.

Mr. President, this question is becoming more important every day in the matter of nuclear balance of strength. A recent editorial in the Phoenix Gazette, underlines this problem, and explains why we need greater emphasis on a civil defense program in this country. I ask unanimous consent that this article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

CIVIL DEFENSE: WE NEED IT

American nuclear strategy is based on the theory of "assured destruction."

Former Secretary of Defense Donald H. Rumsfeld has said the U.S. hopes to deter Russia from a nuclear war by having "some minimum force which can survive even a well-executed surprise attack in adequate numbers to strike back with devastating force at an enemy's economic and political assets."

Quite simply, if the Russians know the United States can absorb a first strike and retaliate with total destruction of the Russian economy, they will never launch their nuclear-armed missiles.

American statesmen were so convinced of the validity of "assured destruction" that they agreed, in the first SALT agreement, to give up this country's lead in anti-ballistic missiles. If neither side had an effective defense, went the argument, there would be even more validity to the theory of "assured destruction." That would bolster the "strategy of terror" on which the U.S. depended.

At the end of World War II the Air Force made a survey on Hiroshima, where a nuclear device had been used on an undefended city. The survey showed that the A-bomb had not been all that awesome.

On the day after the bomb was exploded, "bridges into downtown Hiroshima were opened to traffic, and electric service was restored in some areas. On the second day, trains were again operating. By the third day, some streetcar lines resumed service. Within nine days, telephone service was restored to the center of the city. In the outlying areas of the city, water, sewer, and gas service was never interrupted."

Presumably a city prepared for an atomic war could recover much more rapidly than was done by unsuspecting Hiroshima. The Russians are preparing themselves for such a recovery.

They have given civil defense a high priority at the same time they are building up their offensive nuclear arsenal. This defense consists in evacuating industrial centers, protecting the workers in crude but effective bomb shelters, and then sending them back to rebuild the devastated cities.

This new phase of Russian civil defense has led to an interesting scenario recently released by the Pentagon. Suppose, at some future confrontation between the United States and the Soviet Union, the Russians simply evacuate their cities and then threaten to bomb American cities.

The enemy would, in effect, be holding American cities as hostages. Either the U.S. would back away from the confrontation or Russia would launch an attack with the assurance it could survive a retaliatory attack.

This may be far-out military theory, but the possibility has some serious planners worried. Many congressmen are wondering whether the virtually discarded American civil defense shouldn't be reactivated.

It may be later than anyone thinks in the matter of plans to survive an atomic attack and win a nuclear war.

ETHICS COMMITTEE NOTICE: ALL SENATE STAFF MUST FILE OUTSIDE EMPLOYMENT REPORTS

Mr. STEVENSON. Mr. President, I and Senator SCHMITT, for the Select Committee on Ethics, give additional notice that rule 45, paragraph 3, requires all Senate officers and staff who are engaged in outside business or professional activity or employment for compensation to file with their supervisor on May 15, next, a report of each activity or employment.

Senators and staff are further advised that, under the "definitions" provisions of rule 49 of the Senate Code of Official Conduct, agreed to April 1, 1977, and which took effect April 2, 1977, the outside employment report requirement now applies, not only to persons whose salary is disbursed by the Senate, but also to any officer or employee of the Government detailed for service in a Senate office and any other individual whose full-time services are utilized for more than 90 days in a calendar year by a Member, officer, or employee of the Senate in the conduct of official duties. In other words, the new rule on this matter requires any detailed Government employee, educational fellow, or full time volunteer to file a report of his or her personal service activity or employment for compensation.

It is the responsibility of each individual to file the report with the supervisor at the time his or her Senate office employment detail or assignment starts—if there is outside employment to report—at the time outside employment starts and anew on May 15 of each year.

We further advise the Vice President, Senators, and officers of the Senate that rule 45 requires them as supervisors to review these reports and to take such action as is necessary for the avoidance of conflict of interest or interference with duties to the Senate.

Staff are reminded that they must file a new report in mid-May, if they have outside service or employment activity, even if they have filed one previously. Staff who have no such activity or employment need not file a report.

Inasmuch as May 15 falls on a Sunday this year, staff should file their reports with their supervisors this year by close of business Monday, May 16.

Forms for making this report may be secured by calling the committee, extension 4-2981, or by visiting the office, 1417 Dirksen.

YOUTH EMPLOYMENT

Mr. JAVITS. Mr. President, last Friday, April 22, the Employment Subcommittee of the Senate Human Resources Committee, of which I am the ranking minority member, held the third of 3 days of hearings on S. 1242, the Youth Employment and Training Act.

The committee and the Nation had the benefit of the fine testimony of three of our distinguished colleagues: the Senator from Oklahoma (Mr. BELLMON), the Senator from New Mexico (Mr. DOMENICI) and the Senator from Idaho (Mr. MCCLURE).

Mr. President, the perspective and the wisdom of these three members of the Senate Budget Committee, who have spent so many hours examining the serious and endemic problem of youth unemployment in our country, should be read by all who have an interest in the legislation now moving through Congress. Their work is, itself, testimony to their commitment and dedication to alleviating the critical problem of such severe structural unemployment among our young people as to account for 50 percent of all the unemployed in the United States.

Mr. President. I ask unanimous consent to have printed in the RECORD the statements of Senator BELLMON, DOMENICI, and MCCLURE.

There being no objection, the statements were ordered to be printed in the RECORD, as follows:

STATEMENT OF SENATOR HENRY BELLMON BEFORE THE HUMAN RESOURCES COMMITTEE, APRIL 22, 1977

Mr. Chairman, I concur with my colleague from Idaho in that I appreciate the opportunity to testify, and I also want to associate myself with his remarks. Additional focus on private sector incentives to hire youth will enhance the youth unemployment legislation. I also favor the allocation changes in the Javits-Humphrey amendment as discussed by Senator McClure.

I, too, support legislation to address youth unemployment, but there are specific provisions before the Committee which I find troublesome and which I want to call to the attention of the Committee. S 1242 provides programs only for out-of-school youth. The Javits-Humphrey amendments provide for a 15% set aside for programs for in-school youth to be jointly coordinated by the prime sponsor and the local education agency. While the amendment improves the legislation, I don't believe it completely solves the very serious problem in regard to public school involvement in the youth unemployment program.

A youth bill which ignores the public education agencies is not desirable. Prime sponsors must work in concert with local education agencies to avoid duplication of effort in regard to services now available in the schools. With local resources and state and federal vocational education resources, many local education agencies are providing training, counseling, and placement services. Any new services should be coordinated with such existing activities and the excessive costs of dual delivery systems should be avoided.

In the past, vocational and other education programs and job creation programs have operated independently of one another for the most part. When support for work-study programs has been available to education systems (as in Part H of the vocational education act), the schools have been hampered by matching requirements, youth salary restrictions ($45 per month under Part H), and lack of administrative and counseling support.

Job programs outside the schools have often competed with the schools and have stimulated school drop outs as disadvantaged youth actually leave school in order to qualify for the more lucrative work programs. All too often these youth are returned to the ranks of the unemployed once the public subsistence program has ended. We must put an end to the incentive to drop out of school in order to take part in a jobs program.

We are simply worsening the long term problem when we fail to provide the education and training necessary to continue employment and to transit youth served from the public to the private sector.

I feel it is appropriate for in-school youth to be served and language should be provided which requires that in-school youth must remain in school in order to be eligible for the program.

The provision in S. 1242 which encourages that academic credit be given for training programs is desirable; however, I must strongly oppose the mandate that federal regulations should be promulgated for providing such credit. Granting of academic credit is a state and local prerogative, and the federal government has no business usurping this role. I urge the Committee to delete the provision requiring federal regulations. All decisions on provision of academic credit should be left to the appropriate state and local agencies.

I want to express my thanks again to the Committee, and I request your consideration of the concerns I have outlined.

STATEMENT OF SENATOR PETE V. DOMENICI BEFORE THE HUMAN RESOURCES COMMITTEE, APRIL 22, 1977

Mr. Chairman, as an advocate of legislation to provide programs for unemployed and underemployed young people, I want to commend the Employment and Poverty subcommittee for their actions to date in negotiation with the several Senators who sponsored youth bills and the administration. I agree with the modifications suggested by Senator McClure and Senator Bellmon, and I want to add my support to their recommendations. As a co-sponsor of two of the youth bills which are incorporated into S. 1242, I certainly plan to support the Human Resources Committee bill.

As the subject of this hearing covers CETA public service employment as well as youth unemployment, I would like to discuss a CETA problem of great concern to me.

Local education agencies employ approximately one-half of all local public employees.

The 1972 Census of Governments, published by the U.S. Department of Commerce, demonstrates the following comparison of local school districts employment with general units of local government:

Number of employees	Counties	Municipalities	School districts	Percent of total
Full time	1,369,000	2,376,000	3,587,000	48.9
Part time	1,777,000	1,920,000	2,710,000	46.7
Full time equivalent	1,242,000	2,029,000	2,981,000	47.7

In addition to teachers, local school districts employ a large number of central office personnel, teacher aides, bus drivers, cafeteria workers, paraprofessionals, and building and grounds maintenance personnel (such as, engineers, janitors, gardeners, electricians, and carpenters). In fact, about 30% of all school personnel are non-professional. The point is that local systems can productively employ a wide range of persons who are currently out of work, as well as provide jobs which have future value in the private sector.

Since approximately ½ of public employees are school districts, it would be reasonable to assume that ½ of PSE slots go to school districts. This has simply not been the case.

While national data is not available on the percent of CETA jobs money which is passed on to local school districts, it has been estimated at less than 10%. Data has been collected for a number of metropolitan districts as shown in the attached tables. School district percentages here range from 0% to a high of 37%.

Municipal, county, and state governments have received anti-recession aid from the federal government through a variety of sources—revenue sharing and public works as well as CETA. Our nation's school districts, also hit hard by the recession, have received very little federal anti-recession assistance.

For example, General Revenue Sharing provides state and local units approximately $6.8 billion of "no-strings attached" assistance every year. In the first years of the program, elementary and secondary education received about 7% of these funds in the nature of new program money (as distinguished from tax relief). The main reason for this underfunding is that local school districts are not eligible as direct recipients and neither the states nor general units of local government are required to provide them with a minimum set-aside. While data is not yet available, a similar result under the $1.25 billion counter-cyclical revenue sharing program would not be surprising. Finally, under the Public Works Employment Act, under the first round of funding, school districts received only 19% of these funds—and then only because they were direct recipients.

We have seriously neglected the economic plight of our schools during the recession. Local school districts are the major local government employer, the demand for productive new positions exists, and funds to pay for those positions cannot be raised without local property tax increases. Therefore, it is difficult to understand how public employment can best serve the economic recovery without the direct involvement of local school districts.

In the past two years, Congress has passed several federal laws which mandate increased education services without fully funding these services. The S. 504 requirements to remove architectural barriers for the handicapped, the individualized programs required under the Education of Handicapped Act (PL 94–142), and the extension of Unemployment Compensation to Public Employees (PL 94–566) have placed additional burdens on our schools.

I believe it is time to recognize the financial plight of our local education agencies. I intend to offer an amendment to CETA titles II and VI which requires prime sponsors to redirect not less than ⅓ of their total CETA grants to local school districts located within their respective areas. While a ⅓ share is not fully representative, given the proposed expansion of the program from 310,000 to 725,000 jobs, it should open up school employment without disrupting existing job commitments for prime sponsors—including those prime sponsors who are currently providing only minimal assistance for local school districts.

Education agencies can provide meaningful employment through the public service jobs program. Education agencies are accustomed to supplementary federal programs, and therefore are not likely to substitute local funds with federal funds, thus greatly diminishing the effects of substitution in the total program. And finally, local education agencies have a great need which I believe the Congress has responsibility to address.

I urge the Human Resources Committee to support this proposal.

LOCAL DISTRIBUTION OF CETA FUNDS—FISCAL YEAR 1975

	Total school employees	Total non-school public employees	Total school CETA dollars	Total local CETA dollars	School percent of public employees	School percent of CETA dollars
Boston	14,000	15,168	$128,415	$17,300,000	48	0.7
Buffalo	6,196	6,616	177,950	13,200,000	48	1.0
Chicago	49,853	45,000	1,700,000	16,000,000	53	11.0
Cleveland	12,466	11,400	4,600,000	12,500,000	52	37.0
Dade County	21,016	19,980	615,000	3,500,000	51	18.0
Houston	13,877	13,471	0	16,000,000	51	0
Long Beach	5,019	4,550	286,000	21,000,000	52	1.0
Los Angeles	77,759	48,720	6,900,000	42,000,000	61	16.0
Memphis	10,466	7,400	115,554	6,900,000	59	2.0
Milwaukee	14,400	9,700	$673,000	$4,600,000	60	15.0
Minneapolis	7,400	7,463	580,000	4,400,000	50	13.0
Oakland	7,000	4,422	2,800,000	9,400,000	61	30.0
Pittsburgh	6,493	6,076	551,841	7,400,000	52	7.0
Portland	5,599	4,730	38,000	1,500,000	54	3.0
San Diego	9,533	6,368	1,500,000	6,900,000	60	22.0
San Francisco	9,101	20,034	100,000	13,000,000	31	.8
Toledo	4,759	3,522	424,590	5,100,000	57	8.0
Washington, D.C.	12,107	31,701	932,284	15,500,000	28	6.0

School system and budget situation	Number of school employees	Number of city employees	CETA allocations to school system[1] (millions)	CETA allocations to prime sponsor[2] (millions)	School system: Percent of CETA allocations	School system: Percent of public employees[3]	Budget (millions)	City budget (millions)
Atlanta	8,469	9,000	$1.9	$21.1	9	48	$108	$100
Dade County: Anticipate terminating 458 teacher aides and 277 clerical workers next year to help alleviate estimated $31,000,000 deficit	26,190	22,243	2.6	22.0	12	54	521	639
Memphis: Program cutbacks required	11,838	7,518	1.4	11.6	12	61	132	129
Minneapolis: Anticipate cutting $6,000,000 in services and salaries; 300 to 400 jobs will be terminated	7,491	5,500	2.7	13.3	20	58	85	70
Nashville: Anticipate program cutbacks but no employee terminations	4,446	3,554	2.1	9.2	23	56	95	123
Buffalo: May have to terminate 400 to 600 teaching positions	5,749	5,818	.5	19.8	3	50	100	157

[1] Includes prime sponsor grants to local education agency under titles I through VI for fiscal year 1976.

[2] Includes total allocations under titles I through VI for fiscal year 1976.

[3] Compares employees supported by local funds only.

STATEMENT OF SENATOR JAMES A. MCCLURE BEFORE THE HUMAN RESOURCES COMMITTEE, APRIL 22, 1977

Gentlemen, I appreciate the opportunity to appear here today to discuss youth unemployment. As the need for legislation in this area is well documented and has been discussed in detail on the Senate floor as the various bills have been introduced, I will confine my remarks to consideration of the specific provisions of the legislation.

As a strong proponent of legislation to address the problems of unemployed youth, I am gratified by the timely response of the Human Resources Committee and the plan to move ahead in this area as quickly as possible. The amalgam of youth proposals in Senate Bill 1242, the Youth Employment and Training Act of 1977 is a comprehensive approach with many commendable components. I was particularly pleased that Part C of the bill incorporates much of S. 503, the Youth Employment Act which I introduced with Senators Domenici, Bellmon, and Javits.

I was also a co-sponsor of the Stafford-Randolph Bill which was the precursor of Part B of S. 1242.

While I basically support the approach of S. 1242, there are several areas which I feel can be improved. The basic approach to Part C of the bill is similar to S. 503 in that funds are provided to CETA prime sponsor to support a broad range of manpower services. The actual mix of services in any given area can thus be based on the needs of the local labor market. While I whole-heartedly endorse this approach, I believe that the eligible activities should be expanded to provide incentives to private employers to train or employ unemployed or low-income youths. I refer the committee to subsections 8 and 9 of Section 701(b) of S. 503.

The emphasis on training and job creation in the private sector contained in these sections should be incorporated in the final committee bill.

Permanent and meaningful employment for our young people must ultimately be found primarily in the private sector. Increased interaction between the manpower service programs and the private sector should result in greater freedom of selection for young people, more relevant training to match job opportunities, and greater likelihood of moving our youth into gainful employment in the private sector. I ask the committee to add language which provides a greater focus on the private sector.

Several other problems I find with the bill have been addressed by Senators Javits and Humphrey in amendment number 184. The allocation of funds for youth unemployment programs should be based on the number of unemployed and low-income youth rather than on unemployed and low-income persons. The amendment which provides 50% of the funds on the basis of low-income youths should be adopted. In addition, a minimum of 75% of the Part C funds should flow by formula to prime sponsor with a maximum of 25% of the funds available for DOL discretionary grants. S. 1242 authorizes such sums as are necessary to carry out the purposes of the Act. A specific number of dollars is preferable, and I support Senator Javits' recommendation of $1 billion in FY 77 and $2.5 billion in FY 78. This authorization should be broken down further by Part, and I support the amendment level of 23% for Part A, 17% for Part B, and 60% for Part C.

Again, I thank the Committee for the opportunity to testify, and I look forward to Committee action on this issue.

SENATE ACTION BENEFITING OLDER AMERICANS

Mr. KENNEDY. Mr. President, I recently had the opportunity to read a speech delivered on April 19, 1977, by my good friend and colleague, Senator BILL HATHAWAY, to a group of retired senior volunteers participating in the RSVP program in the State of Maine.

This program was implemented under the Older Americans Act which was first considered and reported by the Senate Committee on Labor and Public Welfare on which both Senator HATHAWAY and I have served for a number of years. We have worked together in oversight of all of the Older Americans Act programs and most recently on strengthening amendments enacted in 1975. Consequently, I was pleased to learn that the RSVP program is working well in his State, as it is in my own State of Massachusetts.

Mr. President, in order that my colleagues might be aware of the importance of these Older Americans Act programs and the continuing need for all our Federal programs to reflect the needs and concerns of our older Americans, I ask unanimous consent that Senator HATHAWAY's speech be printed in the RECORD.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

REMARKS OF SENATOR WILLIAM D. HATHAWAY

It is a pleasure to be here for the fifth anniversary and celebration of the existence of the RSVP program in Androscoggin, Franklin, and Oxford County.

I extend my sincere congratulations and gratitude to each of you who have given so much of your time and yourselves. Through your work in nursing homes, in hospitals, in schools, in nutrition programs in health programs and in working with retarded children, you have done a great deal to bring needed services to many throughout the tri-county area.

In addition, as Older Americans you have collectively demonstrated that retirement is not a retreat from society but rather is an expanded opportunity to devote your efforts to serving others. You have also shattered the stereotype image which too many have of the elderly—you are not helpless, and, given the opportunity and the resources, you are able not only to help yourselves but everyone in your community.

I would like to outline the current problems faced by older Americans, the response to these problems by the Congress, and then open the floor to questions.

There is a growing recognition that the problems of older Americans are the problems of all Americans, and these problems must be faced in a comprehensive fashion to ensure the well-being of our society as a whole.

In 1900, the average life expectancy of Americans was 49 years. Today it has increased to 71 years. Similarly in 1900 those over 65 years comprised 4% of the total population, or one American in 25.

Today, 22 million people or one in ten Americans is over 65, and by the year 2000, this figure will grow to 28 million. It is clear that there is a strong and growing need for programs and policies to help every individual who falls into this group.

Current problems faced by older Americans include health care. While 82% of older Americans get along quite well on their own, these individuals are subject to more disabilities, see physicians 50% more, and have twice as many hospital stays, and, the stays last twice as long as those of younger Americans. The average health care costs of those over 65 is almost 4 times that of those under 65.

Older persons enjoy less than half of the income of their younger counterparts. Over one-sixth of the elderly live in conditions below the government established poverty level. They must spend more of their income on food, shelter and medical care, and less on other items than do younger Americans. They are hit harder by inflation since they have little flexibility in budgets which are already stretched to the breaking point.

The ratio of older women to older men is currently 139 to 100. While over three-fourths of older men are married, over half of women are widows. Over 40% of older women live alone or with non-relatives. One in twenty older Americans live in institutions.

Due to a lack of transportation, many older Americans are unable to get to needed services—health care, food stores, other shopping areas. A larger percentage of older Americans live in rural areas than do those under 65. In a recent survey, over 40% of the households comprised of older Americans did not own automobiles.

FEDERAL LEGISLATIVE RESPONSES TO THESE PROBLEMS

A. The Older Americans Act was first passed in 1965, amended in 1972, and most recently in 1975.

I was pleased to co-sponsor these amendments and to serve on the Senate Committee which considered this legislation. It authorizes Federal funds for the following purposes:

1. As you know, Retired Senior Volunteer Program (RSVP), Foster Grandparents, and Senior Companion Programs are all Older American Act Programs administered through ACTION, the federal agency which also handles VISTA and the Peace Corps.

2. Nutrition programs include Meals on Wheels and other hot lunch programs. The most recent legislation mandates that the Secretary of Agriculture purchase meats and other high protein foods, and increases the subsidy for such meals to be provided by the Secretary of Agriculture.

3. Transportation Services—for the elderly, to assist them in getting to Doctors, to do needed shopping.

4. Part-time community service jobs for those 55 and older. Many older Americans are not yet ready for full retirement and still want to contribute to their communities and feel that they have an active role to play. This program will coordinate local community service job programs and require that priority be given to part-time older workers.

5. Home services, including health care and homemaking services. Many older Americans do not require full-time care in a nursing home or other institution and do not want such care. But they do need assistance in performing many household chores and need some medical care short of going to a hospital. This legislation will provide to State Agencies on Aging the funds to develop such programs.

6. Legal and tax counseling—There is a need recognized by Congress to provide our elderly citizens with legal and particularly tax assistance to cope with increasingly complex forms and regulations.

7. Multipurpose Senior Centers—to provide nutrition programs, recreation, and other services.

8. Research and training concerning the causes of aging and the problems associated with it. This act provides funds for Universities to set up programs for the study of the aging process.

9. Discrimination against elderly—The Older Americans Act bans unreasonable discrimination on the basis of age in federally funded programs, and provides for a study of the extent of discrimination on the basis of age in other areas.

The Older American Act programs are administered by a total of 412 local agencies, which now reach over 70 percent of our senior citizens. During the current fiscal year, Congress appropriated $400 million to these programs, the largest in history.

OTHER LEGISLATION

1. Tax Reform Act—As a member of the Senate Finance Committee which has responsibility over our tax structure, I have been particularly concerned about making our Federal Tax Structure fairer to the vast majority of Americans and eliminating all of the loopholes which serve no useful purpose or which exist more as a subsidy for the rich than as responsible legislation.

There is much yet to be done to achieve this goal but there were a number of changes in the Tax Reform Act of 1976 which should be of benefit to all older Americans. These included:

A. Revision of the retirement income tax credit—For many years, senior citizens have expressed concern over the treatment of income they earn after they retire. Under the tax simplification provisions contained in the law, the amount of income on which the retirement credit can be computed will

be raised from $1,500 to $2,500 for single persons and from $2,300 to $3,750 for married couples. The changes also allow earned income to be included as well as retirement income.

B. Tax incentives to businesses to remove architectural and transportation barrier for handicapped and elderly persons—the law allows businesses to deduct expenses incurred in modifying and eliminating existing architectural barriers—such as stairs, and others.

C. Sale of Personal Residence—The new tax law allows individuals to exclude from their income any gain on the sale of their personal residence, provided the adjusted sales price is less than $35,000. Prior to the change, sales price had to be less than $20,000 for this treatment.

D. Standard Deduction—The law increased the minimum standard deduction, or so-called low income allowance, from $1,300 to $1,700 per year and increased the maximum standard deduction from $2,000 to $2,400.

E. Estate and gift tax—These provisions of law were simplified and integrated into one set of tax rates.

2. Social Security—In July, the over 32 million recipients of Social Security should receive approximately a 5% cost-of-living increase. The average monthly benefits would increase from $218 to $229 for a retired worker, and from $372 to $390 for a retired couple.

This same cost-of-living increase would also go to SSI recipients.

3. Social Services Legislation—A former problem, now solved, in the administering of Social Services provided under Title XX of the Social Security Act and the Older Americans Act was how to determine the eligibility of recipients on the basis of income.

In 1974, Congress enacted a law which required that the States tax steps to ensure that federal monies for social services go to those in lower income groups. In the early 1970's, studies indicated that over three-fourths of this federal money did not reach the poor. In carrying out this law, the Administration's Department of Health, Education and Welfare, unfortunately, imposed very strict regulations which required individual proof of income and strict identification to determine eligibility.

This proved a nightmare for the states to administer and the regulations were consequently suspended, after Congressional protest. This administrative problem also resulted in a frustration of the original intent behind many of the Title XX and Older Americans Act programs. HEW has withheld some $4 billion dollars in funding due to its claim that certain states were not fulfilling the so-called individual means test.

Further, this individual means test was contrary to the original legislative intent behind the Older Americans Act which stated that there ought not to be specific individual income determinations for eligibility for its programs, such as meals on wheels and senior centers. The means test was demeaning to Older Americans and they are understandably reluctant to subject themselves to rigorous income checks.

A year ago, the Administration temporarily suspended these regulations in response to public outcry and Congressional pressure.

As a more long-term solution, I co-sponsored a bill in the last Congress which allowed states to waive the means test for qualified groups. In this way, the characteristics of the group as a whole would be examined, rather than each individual member.

This approach was enacted into law in September of last year.

4. Revenue Sharing—As Chairman of the Revenue Sharing Subcommittee, I am particularly pleased with the changes made in that law during the last Congress to better help Older Americans.

It was amended to prohibit discrimination on the basis of age in the allocation of funds.

Also, a change was made to require states to provide elderly groups with an opportunity to be heard prior to distributing its funds.

5. Crime control—It has been well documented that older Americans are too often victimized by crime—in urban and rural areas.

The legislation extending the Law Enforcement Assistance Administration provided for special grants to states to plan programs designed to reduce the incidence of crime against the elderly.

6. Equal Credit Opportunity Amendments—signed into law by the President last year, states that there shall be no discrimination in the granting of credit on the basis of age.

7. Housing—In another change in law, the Section 202 housing program for the elderly was expanded, to add $2.5 billion to the borrowing authority for long-term direct loans to finance non-profit housing for the elderly and handicapped. This program had been hindered in the past few years because the Administration was reluctant to implement it and had insisted that the loans available could be used only for construction but not for long-term financing. These bills state explicitly that long-term financing, be allowed and that priority be given to these projects.

Also in Housing, I recently introduced a comprehensive rural housing bill which would allow the Farmers Home Administration to finance congregate housing for the elderly and would specifically allow for use of funds for housing for the handicapped, with accommodative devices.

8. Alcoholism and Drug Abuse—As Chairman of the Senate Subcommittee on Alcoholism and Drug Abuse, I am particularly concerned with problems which older persons may experience in the utilization of these chemicals. Consequently, I have chaired hearings on this subject.

Congress is attempting to address the entire spectrum of needs of our older generations. It is quite clear to us that your problems are our problems, or soon will be. We need your participation and advice on the shaping of remedies and the formulation of policies.

You have demonstrated as a group many times that you are interested in the political process—you vote more frequently and in higher proportion than your younger counterparts, and I hope you will continue to do so. It is too important a task to leave to someone else. You should require that your elected representatives be responsive to your needs and work to make them aware of your concerns.

THE B–1 BOMBER

Mr. GOLDWATER. Mr. President, the time is coming when President Carter must hand down a decision on what he intends to do relative to a very important part of our whole strategic posture, namely, the B–1. In Popular Science, a magazine with which all of us are acquainted, there appears a new approach to this fine aircraft pointing out that the advances it has already made available to the subject of aeronautics, both subsonic and sonic, have more than paid the way for this aircraft. I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From Popular Science, May 1977]

THE OTHER STORY ABOUT THE CONTROVERSIAL B–1

(By Jim Schefter)

(NOTE.—The fate of the B–1 is in question—but the technological breakthroughs it has already sparked will indelibly alter the future of flying.)

No later than June 30, or perhaps even before you read this, Prsident Jimmy Carter will decide whether the B–1 program lives, dies, or hibernates. Opponents of the program—they call it the "B–1 Bummer"—cite noise problems, possible ozone-layer damage, and general high costs, and question whether a new bomber is needed at all. The arguments on both sides are emotional and heated.

But the B–1 arguments, pro or con, are not the issue here. Whether the B–1 lives or dies, say aviation experts connected with the plane's development, its contributions to military and civilian aircraft of the next two decades—in the comfort, safety, and economy of the jet you and I ride—will be remembered in aviation history.

To find out just what aviation advances the B–1 has generated, I went to southern California. I talked to designers and engineers at the Rockwell International plant in El Segundo; I went to Palmdale, where the B–1 is pieced together and to Edwards Air Force Base, where it's being flown. I talked to pilots, to avionics experts, and to aerodynamicists. I poked around a B–1, had free access to its cockpit—and I saw the future.

Since 1970, when Rockwell won the B–1 contract [PS, Nov. 1970], more than $2.8 billion has been spent on the program.

Even if the project is shelved, our tax dollars have already bought important technological advances:

An aerial shock-absorber system that takes the "twanging and bobbing" out of flight turbulence.

A new external design that blends part of the wings with the fuslage to form a single structure.

Avionics improvements that eliminate the need for standard flight instruments.

Turbofan jet engines that may be the best subsonic power plants made—but still have the power to ram the B–1 to Mach 2.2.

Maintenance innovations ranging from almost-instant engine replacement to a system that tells mechanics what components to fix.

An electrical system so advanced (it eliminated 29,000 individual wires) that it almost didn't get into the airplane.

Pioneering construction techniques, including diffusion bonding already adapted for the Space Shuttle, that reduce assembly-line time to near-record lows.

Although the B-1 is a military machine, each of these advances has civilian applications. Some can be modified and retrofitted to the jets we're riding today. Others will be designed into the next generation of aircraft.

Unlike the B-52 it may replace, the B-1 can make supersonic dashes at 50,000 feet. It's really two airplanes in one: a subsonic heavy transport that can fly 5000-plus miles from here to there without refueling, and an SSST that streaks along at more than 1400 mph. The aviation advances I've mentioned brought the two craft together and made them one.

"This airplane's main mission is to penetrate defenses at low altitude," explained John Wykes, lead engineer for dynamics.

To B–1 crews, low altitude means 200 feet above the ground. Every heat ripple, every deflected wind gust, batters the airplane. For the people inside, it could be downright miserable.

But it isn't.

The solution was a pair of small vanes or winglets, mounted on the B-1 nose under the cockpit. When switched on, the hydrauli-

cally actuated vanes automatically twist and swivel in response to accelerometer signals. These are routed through an electronic controller. Rockwell calls the setup the Structural Mode Control System (SMCS).

"Like the shock absorbers on your car," Wykes said, "the vanes damp out vibrations. When flying low, you've got turbulence in two directions, up and down, and side to side. The whole aircraft structure can start twanging and bobbing. The vanes swivel toward each other to absorb the bobbing, and work opposed to damp out the twanging."

Since they flip through an arc of plus or minus 20 degrees, at speeds up to 200 degrees per second, the vanes can be in and out of synchronization faster than the eye can follow. And they're not just for low attitudes—they work equally well up high, taking the sting out of clear-air turbulence or rough weather.

"The pilots had never seen anything like them before, and there was some antagonism," Wykes added. But, that soon disappeared.

Reported Rockwell chief test pilot Charlie Bock, at the controls on an early flight: "The ride was very uncomfortable until the SMCS was turned on."

With the aerial shock absorbers drawing rave reviews, the Air Force told Rockwell to patent the system. It's available now to any other big plane builder.

"It's better to design it into the aircraft from the start, but a system like this could be retrofit onto commercial jets today," Wykes said. "All you'd need is to add vanes in the back to spread the effects through the passenger compartment."

NO MORE FLYING CIGARS?

Another B–1 innovation: the "blended wing body." Most big jets look like cigars. But the B–1's body flares out in a smooth curve, then sweeps back. The curves flow from top to bottom and from front to back. Much of the wing is actually fuselage. Only the part that moves—the B–1 is a swing-wing craft—is separate.

"Integrating the wings with the fuselage gave us some real advantages," Len Rose, assistant director for B–1 research and engineering, told me. "The old way was to save weight by making a wing thicker. But with the blended wing, we got a thin wing, lighter weight, and a longer chord [distance between leading and trailing edges of the wing]." They also got extra volume in a smaller body, volume used for fuel avionics and other equipment; structural weight reduction of more than five percent; no increase in subsonic or supersonic drag; and a decrease in transonic drag. Rose thinks the added volume, increased flight efficiency, and easier manufacturing of a blended-wing body should make the design attractive for commercial transports. "But," he noted, "there's one potential trouble spot for passenger designs: It's hard to see out over the blended wing."

Visibility is no problem for the B–1 flight crew. Sitting in the commander's position is like being inside an aquarium. The windshields are mammoth; there are overhead windows to give a view straight up (useful during refueling); and the nose drops away so steeply that all you see out front is air. But the avionics in the instrument panel, not the airy feeling, are the most visible innovations. First, you notice what's missing from the central control panel: air-speed indicator, gyro horizon and compass; radio navigation instruments; and the instrument landing system (ILS), glide slope, and marker beacons that are key to landing in poor visibility.

What's left? Just an eight-inch TV screen that takes over for all those instruments, does their job better, and has capacity left over for other inflight assignments. It's called VSD, for Vertical Situation Display.

Nobody knows that little screen better than Charlie Bock. A slim, graying, soft-talking aviator, Bock's position as chief test pilot has given him more flying hours (200-plus) in the B–1 than anyone. He's logged most of them while watching that tube.

"The VSD literally has an infinite data capability," he said. "We have to guard against putting too much on there and cluttering it up."

In a typical in-flight configuration, the screen is bisected by a line representing the horizon. There's a steering cross that is the aiming point, and a pair of horizontal "wings" that are the airplane. Just touch the stick (that's right, the B–1 has a stick instead of a steering yoke) to keep the little wings centered on the steering cross, and you're on course.

The electronics behind that simple explanation is considerably more complicated. The steering cross gets its orders from the flight-director computer, which may be receiving constant input from ground-based navigation radios, or from the on-board inertial system, or from radar transponders, or altimeters—or any combination of these. For instance, in one mode, the steering cross gets radar inputs on the location of a refueling tanker. By flying the wings toward the cross, the B–1 pulls right up to the tanker, even in low visibility.

In other modes, everything the pilot needs to fly an instrument approach is on the screen. The glide slope is a rectangular box; keep the wings in the box, and you're home free.

That's not all.

All the standard information—altitude, airspeed heading, angle of attack, and more—can appear on the screen in digital format. Then come other options—such as a flight-path-angle bar that sits on the horizon when the aircraft is level, and a TV-like view of the world outside.

ELECTRONS DON'T GET TIRED

All of it can be hooked up to the computerized autopilot, programmed in advance, and flown virtually hands-off. The pilot is needed only for takeoff and the last 100 feet before landing.

We can set in a route from here to Reno to Salt Lake to Fort Worth and back and do it all automatically at 200 feet off the ground," Bock told me. "Over the long run, the auto-system performs better than the pilot. I get tired, and the electrons don't."

(As good as it is, the VSD still has an aura of black magic about it, and nobody—not even Charlie Bock—trusts it completely. So six inches to the right is a little cluster of familiar dials: altimeter, gyro horizon, and rate of climb. Bock doesn't use them, he says, but "it's nice to know they're there—just in case.")

Two more instrument innovations may become commercial aviation standards.

"We use standard computer-driven vertical tapes for all engine instruments," said flight test engineer Dick Abrams. He pointed to one of them—a rectangular case displaying a calibrated tape.

"That's something the FAA has been pushing for," he revealed. "It shows the percent of power being developed in each engine. For all intents and purposes, you're reading thrust. When you know that, you have the most important fact about your engines."

The second instrument is a center-of-gravity control and readout "Just select the center of gravity you want, and the system automatically pumps fuel around the airplane to keep you there," Abrams said. He explained that fuel lines connect fuel tanks in the wings, fuselage, and tail, so fuel can serve double duty as a stabilizing agent.

That system has commercial implications. By keeping the aircraft in the most efficient flight attitude, it makes flying a little easier for crews, a little more comfortable for passengers, and a little more economical for airlines.

Now we come to that TV image of the outside world that can be called up on the VSD screen. It's the output from a Forward-Looking Infrared (FLIR) system built by Hughes Aircraft Co. The FLIR reads heat emissions and displays them as a reverse TV picture. When the pilot calls up the FLIR image on his VSD screen, with flight data superimposed, he has a uniquely complete picture of what is happening.

"Nighttime sensitivity on FLIR is as good as daylight sensitivity for the human eye," said Charlotte Zelon, lead engineer in the defense avionics group.

Bock and other pilots have used FLIR to help them taxi the B–1 in low visibility, to watch their refueling tanker, and even to assist in making an instrument approach.

"For a general aviation system, you could build this a quarter the size and at a fraction the cost," Zelon said. "It's an aid to low-level night flying and landing. That's good for anybody who flies."

Just how good is FLIR? That's classified, Zelon said. But she did show me one dramatic application: "It's excellent for detecting fires, even at very long ranges," she noted, pulling out a set of Polaroid prints made from a FLIR unit on the roof of Hughes Aircraft's Culver City plant. The first, a conventional photo, showed gray haze, a nice view of nothing. The rest were startling.

"That's the 1974 Topanga Canyon fire," Zelon said. "You're looking right through heavy smoke 15 miles away."

The fire, invisible without FLIR, was clearly outlined. Ridge lines and other terrain features showed up. Hot spots glowed brightly. What's a little ground fog during landing when FLIR can cut through smoke like that?

AN ECOLOGIST'S DREAM ENGINE

Environmentalists won't have to worry about smoke from the B–1 engines. Developed by General Electric, the F101 turbofan is clean, quiet, and efficient. It's smokeless. It already meets every known pollution standard for aircraft and automobiles.

Most of the engine data is classified. Those who know speak only in generalities. Thrust? In the 30,000-pound range. Fuel consumption? No specific numbers, but at subsonic speeds, it's 99.5 percent fuel efficient and when flying subsonically it uses 25 percent less fuel than B–52's. How did they get such an engine? The details are secret.

"But the B–1 engine core (which is not classified) could be the new power plant for the next generation of medium-haul transports," Tom Stafford, commander of the Flight Test Center at Edwards AFB, told me.

The engines are designed for easy starting and easy maintenance. In one test, an Air Force maintenance crew pulled a dummy engine and replaced it with a new one in just 22 minutes. And the engines aren't the B–1's only maintenance advance.

A built-in Central Integrated Test System (CITS) is yet another system that big-plane designers are certain to want for future transports.

CITS has a threefold function: It gives the crew immediate warnings on degraded performance; printouts on actual performance; and repair instructions to ground crews.

"Airlines today record information in flight and rely on ground processing to isolate trouble," said engineer Pete Kubischta. "They're going to have to go to in-flight processing."

That's what CITS does. It electronically scans every important E–1 subsystem several times each second, bringing in more than 3000 separate signals (but using just 800 wire pairs) to detect and isolate performance problems. By selecting additional readings, up to 9000 individual parameters can be monitored. A small display unit lights up to identify which system—engine-fuel, electrical, or other—is out of tolerance. Then an alphanumeric display gets more specific: "low air pressure," "unit hot," or whatever is

wrong. And, it can be instructed to give a continuous readout of the actual figures (air pressure, temperature, etc.), thus showing exactly how serious the problem is.

For instance, in one test flight, payload-bay temperatures jumped. That usually requires an immediate landing. Instead, the crew members used CITS to watch the temperatures while they shifted to a manual cooling mode. The temperatures dropped, and the flight continued another four hours.

COMPUTER-ASSIGNED REPAIRS

"CITS gives the flight crew about 200 times more information than a DC–10 crew gets," said Herb McCoy, lead engineer on the system. "It's good for flight safety and also for maintenance. The ground crew uses it as much as the flight crew."

The difference between CITS and an old-fashioned monitoring or maintenance system is the difference between raw data and actual information, McCoy pointed out

"The gas gauge on your car doesn't tell how far you can drive," he said. "So that's just data. With CITS, we get information: 'Change box number so-and-so.' The mechanic doesn't care what went wrong. All he needs is the information on what to do—and that's what CITS provides."

To keep permanent records, the system notes failures and summarizes all data from other systems on magnetic tape. It also prints out failure data—for use by mechanics—on paper tape.

CITS is fully controlled by a small on-board computer. Rockwell designers are looking ahead to next-generation improvements with even smaller units using microprocessors. Yet, the present version already is ahead of anything now flying. Through CITS, data recorded during flights or ground tests can be sent—directly or by telephone lines—to even bigger ground computers for extensive checkouts.

"You could fly that airplane into a wheat field and still run the full set of tests," McCoy said. "If you can reach a phone, you can feed all the data back to home base."

For commercial airlines, such a capability could significantly increase flying time by eliminating unscheduled runs to a maintenance base, or long hours of trial-and-error debugging at poorly equipped airports

But even CITS needs help. It gets it from that new electrical system that's known as EMUX, for electrical multiplexing—using solid-state electronics and time-sharing techniques to run multiple instruments and systems over a single pair of wires.

How does it work? To oversimplify, an instrument or system gets a fresh input from EMUX every 30 to 40 milliseconds. The rest of the time it's technically on, but idling. And during that miniscule idling time. EMUX is feeding power to other devices on the same circuit.

It happens so fast—30 times a second—that the human eye sees only systems that apparently are getting power full-time. On the first four B-1's, 29 subsystems, including lighting, landing gear, all avionics, engine thrust, and all engine instruments and wing-sweep, are on EMUX. And the system, built for Rockwell by the Harris Corp., is still being improved.

In addition, many circuit breakers and switches (which are not a part of the EMUX system) are being replaced by solid-state controllers—small electronic cards—instead of electromechanical devices. That will reduce the B-1's weight by another 100 pounds.

"You won't see this system on a commercial jet for a while," EMUX manager Ray Froman told me. "Commercial designers are conservative. But it's such a weight-saver that it has to come. It means more seat-miles, more cargo capacity."

That's what EMUX did for the B-1. After the electronics experts won heated debates and got the go-ahead to design it into the aircraft, it not only saved weight—about 1200 pounds, the equivalent of 57 miles of wire—but also cut several thousand hours off the manufacturing process by reducing electrical installation time.

Inquiries about the system are starting to come in now. Rockwell's own business-jet designers are looking at electrical multiplexing, and some EMUX techniques have been adapted to the Space Shuttle.

The Shuttle also benefited from diffusion bonding developed for the B–1. In that process, titanium or its alloys are heated in a vacuum. Under high pressure from a press, two pieces of metal diffuse into each other to become a single shaped component. Structural elements that once required welding or extensive milling, such as the B-1's fuselage frames and support beams, now are formed by diffusion bonding. The components are stronger and less expensive. With the procedure proved in practice, Shuttle designers readily adapted it for the Orbiter thrust structure.

More of the B-1 technology story will be told in years to come. But the message today is plain: Whatever the B-1's fate as an operational bomber, the research and development that went into it produced a giant leap ahead in technology—one that will profoundly affect all future aircraft, and have a lot of down-to-earth applications as well.

ETHICS COMMITTEE NOTICE: ALL SENATORS, OFFICERS, 1976 SENATE CANDIDATES, AND SOME STAFF MUST FILE FINANCIAL DISCLOSURE STATEMENTS ON OR BEFORE MAY 14, 1977

Mr. STEVENSON. Mr. President, I and Senator SCHMITT on behalf of the Select Committee on Ethics, give this additional notice to Senators, officers, candidates for the Senate in 1976, and Senate staff that two financial disclosure statements must be filed on or before May 15, next.

Old rule 44 of the Standing Rules of the Senate remains in effect until next year under the provisions of Senate Resolution 110, the official conduct amendments agreed to by the Senate on April 1. New rule 42—Public final disclosure will overlap the requirements of old rule 44 for the last quarter of 1977, and reports will be filed under both rules in May 1978.

Old Senate rule 44 requires each Senator who served for 90 days or more in 1976, candidate for Senator in 1976, officer of the Senate for 90 days or more in 1976, and employee whose salary was paid by the Senate at a rate in excess of $15,000 a year at any time during 1976 and who was employed for 90 days or more by the Senate, to file two financial statements on or before May 14, 1977. The first statement, a "Confidential Statement of Financial Interests," must be sent or delivered to the Comptroller General. The second statement, a "Statement of Contributions and Honorariums," must be submitted to the Secretary of the Senate. The Secretary has advised the committee that the Office of Public Records, 119 D Street NE., room A–623, Washington, D.C. 20510, will be open Saturday, May 14, 9 a.m. to 12 noon to receive the reports.

Forms which should be used in making these reports may be ordered from the Ethics Committee by telephone, extension 4–2981, or may be picked up in the committee office, 1417 Dirksen. Committee staff will provide assistance.

LAND USE PLANNING IN SOUTHEAST ALASKA

Mr. STEVENS. Mr. President, I have recently been contacted by the South Tongass Land Review Committee in regard to their activities relating to the land use planning in Southeast Alaska. The South Tongass Land Review Committee is a group of Alaskans who have organized themselves in order to have a more unified voice about future developments in their part of our State. As we all know, the decisions that will be made during the 95th Congress about Alaskan lands are of great importance to the citizens of Alaska and to the Nation.

At the request of the South Tongass Land Review Committee, I am today submitting two letters to the RECORD. The Land Review Committee requested that the information in the letters be distributed to all my colleagues for their review. One letter is the committee's letter to me which outlines their recent activities. The other letter is from the U.S. Forest Service in Alaska to the South Tongass Land Review Committee which outlines the Forest Service's past and current activities relating to land use planning in southeast Alaska.

I ask unanimous consent that these letters be printed in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

SOUTH TONGASS LAND
REVIEW COMMITTEE,
Ketchikan, Alaska, March 3, 1977.

Senator TED STEVENS,
U.S. Senate,
Washington, D.C.

DEAR TED:

We have initiated efforts to determine a Ketchikan-South Tongass consensus concerning Wilderness withdrawals. Our first step was to hold a public meeting hosted by ourselves and the Central Labor Council. There was a capacity crowd in attendance. The U.S. Forest Service and South Tongass Conservation Society were requested to make presentations. TCS's input was the Alaska coalition position.

The Forest Service backgrounded and described current efforts of their department. Attached is an excellent letter from the Forest Service which outlines these efforts. We ask that it be submitted to all members of Congress for their perusal.

Following this meeting STLRC's executive committee unanimously agreed that the establishment of "instant Wilderness areas" as proposed by the Alaska Coalition, without proper study and resource inventory, would seriously jeopardize Southeast Alaska's economic well-being and deprive the nation of important present and future natural resources.

At the meeting we again publicly invited the Tongess Conservation Society to join with our group (which represents nineteen organizations and thousands of individuals in the community) in order to reach a community consensus. They refused, saying the differences between the community and their special interest desires were "irreconciable". We are disappointed that they are so arbitrary and will not join with their fellow Alaskans in attempting to come to a constructive solution. Incidentally, we understand that TCS has a membership of less than two dozen.

Our position at this time is to urge you and your colleagues to 1. Eliminate Southeast Alaska Wilderness proposals from the D–Z land issue, 2. Appropriate monies to the U.S. Forest Service so this department can begin a study and inventory of Southeast Alaska

lands set aside for Wilderness study in 1973 (totalling 12.3 million acres—see page 6 of Mr. Watson's letter) and 3. Define "Wilderness". Is it an area "untrampled by man?" (as defined in the 1964 Wilderness Act) or simply a recreational area allowing most any use (motorized access, mining cabins, fishing, hunting) except the harvesting of timber as proposed by the Alaska coalition?

Sincerely,

DICK BORCH,
Co-Chairman.
BOB PICKRELL,
Co-Chairman.

FOREST SERVICE,
Tongass National Forest,
Ketchikan, Alaska.

ROBERT W. PICKRELL,
Co-chairman, South Tongass Land Review Committee, Ketchikan, Alaska

DEAR BOB: I respond to your request for a written statement to the South Tongass Land Review Committee on what the Forest Service has done to date and how they have gone about selecting wilderness on the Tongass National Forest; why are we repeating a public involvement process that we seemingly have already done; what further plans we have; what the effect the various wilderness proposals would have on the economic well-being of Southeast Alaska, particularly the Ketchikan Area; and finally, a statement to show the rationale of the Forest Service approach to Wilderness Selection through a Forestwide Land Management Plan.

The initial systematic approach to Wilderness Selection was done by the Forest Service as displayed in the October 1973 Final Environmental State for selection of new wilderness study areas within roadless and undeveloped areas of the National Forests (see enclosed environmental statement excerpt). Through this process, 274 new study areas totaling about 12.3 million acres were selected. As stated on page 4 of this environmental statement, this was not the end of it. The remainder of the National Forest roadless and undeveloped areas are to be studied through the land use planning process to determine their suitability for wilderness. In this initial review, commonly called the "RARE" study on roadless area review evaluations, five new study areas totaling about 1,868,000 acres were selected from the Tongass National Forest. Since then, one additional 40,000 acre area has been selected through our land use planning process. We currently have a Forestwide land management plan in progress which when completed will bring the total wilderness study areas on the Tongass to between 2,300,000 and 3,500,000 acres as targeted in our Resource Allocation Direction for the Tongass National Forest Draft Environmental Impact Statement scheduled to be released next month. In addition, this document also calls for between 3.1 and 3.4 million acres of back country recreations areas that would be reserved from timber harvest and roading. I'll be saying more about our current land management planning effort later on in this letter.

As you may recall, in 1970, the Forest Service announced through the news media, a commitment to a land use planning effort for the then South Tongass National Forest that would be strongly oriented to public involvement. Even though we were poorly staffed and were new at this approach, we made a strong effort to involve the public. Twenty-six meetings were held in the Ketchikan Area alone, and we (the South Tongass National Forest) would have had our plan completed by 1972, but it was decided that the plan should be for the entire Tongass National Forest. The Forest Service was also in the process of reorganization of the Tongass into three administrative units instead of two. As a result, it was not until January, 1975 that we released a draft EIS on the Tongass Land Use Plan. This plan was nearly five years in the making and represented a good overview of the Tongass land and resource capabilities and wants and needs of its people. Some 56 public meetings were held and innumerable individual contacts were made (see attached summary of the public involvement). As you can surmise from this summary, public response was overwhelmingly in opposition to "Legal Wilderness" under the Forest Service management concept often referred to as the "purest philosophy". Having been the pioneer in wilderness establishment and management in the United States, the Forest Service is proud of its long record of achievement in this area and believes that Congress clearly intended under the Wilderness Act of 1964 that wilderness be managed to retain its wilderness character (see attached copy of the Wilderness Act of 1964). This is why we have persistently opposed motorized access into wilderness. However, we are also making every effort to be responsive to the public and the public, particularly the Alaska public, has clearly shown that it does not want wilderness in Southeast Alaska if motorized access is prohibited. Consequently, the Forest Service in Region 10 has modified its stand on this issue to consider motorized access in wilderness areas on a case by case basis. Such decisions will be made through the land management planning process which will be strongly linked to public involvement.

You ask the question, "Why are we seemingly doing this planning and public involvement over again?" We do not see this as a repeat performance, but rather a continuing effort that will be repeated every 10–15 years as required by the Resources Planning Act of 1974 and the National Forest Management Act of 1976. In one sense there's really no end to it as the nation's needs, technological capabilities, people wants, and desires change. We do not envision any of our plan being "chipped in granite" to be completed once and for all. Land management planning is a dynamic process and to be effective, must be as flexible as possible, yet with firm enough commitments to maintain credibility with the public. The reason the initial Tongass Land Use Plan was not well received was because it was so flexible that many Southeast Alaska public did did not accept it. It lacked firm enough commitments to assure people that various actions would be taken to resolve key issues.

We learned a lot from this planning effort, however, and it became the framework from which we built the *Southeast Alaska Area Guide*, which will be released to the public about the middle of March.

I am glad you asked us to show the rationale for selection of additional wilderness study areas through our land management plan for the Tongass National Forest rather than through Congressional legislation prior to completing the plan. You also ask about the economic consequences of the SEACC proposals and the recent bill submitted to the Congress by Congressman Udall which would establish five new wilderness areas on the Tongass. You were especially interested in their effect on the Ketchikan Area. Since these two questions are so closely tied, we believe they should be answered together.

To begin with, wilderness is just one of the issues to be resolved in the Tongass Land Management Plan. Equally important issues include community and human well-being, fish and wildlife protection, and transportation for Southeast Alaska. Our planning is well underway and making good progress in resolution of these issues. Within these major issues are many other related issues. I could name an almost endless list of things such as clearcutting of timber along or near lakes, streams, saltwater shorelines; various soil protection requirements, water use and protection, land occupancy, minerals, timber harvesting systems, economics, etc.

Southeast Alaska, as you well know, heavily depends on the timber industry for employment (see "Human and Community Development" and "Timber" of the Southeast Alaska Guide). During preparation of the Guide, our planning team compiled an estimate of the timber supply on the Tongass National Forest which shows the following (estimates in scale volume) annual yield:

Million board feet per year

Total volume of commercial timber	1,232
Estimated State and national land selections	133
Unregulated	126
Marginal	132
Standard and special	853
Present harvest level	546

The unregulated timber is on slopes that are physically and/or environmentally not wise to harvest and are thus taken out of the annual programmed harvest. The State and Native Selection would also come out. This leaves us a net annual yield of 985 MMBF of standard, special, and marginal timber.

However, the Tongass Planning Team estimates that the maximum potential yield would only be about 820 MMBF due to various multiple use reductions such as existing wilderness study areas, other existing classifications, and reductions due to other resource protection. Please recognize that these are estimates and could be off somewhat.

At the current harvest level (546 MMBF/year) there are about 5,624 jobs in Southeast Alaska that directly or indirectly depend upon the timber harvest from the Tongass National Forest, 10.3 jobs/1 MMBF.

Now going back to the estimated maximum potential yield of 820 MMBF per year, I think it would be safe to say that the potential yield before new wilderness areas are taken out could be considerably less than 820 MMBF/year due to more stringent resource protection measures, particularly fish stream protection. The Forest Service proposed alternative in the Resource Allocation Direction For the Tongass Draft EIS calls for a potential yield of about 600 MMBF after wilderness and backcountry reductions which we estimate to be about 3 million acres of wilderness and 3 million acres of backcountry.

The crucial question which can't be answered at this time and paramount to evaluating the Udall or SEACC proposal is how much reduction in the timber supply will there be due to other reductions besides wilderness and what are the total benefits or outputs of other resources? If these reductions necessary to meet other resource needs result in a potential yield of much below 820 MMBF, then the wilderness withdrawals as proposed by SEACC and Congressman Udall could cause a significant reduction in timber related jobs in Southeast Alaska. While the Forest Service proposes almost as much wild lands as SEACC, we believe that with a total land management planning job, both the economy, social and environmental goals for the Tongass as outlined in the Guide can be met. We can do this by coordinating our planning to best reflect land and resource capabilities and wants and needs of the people. Until our land management plan for the Tongass National Forest is completed, we cannot fully evaluate the various wilderness proposals. This is why we would prefer new wilderness not be selected through Congressional action at this time. The consequences of the various proposals simply cannot be evaluated until the Tongass Plan is complete, or at least to the alternative evaluation stage.

We can estimate the impact of the SEACC and Udall proposals by making the following projections based upon the assumption that these areas would not be classified but would be roaded and timber harvested. Based upon our best judgment, we are also assuming that 90 percent of the standard timber could be harvested, 67 percent of the special, and 50 percent of the marginal. With these assumptions, the Tongass National Forest program timber harvest and loss of timber related

jobs from these areas are estimated as follows:

Proposal	Standard & spec.[1] (MMBF/yr.)	Marginal [1] (MMBF/yr.)	Program harvest yield [1] (MMBF/yr.)	Jobs [1]
SEACC	25,287	8,423	299	3,080
Udall	15,902	3,916	180	1,854

[1] Figures have been adjusted to reflect amount of timber taken out in established Forest Service wilderness study areas that overlap SEACC or Udall proposals.

From this table it's simple to project what the impacts would be using the above assumptions but predicting the total effect is not possible until the land management plan is complete. If we assume the 820 MMBF/year potential yield as the top line, establishment of all the SEACC areas or similar land with an equivalent amount of timber as wilderness, would reduce the current program harvest on the Tongass National Forest 25 MMBF/year. This could be replaced by anticipated harvest on the Native Lands but we cannot quantify this at this time because we do not know what their harvest level or rate will be. They have given every indication that they intend to harvest lots of timber and could easily provide a sustained yield in excess of 50 MMBF/year. It can be said with certainty that should the SEACC or Udall areas become wilderness, the potential growth of the timber industry from Tongass National Forest timber would be reduced by the respective amounts shown in the above table assuming the assumptions are correct.

Focusing in on the Ketchikan Area itself, we can make these projections. Here again we are assuming the same assumptions as stated above, but this time itemizing only the proposed wilderness withdrawals within the Ketchikan Area administrative unit, formerly known as the "South Tongass":

Proposal	Standard & special (MMBF/yr.)	Marginal (MMBF/yr.)	Programed yield (MMBF/yr.)	Jobs
SEACC	10,666	6,602	58.5	602
Udall	3,721	3,015	31.6	325

The Ketchikan Area programmed harvest has been estimated to be 270 MMBF/year after State and native selections. All of the timber shown in the above chart is in the Ketchikan Area programmed harvest. Should the SEACC areas all become wilderness, the Ketchikan Area programmed harvest would be reduced from 270 to 211 MMBF/year and 602 timber related jobs would be affected. Should the Udall area become wilderness, the programmed harvest would be reduced to 238 MMBF and 325 timber related jobs would be affected. The major impact would be on woods' workers who would have to move from the Ketchikan Area to the Sitka or Juneau area. The above analysis has been an oversimplification of a complex problem that, as I have repeated many times through this letter, cannot be accurately assessed until the Tongass Land Management Plan is much further along than it is today.

I have deliberately dwelled at length on the timber supply as related to wilderness and jobs because it is the one resource that we can quantify and predict consequences of various proposals. I believe that minerals should also be mentioned as a factor to consider. Southeast Alaska is heavily mineralized and known likely developable deposits should be identified prior to completion of the Tongass Land Management Plan.

The U.S. Borax discovery is in one of the Udall proposed withdrawals. Designation as wilderness could eliminate 500 potential jobs plus the support jobs.

A mineral survey is required on all wilderness study areas before they can legally become wilderness based on the current law. This is part of the reason no new wilderness areas have been established on the Tongass. Only one area (Granite Fiords) has had a mineral survey. The report is still in preparation and we have yet to receive it, even though field work has been completed for over two years now. The other reason we have not progressed in getting wilderness established on our current study areas is because we have not received financing to do the required studies. We have asked for money to study Granite Fiords for the last three fiscal years, but have not received any funds as yet to do the study.

While it may sound like it, I have not meant for this letter to be an anti-wilderness dissertation. There are many invaluable benefits to be derived from wilderness, such as watershed, fishery, wildlife, and many recreation opportunities not to mention scientific aspects. With each passing year, particularly in Southeast Alaska, the nation's potential wilderness supply continues to shrink. That is why the RPA program has called for a moderate increase in wilderness and why the Resource Allocation Direction for the Tongass National Forest Draft EIS calls for an increase of wilderness study areas from a current 12 percent to about 20 percent.

Thank you for inviting me to comment at such length. I look forward to the next two years because this is when we will have drawn the lines on the map with the initial land allocations for the Tongass. The Forest Service appreciates your interest and hope that you will actively participate throughout this major and far-reaching planning effort.

Sincerely,

J. S. WATSON,
Forest Supervisor.

HANDICAPPED DEMAND STRONG 504 REGULATIONS

Mr. HUMPHREY. Mr. President, passage of the Rehabilitation Act of 1973 was a landmark event for the handicapped. Section 504 of that bill prohibits discrimination against the disabled in federally funded programs.

I was proud to participate in this legislative achievement, in this statement of our Nation's faith in equality of opportunity.

All of us who voted for this bill understood that it was a sweeping and even a revolutionary commitment. Often, it may be difficult and inconvenient to comply. But it is a commitment.

For several years now, the Department of Health, Education, and Welfare writing the regulations to implement this has been struggling with the task of writing the regulations to implement this section. There are some of us who doubted at times the vigor of its struggle.

The Rehabilitation Act of 1973 is the civil rights declaration of the handicapped. It was greeted with great hope and satisfaction by Americans who have had the distress of physical or mental handicaps compounded by thoughtless or callous discrimination. These Americans have identified 504 with access to vital public services, such as education, health care, and transportation; they consider it their charter for fair employment in jobs for which they qualify. In short, it is a key to, and a symbol of, their entry as full participants in the mainstream of national life.

Unfortunately, as the weeks and months and years pass, the patience and anticipation of the handicapped have turned to disappointment and disillusion. They have also turned to militant determination, as our new Secretary can testify.

The embattled regulations were inherited, drafted but unsigned, by Secretary Joseph Califano. Regardless of his commitment, and he has expressed that commitment vigorously, the new Secretary could not be expected to sign regulations until he has a thorough understanding of their content and implications.

At the direction of Secretary Califano, one more review was undertaken but with a clear recognition of the need to deal promptly and judiciously with an overdue commitment.

Many of my handicapped constituents are contacting me in some anxiety. I try to reassure them. I am personally confident that our new Secretary will issue the long-awaited implementing regulations for section 504 as soon as he possibly can.

It may be that some of the regulations will prove cumbersome. It may be that some will require later revision. But let us begin with optimism. I believe that we can summon the resources, the confidence and the determination to achieve our objectives.

The 504 regulations are the culmination of the labor of a competent and dedicated staff guided by exhaustive public consultation. The purpose of the regulations is not nor should it be to anticipate every problem that will arise. The regulations must reflect in a clear and uncompromising manner their objective: to secure and assure equal rights for the handicapped.

Mr. President, this statement has no other purpose but to reiterate my strong support for the wisdom of Congress in passing this law, my admiration for the handicapped who have spoken up for their rights in the finest American tradition, and my encouragement to our new Secretary of Health, Education, and Welfare, who will have the responsibility of enforcing a law that can help make the 1970s a historic era in this country's continuing march toward human freedom and dignity.

SOVIET STRATEGIC CAPABILITIES AND OBJECTIVES

Mr. LAXALT. Mr. President, some skeptics maintain that our younger generation has abdicated its leadership responsibilities. Allegedly, it has turned on, tuned in, and dropped out. But, I have never believed this for a minute. In my judgment, the emerging generation of young leaders is brighter, more articulate, and better prepared than any I have previously been privileged to encounter.

What is more, I am delighted to find

that I have a particularly impressive young leader on my own staff. Mr. Richard Moore has prepared for my use as lucid and inciteful an analysis of Soviet strategic capabilities and objectives as I have ever seen. Because this work is so impressive, I ask unanimous consent that it be printed in the RECORD so that I might share it with my colleagues.

There being no objection, the analysis was ordered to be printed in the RECORD, as follows:

SOVIET STRATEGIC CAPABILITIES AND OBJECTIVES

Among the more crucial tasks faced by Congress is to decide on the size and shape of the defense budget. It is, of course, a different exercise than deciding on the budgets of other Departments. The differences arise in that Congress must determine not only what are our objectives but also what are the objectives of our adversaries and to what extent, if at all, are they compatible. Furthermore, some judgment must be made about how our adversaries may use the military to achieve their goals.

Some observers tell us that this kind of thinking is purely reactive, that it fuels the arms race. They advise that we must look to other concerns. These include the desire to divert military spending to social programs, the prospect of cooperative international ventures, the increase in global military spending, and the attitudes of the lesser powers. However valid these concerns may be, our first priority must be to look at the capabilities and the intentions of our adversaries.

A primary source of information about what the Soviet Union wants is obviously the Soviets themselves. I submit that in listening to what they say, we will find a commitment to expansion and aggression, coupled with an ultimate reliance on military solutions to political problems. In answer to those observers who say we should not react, I offer one simple proposition—if someone tells you he is planning to put you out of business, then you would be advised to listen, and perhaps, to be prepared.

What are the minimal objectives of our own defense posture. In my view, they are: (1) to protect our way of life; (2) to maintain our global position and our alliances; (3) to permit self-determination by nonaligned countries; and (4) to prevent the outbreak of war, both nuclear and conventional. The first question is, are these objectives shared by the Soviet Union? I would suggest that if we take the clouds of detente from our eyes, we will find that the Soviet Union does not, with one possible exception, share any of these objectives.

FUTURE OF CAPITALISM

With respect to the first, the words of Leonid Brezhnev at the 25th Congress of the Communist Party this past year are most instructive. "Detente does not in the slightest way abolish and cannot abolish the laws of class struggle. Capitalism is a society without a future." In plain English, this means that a primary objective of the Soviet Union, that is, before they taste the milk and honey of Communist society, is the destruction of our way of life.

BALANCE OF POWER

How do the Soviets regard the balance of power and the nations which form the respective alliances? The Soviet foreign policy journal New Times asserted but a few days after the signing of the Helsinki Declaration in 1975:

"It is increasingly clear that there are two kinds of status quo which must not be confused or substituted one for the other. The territorial status quo is one thing, and the socio-political another. The first has a bearing on relations between states, the second on relationships within each given state, between its classes, parties, and individual citizens. . . . Neither (the general) reduction of international tension nor the principle of the inviolability of the territorial status quo adopted by the Helsinki Conference can prohibit any people from changing of the social and political state of affairs within their own country."

High sounding words, but what do they mean? With respect to Soviet alliances, their actions have crystalized the meaning of the words. In the summer of 1968, the Free World learned that the Soviets would not tolerate any undoing of the Warsaw Pact; it was and continues to be their definition of the status quo. At the same time, the people of Czechoslovakia learned that "changing the social and political state of affairs within their own country" was a task best left to Soviet tanks.

Our alliances and the status of the member countries are an entirely different matter for the Soviets. In recent years, they have tirelessly repeated the theme of "an unprecedented economic and social crisis in the Western world," thereby creating the conditions for "the build-up of a revolutionary wave."

Evidently, a major Soviet objective is the detachment of Western Europe from dependence on the United States, and its replacement by dependence on the Soviet Union. A. I. Sobolev, a high ranking Soviet Central Committee specialist in world communist affairs, explained one means of accomplishing this. "In certain countries (Italy and France) the might of the democratic [i.e., communist-led] forces has reached such a level that they are already directly pushing forward the task of winning power."

One of our severest criticisms of the detente policy should be the failure to make the Russians agree about the rules of the balance of power in Europe. I believe that they continue to abide by that time-honored Soviet maxim, "what's mine is mine and what's yours is negotiable."

Of still greater concern must be the Soviet military decisions which support their view of the balance of power. Over the past ten years, Soviet conventional forces facing NATO's Central Region alone have been increased by 130,000 men while NATO conventional power has remained basically unchanged. During the same period, the number of Soviet tanks has jumped by 40% while artillery strength has increased by between 50% and 100%. The danger lies in that the imbalance of forces may invite the Soviet Union to initiate a potentially devastating invasion with only a few days warning.

SELF-DETERMINATION

How do the Soviets view the principle of self-determination by nonaligned countries? Soviet President Podgorny made this abundantly clear when he stressed that with respect to southern Africa, "the close alliance of the freedom-loving countries and peoples offers opportunities to combine all forms of struggle, involving military and political forms."

Some Western observers have noted that military struggle is at odds with the notion that detente means, among other things, the easing of tensions and the preservation of peace. Not so says Soviet Premier Kosygin,

"If someone tries to find a contradiction between this position of ours and the policy peaceful coexistence, then in answer to this we can only reaffirm that the course toward peaceful coexistence and the relaxation of tension would lose its meaning unless the peace-loving forces gave a firm rebuff to the intrigues of the aggressor and the attempts of the imperialists and the forces forming blocs with them, i.e., China, to prevent the peoples from waging a struggle for national liberation and social progress."

Essentially, the Premier tells us that the road to peace is paved with one-sided wars. To test the truth of this statement, we need only look at the prodigious flow of Soviet arms and munitions directly, or through its intermediaries, to such places as Angola, Zaire, and Mozambique.

To this point the conclusion is obvious; Soviet objectives are inimical to our own. More importantly, Soviet words are backed by Soviet guns. We are left, then, with the possibility that they may share our abhorrence of nuclear war.

STRAGEGIC DOCTRINE

The predominant view in the U.S. is that the threat of nuclear holocaust renders nuclear war "unthinkable." The doctrine of nuclear superiority has been similarily designated as "unthinkable." Instead, our strategic doctrine is that of mutual assured destruction. The idea is that one side will not attack when the other can absorb a first strike and still have surviving strategic forces adequate to inflict destruction which the attacker would consider intolerable. The question is, do the Soviets in their heart of hearts accept the doctrine, and if not, what do they consider to be a "tolerable" loss?

The November 1975 issue of Communist of the Armed Forces carried a most revealing article. This exposition of standard Soviet positions on war in the nuclear age is as clear and concise as it is chilling:

"The premise of Marxism-Leninism on war as a continuation of policy by military means remains true in an atmosphere of fundamental changes in military matters. The attempt of certain bourgeois ideologists to prove that nuclear missile weapons lead war outside the framework of policy and that nuclear war moves beyond the control of policy, ceases to be an instrument of policy, and does not constitute its continuation is theoretically incorrect and politically reactionary. . . . The description of the correlation between war and policy is fully valid for the use of weapons of mass destruction."

When we discard the rhetoric, we learn that the use of nuclear weapons is an acceptable extension of policy.

While it is important that we follow the evolving Soviet interpretation of the ideology of Marxism-Leninism, it is imperative that we understand Soviet strategy. I draw this distinction because, for the Soviets, Marxism-Leninism is a rubbery instrument which can be reshaped to fit current needs. Soviet strategy, on the other hand, while flexible in a tactical sense, is less yielding in terms of achieving its objectives. We must ask ourselves, is the strategy of the Soviet Union the same as our own.

As mentioned above, our strategy has been based on the doctrine of mutual assured destruction, the premise being that war must be avoided. In practice, this has meant that we have developed and deployed weapons systems necessary only to deter the Soviets from launching a first strike. And, I believe, that an examination of our military spending during the past decade bears this out.

There are those who argue that the Soviets have mirrored our actions out of a deep-rooted sense of insecurity and not out of a drive for nuclear superiority. This action-reaction cycle, they claim, has repeated itself on numerous occasions leaving us with the image of two superpowers aping each other into eventual nuclear oblivion. That argument rests on the assumption that the Soviets also accept the doctrine of mutual assured destruction and its underpinning that war must be avoided.

It is the considered opinion of other leading strategic thinkers, an opinion which I am inclined to share, that the Soviets do not adhere to the doctrine nor do they accept its basis. Rather, it appears that their strategy is predicated on war-winning, not war avoidance. Furthermore, I believe that examining the record of the last decade proves the point. If this is the case, then we face, in the words of General George Keegan, the

recently retired chief of Air Force intelligence, "the gestation of global conflict."

Incidentally, the Carter Administration may also share some misgivings in this regard, although no apprehension is reflected in the proposed budget cuts. Nevertheless, it is heartening that the Administration has begun to reexamine the strategic assumptions underlying American military policy. The National Security Council is currently conducting a study, under the direction of Dr. Smuel P. Huntington, of the validity of the doctrine of mutual assured destruction as well as other concerns. But, as benefical as this exercise may prove to be, such a far-reaching and long-term reassessment is likely to have little effect on current and short-term decisions.

While it is alarming that the Soviets find far ideologically and strategically acceptable, it is absolutely heartstopping that they may find nuclear war winnable and their losses tolerable.

Soviet Civil Defense planners claim that a death rate of between 5% and 8% might be sustained from a U.S. nucelar strike—a casualty rate of only 7.5 to 12 million out of an urban population of 151 million. This low rate owes to extensive civil defense spending estimated in excess of $1 billion since 1972 in the form of shelter construction, essential supplies stock piling, personnel training, equipment construction and dispersion and extensive practical and moral-psychological preparation of the people. Lastly, recall that the Soviets themselves loudly proclaim that some 20 million Soviet citizens died in the "Great Patriotic War", otherwise known as World War II in which the U.S. "incidentally" participated.

I am not a doomsayer, I do not think that the Soviet Union wants nuclear holocaust, although they may well risk it. I do believe, however, it is essential that we recognize the vast differences in ends, and means to ends, which separate us from the Soviet Union. Foremost among these is that the Soviets believe in and abide by the proposition that political gains can be secured through military advances.

I would now like to discuss in more detail what kinds of advances the Soviets have made and to consider these in comparison with our defense capabilities.

SOVIET DEFENSE SPENDING

Admittedly, Western efforts to assess the level and burden of Soviet defense spending are seriously hampered by major differences in accounting methods, the artificial value of the ruble, and the lack of information and reliable data. However, CIA estimates of Soviet defense spending in the 1963–1973 period put the growth rate at about 3%, compared to about 1% for the United States. Last year, the CIA concluded that defense efforts absorb 11% to 13% of the Soviet Union's Gross National Product. The portion of the U.S. product absorbed by defense efforts has declined from 10% in 1955 to about 5.5% today. A CIA study released in early 1977 concluded that Soviet military expenditures in 1976 were at least one-third higher that those of the U.S. Moreover, the Joint Chiefs of Staff recently testified that they now share the judgment that Soviet programs are aimed at strategic superiority and that if current trends continue, the Russians will soon reach their goal.

At every level, there is evidence of rapid Soviet modernization, of qualitative improvement of numerical reinforcement, and—vital for the future—of expansion of military research and development. Current estimates are that the Soviets spend 25% more on military research and development than does the U.S. On the other hand, excellent intelligence informs American planners about what the Russians have, are testing, and could acquire.

One of the more spectacular Soviet developments has been the expansion of the Navy. The Soviet Union, historically a land power, has built a fleet capable of contesting control of the sea with the U.S., a sea power. The Russian submarine force is triple that of the United States. The USSR has introduced eight new submarine designs in the past decade and are currently topping the U.S. in the production of attack submarines by 3 to 1. Soviet missile carrying submarines can now threaten the U.S. from positions west of Greenland. The Soviets maintain a large northern fleet at Murmansk including 175 submarines, 90 of them nuclear-powered. The Soviets have also penetrated the Mediterranean, the Middle East, and Africa. Jane's Fighting Ship's reports that the Soviet Navy's growing strength and worldwide deployment appear designed for offensive purposes.

With Soviet military investment growing at a more rapid rate than that of the U.S., they are seizing the technological lead or closing the gap in most classes of weapons.

Some recent annual production figures for key weapons provide telling evidence:

	United States	*Soviets*
Helicopters	506	1,100
Tactical aircraft	575	950
Tanks	156	1,400
Artillery pieces	156	1,400
Armored personnel carriers	1,410	3,700
Long-range bombers	none	15
Nuclear-powered ballistic missile submarines	none	6

Just since the SALT I (Strategic Arms Limitation Talks) agreement in 1972, technology has brought the Soviets an assortment of new devices. These include a range of new missiles—the SS–18, with unprecedented explosive power, can destroy any known fixed target; the new SS–20, likely to be deployed aboard a mobile launcher, may defy satellite vertification—the new Backfire bomber, and MIRV (Multiple Independently Targetable Reentry Vehicle) multiple warheads. Although the Soviets have overtaken the U.S. with respect to almost every strategic weapon, the U.S. continues to maintain a lead in accuracy, in warheads on target, and an advantage in number of warheads.

Indeed, overall Soviet gains have been dramatic. In terms of the strategic nuclear balance, the U.S. has gone from a monopoly in nuclear forces in the late 1940's to a clear superiority in the 1960's to what is now described as rough tactical and strategic equivalence. It is against this background that the Congress must decide on the level and make-up of the defense budget for FY 1978. Can we allow Soviet capabilities to continue expanding and U.S. capabilities to retrench—as they have over the past decade—without inviting an imbalance and ultimately, a crisis. The answer, must be a resounding no. Affirmative decisions must be made on the following weapons systems.

B–1 Bomber: The B–1 is scheduled to replace the B–52 which has been in service for nearly 20 years. The B–1 would have far greater speed than the B–52, much better ability to elude radar detection, and it carries a bigger bomb load.

A lower cost alternative to the B–1 being considered is equipping lower performance planes (a modified Boeing 747 cargo plane or B–52's equipped with larger engines) with the cruise missile. (The cruise missile is a potentially highly accurate, long-range projectile, capable of carrying either nuclear or non-nuclear warheads. U.S. operational commitments for the missile—whether either sea-launched, air-launched, or both—have not been made.) These available aircraft, loaded with the new cruise missile could stand off from hostile borders which the B–1 has been designed to penetrate.

Meanwhile, the Soviets are deploying their new Backfire medium-range bomber which can achieve long-range capability if it is refueled in mid-air. In my opinion, former Secretary of Defense Rumsfeld was correct in warning that unless the B–1 bomber and other strategic deterrents are built, the Soviet Union would get so far ahead militarily that the U.S. would lose influence around the world.

MX Missile: I do not believe that we can afford the risk of delaying the production of this advanced ballistic missile until fiscal year 1979 as the 1978 budget proposes. The MX missile, a mobile missile (probably running on underground rail tracks) would be ten times more potent than the Minuteman it is designed to replace. With the termination of the Minuteman III production line in 1977 and the delay of MX missile production, the Western World will not have a strategic missile production line in operation in fiscal year 1978. One factor in the decision to delay production of the MX was the alleged need for a gesture to the Soviets for the forthcoming SALT II negotiations.

Trident Submarine: Trident is a long-term program for modernization and replacement of Polaris and Poseidon nuclear ballistic missile submarines. The Trident program includes a third generation nuclear-powered submarine and two new ballastic missiles (Trident I, 4,000 mile range, and Trident III, 6,000 mile range). The Trident, the world's largest submarine, will travel faster, dive deeper, run quieter and be able to stay at sea 40% longer than the Polaris or Poseidon.

It will have greater firepower, 24 missiles instead of 16, and it should be less detectable, less vulnerable and less dependent on foreign bases. Current production schedules call for a ship building rate of three Trident submarines every two years with the first Trident to become operational in fiscal 1979 when the oldest of the present ballistic-missile-firing submarines will be 20 years old. The Soviet Union has already deployed two new classes of ballistic-missile-firing submarines (Delta I's and Delta II's). Each are armed with the SS–N–8 (4200 mile range) ballistic missile. The Soviets are currently testing the SS–N–18 sea-launched ballistic missile equipped with MIRV's, which are reported to have a greater range than the SS–N–8.

Our nation is at a crossroads of history and the Congress will play a vital role in deciding what direction we will take.

With the exception of not wishing to run too great a risk of nuclear war, the Soviet Union rejects all that we stand for. However, while the Soviets have made rapid gains on us, they have not yet gained clear military superiority over us. Congress has the responsibility to provide and maintain an essential deterrent, including adequate conventional forces which remain the best insurance against the need to use nuclear weapons.

We must be vitally concerned about the Soviet build-ups during the past decade which has seen them achieve rough military parity with the United States. The financial burden of this awesome build-up has been at the expense of an economy chronically short of housing and consumer goods, plagued by agricultural shortage, and with an economic base half the size of our own, yet outspending the U.S. in the military sector by about one-third. We cannot afford to allow the Soviets to gain absolute superiority over this country and to experiment with added military might, and clearly that is inevitable unless we exercise our authority to alter the trend.

I submit that the risk to the security and welfare of this Nation and of the free world demands that we retain a "defense capability second to none".

TESTIMONY ON THE YOUTH EMPLOYMENT AND TRAINING ACT

Mr. HUMPHREY. Mr. President, on Wednesday, April 20, I had the welcome opportunity to testify on the problem of youth unemployment before the Subcommittee on Employment, Poverty, and Migratory Labor of the Senate Committee on Human Resources. Wednesday's was the first of 3 days of hearings on the Youth Employment and Training Act of 1977, which was submitted by the administration on April 6 and which I was very pleased to cosponsor.

The administration's bill marks an excellent first step—and I emphasize, first step—toward a comprehensive solution to the problem of high youth unemployment. Under the administration's proposal, $1.5 billion will be authorized for the next 18 months to create three new youth job programs and provide jobs for 200,000 young people. This is an excellent start, and I support it.

But, as I pointed out in my testimony, there are ways the administration's bill can be improved. With almost 3.4 million young people unemployed, 200,000 jobs is only a drop in the bucket. I urged the committee to increase the funding level for the programs in the bill. On the same day as the Youth Employment and Training Act was introduced, Senator JAVITS and I submitted an amendment—No. 184—that would provide $1 billion this year and $2.5 billion in fiscal 1978 for the programs in the bill. This amendment reflects the recommendation made by the Human Resources Committee to the Budget Committee for youth programs in fiscal 1978.

Congress was presented with an ample source of funds for youth jobs last week when President Carter withdrew his proposal for a rebate on 1976 income taxes and the investment tax credit. I supported the President on this decision because I think the money could be better used for direct job creation programs, and I urged the Committee to devote part of this new funding source to youth programs.

I also made suggestions to the committee concerning other possible improvements in the administration's bill during my testimony. Mr. President, I ask unanimous consent that my prepared statement be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR HUBERT H. HUMPHREY

Mr. Chairman, I appreciate the opportunity to testify on the Youth Employment and Training Act of 1977, and I congratulate you and the members of the Human Resources Committee for your swift action on this measure.

The bill is an excellent first step toward a comprehensive solution to the complex and disturbing problem of high unemployment among our nation's young people. It was developed in a very heartening cooperative process that brought President Carter and Labor Secretary Ray Marshall together with concerned members of the Senate—you and I, Senator Javits, Senator Jackson, Senator Randolph, Senator Stafford, and others—and the bill submitted by the Administration shows their attention to our concerns.

Now, more than ever, our young people need the help that will be provided by this bill. All across the country, unemployment has dealt a devastating blow to the hopes and aspirations of our youth.

In March, the unemployment rate among teenagers 16 to 19 years old was 18.8 percent, compared to 5.1 percent among adults 25 years old and over. Among black teenagers, the unemployment rate was 40.1 percent and, in many of our central cities, disadvantaged youth have been experiencing an unemployment rate that exceeds 60 percent.

There are 3.4 million young Americans today under the age of 25 who want to work, who are knocking on doors that remain closed to them. These young people are ready, willing and eager to work, but there are no jobs for them.

These young people need help, they need it in large doses, and they need it now. This Committee has just been given an opportunity to provide that help. Last week, President Carter presented us with an additional source of funds for youth jobs when he withdrew his proposal for a rebate on 1976 income taxes and the investment tax credit. I support the President's action on this because I think the money could be better used for direct job creation programs. Let's devote a significant part of it to youth jobs.

Here is a place where the Human Resources Committee could make a significant improvement on the President's proposal, and could do it swiftly. On the same day as the Youth Employment and Training Act was introduced, Senator Javits and I submitted an amendment—No. 184—that would provide $1 billion this year and $2.5 billion in fiscal 1978 for the programs in the bill. This Committee has already made a similar recommendation to the Budget Committee. I urge you to stick to your guns on this figure and fight for additional money for our young people, now that the elimination of the rebate and investment tax credit has made the added money available.

Any additional money we put into youth employment programs will be an excellent investment in the future of this country, because the personal, social and economic costs of youth unemployment are enormous.

If we do not move swiftly to provide jobs for our youth, we may well end up in the 1980's and 1990's not only with a youth unemployment problem, but with a whole generation of middle-age Americans who have little or no job skills and who will need total rehabilitation to become productive and self-supporting workers.

In addition, youth unemployment is a major source of crime. In 1973, the last year for which we have comprehensive figures, seventy-five percent of arrests for serious crimes involved youth under the age of 25. Youth made up 75 percent of those arrested for arson and for robbery, and 85 percent of those arrested for vandalism, for burglary and for auto theft.

The most direct and rapid way to alleviate youth unemployment is through specially-targeted youth employment programs, such as those in the Youth Employment and Training Act. Because of the structural nature of the youth unemployment problem, economic recovery alone will not be sufficient.

What needs to be done?

First, we must create a significant number of jobs that are specifically targeted at youth, and these jobs must be useful and productive.

We should put a large percentage of the 3.4 million youth who are unemployed to work on projects that provide a useful public service. There is work to be done, and plenty of it. We have 70 million homes that need to be weatherized. We have thousands of miles of railbed that need to be rebuilt, homes throughout the nation that need repainting and refurbishing, school buildings that are deteriorating, forests that need replanting, children and elderly that need care, and countless special local needs that our idle young people could fulfill, and fulfill well.

It is a national tragedy and a national shame that our youth are wasting their time and energies when there is much work to do.

Second, the jobs must provide some useful training.

Much of this should focus on basic job skills. Young people need to know how to get to work on time each morning, how to follow directions, how to punch a time clock. These are the most basic job skills, and they can't be learned sitting at home or on a street corner.

In addition, more specific skills should also be taught—construction skills, mechanical skills, bookkeeping skills—but they should be taught as part of the job.

Third, we should provide both full-time and part-time jobs, in both the public and private sectors. Young people who are out of school need full-time work, and we should provide it in abundance. But we shouldn't forget that many youth who are in school also need work just as desperately to earn the money to stay in school or to contribute to family incomes.

Finally, young people need good job counseling, good job information, and good job placement services.

Youth unemployment in this country is a national disaster. The bill we are considering today is an excellent start toward alleviating the problem. The young people in this country are very lucky to have a President and a Congress that are on their side.

The programs provided in this bill will go a long way toward fulfilling the labor market needs of our unemployed youth. The jobs created will be useful and productive, and they will provide good training in basic work skills. But there are some improvements this Committee should consider to make this proposal into the comprehensive youth employment program our young people deserve.

First, as I mentioned at the start of my testimony, the funding level should be increased. In his message to Congress on youth unemployment, President Carter called for spending $1.5 billion on these programs through the end of next year, to create about 200,000 new youth jobs. Now, this is only a drop in the bucket when there are 3.4 million youth unemployed. I think this Committee would be very wise to increase the funding for youth programs, especially now that the President has withdrawn his proposal for a tax rebate and investment tax credit. Senator Javits' and my amendment—number 184—authorizes $1 billion for this year and $2.5 billion for next year. In light of the severity of youth unemployment today, this figure is far more appropriate than the earlier amount.

Second, there are two programs in our Comprehensive Youth Employment Act that are unfortunately missing from the President's Youth Employment and Training Act.

First, there is a Work-Experience for In-School Youth program that would expand our work-study and on-the-job training programs for youth who are enrolled in a secondary school program. More than 1 million of our unemployed youth are in school and looking for part-time work, many to raise the money to stay in school. The President's bill is targeted only at out-of-school youth and overlooks the desperate need of many youth who have made the decision to stay in school and finish their educations. An unfortunate side effect of the President's decision to target jobs on out-of-school youth is that it provides an incentive for youth to drop out of school in order to qualify for a

job created by this proposal. This would be a terrible mistake.

Now, I know that Senators Randolph and Stafford's proposal gives high school credit to youth who participate in their program. But we need to go much further and develop a measure that integrates work experience and career exploration with a young person's educational program. In our amendment, Senator Javits and I have taken the work experience program from our bill and adapted it to the framework of the President's bill. Under this, the CETA prime sponsors and the local educational agencies would jointly prepare an in-school program, and 15 percent of each prime sponsor's allocation would have to go to it.

Second, our bill includes an Occupational Information and Career Guidance proposal that would place trained job counselors in our nation's high schools and junior colleges. We would establish a national entry job level data bank that would be connected to computer terminals in high schools and neighborhood youth centers. And we would set up a program to train new job counselors and upgrade existing counseling services. Senator Javits and I have tried to carry some of this over to the President's bill in our amendment, by allocating $3 to $5 million to the National Occupation Information Coordinating Committee which Congress created last year under the Vocational Education Act. I hope you will add this provision to the final bill.

In addition, now that the withdrawal of the rebate and investment tax credit has freed up some resources, I hope you will also consider our proposal to place trained counselors right in the high schools and junior colleges so that they will be readily available to youth while they are searching for their first jobs and making career plans. This is not in the amendment Senator Javits and I proposed, but it should be very easy to include.

Mr. Chairman, I want to finish up by pointing out that a youth employment program will be one of the most popular and widely-supported actions that this Congress could take. On January 19, I put a Gallup Poll in the Congressional Record showing that 85 percent of those polled favored enactment of a youth employment program. According to the Gallup Poll, "few issues in polling history have received such overwhelming support by the American public." We have a mandate from the American people to move ahead swiftly on the bill before us, and I congratulate you for doing just that.

JUST LEAVE US ALONE—AND NO HANDOUTS, PLEASE

Mr. GOLDWATER. Mr. President, Government regulation is burdensome and downright destructive to American business as a whole. But the weight it places upon small business is so heavy that we may be witnessing the last stages of small independent enterprises.

Mr. President, the small businesses of this country are trying to send one overriding message to the Government—just leave us alone—and it is becoming louder and more urgent with every passing day.

A recent article outlining the problems of one segment of small business in this country appeared in the April issue of the publication, "Hardware Retailing," and I ask unanimous consent that this article, written by Bill Mashaw, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

IT SEEMS TO ME—JUST LEAVE US ALONE—AND NO HAND-OUTS, PLEASE!

(By Bill Mashaw)

It's high time someone with so-called social consciousness recognized the truly forgotten people in our economic system. I'm talking about the hundreds of thousands of really small businesses—retailing, wholesaling, manufacturing and other service establishments—who make up the collective backbone of America's private enterprise system.

This is the segment of the business world which seldom creates any problems for government; but, being part of the total business community, is painted with the same brush of regulation and condemned for everything that big business does in its coldest, crudest and most callous moments. The small businesses of America aren't even distant cousins to the corporate giants like Lockheed, General Motors, Gulf Oil, and the like.

Putting matters into focus, when was the last time you heard of Main Street merchants like hardware and home center retailers asking anything of their government other than to be left alone? Hard to recall, isn't it?

So, the special treatment we want is essentially one of avoiding increased costs and aggravation imposed by governmental interference.

Not one time in the last 25 years has the National Retail Hardware Association in representing our industry asked our Congress for something special for our businesses. Many, many times, we've asked only to be left alone—merely not to be hit by new regulations, obviously and admittedly unnecessary insofar as small businesses are concerned.

Proudly, we've never asked for a hand-out. Yet, do you ever remember anyone in a state capital or in Washington thinking of the problems of small business people when tough economic times arise? Currently, the disastrous droughts in the West and the severe winter of 1977 in the East are examples.

The unemployed rush for unemployment benefits. The farming industry comes asking for disaster relief and increased price supports. Other elements of the populace seek to be included in disaster relief provisions. Meanwhile, the owners of family businesses tough it out. When the profits aren't there, when there is record cold and shortages of fuel, and he is meeting payrolls out of personal savings, he simply toughs it out. The bankruptcy courts are the small businessman's ultimate resource. No governmental subsidy or assistance—and he doesn't want any. He merely wants just to be left alone.

Yet, without compensation or consideration, other than fines imposed for noncompliance, the nation's small businesses are forced to collect, record and report federal and state income taxes for themselves and their employees. They collect, record, report, as well as pay, half the burden of Social Security taxes for millions of employees. They keep the records and comply with federal and state wage-hour regulations. They meet the costs and aggravation of OSHA, credit regulations, firearm and ammunition record-keeping and regulations, new warranty regulations and other impositions which have precious little relationship to business' forgotten segment of our citizenry and our economy.

Our message to government continues to be: "Please leave us alone. Don't strangle us. Let us take our chances in a free market system—please recognize us for what we are and not what we are not. Simply give us equal protection from unnecessary governmental interference. And no hand-outs, please!"

It's our hope that every person employed in governmental, legislative and executive positions will receive this massage from our business people everywhere.

THE FULL EMPLOYMENT AND BALANCED GROWTH ACT; SOLUTION FOR INNER CITY PROBLEMS

Mr. HUMPHREY. Mr. President, our inner city urban areas are entering their second decade as unofficial national disaster areas.

They have remained that way—with staggering rates of unemployment as high as 60 percent for teenagers, unsafe and unhealthy housing, and criminal activity on a massive scale—since the late 1960's at least. They have remained that way despite a list of assistance programs rivaling the Sears Roebuck catalog in volume, despite libraries of reports and recommendations, despite miles of television film minutely detailing riots and the destruction of entire neighborhoods by arson. The problems exist largely because of our ineffectual collective exercise in handwringing accompanied by a congressional chorus of concern.

COMPOUNDING THE PROBLEM

These problems are further compounded by national housing and transportation programs which encourage abandonment of the cities by both business and the middleclass for a plant and a tract house in the suburbs. Thus the tax base of the center city is diminished while the demand for services from those who are without resources continues unabated or actually increases.

To be sure, the efforts of dedicated organizations and concerned minority groups have kept hope alive by waging a determined struggle that has achieved some progress. But in an overall sense, our center cities are going to hold the depressing distinction, along with much of rural America, of remaining underdeveloped areas as long as the Nation fails to develop and implement comprehensive, long-range economic policies and programs.

In point of fact, the core areas of our large cities will remain this way as long as Congress and the administration fail to enact and implement the Full Employment and Balanced Growth Act of 1977 which Representative AUGUSTUS HAWKINS and I have introduced in the House and Senate with 79 cosponsors. It is the only legislation before Congress which provides an effective program to achieve a stable, prosperous economy for all sectors of the Nation's population.

ISOLATED PROGRAMS

Our present Federal approach to the challenge of redeveloping and revitalizing our inner cities consists of an array of programs that have little if any relationship to each other or, equally important, to the needs of the Nation's economy as a whole. We provide public housing where there are no jobs. We establish minuscule job training programs that allow only token numbers of the formerly unemployed to become productive members of society. We demolish block after city block in the name of urban renewal and create rolling waves of dispossessed immigrants who exchange one address for another but remain in despair and bitter frustration. We continue the existence of welfare programs while acknowledging that the result is continued idleness and crime.

And when the economy once again

bottoms out and begins to improve, we read the lowered rate of national unemployment and forget the level of joblessness, the level of degradation and anger of those in the inner city. Nothing much has changed for them. They continue to see themselves as people without a future, consigned to a wasteland where the only change is for the worse.

These conditions stand as a constant contradiction of our social standards and the American ideal of a continually improving life for ourselves and our children. Our society can never be made whole until the disadvantaged of our inner cities and elsewhere are equipped to utilize the opportunities for advancement that most of the rest of us take for granted.

THE FIRST ORDER OF BUSINESS

Mr. President, the first order of business for this Congress is to establish the framework and the procedures that will enable the Government of our Nation to end the needless boom-and-bust swings of our economy and place it on a steady, expanding course. We simply have got to begin to create and sustain an economic platform that will provide everyone willing, able, and seeking work the opportunity for meaningful employment at decent wages.

In answer to these needs, the Full Employment and Balanced Growth Act requires the administration and Congress to develop and initiate long and short range comprehensive fiscal and monetary policies and programs which will allow the Nation's commerce and industry to use their full capacity to meet the demand for goods and services. This is the bed rock upon which any sound effort to reach a full employment economy must be based. Through careful use of general tax and spending programs in tune with monetary policies affecting the availability and cost of credit we can give business the climate by which it can reduce unemployment from its present intolerable nationwide level of between 7 and 8 percent to about 4 percent within 4 years. The history of the past decade when unemployment was held at levels of close to 4 percent is convincing evidence that this goal for private sector achievement is possible.

TARGETING THE PROBLEM

Special programs, targeted at chronically depressed urban and rural areas, can be provided under authority of the bill. These include establishing an alternative source of funds, such as creation of a national development bank, to extend below market loans to small business and State and local governments, tax credit incentives for business investments, and countercyclical grants to State and local governments to provide employment opportunities and to maintain adequate levels of service.

Finally, when it is absolutely necessary to fulfill the legislation's promise of meaningful work opportunities for those seeking it, inventories of federally funded "last resort" jobs held to the lower levels of skill and pay, could be utilized on a temporary basis in depressed urban and rural areas. Such employment opportunities would be designed to avoid competition with private sector labor demands and could not be made available unless the President determined that the need to do so exists and reported his findings to Congress. The "last resort" jobs program could not be implemented until 2 years after enactment.

MISPLACED ALARM

Some critics of the Full Employment and Balanced Growth Act have expressed alarm over the cost of the federally funded aspects of programs that would be utilized under this legislation. I would remind them that unemployment compensation payments totaled $20 billion in 1975 alone and that many States exhausted their unemployment fund reserves and had to borrow from the Federal Government last year to sustain this program. I would remind them that every 1 percentage point increase in the unemployment rate costs the Federal Government $14 billion a year in lost tax revenue and costs State and local governments more than $6 billion, a situation that forced many States and local governments into wholesale layoffs of employees. I would also remind them that the bill requires that to the extent it is reasonably possible to do so, people would be taken off the welfare and unemployment compensation program lists and given job opportunities. In this way funds that would otherwise be expended to sustain them in idleness will instead be used for productive purposes benefiting the entire economy.

Mr. President, the Full Employment and Balanced Growth Act provides the only viable solution to the economic and social problems that riddle the inner city areas of the Nation. It does this because it requires the administration and Congress, with full input from State and local governments, to develop and implement policies and programs to guide the entire economy on an ongoing basis and reach and sustain the employment and anti-inflation goals of the bill. The problems of the cities are not viewed separately and in isolation from one another because they cannot be solved in this way. Rather it provides the comprehensive, workable approach to urban, and particularly inner city problems, within the context of meeting the Nation's overall economic requirements. This is the only way we are going to make lasting headway in revitalizing and redeveloping core city areas.

QUESTIONS ABOUT U.S. POLICY TOWARD CHINA

Mr. GOLDWATER. Mr. President, on several occasions I have discussed in the Senate and elsewhere the great prospect for extending the independence and freedoms of the Chinese people, as practiced in the Republic of China on Taiwan—that is presented by President Jimmy Carter's statements on human rights and morality in foreign policy. If our foreign policy is to be influenced by the recognition of human rights in other countries or if a fundamental aim of our foreign policy is the advancement of these human rights, then it is clear that our Government must remain staunch in its commitment to the independence and security of the Republic of China.

For there is no comparison between the two situations of the Communist regime on the mainland of China and the democratic form of government in the Republic of China. There is a broad extension of freedom and individual liberty within the Republic of China, including the rapid advancement of the economic welfare of the Chinese people living on Taiwan, while in the case of the Communist rulers of the mainland, there is a total denial of the entire spectrum of human rights, from the cruel suppression of religion to the widespread use of slave labor camps as a means of supposedly reforming political prisoners.

Thus, it is quite evident that the only way President Jimmy Carter could fulfill the great moral standards he has articulated for the Nation, in the context of U.S. policy toward China, is to maintain and strengthen the ties our Government and country has with the free Chinese people of the Republic.

Mr. President, this same hope has been aroused among the free Chinese. They have made the same analysis of President Carter's announced principles as I have described. However, some of them are becoming concerned at developments which appear inconsistent with adherence to the principle of morality, as regards our actions toward the Republic of China compared with our moves toward Communist China.

Some of these concerns have been clearly expressed by a distinguished Chinese jurist of international law, Dr. Tu Heng-Chih in a recent article he wrote for the magazine, The Asian Outlook, a public forum on the affairs of Asia. Dr. Tu is dean of the College of Arts at Tung Hai University in Taichung, Republic of China.

So that my colleagues may share from the insight of an internationally educated and prominent scholar of the Republic of China regarding U.S. policy toward China, I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From Asian Outlook, vol. 12, No. 3, March 1977]

IS THIS THE NEW U.S. POLICY TOWARD CHINA?

(By Tu Heng-Chih)

In his inaugural speech delivered on January 20 and other speeches on international affairs, the 39th President of the United States, Jimmy Carter, mentioned the supreme principles guilding U.S. foreign policy, but did not give substantial views on any specific issues or areas. A preliminary picture of the policy toward China to be taken by the new U.S. administration, however, may be gained from the talks given by the new U.S. Secretary of State, Cyrus Vance.

Recalling a little earlier, we may understand from the speeches given by President Carter during his election campaigns that the China policy of the Democrats, in principle, would follow the line of the Republicans. Viewing from the fact that President Carter, before and after his inauguration, has continued to emphasize the principle of morality and the importance of public opin-

ion, we have long expected that he would give some new interpretations to the "normalization" of relations with the Chinese Communists, or even some revisions. But unfortunately, following his meeting with Huang Chen, head of Peiping's liaison office in Washington, on January 8, which was arranged by the outgoing Secretary of State Henry Kissinger, President Carter told the press he would take the "Shanghai Communique" as the basis to continue the effort of "normalization." Taking the opportunity of inaugurating a new President, the U.S. government should have reasons to discard the "Communique;" but now it was unconditionally accepted, really making us very disappointed.

TO START DISCUSSION FROM A TESTIMONY

Following this, Secretary Vance gave a clear indication on the U.S. policy toward China in a testimony made in the Senate on January 10 when he was answering an interpellation on his appointment. First, he declared that he believed the U.S. policy toward Peiping would follow the mutually-agreed guiding principles contained in the "Shanghai Communique" and that the U.S. objective was the pursuit of "normalization." On the so-called "Taiwan question," he said the United States, in the "pace" and "mode" of seeking "normalization" of relations with Peiping, would consider the security of people in Taiwan. In the determination of the "pace" and "mode," he added, more thinking and study would be required and this was referred to national security organs for careful handling. When Senator Percy asked what did he think if the present political upheaval on the Chinese mainland would delay the "normalization" with the United States, Vance answered that there were no signs of such a delay at present and that the Chinese Communists stated they would adhere to the principles agreed upon in the "Shanghai Communique" which were announced before the death of Mao Tse-tung.

In the testimony given by Vance, the part worrying us the most, in addition to that on "Shanghai Communique," was the statement that on "Taiwan question," what he cared was only the "security" of people in Taiwan. This departed quite a lot from the principle mentioned by the Democratic platform six months ago and raised by Carter in his television debate three months before. In the Democratic platform, it was stated that the U.S. relations with the Chinese Communists should continue to develop for the early "normalization" on the basis of a peaceful settlement, including a peaceful resolution of the future of Taiwan. This clearly told us that before a peaceful resolution is obtained, the status quo of Taiwan should be maintained. In other words, as long as the status quo of Taiwan was kept, legal U.S. relations with the Republic of China, including diplomatic and treaty relations, should remain unchanged.

In the television debate three months ago, Carter said: "I would never let that friendship with the People's Republic of China stand in the way of the preservation of the independence and freedom of the people of Taiwan." The "independence" and "freedom" referred also were an admission of a political status. Separately speaking, independence referred to the independence of the Republic of China, and freedom referred to the full freedom enjoyed by the people in Republic of China under a democratic political system. The references indicated that the political status should not be changed because of the "normalization" of relations with Peiping.

But of the "security," as mentioned by Secretary Vance, the significance apparently was much narrower in sense. It seemed that he was to say that after "normalizing" relations with Peiping, the United States would continue to safeguard the security of Taiwan, disallowing it to be endangered by the use of force on the part of Chinese Communists under any excuse. This was tantamount to reiterating the statement made by President Harry Truman in 1950 when he ordered the Seventh Fleet to keep the neutralization of Taiwan Straits. As long as this was purely a military arrangement, it would not cover the political system and external relations of the Republic of China as mentioned above. In other words, the respect of the Republic of China's legal international position and the safeguard of the diplomatic and treaty relationship with the Republic of China were not the factors necessarily to be considered in the process of "normalization" with Peiping.

As to the question of "peace," the answer given by Secretary Vance to Senator Percy also puzzled us. Vance did not deny that on the Chinese mainland today there was a political upheaval. He, however, said that this would not delay the process of "normalization" because the principle held by the Chinese Communists remained unchanged. Actually, the emphasis of Senator Percy's question was on the side of the United States, or that viewing the political upheaval on Chinese mainland, would the U.S. delay the effort for "normalization"? To this question, it seemed that Vance deliberately evaded to give an answer. Under a normal situation for the recognition of a new regime, the basic yardstick usually is the actual controlling power of that regime.

The situation of Chinese mainland today was so chaotic that it should fully testify that the Peiping regime does not have an effective control power. Facing such a fact, the U.S. government should not only delay the effort of "normalization" but also base on it to make a new and overall review of its policy toward the Chinese Communists.

MY SUGGESTIONS TO U.S. GOVERNMENT

From the above analysis, we know there are many troublesome questions in the China policy of the new U.S. government. But facing this new government, we are not pessimistic because from President Carter down, responsible officials of all levels have a determination to get rid of the old and to seek the new. This is true in internal affairs, also in diplomacy. For this reason, I think this is the time that people in our country shall make an active effort. Here I wish to make three suggestions to the new U.S. government:

First, since directly affected by the U.S. "normalization" with Peping is the relationship between Washington and Taipei, I sug- U.S. relations with the Republic of China, legal, including diplomatic and treaty relations, should remain unchanged.
apparently did not have enough sense of such an international responsibility. As President Carter has guaranteed that on the withdrawal of U.S. forces from Korea, the United States will first consult South Korea and the related nation of Japan, I hope he can take the same attitude in the policy toward China.

It is noted that in the "Shanghai Communique" there is a phrase "all Chinese on either side of the Taiwan Straits." By this phrase, it is understood that the U.S. government at least has recognized that the Republic of China, located east of the Taiwan Straits, has some voice on any issue about China. Therefore, the Republic of China not only should be consulted but also reserves the right of giving final approval or refusal. Also, as Secretary Vance said that "mode" is related to the security of Taiwan, the government of the Republic of China on Taiwan of course should have the largest voice; otherwise, if the "security of people in Taiwan" were decided by the Chinese Communists, that would be very ridiculous.

Second, talking about the pure military "security," we all know that the true protection will come from the strengthening of defense by Taiwan itself. The strengthening will involve a lot of factors, such as how to develop the national defense industry to keep the modernization of armament; how to raise the educational level of citizens for the strengthening of combating capability; and how to improve transportation and communication networks to meet the military requirement. In short, the security of a nation depends on its overall national strength. Furthermore, of the eagerness of the Chinese Communists to establish normal diplomatic relationship with the United States, one apparent reason is the hope to acquire U.S. strategic materials or even weapons. While this acquirement may be interpreted as for the boycott against Soviet Russia, it actually threatens the security of Taiwan as well. Therefore, if the security of Taiwan is to be safe-guarded, consideration should be given to this possible development. If the United States does not offer assistance or provide facilities in this respect, but consider the security of Taiwan only in the pace and mode of "normalization" with Peiping, this will be very naive.

Third, any effective restraint over the Chinese Communists must come from force. If the direct use of force is not to be taken immediately, at least there must be a treaty stipulating that force may be used if necessary. After U.S. announcement to keep the neutralization of Taiwan Straits in 1950, the government authorities of the Republic of China and the United States, for fear that the announcement by President Truman was not strong enough to deter the aggression of the Chinese communists, signed the Sino-American mutual defense treaty in 1954. If the United States wants to jointly shoulder up the responsibility of safeguarding the security of Taiwan with the Republic of China, I don't think there is any better way, except the faithful fulfillment of the mutual defense treaty, because this treaty can never be replaced by a promise obtained from the Chinese Communists, for it is always unreliable. There has been an argument in the United States that since the Chinese Communists in fact have no ability to invade Taiwan, there will be no problem if the mutual defense treaty is discarded. To this argument, I would like to ask: Since the United States in fact may not be necessary to take military action based on the treaty, why should this treaty not be maintained to show the U.S. determination to safeguard world peace?

Finally, I would like to quote a paragraph from President Carter's inaugural speech as the conclusion of this article. He said: "To be true to ourselves, we must be true to others. We will not behave in foreign places so as to violate our rules and standards here at home, for we know that the trust which our nation earns is essential to its strength." This is just the same as what our philosophers have said: "Do not do to others what you don't want to be done to you." I sincerely hope that in deciding and implementing the policy toward China, the new U.S. government can also consider the interest and future of Chinese people.

MR. FESTIVAL IS CITY'S IDEA MAN—A CETA SUCCESS STORY

Mr. HUMPHREY. Mr. President, I want to call the attention of my colleagues to a CETA success story. Two years ago, the South St. Paul public school system was forced to cut back on its teaching staff for budget reasons. One of the teachers laid off was Mr. Darrol Bussler. Fortunately for the city of South

St. Paul, there were CETA funds available for the city to hire him in the community schools program, where he eventually became director. In his capacity, Mr. Bussler has sparked a new fire of civic participation and pride in South St. Paul through the creation of community-oriented festivals.

When we passed CETA—the Comprehensive Employment and Training Act of 1973—and added title VI to provide public service jobs, we knew we would create new jobs and put unemployed people back to work. But little did we realize how important this program could be in adding to the quality of life in cities and towns around this country.

This CETA success story was spelled out in a Tuesday, April 12, story in the Dispatch, and I ask unanimous consent that it be printed in the RECORD along with a letter to me from Mr. David Metzen, assistant superintendent of the South St. Paul public schools:

There being no objection, the material was ordered to be printed in the RECORD, as follows:

APRIL 13, 1977.

The Honorable HUBERT H. HUMPHREY,
U.S. Senate,
Washington, D.C.

DEAR SENATOR HUMPHREY: This letter is to share with you a very positive experience the South St. Paul Schools had wih a C.E.T.A. project.

Attached you will find an article about our Community Schools Director, Mr. Darrol Bussler. Two years ago he was laid off from our school staff as a teacher, and through the C.E.T.A. program we were able to hire him as a member of community schools, and eventually he became the director.

I think this example speaks very well for the concept of C.E.T.A. and how well it can work.

Thank you for this fine legislation. The South St. Paul Schools are very grateful.

Sincerely,

DAVID R. METZEN,
Assistant Superintendent.

MR. FESTIVAL IS CITY'S IDEA MAN

(By Nancy Livingston)

You could call him "Mr. Celebration," "Mr. Festival" or "Mr. Enthusiasm."

His real name is Darrol Bussler, and he's the idea man behind many new community activities that are perking up South St. Paul's community spirit.

Not since the "Hook Em Cow Days" festivals in the 1950's has South St. Paul enjoyed such a revival of community-oriented festivals. In the past two years, Bussler has created and produced Christmas in South St. Paul Community Theater, Chapel Monday and Good Friday's Ecumenical Services.

Bussler also helped South St. Paul Bicentennial Commission Chairman Margaret Fairhurst produce an innovative light and sound show on the bluffs of the Mississippi River last fall.

There's no denying it. The man has a flair for creativity and a fertile brain where ideas just keep hatching one after another.

With these gifts, Bussler, 37, is uniquely suited for his job as community services director for the South St. Paul Public Schools. Said Bussler last week, "South St. Paul is so unlike what I would expect in a suburb.

"There's a homeness here, a sense of belonging that I grew up with and that I always thought was so important."

Bussler was born and raised on a farm in tiny Brownton, Minn., 70 miles west of the Twin Cities near Hutchinson. He attended a one-room school for six years that boasted a total student population of 12. "It was like an open classroom," he said. "We learned to live with and respect people of various age levels."

His teacher at the Brownton elementary school was strongly involved with her students, and Bussler said she used to plan and put on Christmas programs and purchase gifts for each student using her own money.

"There was a total family involvement in that school," he said. "We had spring picnics, Halloween gatherings. That's where I learned the importance of a sense of community."

Bussler said he looks at family and community the same way. "Community is just a bigger family," he said. "I believe in family meetings—calling a halt to work and just enjoying each other, talking to each other."

Bussler majored in speech, theater and English education at Gustavus Adolphus College and after graduation, obtained his first teaching job in 1964 at Simley High School in Inver Grove Heights.

"I was a lousy teacher at that time," he said. "I wasn't asking myself the really important questions dealing with education, like what really should be happening between teacher and student? Is subject matter the most important thing? What else can a teacher do for a student?"

Unsatisfied, Bussler quit and went to graduate school at the University of Colorado. There, he said, "I learned to think because I had to. I couldn't rely on all the securities."

A year later he was back in Minnesota teaching in Glencoe. A fellow teacher there, he said, "taught me what teaching was all about. He told me to get off my pedestal and stop being God. He told me to be a real person to kids."

After a three-year stint in Glencoe, he returned to Colorado to finish his master's degree and then came back to Minnesota to lead a completely different life. He was a free-lance teacher for the University of Minnesota extension division, sang with the Edgewater Eight nightclub group and also sang with the Sheiks Sextet at the old Sheiks Cafe in Minneapolis.

Nightclub work was enjoyable, he said, but it eventually wore thin. He remembers going to work one dreary, rainy night and seeing a drunk lying in a gutter in an alley. Fifteen minutes later he was watching the be-furred and be-jeweled women patrons of the nightclub beyond the footlights.

The contrast between the two scenes, he said, made him realize that he "could probably be a better citizen by not being on stage."

Shortly thereafter he quit and went to work as the director of theater for South St. Paul schools. He started a dance class, a course in children's literature and was given the opportunity to do a lot of interdisciplinary work. He even taught a human relations course in the home economics department.

When the South St. Paul School Board was forced to cut back staff, Bussler said he missed the first cut, but was part of the "second reduction" in 1975. That's when he started working with the community services department.

"Right now," said Bussler, "there's no place in the world that I would rather be. I am allowed the challenge of being creative. I have the freedom to dream."

Christmas in South St. Paul was his first major project in his job with community services. "I wanted to do something that was not a typical Christmas program. I wanted to make it far more creative than a series of memorized pieces by children."

He decided to use the talents of people of all ages, and use many art forms. He first approached the city's ministerial association be cause, he said, "church is important to South St. Paul. It is a very vital institution."

After receiving the support of the ministers, he also got the local retail association and the civic arts commission behind the project. The resulting program presented on Dec. 17, 1975, had the support of the entire community and it involved dance, music, visual arts and theater. It was, by all accounts, a resounding success.

"That was the beginning of the feeling that things could be done in South St. Paul," said Bussler. "I heard a lot of people say that they never knew there was so much talent here."

Kaposia Days, a summer celebration, was thought up by Bussler and Bob Verkennes, president of the South St. Paul Jaycees. Again, Bussler said, it was a matter of bringing together all the city's organizations and "doing a lot of legwork."

The first Kaposia Days was held last July 2, 3 and 4 and it will be repeated this summer. A barbecue will be added to this year's list of Kaposia Days activities.

"I see my role," said Bussler, "as saying South St. Paul Schools are interested in the community. I think you need someone to do that, and I think I can do it."

QUEEN ISABELLA DAY

Mr. WILLIAMS. Mr. President, April 22, 1977, marked the 526th anniversary of the birth of Queen Isabella I of Spain, a day commemorated in 40 States across the United States, including my own State of New Jersey. It was largely because of the foresight and perception of Queen Isabella that Christopher Columbus was able to undertake his remarkable voyage to the New World. This commemoration also serves to remind us of the important role that women have played, and will continue to play, in the evolution of our Nation's history.

Mr. President, on April 22, 1977, the Governor of New Jersey issued a proclamation declaring Queen Isabella Day in New Jersey. I ask unanimous consent that this proclamation be printed in the RECORD.

There being no objection, the proclamation is ordered to be printed in the RECORD, as follows:

STATE OF NEW JERSEY—PROCLAMATION

Whereas, the enthusiasm and support of a single ruler led to the discovery of America and the resounding effect this discovery had upon the history of the world; and

Whereas, this great ruler, Queen Isabella of Castile, wife of Ferdinand of Aragon, was the sole backer of Christopher Columbus, whose proposed expedition to the New World was contrary to the 15th century concept of the world; and

Whereas, the shrewd intuition of Queen Isabella, as well as the financial support and risk taken by Her Majesty on behalf of Spain, was responsible for uncovering the unknown riches of the Western Hemisphere; and

Whereas, the history of America has direct linkage to the birth of Queen Isabella on April 22, 1451;

Now, therefore, I, Brendan Byrne, Governor of the State of New Jersey, do hereby proclaim April 22, 1977, as "Queen Isabella Day," in New Jersey, in honor of the great Spanish Queen whose daring vision prompted laying the foundation for contemporary American societies.

WILL FULL EMPLOYMENT CAUSE INFLATION?

Mr. HUMPHREY. Mr. President, there has been no more enduring economic myth in recent times than that full employment will exacerbate inflation.

Well, I do not believe it. The evidence does not show it, commonsense denies it, and compassion demands that we discover how to employ our citizens without raising their cost of living.

The Full Employment and Balanced Growth Act of 1977 (S. 50), despite all misapprehensions to the contrary, is designed to promote both full employment and reasonable price stability. In a brilliant and perceptive discussion of this issue, Dr. Charles C. Killingsworth, professor of economics, labor and industrial relations at Michigan State University, totally debunks application of the fallacious Phillips curve to S. 50. His analysis is contained in an article entitled, "Will Full Employment Cause Inflation?" in the January/February, 1977 issue of Social Policy.

Dr. Killingsworth covers broad ground articulately, succinctly, and convincingly. He points out that the Humphrey/Hawkins bill calls for microstructural approaches to improving the labor market. What this means is the use of human power to train and inform workers to make them more suited to available, profitable jobs in the private sector. It is an effort we have never seriously pursued before, and as Dr. Killingsworth observes, our piecemeal projects provide little basis to generalize about the usefulness of a comprehensive human power program. In fact, the best evidence we do have, from at home and abroad, is that human power programs more than pay off through the reduction of structural unemployment.

The point is, Dr. Killingsworth explains, that full employment attained through fitting people to needed jobs is simply not inflationary, unlike temporarily high employment reached exclusively through stimulating the economy. With this I wholeheartedly agree. And what is more, the Humphrey/Hawkins bill explicitly endorses this notion.

Dr. Killingsworth explores another area which interests me greatly, and should concern all Members of Congress. It is a question Ray Marshall discussed at length during his confirmation hearings as Secretary of Labor. And that is, which is more effective in job creation: a tax cut, or targeted public service employment? It is especially appropriate to seek an understanding of this as both options are before Congress currently. Dr. Killingsworth cites favorably the Congressional Budget Office determination that public service employment creates five to eight times as many jobs per dollar spent as tax cuts. Now that the need for quick stimulus appears less urgent, the more deliberate policy of direct job creation should receive more consideration.

Mr. President, Dr. Killingsworth addresses at some length another fallacious argument against the full employment bill. Some have contended that the last resort job reservoir included in the legislation, which hopefully will not have to be implemented, risks seducing workers away from current employment in State and local government or entails the application by other governments of Federal funds in place of expenditures they would have made anyway. But Dr. Killingsworth points out how weak the evidence is on this matter. In addition, there are proven policies to restrict new jobs to those who are genuinely unable to find work. And finally, suppose there is some such effect. What it implies is that State and local taxpayers will get tax breaks, and the money will reenter local economies already geographically targeted for their high unemployment rates. This is a healthy consequence.

Dr. Killingsworth concludes on a note to which I subscribe with relish. "Improvement," he says, "is not possible if the program is never even started. The Humphrey/Hawkins bill sets an ambitious—some would say a daring—goal. But large achievements seldom come from small ambitions." To that, I say "Amen."

Mr. President, for the benefit of my colleagues who will be shortly considering the Full Employment and Balanced Growth Act, I ask unanimous consent that Dr. Killingsworth's article be printed in its entirely in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

WILL FULL EMPLOYMENT CAUSE INFLATION?

(By Charles C. Killingsworth) *

The persistence of extremely high levels of unemployment after months of recovery from the recent recession has stimulated new interest in proposals for a stronger and more effective effort by the federal government to achieve full employment. The Humphrey-Hawkins Full Employment Bill, at first widely regarded as little more than a political gesture, a year ago was considered quite likely to pass both houses of Congress, in revised form, by the close of the 94th Congress. Now its prospects are clouded, and the reason is a series of strongly worded attacks on the alleged inflationary potential of this proposal—or indeed any proposal for reducing the reported unemployment rate as low as 3 or 4 percent. These attacks have come from respected economists, some of whom wear the liberal label and some of whom are called conservative. Congress is necessarily and properly concerned with inflation as well as unemployment. The repeated assertions that full employment (at least as defined in Humphrey-Hawkins) would certainly cause ruinous inflation—perhaps as high as a 15 percent annual rate—have greatly reduced the momentum and support that the effort to guarantee full employment once seemed to have.

The thesis of this article is that the predictions of disastrous inflation as a result of 3 or 4 percent unemployment lack support either in past experience or analysis. Such predictions rest, either implicitly or explicitly, on a controversial doctrine generally known as the "Phillips curve," which holds that low unemployment rates cause high inflation rates, and vice versa. To the extent that the Phillips curve doctrine rests upon analysis of past experience, that past experience is fundamentally different from the approach to full employment that is proposed in the Humphrey-Hawkins bill. In the past, generally speaking, low unemployment rates have (arguably) resulted from the generalized pressure of aggregate demand. Usually, at least a part of the pressure of aggregate demand has been produced by fiscal and monetary policy. It is the reaction to that approach to full employment—general stimulation of aggregate demand—which the Phillips curve formulation purports to measure.

But our past experience does not include any period of low unemployment rates induced primarily, or even substantially, by the kinds of focused demand and supply improvement programs that are envisaged by the Humphrey-Hawkins bill. There are persuasive reasons for believing that these specific kinds of programs would be much less inflationary than the generalized stimulation of aggregate demand which has been our primary, and nearly exclusive, weapon against excessive unemployment in recent decades.

Most or perhaps all of the economists who have made the alarming predictions of disastrous inflation as a result of full employment have assumed, either explicitly or implicitly, that full employment would be achieved primarily by generalized stimulation of aggregate demand. If we grant the validity of that assumption, then possibly the warning is justified. I say "possibly" because the Phillips curve analysis is not universally accepted, even by mainstream economists. But a judgment about the effect of the Humphrey-Hawkins bill on inflation need not await a resolution of the Phillips curve controversy, which may be a long time in coming. Those who apply the Phillips curve analsyis to the Humphrey-Hawkins bill have misread that bill and have misunderstood the nature of the labor market problems to which it is addressed.

There is a role for fiscal policy in the Humphrey-Hawkins scheme. Even those economists who are most alarmed about inflation grant that our unemployment rate of nearly 8 percent could be reduced significantly without adding to inflationary pressures. Most of the inflation warnings place the danger zone in the range of 5 to 6 percent unemployment. Hence, many economists see some room for further stimulation of aggregate demand, and the Humphrey-Hawkins bill explicitly states that fiscal policy measures must be an important part of full employment policy. Since 1960, however, fiscal policy has come to be almost synonymous with tax cutting. I believe that this orientation of fiscal policy has led to unfortunate consequences and that the time has come to redirect fiscal policy. The Humphrey-Hawkins bill provides the vehicle for such a redirection, although the details are not spelled out in the bill.

PUBLIC SERVICE JOBS VERSUS TAX CUTTING

Humphrey-Hawkins explicitly provides for a major role for public service employment (PSE) in full employment policy. The bill also provides for increased emphasis on other labor market measures, such as training, relocation, placement, and so on. It should be obvious that an expenditure of $10 billion (for example) on such programs with no offsetting tax or other budget changes should provide at least as much of an addition to aggregate demand as a tax cut of $10 billion. But the impact of these two approaches to demand stimulation would be quite different. An understanding of the differences is a key to the current analysis of the potential impact of Humphrey-Hawkins on inflation.

In the first place, expenditures on PSE are

---

*Charles C. Killingsworth is university professor of economics and labor and industrial relations, Michigan State University, and chairman of the National Council on Employment Policy. This article was first presented at hearings before the U.S. House Committee on the Budget, Task Force on Economic Projections, July 27, 1976.

much more cost-effective than tax cuts of equal magnitude in reducing unemployment. The Congressional Budget Office has prepared impact estimates of these two approaches to unemployment reduction.[1] The findings of this study imply that the net cost per job created by tax cuts after 24 months is in the range of $17,000 to $21,000. The findings also imply a net cost per PSE job after 24 months in the range of $2,600 to $3,500. In other words, dollars spent on a PSE program produce five to eight times as many jobs as an equal number of dollars, dedicated to tax cutting. This is a fact of fundamental importance to the correct evaluation of the Humphrey-Hawkins proposals. Even if one allows for a substantial margin of error in the Congressional Budget Office estimates, the superior cost-effectiveness of the PSE program compared with tax cutting is large and obvious. The lower cost per job means that many more jobs can be created with much less inflationary pressure by means of the PSE program than by tax cutting.

In the second place, the purchasing power effects of a tax cut are generally diffused throughout the economy, and its effect in terms of job creation is indirect and somewhat attenuated. When consumers and businesses find that they have to pay less money in taxes, they will spend more on goods and services. Some of this increased demand will be met by increasing hours of work for those already employed, some may be met by increasing productivity. Only part of the increased demand will be met by the creation of new jobs. And the new jobs that are created will not necessarily fit the skills and geographical distribution of the unemployed labor force.

In sharp contrast, the job-creation effect of the PSE program is direct and focused. (The "substitution" argument will be dealt with shortly.) Virtually all of the dollars in the PSE program are earmarked for payrolls. Eligibility requirements can be shaped in such a way as to insure that the hiring is concentrated among labor force groups and geographical areas where the unemployment rates are highest.

The PSE program is sometimes criticized on the ground that it enlarges government payrolls rather than private employment, but the charge is something less than half-true. It ignores the "multiplier effect" of adding people to payrolls, whether public or private. Those added to payrolls spend their earnings, and most of the spending is for goods and services produced in the private sector. To the extent that goods and services are produced in the geographical areas where they are purchased, this spending of PSE earnings helps further to relieve localized unemployment problems. Hence, the PSE program can be sharply focused on particular groups and areas, and to some extent, the secondary spending resulting from PSE hiring will also be focused where unused capacity is likely to be greatest. In time, of course, the effects of PSE spending will be generally diffused through the economy, and a point generally overlooked is that most of the jobs *indirectly* created by the PSE program will be in the private sector.

ANSWERING THE "SUBSTITUTION" ARGUMENT

The PSE program has recently been subjected to strong criticism on the ground that its effectiveness is greatly diminished by the so-called substitution effect. The charge is that money allocated to state and local governments for new hires under the PSE program will actually be used to avoid layoffs of present employees or to staff programs that would otherwise have been undertaken with state and local funding. Members of the Council of Economic Advisers (CEA) have repeatedly argued that "after three years only one or two new jobs remain out of 10 supposedly created originally."[2] This assertion is said to be supported by several studies of the job-creating effects of the present PSE program. However, the fact is that none of the studies relied upon is based on direct observation of the PSE program. All of them are largely theoretical analyses of state and local expenditure patterns under other kinds of federal grant programs, and the authors assume that the behavior of state and local governments will be the same under the PSE program.

As evidence, the studies on which the CEA and others rely are remarkably weak. One of the most careful and thorough of these studies ends with these words: "Clearly, far more analysis will be required before our numerical estimates can be taken as anything more than preliminary guides in the analysis of the practical problems we have examined."[3] Three of the authors of such studies have publicly conceded their weakness as evidence, saying, "A set of estimates ranging from 40 to 90 percent is hardly a 'smoking gun.'"[4] Despite these obvious weaknesses, these studies are frequently cited as indisputable fact—which is surely a disservice to rational discussion of an important issue in public policy. Furthermore, these critics usually ignore a significant corollary of the substitution hypothesis: if there is substitution, as alleged, the money does not simply vanish; it permits state and local tax reduction, or purchases by state and local units which otherwise would not have been made, and the final effect on aggregate demand is at least as great as from a federal tax cut, an increase in federal spending, or a revenue-sharing program.

A more general answer to the substitution argument is that it is based on the present administrative arrangements of the PSE program, under which the federal government grants funds to state and local units of government with only rather general restrictions on the ways in which the funds may be spent. If substitution can be shown to be a significant problem, several remedies are readily available: the federal government could take over the administration of some or all of the program; provision could be made for emphasis on specific projects which would not be carried out without a PSE program, instead of permitting the hiring of workers for the performance of ongoing functions of state and local governments; and greater emphasis could be placed on grants to nonprofit nongovernmental institutions. All of these would be possible under Humphrey-Hawkins.

The foregoing discussion is not intended to suggest that a PSE program is a panacea for unemployment, or that no problems of significance will ever arise in the administration of this kind of program. Rather, the argument is that increased reliance on PSE would be much less inflationary and more cost-effective than the tax-cutting version of fiscal policy. As I read the Humphrey-Hawkins bill, it contemplates the continued use of conventional fiscal policy tools (including tax cuts) under appropriate circumstances, but it would broaden and shift the emphasis in employment policy to include more reliance on direct job creation, humanpower training, and similar kinds of direct intervention in the labor market to achieve full employment.

Neither is the foregoing discussion intended to suggest that the inflation problem will disappear if the Humphrey-Hawkins bill is enacted. My personal view is that recent inflationary pressures have not originated in the labor market, although some labor market institutions may have contributed, directly or indirectly, to the maintenance of the inflationary spiral. To the extent that inflation has resulted from energy and raw materials shortages, crop failures, and other developments unrelated to the state of the labor market, it will still be with us even if we are able to devise and install a noninflationary full employment policy. I resist the dogma that unemployment and inflation are functionally related entities. Nevertheless, I am willing to concede some merit to the arguments of those who believe that the anti-inflation provisions of the Humphrey-Hawkins bill should be expanded and strengthened. It is my understanding that amendments for that purpose are presently under active consideration.

HUMANPOWER TRAINING—A FULL EMPLOYMENT TOOL

Humanpower training and related labor market programs deserve more extended attention than they can be given in a relatively brief space. Certain observations are essential. It has become fashionable to assert that humanpower training has failed. In two senses this assertion is correct. Humanpower training has never been a large enough program to have any significant effect on the general level of unemployment. Obviously, this is not an inherent shortcoming of this approach to labor market problems. Second, some particular programs have shown disappointing results, especially those directe at the most disadvantaged labor force groups or geographical areas. Neither of these facts justifies the generalization that humanpower training and similar programs cannot contribute to a full employment policy.

In fact, the great majority of the careful studies of humanpower training conclude that the monetary returns (to enrollees and to government) from such programs exceed their costs, sometimes by very wide margins. The number of studies with this kind of conclusion is now an impressive total. Nevertheless, some methodological purists have attacked the validity of these studies. Some of the studies are crude, but many of them, particularly those of more recent vintage, compare not unfavorably with other evaluation studies in the social sciences. Some of the purists seem to ignore the basic fact that investigations in the social sciences can only rarely, if ever, be carried out under conditions as carefully and precisely controlled as in, say, a chemistry laboratory. Some of the critics have concluded that methodological weaknesses in the humanpower training cost-benefit studies compel the conclusion that the truth is exactly the opposite of what the studies report; the critics say that since the studies fail to demonstrate conclusively that benefits exceed costs, we must all conclude that the costs exceed the benefits and, therefore, that the programs have failed. Merely stating that argument, I think, sufficiently exposes its fallacy.

I am fond of quoting the observation of Justice Oliver Wendell Holmes that "certainty is generally illusion." In our daily lives all of us constantly base decisions on reasonable probabilities rather than absolute certainty, and I believe that we must do the same in many areas of public policy, including humanpower training. My conclusion is that the great preponderance of reasonably reliable evidence shows that most humanpower programs improve the earnings and employment potential of their enrollees. I conclude further that we have consistently underutilized this tool in the past, and that the Humphrey-Hawkins design would require greater emphasis on this particular tool as one of the many needed to achieve full employment.

LABOR FORCE COMPOSITION AND FULL EMPLOYMENT

Some of those who question or deny our ability to achieve full employment cite changes in the composition of the labor force in support of their view. George L. Perry of

Footnotes at end of article.

the Brookings Institution was perhaps the first to advance this line of argument,[5] which runs as follows. The relative numbers of young people and women in the labor force have increased greatly in recent years. Because these groups, for various reasons, have persistently high rates of unemployment, their presence in greater numbers makes lower rates of unemployment more difficult to achieve than in earlier years. Perry provided a mathematical demonstration which may be described in simplified terms by saying that he applied the unemployment rates for specific age-sex groups in an earlier year to the same groups for the current year to illustrate the effect of changed age-sex composition. He found a relatively small but significant effect. His technique was followed (with enthusiasm, one surmises) by the Council of Economic Advisers two years after the publication of his original article. By using different years, the CEA was able to show that changing age-sex composition of the labor force has added approximately 0.5 percent to the unemployment rate in recent years. This has become one of the more durable fallacies in labor market discussions.

It is a fallacy because age and sex are only two of the relevant dimensions of the labor force. There are others of at least equal significance, and when they are considered, it is clear that the effect described by Perry is more than offset. Thus, if education and race are added to Perry's formulas, the result is a substantial reduction in the unemployment rate in more recent years resulting from changes in the composition of the labor force.[6] In addition, there were several changes in the Bureau of Labor Statistics—Bureau of the Census definitions of employment and unemployment in 1967 which had the net effect of reducing the reported unemployment rate by about 0.2 percent. Adding together all of these factors, we can conclude that definition changes and changes in the age-sex-race-education composition of the labor force have reduced the unemployment rate in recent years by about 0.7 percent. From this standpoint, and using Perry's reasoning, full employment is now somewhat more easily achieved than it would have been 20 years ago.

WAGES, INFLATION, AND THE WORKING POOR

There is another major aspect to the argument that Humphrey-Hawkins is inflationary which I have not yet addressed. This is the contention that the so-called prevailing wage provisions in the bill would themselves be highly inflationary, entirely apart from the overall effect of the legislation on the unemployment rate. Let me oversimplify a little by saying that the argument is that the wage provisions governing the PSE program would compel the payment of wage rates much higher than those now being paid on large numbers of jobs in the private sector, and that these higher wage rates would create a powerful "suction effect" that would draw into the PSE program a large number of low-paid workers, or would compel the upward adjustment of many wage rates in the private sector.

This line of argument deserves close attention because it poses a question of social policy that is of fundamental importance. It also poses some factual questions, and perhaps it is best to deal with those first. The Humphrey-Hawkins wage rate standard which is likely to be most generally applicable for public bodies provides for "the prevailing rates of pay for persons employed in similar public occupations by the same employer." Hence, the requirement is for equal pay for equal work *within the employing unit*. Charles L Schultze, among others, has asserted that this wage standard "is bound to be highly inflationary."[7] He states that the wage for a lowskill or semiskilled municipal job is "often" far higher than the rate for the same job in private industry. He then predicts a mass exodus of workers from the low-pay jobs in private industry to the "last resort" jobs in the public sector, or a rapid rise in the wage scales for the low-level private industry jobs. Schultze cites median hourly wages for a few occupations in a handful of cities as factual support for his generalizations. I do not think the data presented are conclusive. No doubt what he says is true of *some* occupations in *some* cities, but we need a much broader information base than he provides to make a confident judgment. I do not pretend to know, in advance, what further investigation will reveal. I would be surprised, however, if it turned out that most municipal governments (regardless of size and regardless of geographical area) pay higher wage rates than private industry for comparable jobs.

Let us assume, for the sake of argument, that PSE hourly wage rates would be higher than for some significant percentage of jobs in private industry. The policy question which we must answer is: How much do we want to do for the working poor by means of the full employment program? My respected colleague, Sal Levitan, has criticized the Humphrey-Hawkins bill for doing too little for the working poor; Schultz seems to criticize it for doing too much for them. I think the intention of the bill is not clear, and that we should make a conscious choice. It would not be difficult to find ways and means to exclude most of the working poor from the Humphrey-Hawkins programs, as I will show shortly. However, we could consciously choose to put at least some degree of pressure on the private sector to improve the worst jobs, both in terms of working conditions and wage rates. I doubt that the inflationary impact would be nearly as severe as Schultze fears. Even with a higher hourly rate available, some workers would choose to remain in the lower-paid jobs; one labor market phenomenon that has been documented by many studies is the long-run persistence of large pay differentials in the same labor market for comparable work. Some low-paid jobs in the personal service category would probably remain unfilled—for example, rest room attendants, domestic servants, shoeshiners—and people would simply do more for themselves. Some low-paid workers would be replaced by machines, as has been the case with many kinds of agricultural harvest labor. Perhaps more generally, employers would learn to utilize the formerly low-paid workers more efficiently; one of the lessons of many studies is that when labor is cheap it is often used wastefully, and vice versa. If we choose to follow this kind of social policy, of course the impact would depend partly on the speed of change. If we tried to remake the low-wage labor market in a very short period of time, the strains would be far greater than if we moved more slowly.

On the other hand, if we wished to exclude or drastically limit the participation of the working poor in any PSE program, we could easily find ways to do so. The WPA (Works Progress Administration) program of the 1930s and many job programs of the 1960s limited the hours of work available to enrollees. The hourly rate, of course, is only one of the factors determining earnings; the other is hours worked. We could require equal pay for equal work but provide only 30 or 32 hours of work per week, thus considerably reducing the incentive for the job changing that Schultze and others fear. We could require a substantial period of unemployment to establish eligibility for a PSE job. We could greatly increase the number of PSE jobs in the nonprofit sector, assuming that wage rates there are generally lower than in government. One lesson of the 1960s is that it is not difficult to exclude people from social programs, if that is what we choose to do.

TAKING UP THE CHALLENGE

Let me conclude on a personal note. Many people of my generation were attracted to the study of economics because we had lived through the Great Depression and we knew personally the soul-shrinking agony of endlessly looking for a job that did not exist. Many of us thought that economics had to provide the solution to mass unemployment. The revolutionary ideas of J. M. Keynes strengthened that hope. For a time in the 1940s, and perhaps for a briefer time in the 1960s, we thought that economics had finally solved the problem of achieving full employment and that we could even conquer the ancient curse of poverty. The early 1960s were the golden age of the economist, but the eminence was brief and the fall was rapid. For much of the past decade, economics—once called the dismal science—has become the frightened science. Economic forecasting has become a bad joke, and the influence of the profession on policy making has greatly diminished—except, perhaps, when the advice is, Don't do it. In the animal world a frightened and confused creature often freezes into immobility. And we have had a virtual paralysis in employment policy in recent years, partly because almost every proposal has been greeted by cries of *Inflation!* from our frightened economists.

I refuse to believe that this nation has lost its adaptability and its capacity to learn from experience. As even its authors recognize, the Humphrey-Hawkins bill is not perfect. If it is adopted, experience will reveal unsuspected problems that will need correction. But consider what happened under the Manpower Development and Training Act. Congress monitored that legislation closely. Major improvements in the law were enacted in every session of Congress, and the whole system was fundamentally revised after a dozen years of experience with the passage of the Comprehensive Employment and Training Act. But improvement is not possible if the program is never even started. The Humphrey-Hawkins bill sets an ambitious—some would say a daring—goal. But large achievements seldom come from small ambitions. We have learned much about the difficulties of achieving full employment in the past decade. The Humphrey-Hawkins bill builds upon that experience and calls upon us to renew our faith that full employment is attainable. If we reject the challenge without even trying, we insure bitterness and misery in millions of lives, and we edge closer to the fortress society. If we try and succeed, we will have less crime in the streets, less ignorance, less disease, less madness, more simple justice, more strength as a nation, and more security for all of us.

THE FARM CRUNCH: THE NATIONAL ECONOMY CANNOT TOLERATE DEPRESSION CONDITIONS IN AGRICULTURE

Mr. MELCHER. Mr. President, some time ago I suggested to President Jimmy Carter that getting some money into the pockets of farmers and ranchers would do as much or more for the national economy than anything else that could be done.

Unhappily, the President's response was to recommend grain price support levels which will assure that wheat growers will all go broke, and as their product moves into the feed market, it will pull the rest of the grain growers down with them.

I ask unanimous consent today to have printed in the RECORD a column by the well-known economist, Eliot Janeway, which appeared in the Sunday, April 24. issue of the Washington Star, warning that it was the depression in agriculture, ignored by the Coolidge and Hoover regimes, which brought on the Great Depression of the thirties, and that farmers and ranchers are today in a double squeeze that again threatens the whole economy.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit No. 1)

Mr. MELCHER. Mr. President, Janeway warns:

> The main lesson bequeathed by the dire experience of the late 1920's and early 1930's is that boom conditions in the industrial economy, and in the stock market, will not be sustained if depression conditions are tolerated in the farm economy.
>
> This lesson, if pondered and acted on, will prevent the clear and present danger of a repeat performance of the last Depression.

Janeway tells of Eugene Meyer's incessant warnings against letting the farm economy collapse and says:

> It was Meyer's far-sighted counsel to lay the foundations of recovery in the domestic farm economy that Hoover ignored and Roosevelt followed. Carter's ability to survive is likely to hinge on his instinct to commit himself to the same priority.

At this moment in history, Mr. Carter has indicated no such instinct in regard to the historic economic events of the late twenties. It is my hope that that lesson need not be learned again by us in the late seventies. It is also my hope that somehow Janeway's column will be brought to his attention and, if it is not, that enough of my colleagues in the Congress will have read it that they will insist on a farm bill that will prevent a continued agricultural depression.

EXHIBIT 1

FARM CRUNCH RESULTS FROM DOUBLE PINCH

(By Eliot Janeway)

Santayana's famous warning, that those who refuse to study history will be condemned to relive its failures, applies with particular force to the credit crunch now pinching the Farm Belt.

At first blush, it seems a historical first; after all, it is the direct result of the cost inflation which has been galloping across the economic terrain ever since OPEC's declaration of economic war on its commercial customers, its financial custodians, its technological benefactors, and, last but not least, its impoverished neighbors in the Third World.

The Farm Belt credit crunch, however, is the result of a double pinch. Inflation of costs is accounting for only half the damage; deflation of incomes for the other half. This one-two punch from cost inflation and income deflation takes a crueler toll of its victims than the familiar rhetoric of "stagflation" would suggest.

Such are the workings of progress that stagflation has evolved from a bold and sardonic concept to a cliche, which understates the problem of the Farm Belt, because it assumes the failure of productivity and incomes to rise.

The dealers in cliches who take stagflation for granted have not yet caught up with the fact that stagflation would be a lesser evil to settle for, because it would describe a state of affairs in which incomes were still rising, although costs were rising faster.

In the Farm Belt today, however, incomes are falling while costs are not merely rising, but rising faster than ever.

The only exception is the cost of money. Increasingly, farm borrowers able to pay interest are becoming scarce. The two special conditions which always come into play during a bankruptcy crisis are developing.

Commercial banks are giving their good borrowers whose loans are in bad shape lower rates and longer payouts. They're giving their bad borrowers moratoria—a term forgotten since the Depression—even on interest, let alone principal.

The concept of a moratorium on debt was last aired during the early 1930s—more precisely, during the preliminaries to the Great Depression, which was touched off by the argument over how to get out from under the unmanageable burden of war debt.

Foreign government borrowers first agitated for a moratorium, then domestic farm borrowers imposed it. Finally, foreign government borrowers, led by Hitler, followed the American Farm Belt borrowers' initiative.

The study in historical contrast is arresting; and it is not reassuring. Post-mortems of the disaster of the '30s all agree on three striking divergences of the Coolidge boom.

In the first place, industrial investment and urban construction not only participated in the boom, but were directly responsible for the records it set. However, the farm depression of the late 1920s was every bit as striking a phenomenon of the Coolidge years. In fact, the measure of the strength of the Coolidge boom was that it asserted its force despite the severity of the farm depression, coating it over without alleviating it.

In the second place, a striking characteristic of the Coolidge boom was the absence of any domestic price inflation to erode its vigor. This meant that the drop in farm incomes took its toll relative to a more or less fixed level of costs levied on farm purchasing power. The devastating crisis which developed in the Farm Belt was, therefore, mitigated because farm costs were fixed relative to the cost of what farmers had to buy.

Nevertheless, the entire system was turned upside-down by the irresistible demand of the farm bloc for parity between farm and industrial purchasing power. The Farm Bloc in Congress gave the Republican party a mule's kick which split it wide open.

The Farm Bloc in Congress is poised to strike again. It's all the more powerful and, for once, all the more righteous, because of the double pinch of falling incomes and rising costs. Never mind that industrial profiteering is not an offset to farm cost inflation.

The relative position of the farm economy is deteriorating much more drastically (as the direct and inescapable result of industrial inflation) than it did on the eve of the crisis of the 1930s.

The third divergence pinched the sensitive debt nerve. On the eve of the crisis in the 1930s, farm debt, along with international debt and stock market margin debt, was inflating dangerously.

Now, providentially, a wealth of liquidity is available, not only to manage the international debt structure, but also to support an altogether new stock market boom unclouded by debt overextension. This divergence, while troublesome, is still encouraging, because it is limited to farm debt.

But the main lesson bequeathed by the dire experience of the late 1920s and early 1930s is that boom conditions in the industrial economy, and in the stock market, will not be sustained if depression conditions are tolerated in the farm economy. This lesson, if pondered and acted on, will prevent the clear and present danger of a repeat performance of the last Depression.

At that time, the one statesmanlike voice that was heard, but heeded too late, was that of the late, great Eugene Meyer, the most practical financier of his day, and, therefore, the most frustrated.

He was the prophetic dissenter of the Hoover years, when he served as chairman of the Federal Reserve Board. He saw clearly, and warned incessantly, that if a farm depression were allowed to develop, it would pull the props out from under a top-heavy debt structure in the industrial economy and in the stock market.

It was Meyer's far-sighted counsel to lay the foundations of recovery in the domestic farm economy that Hoover ignored and Roosevelt followed. Carter's ability to survive is likely to hinge on his instinct to commit himself to the same priority.

Meanwhile, it is reassuring to report that the Burns Board has been quick to check the severity of the present farm credit crunch. Great credit is due Steve Gardner, the unobstrusive but very effective vice chairman of the board (a graduate banker himself) for his diligence and practicality in confirming the facts and figures of the crisis conditions with which the Farm Belt bankers are now coping.

Another forgotten lesson rooted in the history of the Federal Reserve System is emerging from the expedient which the system is adopting. It is rising to its responsibilities by pumping drafts of emergency credit into Farm Belt districts, without prejudice to its over-all stance of moderation.

There's no danger of nationwide inflation in the Fed's prompt response to the emergency need to counteract regional deflation in the Farm Belt.

It is important to recall, however, that the original responsibility given the Federal Reserve by Congress, in the days when the supply of credit was still considered limited, was to provide relief to regions suffering from credit stringency by redirecting surplus liquidity from regions enjoying it.

It is instructive to recall that the initial form taken by the bank failures of the early 1930s was regional. The system as a whole never recovered from the shock administered by the debacle in the Farm Belt, which New York—that is, Wall Street—minimized because it happened to be enjoying a borrowing boom at the time.

The Federal Reserve System has fallen back on its original charter in devising a rationale for coming to the aid of the Farm Belt. It is empowered to provide seasonal credit regionally, but not to try to run the government. In the case of the farm crisis, all it can do is buy time for the executive and legislative branches to go to the under-

lying problem of falling incomes and rising costs. The expedient of playing the immediate crunch as regional and seasonal is only that, and nothing more.

If the business cycle were still operative, serious students of its workings would be alarmed at the fact that the Farm Belt banks have been squeezed out of lending power at the outset of a new crop year.

If all were well in the moneyed world, and the banking system were providing the neat and orderly adjustments expected of it, the Farm Belt banks would be chock-a-block with excess liquidity to begin sending to cities. The fact that they are as tight in April as they normally expect to be in September is a warning even if the farm economy were self-financing on a seasonally self-adjusting basis, as it clearly is not.

The stubborn error of omission which flaws conventional economic thinking, and the conventional government policy-making behind it, envisions the domestic economy in a purely domestic frame of reference, subject to purely domestic cross-tugs of supply and demand.

The American farm economy is the one conspicuous exception. Where the American industrial economy is no more than 10 percent export-dependent, if that, the American farm economy is at least as export-dependent as all the industrial economies in the rest of the world.

It is a useful fiction for conventional thinkers to maintain that pumping credit contra-seasonally into the Farm Belt will buy time and leave it better off by October, presuming the new farm export strategy is not adopted between now and then. If it is not, the seasonal period of reckoning that will arrive at harvest time will find the farm crunch more intolerable than it already is.

Historians of the Hoover debacle remind us that the farm dissidents of that deflationary period in farm income pressed for more than the then puzzling concept of parity with industrial income; they also advocated a strident new approach to crop export marketing.

It would be a mark of progress if our policymakers today were to pick up from where our farm bloc dissenters left off nearly half a century ago, and push for an assertive new farm export program.

The farm credit crunch of 1977 came to a head before Carter devised his crazy-quilt energy program.

If he knows what's good for him, and not intolerable for the rest of the country, his next move will be to offer the Farm Bloc an overriding exemption from his invitation to share the joys of sacrifice.

MAN'S INHUMANITY TO MAN

Mr. BAYH. Mr. President, on April 8, 1975, the House of Representatives passed a resolution designating April 24 as a "National Day of Remembrance of Man's Inhumanity to Man." When I addressed this issue at that time, I believed the resolution would have served as a proper tribute to the memories of the millions of men, women, and children who have been mercilessly massacred by ruthless and tyrannical governments at various times in history. Unfortunately, opposition from the administration at that time prevented us from voting on that important resolution.

Mr. President, my interest in this subject has not diminished. President Carter's renewed commitment to human rights has enhanced our sensitivity to social injustice throughout the world. Therefore, I believe it would be appropriate if we recall the first instance of deliberate genocide in the 20th century—the savage slaughter of the Armenian people by the Ottoman Turkish Empire in 1915. By recalling this tragic event, we may affirm anew our resolve to prevent such brutalities from occurring in the future. We should also recognize the commitment of the Armenian people throughout the world to the cause of justice and human rights and the terrible price they have paid in pursuit of these principles. They have suffered as few other groups in modern history.

Traditionally, Armenian-Americans and their kin throughout the world have observed April 24 as a day of mourning. It was on the night of that day 62 years ago that 200 intellectuals, community leaders, and prominent citizens of the Armenian community were herded into the desert and executed. This event marked the beginning of the Ottoman Empire's systematic plan to exterminate the whole Armenian Christian population within its borders.

Over the next 3 years, 1915–18, 1½ million Armenians were massacred. The entire population was uprooted from their ancestral homeland in what is now the eastern region of Turkey. The able-bodied men were murdered, sometimes in full view of their enslaved families. Then, all the remaining women, children, and elderly were forced to leave their belongings and march to the remote deserts of Der-el-Zor. Along the way, these helpless people were subjected to torture, rape, and slaughter by roving bands of Ottoman soldiers. Any survivors of these brutalities died one by one from exhaustion, starvation, and disease. As Henry Morgenthau, American Ambassador to the Ottoman Empire at the time, commented:

> Whatever crimes the most perverted instincts of the human mind can devise and whatever refinements of persecutions and injustice the most debased imagination can conceive, became the daily misfortunes of this devoted people. I am confident that the whole history of the human race contains no such horrible episode as this. The great massacres and persecutions of the past seem almost insignificant when compared to the sufferings of the Armenian race in 1915.

Beyond the brutal deportations and heinous murders, the Ottoman Government attempted to obliterate all traces of the 3,000-year-old Armenian civilization. Libraries, churches, and schools were destroyed. Books, paintings, and irreplaceable historical treasures were burned. Every possible attempt was made to wipe out any trace of the Armenian people—who are perhaps the oldest of the civilized races in Western Asia and were the first nation in the world to accept Christianity as its state religion.

Nevertheless, despite the odious crimes of the Ottoman Government, the Armenian people survived. In 1918, through the efforts of President Woodrow Wilson, the boundaries for a free and independent Armenia were established. The little republic was formally recognized by the United States. However, weakened and demoralized by the genocide, the Republic of Armenia fell 2 years later—this time to the Soviet Union. Today, there are tens of thousands of Americans that are of Armenian descent living in the United States, enjoying and upholding the principles of liberty and justice we all cherish so dearly, but the scars of the crimes committed against their ancestors and kin still remain.

Mr. President, the world must never forget the gruesome brutality and injustices suffered by the Armenian people, nor must the world ever forget the other atrocities committed against humanity in this century or any other century. When President Carter addressed the United Nations, he said:

> The search for peace and justice also means respect for human dignity. All the signatories of the United Nations Charter have pledged themselves to observe and to respect basic human rights. Thus, no member of the United Nations can claim that mistreatment of its citizens is solely its own business. Equally, no member can avoid its responsibilities to review and to speak when torture or unwarranted deprivation occurs in any part of the world.

Unfortunately, we cannot remake the past. However, man can use the past to remind him of crimes that must not be repeated in the future. In rededicating ourselves to human rights, we are rightfully pledged to opposing all human atrocities. We must remain vigilant in this pursuit.

SUPPORT FOR WAGE SUPPLEMENTS FOR HANDICAPPED WORKERS

Mr. HUMPHREY. Mr. President, recently, the United Cerebral Palsy Association held its annual conference in Washington. The UCPA delegation from Minnesota provided some very helpful direct testimony on the needs and concerns of the handicapped of my State.

Among their concerns was the continuing problem of disincentives built into our income maintenance programs so that handicapped workers in sheltered workshops not only earn an average far below the minimum wage, but lose other benefits when they increase those earnings.

These comments underline the necessity of introducing work incentives for handicapped persons who are employed on a long-term basis in sheltered workshops. Under present programs, many of these individuals would be better off financially if they did not work at all. They work, because they want to make a contribution and they want to earn their own living. But they also want, as all of us do, to be able to live in reasonable comfort and security. I believe that the wage demonstration program I have proposed as an amendment to the Rehabilitation Act of 1973 will be a tremendous help to this neglected group of underpaid working Americans who have a po-

tential and a strong desire to increase their productivity and their earnings.

I have also received a letter from Mr. August W. Gehrke, assistant commissioner for Vocational Rehabilitation in in Minnesota, in which he reports on an action taken by the advisory committee that meets regularly to provide his office with the consumers' viewpoint. I am pleased to report that this committee, which knows firsthand the problems of the handicapped, voted unanimously in support of my wage supplement proposal.

Mr. President, I ask unanimous consent that Mr. Gehrke's letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

ST. PAUL, MINN.,
April 15, 1977.

Re S. 506, wage supplement bill.
Hon. HUBERT H. HUMPHREY,
Old Senate Office Building,
Washington, D.C.

DEAR SENATOR HUMPHREY: The Division of Vocational Rehabilitation Consumer Advisory Committee is an organization of handicapped persons who meet together for the specific purpose of providing DVR with the consumers' perspective on issues affecting Vocational Rehabilitation in Minnesota. The Advisory Committee has membership throughout the state and is made up of individuals recommended by the various consumer organizations. A listing of the committee members and their respective affiliations is included at the conclusion of this letter.

At its April 9 meeting, the Committee reviewed S. 506, your bill on wage supplements for the handicapped, and voted unanimously to go on record as being in support of the bill, and that this information be forwarded to you.

The following are the members of the DVR Consumer Advisory Committee:

Douglas Bahl, Faribault DVR Client.

Sharon Braiedy, Minneapolis, former client, now a DVR Counselor.

Kay Brown, St. Paul, former client, now Client Ombudsman.

Joyce Engstrom, Minneapolis, Little People of America.

Sharon Hardy, Golden Valley, Speak Up.

Robert Lundell, New Hope (Chairman), Handi-Action.

Jeremiah McShane, Minneapolis, North Country Chapter of National Paraplegia Foundation.

Lloyd Moe, Duluth, Minn. Assn. of the Deaf.

Ruth Moore, Duluth, Disabled Students Committee, U. of M. at Duluth.

Clifford Poetz, Minneapolis, Minn. Assn. of Retarded Citizens.

Richard Ramberg, Minneapolis, Minnesota State Council for the Handicapped.

Scott Rostron, Coon Rapids, United Handicapped Federation.

Lois Weber, Mankato, former client, now a DVR Secretary.

James Steiner, St. Cloud, former client, now Program Director at Opportunity Training Center, St. Cloud.

Thank you for your continuing interest and support for programs for the nation's handicapped.

Sincerely,

AUGUST W. GEHRKE,
Assistant Commissioner for Vocational Rehabilitation.

THE RECENT FEDERAL PAY INCREASE—A COMMENT

Mr. ROBERT C. BYRD. Mr. President, article I of the U.S. Constitution provides that "the Senators and Representatives shall receive a compensation for their services, to be ascertained by law."

The subject of congressional pay was one of considerable discussion at the Constitutional Convention in 1787. In the years that have followed, the subject of an increase in pay for Members of Congress has always been a sure-fire target for public criticism. Sensitivity to such criticism is manifestly evident from the fact that, during the 188 years from the 1st Congress in 1789 to the 95th Congress in 1977, Members of Congress have received only 14 pay raises—three of which were subsequently repealed, and another of which was temporarily reduced during the Depression. Therefore, there have been only 11 "permanent" salary increases for Members of Congress since the First Congress met in 1789.

On February 20, 1977, a Federal salary increase became effective, in accordance with the 1967 Quadrennial Commission Law. That Federal salary increase included an increase in pay for Members of Congress, effective March 1, 1977, and, as could be expected, congressional critics have had a field day. The congressional pay increase has evoked a storm of protest, but I have not seen or heard one word, written or spoken, attacking the increase in pay for executive or judicial officials which was part of the package that included the pay raise for Members of Congress. Critics of the pay increase have also bitterly castigated Congress for the procedure by which the increase was effectuated, averring that it was put through by some devious artifice "without a vote." A good bit of the criticism has been unfair and, I suspect, is the product of a chronic cynicism on the part of some who seemingly delight in attacking Congress for any reason or, indeed, for no reason at all, and who refuse to apply objective reasoning to any consideration of the subject of a pay increase for Members.

On the other hand, much of the criticism has come from well-meaning citizens and is probably based on a lack of knowledge of the facts necessitating the increase and the procedure by which the increase went into effect. As one who, during a quarter of a century of service in Congress, had never supported a congressional pay increase prior to the February 20 increase, I believe that the public, which pays the bills of Government, is entitled to an understanding of the facts supporting both the "increase" in congressional compensation and the "procedure" by which the increase in salary became effective. First, the procedure.

THE "PROCEDURE"

Prior to 1967, Members of Congress were in the politically intolerable position of having to both set and vote their own salary levels—an obvious conflict of interest situation. The possibility of such a conflict of interest did not escape the attention of the authors of the U.S. Constitution. According to Farrand, in "The Records of the Federal Convention of 1787," revised edition, no less an illustrious sage than James Madison—"father" of the Constitution—observed that, in regard to Members of the Congress, "to leave them to regulate their own wages was an indecent thing, and might in time prove a dangerous one." He thought "wheat or some other article (of which) the average price throughout a reasonable period preceding might be settled in some convenient mode, would form a proper standard." At one stage of the work of the Committee of Detail, the wages of Senators were to be determined as follows:

> At the beginning of every sixth year . . . the supreme judiciary shall cause a special jury of the most respectable merchants and farmers to be summoned to declare what shall have been the averaged value of wheat during the last six years . . . And for the six subsequent years, the Senators shall receive per diem the averaged value of bushels of wheat.

Elbridge Gerry, a delegate to the Convention from Massachusetts, stated the objections which determined him to withhold his name from the Constitution, one of which was "the unlimited power of Congress over their own compensations."

Having Members vote on their own pay increases has always invited political grandstanding, posturing, and demagoguery—both by Members and potential opponents—thus feeding public opposition to congressional pay increases. As a result, congressional salaries have always lagged far behind comparable positions of responsibility in the private sector.

In an effort to avoid the historical salary lag and to remove the conflict-of-interest situation in which Members must set and vote their own salaries, the quadrennial commission law was enacted in 1967, and the Executive Salary Adjustment Act was enacted in 1975. The quadrennial commission is a blue ribbon, private citizens' commission, composed of nine members, which meets every 4 years to recommend pay levels for Members of Congress as well as for other high Government officials in the executive and judicial branches whose pay is tied directly or indirectly to the pay of Congressmen. The commission's recommendations are submitted to the President, who can accept them or change them. The President then may submit the recommendations to Congress.

In January, the President submitted pay recommendations to Congress. Under the then existing law, unless either the House or Senate disapproved within come effective. At that time, Congress 30 days the recommendations would bewas not required by law to take any action, nor could it increase or decrease the proposed pay levels. Under the law, it could only vote to disapprove the President's recommended adjustments.

Neither House disapproved the recommended pay increase and when the 30 days expired on February 20, the increase for Members of Congress became effective on March 1, 1977.

Incidently, subsequently, on March 30, the Senate passed legislation, which has now become law, requiring a congressional vote, up or down, on all future congressional pay raises. This, in effect, reintroduces the problems that the authors of the U.S. Constitution sought to avoid, and the Quadrennial Commission Law of 1967 sought to solve.

Under the Executive Salary Adjustment Act of 1975, Members of Congress, Federal judges, and other high Government officials automatically receive the same government-wide percentage pay increase granted to civil service workers under the Federal Pay Comparability Act of 1970. Under the Federal Pay Comparability Act, the Directors of OMB and Civil Service and an Advisory Committee on Federal Pay recommend adjustments in Federal employee pay scales to keep them comparable to those in the private sector. The President then must issue an Executive order putting the salary recommendations into force by October of each year unless he deems the change inappropriate, in which case he must make an alternative proposal which takes effect automatically unless rejected by either House of Congress. The Senate has already passed a bill rejecting the upcoming October cost-of-living increase for all officials—including Members of Congress—who received the March 1, 1977 increase.

In 1975, congressional salaries went from $42,500 to $44,600—because of the 5-percent increase recommended by President Ford under the Executive Salary Adjustment Act. Under the pay increase which went into effect on March 1 of this year—to which I have already alluded—congressional salaries went to $57,500—an increase of 29 percent—as recommended by the Quadrennial Commission, and as proposed by President Ford and supported by President Carter. Although there was no House vote on the pay increase—none then being required by law—two votes did occur, contrary to widespread misunderstanding, in the Senate. By a vote of 56 to 42, on February 2, a proposal to disapprove the proposed pay increase was tabled. A subsequent proposal to repeal the pay increase was tabled on March 30 in the Senate by a vote of 53 to 41. I supported the President's proposed pay increase for Members of Congress, and, therefore, voted to table the proposal to disapprove the pay increase and I voted to table the subsequent proposal to repeal the pay increase, which had, by then, gone into effect.

In summary, the procedure by which the salary increase went into effect was one which, in 1967, was established and designed to take congressional pay increases "out of politics." That was then the hue and cry. Today, the hue and cry has been reversed. Members of Congress, we are told, "should have to vote" their own pay increases—an obvious conflict of interest, "Catch 22" situation. Even some of the Members have joined in the public clamor—some claiming to deplore the pay raise; others expressing indignation because, in their words, "there should have been a vote." The fact is, as has already been stated, no vote was required under the law which many of these same protesting Members themselves helped to enact in 1967; yet, as I have pointed out, in the Senate, there actually were two votes—indirectly, on tabling motions, but votes, nevertheless.

No Member is forced to accept the pay increase. Any Member who professes opposition to the increase in pay, may—and, indeed, should—simply write a letter to the Treasurer of the United States each month, enclose a check, and return the money.

THE INCREASE

The misnamed "Congressional Pay Increase" was, more accurately a Federal pay increase affecting 2,496 high level positions in all three branches of Government—including Congress—and 20,365 upper-grade Federal employees whose pay is tied to congressional salaries. The 535 Members of Congress actually constitute, then, only 2 percent of the total number of officials covered by the increase, and the $7.8 million cost of the congressional pay increase represented only 7 percent of the total Federal pay increase. Still, the criticism has centered wholly on the Congressional pay hike—described by critics as "whopping" and "lavish".

Actually, the 29-percent increase for Congress was the first since 1969, with the exception of the one 5-percent increase in 1975 which I have referred to earlier. Meanwhile, during that same 8-year period, the cost of living rose 61 percent. Had congressional salaries kept pace with living costs since 1969, a Member's salary would now be $68,000, rather than the current $57,500. In that same period since 1969, the pay for blue collar workers went up 70 percent; civil service employees, 66 percent; business executives, 59 percent; white collar workers, 55 percent; Governors and other State officials, 40 percent; and broadcasters and news reporters, over 80 percent.

Is $57,500 too much to pay your Congressman? Members of Congress may be likened to the board of directors of the world's largest corporation—one with a $500 billion budget and producing ¢2 trillion in goods and services for 215 million people. Yet, 400 top corporate officials in the United States receive annual salaries over $200,000; and 100 receive over $400,000 each. A Member of Congress works, on the average, 10 to 12 hours daily, usually six, and sometimes 7 days a week,—I, myself, work more than 80 hours, every week. Every Member of Congress makes decisions affecting the general welfare of all 215 million Americans. He receives from 5,000 to 20,000 letters, telegrams, and postcards a week dealing with every subject under the Sun, from social security to saccharin, and he is expected to meet and talk with his share of the 4 million constituents who visit the Capitol and congressional office buildings each year.

He listens alike to the sober and the inebriate caller; and he reads the mail of the thoughtful citizen as well as the abusive correspondence from the thoughtless. He makes financial contributions to many worthy causes. He is criticized if he stays in Washington too much and criticized if he is not in Washington to answer all of the rollcalls. He is expected to be able to solve every personal problem—ranging from a constituent's marital difficulties to the restoration of an operator's license for the motorist caught driving while drunk. He suffers the inflation common to all, but, by virtue of his office, is subject to financial demands uncommon to most. Then why does he take the job? The answer: Most Members are dedicated to a career of public service; but increasingly, Members of Congress are choosing not to run for reelection rather than continue to endure the frustration and abuse that go with the job.

Again, is $57,500 too much to pay your Congressman? Actually, when the fire and brimstone are cleared away, the pay increase for Congress costs 7 cents for each of the 113 million tax returns filed annually.

We all know about movie stars and television entertainers who are paid hundreds of thousands of dollars annually. Many sports professionals report annual earnings in excess of $100,000. Is their value to the public greater than that of Members of Congress? Or has our sense of values gone haywire?

I realize that the $57,500 salary of a Member of Congress sounds big—and indeed it is a big salary. However, let us look at the situation of a Member of Congress more closely. On the average, 40 percent of the monthly pay of a Senator is deducted for retirement, health and life insurance, Federal and State income taxes. His Federal income taxes are in a high bracket. For example, in the last 6 years I have paid $92,164.19 in Federal and State income taxes. Many Members have to maintain two residential properties—one in the home State and one in the Washington area. For those Members who do maintain residential properties in their home States—and I do not—the upkeep on the property at home for fire insurance, property taxes, utilities and repair bills is a constant cost, in addition to the cost of maintaining a home or apartment in the Washington area, where real estate costs and real estate taxes are exorbitant.

Moreover, the cost of living in Washington is higher, generally, than the cost of living in many of the areas represented by Members of the House and Senate, and, in addition, there are many financial burdens that go with serving in the Congress. For example, when constituents come to Washington, Members of the House and Senate are often expected to entertain those constituents.

Fortunately, my wife and I were able to send our two daughters to college a good many years ago when the costs of

tuition and books were much less than they are today. But, younger Members of the House and Senate are not so fortunate in this regard.

I mention these things in an attempt to more accurately portray the financial situation that confronts Members of Congress—especially those who are not wealthy. Nevertheless, many Members of Congress would find it difficult, politically to cast a vote for a pay increase for themselves. Speaking for myself, it would have been easier for me to have opposed the President's pay increase for Members of Congress than to have supported it.

The question may be asked, why, after having opposed all previous pay increases during 25 years in Congress, did I support this most recent one? I supported it for the following reasons:

First. The increasingly wide disparity between congressional pay and pay for comparable positions outside Congress had become so great that I felt it was time to take a step in the direction of closing the gap.

Second. It is becoming more and more difficult to attract qualified people to, and retain qualified people in, many high-level and upper-grade positions in the executive and judicial branches in view of the fact that the salaries for those positions are tied, by law, directly or indirectly, to the pay levels of Members of Congress. As a result, because of the salary lag, the Federal Government has been losing some of its best people. I have been advised that in the last 3 years, 4 of the 11 Institute directorships at the National Institutes of Health had become vacant and that 85 out of 87 outside candidates had refused the positions due to the low pay. The Directorship of the Institute of Cancer Research, for example, was vacated because the then Director could not maintain his family on the low pay. So, he left the position in order to take a position that would pay more. The Social Security Administration lost 9 out of 19 of its most senior civil service employees at one time last year, with 30 candidates refusing the job because of the low pay. The legislative branch continuously loses some of its most able support personnel because of higher salaries available to them in the business community. So, the lag in congressional salaries was creating a crisis in other areas of Government.

Third. Increasingly, only the wealthy will be able to serve in Congress unless the salary is made sufficient to sustain men and women of limited financial means from all walks of life.

Fourth. Election to Congress is one of the highest honors that can be bestowed by the people upon any man or woman. But, the honor itself is not always sufficient to attract and retain the best brains and the most capable and dedicated servants. The pay must be commensurate with the high responsibilities that go with the job. As in most everything else, the people get just about what they pay for; and the American people deserve the best in their national legislative branch.

Mr. President, in the final analysis, most Members of Congress are dedicated, hard working and conscientious, and have a high sense of duty. They are often deserving of constructive criticism and they expect to receive it. But they are subjected also to much criticism that is unwarranted and unfair. The recent salary increase is such an instance.

COMMITTEE MEETINGS DURING SENATE SESSION

SUBCOMMITTEE ON SCIENCE TECHNOLOGY AND SPACE

Mr. ROBERT C. BYRD. Mr. President, I have cleared these two requests with the able minority leader.

I ask unanimous consent that the Subcommittee on Science, Technology, and Space of the Commerce Committee be authorized to meet during the afternoon of Wednesday, May 4, 1977, while the Senate is in session.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON ARMED SERVICES

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Committee on Armed Services be authorized to meet during the session of the Senate on April 28 and April 29.

The PRESIDING OFFICER. Without objection, it is so ordered.

AUTHORIZATION FOR COMMITTEES TO FILE REPORTS UNTIL MIDNIGHT TONIGHT

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the committees may be authorized to have until midnight tonight to file reports.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECORD TO REMAIN OPEN UNTIL 6 P.M.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that Senators may have until 6 o'clock p.m. today to submit statements, bills and resolutions, petitions and memorials for the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. ROBERT C. BYRD. Mr. President, the Senate will convene at the hour of 10:30 a.m., tomorrow. After the two leaders or their designees have been recognized under the standing order, there will be a period for the transaction of routine morning business not to extend beyond the hour of 11 a.m., with statements therein limited to 5 minutes each.

ORDER FOR NO STATEMENTS TO COME OVER UNDER THE RULE TOMORROW

I ask unanimous consent that no statements come over under the rule.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONSIDERATION OF H.R. 3477 TOMORROW

Mr. ROBERT C. BYRD. At the hour of 11 a.m., the Senate will resume consideration of the bill H.R. 3477. The pending question at that time will be on the amendment by Mr. JAVITS and Mr. DANFORTH, amendment No. 200, as modified. There is a time limitation of 2 hours for debate on that amendment, with the vote to occur, up or down, at the hour of 1 p.m., tomorrow.

Mr. President, it is the hope on the part of the leadership, certainly, that the Senate will complete action on this bill this week. It is anticipated that the Senate will stay in late tomorrow; will come in early on Thursday and will stay in late Thursday; will come in on Friday and stay in late on Friday, in an effort to complete action on the bill.

I think that is about all I can say, except to add that several rollcall votes can be anticipated tomorrow, Thursday, and Friday, on amendments and motions relating to the bill.

There are other matters which could come up, of course. Conference reports are privileged matters and can be brought up at any time and other measures that may be cleared for action may be brought up.

That about sums it up, I think, as far as tomorrow is concerned and the rest of the week.

RECESS TO 10:30 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the previous order, that the Senate stand in recess until 10:30 a.m. tomorrow.

The motion was agreed to; and at 4:31 p.m., the Senate recessed until tomorrow, Wednesday, April 27, 1977, at 10:30 a.m.

CONFIRMATIONS

Executive nominations confirmed by the Senate April 26, 1977:

DEPARTMENT OF JUSTICE

Andrew J. Chishom, of South Carolina, to be U.S. Marshal for the district of South Carolina for the term of 4 years.

The above nomination was approved subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

HOUSE OF REPRESENTATIVES—*Tuesday, April 26, 1977*

The House met at 12 o'clock noon.

Rev. John W. Zsittnik, Community United Methodist Church of Maryland City, Laurel, Md., offered the following prayer:

Gracious God, whose nature is love; move in our hearts and through our lives.

Fill us, Lord; fill us with faith in You, with hope for the future, and love for all humanity.

Empty us, Lord, of self-righteousness and narrow nationalism; empty us so we may hunger for truth and thirst for justice.

Remind us that true greatness is found not in being served but is being a servant.

Nurture in us compassion, making of us servants with minds open to divine guidance and hearts open to human need.

Move us, Lord. Jolt us; disturb us and stir us until we are satisfied with nothing less than integrity for ourselves, justice for our Nation, and peace for the world.

Shalom; Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

THE LATE HONORABLE D. EMMERT BRUMBAUGH

(Mr. SHUSTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SHUSTER. Mr. Speaker, it is with a deep sense of loss that I rise to advise the House of Representatives of the death of the Honorable D. Emmert Brumbaugh, a Member of Congress from 1943 to 1946.

Mr. Brumbaugh, who resided in my central Pennsylvania congressional district, led an exemplary life of public and community service. He enriched the lives of his compatriots and rewarded his State and his Nation, which he loved dearly, with unmatched devotion and dedication to the public good.

Rising from the position of clerk in a small rural Pennsylvania bank to chairman of the board of the Central Pennsylvania National Bank, Mr. Brumbaugh demonstrated the skills and talents which made him an outstanding success in all walks of life. His farsighted expertise in banking was recognized by his banking contemporaries who honored him by electing him president of the Independent Bankers Association, chairman of the Federal Deposit Insurance Corporation committee of the American Bankers Association, and president of the National Association of State Supervisors of Banks. He also served as Pennsylvania State secretary of banking from 1947 to 1952.

Mr. Brumbaugh, who enlisted in the U.S. Army in 1918 and served in the Argonne with the Army of Occupation, was active in veterans affairs throughout his life. He was a charter member of the D. Merle Tipton Post, Veterans of Foreign Wars, Martinsburg; was the first commander of the Claysburg American Legion Post; and was chairman of Selective Service Board No. 32. He was dedicated to serving the veterans of our Armed Forces and was an inspiration to many who felt they had nowhere to turn following the sacrifices of major American wars.

D. Emmert Brumbaugh early recognized the importance of a good education in developing the character and integrity of our youth, and he devoted a lifetime to assisting the educational pursuits of our young people. He served as a member of the board of trustees of Cedar Crest and Hood Colleges and as a member of the board of the Hoffman House for Children in Littlestown. He was a recipient of an honorary doctoral degree in commercial sciences from Franklin & Marshall College and a citation from Hood College. He also served as a trustee for the Pennsylvania Industrial School in Huntingdon.

Mr. Brumbaugh's deep sense of devotion to public service emanated from his strong personal religious and moral commitment. A lifetime church member, Mr. Brumbaugh remained active in church affairs and served on the consistory of the United Church of Christ of Claysburg. He also taught Sunday school for more than 40 years in his hometown of Claysburg.

The central Pennsylvania community will undoubtedly experience a tremendous void in community affairs leadership with the loss of D. Emmert Brumbaugh. He never stopped working for his central Pennsylvania friends and neighbors, and could always be called upon to initiate and organize a community effort in the spirit of self-sacrifice. He served as chairman of the Blair County chapter of the American Red Cross for 30 years and was on the chapter's executive committee for an additional 15 years. He served as a member of the board of Altoona Hospital and was county chairman of its successful $1.5 million fundraising campaign in 1947.

Mr. Brumbaugh also served on the Woodbury Lodge, F. & A.M., and was illustrious potentate of the Jaffa Shrine in 1953. He was director of the Blair County Motor Club for many years, and helped organize the Greenfield Township Agriculture Association and served as an officer of the annual farm products show at Claysburg.

Mr. Brumbaugh, who was born in 1894, was elected to the U.S. House of Representatives in a special election in 1943. The following year, he was elected to a full term in Congress, and devoted his efforts to promoting the interests of his area and his constituents. He will be long remembered by his constituents as an accessible Congressman who always took the time to listen to other people's problems. He achieved an enviable record in the Congress and was accorded the highest respect of his colleagues. For D. Emmert Brumbaugh, the prefix "Honorable" had a true lifetime meaning. Mr. Brumbaugh also served in the Pennsylvania State Senate and was long active in central Pennsylvania politics.

It is difficult if not impossible to adequately pay tribute to a man who earned the lifetime respect and admiration of all those who were privileged to know him. His accomplishments, while many, do not address the true worth and value of this man, and do not illustrate the esteem in which he is held by his friends, neighbors, and acquaintances. D. Emmert Brumbaugh truly exemplified those attributes and qualities for which many men strive, but few achieve. He had the peace of mind that only honest, conscientious, and dedicated public sacrifice can bring.

Mr. Speaker, D. Emmert Brumbaugh is survived by his wife, 4 children, 16 grandchildren, 3 great-grandchildren, and a sister. I extend to them my deepest condolences and sympathy. The legacy of D. Emmert Brumbaugh will live on for many generations to come, and I know that his family will find comfort in the unequaled respect and admiration that Mr. Brumbaugh has earned throughout his lifetime and which will be recognized and remembered long into the future.

America and central Pennsylvania have lost an outstanding leader, a true patriot, and a devoted public servant. D. Emmert Brumbaugh leaves an emptiness in all our lives that will be impossible to fill.

GENERAL LEAVE

Mr. SHUSTER. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to extend their remarks on the life, character, and public service of the late Honorable D. Emmert Brumbaugh.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

IS PRESIDENT CARTER TELLING THE TRUTH ABOUT OIL?

(Mr. MICHEL asked and was given permission to address the House for 1

minute and to revise and extend his remarks.)

Mr. MICHEL. Mr. Speaker, I bring to your attention the following:

The Associated Press reports that a United Nations conference disagrees with President Carter's warning that we are running out of gas and oil. This conference stated that petroleum and gas resources will be available for the next hundred years if oil producers are given sufficient economic incentives.

Newsweek reports that the Defense Intelligence Agency places Soviet proved oil reserves at 85 billion barrels instead of the 35 billion barrels estimated by the Central Intelligence Agency (CIA) report used by President Carter to bolster his claim that the world is running short of oil. Newsweek says that the disparity between the two estimates "is bound to raise the question whether the President chose the CIA figures because they bolstered his gloomy view of world fuel supplies."

National Journal reports that the CIA report, contrary to popular belief "does not talk about world oil reserves as such—there is a difference between a shortage of oil in the ground and a shortage of oil in the marketplace that Carter might have acknowledged."

Admiral Turner of the CIA says that the Soviet Union is flooding its oilfields; the Washington Post quotes an "oil industry expert" who disagrees with that opinion.

The Congress should immediately investigate these important differences of opinion and differences concerning basic facts. As of this moment, the American people are being asked to sacrifice on the basis of widely conflicting data.

PROVIDING FOR CONSIDERATION OF HOUSE CONCURRENT RESOLUTION ON THE BUDGET—FISCAL YEAR 1978

Mr. BOLLING. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 515 and ask for its immediate consideratiion.

The Clerk read the resolution, as follows:

H. RES. 515

Resolved, That during the consideration of the concurrent resolution (H. Con. Res. 195) setting forth the congressional budget for the United States Government for fiscal year 1978, it shall be in order to consider without the intervention of any point of order an amendment offered by the chairman of the Committee on the Budget revising the congressional budget for the United States Government for the fiscal year 1977, and said amendment shall not be subject to amendment except a germane amendment offered by Representative Holtzman, of New York; nor shall any other amendment revising the congressional budget for the United States Government for the fiscal year 1977 be in order during the consideration of H. Con. Res. 195.

The SPEAKER. The gentleman from Missouri (Mr. BOLLING) is recognized for 1 hour.

Mr. BOLLING. Mr. Speaker, I yield 30 minutes to the gentleman from Ohio (Mr. LATTA), pending which I yield myself such time as I may consume.

Mr. Speaker, this resolution is an interesting one because it does not affect the substance of the current resolution that will be considered when the rule is adopted. It affects the substance of the Third Budget Resolution for fiscal year 1977.

The President has withdrawn his support of the tax rebate, and the Committee on the Budget thought it wise to get the figures on the Third Budget Resolution for 1977 straightened out so that there would not be that large overhang of a number of billions of dollars.

The gentlewoman from New York (Ms. HOLTZMAN) sought the opportunity, on the basis of equity, to offer an amendment to knock out whatever kind of business incentive would have been included; and the Committee on Rules, without much controversy, decided that that was a reasonable set of requests. Therefore, in effect, this rule makes it possible to amend the Third Budget Resolution for fiscal year 1977 and does not affect the consideration really of the First Budget Resolution for 1978, which will be considered under the rule, which really did not need to be granted by the Committee on Rules. It is actually in the law, so this is a technical procedural matter.

Mr. Speaker, I do not know of any great controversy over the rule. There probably will be some over at least one aspect of one amendment.

Therefore, Mr. Speaker, I reserve the balance of my time.

Mr. LATTA. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I agree with the statement just made by the gentleman from Missouri (Mr. BOLLING) about this proposed rule.

Let me say that I agree with the main thrust of this rule. I certainly do not, however, support the Holtzman portion of this rule. I recall there was a little controversy in the Rules Committee on this part of the resolution. As a matter of fact, the vote itself showed that there was some controversy. It was a 6-to-5 vote in the Committee on Rules, so it was not overwhelming.

However, Mr. Speaker, let me say that I am delighted to support the main thrust of this request today because it indicates that we on this side of the aisle are in a position to say, "We told you so."

Our side did not support the $50 rebate scheme because we did not think the economy was in such a state that it needed this type stimulus. Time has proven that we were correct in our assessment of the state of our economy.

We are delighted that the President of the United States saw the light and agreed with us. We are therefore, pleased to support this resolution today which makes an adjustment in the 1977 resolution to make certain that new spending does not take over the sudden windfall.

Mr. Speaker, I reserve the balance of my time.

Mr. BOLLING. Mr. Speaker, I yield 1 minute to the gentlewoman from Ohio (Ms. OAKAR), and I ask unanimous consent that she be permitted to speak out of order.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

LEGISLATION FORBIDDING RETURNING CROWN OF ST. STEPHEN TO HUNGARY

Ms. OAKAR. Mr. Speaker, as a Representative of Cleveland, Ohio, which has the largest community of Hungarians in this country, I today introduced a bill to forbid the President from returning the Crown of St. Stephen to Hungary without the express approval of Congress. As the Members of this Chamber know, the Crown came into American possession in the last days of World War II, and thus far our Government has refused to return it to Hungary, despite numerous demands from the Hungarian Government.

I am strongly opposed to returning the Crown now, and recent indications that the President and the Department of State are seriously considering returning the Crown are of deep concern to me. So deep is my concern that I have taken the step of introducing a bill to protect the Crown which goes far beyond any other legislation that has ever been offered.

While earlier bills merely expressed the sense of Congress that the Crown not be returned, my bill, which is entitled the Crown of St. Stephen Protection Act, would preclude return of the Crown without the consent of Congress. My fear is that unless this bill is enacted, the Crown at some time may be wisked out of the country, and it will be in Budapest before the American people even know of the decision. My bill would insure the participation of the Congress—and thus the American people—in any decision on the fate of the Crown.

I believe there is ample support in the Constitution for an exercise of power by Congress in this manner. Under article I, section 8 of the Constitution, Congress has the power, in connection with its power to declare war, to make rules concerning captures on land and water. This grant of authority is obviously a very broad one, but it has rarely been exercised.

Congress can exercise this authority with regard to the Crown, in my view, because of the circumstances in which it came into American possession. As Russian troops approached Budapest near the end of World War II, the Hungarian Royal Guard, fearing for the safety of the Crown, removed it from Hungary.

along with the other relics of the Hungarian royalty, an orb, a scepter, a sword, and a robe. They buried these treasures at a number of sites in Austria, with the Crown having been buried in a gasoline barrel.

During May through July of 1945, officials of the Royal Guards showed American troops of General Patton's Third Army where the Crown and the other objects were located, and thus they came into the custody of the United States. During this time, the United States was at war with Hungary, war having been declared on June 5, 1942. A treaty of peace with Hungary was not signed until February 10, 1947, and President Truman officially declared the cessation of hostilities of World War II on December 31, 1946.

As to the reasons why I feel so strongly that the Crown should not be returned, I believe they are amply stated in the history and significance of the Crown. I think there is no exaggeration in saying that the Crown of St. Stephen has as deep a meaning to the Hungarian people as, for example, the Liberty Bell and the Statute of Liberty have to Americans. Given to King Stephen of Hungary in the year 1001—nearly a thousand years ago—the Crown was a gift from Pope Sylvester II sent in gratitude for the King's converting himself, and his nation, to Christianity. Thus the Crown symbolizes not only Hungary as a nation, independent from all others, but also Hungary as a Christian nation. To the Hungarian people, the Crown has a mystic quality. Acts of state had often been done "in the name of the Crown of St. Stephen."

While the Crown originally was quite simple, it was embellished through the ages with tears of gold, jewels, and enamel portraits of ancient kings. Nine pendants are strung from it by golden chains, and these would make a tinkling sound as the monarch walked. A cross at the top of it was bent, legend has it, in the 13th century when conspirators tried to assassinate the king.

As stories concerning the possibility of the Crown's return have appeared in the media recently, I have learned well the deep sentiment that Hungarians in the Cleveland area—and indeed, all over the United States—have for the Crown. Frankly, they are outraged at the thought of its being given to the present rulers of Hungary, and who can blame them? Many of them might be in Hungary today, were it not for the oppressive government installed there by the Soviet Union in 1948. Thousands came to this country in 1956, after they and their countrymen wrote in their blood a story of courage that evokes the respect, and the tears, of free men and women everywhere.

Think of Budapest in 1956, and the absurdity of giving the rulers there now a symbol of independence and Christianity becomes strikingly clear.

I realize, Mr. Speaker, that the United States must live and work with many foreign governments, the policies of which we find very distasteful. I realize, too, that President Carter is now trying to establish and improve relations with many such governments, and I do concur in his efforts to foster understanding and cooperation among nations. But another policy of the Carter administration, one that, in my view, transcends all others in importance, is that of speaking out in behalf of human rights. I have joined many others in Congress in enthusiastically endorsing this policy, and I must say that returning the Crown to Hungary now would, in my view, be completely contrary to the principles underlying this policy.

For the human rights policy is basically one of being honest with ourselves and the rest of the world, of refusing to close our eyes, and still our voice, when deprivations of basic human rights are taking place. Our retaining this beautiful, thousand-year-old Crown in trust for the Hungarian people is fully consistent with these high principles, and frankly, I cannot see how the United States could claim that it upholds these principles, were it to give the Crown to the present Government of Hungary.

Thus, I earnestly ask my colleagues to study this issue, and to join with me in supporting the bill I introduced today.

Mr. BOLLING. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER. The question is on the resolution.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. TRIBLE. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 400, nays 1, not voting 32, as follows:

NOT VOTING—32

Ambro	Forsythe	Myers, Ind.
Armstrong	Fowler	Pepper
AuCoin	Harrington	Price
Bevill	Heckler	Rose
Boggs	Hefner	Spellman
Burton, John	Koch	Stanton
Burton, Phillip	McCormack	Stark
Cederberg	McDade	Teague
Derrick	McKinney	Treen
Derwinski	Mathis	Yatron
Eckhardt	Milford	

The Clerk announced the following pairs:

Mrs. Boggs with Mr. Armstrong.
Mr. Ambro with Mr. McKinney.
Mr. Harrington with Mr. Treen.
Mr. Milford with Mrs. Heckler.
Mr. Price with Mr. Rose.
Mr. Pepper with Mr. Cederberg.
Mrs. Spellman with Mr. Derwinski.
Mr. Teague with Mr. Fowler.
Mr. Yatron with Mr. Eckhardt.
Mr. Stark with Mr. Hefner.
Mr. Phillip Burton with Mr. Derrick.
Mr. Bevill with Mr. Koch.
Mr. John L. Burton with Mr. McDade.
Mr. McCormack with Mr. Forsythe.
Mr. AuCoin with Mr. Mathis.
Mr. Stanton with Mr. John T. Myers.

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PERSONAL EXPLANATION

Mr. BOLAND. Mr. Speaker, when the House voted on final passage of H.R. 5840, the Export Administration Amendments of 1977, my vote was not recorded by the electronic recording device. Had my vote been recorded, it would have shown that I voted "aye" for passage of the bill.

I ask unanimous consent that this statement appear in the permanent RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

PERMISSION FOR COMMITTEE ON RULES TO FILE CERTAIN PRIVILEGED REPORTS

Mr. BOLLING. Mr. Speaker, I ask unanimous consent that the Committee on Rules may have until midnight tonight to file certain privileged reports.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

FIRST CONCURRENT RESOLUTION ON THE BUDGET—FISCAL YEAR 1978

Mr. GIAIMO. Mr. Speaker, pursuant to section 305(a), title 3, Public Law 93–344, the Congressional Budget Act of 1974, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the concurrent resolution (H. Con. Res. 195) setting forth the congressional budget for the U.S. Government for the fiscal year 1978.

The SPEAKER. The question is on the motion offered by the gentleman from Connecticut (Mr. GIAIMO).

The motion was agreed to.

GENERAL LEAVE

Mr. GIAIMO. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and to include extraneous matter at the end of consideration of House Concurrent Resolution 195.

The SPEAKER. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the concurrent resolution House Concurrent Resolution 195, with Mr. NATCHER in the chair.

The Clerk read the title of the concurrent resolution.

By unanimous consent, the first reading of the concurrent resolution was dispensed with.

The CHAIRMAN. Pursuant to section 305(a), title 3, Public Law 93–344 of the Congressional Budget Act of 1974, the gentleman from Connecticut (Mr. GIAIMO) will be recognized for 5 hours, and the gentleman from Ohio (Mr. LATTA) will be recognized for 5 hours.

The Chair now recognizes the gentleman from Connecticut (Mr. GIAIMO), chairman of the committee.

Mr. GIAIMO. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in strong support of House Concurrent Resolution 95, the first budget resolution for fiscal year 1978. This resolution proposes a prudent and responsible economic policy and recognizes key national priorities and needs. Adoption of this resolution will establish a benchmark to measure tax and spending measures for the upcoming fiscal year. In the fall, Congress will adopt a second budget resolution which will impose a binding ceiling on spending and a floor on revenues.

This resolution has posed difficult choices. It was written in a period of substantial economic uncertainty. The rapid decline of the recovery in late 1976 had prompted widespread support for immediate action to stimulate the economy. The unexpectedly severe winter weather, coupled with a natural gas shortage throughout much of the Nation, delivered an additional unwelcome jolt to the economy. Numerous economists called on Congress and the President to act.

And Congress did act. We responded to the situation by adopting an unprecedented Third Budget Resolution for fiscal year 1977, calling for quick stimulus to the economy through tax reductions and rebates and direct Federal spending. Yet, 2 months after we adopted the third resolution, major components of the stimulus package proposed in that resolution remain to be approved by Congress and implemented by the President. And just 2 weeks ago, the administration withdrew its support of the proposed $50 tax rebates, a major element of the economic stimulus package.

However, despite the lack of additional stimulus, the economy has shown signs of unexpected vitality in recent months, although the prospects for recovery over the long run are still uncertain. Compounding the complexity of the situation, inflation is once again a cause of concern to us all.

In view of these uncertainties, the committee believes that the best policy is to delay consideration of major new stimulus efforts until additional information is available later this year. In particular, the Budget Committee and the Congress must evaluate the impact on the economy of the withdrawal of the tax rebate proposal.

At the present time, however, there is insufficient data to support either a more optimistic appraisal of the economic recovery or a determination that new economic stimulus alternatives should be proposed for the upcoming fiscal year.

In recognition of this uncertainty, the resolution includes language to the effect that if the economic recovery does not proceed satisfactorily during the summer months, it will be necessary for Congress to provide additional economic stimulus in the Second Budget Resolution for fiscal year 1978. By the same token, if prospects for long-term recovery appear to be satisfactory, the committee will consider reductions in spending in order to move more rapidly toward a balanced budget.

This does not mean, of course, that we should cut back on or abandon the economic stimulus measures which are still pending before Congress. While recent economic indicators have given us some reason for encouragement, we are still far from our goal of full employment, steady growth, and stable prices. Our Nation needs the economic stimulus of accelerated public works, public service jobs, and other forms of assistance. And while I share the doubts of many Members as to the effectiveness of many of these programs, we must provide some measure of support to the economy as quickly as possible—even if it means utilizing programs that leave much to be desired.

SUMMARY OF RESOLUTION

The First Budget Resolution for fiscal year 1978 sets targets for aggregate spending and revenue levels and for spending in the 17 functional categories of the budget.

BUDGET AGGREGATES

[In millions of dollars]

(1)	Revenues	$398,094
(2)	Budget authority	500,764
(3)	Outlays	462,345
(4)	Deficit	64,259
(5)	Public debt	801,100

FUNCTIONAL CATEGORIES
[In millions of dollars]

	Function	Budget authority	Outlays
050	National defense	115,686	109,647
150	International affairs	9,543	7,397
250	General science, space, and technology	4,930	4,737
300	Natural resources, environment, and energy	20,950	20,677
350	Agriculture	2,153	2,880
400	Commerce and transportation	20,569	20,277
450	Community and regional development	8,237	10,926
500	Education, training, employment, and social services	22,739	27,756
550	Health	47,685	44,238
600	Income security	182,688	148,309
700	Veterans benefits and services	19,935	19,903
750	Law enforcement and justice	3,560	3,800
800	General government	3,898	3,998
850	Revenue sharing and general purpose fiscal assistance	9,822	9,783
900	Interest	43,000	43,000
	Allowances	1,069	1,021
950	Undistributed offsetting receipts	—16,000	—16,000

It is designed to achieve three major objectives: First, to provide sufficient stimulus to sustain the economic recovery; second, to provide for a reasonable balance between spending for national defense and social programs while calling for a series of program reforms to conserve budget resources; and third, to avoid major new budget commitments which would jeopardize the availability of resources needed for major new program initiatives in fiscal year 1979 and beyond.

The committee's recommendations for fiscal year 1978 differ only moderately, in real terms, from those proposed by the President. These differences are due primarily to differing outlay estimates and economic assumptions.

The resolution establishes the following budget aggregate targets for the fiscal year beginning on October 1, 1977: revenues of $398.1 billion; budget authority of $500.8 billion; outlays of $462.3 billion; a deficit of $64.3 billion; and a public debt level of $801.1 billion.

ECONOMIC ASSUMPTIONS AND PROJECTIONS

The committee assumes the enactment of economic stimulus measures for fiscal year 1978 primarily along the lines proposed by the President. In addition, the committee recommends moderate increases for discretionary programs—particularly in the community and regional development and the education, training, employment, and social services functions—which can be made available for programs that increase job and training opportunities.

The committee estimates that enactment of the measures assumed in this resolution will result in the following economic goals: real growth in GNP—fourth quarter over fourth quarter—will be 4.5 percent, unemployment will be 6.3 percent by the fourth quarter of 1978; and inflation will be at a rate of 5.5 percent by the end of 1978.

These economic goals are less optimistic than those recommended by the administration in its February budget submission. However, the committee feels that its estimates reflect a more accurate assessment of the probable course of the economy in the months ahead. Of course, it will be essential to monitor very carefully the course of the economy over the next few months, particularly to determine the impact of the President's withdrawal of the rebate proposal.

DEFICIT

The committee recommends a deficit of $64.3 billion for fiscal year 1978. Although the deficit level recommended in the budget resolution is about $6.5 billion higher than that recommended by the President in his February 22 budget revisions, the difference is largely due to different economic assumptions and outlay estimates for various programs and activities. If common economic assumptions and program estimates were used, the President's deficit would be increased from $57.7 billion to $62.2 billion, approximately $2 billion lower than projected by the committee.

The Budget Committee has taken strong action to hold this deficit to a minimum and to insure that it does not strain credit markets or create undue pressure on prices.

We have made sharp and controversial cuts in many spending programs. And I expect that there will be a great deal of interest in restoring some of those cuts during consideration of this resolution. Remember, however, that every dollar that is added to our spending recommendations will add to our deficit. And, while substantial reductions in the deficit will come only as we approach full employment, we must control spending if we are to have the flexibility to undertake important new program initiatives.

REVENUES

The resolution proposes a revenue level of $398.1 billion in fiscal year 1978, $3.5 billion below the $401.6 billion level recommended by the President. The largest part of this difference is due to the committee's more modest economic assumptions, primarily in the areas of business investment and residential construction. The lower economic projections reduce our revenue estimates by about $2.5 billion. The remaining $1 billion difference between the committee and the President is due primarily to the fact that the committee assumes enactment of the economic stimulus tax reduction proposals passed by the House and extension of the 1976 temporary tax reductions for another year.

OUTLAYS

Of the $6.5 billion increase in the deficit recommended by the committee over the level proposed by the President, $3 billion is accounted for by increases in outlays. About $2 billion of this amount results from differing economic assumptions and estimates. The remaining $1 billion results from changes recommended in funding levels for various functional categories. Within these limits, however, the committee has recommended a modest shift of resources away from national defense and toward social needs.

I believe the committee's recommendation for national defense—budget authority of $116 billion and outlays of $109.6 billion—is reasonable and responsible. Proposed reductions in the President's budget are intended primarily to promote needed reforms in defense activities; they do not involve the elimination or abandonment of any ongoing weapons system. Even with these reductions, national defense would receive the largest outlay increase over the congressional budget for fiscal year 1977—approximately $9.5 billion.

RECOMMENDED PROGRAM REFORMS

The committee recommends a series of legislative reforms in Federal programs designed to conserve present and future budget resources, eliminate waste and inefficiency, and provide the flexibility to respond to pressing national needs. These reforms, which will require positive action by the Congress would result in savings in fiscal year 1978 of $1 billion in budget authority and $2.1 billion in outlays. Over a 5-year period, cumulative savings would be approximately $7.6 billion in budget authority and $26 billion in outlays.

The committee realizes that many of these reforms involve substantial controversy. But Members should recognize that unless Congress is prepared to act responsibly and courageously in the area of program reform, we will mortgage our future resources to outmoded programs and activities.

I urge House committees to look carefully at the reform proposals outlined in our report. And I urge all committees to go beyond these proposals to examine other programs within their jurisdiction.

In particular, we need to evaluate present Federal efforts to stimulate the economy and create new jobs. The effectiveness of a number of programs and activities, including but not limited to counter-cyclical assistance, public service employment, and temporary and permanent tax relief is being increasingly questioned.

In the coming months, the Budget Committee's Task Force on Economic Policy will undertake a comprehensive evaluation on a comparative basis of the various forms of economic stimulus. The information gathered from these hearings will enable the Budget Committee and the Congress to make more enlightened fiscal policy choices. We urge all committees to supplement our efforts with a review of major spending activities within their jurisdiction.

COMMITTEE AMENDMENTS

Mr. Chairman, the Budget Committee has authorized me to offer two floor amendments to the resolution, one dealing with agriculture and one modifying the third budget resolution for fiscal year 1977.

During Committee consideration of the first budget resolution, it became apparent that it would be necessary to modify our recommendations for agriculture due to possible changes in commodity support programs. As expected, the severe winter weather has prompted the administration to change the level of price supports for certain Commodity Credit Corporation programs. Conse-

quently, I will offer an amendment to add $1.5 billion to the agriculture function in order to accommodate these program changes.

Since the Budget Committee has already provided about $500 million more for agriculture than the President had originally recommended, the total increase over the President's budget submission for agriculture would come to some $2 billion.

Although these increases are needed to accommodate administrative action already taken, I must caution the Members of this body against further increases in subsidies to agriculture. The pressures on the Federal budget are enormous. And, deserving as the American farmer is of every consideration by the Government, other sectors of the economy have equally pressing needs—cities, States, the poor, minorities, older Americans—all can lay claim to a portion of the Nation's resources. To be fair to all, we must make hard choices in every budget category.

The Budget Committee has also authorized me to offer an amendment revising the Third Budget Resolution for fiscal year 1977 to take into account the withdrawal of the $50 tax rebate proposal. I will offer this amendment reluctantly, since I believe that it is unwise to make repeated changes in the policies we adopt in our budget resolutions.

In this case, however, the revision is necessary. The rebate proposal has been abandoned by the President, and unless we recognize this fact by adjusting the spending ceiling and revenue floor in the Third Budget Resolution, there will be pressure to fill the vacuum left by the rebates with undesirable new tax initiatives which could commit substantial budget resources for years to come. New proposals, particularly those involving tax expenditures, should be evaluated carefully and deliberately. I believe that an amendment revising the Third Budget Resolution is necessary to insure proper consideration of measures which could have major impact on the budget and on our ability to act freely in future fiscal years.

Finally, as I said at the outset of my remarks, writing this First Budget Resolution has been a difficult task. It would have been much more difficult without the constant strong support and hard work of the members of the Budget Committee, many of whom are new to the process. As chairman of the committee, I acknowledge my debt to them and I commend them for their dedication. I owe a special debt to the ranking minority leader, Mr. LATTA. Although we frequently disagree on questions of policy, we are united in our commitment to make the budget process work.

Mr. Chairman, I urge adoption of the resolution and of the two committee amendments to be offered.

Mr. LATTA. Mr. Chairman, as we begin our deliberations on this First Concurrent Resolution on the 1978 Budget, I believe we can all take a measure of satisfaction that the new budget process has come as far as it has in just a few short years. Skeptics on all sides said it would never work; that the Congress and the special interest groups would not tolerate any meaningful intrusion into the "politics as usual" approach to spending the peoples' money. In short, those people said, the Congress was incapable of disciplining itself, and had permanently relinquished the power of the purse to the executive branch.

Well, these dour predictions have not yet come to pass, and if the minority has anything to do with it, they never will. This does not imply, however, that we are satisfied with the results this process has produced to date—we definitely are not. While the Budget Committee may have succeeded in trimming the extravagances out of the budget, it has all but failed to weed out the excesses. We have prevented the ship from sinking directly to the bottom of the sea, but it is still taking on water at an alarming rate. We must, therefore, take those hard, admittedly unpopular, actions needed to return our ship of state to an even keel and get it moving on a steady course ahead.

I would like to set the proper tone for the ensuing debate by suggesting that it should not degenerate into petty arguments about who cares the most about the unemployed, or who is more strongly in favor of the elderly, or who wants a strong national defense. Instead, let us accept the fact that each of us want peace, prosperity, and full employment as much as the next man or woman. Perhaps we can achieve this attitude if you will recall an observation made by Elliot Richardson back when he was Secretary of Health, Education, and Welfare. I believe his words are entirely appropriate to the difficult and important task we have before us today:

> Choice is the basic reality, and for us it is doubly difficult and saddening because whatever we have to give up is not something bad or trivial, but something that is only somewhat less important, if that, than what we have selected to do.

Like all of you, I know too well just how difficult many of these choices can be. And I have often been distressed that this House has taken the easy way out and made virtually no choices whatsoever. I would, therefore, call on all of my colleagues to take Mr. Richardson's words to heart, and join with the minority during the next 2 days and start to make these vital, but oft-postponed, decisions.

It was impossible for the minority members of the Committee on the Budget to support the First Concurrent Resolution on the 1978 budget as it was reported out, not because we felt a partisan urge to disagree or to be negative, but because we were convinced that, as proposed, the excessive spending contained therein is wrong for our country at this time. I would like to take this opportunity to explain how we came to this conclusion, and then describe what we, as the minority party, propose as an alternative course of action.

The Federal budget is a major feature of our national economic policy, and as such cannot be considered in a vacuum, unrelated to the needs and realities of our economy. We have before us a document which purports to be the "most appropriate" Federal response to the state of the economy. I cannot help but be skeptical of that presumption. Here we have proposed budget targets which would produce the largest budget deficit in all our 201 years as a nation—a budget which would provide for an increase in Federal spending of almost 20 percent over the current year, and a budget which, if adopted, would push the Federal debt over the $800 billion mark. In short, we have a proposal aimed at stimulating an economy at the bottom of a severe and prolonged recession.

But let us look at the economy. The economy bottomed out of the recent recession more than 20 months ago, and is currently experiencing a strong, expansionary period. By fiscal year 1978, we will be into our 3d full year of economic recovery. Look at the facts:

During the first quarter of this year real gross national product grew at a rate of 5.2 percent, and quite possibly would have approached 7 percent were it not for the vagaries of last winter's weather.

Consumer demand, as measured by the pace of retail sales of goods and services, has been strong for some time now, and increased at an annual rate of nearly 29 percent in March.

Consumer confidence in the future of the economy as measured by their willingness to make immediate purchases by installment credit, grew by over $2 billion in February, the second largest monthly increase ever.

Although unacceptably high inflation for the past 4 years caused many workers to lose their jobs, and forced many others into the job market to make ends meet, the economy was able to provide 2.6 million more people jobs during the past year, with over 500,000 of this jump coming in March alone. In short, the economy is biting into the inflation-enlarged labor surplus at a solid, sustainable rate.

In March, we got more good news from our Nation's homebuilders who reported that new housing starts reached an annual rate of more than 2.1 million homes and apartments. Especially gratifying was the strong showing of new single-family homes, indicating that the dream of millions of Americans to own their own homes was very much alive, and the market was responding to meet those dreams.

Let me summarize all of this: We now have an economy that is recovering at a better rate than projected by knowledgeable economists, and at a rate which exceeds that projected by the Budget Committee itself. And remember, we have accomplished all of this without one bit of the so-called "stimulus" package the President claimed was essential to keep us from sliding back into a recession. Now while no one can predict with certainty that the recovery will continue to grow at this rate, all the indicators save a few are in a "go" position, and absent

any evidence to the contrary, we have to operate on the assumption that the recovery is going to continue apace through 1978.

How, then, I ask you, can you even contemplate voting for a series of targets which would force upon our people an all-time high record budget deficit? How, in particular, can you consider voting for a resolution which will produce a deficit of its magnitude when the darkest cloud on the economic horizon is the accelerating rate of inflation? The deep and ingrained fear of a return to a double-digit inflation has taken its toll on the investors and business community in this country who are continuing to hold back on new capital spending plans. We keep talking about the woes of unemployment, yet we keep turning our backs on the one and only permanent solution to the unemployment problem: More and more investment in new and productive plants and equipment. And I will tell you this—there is no way you can expect a markedly improved climate for such investment if you insist on voting a record budget deficit in the face of improving business conditions and worsening inflation.

I was delighted to see that current estimates now project a deficit for 1977 of less than $49 billion—a result in part of Mr. Carter's belated abandonment of his $50 per person give-away scheme, but more the result of former President Ford's policies of restraint and moderation which enabled the economy to perform at a better than expected rate. Indeed, $49 billion of red ink is nothing to cheer about, but it is a vast improvement over the $70 billion the House was conceding only a few months ago.

Let me remind you as well that President Carter has promised repeatedly to balance the budget in fiscal year 1981. Make no mistake about it, we are on his side and will do everything possible to make him keep that pledge. But unless you are wearing rose-colored glasses with inch-thick lenses, you are deluding yourselves if you think you can approve spending and deficit targets as spelled out in the resolution before us and still reach a surplus position in 1981. Let me tell you, there is no way.

We must get that deficit trend line going down. Not in 1979 or 1980, but now, today. If we run a deficit of just less than $49 billion in 1977, then, given the strength of the recovery and signs that inflation is accelerating, we must, absolutely must, achieve an even lower figure next year. How, in good conscience, can any one of you justify a higher deficit—higher by nearly 50 percent—than we will have this year? How can you go back to your constituents and tell them you have just voted to increase the deficit to an all time record high at the very time the economy is charging forward? How can you tell the people of this country that you just voted to increase, dramatically, the risk that inflation will once again ravage our lives?

The minority Members of this Chamber will soon offer an amendment in the form of a substitute to this First Concurrent Resolution. It will provide for a budget deficit of just over $47 billion, $22 billion less than the deficit proposed by this resolution. We are starting that trend line down in anticipation of reaching a balanced budget in 1981. If this were not enough, we have provided the necessary revenues to give the American people an across-the-board tax reduction of 10 percent starting at the beginning of the next tax year—January 1, 1978. We project that this tax reduction will produce approximately 1 million plus new jobs, and the resulting savings in unemployment-related costs to the Government, as well as greater tax revenues from the increased business activity, will mean that we can accomplish this at a net cost of about $4 billion to the total budget.

I want to stress that last feature of our alternative. A tax cut for the people of this country is absolutely essential. A closer examination of Mr. Carter's plan to balance the budget, as well as the 5-year projections in the committee majority's report, show one thing which is indisputable: The only way either one can balance the budget in 1981 with their current spending plans is to increase taxes. Mind you, this is not speculation, it is in front of you in the figures the majority has provided. Let me repeat: The only way Mr. Carter can balance his budget is to raise taxes on the working men and women of this country. Compared with 1977, to raise the revenue needed to balance his budget, we have no alternative but to increase the effective tax burden of the American people, and you can check this yourself. Revenues as a percentage of GNP or as a percentage of personal income must rise, by as much as 20 percent in 3 years in order to raise this revenue. This is an inflation-induced tax increase that will be felt every bit as much by the working people of this country as an explicit tax increase created by Ways and Means and passed by the Congress.

The Republicans will simply not stand idle. We can and must balance the budget by 1981, but we cannot do this by increasing the tax rates. We can only reach this goal by assuring that our economic recovery continues, that capital investment in new, job-creating enterprises picks up, deficit spending is not allowed to worsen the inflation rate and, hardest but most important of all, we must moderate our appetite for spending. It will not be easy, but we on this side of the aisle have bitten the bullet and come up with a set of lean outlay targets which reflect our desire to help the most needy in this country while eliminating the waste and ineffective programs.

President Carter told us the economy was recovering so well the rebates were not needed. We are telling President Carter, that if that is so—and we fully believe the economy is in a strong recovery—then the stimulus plans for 1978 are even less necessary but potentially even more dangerous to the economy. Limiting the growth in Federal spending may require courage and risk political unpopularity in the short run, but there is no other way—I repeat, no other way—we can achieve a balanced budget with full employment by 1981.

We will put forward our alternative in the sincere desire to approach Federal fiscal policy in a bipartisan manner. I am confident that enough Members of the majority will agree with us that we cannot promise the American people a balanced budget on one hand, yet manage to balance it only by increasing their taxes. We must instead work to keep inflation-induced tax increases to a minimum, and concentrate on moderating run-away Federal spending. Our substitute resolution will do just that: Give us a balanced budget by 1981 without a tax increase, and indeed, a tax decrease. We think this is not only an infinitely sensible course to follow, but the only one which will keep our promise to our people that we will always act in their best interests.

Mr. GIAIMO. Mr. Chairman, I yield 3 minutes to the gentleman from Texas (Mr. BROOKS).

Mr. BROOKS. Mr. Chairman, perhaps nothing we do in Congress requires more patience and persistence than planning our own budget for the future and controlling our expenditures. I have said many times that if Congress is given the proper information, if it receives the detailed and penetrating analyses of costs involved in our program commitments, and if it is provided with an understanding of the interrelationship of its decisions to the economy, then it can make the right decisions. All of this, of course, requires self-discipline.

This first budget resolution has been constructed at a time of great economic uncertainty. We do not know whether the recovery that began a short time ago, following the worst recession since the 1930's, is capable of sustaining itself. We do not know whether or not a new wave of inflation, brought about by shortages of energy supplies, the drought in the Western States, and the recent severe winter, will be able to be checked. With these economic circumstances glaring us in the face, the Budget Committee had also to face the competing demands from a new administration in its honeymoon period, the priorities of our own congressional committees and its members, and the requests of a wide variety of special interests.

The Budget Committee has done a commendable job in bringing together and accommodating such diversity. Not everyone can agree with every part of this resolution, but its general thrust and direction are deserving of support.

Let me be specific. The committee's recommendation that we suspend new initiatives until the administration and the Congress have had an opportunity to assess the programs and organizational structure of the Federal Government is a wise one. It makes sense to me. The committee's decision to reorder some of the President's priorities is also meritorious in my view.

I want to single out Chairman GIAIMO for special recognition. Since he has been a member of the Budget Committee, and now its chairman, he has faithfully adhered to the principle of realism in budgeting in the most difficult 3-month

period in the history of the new budget process. It would be an easy chore for him and the members of his committee to accept the estimate of the Office of Management and Budget on such things as off shore oil receipts, impact aid, and numerous other items. My own personal analysis reveals to me that the deficit recommended in this resolution is higher only because our Budget Committee wants to bring the true facts to light.

I shall support this resolution not because it represents all things to all people, but because it is an exercise in prudence and restraint.

Mr. LATTA. Mr. Chairman, I yield 5 minutes to the gentlewoman from Maryland (Mrs. HOLT).

Mrs. HOLT. Mr. Chairman, today as we begin our debate on this first concurrent resolution on the budget for 1978, we plan to offer a substitute, as the gentleman from Ohio mentioned in his discussion. There will be amendments offered to try to restore the national defense function to the Carter level of the request.

I want to take this time just to sound a word of caution. President Carter's original request was $2.8 billion in budget authority below the figure recommended by President Ford as the minimum consistent with national security requirements. It is going to be argued that the recommendation of the Budget Committee should be adopted, since it represents a balanced response to overall national priorities that was arrived at by that committee only after a comprehensive analysis of the requirements of each of the functional components of the budget. I want to use this as an example, because I think there is a great danger here that we are going to destroy this budget process. I have great faith in it. I think this is the way to bring about some discipline to this body.

I feel that we should do everything in our power to preserve it. That is why I dare to take the floor to sound this word of warning.

In this national defense area, no analysis was ever conducted. The defense task force of the Budget Committee held only three formal meetings and was not asked to make any recommendations on the level of the defense budget either to the chairman or to the full committee.

The chairman recommended a level of $116 billion in budget authority for national defense. A narrow majority of the committee supported an additional reduction, but you will search in vain for any valid rationale for this action, because there is none.

The Budget Committee recommendation is totally inconsistent with the recommendations of congressional committees which bear the primary responsibility for national defense. Without exception, the House and Senate Appropriations and Armed Services Committees recommended increases, not decreases, in the defense budget after extensive hearings. The Senate Budget Committee also recommended an increase.

If a narrow majority of the Budget Committee, after only three hearings, is allowed to completely ignore the recommendations of responsible committees of Congress and establish an arbitrary budget level for national defense, unrelated to its legitimate requirements, then we will have made a mockery of the congressional budget process.

And if it can happen in this function, it can happen in others. I think this is a serious mistake, and it will destroy this process if we go into line items in reaching our levels of spending.

The Budget Committee recommendation eliminates all real growth in the defense budget at a time when Soviet forces are in the midst of an unprecedented buildup and the SALT negotiations are foundering.

The simple truth is that the proposed reductions in the defense budget have nothing to do with defense or defense requirements. They were manufactured, because the committee wanted to find $4 billion somewhere in the budget to offset program additions it wished to fund elsewhere.

So I urge the House to restore this category to what is actually required for national defense.

Mr. GIAIMO. Mr. Chairman, I yield 3 minutes to the gentleman from Virginia (Mr. FISHER).

Mr. FISHER. As a member of the Budget Committee, I wish to compliment the chairman and to support the committee proposal which I understand would enable the Appropriations Committee to appropriate funds for a Federal-local partnership in servicing the debt on Metro bonds.

Mr. Chairman, am I correct in stating that the committee proposal provides sufficient flexibility for the Appropriations Committee to make a direct appropriation to take care of this issue in fiscal year 1978?

Mr. GIAIMO. Yes, that is correct, so long as the total remains within the overall ceilings established by the budget resolution.

Mr. FISHER. I thank the chairman for this constructive approach to this important problem, and I look forward to corresponding action by the Appropriations Committee.

Mr. LATTA. Mr. Chairman, I yield 8 minutes to the gentleman from New York (Mr. CONABLE).

Mr. CONABLE. Mr. Chairman, I am grateful to those Members who are here in the Chamber for this general debate.

I wish that there were more interest in discussing the budget process as such, because it seems to me that we should review this process from time to time and should discuss the manner in which it is working, its shortcomings and its advantages, rather than simply concerning ourselves about those individual items of the budget that may have particular reference to our work here in the Congress. I suspect there will be considerably more interest in this process later today and tomorrow when we get into the line items.

The budget process has had strong support in the House, and with good reason. For some time we have ignored Presidential budgets, choosing to do whatever we wanted to do whenever we wanted to do it and resisting the discipline of fiscal policy. We have realized that the priorities implicit in a Presidential budget cannot be changed here in the Congress or even seriously questioned here in the Congress unless we ourselves have a similar process; hence hard-minded and yet idealistic legislators on both sides of the aisle have pushed for this budget process and have brought it to fruition. Whether it is working as intended should, I think, be the subject of constant review.

We have now a skilled staff—and let me say I think it is an excellent staff—we have a modus operandi, we have a couple years of experience, and in short we have the fiscal tools with which to make changes, if we are willing to use them. Because like any other process or any other mechanism the budget process is only a tool, the will to govern must direct it if it is to be an effective part of our total governmental effort.

It seems to me, Mr. Chairman, that we do not spend enough time in the consideration of overall fiscal policy. There is some feeling on the part of the Members of the House who are not on the Committee on the Budget that we should not interfere in even the basic decisions of that committee, and that if we do, we are somehow endangering the process itself. There is this tendency to look at it as something sacrosanct, not subject to question. Thus we have, I think, put too great a reliance on even the macroeconomic conclusions of the Committee on the Budget, without a great deal of earnest fiscal discussion at the outset of the budget year.

Fiscal policy is not an accounting process, nor is it the arithmetically arrived-at conclusion of a series of line-item microeconomic decisions. Fiscal policy is a very serious part of the responsibility of this Congress, and it should be set well in advance of the decision as to how we are going to cut the pattern to fit the cloth with respect to all those line-item decisions. We should set our fiscal goals with broad participation and after the most careful consideration. Presidents do this in their dealings with OMB; they give real discretion to the process and so should the Congress in its dealings with its Budget Committees.

Mr. Chairman, I do not want the Members to get me wrong. There is value in the process even if it does involve only formal acknowledgment of the unrelated items of spending and revenue. I admit that we do more than that, but I feel that in the committee we have a tendency to rush on to the line items and not to spend enough time in considering overall fiscal policy.

Once these line items of spending and revenue are committed to formal resolution, the budget process takes over and provides a discipline which is of value to the country in and of itself. We have to protect this discipline, as I see it, from

inevitable assaults from those who want to do what they want to do whenever they want to do it. There is a tendency, because the discipline imposes rigidity on the House, for Members to come forward and say, "We need more slack in the process, we need more flexibility."

I question this conclusion, because we have just passed, this spring, the largest supplemental appropriations bill in the history of this body. There was a time where many thought the Budget Reform Act would end supplemental appropriations.

Most of us felt that some supplemental appropriations were justified, because a new President should have the chance to do his thing.

Mr. Chairman, we are today and tomorrow, in effect, passing a fourth budget resolution with respect to fiscal 1977 and presumably the number of budget resolutions can stretch on indefinitely, so no one can claim that there is no flexibility in the process. Yet, there are increasing numbers of people coming forward and saying that we need more unallocated "cushions" to protect us from the rigidities of a discipline which I think it is strange to call inflexible under these circumstances.

We need to look also regularly—I hope we will do this—at the law with respect to the budget reform process. For instance, in the House we have put a 4-year limit on service of members of the Committee on the Budget. That was done, of course, to avoid the creation of a new power elite. I understand the rationale, given the concerns of the Congress at the time this process was set up, to the effect that this was going to become a supercommittee with superpowers; and therefore, it was necessary to rotate the membership.

It is my impression, however, that most of the members of the Committee on the Budget, with the exception of the chairman and some of the very senior members, look at it as a secondary assignment and that it does not acquire the importance in the congressional lives of its members that was hoped when the Committee on the Budget was set up. Necessary continuity may encourage more investment in the process by the members.

Mr. Chairman, I think we should consider whether a 4-year term is long enough, given the importance of the other committees on which the Members serve, to attract a primary commitment. Certainly if the will to govern is to actuate the process, the Members must take it seriously and must have sufficient continuity so that they will be willing to make the investment of time and effort to make this a first-line committee.

I support the process, and have made these suggestions only in a spirit of review. That I do not like the fruits of the process, and intend to oppose a deficit of the size recommended by the majority should not be interpreted as lack of respect for the process or the Members who inspired it.

Mr. GIAIMO. Mr. Chairman, I yield 5 minutes to the gentleman from California (Mr. LEGGETT).

Mr. LEGGETT. Mr. Chairman, first, I would like to establish my qualifications. I favor a balanced budget by 1981. I support reorientation of national priorities, and I want to compliment the chairman of the committee for an outstanding job. In developing these numbers democratically through a synthesis process, we have arrived at targets that I think are fully reliable and justifiable.

Mr. Chairman, I rise in support of the resolution and in support of the budget priorities contained therein. In supporting this resolution I fully recognize that it is not perfect and that there are opportunities for improvements in many areas. For example, I am convinced we must eventually design more imaginative tax incentive programs to attack the problems of unemployment and I believe that Congress must be prepared to provide leadership in formulating concepts for wage and price policies so that the accelerating economic upturn does not turn into real growth for only a select few and inflation for everybody else.

These macroeconomic concerns aside, I believe the Budget Committee has provided a resolution which attempts to adequately provide for national priorities while recognizing that certain fiscal constraints must be accepted if we are to achieve our goal of a balanced budget and continued economic growth over the near term.

Operating within these constraints we are recommending funding for the national defense function of $116.0 billion in budget authority and $109.6 billion in outlays. Mr. Chairman these totals, while representing a small reduction from President Carter's revised request will still provide for continued real growth in defense programs. As you know, during the Vietnam war, the Defense Department operated on a consumption budget with only minor amounts provided for modernization. In fiscal years 1976 and 1977, Congress provided for substantial real growth for national defense. With this resolution, the trend will be continued, though at a somewhat more modest pace. The resolution assumes some continued real growth for defense programs but it also recognizes that there are substantial savings that can be realized through a critical review of the current financial situation in the Department of Defense.

For example it is clear from the rapid growth in unobligated and unexpended balances, that the Department of Defense has been unable to execute its budget as planned. While some increases in such balances had been anticipated along with the increased appropriations being made available, it is now clear that these balances have increased even faster than DOD had anticipated.

Since 1972 unobligated balances have increased from $11.0 billion to an estimated $18.0 billion by the end of fiscal year 1978 and unexpended balances have increased from $37.5 billion in fiscal year 1972 to an estimated $72.2 billion by the end of fiscal year 1978. This growth is phenomenal and indicates a tremendous backlog in the Department of Defense. Another indicator of excess funding in the DOD is reflected in the amount of money which has been returned to the Treasury without being used over the last 3 years. In fiscal year 1974, $247 million was returned. In fiscal year 1975 it was $521 million and in fiscal year 1976 it was $1.267 million. This totals $2.0 billion of unused money in a 3-year period. The resolution assumes that there are still excess funds available in current DOD accounts, which could be used to offset new requirements in fiscal year 1978 over dollar above reprograming.

The resolution also assumes that a too rapid growth in modernization, while providing increased inventories of sophisticated weaponry, can be counterproductive if it results in reduced readiness. Such a situation can occur, and there is evidence that such is already beginning to happen, when funding for training and maintenance for new equipment is not phased so as to keep pace with the new inventory input. Consequently, we believe it would be prudent, in this transition budget, to slow down the rate of increase in purchases until the new administration has had sufficient opportunity to devise programs which strike the best balance of funding for both readiness and modernization.

Another major assumption in the resolution deals with personnel and compensation. In recent years a multitude of studies have been made in this area which constitutes 52 percent of the budget. All of these studies indicate that significant improvement can be made in this area. Little has been done to improve manpower utilization and policies. The resolution assumes a modest reduction of 1½ percent in the funding provided for this purpose. We think it can be accomplished.

Mr. Chairman, this resolution also makes some other assumptions about possible savings in the national defense function. I do not intend to discuss them individually at this time. They are all spelled out in detail in the report which has already been made available. However, I do wish to make it clear that none of the budget savings we are assuming in the national defense area would affect the muscle of our military forces. What we are saying is that the DOD is not using all of the money that was appropriated in the last 2 years; that it would be prudent to encourage the new administration to take a careful look at the relationship of readiness to modernization before it commits itself and the Congress to long range spending plans for weapons systems and other purchase which may, upon reflection, prove excessive to current requirements.

Mr. Chairman, let me stress again that the fiscal year 1978 defense budget must be regarded as a transition budget and that in its deliberations on this resolution the Budget Committee took into consideration the fact that the new administration is currently reviewing basic assumptions regarding strategic planning,

force structure, and military deployments which will undoubtedly affect future defense budgets.

I believe that this resolution provides the proper level of funding for national defense for this transition period and urge your support.

Mr. LATTA. Mr. Chairman, I yield 2 minutes to the gentleman from Virginia (Mr. TRIBLE).

Mr. TRIBLE. Mr. Chairman, I rise in opposition to the fiscal year 1978 budget resolution now being considered by the House. The budget resolution provides for outlays of $462.3 billion, revenues of only $398.1 billion, and a deficit of $64.2 billion.

Mr. Chairman, I should like to relate a bit of history. In 1971 the Federal budget exceeded for the first time $200 billion. In fiscal year 1976 the Federal budget topped for the first time $400 billion. This year the Federal budget will be $462.2 billion pursuant to this authorization.

In the course of these few short years, the size of the Federal budget has increased more than 100 percent, but during those same years few Americans could argue that the quality of service rendered by our Government has increased. This Nation simply cannot continue to spend more money than it receives in revenues. The continued implementation of such policy will bring only continued inflation, higher taxes, and the threat of economic ruin.

We need a Congress with the courage to say no to irresponsible fiscal policies and wasteful Federal spending. I am not afraid to say no, and I urge my colleagues to say no today.

Mr. GIAIMO. Mr. Chairman, I yield 10 minutes to the gentleman from Maryland (Mr. MITCHELL).

Mr. MITCHELL of Maryland. Mr. Chairman, I have had the privilege of serving on the Budget Committee since its inception. I would certainly be remiss and derelict if I did not take this time to praise the chairman and the members of the committee for the very hard work that they have done on both the majority side and the minority side. I wanted to get on the Budget Committee—I was anxious to serve on it—primarily because I wanted to see to it, if I could, that the Budget Committee lived up to its declaration of purpose.

As stated in Public Law 93-344, section 24, the Congress declares that it is essential to establish national budget priorities. After having praised the chairman and the members of the Budget Committee, it is with regret that I must indicate that we have no established priorities for this country. Because we have not, I am prepared to offer two substitute amendments which have been printed in the RECORD. I think every Member of the House has received a copy of those amendments which are known as the transfer amendments.

I shall first offer an amendment in the form of a substitute to the first concurrent budget resolution which will transfer budget authority and outlays from the military function into employment and economic development.

One objective in offering this amendment is to establish that the potential threats to the national security of America—and, indeed, they are potential—are balanced off by the potentital threat of 7 million known people unemployed in this country, and another 5 million that we do not even count as being unemployed. The potential threat is 12 million Americans unemployed without any prospect of employment and caught up in a feeling of hopelessness and alienation.

I wish the Members could have been in the committee when certain things occurred. I remember on one day we had to break the normal process of the Budget Committee and go in for a waiver really under an emergency basis. We had to do that because we needed to put more money into the unemployment compensation category.

Mr. Chairman, is it not ironic and ridiculous that at the same time we were putting more money into unemployment compensation, the Budget Committee did not act in a purposeful and powerful fashion to create more jobs?

I think it is ironic and rather tragic that this Budget Committee has produced a first budget resolution which does not establish priorities. We are concerned about Government spending on both the minority side and on the majority side. Yet when it comes down to the real matter of curbing Government spending, there is an unwillingness to act. I cite by way of illustration the fact that for each 1 percent of unemployment we have, it costs us something like $14 billion a year to sustain that 1-percent unemployment. Those are the figures and data which have been provided by economists of all persuasions. Yet we will not come to grips with unemployment. We will not establish priorities.

Members have read my amendments and I know those amendments are in for a tough time, but the right thing is always tough to do. One of my colleagues said some time ago, and I am not speaking to the merit or lack of merit of his statement, but I will repeat to the Members what he said: "Generally the people of the country, the citizens of America are way out in front of the Congress and the Congress is always playing catch up with the citizens."

With that statement in mind, let me indicate what the response of the people has been in terms of my transfer amendments.

We have received correspondence from citizens in 25 of the States. Citizens in half of the States have written in support of my amendments: Arizona, California, Colorado, Delaware, District of Columbia, Florida, Georgia, Illinois, Indiana, Louisiana, Marvland, Michigan, Nebraska, New Jersey, New Mexico, New York, Ohio, Pennsylvania, Virginia, Washington, and Wisconsin. The Members have seen their letters. We have seen their letters urging that we establish some new priorities and that the way to do it is to support either of the two amendments which I shall offer here today or tomorrow in this House.

The next logical question would be: What kinds of people are these who are writing to support a transfer amendment? Are they true blue, good Americans, or are they a part of some lunatic fringe? I think we can give an answer to that. Let me just share some of the correspondence.

Mr. Chairman, I ask unanimous consent that this correspondence go into the RECORD at this point.

The CHAIRMAN. The Chair will advise the gentleman that permission will have to be secured when we go back into the House.

Mr. MITCHELL of Maryland. I appreciate the Chairman's statement.

Mr. Chairman, the first communication is the statement of the Governor and Lieutenant Governor of the State of Massachusetts, Governor Dukakis and the Honorable Thomas P. O'Neill III, supporting the Mitchell transfer amendments.

Who are the people who support this? The United Mine Workers of America.

Who are the people who support it? The United Conference of Mayors are on record urging that we prioritize in terms of human need, not in terms of wasteful military spending.

Also we have neard from the National Farmers Union, the Department of Health from the State of Masachusetts, and I could go on an on. Good, solid, sensible, concerned Americans who recognize that this whole process, the budget process, in this House is doomed until we address the matter of really establishing priorities.

The effect of my amendments will be this. The first one will be to transfer $12.9 billion in budget authority and $4 billion in outlays from the military function. That seems like an enormous sum of money; does it not? But if we think that is an enormous sum of money, we should just ask ourselves this: What about the $15 billion shortfall in military spending last year, and based on all reports coming out of the Department of Defense there will occur another enormous shortfall.

While we bloat that budget, we met only the needs of 15 percent of the children in the Head Start program. While we bloat that budget, we do not even begin to meet the needs of employment in this country. While we continue to pile up unobligated funds for the military endlessly, ad nauseam, we are providing for the senior citizens in this country only approximately one-third of the moneys required to meet their needs. Of course, it is unpopular. Of course, it is unpopular to talk about the military budget and any reduction thereof, simply because in the last 6 months we have gone through the resurgence and revival of the old cold war attitudes, with all the antiquated thinking that is associated with these cold war attitudes.

"Bloated military budgets create jobs," and that is utter arrant nonsense. The Soviets are about to land tomorrow; that is utter, arrant nonsense.

The CHAIRMAN. The time of the gentleman from Maryland has expired.

Mr. GIAIMO. Mr. Chairman, I yield 3 additional minutes to the gentleman from Maryland.

Mr. MITCHELL of Maryland. Mr. Chairman, while we continue to bloat the military budget, we continue to deny what I think is the most important function of Government. I do not want to seem sophomoric, but it says in a document that we cherish very much that the people are entitled to life, liberty, and the pursuit of happiness. But they cannot pursue happiness if they live out their lives under grinding, searing poverty. They cannot really have full liberty unless they are employed.

What we do in terms of our nonprioritizing for human needs is to make a mockery out of some words in that document.

My colleagues, I am keenly aware of the fact that few if any of you, on this floor are really listening to me. I am fully aware of the fact that few, if any, Members who are not on the floor will have read and read carefully what I am trying to talk about. I am fully aware that some of you consider what I am saying is frivolous but let me warn this House what our concerns are and why I am deadly and sincerely serious. Despite all the propaganda about the increased Soviet threat, I do not believe this democracy will ever be destroyed because of the Union of Soviet Socialist Republics. Despite all the propaganda that has been put out about the possibility somewhere down the line of a threat from the People's Republic of China, I do not believe that this democracy is going to be destroyed by the People's Republic of China.

I think our present defensive posture is strong enough to meet security needs for the next 20, 30, or 40 years. Mark my words well, if this democracy is ever destroyed it is going to be because we have not met the needs of the people, because we permit a gap to develop between the haves and have-nots. If it is ever to be destroyed, it will be because those who need the support of the Government in terms of survival programs were sacrificed on the altar of a bloated military budget.

Mr. Chairman, I hope one word, one phrase I have used, might strike a chord. I hope this House will support my amendments when the time comes.

Mr. LATTA. Mr. Chairman, I yield 5 minutes to the gentleman from California (Mr. ROUSSELOT).

Mr. ROUSSELOT. Mr. Chairman, I will not attempt at this time to discuss all aspects of this Concurrent Resolution 195 now before us. I will participate in the amendment process when that time arrives.

The minority views to the report of the first resolution on the budget for 1978 represent in large part my position on this legislation. They adequately cover the two primary items which the majority proposal desperately lacks: Permanent tax rate reductions and restraints in increased spending. By ignoring these essential elements, and embracing more deficits and bigger Government spending programs, the first budget resolution for 1978 which has been proposed by the majority will do more harm than good for the economy.

There is, however, one concept which deserves special attention. Mention was made in several instances in the minority views of "restraining increases" in spending, rather than "making cuts" in spending. In my view there is an important distinction in these two expressions which should be emphasized. Often times when suggestions are made to amend spending downward from the majority-recommended levels for a new fiscal year, the complaint is heard that we are "cutting the budget", or perhaps "meat-axing" a particular program. This is not true. As long as amended expenditure figures will leave outlays at, or above, present fiscal year spending levels, it cannot be alleged that "cuts" are being made—only restraints in increases.

Noted economists have observed that spending for fiscal year 1977 will likely fall below the current estimated level of $417 billion and be close to $408 billion. This would then mean that any outlays over $408 billion will amount to new spending and constitute an increase over present levels. The majority has recommended an increase in the 1977 budget over $54.3 billion to $462.3 billion, with a corresponding deficit of $64.3 billion. An amendment to reduce the majority recommendation would not, then be a reduction in spending, but simply a restraint in increases over 1977 expenditure levels. Without cutting the budget at all, then, and simply holding the line at present levels, the deficit could be drastically reduced and the commonly expressed goal of a balanced budget could be brought substantially closer.

I will present, after our minority substitute has been offered, my annual balanced budget concept, because I think it is more pertinent than ever. With this substitute resolution, I will present some permanent tax cut concepts which would include, just as the minority resolution does, permanent tax cuts for all of the roughly 210,000 working people in each congressional district in this country. That is the average number of working people in each one of our congressional districts—210,000. I think we should start talking about ways to allow them to participate in the economic stimulus if there is to be one, instead of shipping all the money back here to Washington and then redistributing only 50 percent.

So, once again at the appropriate time, I will provide an opportunity for Members to vote a balanced budget concept. It will be possible for Members to go on record for putting a stop to add-on deficit financing, and show their constituents that the House should not let the Federal Government go the way of New York City and Great Britain.

Mr. Speaker, let me now present the House with my substitute resolution:

H. CON. RES. 208

Resolved by the House of Representatives (the Senate concurring), That the Congress hereby determines and declares, pursuant to section 301(a) of the Congressional Budget Act of 1974, that for the fiscal year beginning on October 1, 1977—

(1) the recommended level of Federal revenues is $409,000,000,000, and the amount by which the aggregate level of Federal revenues should be decreased is $13,884,000,000;

(2) the appropriate level of total new budget authority is $453,500,000,000;

(3) the appropriate level of total budget outlays is $409,000,000,000;

(4) the amount of the deficit in the budget which is appropriate in the light of economic conditions and all other relevant factors is $0; and

(5) the appropriate level of the public debt is $717,332,000,000, and the amount by which the statutory limit on such debt should accordingly be increased is $17,332,000,000.

SEC. 2. Based on allocations of the appropriate level of total new budget authority and of total budget outlays as set forth in paragraphs (2) and (3) of the first section of this resolution, the Congress hereby determines and declares pursuant to section 301(a)(2) of the Congressional Budget Act of 1974 that, for the fiscal year beginning on October 1, 1977, the appropriate level of new budget authority and the estimated budget outlays for each major functional category are as follows:

(1) National Defense (050):

(A) New budget authority, $120,136,000,000;

(B) Outlays, $112,800,000,000.

(2 International Affairs (150):

(A) New budget authority, $7,000,000,000;

(B) Outlays, $4,000,000,000.

(3) General Science, Space, and Technology (250):

(A) New budget authority, $4,700,000,000;

(B) Outlays, $4,400,000,000.

(4) Natural Resources, Environment, and Energy (300):

(A) New budget authority, $20,500,000,000;

(B) Outlays, $17,000,000,000.

(5) Agriculture (350):

(A) New budget authority, $2,729,000,000;

(B) Outlays, $2,333,000,000.

(6) Commerce and Transportation (400):

(A) New budget authority, $18,600,000,000;

(B) Outlays, $16,000,000,000.

(7) Community and Regional Development (450):

(A) New budget authority, $6,413,000,000;

(B) Outlays, $7,208,000,000.

(8) Education, Training, Employment, and Social Services (500):

(A) New budget authority, $17,922,000,000;

(B) Outlays, $19,359,000,000.

(9) Health (550):

(A) New budget authority, $41,000,000,000;

(B) Outlays, $39,100,000,000.

(10) Income Security (600):

(A) New budget authority, $160,500,000,000;

(B) Outlays, $134,000,000,000.

(11) Veterans Benefits and Services (700):

(A) New budget authority, $18,200,000,000;

(B) Outlays, $18,200,000,000.

(12) Law Enforcement and Justice (750):

(A) New budget authority, $3,200,000,000;

(B) Outlays, $3,100,000,000.

(13) General Government (800):

(A) New budget authority, $3,100,000,000;

(B) Outlays, $3,000,000,000.

(14) Revenue Sharing and General Purpose Fiscal Assistance (850):

(A) New budget authority, $8,000,000,000;

(B) Outlays, $7,000,000,000.

(15) Interest (900):

(A) New buget authority, $37,000,000,000;
(B) Outlays, $37,000,000,000.
(16) Allowances:
(A) New budget authority, $500,000,000;
(B) Outlays, $500,000,000.
(17) Undistributed Offsetting Receipts (950):
(A) New budget authority, —$16,000,000,000;
(B) Outlays, —$16,000,000,000.

SEC. 3. In the third budget resolution for fiscal year 1977, the Congress provided for revenue and spending proposals designed to stimulate the Nation's economy in order to reduce unemployment. These proposals, together with recent indications of more vigorous economic growth in the private sector, provide evidence that the Nation's economy may be returning to the levels needed to provide jobs to millions of our unemployed.

The Congress recognizes, however, that unusual uncertainties surround the current economic outlook for 1977 and 1978—primarily, the economic impact of the stimulus proposals and the likelihood of continued economic growth in the private sector—and that additional time and information are needed to make final determinations with respect to fiscal policy for fiscal year 1978; and declares that, if economic recovery does not proceed satisfactorily during the months immediately following adoption of the first budget resolution for fiscal year 1978, it will be necessary to provide additional stimulus to the economy in appropriate amounts to be determined in the second budget resolution for fiscal year 1978. On the other hand, if the recovery continues to show signs of long-term renewed growth, it may be desirable to reduce some of the economic stimulus provided for fiscal year 1978 in order to make more rapid progress toward a balanced budget.

Let me now review comparative figures:

[In millions of dollars]

	Fiscal year 1977, 3d budget resolution	Ford budget	President Carter's request	Chairman's recommendations	Rousselot balanced budget substitute
Revenues	347,700	393,000	401,624	398,094	409,000
Budget authority	472,900	439,967	507,254	500,764	453,500
Outlays	417,450	440,000	459,373	462,349	409,000
Deficit	69,750	47,000	57,749	64,255	0
Debt subject to limit	718,400	NA	794,655	801,100	

The CHAIRMAN. The time of the gentleman from California has expired.

Mr. LATTA. Mr. Chairman, I yield 2 additional minutes to the gentleman from California.

Mr. ROUSSELOT. I thank my ranking member (Mr. LATTA), for yielding further. Instead of shipping all the money back here to go through all this vast bureaucracy that we have, I think we ought to say to every one of the 89 million working people in this country, "We will reduce your tax liability by, say, 10 percent of what you are now paying into the Federal coffers, and you make the decision as to whether to save that money, buy a new car, buy a new house, do whatever it is you want to do. You make the decision as to where to spend that money."

There is another point I would like to make. I am fascinated, and I hope my colleagues will read all the additional views, the minority views, the supplemental views, of all of my colleagues on the committee. I was fascinated by the comments, on page 159, of my distinguished colleague, the gentleman from California (Mr. MINETA), who said, in point 2 of his comments:

A significant effort should be made to hold down spending and to avoid any commitments that might impinge on fiscal year 1979 initiatives.

And then my distinguished colleague, the gentleman from California (Mr. MINETA), goes on to say:

If there was ever a time that required fiscal restraint, that time is now.

I agree with him. But we do not do that in this resolution. There is no real fiscal restraint. We are adding on billions of dollars to what was spent last year.

So I hope that some time, some place we will really do what we say in these views and really put restraints on increases and expenditures. In my judgment, we are not doing it in this resolution, and that is why I feel constrained to offer a substitute balanced budget resolution, which I will do at the appropriate moment.

The CHAIRMAN. The time of the gentleman from California (Mr. ROUSSELOT) has expired.

Mr. LATTA. Mr. Chairman, I yield 1 additional minute to the gentleman from California (Mr. ROUSSELOT).

Mr. SYMMS. Mr. Chairman, will the gentleman yield?

Mr. ROUSSELOT. I yield to my colleague, the gentleman from Idaho (Mr. SYMMS).

Mr. SYMMS. I thank the gentleman for yielding.

Mr. Chairman, I would like to compliment the gentleman from California (Mr. ROUSSELOT) for his remarks, and I would like to ask him if he intends again to offer the nationally renowned Rousselot amendment for a balanced budget.

Mr. ROUSSELOT. Yes, I will say to my colleague that at the appropriate time I will offer the so-called Rousselot balanced budget resolution.

We have had substantial so-called shortfalls in expenditures, which to the gentleman and to myself means savings that have actually occurred. This administration has admitted, the Blumenthal-Lance-Shultze triumvirate has admitted that they have not even been able to spend the money as fast as this Congress has appropriated it. So they are saving money on the expenditure side, which is a new experience for Government.

Mr. SYMMS. I thank the gentleman

Mr. Chairman, I would just like to urge the Members to support the gentleman's amendment so that they can in fact give the people what the President promised them, a balanced budget.

Mr. GIAIMO. Mr. Chairman, I yield 10 minutes to the gentleman from Missouri (Mr. ICHORD).

Mr. ICHORD. Mr. Chairman, I thank my good friend and distinguished Member of this body from the great State of Connecticut (Mr. GIAIMO) for yielding to me this time.

Mr. Chairman, we in the Committee on Armed Services have just finished an intense 4 months reviewing the fiscal year 1978 budget submission, culminating in the passage yesterday of the military procurement bill. The military construction bill is yet to come before this body.

Since this is a Presidential transition year, we reviewed the original budget submission of the outgoing administration, that is, the Ford administration, which was received on January 17, 1977, and the amended budget submission of the new administration, the Carter administration, which was received on February 22, 1977. Because of these separate submissions and because of the organizational problems attendant to any transition government, the committee was required to accelerate much of its work and at the same time carefully evaluate the entire defense budget in order to vote upon and submit to the House realistic budget recommendations by March 17, 1977, as well as prepare the annual military authorization for appropriation which, as I stated previously, the House just completed yesterday.

Such a process becomes increasingly important since it has become clear, as reported by the Committee on the Budget, that it does not and apparently cannot consider individual line items in formulating the annual budget resolution. Apparently again the best it can do is to concentrate on broad trend areas in making its findings. The Committee on the Budget in its recent report stated clearly that—

Specific items to be funded will be determined by the authorization and appropriation committees.

Mr. Chairman, the Committee on Armed Services produced 6 volumes of testimony covering some 6,200 pages as a result of holding the detailed budget and authorization hearings covering defense posture, procurement, personnel, ship construction, research and development—which subcommittee I happen to chair—and civil defense. In compiling that information during the period between January and April, 1977, the full committee met 28 times, and the appropriate subcommittees held 72 meetings.

In preparing the report to the Committee on the Budget, the Committee on Armed Services produced a 36-page committee print covering every line item in the defense budget submission, and every line item in both the January and February Presidential budget requests was reviewed. In submitting its March 15 report, the Committee on Armed Services recommended new budget authority of $120.9 billion.

Despite our exhaustive review on almost a case-by-case basis, the recommendation of the Committee on the Budget would slash that figure, I understand, to $115.9 billion, approximately $116 billion, admittedly with but few hearings, with no consideration of line items. and with emphasis on what was described as a concentration on trends only.

The recommendation of the Committee on Armed Services was $802.7 million above the Presidential request and $1.9 billion below the initial budget request—that is the Ford budget—submitted on January 17, 1977.

Yesterday, Mr. Chairman, by a vote of 347 to 43 the House accepted overwhelmingly our committee's fiscal year 1978 authorization bill which would authorize $35.9 billion to be appropriated for our national defense. In essence, that bill is the President's bill, for it is only $60.8 million above the President's request and it is $2.5 billion below the initial Ford submission. Obviously by its vote the House concurred that the bill represents a fair and considered judgment of our current defense requirements which we face in the 1980's. In considering that bill the Committee on Armed Services produced a second committee print covering 30 pages which scrutinizes in minute detail the authorization line items contained in both the January and February requests.

Literally, Mr. Chairman, there was no stone left unturned in our efforts to come up with a realistic submission which squarely faced national security requirements.

I might say, Mr. Chairman, that among the concerns about which I am troubled, deeply troubled, is this one: I would state to the gentleman from California that the Committee on the Budget failed to approve over one-half billion dollars in inflation estimates that were originally included as a result of the initiative of the Committee on Armed Services in insisting that budget submissions reflect reasonably foreseeable increases in the cost of labor, material, and other goods and services. That provision was included in our authorization bill for fiscal year 1977, and it seems to me that it reflects clearly the intent of Congress to recognize the realities of inflation in passing on defense budget requests.

Mr. Chairman, the principal point I wish to make is to urge my colleagues to support the budget of President Carter, which is in the amount of $120.1 billion. I recognize the agonizing that must go into resolving the almost $5 billion difference that exists between the recommendations of the Committee on the Budget and those of the House Committee on Armed Services; but, as I stated previously and I want to reemphasize, the Committee on Armed Services has never worked with more detail and with more diligence in arriving at its recommendations. We feel very strongly that our recommended figure of $120.9 billion is a figure that can reasonably be approved if we are to maintain a respectable defense posture, and particularly if we hope to continue talks with the Russians and have the necessary tools and resolve to arrive at a new SALT agreement.

At the very least, I state to the members of the committee, we should adopt the budget of our new Commander in Chief, President Carter, in the amount of $120.1 billion.

Mr. Chairman, this is a critical time for the United States. In arriving at approved defense funding, we must make it clear that we have the strength, will, and determination to maintain an adequate defense posture, both now and down the road. At the same time, we must make it perfectly clear that with mutual cooperation among nations, we can arrive at understandings on disarmament.

In our negotiations with the Soviet Union, I state to the members of the committee, we should not even hint at unilateral actions or the possibility that we might be dealing from a weaker hand at some time in the future.

I would further state to the members of the committee who so strongly supported the amendment offered by my good friend, the gentleman from Maine, yesterday, that we cannot support the $116 billion as recommended by the Committee on the Budget and expect that our bases will not be closed. We cannot have our cake and eat it, too.

I state also to the members of the committee who so overwhelmingly adopted the motion increasing the number of civil servants that the military has, that we cannot expect any such add-on to remain in the budget with only $116 billion.

The CHAIRMAN. The time of the gentleman from Missouri (Mr. ICHORD) has expired.

Mr. LEGGETT. Mr. Chairman, I yield 1 additional minute to the gentleman from Missouri.

Mr. ICHORD. Accordingly, Mr. Chairman, I urge the adoption of the amendment restoring the President's budget figure of $120.1 billion, which I understand will be offered by the distinguished gentleman from Texas (Mr. BURLESON).

Mr. DOWNEY. Mr. Chairman, will the gentleman yield?

Mr. ICHORD. I yield to the gentleman from New York.

Mr. DOWNEY. Mr. Chairman, my good friend, the gentleman from Missouri (Mr. ICHORD), has suggested in a somewhat circumspect manner that what we spend our money on somehow gives us a stronger defense.

The gentleman certainly is aware that, for instance, we could double the salary of the persons in our uniformed services and that would not make us a stronger country.

Mr. ICHORD. Mr. Chairman, if there is a question propounded by the gentleman from New York (Mr. DOWNEY), the gentleman well knows that I supported very strongly the amendment of the gentleman from Wisconsin (Mr. ASPIN) to reduce retirement costs in the future for the military, which started out in 1954 at a cost of $1.4 billion, running, as the gentleman from New York (Mr. PIKE) very well knows now, at the present time, in the amount of $9.4 billion, and projected out to the year 2000 when it is going to cost $24 billion.

We cannot spend that kind of money and expect to buy the necessary hardware to defend the United States of America. Therefore, I agree with the gentleman.

What is the question of the gentleman from New York?

Mr. DOWNEY. If the gentleman will yield further, it seems that the gentleman is somehow suggesting that $116 billion spent on the defense function is not going to keep our country safe, strong, and free.

Does the gentleman agree with that?

Mr. ICHORD. With all due respect to the gentleman from New York, if I may answer the gentleman's question, the gentleman is a very learned member of the House Committee on Armed Services and is a member of my subcommittee on R. & D. and makes a tremendous contribution to that committee.

Mr. DOWNEY. I thank the gentleman from Missouri.

Mr. ICHORD. But I believe the gentleman had better study what the Committee on the Budget has done. There are a lot of what I consider to be very unreasonable expectations in arriving at this $116 billion.

For example, they are making an unrealistic cut in foreign military sales, in addition to the $500 million that I mentioned in inflation. The gentleman knows we cannot continue as we are with our fiscal policy that we are pursuing and expect not to have rampaging inflation which will reduce the amount of hardware we can buy. I agree with the gentleman from New York.

The CHAIRMAN. The time of the gentleman has again expired.

Mr. LATTA. Mr. Chairman, I yield 10 minutes to the gentleman from Ohio (Mr. REGULA).

Mr. REGULA. Mr. Chairman, as a new member of the Committee on the Budget, I would like to offer a few observations as we discuss this first budget resolution.

First of all, Mr. Chairman, I would like to compliment the chairman of the committee, the gentleman from Connecticut, for the evenhanded manner in which he conducts the committee. My experience over many weeks of hearings has been that the gentleman is extremely fair, giving every viewpoint an opportunity to be heard. I, as one member of this committee, appreciate that very much.

Second, Mr. Chairman, I would observe that the committee is very fiscally prudent, because each of us has to pay for his or her share of the coffee.

Speaking now to the issues, Mr. Chair-

man, I think perhaps we are making one mistake in the budget process. That is, we tend to do as we have done prior to the institution of this committee; namely, determine what the components of the Federal budget will be, add them up, and produce a total. We established the Committee on the Budget in order to avoid that very process.

When I am back home speaking in the district I often show my audience my voting card and I say:

This is the world's greatest credit card. Vote now and pay later.

The resolution we are discussing today is a perfect example of our proposal to do that in fiscal 1978: "Vote now and pay later."

I think it is important that we approach the budget process on the basis of what is good fiscal management, and then work backwards in determining the priorities within those totals.

First, I do not think we put enough emphasis on the long-term impact and objectives of the budget priorities in the resolution. If the budget process is to work, we must do this as we develop the budget components each year.

If we hope to achieve a balanced budget for fiscal 1981, to which President Carter is dedicated it must be predicated on decisions made in this and subsequent budget resolutions. I find very little evidence of any effort in this first budget resolution to achieve the goal of a balanced budget in 1981. In fact, adding our totals to what the President proposed goes in the opposite direction. If anything, we are headed toward larger deficits.

Second, we hear much about the process called zero-based budgeting. As I sit as a member of this committee, I find very little, if any, emphasis on the technique of zero-based budgeting. In fact, it is quite the contrary. It is a matter of how much we can add, and not an examination on a critical basis of existing programs.

Third, I find no emphasis on improving the delivery system or on the management of the world's largest business. Government is a business. We take money from the taxpayers and in return we deliver services; be it for defense, be it for education, be it for any number of things. If we are to manage this Nation well, if we are to give taxpayers value received for their dollars, it is important that we place more emphasis in the budget process on the delivery system. How can we improve the quality of the service we deliver for the dollars we take from the taxpayer?

Fourth, another area I find deficient in this budget resolution is that it places greater and greater emphasis on the public sector. This is contrary to the fundamental principles of this Nation. I think we should be emphasizing the encouragement of the private sector as opposed to the public sector. Yet as we look at this budget and what it means in terms of a percentage of the gross national product of this Nation, we see a growing emphasis on putting our assets in the public sector as opposed to the private sector.

I find it rather strange that in a period of economic recovery and growth we are proposing a budget deficit in fiscal year 1977 that represents 3.6 percent of this Nation's gross national product; and in fiscal year 1978 a deficit that will be estimated to be 3 percent of this Nation's gross national product. This compares to a growth factor, total growth in real productivity in the gross national product, of 5 percent. What this means is that the U.S. Government is proposing in effect to absorb almost all of the growth of this Nation.

We should also compare present years with the 11 previous years from 1965 to 1976 when the average deficit was 1.6 percent of the gross national product. It gives us some idea of the growing impact of the public sector.

I would also point out to those who are interested in new programs that will meet this Nation's priorities that we are proposing to spend 11 percent of the Federal budget on interest. This means that as that figure continues to grow and grow, there will be less left to meet the Nation's needs in new and existing programs. In a way it is self-defeating—as the deficits get larger, the interest rates go up. This means the interest on the national debt for debt service continues to grow larger and larger. The rates have to be larger to induce the money into the Federal Treasury through the process of borrowing.

We must avert the point where we begin to spend the capital of this Nation, because when the Federal deficit becomes larger than the growth in the gross national product, this means we will be spending our principal as opposed to the growth. We have only to look at the historical trends to know about our fears in this budget process.

Lastly, I am disappointed that the revisions to the third budget resolution do not provide for the shortfall of about $6.1 billion. In terms of being realistic, we should have removed it in our amending process. In taking out the money for the rebate, we should also have deleted the $6.1 in outlays in the fiscal year 1977 resolution to reflect the true facts.

I expect to hear some great claims from the other end of Pennsylvania Avenue this fall about our spending being way under the budget. The truth of the matter is this results from prudent management in the previous administration. I think that it is important to point out what in reality is going to happen.

Mr. GIAIMO. I yield 7 minutes to the gentleman from California (Mr. MINETA).

Mr. MINETA. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, first let me commend our able chairman, Mr. ROBERT GIAIMO, for his skillful leadership during what has been a trying period. Coordinating any new process here in the Congress can often be a difficult task—but dealing with the initial stages of a process as weighty as the Budget Act, with its many mandatory guidelines and reporting deadlines, is especially onerous. I am sure I speak for all the members of the Budget Committee in thanking our colleague from Connecticut for guiding us through the past few months of deadlines to arrive here today with what I consider to be an excellent set of spending and revenue targets.

In essence, the budget document with which the committee dealt was President Ford's January budget. Although President Carter was able to complete a number of important revisions, time did not allow him to undertake the exhaustive analysis of all agency and program budgets essential to a responsible effort that would reflect the priorities of the new administration. However, even with the extraordinary time pressures, President Carter was able to make revisions submitted on February 22, that were a significant and important improvement from the January budget submission.

The budget resolution we are voting on today includes additional changes recommended by the Budget Committee. In passing this resolution I think we will be establishing a total fiscal policy that is a well-balanced approach that meets both social and defense needs and reflects the wishes of the majority of American voters.

Our committee recommendations went further than Mr. Carter in reducing spending for defense and increasing spending for human needs—a significant reordering of national priorities that is in keeping with the desires of the American people.

The economic goals which the committee's recommendations are designed to achieve, are as follows: Real growth in GNP of 4.5 percent; unemployment rate of 6.3 percent; and a Consumer Price Index rate of increase of 5.5 percent.

These are not overly extravagant goals—in fact, I am sure many of my colleagues will find them quite discouraging. I want to assure you that I too find a 6.3 percent unemployment rate discouraging. However, while our projections are not optimistic, they are realistic—projecting substantially lower rates by the end of fiscal year 1978 would simply be dishonest. Given the economic, programmatic and political realities within which we must ultimately operate, I feel the committee's goals are fair and reasonable.

One bright note which I hasten to add here is that the economy does seem to be doing better at present than had been expected, and indeed may possibly exceed our expectation. For example, the most recent economic statistics during the first quarter of 1977 show that real GNP grew at an annual rate of 5.2 percent, a very strong showing in light of the winter hardships. Also, industrial production posted a sizable gain in March; increasing 1.4 percent over the February level. Even during February, which felt the coldest blows of the winter, industrial production managed to top January by 1 percent. As a result of the increased industrial production, capacity utilization has now climbed to 82 percent of capacity—though still far short of potential, the increase of 2 points over the last

5 months is a hopeful sign that health is returning to the economy.

Further, there has been a real surprise in housing—new starts in March were at a startling annual rate of 2.13 million, seasonally adjusted, some 17 percent above February. Even though the January rate was 1.38 million, the quarter averaged 1.78 million units, equal to the best quarter of last year.

This level of activity was originally held to be an estimate of starts for the year, implying no growth after last year's advance. However, as homebuilding permits advanced significantly in March, the housing sector will apparently continue its healthy performance into the second quarter.

Thus, it appears to me that while the economic goals included in our resolution, are realistic given current data, there are signs on the economic horizon that our employment and GNP goals might, indeed, be exceeded. However, given the economic analyses available to the committee, and with the realization that our projections are educated guesses at best, I think the fiscal policy embodied in this resolution is prudent and represents what will be a good first step toward our ultimate goal of a full-employment economy and a balanced budget by 1981.

In expressing my overall support for the committee's recommendations, I do not mean to obscure my concern over the size of the deficit. While present economic conditions seem to necessitate the stimulative fiscal policy embodied in this resolution, I am growing increasingly wary of deficit spending that fails to bring about the intended results.

If there was ever a time that requires fiscal restraint, that time is now. After several years of continued deficit spending, we are still saddled with relatively poor economic growth, high rates of inflation, and persistently high levels of unemployment. I, for one, am forced to conclude that some of our programs are not working.

In voting on various amendments which seek to increase spending, I hope my colleagues will keep this in mind. The time has come to say no to programs that don't work, no matter how politically expedient they may be. If we are to make room in the budget for programs that can counteract recession, that can provide jobs and training, and that can assist the needy, we must scrutinize existing programs and eliminate those which are not working. This is an effort which must receive the highest priority of the 95th Congress.

If we are to meet the twin goals of a balanced budget and a full-employment economy, all the authorizing and appropriating committees must accept their responsibility, resist the urge to fully fund programs of dubious value, and instead, devote their resources and energies to weeding out bad programs.

The 1978 budget should not be used to implement hasty, ill-advised initiatives or overextend existing programs that have little chance of success. Rather, in this budget we must make every effort to present programs, and make room in the 1979 budget for new initiatives that will succeed.

If the Congress can accept the challenges reflected in the committee recommendations for the 1978 budget, that is, program reevaluation and fiscal restraint designed to achieve savings and conserve budgetary resources, I believe that the first budget resolution for fiscal year 1979 will find us immeasurably closer to a balanced budet and a healthy economy. Conversely, if we fail to meet these challenges, I fear we will be facing continually growing deficits and persistently high rates of unemployment. I doubt that the American public—the voters who put us here—will accept such a failure.

Finally, Mr. Chairman, in urging all my colleagues to support this first concurrent resolution on the budget for fiscal year 1978, I wish to remind them that these revenue and spending targets are estimates of what will be needed during the upcoming fiscal year—as the course of the economy for fiscal year 1978 becomes more certain during the summer, adjustments may become necessary—these can, and no doubt will, be made in the second concurrent resolution. Even beyond that however, unforeseen events during fiscal year 1978 may make more changes necessary, it is truly one of the virtues of the Budget Act that it allows us the necessary flexibility to make such changes. Yet in making those changes, the Budget Act forces us to acknowledge on a macrolevel what our microlevel changes add up to. And that is really what the congressional budget process is all about, requiring the Congress to state explicitly what its fiscal policy is, to move us away from the de facto fiscal policies of the recent past to an open, explicit procedure where the full Congress must assume the responsibility for, and accept the accountability for the total fiscal consequences for our various actions.

I urge all my colleagues to support House Concurrent Resolution 195—it is an important first step in giving the American public what they have asked for—a full-employment economy with a balanced budget.

Mr. GIAIMO. Mr. Chairman, I yield 5 minutes to the gentleman from Illinois (Mr. SIMON).

Mr. SIMON. Mr. Chairman, just a few general remarks about the resolution. First of all, I want to join my colleagues who have praised the work of the new chairman of the Budget Committee. This House and this Nation were served well by our first chairman, the gentleman from Washington (Mr. ADAMS), but we have also been served well by the gentleman's successor, who has handled these matters with tact, with diligence, with ability, and with stability.

The process itself has been discussed earlier in the debate.

There are two portions of that. One is that the budget process should restrain expenditures to keep them somewhat in line with income. In that area, the Budget Committee has served effectively. The second is to take a look at priorities. In that area—and I say this as a brandnew member of the Budget Committee, and I could be wrong—I have the feeling that we have not come to grips yet with this problem of priorities as effectively as we should or, I hope, sometime can.

The process has given us a chance for an overview of the problems, at least for me as a relatively new Member of Congress. I have enjoyed my service with my colleagues, and I think the committee has contributed beyond the budget process through this opportunity for an overview.

It has been suggested by my good friend, the gentlewoman from Maryland (Mrs. HOLT) and the gentleman from Missouri (Mr. ICHORD) earlier in this debate that we have somewhat precipitously, and without adequate care, gone into the matter of reduced defense expenditures. I would point out that the estimate of expenditures in all areas received by the Budget Committee were somewhere in excess of $32 million more than the committee ultimately authorized. Defense was cut, but so were veterans, so was education and labor; almost every area received a very substantial cut.

If I may use as one illustration, the cut that has been made by the committee. The unexpended balance for the next fiscal year from the Pentagon is $1.3 billion more than they anticipated. The chairman, in his mark, knocked out $1 billion of that. Through an amendment which I offered, which was adopted, we knocked out the additional $300 million. That was not an irresponsible act. The fact is that the Pentagon had budgeted a little more for inflation than they ended up having, so they ended up with $1.3 billion more than they thought they would have, and we knocked that out. That was a responsible, legitimate cut.

I have two other comments. One is that the distinguished gentleman from New York (Mr. CONABLE) touched on a point that one of these days we are going to have to face up to. That is, the 4-year-term limitation on the Budget Committee. Our friends in the Senate believe that we have made a serious mistake in not permitting Members to be on long enough so that we really can dig into these procedures and have the kind of impact that ought to be there. We have to consider very seriously whether or not that criticism is justified. I tend to agree with the gentleman from New York that the 4-year-term limitation is a mistake, even though I was one of those who supported it originally.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. GIAIMO. Mr. Chairman, I yield 2 additional minutes to the gentleman from Illinois.

Mr. SIMON. Finally, Mr. Chairman, I want to mention that my colleague from Minnesota (Mr. FRASER) and I will be considering—sometime prior to the second budget resolution—an amendment which would increase expenditures by about $2 billion, which would be used to

put unemployed people to work insulating the homes of the poor. What we do is tie in three needs: The needs of the poor; the needs of the unemployed; and the energy needs of the Nation. That strikes me as making a great deal of sense, and I hope we can move in that direction.

Again, I have been pleased to serve on this committee. I think the chairman and the members of the committee on both sides of the aisle have done an exceptionally fine job, and I am proud to be serving with them.

Mr. GIAIMO. Mr. Chairman, I yield 5 minutes to the gentleman from Florida (Mr. LEHMAN).

Mr. LEHMAN. Mr. Chairman, I rise in strong support of the First Concurrent Resolution on the fiscal year 1978 budget. I would like to express my pride and pleasure in our committee, and my deep admiration and gratitude for the superior leadership given us by our chairman, BOB GIAIMO. As you know, the necessity for a third resolution on the 1977 budget greatly limited the time available for our consideration of the resolution now before this House, but I feel that it is as carefully worked out as anything we could have reported with unlimited time. The committee has worked very hard to set targets for this summer's action which balance short-term economic stimulus with long-term growth, defense with social programs, recommendations for reform with expectations for new program initiatives.

The Federal budget, especially in this target stage, cannot be simply a "wish list," containing all the funding for all the legislative proposals Members and committees have in mind, whatever their merits. One job of the Budget Committee is to make serious judgments, based on the best information available, on what legislation is likely to be enacted soon enough to have budgetary impact in fiscal year 1978. I believe we have performed this task well.

The committee has made several recommendations for reform, which I heartily endorse. For instance, significant savings could be realized through the modest cut in the Defense Department's unexpended balances. Our Federal support for education could be better used through terminating impact aid for the "B kids" and targeting the funds where there is greater need.

We must all realize, of course, that there are many uncertainties assumed in this budget resolution. We have attempted to provide some fiscal stimulus, based on the most accurate data we could obtain. But the rate of our apparent economic recovery, the effects of the administration's energy proposals, and many other factors may combine to vastly change the situation at summer's end. I believe the chairman was wise in recommending and the committee correct in agreeing that the resolution contain language pledging that necessary adjustments will be made in the second resolution, based on the economic situation at that time.

Mr. Chairman, I believe that this resolution and its budget targets are adequate, reasonable, and flexible enough to meet our needs. I urge all my colleagues to support it and the balanced priorities it represents.

Mr. GIAIMO. Mr. Chairman, I yield 5 minutes to the gentleman from New York (Mr. PIKE).

Mr. PIKE. Mr. Chairman, I am sorry that as we debate the first half trillion dollar budget in our history, there are so few Members present.

Mr. Chairman, I am not greatly given to nauseous praise of committee chairmen and committees in general, so I would just like to say that I do agree with the others before me who have said that the gentleman from Connecticut (Mr. GIAIMO), the chairman of the committee, has behaved with great good humor under very trying circumstances and with admirable restraint under all sorts of pressures, and I think he has done a superb job.

Mr. CONABLE. Mr. Chairman, will the gentleman yield?

Mr. PIKE. I yield to the gentleman from New York.

Mr. CONABLE. Mr. Chairman, I know that the chairman of the committee is modest, and the praise that the gentleman has given to the committee chairman will never be considered nauseous by this group. I wish to associate myself with the gentleman's remarks about the chairman of the committee.

Mr. PIKE. Mr. Chairman, I would agree that praise of the chairman of this committee would never be considered nauseous. However, I have heard praise given to other chairmen of committees at other times which seemed to go a little beyond that required by the facts of the situation.

Mr. Chairman, this has been an interesting debate. I listened with great interest to the gentleman from Maryland (Mr. MITCHELL), who made what I thought was a superb speech. Immediately after that I listened to the gentleman from California (Mr. ROUSSELOT) make what I thought was another superb speech. The problem is that we just cannot reconcile the two speeches.

We are dealing with all kinds of issues here. We are dealing with human beings around the country, and the human beings with whom the gentleman from Maryland (Mr. MITCHELL) is most greatly concerned are those who have great needs; they need jobs, they need Government services, and their needs are real. The people across the country to whom the gentleman from California (Mr. ROUSSELOT) was addressing himself are the taxpayers. They are real, too, and they have needs also.

I am afraid that in the course of events in the Committee on the Budget all of us vote our interests; we vote our consciences and our philosophies. I think that I have come down probably closer to the position of the gentleman from California (Mr. ROUSSELOT) than I have to that of the gentleman from Maryland (Mr. MITCHELL) when my votes are considered. But all of these concerns are real concerns, and what we are trying to do is balance the needs of some people against the ability of other people to pay for them.

I think one of the things that has happened to us in this Nation is that we have found what were luxuries a decade ago are needs today. We change our definition of "needs." Automobiles have stopped being luxuries and have become needs. So have TV's.

We had a hurricane up in my district last year, and a lot of trees got knocked down. In the process of cleaning up my backyard, I broke my axe, and I went down to the hardware store to get a new handle for it. I said to the man who ran the hardware store, "I'll bet you have sold a lot of axes."

He said, "I haven't sold one, but I did sell 25 powersaws."

So again, what were luxuries a while back are needs today.

Mr. Chairman, I voted for this resolution in committee, not with any enthusiasm whatsoever but because it was the only budget resolution in town. And the thing that bothers me about this resolution is that I think we are time after time converting wants into needs. We always talk about the necessity of cutting Government spending, but not this year—somewhere down the road. We talk about the necessity of balancing the budget, but not this year—somewhere down the road.

The CHAIRMAN. The time of the gentleman from New York (Mr. PIKE) has expired.

Mr. OBEY. Mr. Chairman, I yield 3 additional minutes to the gentleman from New York (Mr. PIKE).

Mr. PIKE. Mr. Chairman, we talk about the necessity of biting the bullet, but we never bite the bullet. Once in a while we gum a marshmallow, but we never really bite a bullet. We say, "Yes," to everything, and in all these speeches today every Member is honestly and sincerely representing his philosophy and his constituency as he sees them.

They are all worthy causes. The things that the gentleman from Maryland (Mr. MITCHELL) wants are worthy causes, and the things that the gentleman from Missouri (Mr. ICHORD) and the gentlewoman from Maryland (Mrs. HOLT) wants are worthy causes. Our national defense is, of course, among the worthy causes.

Mr. Chairman, if we say "yes" to all of them, we will never, ever balance our budget; we will never, ever stop our deficits unless we summon up the courage to say "No" to worthy causes. Every one of us has to do it in his own home and in his own personal life. We get dunned by every worthy cause there is and we would like to say "Yes" to all of them. They are all good, but we just plain have to learn to say "No" sometimes.

Mr. Chairman, I have watched the city of New York go down the drain because it could not say "No," and I have watched the State of New York get into great difficulties because it could not say "No."

I think that the act of real statesmanship around here as far as the budget is

concerned is going to have to be to learn to say "No" sometimes to very worthy causes.

Ms. HOLTZMAN. Mr. Chairman, will the gentleman yield?

Mr. PIKE. I yield to the gentlewoman from New York.

Ms. HOLTZMAN. Mr. Chairman, as a resident of the city of New York, I would say that it has not gone down the drain, but it would have gone down the drain if the then President had had his way when he said, "Drop dead" to the city.

I think that if we say "Yes" to some of the needs of the cities instead of saying "No," we will be doing the right thing.

Mr. PIKE. The city would have gone down the drain if somebody on the outside had not come along to bail it out, and the State itself is getting into this position; but the trouble is that when the Federal Government gets into that position, there is not going to be anybody there on the outside to come along and bail it out.

Mr. OBEY. Mr. Chairman, I yield 5 minutes to the gentlewoman from New York (Ms. HOLTZMAN).

Ms. HOLTZMAN. Mr. Chairman, I would like to begin my remarks by echoing what other Members have said about the chairman of the Committee on the Budget, the distinguished gentleman from Connecticut (Mr. GIAIMO), who has shown extraordinary fairness and extraordinary ability in leading the Committee on the Budget through the difficult preparations for the third budget resolution for fiscal 1977 and the first concurrent resolution for 1978. Most remarkably, he has done it with a fine sense of humor.

I also commend the chairman for leading the Committee on the Budget to produce a budget that is better than those proposed by two Presidents, both the present and former occupants of the White House.

The budget that is presented to the Congress in this resolution is better than that offered by either President in that it restrains unnecessary military growth and deals more generously with the very pressing needs of our citizens in the areas of jobs, education, child welfare, senior citizen employment, and the like.

I commend the chairman and the committee for this achievement. However, I would say also that while this budget is better than that presented to us by the White House under two administrations, I still think that it fundamentally fails to address some of the extraordinary needs that the Nation faces at this time and continues to endorse and support waste in a number of programs, especially in the military budget.

Let me say, Mr. Chairman, that although President Carter's proposal for the defense budget was reduced by the committee by $4.15 billion in budget authority, nonetheless, this budget calls for an increase in budget authority for weapons procurement and research and development of 15 percent, and increases actual weapons spending by 25 percent.

Mr. Chairman, I believe that significant savings could be made with respect to the military budget by scrutinizing very carefully the $70 billion in unspent funds already in the pipeline and by providing greater control over the almost $18 billion in procurement contracts that are awarded on a noncompetitive basis.

The tradeoffs for the continued support of wasteful military spending are the serious economic and social problems that we confront here in the United States.

It is one thing to say we are No. 1 in national security if you define national security by the number of dollars you spend on weapons; it is another thing if you define national security by the ability to walk the streets in the cities of this country unafraid; if you define national security as having a population that is literate; if you define national security in the sense of having provided for the people of this country the basic necessities of life.

We are no longer No. 1 in some of the measures that are tests as to where a country ranks in the quality of life it gives its citizens. We are no longer No. 1 in per capita income. We are no longer No. 1 in literacy; 11 countries are ahead of us.

We are no longer No. 1 in health care for children; 15 countries are ahead of us.

We are no longer No. 1 in life expectancy for men and women. In fact, 18 countries are ahead of us in life expectancy for men.

In addition to providing no real hope for improvements in 1978 with regard to these problems, the budget makes absolutely no commitment in three areas where I believe we need to move forward this year with new initiatives. The first is welfare reform. There is not one penny in this budget that will assist States and local governments in dealing with the extraordinary burden that welfare has placed upon them. Nor is there one penny in this budget to move toward national health insurance. And there are no new initiatives for mass transit, although, clearly, Mr. Chairman, mass transit is an integral part of any effective energy program for this country.

The CHAIRMAN. The time of the gentlewoman has expired.

Mr. GIAIMO. Mr. Chairman, I yield 3 additional minutes to the gentlewoman from New York.

Ms. HOLTZMAN. Mr. Chairman, let me also point out that although this budget is concerned with the issue of unemployment, by the end of the calendar year 1978, after all the stimulus measures in this budget will have had their impact, we still expect to have 6.3 percent of unemployment. This is an intolerable waste of human resources.

I intend, Mr. Chairman, to offer several amendments to this budget. One amendment has to do with the proposed business tax credits for fiscal year 1977. As the Members may know, the President has recommended that the $50 tax rebates be withdrawn and also that the proposed business tax credits be withdrawn. Nonetheless, the fiscal 1977 budget still contains moneys for both the business tax credits and the tax rebate. The gentleman from Connecticut, Mr. GIAIMO, will move to eliminate the tax rebate leaving in the tax credits.

It seems to me inexcusable, when we still have a substantial budget deficit, to spend $900 million in 1977 on tax credits that will not work. And it is inequitable to give a tax credit to business when the tax rebate to consumers will be withdrawn.

I also will offer an amendment to restore the cuts that have been made in the Law Enforcement Assistance Administration's budget. As the Members know, as a result of the actions of the committee, the law enforcement assistance program is going to be cut by one-third. That is a very devastating cut in the only Federal program that assists States and localities in developing programs to deal effectively with crime.

I intend to support the amendment offered by the gentleman from Maryland (Mr. MITCHELL), the so-called transfer amendment. Having offered one last year, I very strongly support the concept that we need to begin to turn around the priorities of this country. We must recognize that national security is defined by more than the dollars spent on defense and the number of missiles in our arsenal, and that the strongest resource we have and the greatest defense this country has is the well-being of the people here at home.

Mr. Chairman, I yield back the remainder of my time.

Mr. GIAIMO. Mr. Chairman, I yield 5 minutes to the gentleman from California (Mr. PANETTA).

Mr. PANETTA. Mr. Chairman, I want to rise out of concern for the budget, out of frustration, and out of a deep desire and hope to make this budget process work. I want to commend the chairman and the committee for what they have done. Within the limits of the Budget Act, I believe the work of the chairman and the Budget Committee, have, indeed, been admirable. House Concurrent Resolution 195 is the product of a long and difficult process that tries to balance the needs between social programs and defense requirements. But I rise to speak here as a freshman Member who is, indeed, frustrated by the process that we face. I have the responsibility now to evaluate a massive budget that includes budget authority in excess of $500 billion, includes outlays of $463 billion, and provides for a discouraging deficit of $65.8 billion. It is frustrating, because I do not think I or the Congress has an understanding or a hold on this budget or the various programs that are a part of it.

My concerns are these: First, I think there is too little oversight that goes into ongoing programs. I do not see within this budget sufficient attention to programs that are already in existence that are not working effectively—programs in HEW, or Labor, or the Pentagon, which require complete and careful oversight.

Second, the new programs that are incorporated here are programs I do not think we have had the time to sufficiently

evaluate. We are dealing in broad generalities and not hard evidence. We are dealing in broad philosophies but with few specifics. Recognizing these frustrations, I think that if the budget process is going to be effective, it has to look forward to additional reforms if it is to truly be an effective tool in reducing spending and balancing our budget.

First and foremost, there simply has to be stronger oversight of ongoing programs. We have got to cut away at the programs that are not working effectively, and they are there. We continue to deal with new programs added on old programs and that is how this budget continues to grow and grow each year.

Second, we are talking about the need for zero-based budgeting. We are talking about the need for sunset laws. If this is going to be done effectively, we have to give time to the process. It means that committees have to devote time to oversight and ongoing programs. Zero-based budgeting without the time to do it, without the time to get into oversight, is meaningless.

Third, we have to get over this year-to-year budget process that throws us into constant turmoil 12 months of each year. We must recognize that we have to start moving toward a 2-year budget here so that we can plan; we can look at these programs; we can begin to plan our budget needs over a 2-year period rather than from year to year. The present process is chaotic; it does not make sense; it simply does not work.

Lastly, I would suggest that to provide the time we need, we should set aside a year in each Congress to do budgeting, to be able to look carefully at these programs, and to properly exercise our responsibilities. These are the kinds of broader reforms that I think are necessary, because if we are to really do a job with this budget, we are going to have to take the time to look at programs, determine their effectiveness, and devote complete concentration to the budget effort. That is the only way we can fulfill our responsibilities to the Congress, to our people, and to the Nation.

Mr. LAGOMARSINO. Mr. Chairman, will the gentleman yield?

Mr. PANETTA. I yield to the gentleman from California.

Mr. LAGOMARSINO. I thank the gentleman for yielding.

I would like to compliment the gentleman on a very thoughtful presentation. While he did not speak about specifics in the budget or amounts—and we might disagree on some of those—I certainly think that the proposals that the gentleman has outlined are worthy of very serious consideration.

Certainly we have to get a hold on the budget process, and we have to do it on something different than on a crisis basis. It seems we have had a budget resolution here almost every day—which is an exaggeration, but it has been all too often. I think many of the suggestions the gentleman made in his remarks would be very beneficial to this whole process, and I would hope that the Budget Committee would take a very close look at his recommendations and perhaps recommend them to the Congress.

Mr. GIAIMO. Mr. Chairman, I yield such time as he may consume to the gentleman from California (Mr. ANDERSON).

Mr. ANDERSON of California. Mr. Chairman, during the consideration of House Concurrent Resolution 195, I intend to offer an amendment to increase both the total budget authority and total outlays by $500 million.

I would hope that these funds would go toward the cost of an urgently needed and too long ignored pension for those veterans of World War I.

Mr. Chairman, over 160 Members of this House and 6 of the other body have joined in cosponsorship of H.R. 55, a bill to provide a $150 pension to veterans of World War I, or their surviving spouses, and would not have an income limitation:

LIST OF COSPONSORS

Congressional co-sponsors of H.R. 55, the "World War I Pension Act." The "World War I Pension Act" provides a $150 monthly service-based pension to veterans of World War I or their surviving spouses. The bill will not adversely affect any veteran benefit which a World War I veteran might presently be receiving.

ADDITIONAL COSPONSORS OF H.R. 55—"THE WORLD WAR I PENSION BILL OF 1977"

California: Hon. Charles H. Wilson.
Hawaii: Hon. Cecil Heftel.
Massachusetts: Hon. Margaret Heckler.
Missouri: Hon. Ike Skelton.
North Dakota: Hon. Mark Andrews.
Oklahoma: Hon. Wes Watkins.
Viriginia: Hon. Paul Trible.
Wisconsin: Hon. Robert Cornell.
Florida: Hon. Andy Ireland.
Indiana: Hon. Floyd Fithian.
Michigan: Hon. Dave Stockman, Hon. Harold Sawyer.
Montana: Hon. Max Baucus.
Ohio: Hon. Tennyson Guyer.
Tennessee: Hon. Clifford Allen.
West Virginia: Hon. Nick Rahall II.

I enclose for your study, also, a breakdown of the numbers of such veterans of World War I now living in the various States:

Breakdown by State of Veterans of World War I

[In thousands]

State:	*World War I*
Total	867
State total	858
Alabama	11
Alaska	*
Arizona	10
California	82
Colorado	9
Connecticut	12
Delaware	2
District of Columbia	3
Florida	58
Georgia	13
Hawaii	1
Idaho	3
Illinois	44
Indiana	21
Iowa	15
Kansas	12
Kentucky	12
Louisiana	12
Maine	6
Maryland	13
Massachusetts	27
Michigan	31
Minnesota	19
Mississippi	8
Missouri	24
Montana	3
Nebraska	7
Nevada	2
New Hampshire	3
New Jersey	30
New Mexico	4
New York	74
North Carolina	15
North Dakota	3
Ohio	40
Oklahoma	14
Oregon	13
Pennsylvania	50
Rhode Island	4
South Carolina	7
South Dakota	4
Tennessee	15
Texas	42
Utah	4
Vermont	2
Virginia	15
Washington	16
West Virginia	9
Wisconsin	21
Wyoming	2
Outside U.S.—Total [1]	9

*Less than 0.5 (thousand).

[1] Includes Commonwealth of Puerto Rico, U.S. Possessions and outlying areas, and foreign countries.

NOTE.—These estimates have been developed from "bench mark" veteran population statistics for the states as of June 30, 1970, based on 1970 Census Population data on veterans' place of residence, extended to June 30, 1976 on the basis of (1) 1965–1970 veteran interstate migration statistics from the 1970 Census; (2) Bureau of the Census provisional estmates of 1970–1971 net civilian migration of the States: "Current Population Report." Series P–25, No. 468, October 5, 1971; and (3) mobility of the United States Population 1970–1971, "Current Population Reports," Series P–20, No. 235, April 1972. They are independent of, and therefore not directly comparable with, estimates for June 30, 1970 through June 30, 1974, previously published. Excluded are an estimated 194 (thousand) who served only between World War I and World War II, and 251 (thousand) who served only between World War II and the Korean Conflict.

Mr. Chairman, I receive letters almost every day, each telling a specific "horror" story of how our veterans are being forced to live on pensions of from $5 to $15 a month.

Where is the equity when we pay these veterans of World War I one lump sum payment of $607.50, and then pay a Vietnam veteran with two dependents over $13,176 per year in educational benefits alone?

Mr. Chairman, I urge the 160 cosponsors of H.R. 55 to join in our effort to provide the necessary moneys to fund a World War I pension bill.

Mr. GIAIMO. Mr. Chairman, I yield 3 minutes to the gentleman from Wisconsin (Mr. OBEY).

Mr. OBEY. Mr. Chairman, I do not think I need to express to this House the great respect which I have for the chairman of the Budget Committee.

Let me say that I think that we ought to view this resolution in the light of the very special circumstances which surround its being brought to the floor. I think we might have had a number of things done quite differently if we had been able to bring this bill to the floor in a different time circumstance, but as everyone is well aware, we are in a situation in which we have a new President. He is trying to deal with a budget which for the most part he did not prepare, to which he has been able only to react. We also have a new committee and we have probably the murkiest outlook in terms of the future inclinations of the economy that we have had in the last 5 or 6 years.

Frankly my instincts tell me we would be better off if we were able to provide funds in this resolution for both an additional temporary—I emphasize the word "temporary"—tax reduction and as well some start-up funds for the implementation of welfare reform. I really believe that if we want to achieve any degree of confidence on the part of the consumers and business alike in this country we have to start down the road of welfare reform, because until we do that we have to build the welfare component into virtually every other issue we deal with. We are always forced to deal with the energy issue in terms of welfare problems. We are forced to look at social security almost in terms of it being a welfare program, when it was never meant to be that but was meant to be an insurance program. The issue really inhibits our ability to deal with in a very straight way most of the other issues that face us.

The only reason I am not offering an amendment to do that this afternoon is because I am really deferring to reality, deferring to the fact that we really have a very murky situation. No one really knows the direction in which the economy is headed and I think most of the people would feel more comfortable in making a careful assessment 3 or 4 or 5 months down the road. By that time I would hope we would have a better knowledge of what way the economy is headed, and of what is really happening with inflation, and of what the true roots of inflation are, and of what in fact the weather will be, which is probably a factor that will really affect the economy in the future a great deal.

Mr. REGULA. Mr. Chairman, we are now completing work on the first budget resolution for fiscal year 1978. However, I must remind my colleagues there are still a few loose ends from the third resolution for fiscal year 1977 that we did not clean up.

This month the Office of Management and Budget estimated that during the current fiscal year we will have a shortfall of $6.1 billion in outlays. This means the Government will spend $6.1 billion less than projected.

This being the case, we should cut this $6.1 billion out of the resolution, as we do not need it. However, it has been purposely left in the third resolution, unnecessarily available for whatever the Congress wishes to throw into the budget. This action is the type of political ploy for which Congress loses the trust of the American people.

Worse yet is the presentation, or lack of it, in allowing this $6.1 billion to remain dangling. The shortfall itself is widely publicized. But no one talks of what adjustments should be made now that it exists.

You may all write your constituents expounding on the service provided in not needing to spend this additional money. In fact, you would be telling a half truth. Your constituents will believe you have saved them $6.1 billion. In actuality Congress is simply holding on to that outlay authority and will inevitably spend it, for your constituents. Most likely, it will not be spent on the original purposes for which it was included in the budget. You would not say that there will be no savings; that this inescapable action will add to their country's deficit; and unavoidably eat up their tax dollars.

While I commend the administration and the Budget Committee on removing the tax rebate program from the fiscal year 1977 resolution, I feel we shirk our responsibility in retaining this $6.1 billion. All of you know as well as I that it will float around in the vacuous budget vat until new ways to expend it are effected.

While this is an immensely clever incentive for backdoor spending, it is wrong—wrong in terms of the budget resolution's function, and wrong in hoodwinking the taxpayer.

We are continuing an economic recovery that should encourage us to reduce

spending and deficits. The one thing we should not do is impede this process by reserving a comfortable $6.1 billion cushion that we know is unnecessary.

During the past weeks I have heard the word confidence used many times during our committee deliberations. Reducing the deficit an additional $6.1 billion for fiscal year 1977 will do much to generate that confidence.

Mr. ADDABBO. Mr. Chairman, it is my belief that Members of Congress ought to have a pay raise. We have suffered along with all other Americans through 8 years of unrelieved inflation. For 7 of those years, Members of Congress have seen their purchasing power undercut by inflation without a pay increase.

I was frankly pleased when the Presidential Commission urged President Ford to suggest a pay raise for Congressmen last fall. It would have been better to have small annual increases to account for increases in the cost of living than it would have had to have one huge increase, but taking the increase over a 7-year span, it was not out of line with what most American workers have received. It broke down to about an increase of $1,800 a year, far less than what most business executives have received.

But it has offended me personally that we are portrayed as raising our own salaries and it has further offended me that the House did not move to affirm the raise on its own behalf.

It seems to me that if the House of Representatives is to truly represent the people of this Nation, it must lead through example. When we adopt these shabby habits of granting ourselves extra emoluments without even voting on it, we tend to solidify those who would complain that the Congress sets one standard for the American people and yet another standard for itself.

Had the Members of the House been granted the opportunity to vote on the pay raise last winter when the matter should have been heard, I would have voted for it. Since it was the decision of the House not to vote on the matter at that time, I believe the Members of the House have forfeited their right to the pay raise, and it ought to be ended.

Accordingly, I will support the gentleman from New York (Mr. PIKE) when he moves later to strike the money for the pay increase from the budget resolution. I would urge the Members of the House to purge themselves of the memory of how this pay raise was enacted, and vote along with us on this issue.

Having said that, I want to implore the leadership from both sides of the aisle and from both Houses of Congress to work with the administration to devise a sensible and honorable means of providing pay increases for Members of Congress. Even Congressmen are not immune from the onslaught of inflation and, just like every other American worker, the pay scale of the American Congressman ought to be readjusted periodically. But it should not be within the power of the Congress to make that determination, nor should the subject be allowed to become a political football which can be used to embarrass Members.

This situation has been handled dreadfully and ought to be terminated because it is inherently flawed. The American public is convinced that Members of Congress cannot resolve their problems but are eagerly willing to feather their own nests. That is far from true, but we have caused to some extent the problem for ourselves and our only alternative is to clean our nest.

We must lead in this Chamber. We must be faithful with the American people and we must not help ourselves when the people are not.

Mr. GRASSLEY. Mr. Chairman, the amendment offered by the gentleman from New York (Mr. PIKE) is a good one and deserves the support, the vote, of each Member of the House. Of course, I recognize that this amendment is of more symbolic importance than anything else in that the budget function from which this $7 million would be deleted is broad. The money can be transferred and shifted around easily enough; further, this budget resolution is only a target susceptible of later amendments and changes.

Nonetheless, the House of Representatives ought to adopt by a recorded vote this amendment which would reduce the budget authority and outlays for congressional salaries. The gentleman from New York (Mr. BIAGGI) put it well in his "Dear Colleague" of the 22d when he observed that we ought to vote on this issue and quit hiding behind the Speaker's chair.

I will not, at this time, discuss my views on the substantive issue of automatic no-vote congressional salary increases, both past and present, except to say that I believe the recent inaction of Congress with respect to the February pay raise has not set well with the American people. They feel that their trust has been betrayed.

Therefore, I welcome this opportunity to vote "aye" on the pending amendment. It would also seem appropriate for Members who favor accountability in Government to support legislation which I have introduced; namely, H.R. 2430 and H.R. 2431, which would repeal the annual automatic cost-of-living increase in compensation paid to Members of Congress.

Mr. GIAIMO. Mr. Chairman, I have no further requests for time.

Mr. LATTA. Mr. Chairman, I have no further requests for time.

Mr. GIAIMO. Mr. Chairman, I yield back the balance of my time.

Mr. LATTA. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. Pursuant to clause 8 of rule XXIII, the concurrent resolution is considered as having been read for amendment and open to amendment at any point.

The concurrent resolution is as follows:

Resolving by the House of Representatives (the Senate concurring), That the Congress hereby determines and declares, pursuant to section 301(a) of the Congressional Budget Act of 1974, that for the fiscal year beginning on October 1, 1977—

(1) the recommended level of Federal revenues is $398,094,000,000, and the amount by which the aggregate level of Federal revenues should be decreased is $1,073,000,000;

(2) the appropriate level of total new budget authority is $500,764,000,000;

(3) the appropriate level of total budget outlays is $462,349,000,000;

(4) the amount of the deficit in the budget which is appropriate in the light of economic conditions and all other relevant factors is $64,255,000,000; and

(5) the appropriate level of the public debt is $801,100,000,000, and the amount by which the statutory limit on such debt should accordingly be increased is $101,100,000,000.

SEC. 2. Based on allocations of the appropriate level of total new budget authority and of total budget outlays as set forth in paragraphs (2) and (3) of the first section of this resolution, the Congress hereby determines and declares pursuant to section 301(a)(2) of the Congressional Budget Act of 1974 that, for the fiscal year beginning on October 1, 1977, the appropriate level of new budget authority and the estimated budget outlays for each major functional category are as follows:

(1) National Defense (050):

(A) New budget authority, $115,986,000,000;

(B) Outlays, $109,647,000,000.

(2) International Affairs (150):

(A) New budget authority, $9,543,000,000;

(B) Outlays, $7,397,000,000.

(3) General Science, Space, and Technology (250):

(A) New budget authority, $4,930,000,000;

(B) Outlays, $4,737,000,000.

(4) Natural Resources, Environment, and Energy (300):

(A) New budget authority, $20,950,000,000;

(B) Outlays, $20,677,000,000.

(5) Agriculture (350):

(A) New budget authority, $2,153,000,000;

(B) Outlays, $2,880,000,000.

(6) Commerce and Transportation (400):

(A) New budget authority, $20,569,000,000;

(B) Outlays, $20,277,000,000.

(7) Community and Regional Development (450):

(A) New budget authority, $8,237,000,000;

(B) Outlays, $10,926,000,000.

(8) Education, Training, Employment, and Social Services (500):

(A) New budget authority, $22,739,000,000;

(B) Outlays, $27,756,000,000.

(9) Health (550):

(A) New budget authority, $47,685,000,000;

(B) Outlays, $44,238,000,000.

(10) Income Security (600):

(A) New budget authority, $182,688,000,000;

(B) Outlays, $148,309,000,000.

(11) Veterans Benefits and Services (700):

(A) New budget authority, $19,935,000,000;

(B) Outlays, $19,903,000,000.

(12) Law Enforcement and Justice (750):

(A) New budget authority, $3,560,000,000;

(B) Outlays, $3,800,000,000.

(13) General Government (800):

(A) New budget authority, $3,898,000,000;

(B) Outlays, $3,998,000,000.

(14) Revenue Sharing and General Purpose Fiscal Assistance (850):

(A) New budget authority, $9,822,000,000;

(B) Outlays, $9,783,000,000.

(15) Interest (900):

(A) New budget authority, $43,000,000,000;

(B) Outlays, $43,000,000,000.

(16) Allowances:

(A) New budget authority, $1,069,000,000;

(B) Outlays, $1,021,000,000.

(17) Undistributed Offsetting Receipts (950):

(A) New budget authority, —$16,000,000,000;

(B) Outlays, —$16,000,000,000.

SEC. 3. In the third budget resolution for fiscal year 1977, the Congress provided for revenue and spending proposals designed to stimulate the Nation's economy in order to

reduce unemployment. These proposals, together with recent indications of more vigorous economic growth in the private sector, provide evidence that the Nation's economy may be returning to the levels needed to provide jobs to millions of our unemployed.

The Congress recognizes, however, that unusual uncertainties surround the current economic outlook for 1977 and 1978—primarily, the economic impact of the stimulus proposals and the likelihood of continued economic growth in the private sector—and that additional time and information are needed to make final determinations with respect to fiscal policy for fiscal year 1978; and declares that, if economic recovery does not proceed satisfactorily during the months immediately following adoption of the first budget resolution for fiscal year 1978, it will be necessary to provide additional stimulus to the economy in appropriate amounts to be determined in the second budget resolution for fiscal year 1978. On the other hand, if the recovery continues to show signs of long-term renewed growth, it may be desirable to reduce some of the economic stimulus provided for fiscal year 1978 in order to make more rapid progress toward a balanced budget.

AMENDMENT OFFERED BY MR. GIAIMO

Mr. GIAIMO. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. GIAIMO: On page 2, line 2 strike out $462,349,000,000 and insert in lieu thereof $463,854,000,000;

On page 2, line 5 strike out $64,255,000,000 and insert in lieu thereof $65,770,000,000;

On page 2, line 7 strike out $801,100,000,000 and insert in lieu thereof $792,100,000,000;

On page 2, line 9 strike out $101,100,000,000 and insert in lieu thereof $92,100,000,000;

On page 3, line 9 strike out $2,880,000,000 and insert in lieu thereof $4,395,000,000.

Mr. GIAIMO (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

Mr. GIAIMO. Mr. Chairman, I offer a Budget Committee amendment to the first budget resolution for fiscal year 1978 to cover reestimates of commodity program expenditures in the agriculture functional category. The amendment increases outlays for the agriculture function and the budget resolution total by $1,515 million. This change is necessary to accommodate recent administrative actions and changes in the economy which will require payments to be made under current law.

The committee was aware during its markup that some adjustment would have to be made for this program, but deferred action until events settled down and a reliable estimate could be developed. Among other things, during committee markup, the administration was in the process of presenting its farm policy recommendations to the Congress. I have discussed this matter several times with the gentleman from Washington, the distinguished chairman of the House Agriculture Committee, and his staff, and I have also talked about it to Director Lance of the Office of Management and Budget.

The administration has now submitted a revised estimate for this program, which has been reviewed by the Congressional Budget Office and the committee staff. This increase assumes that administrative actions to extend wheat loans—the reseal program—to expand storage facility loans, and to increase price support levels for wheat, feedgrains, and dairy will require additional expenditures. Further, it is assumed that deteriorating economic circumstances for commodities, such as wheat, will require larger loans and payments.

I wish to emphasize that the amendment addresses only payments expected to be made under current law. It assumes no legislative changes for 1977 crops. Payments made for this program under current law are mandatory. There is no choice. It was just a matter of developing a reliable estimate, which I believe we now have.

Mr. LATTA. Mr. Chairman, I rise in support of the committee amendment.

Mr. Chairman, I agree with the statement just made by the chairman of our committee. This amendment is absolutely necessary because of these administrative changes. I think that, perhaps, it might add to farm income and all farmers agree it is at a low level. I support the amendment and hope it will pass.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Connecticut (Mr. GIAIMO).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. GIAIMO

Mr. GIAIMO. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. GIAIMO: Insert the following new section:

SEC. 4. Pursuant to section 304 of the Congressional Budget Act of 1974.

(1) Section 1 of S. Con. Res. 10 is amended to read as follows:

"That the Congress hereby determines and declares, pursuant to section 304 of the Congressional Budget Act of 1974, that for the fiscal year beginning on October 1, 1976—

"(1) The recommended level of Federal revenues is $355,000,000,000, and the amount by which the aggregate level of Federal revenues should be decreased is $3,300,000,000;

"(2) The appropriate level of total new budget authority is $469,700,000,000;

"(3) The appropriate level of total budget outlays is $414,250,000,000;

"(4) The amount of the deficit in the budget which is appropriate in the light of economic conditions and all other relevant factors is $59,250,000,000; and

"(5) The appropriate level of the public debt is $707,970,000,000."

(2) Section 2, paragraph (10) of S. Con. Res. 10 is amended to read as follows:

"(10) Income Security (600):

"(A) New budget authority, $167,700,000,000;

"(B) Outlays, $138,100,000,000."

Mr. GIAIMO (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

Mr. GIAIMO. Mr. Chairman, I rise to support this Budget Committee amendment to make the necessary adjustments in the third budget resolution for fiscal year 1977 to remove provision for the $50 individual tax rebate and payment proposal. The amendment reduces the deficit by $10.5 billion to $59.25 billion, and affects both the revenue and spending sides of the budget.

Removal of the tax rebate provision increases the estimate for total revenues to $355.0 billion, which reflects an increase of $7.3 billion. Budget authority and outlays in the budget resolution totals and in the functional category for income security are reduced by $3.2 billion each. It had been estimated that payments to social security, supplemental security income, and railroad retirement recipients would cost about $1.8 billion and that payments to others in excess of their tax liability would cost about $1.4 billion.

On April 14, President Carter announced he was no longer supporting his earlier proposal for the $50 rebate and payment, as well as his proposals for tax credits for business. The Budget Committee amendment strikes provision only for the $50 rebate and payment. As amended, the resolution still provides for some version of tax assistance to business either through business tax credits or jobs tax credit. As it left the House, the tax bill included the rebate provision, but substituted a new jobs tax credit for the business tax credit approach proposed by the administration. The other body is still considering the tax legislation, but votes taken last week indicated widespread support for some version of tax assistance to business.

I have discussed the matter at length with the gentleman from Oregon, the distinglished chairman of the Committee on Ways and Means, and I believe he endorses the approach taken by the committee amendment. I have also discussed the problem with the Democratic Steering and Policy Committee and that group has adopted a Resolution supporting the committee position.

Mr. Chairman, I would like to call to the attention of the House that the Budget Committee amendment does not reflect the revised estimates announced by the administration on Friday of last week indicating a shortfall of some $6 billion in outlays in fiscal year 1977 and an increase of about $43 billion in outlays for fiscal year 1978. Under provisions of the Budget Act, Mr. Chairman, the administration submits four comprehensive revisions of the budget estimates during the course of 1 year: One in its formal budget submission usually in January; one on April 10 to give Congress the latest information in its preparation of the first budget resolution; one on July 15 to give Congress the latest information in its preparation of the second budget resolution; and finally on November 10, in connection with its submission of the current services budget.

This most recent revision derives from a general concern of the administration expressed in the February 22 budget that in recent experience there appears to be a general tendency for estimates to be overstated. It is different from the four comprehensive revisions called for by the Budget Act in that this analysis does not deal with budget authority, and a number of the revisions are based on agency, bureau, or major program aggregates. The lack of line item and other detailed supporting materials inhibits the usual careful review to which the regular comprehensive reestimates are subjected before they are adopted for use by the Congress. The lack of these supporting materials also would make more difficult the distribution of these revisions among the committees of the Congress, which is required by section 302 of the Budget Act.

The budget estimates revision document itself states:

A cautionary note is important. Despite recent outlay underruns it would be erroneous to assume that outlays for programs that are now underrunning will continue to underrun indefinitely. The estimates of relatively uncontrollable outlays can easily swing to being low rather than high, and outlays that were anticipated in this or earlier fiscal years in programs with carry-over budget authority (e.g., major procurement) will generally be made in 1978 or later years.

With 5 months in the fiscal year still left, it seems possible to me, Mr. Chairman, that such a reversal could still take place—at least in part—in this fiscal year, and our adjustment would prove premature.

It is also true that budget estimates in many respects are not merely forecasts, but definitly involve a plan of the Congress. They reflect assumptions about spending rates that are crucial to the role of the budget as a fiscal program related to the goals reducing unemployment and promoting growth in the economy. I therefore conclude that it is not wise at this point to adjust the fiscal year 1977 ceilings to reflect the recent revisions in the estimates.

With regard to the $3.0 billion increase the President added to his total outlays for fiscal year 1978, several factors suggest that change is not appropriate now. To begin with, the Budget Committee already acounts for the lion's share of the President's increases. For example, the revision increases the President's budget by $1.8 billion for social security. The budget resolution already accounts for $1.3 billion of that amount. The revision increases the President's budget by $700 million for offshore oil receipts, which the budget resolution already covers. The revision increases the President's budget by $2.0 billion for farm price supports. The budget resolution already includes $0.5 billion of that amount, and the committee specifically plans to cover the remainder with a committee amendment.

Economic conditions drive the estimates in every budget. Economic assumptions necessarily are uncertain at this time because nobody can now predict with certainty the duration of the current recovery or the economic effect of the energy program, the anti-inflationary program, and the expected environmental message. This is a target resolution. A comprehensive set of revised estimates will be submitted on July 15. I think it is much wiser to let things settle down and make the adjustments in the estimates in the usual fashion in connection with the second budget resolution for fiscal year 1978, when we will have a better picture of where we are going.

Mr. LATTA. Mr. Chairman, I rise in support of the amendment.

Mr. Chairman, I do not want to say, "I told you so," but back on February 23, 1977, we said the economy was going forward with such fervor that we did not need the stimulus of a $50 rebate. I am pleased to support this amendment to take it out because we are going to have a reduction in this deficit of $10.5 billion by so doing. The President of the United States says that we should take it out and all economic indicators reveal it should come out. As a matter of fact, it should not have been in, in the first place.

Mr. LEGGETT. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I am not going to request any rollcall on this amendment, but I do think that we are making a mistake. I think perhaps we have no other choice but to take the Rebate out. We are taking it out because the President says he is not going to support the $50 rebate that he suggested to us at one point, and if the Senate is not going to agree to the rebate, it is not going to happen in this fiscal year, so the committee is just recognizing a reality. But I do think we are hopping, skipping, and jumping to the tune of the President. He came into office and he suggested that we have a stimulus program of some $15 billion or $20 billion, and we gave it to him. Now he has taken part of it away. We are, in fact, concurring in that, albeit with some support of the other body and some of the other committees. I think we have to recognize the fact, as was pointed out in some of the labor bulletins the other day, when the President took office there was 7.3 percent unemployment. There is 7.3 percent unemployment today.

There is still 20 percent of our Nation's industrial capacity standing idle today, and that percentage stood idle when the President took office. Our job unemployment rate is unconscionably high, and our rate of economic growth is needlessly low.

I merely point out that contrary to the position of my distinguished colleague, the gentleman from Ohio (Mr. LATTA), I think we were right originally. What we had in mind to do was not to provide an overall quick-fix on the economy but to come up with a supportive program to accelerate the growth of GNP.

Mr. Chairman, I have here a report that was just issued in April 1977 by Data Research and Review, Inc., an econometric group out of Lexington, Mass. What they point out is that the effect of not moving ahead with the $50 rebate will be to cut GNP this fiscal year from 5 to 4.4 percent, with a quarterly pattern showing a peak rate of 5.7 percent in the second quarter just passed.

They say that the total employment gain in the four quarters ending this December will be 2.31 million, as opposed to a projected gain of 246,000 persons more than that figure, were the rebate to take effect.

They also say that the unemployment rate, which our committee had projected to be 6.9 percent in the fourth quarter of this year, should now be reprojected to be 7.1 percent, and that the inflation rate would be little affected; it would only be lowered by one-tenth of a point in the final quarter.

So with all that, we are gaining overall very little by not taking the original position of the House. We are exacerbating unemployment. We are not moving in the direction that the President originally projected. We are backtracking from that position.

The President has put out an economic statement in which he has indicated that in fiscal year 1978 he is going to be fighting tooth and nail against excessive spending by the Congress of the United States. I must say that when I hear my Democratic President making that kind of a statement, it harkens back to some of the conflicts we have had with previous administrations.

Mr. Chairman, I think we ought to recognize what we do here. This amendment is undoubtedly going to pass, but it portends very serious confrontations in the future. I think the position of the House was originally correct, and that we are making a mistake.

Mr. Chairman, I intend to vote for the first budget resolution establishing targets for fiscal year 1978 but not this committee amendment. I am deeply skeptical about a process of budgeting that less than 6 weeks ago convinced me and the majority of both Houses that our economy required immediate stimulative action to offset another recession, and that our expenditure ceilings had to be raised and our revenue floor lowered to accommodate that need. In January of this year, economists of various persuasions were all saying that unless immediate action was taken by the Federal Government, lagging consumer demand would contribute further to the high unemployment rate that has persisted for almost 3 years. But lo and behold, with one Presidential puff, he blew the House down.

After a massive propaganda effort to convince Members of Congress of the urgency of stimulative action in the form of tax reductions and rebates, the President announced, without any consultation with the overwhelming majority of the Members of Congress, that the $50 rebate was no longer needed. The President's action took not only Congress by surprise, but also members of his own administration.

Under the separation of powers, the President, I suppose, is free to do this. What concerns me is how quickly and

easily we capitulated, both times. It makes it appear that we are no more than a rubber stamp in that we say, "here's your economic stimulus program, Mr. President, whatever you want," and then say, "thank you, Mr. President, for taking it away."

I have heard the same economists rationalize the need for stimulus and then the need for no new stimulus, defending both positions with essentially the same economic data. The simple facts speak for themselves, however. Our jobless rate is unconscionably high, our rate of economic growth is needlessly low, our industrial capacity is underutilized, and the threat of inflation is no greater now than it was a month ago.

The rebate which was embodied in our third resolution for fiscal year 1977 was aimed at gently lifting our growth trajectory in an attempt to deal more forcefully with this society's foremost problem—unemployment. As such, this feature was never intended as a quick fix, but rather as part of a longer term strategy to promote employment by raising consumer demand and confidence.

It is still my firm conviction that our economy needs substantial fiscal stimulus to maintain a strong growth rate and to reduce unemployment. The rebate seemed like the ideal tool—it would have provided added purchasing power for low- and middle-income families, thereby helping those most in need. It would have helped to offset added fuel bills and rising food prices which will continue to siphon off consumer purchasing power; it would have proven more equitable than our amended stimulative efforts since now too large a portion of the tax reduction will be going to busineses; and it was temporary in nature. In addition, these present levels of unemployment and idle capacity are of significant magnitude such that it is highly unlikely the rebate would have added to inflationary pressures. Therefore, I am troubled by this all too eager flip-flop in overall budget policy represented by the Budget Committee amendment to this resolution adding a fourth title which in effect amends the third budget resolution for fiscal year 1977.

I believe our budget process must be capable of producing sound, independent judgments about the appropirate action which Congress should follow, regardless of which political party occupies the White House or for that matter which party controls the Congress, if we believed we were right. I will say it directly. Had President Ford done the same thing, we would not be so passive and complacent.

If the American people are to have confidence in the congressional budget process, and in our capacity to manage the economy, we cannot tilt at every windmill. I believe that all we have accomplished here is to demonstrate to the American people, many of whom believed that very modest tax relief in the form of a $50 rebate would be available to them, that our promises are empty.

Despite these very serious and profound reservations, reservations which may test the survival of the budget process itself, I am able to find sufficient substantive proposals there to justify an affirmative vote on our first budget resolution.

Mr. CONYERS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, before this amendment rushes to judgment I would like to inquire if any Member, including the committee chairman, can tell me what happened to the other part of the original stimulus package.

Apparently we have determined that the rebate of $50 per capita to the citizens of this country would indeed be inflationary, and that it is unnecessary at this point. But am I to understand that the employers, the manufacturers, and the corporation heads of this country are now in a position where their part of the stimulus package will be protected? Will it be protected, will it be ignored, or will it be safeguarded?

Ms. HOLTZMAN. Mr. Chairman, will the gentleman yield?

Mr. CONYERS. I yield with pleasure to the gentlewoman from New York.

Ms. HOLTZMAN. Mr. Chairman, I understand the gentleman's impatience, but I am pleased to inform him that I am prepared to seek recognition and offer an amendment to strike out the funds for tax credits to business.

Mr. CONYERS. Mr. Chairman, I thank the gentlewoman, and I assure her that I will, of course, support that.

Mr. Chairman, may I inquire further as to the logic of the committee's determining in its ultimate judgment that the citizens will be deprived of their $50 per capita, but that the part that was to stimulate the business community, which apparently we were all willing to go along with, did not rise to the dignity of the committee's determination that it ought to be stricken? Could the committee chairman enlighten me on this point, please?

Mr. GIAIMO. Mr. Chairman, I would appreciate having the gentleman repeat his question.

Mr. CONYERS. I will repeat it. I understand it is complicated.

Mr. Chairman, the question is this: Why did the committee apparently in its collective judgment determine that the $50 rebate would be overstimulating to a rising economy and yet the benefits that were attached to the stimulus package for the benefit of the corporations should not reach that same level? Are we in a position that we are doing well enough not to reward the citizens but not so well that we should take away the benefits to the corporations?

Mr. GIAIMO. Mr. Chairman, will the gentleman yield?

Mr. CONYERS. Yes, I yield with pleasure to the chairman of the committee.

Mr. GIAIMO. First of all, Mr. Chairman, it was not the desire of the committee to eliminate the $50 payment.

The gentleman will recall that this committee authorized it in the Third Budget Resolution for fiscal 1977.

Mr. CONYERS. Right.

Mr. GIAIMO. We thought it was good, proper, and necessary to do that to stimulate the economy. Many of us think it still is, but we are now faced with the realities of life in that the President has said he is not going to pursue the rebate. The other body obviously is not going to implement it. Therefore, we are left with the situation where we have provided for a $50 rebate which is not going to take effect, but which is going to result in available revenues in fiscal 1977 in the neighborhood of $7.3 billion in revenues and $3.2 billion in expenditures, a total of $10.5 billion.

We do not think that that kind of available revenue ought to be kicking around the halls of Congress because we think it could lead to all kinds of pet ideas for tax cuts for various individuals, causes, or groups. We do not think that we ought to have tax reform in that way.

What I am saying is that I do not want to see a Christmas-tree approach to a tax bill.

Therefore, we consulted the Committee on Ways and Means and discussed this matter very carefully with the Committee on Ways and Means chairman. He is prepared to go along with the removal of the rebate in the amount of $10.5 billion. However, the chairman indicated that he would like to have some flexibility as to the remainder of the revenue provided in that legislation. This includes the business tax, both versions—the investment tax credit, the payroll credits, and some other items.

For that reason, we did not take that out.

Mr. CONYERS. Mr. Chairman, if I can recapture some of my time, could the chairman indicate how much of the employers' benefits in the original stimulus package presently remain intact?

Mr. GIAIMO. If the gentleman will yield further, there is $900 million for the business tax—I believe that is the total amount for the business tax—that is still in the tax package. That is being debated, as the gentleman knows, in the other body at the present moment. In fact, they voted not to remove such provisions; therefore, they are in both tax bills, in the bill of our Committee on Ways and Means and in the bill of the Committee on Finance of the other body. That is why we did not remove it, because they are in both of those bills.

The CHAIRMAN. The time of the gentleman from Michigan (Mr. CONYERS) has expired.

(On request of Mr. GIAIMO and by unanimous consent, Mr. CONYERS was allowed to proceed for 5 additional minutes.)

Mr. CONYERS. Mr. Chairman, I appreciate this colloquy, and I do not want to consume too much time; but the explanation, then, from my distinguished colleague, the gentleman from Connecticut (Mr. GIAIMO), is that because the President withdrew the $50 per capita stimulus and because the other body has not determined that it would remove the corporate benefits and also because the chairman of the Committee on Ways and

Means in this body has determined that that should not be removed, means, in effect, that the Committee on the Budget has little choice but to leave it in; is that correct?

Mr. GIAIMO. If the gentleman will yield, let me say to the gentleman that the Committee on the Budget could vote to remove it; but we are faced with the situation where this House has voted to leave in the business tax, albeit it was tied to the $50 rebate at the time. However, the other body has voted to leave in the business tax credit; and since both bodies have got it in and since they will have to go to conference and resolve it, it would not be wise, it seems to me, for the Committee on the Budget to block the Committees on Finance and Ways and Means from making a determination. Ultimately, it would not be the committees; it would be this body and the other body that would make a determination as to whether or not, in fact, they want to leave in that business tax credit.

I do not think it would be wise for the Committee on the Budget to chop it off right now and say, "No, you shall not even consider it. We will not make it in order."

That is why we left it in.

Mr. CONYERS. Mr. Chairman, this puts me in a pretty difficult position.

It is clear that the chairman of the committee has been indeed sympathetic to the problems of creating jobs and full employment, but how am I going to explain in the First District of Michigan, where the unemployment rate, the real unemployment rate, happens to be in excess of 20 percent, where the young people are unemployed at an increasing amount of over 50 percent? Should I tell them that because of the machinations of the various committees, the employers are still entitled to their benefits, but that the $50 rebate which many people relied on would not stimulate the economy at all? Some of these people are still paying their heating bills from the winter, and many others are in fact unemployed persons. It puts me in a very difficult position, to say the least, if I were to go along with the committee.

Mr. GIAIMO. Let me say, to go a little further that it put us in a difficult position to have the money available in the third budget resolution, the $50 rebate, and then have it cut off. And I am not pleased. Frankly I think it may be necessary as a stimulus. But I bow to major forces both in the other body and down at the other end of Pennsylvania Avenue. Quite frankly I do not think we are going to get the $50 rebate.

AMENDMENT OFFERED BY MS. HOLTZMAN TO THE AMENDMENT OFFERED BY MR. GIAIMO

Ms. HOLTZMAN. Mr. Chairman, I offer an amendment to the amendment.

The Clerk read as follows:

Amendment offered by Ms. HOLTZMAN to the amendment offered by Mr. GIAIMO: In the matter relating to the recommended level of Federal revenues strike out "$355,000,000,000" and insert in lieu thereof "$355,900,000,000";

In the matter of relating to the amount by which the aggregate level of Federal revenues should be decreased strike out "$3,300,000,000" and insert in lieu thereof "$2,400,000,000";

In the matter relating to the amount of the deficit strike out "$59,250,000,000" and insert in lieu thereof '$58,350,000,000";

In the matter relating to the appropriate level of the public debt strike out '$707,970,000,000" and insert in lieu thereof "$707,070,000,000."

Ms. HOLTZMAN. Mr. Chairman, this amendment is intended to deal with the problem that has just been discussed. It eliminates $900 million in the third budget resolution for fiscal year 1977 for business tax credits.

Specifically, the amendment increases revenues by $900 million, and reduces the deficit and the national debt by $900 million.

The effect of this amendment is simply to prevent the enactment of the investment tax credit, and/or the so-called employment tax credit in the amount of $900 million that was contained in the third budget resolution.

The basic reason I propose this amendment at this time is as a matter of equity. Originally the President proposed an economic stimulus package for fiscal year 1977. That package included tax rebates to consumers in the amount of $50 each and investment tax credits to business, as well as various job creation measures. The Committee on the Budget included all those items in the third budget resolution for fiscal 1977.

Now the President has called for the withdrawal of both the tax rebate, and the tax credits. The chairman of the committee, however, has asked only for the removal of the tax rebate from the budget resolution. We are thus left with the prospect that although the consumers of this country are not going to get a tax rebate, the business community will receive a $900 million tax giveaway in fiscal year 1977.

It seems to me, as a matter of equity, Mr. Chairman, that this should not be done. Originally the only reason for including the tax credits for business was as part of the overall package so that, while helping consumers through the rebate, the President could make a gesture to the business community to indicate sympathy for their plight as well.

Since we have eliminated the funds for the tax rebate, there is no reason left for the business tax credit.

Let me say also that, as a matter of substance, the proposed tax credits, in my judgment, are really unjustified. The credits might be justified as part of a stimulus package if they could directly create jobs, but I must say with all candor to my colleagues that these tax credits will not provide jobs; in my judgment, they will simply provide a windfall for big business.

The investment tax credit is already at 10 percent. The bill in the other body would raise it to 12 percent. Who would get the benefit of this investment tax credit if it were added? The giant corporations in this country, not the small businesses. Eighty percent of the investment credit will go to corporations, and 70 percent of that amount would go to two-tenths of 1 percent of the corporations with assets of over $100 million. In addition, the record shows that the investment credit does not stimulate investment when the economy is weak. It seems to me that the 10-percent credit we have already on the books is certainly sufficient—if it is needed at all.

Second, with respect to the so-called jobs tax credit that the House Committee on Ways and Means proposed and that the House adopted, there is similarly no evidence that it will in any way increase employment. It only goes to businesses that are already expanding, so that it may well constitute a windfall to such businesses. It does nothing for areas of the country where the economy is weak, and it does nothing for businesses in those areas as well. It will constitute an administrative nightmare for employers and for the Government.

I might say that if the tax rebate remained to the consumers and only the so-called jobs credit were at issue, it might be worth a try, but without the rebate and with the possibility of the investment credit proposed by the Senate, it seems to me that we cannot justify leaving in these windfalls for business. I would urge the adoption of my amendment.

Mr. Chairman, I yield back the remainder of my time.

Mr. MITCHELL of Maryland. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the amendment offered by the gentlewoman from New York (Ms. HOLTZMAN). Before speaking to the amendment itself, let me point out something that I think is going terribly wrong in this country. I think what is happening in the White House and in this Congress and on the Budget Committee is that we are beginning to treat the economic system as the master of the people rather than have that system be the servant of people. I think really that is something that we must look at within the context of the gentlewoman's amendment. Because that kind of thinking has developed, the American people have suffered incredible insults, indignities, and unfairness by past administrations and by this Congress. It strains credulity to me to assume that the people will continue to take some of the things that we cram down their throats. Maybe they will stop taking them one of these days. However, of all the unfair things, of all the indignities, I think this action by the Budget Committee today is the crowning indignity; and the action contemplated by the President is the crowning indignity; the action contemplated by the other body is the crowning indignity. This was a package we put together, which included a tax rebate, to help people. Now we have blithely and summarily dismissed that tax rebate, but at the same time we are going to keep in place tax credits for the major corporations in this country. How does one sell it? My colleague, the gentleman from Michigan, asks, How can we sell it? The answer is it is not sellable. It is simply not sellable. I would suggest to the Members that perhaps if they come from districts where people are hurting, they might

have read the letters that the people wrote back to them on the tax rebate: "I plan to pay my fuel bill from last winter." "I plan to try to get enough money together to see that my child graduates this year in the proper fashion." "I plan somehow or other to get caught up on my mortgage payments which have fallen behind."

The money was to be put to good use, but I think if the President and the Senate in their collective wisdom decided that the tax rebate must be foregone, then the people might accept this, were it not for the crass unfairness of giving to the major corporations, who had maximum profits last year, what can only be described as a tax break windfall. That is all that it can be described as.

This is unfair. I would hope the gentlewoman's amendment would prevail. Everybody has a toleration level for frustration, and if we keep on playing this double standard game with the American people we are going to see a reaction as a result of toleration level for frustration being exceeded. I strongly urge support for the gentlewoman's amendment.

I yield back the balance of my time.

Mr. LEGGETT. Mr. Chairman, I rise in opposition to the amendment. I think the amendment of the committee points up the problems that we have in trying to amend a budget resolution that affects a bill that is in conference or that shortly will be in conference, and now we have an amendment to that amendment and we are trying to anticipate the posture of the conferees. I think it is a very unwise thing that we do.

I think it would be wise were we perhaps to vote both of these amendments down. I happen to like the rebate program and I happen to like not so much the investment tax part of the program, but there is also a tax credit for creating new jobs. There are a number of the committee that tend to think that this latter item is an experiment in hiring people that has never really been tried in this country before.

The Senate has embellished the House bill by providing 50 percent rather than 40 percent credit for the first, $4,200 wages paid for each new job. That is a way whereby we can create new jobs for teenagers and it does not necessarily just give a windfall to those people who are planning to expand their tax base because it excludes the first 3 percent of increased wage base.

Mr. MITCHELL of Maryland. Mr. Chairman, will the gentleman yield?

Mr. LEGGETT. I yield to the gentleman from Maryland.

Mr. MITCHELL of Maryland. Mr. Chairman, I am having some difficulty following the logic of what the gentleman is saying. He is saying the bill will be in conference. He is saying the bill will be in conference and for us to take any action would be premature?

Mr. LEGGETT. The tax bill will be in conference.

Mr. MITCHELL of Maryland. The gentleman is saying that for us to take any action now might in some way jeopardize the conference? Is not the tax rebate portion still in conference too? Would not that portion also be in conference?

Mr. LEGGETT. Everything would be in conference.

Mr. MITCHELL of Maryland. All right. Then if it is going to be there, we will have already acted in the budget to knock it out. We should apply that same action to both parts of the bill.

Mr. LEGGETT. I have said I think it is wrong in both parts of the 1977 budget. I do not think it wise for us to have amended the third budget resolution the way we attempted to by the chairman's amendment.

Mr. GIAIMO. Mr. Chairman, if the gentleman will yield, I think the gentleman has to understand the $50 rebate is gone. The President is not going to implement it and with the strong opposition to it in the other body, combining those two factors, even though it would still be technically in conference it is just not going to take place. I wish it would. I think it is necessary.

As far as the business tax credit, it is in both House and Senate bills and therefore, most likely, that will be enacted into law in some fashion. We ought to leave that existing flexibility there because it is presently the subject of discussion between the House Ways and Means Committee and the Senate Finance Committee.

Mr. MITCHELL of Maryland. Mr. Chairman, if the gentleman will yield further, I thank the gentleman. It is clear now. We know what has happened. The fate of the little people has already been decided. The fate of the big corporations still has to be decided.

I thank the gentleman for yielding.

Mr. LEGGETT. I do not like to be put on the side of the big corporations. There is still some relief for the little people in the tax program which is still alive and I think it would be a mistake to take away from the discretion of the Ways and Means Committee their discretion on this amendment. I do not believe in the second amendment particularly and I believe the tax investment credit would not be a windfall.

Mr. ULLMAN. Mr. Chairman, will the gentleman yield?

Mr. LEGGETT. I yield to the gentleman from Oregon.

Mr. ULLMAN. Mr. Chairman, I think the conference is here, that we have just the corporation benefits remaining. The fact is, the biggest part of the package is the part having to do with the standard deduction. It is more than a $4 billion annual benefit that goes to all those that use the standard deduction. The gentleman's constituents will be the ones who will benefit in most part, the low- and medium-low income people. It is a major benefit. Now, the thing that is left in the job category is the new job credit. That relates to people. Unless business hires new people, they will get no credit.

Mr. SIMON. Mr. Chairman, I move to strike the requisite number of words. I rise in support of the amendment.

Mr. Chairman, I intend not to take the full 5 minutes.

Mr. Chairman, I rise in support of the gentlewoman from New York (Ms. HOLTZMAN). Perhaps the greatest phrase of many weeks of debate came from the gentleman from Maryland a few minutes ago when the gentleman said that our economic system should be the servant of the people. Somehow we have to forge the budget, these bills that pass, to help people. There are effective ways of doing that and there are ineffective ways of doing that. I happen to think that both the item that the gentlewoman from New York wants to knock out and the $50-rebate are ineffective ways to meet the problem.

I do not concur with my colleague, the gentleman from Ohio (Mr. LATTA), who earlier said the economy is in such great shape that we need a rebate. I do not think we need a rebate, because it is a very ineffective, inefficient way to give people jobs. I do not think we need this corporation tax deduction. It is an inefficient, ineffective way of giving people jobs.

We do have a long-range capital formation problem, but this does not address the problem.

Mr. Chairman, I think the amendment of the gentlewoman from New York is sound and I intend to support it.

Ms. HOLTZMAN. Mr. Chairman, will the gentleman yield?

Mr. SIMON. I yield to the gentlewoman from New York.

Ms. HOLTZMAN. Mr. Chairman, just to correct any misconception, my amendment in no way prevents the passage of those items relating to the standard deduction. Those are intact and my amendment in no way touches them.

Mr. SIMON. The gentlewoman is absolutely correct. That portion of the tax package still would remain a stimulus for the people of the Nation.

Mr. CORMAN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, first of all, I would like to be sure I understand from the Budget Committee what is left of all of the other tax proposals that were passed by the House, that had to do with increasing the minimum standard deduction.

Does our budget resolution contain the figures that were in the House bill or the ones that are in the Senate Finance Committee bill, because there is almost $2 billion difference in the two bills?

Mr. GIAIMO. Mr. Chairman, if the gentleman will yield, it does include provisions for the change in the standard deduction and the business tax credit, which is $900 million.

Mr. CORMAN. Mr. Chairman, I thank the gentleman.

We are going to be in conference on some issues over that. The Senate has a different view from our own. The President has a slightly different view from our own. I would hope the House would not unduly restrict our capacity in this matter of negotiating on the minimum standard deduction, because I know that the Senate has passed a minimum standard deduction which would increase taxes for some single heads of households. I hope we do not do that.

Mr. Chairman, to look, first of all, at the $50 rebate, it was obvious that was

never going through the other body. Now, it is not the first time this House has passed something that was good, but never became law. To castigate the President for his unwillingness to create a confrontation with the other body does not seem to me to be totally fair. He indicated to us when we took the matter up that relative speed was necessary because there was to be an effort to refund the $50 rebate with the 1976 tax refunds.

That would have meant that the bill would have had to be passed some time ago, but it is clear, as the chairman of the Budget Committee has said, that it is not going to be passed at all, ever. I think that decision was much more made by the other body than by the President.

As to the business credit provision, it seems to me that it does hold some real promise for hiring more employees. I do not particularly like tax incentives as a way to try to stimulate the economy, but I suspect that this will more precisely create new jobs. It will not be a windfall for large corporations, because it is limited to 25 employees. It is not limited to corporations, but to any employer who expands his employment.

I would hope that the gentlewoman's amendment would not pass, and I would also hope that we could stand firm on the House version of the tax provisions. If I thought there were a chance in the world that the rebate might get through the Senate, I would have a different view of it, and the chairman would not have made his proposal if there was any possiiblity otherwise.

Mr. TUCKER. Mr. Chairman, will the gentleman yield?

Mr. CORMAN. I yield to the gentleman from Arkansas.

Mr. TUCKER. I thank the gentleman, a distinguished member of the committee, for yielding to me.

I would like to ask the gentleman if he is aware, and if the Members are aware, that when the Senate made their changes in the employment tax credit, it was a little more than perhaps may have caught the eye, because they not only changed the percentage that would be available from the reduction for the first $4,200 in wages in the form of credit, but they also, if I understand it correctly, eliminated the provision which allows one to deduct those wages in the first place up to $4,200. So, the net effect for the marginal-type employer, of whom I think a majority of the members of the Ways and Means Committee were concerned with, if one wants to hire an employee—perhaps a teenager—and one is in the 25-percent bracket, because in the Senate provision one would have to then deduct $4,200 in wages, the credit he would get would exactly wipe it out, meaning that for small businesses the Senate provision provides absolutely no incentive. Once more, it is an effort to take care of the biggest business in the country, and that is all.

If we adopt the Senate provision either in conference or as part of this process, which will then go to conference, we have once more done away with the rebate and ignored the average man, the workingmen in this country, and will have taken care of big business again and again and again.

Mr. OBEY. Mr. Chairman, I move to strike the last word, and I rise to support the amendment.

Mr. Chairman, I take the floor as a Member of the House who believed originally, and still believes, that the entire stimulus package as first recommended by the President was essential. In fact, my own judgment is that it is probably too timid to adequately deal with our economic problems.

I do not frankly know whether the Senate would have passed the rebate if the President had determined to stick with it or not, but I really believe that the main reason for abandoning it is because there is a serious effort on the part of the administration to achieve some kind of business confidence. I can understand their efforts in doing that. I frankly do not know how to do it, because I am mystified as to how we generate confidence on the part of the business community, given the many misleading economic myths to which many people subscribe these days.

But, I would really suggest that if they are right, in fact, to try to obtain business confidence in this manner then at least, given the businessmen I know, they would have a greater degree of confidence in the actions of this Congress were we to reduce the deficit as much as we can. I think they want that deficit reduced. If my businessmen are reflective of the businessmen across the country, I think they want that good old deficit reduced more than they want some good old additions to the investment tax credit or the new employment tax credit suggested by the Ways and Means Committee on this side of the Capitol.

I would also suggest that, given the occasional ability of the Finance Committee on the other side to do things which nobody else in the world can figure out, it would be in the interest of anyone in this House who wants to preserve maximum flexibility for our Committee on Ways and Means to accomplish tax reform further down the line, to knock out this item at this time.

Very frankly, I have probably changed my mind on this item about every 5 minutes. I have not known technically what is the best thing to do. I have not known substantively what is the best thing to do. But I think this whole budget resolution is surrounded far more by myth than by reality—in terms of the economic wisdom we bring to its consideration. I think we would be far better off, if we go all of the way, take out all the money, and reduce the budget as far as we can in the third budget resolution. I urge, in the interest of reestablishing business confidence, that we adopt the amendment of the gentlewoman from New York.

Mr. GEPHARDT. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman and members of the committee, I rise in favor of this amendment. As a new member of the Committee on Ways and Means, I sat for a couple of weeks in hearings before that committee on the Carter stimulus package and listened to the reasoning given by a variety of witnesses as to why that package should be passed. I think it is absolutely imperative that, as we consider this budget resolution, we take from the budget the authority to include within it moneys for the investment tax credit or the employment tax credit which, apparently, has been included.

I would like to read for the Members some testimony from economic adviser Charles Schultz, who testified before our committee, about how this package was an integrated package which was to stimulate the economy. He said:

> The investment credit component of the President's proposals is also designed to increase investment. Nobody can argue that the addition of 2 percentage points to the credit will revolutionize investment behavior. Of course it will not. By itself, and without an expansion in sales and capacity utilization, the additional investment credit would not elicit much extra investment. But in the context of a steady expansion in sales, and growing confidence in the sustainability of the recovery, a modest increase in the investment credit should add its contribution to the set of factors generating an expansion in investment.

I think the last phrase is very telling, because it says that the investment tax credit is one factor in an integrated set of factors designed to stimulate the economy. The President has said and his advisers have said, in taking the rebate out of the package, that the economy now is not in need of stimulation.

Either it is or it is not. If it is—and I think we have to assume that it is—then I think it only makes sense, it is only logical, to take out other parts of the integrated package that was designed to stimulate the economy.

Mr. Chairman, I would like to make one final point. Other witnesses who talked about the investment tax credit from business made it very clear that more important than the amount of tax credit was the fact that they wanted the investment tax credit to be level and steady and permanent.

And they say that the business of fluctuating it between 10 and 7 and 12 percent has been no help to business.

Mr. Chairman, I think that is just one more reason why, in considering whether we want to stimulate the economy, we should indeed take out the portion that relates to an investment credit.

The employment tax credit, I think, has been a very good idea. It is a noble experiment, and I commend the chairman of our committee for having brought it into this economic package. As the Members know, the Carter package did not include that aspect; it only included the investment tax credit. I think it is very important, as we go along, if we want to give incentives to business and if we feel the logical underpinnings to do that are present, that we give incentives to labor-intensive industry as well as to capital-intensive industry. I hope that in the future, if we decide to

do that, we will make that a part of any investment stimulus package we put together.

To return to the central theme of what I have said, the logical underpinning for all of this stimulus package was that the economy was not generating. President Carter and his advisors say now it is generating sufficiently. If it is—and I think we have to assume it is—then not only should the rebate go but the other aspects of the Carter stimulus package should also go. We should wait for a day when we do need economic stimulation to put together an integrated economic package that includes incentives for capital investment and investment in new jobs.

Mr. ULLMAN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I hope that this amendment will not carry. This is not the proper forum, it seems to me, to make the decision about a stimulus package.

President Carter has withdrawn the rebate; that was not our doing. It is fait accompli; it is dead. There will be no rebate, and there is no way we can revive it. The President has veto authority, and if he does not want it, there is no reason why we should send it to him.

The other parts of the package are very defensible. I hate to disagree with my good friend on the committee, the gentleman from Missouri (Mr. GEPHARDT), on this. The balance of the package, including the extension of tax reductions that we put into effect 2 years ago, are absolutely vital. If we allow a tax increase next January, it would in my judgment be disastrous. That is a very important part of this package.

A second very significant part of the package is the major simplification reform in the standard deduction item. This does help poor-income people, middle-income people, all the people who do not have deductions, the people who take the standard deduction. It is a major tax improvement for a vast majority of Americans who file tax returns. It does affect the poor working people, and it affects them much more heavily than any other segment of the economy. So that is something that is extremely worthwhile and worth doing.

The part of the package that the gentlewoman from New York (Ms. HOLTZMAN) attempts to strike has to do with the business stimulus. Let me say that what we did in the House was not something to help corporations as much as it was to help people. It applies to all businesses across the board. We have limited it to 25 members. We have put the emphasis on small business. We have given a major reduction of 40 percent for newly hired people up to the figure of 4,200. These figures relate to all business, and that makes it easy to implement. This is an innovative new approach to taxation. It does relate to people. It only comes into play when people are hired to new jobs in the current year.

Mr. Chairman, it seems to me that when we are looking at a tax system that is a little less than innovative, we should recognize that this is the kind of an approach to the problem that is people oriented and people related. It is something that is very well worth trying.

Mr. Chairman, I hope that this amendment is defeated and that we can go into the conference and work our will, fight for the House provisicn and come out with a significant and a constructive stimulus package.

Mr. TUCKER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, as a member of the Committee on Ways and Means, I plan to vote in favor of this amendment. I am going to vote in favor of it not because I approve of the portion of the amendment that strikes the House version of the employment tax credit, because I think that is a valuable approach, and it is one that I hope very much the conferees on the tax bill can retain in conference. However, I think it is absolutely imperative that in some manner we express ourselves in the strongest way to the other body that this House will not tolerate granting an increase in the investment tax credit, the amount of business credits available, while at the same time striking the $50 rebate.

It is not fair. It will not sell in Peoria; it will not sell in Little Rock; and I believe it will not sell in any of our districts.

Therefore, Mr. Chairman, I hope we will pass this amendment. I think—and I hope I will be corrected if I am wrong—that this will not in any way infringe on the ability of the House conferees on the tax bill of the Committee on Ways and Means to still reach an accommodation so as to include provisions for the House-passed version of the employment tax credit.

Mr. ULLMAN. Mr. Chairman, will the gentleman yield?

Mr. TUCKER. I yield to the gentleman from Oregon, the distinguished chairman of the Committee on Ways and Means.

Mr. ULLMAN. Mr. Chairman, the business tax provisions in the House-passed tax stimulus package extend beyond fiscal year 1977. This relates only to a small piece of the action.

Because it is in both the Senate and House versions, we would come out of conference with the whole package. There is no way in which we can fail, in conference, to accept provisions that have been adopted by both the Senate and the House. These are locked in. We would work our will.

Mr. Chairman, the gentleman voted for amendments that were small business-related. The package on new job credits that came out of our committee was fully supported by him. It is an excellent package. He made a good statement on its behalf, I believe; and it will be just as effective when it comes out of conference as before.

We will fight for the House version. It is meaningful and it is innovative. It is locked in when it goes to conference; and even if this were done, it would not knock it out because we would have the full impact of the forthcoming year, which is not included in this amendment.

Ms. HOLTZMAN. Mr. Chairman, will the gentleman yield?

Mr. TUCKER. I yield to the distinguished gentlewoman from New York.

Ms. HOLTZMAN. Mr. Chairman, I thank the gentleman for yielding.

I would just simply say that if my amendment were to succeed with respect to fiscal year 1977, I assure the gentleman that I would do it with respect to fiscal year 1978 when the amount increases from $900 million to $2.4 billion.

Mr. TUCKER. Mr. Chairman, let me inquire of the gentlewoman from New York (Ms. HOLTZMAN) whether she will engage in a colloquy with me on this point.

Is the proposal of the gentlewoman from New York not only with respect to the investment tax credit, but with respect to any form of jobs credit, such as is in the original House-passed version?

Ms. HOLTZMAN. If the gentleman will yield, I personally think that the investment tax credit is absolutely, totally unjustifiable, and the House tax credit only unjustifiable; but my amendment would knock out the $900 million which could be used to finance either the House version or the Senate version of the bill.

Mr. LEGGETT. Mr. Chairman, will the gentleman yield?

Mr. TUCKER. I yield to the gentleman from California.

Mr. LEGGETT. Mr. Chairman, the gentleman in the well points up the danger of amending this resolution as we are.

By his position, the gentleman indicates that he supports the House position on the jobs credit; he has also indicated that he supports the amendment of the gentlewoman from New York (Ms. HOLTZMAN).

In supporting the gentlewoman's amendment, theoretically we would have no discretion in conference to prevail with respect to the House position on the jobs credit program because if the other body bought this budget resolution, the authority would be taken out.

Therefore, to be consistent, we really have to follow the gentlewoman's amendment and retain the authority of the House so that our position can prevail in conference.

Mr. TUCKER. I understand that, and I appreciate the gentleman's comments.

However, I want to refer to the comments of the distinguished gentleman from Maryland a moment ago.

I do not believe there is any way in which I can explain the machinations of this to the people of my State. I know that there are probably some rules and strategies that might help it to work in that way. However, as I was telling the chairman of the Committee on the Budget a moment ago, if this investment tax credit is left in here, I may have to vote against the entire budget resolution.

The CHAIRMAN. The question is on the amendment offered by the gentlewoman from New York (Ms. HOLTZMAN) to the amendment offered by the gentleman from Connecticut (Mr. GIAIMO).

The question was taken; and on a

division (demanded by Ms. HOLTZMAN) there were—ayes 22, noes 24.

RECORDED VOTE

Ms. HOLTZMAN. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 109, noes 302, not voting 22, as follows:

[Roll No. 153]

Messrs. STEIGER, SARASIN, COHEN, and Mrs. FENWICK changed their vote from "no" to "aye."

Messrs. CARNEY, MEEDS, BREAUX, PATTEN, FORD of Michigan, DANIELSON changed their vote from "aye" to "no."

So the amendment to the amendment was rejected.

The result of the vote was announced as above recorded.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Connecticut (Mr. GIAIMO).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. PIKE

Mr. PIKE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. PIKE: In the matter relating to the appropriate level of total new budget authority strike out $500,764,000,000" and insert in lieu thereof "$500,757,000,000";

In the matter relating to the appropriate level of total budget outlays strike out "$463,864,000,000" and insert in lieu thereof "$463,857,000,000";

In the matter relating to the amount of the deficit strike out "$65,770,000,000" and insert in lieu thereof "$65,763,000";

In the matter relating to the appropriate level of the public debt strike out "$792,100,000" and insert in lieu thereof "$792,093,000,000".

In the matter relating to the amount by which the statutory limit on the public debt should accordingly be increased, strike out "$92,100,000,000" and insert in lieu thereof "$92,093,000,000."

In the matter relating to General Government (800) strike out "$3,898,000,000" in budget authority and insert in lieu thereof $3,891,000,000"; and strike out "$3,998,000,000" in outlays and insert in lieu thereof "3,991,000,000."

Mr. PIKE (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

Mr. BAUMAN. Mr. Chairman, reserving the right to object, I would ask the gentleman for an explanation, since we will not have the amendment read.

Mr. PIKE. Well, the reading of the language is not going to be terribly revealing. All that the language which the clerk would read does is cut the sum of $7 million from each number in the budget resolution.

Mr. BAUMAN. I assume the gentleman has a purpose for this in mind?

Mr. PIKE. I do.

Mr. BAUMAN. Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. PIKE. Mr. Chairman, during the general debate on the budget resolution, when almost no one was here as we discussed a half trillion dollar budget, I said that one of the things that this body is going to have to learn to do is say no to worthy causes if we are ever going to achieve a balanced budget.

The worthiest cause that most of us can think of is ourselves. What I am going to ask the Members to do in the next few minutes is say no to themselves. Perhaps the toughest thing I am going to ask them to do is to ask their knees, which are going to be arguing the other way, to lift their bodies, which do not want to be lifted from their chairs, so that we can get a record vote on this amendment.

All that this amendment does is to remove from the function known as "general government" the sum of $7 million which is what the pay raise, the 29 percent pay raise for 537 Members of the House and Senate, costs. That is all it does. It removes $7 million from the general government function.

We have now told the average taxpayer of the United States of America that it would be inflationary to give him back $50, and I am just asking the Members to say that they can do without a $12,900 raise.

Mr. Chairman, I reserve the balance of my time.

AMENDMENT OFFERED BY MR. LEGGETT TO THE AMENDMENT OFFERED BY MR. PIKE

Mr. LEGGETT. Mr. Chairman, I offer an amendment to the amendment.

The Clerk read as follows:

Amendment offered by Mr. LEGGETT to the amendment offered by Mr. PIKE: In the matter relating to the appropriate level of total new budget authority strike out "$500,757,000,000" and insert in lieu thereof "$500,627,000,000";

In the matter relating to the appropriate level of total budget outlays strike out "$463,857,000,000" and insert in lieu thereof "$463,727,000,000";

In the matter relating to the amount of the deficit strike out "$65,763,000,000" and insert in lieu thereof "$65,633,000,000";

In the matter relating to the appropriate level of the public debt strike out "$792,-093,000,000" and insert in lieu thereof "$791,963,000,000";

In the matter relating to the amount by which the statutory limit on the public debt should accordingly be increased, strike out "$92,093,000" and insert in lieu thereof "$91,963,000,000".

In the matter relating to allowances strike out "$1,069,000,000" in budget authority and insert in lieu thereof "$939,000,000"; and strike out "$1,021,000,000" in outlays and insert in lieu thereof "$891,000,000".

Mr. LEGGETT (during the reading). Mr. Chairman, I ask unanimous consent that the amendment to the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. LEGGETT. Mr. Chairman, the amendment, in effect, goes to the whole litany of receipts, disbursements, national debt, and it would change the numbers that the gentleman from New York (Mr. PIKE), would amend by his amendment.

The Pike amendment relates only to U.S. Congressmen and Senators and comprises a total amount of $7 million of savings. I do believe that over a period of time the U.S. Congress and the Senate have assumed a posture in relation to overall governmental activity. We relate to the President and the Vice President, and we have rated in the past below them. We have related to the Chief Justice, to the Associate Justices, and to the level 1, the Cabinet officers, and we have rated below them. But with respect to virtually everybody else we have generally been paid higher in the Congress—the Justices of the Circuit Court of Appeals, now make $65,000, the Court of Claims Justices, $65,000, the Court of Military Appeals Justices, $65,000, the Court of Customs and Patent Appeals, $65,000, the U.S. District Court Justices, $62,000, the Customs Court, $62,000, Tax Court Justices, $62,000, executive level 2; that is, the Assistant Secretaries, who are making $60,000, the Comptroller General, $60,000—all of these people, at least in the executive branch, under the normal rules of protocol we can ask that they come to our offices to explain administration programs; that's protocol.

Then we have executive level 3—that is, Deputy Assistant Secretaries. They are making $57,000. We have the Assistant Comptroller, who makes $57,000, the Director of Administrative Offices, $57,000, the General Counsel, GAO, $53,000, the Librarian of Congress, $53,000, the Public Printer, $53,000, the Capitol Architect, $53,000, the Commissioner of the Court of Claims, $53,000, the Bankruptcy Court Justices, $53,000, the Deputy Public Printer, $49,000.

And so I think if we want to retain the proper posture, all of these people ought to be scaled down too. It involves some 22,000 Federal employees, and the savings that we could effect in our overall budget is not the $7 million pointed up by the gentleman from New York (Mr. PIKE), but it would be an additional $130 million. So the amendment to the amendment would include all of these people, would scale them all back down, and it would relate to a considerable number of GS–18's and perhaps GS–17's. The Members will recall that before we passed this decompression amendment with respect to Congress, or took that action, we had at one point GS–14's, GS–15's, GS–16's, GS–17's, and GS–18's in various stages all making exactly the same amount of money.

If we want to go back to that position, let us be fair and square about it. Let us not be utterly myopic about $7 million. Let us bring everybody in, make this a $137 million overall amendment, and then let us vote it up or down.

Mr. BIAGGI. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I have listened to both amendments, and it does my heart good to hear this discussion. I am not going into the merits of the amendments at this point. That is a determination that will be made by this assembled body.

What heartens me is that this new-found ethics of ours is finally working its will. We are bringing the issue of salary increases right out in the open where the Members of the House of Representatives can either vote them up or down, depending upon the amount of courage or lack of courage they possess.

The question I ask myself, depending on whether these amendments are agreed to, is this: Are we more or less ethical at $44,000 than we are at $57,000? That is a question to which I do not have the answer, because this new-found ethics that has worked its will in this House of recent vintage still has not permeated the entire fiber and structure of this Congress.

Mr. Chairman, I would like to see more time and experience and conduct of this nature manifest itself before I could properly assess this issue. But as for myself, I am grateful to the gentleman from New York (Mr. PIKE) and even more grateful perhaps to the gentleman from California (Mr. LEGGETT) for at least taking this single first step.

Mr. FLOWERS. Mr. Chairman, will the gentleman yield?

Mr. BIAGGI. I yield to the gentleman from Alabama.

Mr. FLOWERS. Mr. Chairman, could my distinguished friend, the gentleman from New York, tell me how he is going to vote on this issue? I remember getting his "Dear Colleague" letter and reading it with much interest, and a lot of us are looking for some direction, but it still is not clear to me how the gentleman intends to vote.

Mr. BIAGGI. Mr. Chairman, I feel flattered that the gentleman from Alabama (Mr. FLOWERS) has asked me for direction. I sincerely hope that he will follow my lead, but it is not my purpose to persuade any Member one way or the other.

Mr. FLOWERS. I just want to know what way the gentleman is going.

The late Representative John Rankin once told the story in debate about the old farmer who was passing the cemetery and noted a new gravestone for his recently departed neighbor. He read it with interest:

> Hark ye stranger passing by
> As you are now, so once was I
> As I am now, so you will be
> Prepare for death, and follow me

Well, the old farmer had known his neighbor quite well, so he took out his pencil and added beneath the epitaph the following:

> To follow you, I'd not consent
> Unless I knew which way you went!

Mr. BIAGGI. I know how I am going to vote, but the important thing is to stress the ethical quality of our undertaking.

Mr. DENT. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, it has been said many times that fools walk in where angels fear to tread. I never knew there were so many angels among so many fools.

Mr. Chairman, this is not a new role for me. I have taken this kind of position for about 18 years, not including time in the State senate; and in all those years there were many loudly disclaiming and very few proclaiming that we needed salary increases.

Mr. Chairman, I can honestly say that I know Members who never voted for a salary increase and never refused one.

I do not believe on going ahead on somebody else's prayers. I figure that if I cannot pray for myself, then I will go to hell where I belong.

Mr. Chairman, I believe the time has come when we should face up to the issue. As far as I am concerned, very frankly, I do not need it as much as I did when I led the fight to take care of a family when my salary was $1,500 a year.

Mr. Chairman, this is the most responsible job in the United States of America for untrained, nonprofessional experts in a field in which persons obtain training and become professionals in this body if they stay long enough.

We are the common run of America, or, at least, we were until a few years ago. We are the men and women of the many streets, of the valleys, of the hills, of the alleys, of the high-class districts and the lower class districts that populate this

great Nation, and have done so since its beginning. Somehow we have been able to mold an organization representing all the people, and over the last 200 years we forged ahead greater distances in less space of time than have any other organized peoples on the face of the Earth.

Mr. Chairman, there are many here I know personally who need every nickel they can get; but they are faced with a decision to make. They will serve just a few terms, if that. They have now left their connections which they had before they came here, and they should have a right to expect something because of this cost of living, this great inflation which attacks all of us in our lifetime. They should expect some security because all costs, the cost of business and the cost of labor, are rising.

However, so long as we have those who will take the money and not stand up to vote for it, those deserving and needing it most will have to vote with them.

Mr. Chairman, perhaps I lose the most by voting the way I have over all the years; but somehow or other, is it not strange that the same persons who voted for me for 47 years just voted for me again?

Mr. Chairman, if I felt we needed something to give courage to men and women to stand up to the reality of life, why does it seem so important that a person, for instance, making $12,000 a year was just suddenly brought into Government just the other day with no specific training for the new position and the new title?

One person I knew was in attendance at the Committee on House Administration, sitting there over 3 or 4 years. This person I refer to making $12,000 a year was brought into Government, into the executive branch, last week at a salary of $52,000 a year.

Mr. Chairman, it has been said by a wiser man than I, a much wiser man, that when a man talks, few listen and fewer hear him.

That is the problem. This is a very serious matter. Do we have the love of all so great within us that we would rather be elected and serve in this body and stand up for that which we should stand up for?

Mr. Chairman, the cost of living has gone up for the families of every Member of this House, as it has for everyone else around here, everyone sitting here or standing on this floor.

The CHAIRMAN. The time of the gentleman from Pennsylvania (Mr. DENT) has expired.

Mr. WRIGHT. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the Pike amendment. I am going to vote against the Leggett amendment, too, but I believe the Leggett amendment is better than the Pike amendment.

If the Pike amendment should be adopted without the Leggett amendment, the Supreme Court Judges would be making $27,400 more than Members of the Congress. Do we want further to aggrandize the Court and further to denigrate the Congress?

Hundreds of subcabinet appointees will be paid from $2,900 to $12,900 more than Members of the Congress. Do you want further to aggrandize the bureaucracy and denigrate the Congress?

If the intent of the Pike amendment were carried out, some congressional staff personnel would be making more than Members of the Congress.

I know that some of the Members find it hard to go home and justify the recent pay increases to the public because some apparently felt there ought to have been a vote on it. Maybe there should have been.

If all you promised to do was to get a vote, then here is your chance. You can vote today. Some of you may even have promised to vote against it. I hope you did not do that. If you did, I can understand it, but I wish you had not done so.

You know what is right. You know that Congress has not had a pay raise of any substance since 1969. The cost of living has gone up 65 percent since then. Do you think 29 percent is too much? The reason the increases came to 29 percent is because we kept turning down those 5 percent increases when they came along.

We already have voted not to accept the next cost of living increase. We have already agreed to have a vote on any future increase. We will have to vote for or against them. Is that an insufficient demonstration of good faith? It may be 20 years before Congress will muster the courage to accept another increase.

Some Members want to vote against an increase but to receive it. Some want to receive public credit for self-abnegation but to receive the increase. Some want the Senate, or the leadership, to save them from themselves.

Let me say this to my friends, do not count on somebody else doing it for you. Have the courage to stand up and be for it, if you are for it. And I am for it.

Yes, I know that the 29-percent has been criticized by some in the media. Since 1969, average wage and salary increases have come to some 80 percent for the news media, to some 70 percent for blue collar workers in general, to some 66 percent for civil service workers to grade 15, to some 59 percent for business executives, to about 55 percent for white collar workers, and to about 40 percent for governors and other top State officials.

My dear friend OTIS PIKE is piqued at Congress.

I regret PIKE's pique. He is disturbed with us and understandably so perhaps because of the limits we established on outside earnings in our ethics reform. He made that quite clear at the time. But, nevertheless, it just is not defensible morally or politically for us to take the position that, since Members are not permitted to make extra money from outside sources while serving in the Congress, we should deny our colleagues the right to make an appropriate income commensurate with our responsibilities on the inside.

We said in behalf of what we did earlier this year in passing the ethics bill that this is a full-time job and that it deserves the full-time, total and undivided efforts of our Members.

The pay increase therefore is a logical companion piece with the limitations we imposed in the ethics bill. I think this is what people are going to respect us for doing. They are not likely to respect us if we do not respect ourselves or the work that we perform.

In the entire history of the Republic, there have been 11 increases voted to Members of the Congress. The increases were 33 percent in 1818, 138 percent in 1856, 67 percent in 1866, 50 percent in 1907, and others including an 80-percent increase in 1955 and 42 percent in 1969.

I see the gentlewoman from New Jersey standing seeking recognition. I think most of us know about how much the gentlewoman is reputed to be worth, and I congratulate the gentlewoman for that. But I do believe we ought to make it possible for people to serve in this Congress who do not have independent wealth.

There have been 11 increases in history, and if anyone thinks a 29 percent increase is too much, only one—only one—was less than 29 percent in the history of Congress.

Mrs. FENWICK. Mr. Chairman, will the gentleman yield?

Mr. WRIGHT. Not at this moment.

I want to say one thing to my collegaue, the gentlewoman from New Jersey (Mrs. FENWICK). I hope I have not offended the gentlewoman. I really do not intend to, and I have great respect for the gentlewoman. But I earnestly implore her to recognize that there are others who do not have great personal wealth and who ought to be permitted to serve in the Congress.

The CHAIRMAN. The time of the gentleman has expired.

Mr. WRIGHT. Mr. Chairman, I ask unanimous consent that I be allowed to proceed for 2 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

Mrs. FENWICK. Mr. Chairman, I will object.

Mr. WRIGHT. I will yield to the gentlewoman from New Jersey.

Mrs. FENWICK. In that case, Mr. Chairman, I will not object.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mrs. FENWICK. Mr. Chairman, will the gentleman yield?

Mr. WRIGHT. I yield to the gentlewoman from New Jersey.

Mrs. FENWICK. I thank my colleague, the gentleman from Texas, for yielding.

I rise in the earnest hope that both of these amendments will be defeated. I should like to say further we have complied with the ethical requirements. I should like to associate myself with the very good remarks of the gentleman from

Pennsylvania. We are dealing here with the lives of people, and we cannot joke and make mockery of what is important to others, whether it is important to us or not. I should like to associate myself with the remarks of the gentleman from Pennsylvania, not because we are in comparison with anybody else but in reversing these two, we will do the right thing.

Mr. WRIGHT. I am delighted that I yielded to the gentlewoman.

Let me quote something told me by Mr. Sam Rayburn the first year I came to Congress. One of the first bills we had was an increase in pay for Members of Congress. It was more than 29 percent; it was from $15,000 to $22,500. I felt strange about that because I knew what the pay was when I ran for Congress. I expressed concern to Mr. Rayburn. I said, "Gosh, what are people going to think when one of the first things I do is come up here and vote for a pay increase?"

Mr. Rayburn in his inimitable way of boiling down the essence to a few words of truth said to me, "JIM, if you vote against the pay raise, you are saying one of two things. Either you are saying that the job you sought was not that important, or you are saying that you are not a big enough man for the job."

The jobs we hold, Mr. Chairman, are worthy of the pay. If we are not individually worthy of it, then the people ought to get somebody who is.

Mr. EDWARDS of Oklahoma. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, this will not take 5 minutes. I find it very hard to understand how Members of this House can sit here enjoying this kind of debate. I am not terribly impressed by people talking about the economic needs of Members of Congress. There is no Member of this House who has less personal wealth than I have, but I want to say to the distinguished majority leader, if I may, that while the gentleman from New York (Mr. PIKE) may be piqued, the people in my district are damned mad. What pay the Supreme Court members make is totally irrelevant. It was not the Supreme Court that created the inflation that is eating up the people back home; it was the Members of this body.

I want to say to the Members that I am going to vote for the amendment, and I will do it without my knees shaking.

Mr. BEARD of Rhode Island. Mr. Chairman, I move to strike the necessary number of words.

Mr. Chairman, I am not going to take the 5 minutes because I know the Members want to vote on this, but I am definitely going to say something because of my situation, my background. The Members know my background when I came to this Congress and it was well known the salary and the type of money I made. But I know one thing: On every job I ever had in my life, when I received a benefit or an increase in salary, it was never taken away—only if I was not doing my job properly, and if that was the case I probably would have been fired.

I think most Members of Congress here are doing their job and most Members work very, very hard, and most Members earn the salary that they receive. There are people in the Government who may receive a lot more and do a lot less with a lot less responsibility.

I do not feel embarrassed, like most others when they cash their pay check, and the Members should not feel embarrassed in voting the money if they feel they deserve it. That is really the bottom line. The Congressman would not be here if the constituent decided he was not worthy, but there are two separate issues. The issue now is either, one, we deserve what we receive or, two, we do not, and that is the way our vote should be cast.

I told my people in Rhode Island how I was going to vote. Then I put it to the test on a radio talk show, and they told me very simply: "Eddie, you are doing your job. Keep the pay." And that is how we should vote if we really believe that.

Mr. GARY A. MYERS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I think it is important that we look at what the relative size of the pay raise we are discussing is. We should realize that the Pay Commission will not make another recommendation for the next 4 years, so that will mean that the pay raise that we got should be divided by 12 years, and if we add the 5 percent we got in 1975 and the 28.9 percent, that is less than 3 percent a year over a 12-year period. That is certainly well within the range of what most of my constituents are saying a Congressman should live within. They normally write in and ask that we receive not more than 6 or 7 percent per year.

I hope Members also realize if we vote this pay raise down that during that 12-year period we will have to have lived with one 5-percent increase, and I do not know any segment of the economy that will have lived with a five-twelfths of 1 percent increase per year.

I think we should be fair about it. I think we could all recognize if it was unfair and would be willing to say so, but I do not find very many constitutents, when I put it on a yearly basis of around 3 percent and also tell them that the Pay Board will not be making another recommendation for 4 years, that the constituents have very many objections.

The 28.9 percent does sound large and particularly if they think it is an annual adjustment.

There is a colleague of mine from the same Pittsburgh district and myself who appeared on a radio talk show. He was taking the position of being opposed to the pay raise and I quite frankly was speaking in favor of it. During the talk show I was rather surprised that the talk show host admitted that he makes about what a Congressman makes and he said: "Gary, I think you ought to be able to live on that."

There is one other important point. There is no incentive for that radio talk show man to risk running for Congress and risk thousands of hours and thousands or dollars in trying to come here. It takes an effort to step out of the mid-stream of a career or a developing career and try to come here. There are certainly elective jobs many of us can identify which we would not risk seeking and should not put our family to the financial test to go and serve in such jobs, much as we would like to.

I think the vote, if we are interested in incumbency only, is that we would vote for the lowest possible pay increases and assure ourselves of no competition at election time. But I think we ought to be fair and set a pay scale so as to attract good candidates. Maybe we are afraid of good candidates, I do not know, but I think we have to set the fairest possible pay system in this House. Sometimes it takes a little courage to explain that. I do not think a 3-percent-a-year increase is unfair. I think the Commission made a fairly good recommendation and we ought to accept that.

Mr. CRANE. Mr. Chairman, will the gentleman yield?

Mr. GARY A. MYERS. I yield to the gentleman from Illinois.

Mr. CRANE. Mr. Chairman, I would simply say that at the lower pay scale our salary schedule has attracted some very fine, high quality, high caliber people, such as the distinguished gentleman from Pennsylvania; but there is some inaccuracy in what the gentleman said about the percentage class relative to the inflationary impact. In 1969, the Members were receiving $30,000 a year. With the automatic increase we voted 2 years ago as it went into effect in November, we would be making over $60,000 at the end of this year. That is a 100-percent increase in a time frame when the cost of living has increased less than 70 percent.

Mr. GARY A. MYERS. We have to assume that the pay recommendation in 1968 was based on a historical pattern, the same as this is. If we want to take out only certain time spectrums, we can make that conclusion; but if we start with one 12-year period and go to another 12-year period, there is a 3-percent differential.

The other argument is if, in fact, we do not go with the independent commission.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

(By unanimous consent, Mr. GARY A. MYERS was allowed to proceed for 1 additional minute.)

Mr. GARY A. MYERS. Mr. Chairman, I would simply like to say, the pressure to include Members of Congress in the automatic cost of living will increase if, in fact, we continually reject the 4-year Commission recommendation. I would rather see an independent Commission on a 4-year basis recommend and we either take or reject it and not just accept automatic cost of living.

Mr. McCLORY. Mr. Chairman, will the gentleman yield?

Mr. GARY A. MYERS. I yield to the distinguished gentleman from Illinois.

Mr. McCLORY. Mr. Chairman, I think we should have in mind that the principal objection I have heard, at least, is the failure or refusal of the House of Representatives to vote on its own pay increase: so I suggest that we reject the Leggett amendment and give us the opportunity to vote on the Pike amendment, without the Leggett amendment attached to it.

Mr. PIKE. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, first of all, one of the things that I have learned over the 17 years I have been here is that really it is not so terribly wise to base an argument on a questioning of the motives of a person who offers an amendment. It just really is not good sense.

Now I have heard the gentleman from California talk about revenge. I think if I talked to the gentleman privately, I could convince the gentleman that is not the case. I have heard the distinguished majority leader talk about PIKE's pique which I, frankly, thought was funny when I first heard it over 25 years ago, but it wears on one after awhile; but what we are talking about now is the majority leader also said it is not defensible morally or ethically not to vote for this pay raise. I honestly do not care all that much how this vote comes out. I am not going to be hurt if I am told to take more money. We got our last big raise in 1969 and I voted for it. Last year when we were talking about a 4.83-percent raise, I voted for it and there were only about, I think, the number was 75 Members of the House of Representatives, who voted for it before the election. That is all that has changed. What has changed is the fact that the election is over. Now we are talking about a 29-percent pay raise after the election.

All I want to do is have a recorded vote on our pay raise.

I would like to say in regard to the substitute amendment of the gentleman from California (Mr. LEGGETT), I had not one, but two amendments at the Clerk's desk. The second amendment does exactly what the gentleman's amendment does. It covers everybody else; but I think we ought to be leaders. I would like to cover our little pay raise first and have a vote on it.

I want to assure the Members that if the Leggett amendment to the amendment is defeated and my amendment is adopted, the second Pike amendment will have exactly the same effect as the Leggett amendment.

Mr. ASHBROOK. Mr. Chairman, will the gentleman yield?

Mr. PIKE. I yield to the gentleman from Ohio.

Mr. ASHBROOK. I thank my colleague for yielding to me. During that same 17 years the gentleman has been here learning what I think he clearly states is the motives of an author to not be questioned, I have also learned during that same period that sometimes we do not really do what we think we are doing.

Can the gentleman assure me that his amendment absolutely will do what it purports to do?

Mr. PIKE. Well, if the gentleman is asking me whether an amendment on the budget resolution today cuts off the pay raise, the answer is no.

Mr. ASHBROOK. We are not sure.

Mr. PIKE. We are not. All kinds of things could be done, but I would just like us to be sending a signal to this Nation of taxpayers whom we have told that we cannot afford to give 50 bucks to, because it is inflationary, that we care a little bit about some of the inflationary impacts we have with our own acts around here.

Mr. ASHBROOK. I thank the gentleman for his accurate and honest statement. I would say that during my 17 years, I do not always get that accurate and honest a response.

Mr. RYAN. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I think I have as many problems with this particular issue as anybody else in the House, although perhaps there are those who have more. I have noted with interest the public outrage where it was said that at least Members of Congress ought to vote on the pay raise themselves and be honest. However, if we read far enough back, and there are many who do, the big objection to a pay raise then was, "You should not be able to vote on it yourselves. You should have somebody else do that on an objective basis." So, the law was passed before I got here taking it out of the hands of those grubby fingers on the floor of the House and Senate and putting it someplace where it could be more objectively done, and so they did.

Now, the cry is, "Put it back where it belongs."

I presume in the years to come, if this body survives, there will be a cry again, "Take it out of their hands, they should not be able to vote on their own salaries."

For those who say it is an inflationary time and we should not be rewarding ourselves for causing inflation, that is interesting. Apparently, they never left the country or read the papers, because certainly the most devastating single factor in inflation, as anyone will tell us who looks at the factors involved, is the Arab oil increase worldwide, and we are still suffering from that. If the Congress has the power to change that, I would like to see us do it, but I kind of doubt that we have that ability.

What it comes down to, really, and the reason I am talking about this particular pay raise at this time, is because we have done a very significant thing. For the first time in 200 years, we have closed the back door. It is not possible any longer for a person who does not serve here to say, "I think I will run for Congress. If I make it, I will work there for a time even though I make a pretty good salary as an educated man or woman—" as we expect they could do—"and I will work there for a while, because on the side I can supplement the income I already have."

They cannot do that now. That is new.

If we go with this particular amendment today, it seems to me that here is what we do: We say to ourselves, "From now on, and for a long time to come, inflation will eat away, eat away until the average salary of this Congress and the purchasing power of this salary is cut little by little, and as it becomes less and less in actual purchasing power, fewer and fewer people who have, by our definition in this country anyway, become successful—that is, they have gone to school, they have received special kinds of training, they have taken the time and made the effort and taken the risk to run for office and come here, we will keep those people from coming here, because the one thing they cannot give up—or most people cannot give up in running for office—is their family, their home, and the income which they have become dependent upon.

I do not mind, I suppose, making this in the end, a place where rich and poor can serve, if that is what the will of this Congress is or if, more importantly, that is really what the will of this country is.

I do not think it is the will of this country. They are mad at the Government, because of the things which have happened in the last few years, but I have yet to get, in answer to the more than 200 letters which have come to me, wherein they have said, "Don't you dare vote for that increase in salary," and which, in my reply, I said, "I respect your opinion, and thank you very much. Now, write me back one more time and tell me what you think the salary of Members of Congress ought to be." I have yet to receive the first response to that first letter which I sent back in reply. And the reason I cannot get a reply is simply because when you press the individual person who is piqued, if I may use the word, at the Congress, angry with the system in general, when you come right down to it and ask them, "What do you think this House and this branch of Government should be, should it be in parity with the other two branches or not, should it be in parity with the family physician at home, should it be in parity with the United Airlines pilot, who has been flying 25 years with a few lives in his hands?" We do not receive a reply.

We hold the lives of this entire country, more than some of us realize on occasion, in our hands. That, to me, is the kind of job which ought to be, in the eyes of the public, worth looking up to, the way it is done and ought to be done.

Mr. Chairman, I ask the Members to vote this down.

Mr. GIAIMO. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I rise in opposition to both amendments. Let me just say that there are two issues before us here today. One is the question of congressional pay and the pay of the executive level of Government. In that regard, I would like to associate myself with the remarks of the majority leader, the gentleman from Texas (Mr. WRIGHT). I think Congressmen should have this pay increase. I believe that others in the executive branch and in the judicial branch should have the pay increase. I think it would be unconscionable to take away this increase. I have voted for

every pay increase since I came here 18 years ago, and I would say that the overwhelming majority of the people in my district agree that there is need for adequate salaries in Government.

But having said that, let me say that these arguments have a place in this forum and should be debated, but they should be debated where they can have some efficacy. That is not today. The question today is the adoption of the First Budget Resolution for fiscal year 1978. The question before us today is not whether or not we are going to knock-out the congressional pay raise. And let us not fool the American people. Those who say we want to show the American people that we have voted on it may or may not have a point. But I will say this, that what we do here today is not going to fulfill that commitment to the American people, because our vote here today will not affect the pay raise of Congressmen or anyone else.

Just think about that. Let us not let the news media send out a message that we voted on something here today when in fact we did not. This is a simple question of whether we are going to reduce two budget functions, whether we are going to reduce the general Government function and the allowance function. Those functions have in them almost $4 billion in general Government and about $1 billion in allowances. We are going to reduce them by an unspecified amount of $7 and $130 million, and that is all we are going to do here today. This is not the vote that the American people may or may not be looking to as a vote on our pay raise.

And we should not dare let them believe it is, because if we do, we would be misleading them.

If we want to vote on the pay raise, we will get our opportunity. We will get it sooner than some of us think; that will happen when we vote on the appropriation for it in the coming months. I intend to vote in favor of the pay raise, just so there will be no uncertainty as to where I stand in this matter.

But I am saying that we should not use the budget process as a vehicle to do something that it does not do, or as a vehicle to imply to the American people that it is going to do something that it will not do. Some of the Members have said that they have promised their folks that they would vote on the pay raise and that they wanted a chance to vote on the pay raise. Fine. We can keep that promise, but let us keep it in the one place where we can fulfill the promise, and that will be on a vote on the funds for the pay raise.

This is not that occasion because our votes here will not affect it one way or the other. All it will do will be to reduce the total budget of $5 billion in those two functions by about $137 million. That is what is at stake here.

So I submit to the Members that this is an amendment that reduces the budget, but it does not provide a vote on congressional pay or anything else involving or affecting pay of Federal employees, and I defy any Member to say that it does.

Mr. LAFALCE. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I think the gentleman from Connecticut (Mr. GIAIMO) made an excellent point, but it is a point that is appropriately made not only on the amendment offered by the gentleman from New York (Mr. PIKE) and the amendment offered by the gentleman from California (Mr. LEGGETT), but it is a point that is well made for every single amendment that has been offered to this budget resolution. We ought to realize that. Unfortunately, a lot of lobby groups do not realize it, so they will write us vehemently in opposition to our votes. But it really is not that that we vote on. Some of us in this body, I think, do not fully appreciate that fact.

Let us assume, though, that that is not the case. Let us assume that our vote would have efficacy, although it will not, even if the amendment passes. What is the real issue here? I do not think we have yet crystallized the issue.

The issue is not a pay increase. If 2 months ago a bill had come up on which we could have voted for a pay increase or against a pay increase, I would have voted against a 29-percent increase at one time, at one fell swoop. If a resolution of disapproval had come up, I would have voted for it.

But that is not the issue now. As a matter of law, Federal employees, including Supreme Court Justices and U.S. Congressmen, are now entitled to a certain amount of money. They have been entitled to that amount of money since approximately February 20. The issue is not whether we are going to vote for a pay increase; the issue is not recording our votes on the issue of 2 months ago. It is a new issue, and that is whether or not there should be a pay decrease, and I do not know of any instance in the entire history of Congress when we have voted for a pay decrease.

Mr. Chairman, for those Members who 3 months ago told their constituents they would vote against a pay increase at that time, I suggest in all intellectual honesty that if they would go back to them and say, "Now I voted no," they would be consistent, and they would be right.

Mr. MOTTL. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, during these times of outlandish Federal budget deficits, of skyrocketing inflation, and of low ratings in polls of Members of Congress in the House now, we have an excellent opportunity to demonstrate that we are responsive to the wishes of the American public.

We could do this by voting to support the amendment of our colleague OTIS PIKE, which would delete the funds in the 1978 budget to pay for our whopping 29 percent pay raises which became effective 2 months ago.

Furthermore, I would like to remain on record as being opposed to the whole raise package which is costing taxpayers about $120 million-a-year. I testified against these increases before the House Post Office and Civil Service Committee on February 9, and wish to reiterate my opposition today.

It is not proper that these whopping pay increases—which in many instances are greater than the average American's yearly salary—went into effect without even a vote. I ask you to join me so all Members of the House can stand up and be counted on this most important issue.

Thank you.

Mr. PATTISON of New York. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I do not often take this well, but I think this is an important issue.

I do not think there is any Member of this Congress who has more reason to vote in favor of these two amendments than I have. I was just reelected last fall with 47.5 percent of the vote in an overwhelmingly Republican district; an election in which the pay raise that I voted for last year but did not keep was one of the major issues.

The irony is that I do not need this damn pay raise. My children are grown up. My youngest is 20 years old; she has another year of college. Two of my children have graduated from college, and working, and one of my children is working and still attending college. My mortgage is paid off; I do not owe anybody anything. I live modestly. I do not not even have a car here in Washington, D.C. I live in a $200-a-month apartment.

I frankly do not need it. I made good money when I was practicing law, and I really have done quite well financially in my life.

Mr. Chairman, I would rather that we vote on a pay raise to be effective in the next Congress. I think that makes sense.

Mr. Chairman, I have sponsored, along with the gentleman from Ohio (Mr. WHALEN) a bill to do just that, and I think we ought to vote on that bill. However, that does not happen to be what is in front of us right now.

Consistent, by the way, with that position, I will not keep the pay raise that I get if we get one. I am going to give it back one way or the other. Therefore, I will not profit by it. Consequently, I have a whole bunch of reasons to vote for these two amendments, but I am going to vote against both of these amendments because I think it is time that the Members of this Congress and the people of the country who pay our salary understand a few things.

It is not a question of what we deserve. I think we all deserve the pay raise. That is not the point.

The question, I think, was well put by the Pay Commission. The Pay Commission, which was a nonpartisan, nonpolitical, broad-spectrum group of people—and, by the way, whose recommendations were supported by almost every major business person in this country and all the labor people in this

country as being sensible recommendations—asked in their report: "What does it take to get the very best people in this country to run for this office?"

Frankly, I would rather have the pay, in my particular circumstances, down to about $30,000 because if it goes to $57,500, I am sure I am going to have a lot stiffer opposition than I have had in the past. And when one wins by 47.5 percent of the vote, having better opposition is likely to get you defeated.

However, we ought not to go back to a point in this Congress when the people can only vote for either millionaires or rogues.

Mr. Chairman, I think we have good people in this Congress. I think that most of them need this pay raise, and I do think we all ought to vote against these two amendments.

Mr. WHALEN. Mr. Chairman, I rise to make just one quick point.

If the amendment before us would eliminate the recent salary increase for Members of Congress—and there is considerable question that it would actually accomplish this—then we are now being asked to vote on our own salaries.

From the first day of this session, I have repeatedly warned this body that unless we change our policy we will continually find ourselves in this most blatant conflict-of-interest situation. And what could possibly be a clearer conflict than voting on his own salaries, to our obvious personal benefit or detriment?

That is why I introduced the Congressional Pay Raise Deferral Act, H.R. 1365. That legislation would postpone any increase in congressional salary until after the next general election, thus getting us out of this unseemingly situation of voting on our own salaries.

Roughly 100 Members are cosponsors of the Congressional Pay Raise Deferral Act, and we are all hopeful that the Post Office and Civil Service Committee will take the advice of BILL FORD's select subcommittee and act on this legislation. Because, until H.R. 1365 or some comparable legislation is enacted, we will find ourselves in this situation again and again.

However we vote on this amendment today, we must bear in mind that we are purportedly voting on our own salaries. There is an inherent conflict-of-interest here which I hope will soon eliminate for the future.

Mr. TONRY. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I think this is the first time I have come to the well. I do not think that I hold my seat too securely.

I do know that the newspapers in my district have come out vehemently against the pay raise; but I also know that there are Federal employees who are desperately in need of the pay raise. Moreover, if we are going to attract good, qualified persons for those positions in Government, then their pay raises must pass.

Therefore, Mr. Chairman, I speak in opposition to the Leggett amendment.

I also know that in my struggle to stay here, my attorney fees have already cost me 2 years of my salary. I know also that the 15 percent of earned income limitation contained in the ethics bill that I voted for has cost me a tremendous amount of money. But I also have looked around this House and have been tremendously impressed with its membership, with the character, and honesty, and integrity, and industriousness of its Members.

Furthermore, Mr. Chairman, I know that as I look around, there are some who will not be back if they do not have this pay raise because they simply cannot afford to raise their families, keep two homes, and demand that their children and wives be deprived of essentials and luxuries they could have if they were not Members of this House.

It is simply too great a sacrifice to demand of their families.

Therefore, Mr. Chairman, I simply say that a person is worthy of his hire, and the Members of this House are worthy of this pay raise.

Not for myself, but for the other Members who could not afford to serve without it, I oppose the Pike amendment.

Mr. UDALL. Mr. Chairman, will the gentleman yield?

Mr. TONRY. I yield to the gentleman from Arizona.

Mr. UDALL. Mr. Chairman, I commend the gentleman for his courage.

I just want to make two points: In my judgment, we have seen the last pay raise in this House of Representatives. Those Members who are going to be here for 20 years will never see another one because this whole mechanism which worked in 1969 and which worked this year is dead.

The second thing I wanted to point out is that—and I am not sure this is understood—we are not talking about a rollback. We can roll back our own pay if we want to, but the chairman of the Committee on the Judiciary is going to be making less money than some bankruptcy referee in Flagstaff, Ariz.

We are not going to roll back the others. This is going to come to a vote. The gentleman from Connecticut (Mr. GIAIMO) the chairman, said.

On any appropriation bill, if I had my way, I would try to get some kind of special rule so that we rolled back everybody.

But this way, the first assistant to the doorkeeper will be making more than the Members of Congress are if we roll back just our pay.

I think this is a very unwise move to do it this way in this particular situation.

I strongly urge a vote against these amendments.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. LEGGETT) to the amendment offered by the gentleman from New York (Mr. PIKE).

The amendment to the amendment was rejected.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. PIKE).

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. PIKE. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 236, noes 179, not voting 18, as follows:

[Roll No. 154]

Brown, Calif.	McKinney	Rose
Collins, Ill.	Milford	Teague
Derrick	Myers, Ind.	Yatron

So the amendment was agreed to.

The result of the vote was announced as above recorded.

Mr. WRIGHT. Mr. Chairman, I move to strike the last word.

I take this time to make a personal observation, and it is my impression that after this the Committee intends to rise.

Sometimes in the heat of passion we say things that perhaps on sober reflection we would not have said.

Any time any Member questions the motive of another Member, really, he is playing God, and that of course is a dangerously presumptuous and offensively arrogant thing to do. I guess I did that when I publicly attributed to the gentleman from New York (Mr. PIKE) a motive that was not within my ability to know. So I want to apologize to the gentleman.

We refer to one another in our public dialogs here on the House floor as gentlemen and gentlewomen. If that is to be more than a meaningless parliamentary nicety, we owe it to one another to behave as such. It really is none of my business, and comes no doubt in bad taste, to comment upon the financial worth of one of my colleagues. I believe that I probably committed an unwitting and unintentional indiscretion in calling attention to a matter of this kind with regard to the gentlewoman from New Jersey (Mrs. FENWICK), and I want to extend to the gentlewoman my apology. I hope the comment was not offensive to her.

Obviously, we cannot all see things alike. No doubt the Members realized how keenly I had allowed myself to feel about this situation and this vote. That certainly does not mean that those who felt otherwise were wrong. That is the great thing about this whole system of ours, that we can disagree without being disagreeable. That we can accord to other Members the right to disagree and the assumption of the same sincerity on their part that we would want them to accord to us.

So, to the extent that I may have breached the bounds of proper parliamentary conduct in debate, I apologize to my two colleagues and ask their forgiveness; and I apologize to the House.

Thank you.

Mr. GIAIMO. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. NATCHER, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the concurrent resolution (H. Con. Res. 195) setting forth the congressional budget for the U.S. Government for the fiscal year 1978, had come to no resolution thereon.

PERMISSION FOR COMMITTEE ON HOUSE ADMINISTRATION TO FILE PRIVILEGED REPORT

Mr. THOMPSON. Mr. Speaker, I ask unanimous consent that the Committee on House Administration may have until midnight tonight to file a privileged report to accompany House Resolution 465, to provide for the expenses of investigations and studies to be conducted by the Select Committee on Assassinations.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

CONSIDERATION OF SEPARATE LEGISLATIVE ISSUES BY DEMOCRATIC CAUCUS AND THE HOUSE

(Mr. WAXMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. WAXMAN. Mr. Speaker, I have sent a letter to Congressman JOHN DINGELL, a copy of which I am inserting herewith in the RECORD.

The letter speaks for itself. There are however, some additional comments I would like to make.

First, when I entered the Congress, the Democratic caucus and the House as a whole instituted reforms to make committee and subcommittee chairmen responsible to their committee members and to their party caucus. I feel it is incumbent upon Democratic Members of Congress to assure themselves that the Democratic chairmen who represent them in the leadership are acting in the best interests of the majority party to work with the President to solve some of the pressing issues before the country. It is in this spirit that I sent the letter to Representative DINGELL.

Second, I wish to congratulate and express my sincere appreciation to the President for the position he has taken on automobile pollution controls. I am sure that he has had to withstand enormous pressures exerted upon him by representatives of big business—the auto manufacturers—and big labor—the United Auto Workers—and Representative JOHN DINGELL of Michigan, who has sponsored the industry's amendment, and who also happens to be chairman of the subcommittee which will have control over critical aspects of the President's energy message.

It takes great courage and conviction to resist, as President Carter has done, the temptation to give in on one issue to a subcommittee chairman who will review other legislation of crucial importance to the success of his administration.

President Carter has chosen instead to deal with these questions on their merits.

I believe there is a similar obligation on the Congress to confront these issues in a responsible manner.

I have had Members of Congress tell me that they agree with President Carter on the merits and want to vote with him, but are finding it extremely difficult to resist the lobbying pressures exerted by big industry and big labor. The lobbying against clean air is as intense as any in recent memory. Henry Ford himself has called committee members, and the United Auto Workers is mounting an enormous effort.

But I am hopeful that we in the Congress will not succumb to these pressures, and will also decide the issue on its merits.

The President knows that tighter pollution controls are essential to protect public health. He knows that the industry has distorted the issues. The President knows that the American people do not face a choice between clean air and fuel economy, or clean air and jobs, but that they are all compatible. This is why his program has been wholeheartedly embraced by his energy advisers, including Jim Schlesinger, and why it is completely consistent with his energy policy.

What is at issue is the responsible

exercise of power and how that affects, in this instance, action in the energy legislation. Representative DINGELL's subcommittee will receive that part of the program dealing with the pricing and regulation of oil and natural gas, perhaps coal conversion, and perhaps synthetic fuels development—none of which are related to automobile emissions.

Thus, I consider any thought to obstruct consideration of these urgent matters because of vehement disagreement by the subcommittee chairman on another issue wholly outside the legislative jurisdiction of his subcommittee, cause for the most serious concern of my colleagues on the Commerce Committee as well as the public generally.

The formulation of public policy should not be allowed to be held hostage in any manner, particularly when this issue is not one which should be considered politics as usual as it is of such enormous consequences that the President has termed it the moral equivalent of war.

I am also inserting in the RECORD a response I have received from Congressman DINGELL to my letter. I am pleased that he has stated his pledge "to move expeditiously on the President's energy proposal." While this is not a denial that he may be using his subcommittee chairmanship as a lever with the President to get the administration to back off its strong position for clean air auto requirements, it is encouraging to have his pledge on record. His future conduct in pursuance of his responsibilities will speak for itself.

HOUSE OF REPRESENTATIVES,
Washington, D.C., Apr. 25, 1977.

Hon. JOHN D. DINGELL,
Chairman, Subcommittee on Energy and Power, Committee on Interstate and Foreign Commerce, Rayburn House Office Building, Washington, D.C.

DEAR MR. CHAIRMAN: I have been increasingly concerned over the last several days about the Committee's consideration of auto emissions standards under the Clean Air Act, and your Subcommittee's pending review of the President's energy legislation.

I am well familiar with, and you have forcefully expressed, your vehement opposition to the President's proposed automobile pollution control program. I know that you have held extensive meetings on this question with the President, the White House energy staff, the Federal Energy Administration, and the Environmental Protection Agency.

You are certainly entitled to your views on these issues and to represent the interests of your constituents, especially the automobile manufacturers and the United Auto Workers, in this regard. But I am also concerned that when you speak with the President and members of the Administration on these issues, you are speaking not only as a representative from Detroit, but as Chairman of the Energy and Power Subcommittee, and on the behalf, by virtue of your approval to that position by the committee caucus, of the Commerce Committee Democrats.

In your leadership capacity as chairman, you implicitly represent your colleagues. As your constituents, we have an obligation to be certain that subcommittee chairmen are acting responsibly and in a manner consistent with the intentions of our party's leadership to work constructively with our President.

I was therefore extremely disturbed by the report in the Washington Post on Saturday, April 23, that your vehement disagreement with the President on auto emissions controls "could cost Carter in terms of Commerce Committee action" on the energy legislation.

The Energy and Power Subcommittee will consider several critical aspects of the President's energy program. It is clear that energy has the highest priority on the national agenda. I believe it very important that we deal with these proposals on their merits alone, and that our deliberations not be impeded because of disagreements over another, separate legislative issue.

I am therefore very anxious to receive your assurance that you are not and would not consider holding hostage or otherwise obstructing the orderly and forthright consideration of the energy package because of your differences with the President over clean air standards for automobiles.

If in fact the concerns raised by the Post article are accurate, and the reservations I have regarding the nature of your discussions with the Administration are justified, I believe it appropriate that you meet with the committee caucus for a full airing of these questions, and that the caucus should consider whether you should continue your tenure as chairmnn of the Energy and Power Subcommittee.

With appreciation for your attention, I am,

Sincerely,

HENRY A. WAXMAN,
Member of Congress.

HOUSE OF REPRESENTATIVES,
Washington, D.C., April 26, 1977.

Hon. HENRY A. WAXMAN,
U.S. House of Representatives, Washington, D.C.

DEAR HENRY: The so-called "separate legislative issues" you refer to in your letter to me may result, according to FEA and EPA, in a fuel penalty and make it difficult to achieve compliance with fuel economy requirements of law which are within the oversight jurisdiction of my Subcommittee. Such a result could have adverse economic effects on consumers who purchase motor vehicles in the future and impede energy conservation. If you paid attention to the entire issue, rather than news stories, you would understand these matters and not write arrogant letters.

Evidently you were absent from the House Floor last week when, during debate on the Ad Hoc Committee, I pledged my cooperation to the Speaker to move expeditiously on the President's energy proposal. I suggest that you read the Congressional Record and become better informed. Nothing has happened to change that pledge, but I did not pledge blind support.

I did not hesitate to criticize the prior Administration when its legislative proposals were not well-supported. I and my Subcommittee will do the same with the new Administration. Remember, the Congress is a separate, but equal, branch responsive to the people. A Democratic Administration, like a Republican one, has an obligation to be responsive to Congressional requests for hard data on issues that impact heavily on energy matters. Thus far, the EPA has not supplied such data.

You make accusations without having the courtesy to ascertain their accuracy. Your letter is an outrageous insult and I demand an immediate apology.

Sincerely,

JOHN D. DINGELL.

"HELSINKI'S UNFULFILLED PROMISE"

(Mr. FASCELL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FASCELL. Mr. Speaker, I am pleased to join my distingiushed colleague, Representative DRINAN, in a project he inaugurated entitled "Helsinki's Unfulfilled Promise." The 35 nations which signed the Helsinki Final Act, in August 1975, pledged to facilitate the reunification of families separated by political boundaries. As Chairman of the Commission on Security and Cooperation in Europe, created to monitor compliance with the Final Act, I have learned that the Soviet Union, regrettably, is not abiding by that pledge. Thus, for the second consecutive session, Members of Congress are conducting a vigil in behalf of those Soviet Jewish families and individuals denied the right to emigrate.

Last year's vigil, the "Orphans of the Exodus," initiated by Representatives EILBERG and HOLTZMAN, was designed to illustrate to the Soviet authorities congressional concern for the plight of divided Soviet families. The case histories used in the "Orphans of the Exodus" vigil were taken from a publication of the same name compiled by the South Florida Conference on Soviet Jewry. This year's vigil will also draw on material from the South Florida Conference's newest publication "Helsinki—Promise or Betrayal?" I commend this organization for these excellent works and their conscientious efforts in behalf of Soviet Jews.

Mr. Speaker, I would like to call your attention to the tragic story of one courageous Soviet Jewish family—Vladimir and Maria Slepak—a dramatic illustration of the Soviet Union's capricious emigration policies. In March 1970, Vladimir Slepak's family including Mrs. Berta Rashkovsky, Maria's mother, applied for permission to emigrate to Israel. In early 1971, Mrs. Rashkovsky, suffering from a serious heart ailment, was permitted to leave the U.S.S.R. alone. Since then, she has been doing all that she can to help her children obtain permission to join her.

The Slepaks have been the targets of systematic harassment by the Soviet authorities. Slepak, a radio engineer, has been fired from several jobs, tailed, searched, beaten, had his phone disconnected and his apartment bugged, and has been imprisoned approximately 25 times for 10 to 15 days. On March 5, 1977, Slepak, along with two other Soviet Jewish refuseniks, Aleksandr Lerner and Anatoly Scharansky who has since been arrested, was accused, in Izvestia, of espionage and other treasonous activities against the Soviet state.

Apparently, the U.S.S.R. considers it "treasonous" for individuals to seek to exercise the basic human rights guaranteed them by the Universal Declaration of human rights and reaffirmed in

the Helsinki Final Act. Such an attitude by the Soviet Government brings into question the sincerity of their solemn promises at Helsinki. We are, therefore, obligated to insure that the pledges undertook in the Final Act do not go unfulfilled and that families such as the Slepaks are allowed to be reunited. This can only be achieved by continued pressure from the West. I encourage every Member of Congress to express his concern by participating in this vigil.

H.R. 3744—MINIMUM WAGE BILL

The SPEAKER. Under a previous order of the House, the gentleman from Oklahoma (Mr. EDWARDS) is recognized for 60 minutes.

Mr. EDWARDS of Oklahoma. Mr. Speaker, I have requested this special order to discuss H.R. 3744, the minimum wage bill that will soon come before this House. I want to talk specifically about one feature of this bill: The indexing provision.

With this provision, there would be an automatic increase in the minimum wage every time there was an increase in the average hourly manufacturing wage for production workers. That is the real issue. Labor and the White House would have us believe that what is important is the actual initial increase in the minimum wage. But while this diversion is being created, what labor really wants is that indexing provision. Because with this provision, the minimum will soon catch up with their initial recommendation of $3 per hour. And thereafter, labor, not Congress, will be the prime factor in determining the minimum wage.

Indexing would remove from Congress the responsibility to periodically review the minimum wage. Congress must not relinquish this responsibility. When Congress sets the minimum wage we can take into account the effect on inflation and the effect on the rate of unemployment. If we surrender this responsibility and allow the minimum wage to be set by labor negotiations we lose those important controls.

A system of indexing would be highly inflationary. If an increase in the minimum is mandated, covering those at the bottom of the wage ladder, then, in justice, increases will have to be made at each rung of the ladder above that to maintain pay differentials. Indexing the minimum wage is an indirect indexing of wages at all levels, and will lead to increases in consumer costs.

If the reaction to H.R. 3744 is similar to the result flowing from minimum wage increases in the past, labor costs for all businesses will increase by approximately 4.4 percent. For small businesses the figure is even higher, 5.4 percent. Consumer prices would climb as much as 3 percent.

Under these inflationary pressures many of the industries and small businesses employing marginally trained or unskilled workers will be forced to cut back on the number of those employees or go out of business. The very worker that the Federal minimum wage was intended to aid will find himself out of work.

My home State of Oklahoma alone could lose about 32,000 jobs if H.R. 3744 is adopted. But the real losers will be those young workers and minority workers and older people 65 and over who will lose their jobs on account of this piece of legislation. These groups already comprise more than 20 percent of the total number of people who are unemployed. Passage of this bill will only serve to aggravate the situation. In my State of Oklahoma, the total number of jobs for these people will be reduced by nearly 8,000.

On top of this, H.R. 3744 would repeal the tip credit now given to employees of the foodservice industry and other tipped employees. The food service industry employs some 4 million workers; 30 percent—or 1.2 million—are teenagers, 16–19-year-olds and 14 percent are minority group members. Repeal of the tip credit alone would require the elimination of 190,000 jobs if employers held wage costs constant. Once again, the poor, the teenagers, and the unskilled stand to lose the most.

Given all these facts, why does Labor still want this bill? The minimum wage is a protection not for low-paid unskilled workers as Labor suggests, but for organized labor.

Now is not the time to set in legislative concrete a mathematical formula for increasing the statutory minimum wage at regular intervals. The American public is constantly being reminded that Federal expenditures are not under control because we in Congress have set up so many ongoing programs that cannot be changed. Setting up a system to index and, therefore, increase the minimum wage every year, is just another example of how the Federal Government builds a self-perpetuating program into our economic system—a program that is uncontrolled until the Congress decides it should be changed, if ever.

Congress, as a matter of policy, should review this minimum wage legislation from time to time and be forced to pass on its adequacy. To do less would be to shirk our duty to our constituents. Given the low esteem in which Congress is viewed today by the general public, it also would seem to be a wise decision on our part. I urge you all then to join with me in stopping this bill. It is clearly not in the general interest to have a law on the books that will contribute toward the growth of those twin ogres, inflation and unemployment.

Mr. RUDD. Mr. Speaker, I am pleased to join my colleague, the gentleman from Oklahoma (Mr. EDWARDS) in this colloquy opposing a further increase in the statutory minimum wage, and I commend him for his leadership in this area.

I am vitally concerned about the thousands of teenagers and young adults who will either lose their jobs or be rendered unemployable in the unskilled labor markets as the result of increasing the minimum wage to $2.50 or more per hour.

My State of Arizona is a leader in the travel and tourism industry, which is highly labor intensive and where many young workers and family women find flexible part-time employment.

In a total work force of around 875,000, more than 58,500 Arizonans work directly in jobs associated with tourism and travel.

A large majority of these workers are teenagers and young adults who work at restaurants, hotels and motels, shops, recreation and sightseeing areas. These young, mostly part-time workers depend greatly upon the income that they receive as waiters and waitresses, bellboys, cashiers, sales clerks, and in other capacities.

An arbitrary additional increase in the current $2.30 Federal minimum wage would price thousands of these young employees out of their jobs as their employers are forced to cut back and turn to older, more mature, full-time employees to justify the higher wages they are forced to pay.

Mr. Speaker, this concern about youth employment—particularly among minority youth—is no idle matter.

Young people under 25 years of age constitute about 10 percent of the total U.S. work force. But they constitute a shocking 50 percent of all unemployment.

Teenagers between 16 and 19, who are usually the most marginal unskilled workers, constitute more than 28 percent of all unemployment. More than 32 percent of all minority teenagers are unemployed.

Youth unemployment has clearly increased when Congress has raised the statutory minimum wage.

According to data prepared by economic analyst David Williams of the Heritage Foundation, the small decline in youth unemployment from 1965 to 1968 was totally offset by the 4.7 percent jump in teenage joblessness during 1970 and 1971, when the first real effects were registered by the 1968 minimum wage increase from $1.40 to $1.60 an hour.

Teenage unemployment jumped yet another 5.4 percent during 1974 and 1975, following a very slight decline the previous 2 years, when Congress again raised the minimum wage to $2 and then immediately to $2.10 an hour.

The data is not yet available to see the further adverse impact from last year's additional 20-cent minimum wage increase, to $2.30 an hour. But we know that youth unemployment has reached almost crisis proportions, which should be reason enough not to needlessly fuel this problem with another foolish increase in the Federal minimum wage.

I include at this point in the RECORD the Heritage Foundation data which charts teenage unemployment over the 11-year period that Congress has increased the minimum wage from its 1965 level of $1.25, to its current level of $2.30 an hour:

MINIMUM WAGE AND UNEMPLOYMENT (1965-76)

Year	Minimum wage	Unemployment rate (adult) (percent)	Total employed (adult)	Total unemployed (adult)	Unemployment rate: Teenagers (16 to 19) (percent)	Unemployment rate: Tennagers (white) (percent)	Unemployment rate: Teenagers (nonwhite) (percent)	Total teenage employment	Total teenage unemployment	Change in unemployment rate: Teenagers from previous year (percent)
1965	$1.25	4.5	69,032,000	2,492,000	15.6	14.2	26.1	5,037,000	872,000	
1966	1.25	3.8	67,174,000	2,040,000	13.2	11.1	25.1	5,720,000	836,000	−2.4
1967	1.40	3.8	68,691,000	2,137,000	12.9	11.0	26.3	6,251,000	839,000	−.3
1968	1.60	3.6	70,140,000	1,987,000	12.7	11.0	25.4	5,780,000	839,000	−.2
1969	1.60	3.5	71,785,000	1,977,000	12.2	10.7	24.1	6,117,000	853,000	−.5
1970	1.60	4.9	72,477,000	2,983,000	15.2	13.5	29.1	6,142,000	1,106,000	+3.0
1971	1.60	5.9	72,934,000	3,736,000	16.9	15.1	31.7	6,195,000	1,258,000	+1.7
1972	1.60	5.6	74,980,000	3,538,000	16.2	14.2	33.5	6,722,000	1,301,000	−.7
1973	1.60	4.9	77,173,000	3,079,000	14.5	12.6	30.3	7,236,000	1,325,000	−1.7
1974	2.00	5.6	78,533,000	3,666,000	16.0	14.0	32.9	7,403,000	1,410,000	+1.5
1975	2.10	8.5	77,737,000	6,077,000	19.9	17.9	36.8	7,046,000	1,753,000	+3.9
1976	2.30	7.9	80,216,000	6,586,000	19.0	16.9	32.1	6,969,000	1,701,000	−.9

Mr. Speaker, I have had many thoughtful letters on this subject from Arizona employers in my district, who can speak from practical experience and knowledge about this concern.

Most of their views are directed at H.R. 3744, sponsored by the Honorable JOHN H. DENT of Pennsylvania, which has been referred to the House Committee on Education and Labor.

Three such letters are from Mr. C. M. Guggisberg and Associates, owners of Guggy's Family Restaurants, Mr. John W. Teets, president of Greyhound Food Management, Inc., which operates post houses at bus stations around the country, and Mr. Ted Wright, general manager of Marriott's Camelback Inn of Scottsdale.

I appreciate and share these concerns of my constituents, and would like to include their good letters at this point in the RECORD:

GUGGY'S FAMILY RESTAURANTS,
Phoenix, Ariz., April 4, 1977.

Representative ELDON RUDD,
House Office Building,
Washington, D.C.

DEAR SIR: We are writing this letter as extremely troubled citizens of the United States. Our country became great not because of big government, big business or big labor. The United States became a world power because it was a truly free nation.

Yet, today we see our nation beset with a multitude of problems which can be traced back to a loss of freedom.

For example: The energy crisis, which to a large degree has come about because of indecisiveness, harassment, and over regulation by the Federal Government. The Alaskan pipeline was delayed because of this type of muddle. Today we are faced with an acute shortage of gas which would result in higher unemployment and economic chaos. Why can't the cost of gas be deregulated? A true free enterprise system would eliminate the problem in extremely short time.

However, the primary purpose for this letter is the impending misfortune this country will be confronted with if the Federal Minimum Wage is increased. At present, we have the twin problems of unemployment and inflation. Increasing the minimum wage will increase both these problems by thirty percent. In fact, we cannot find a single reason to increase the minimum wage. However, there are many reasons why it should not be increased:

I. As the minimum wage increases, wages and prices, in general, spiral upward. Who suffers? Those people on fixed incomes such as Social Security.

II. The Federal Minimum wage removes the freedom of the individual states, such as Arizona, to enact minimum wage laws more in line with that particular state's needs.

III. The Federal Minimum Wage removes the ability of individual Businessmen to motivate employees by giving merit increases in wages. (Another loss of freedom.)

IV. The teenager in today's society comprises a hefty percentage of the unemployable. Yet with each increase in the Federal Minimum Wage, fewer teenagers can find jobs.

Personally, we need an answer. What are the positive aspects of raising the Federal Minimum Wage?

Regarding the tip credit.—Tipped employees, like all employees, are guaranteed the minimum wage or the employer cannot apply the full currently authorized tip gratuity credit. Labor Department studies show that, on the average, income of tipped employees is far higher than the minimum wage.

Proposals to freeze the tip allowance at a specified amount are not supported by logic or fact. There is no more justification to freeze the tip allowance at a specified dollar limit than to allow them to be credited up to 50% of the minimum wage.

Tips are wages under our tax laws and under our employment laws. The fundamental purpose of minimum wage laws are to insure that wages for work do not fall below a specified minimum. The current law on crediting tip income to a specified percent accomplishes that purpose in keeping with the intent and spirit of existing legislation.

Regarding the size of proposed increases.—Industrywide increases in wages in other industries normally approximate no more than 6–7%. The proposal for changes in the minimum wage run at over double these percentages, threatening the economic viability of our industry.

Regarding indexing the minimum wage.—Tying increases in the minimum wage to Average Hourly Earnings—Manufacturing, would perpetuate an inflationary spiral that would feed on itself. A constantly rising minimum escalates average hourly earnings, which in turn would require further increases in the minimum. Congress would abdicate its responsibility to review periodically the level of the minimum wage in relation to the cost of production of goods and services.

Indexing the minimum wage is a major step toward adopting indexing as a national policy. A step of this significance demands much closer scrutiny and evaluation than merely tying it into minimum wage legislation.

Sincerely,

C. M. GUGGISBERG,
President.
M. HAL GUGGISBERG,
Vice President.
GIL M. GUGGISBERG,
Vice President.
JIM N. HALVERSON,
Vice President.

GREYHOUND FOOD MANAGEMENT, INC.,
Phoenix, Ariz., March 28, 1977.

Subject: H.R. 3744—Amendment to the Fair Labor Standards Act.

Hon. ELDON RUDD,
House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN RUDD: I am writing because of my conviction of the potential harm to the many marginally skilled employees in the Food Service Industry which would result from passage of the above Amendment to the Fair Labor Standards Act. I am aware that Congressman Dent, the sponsor of the Bill, states that its primary purpose is to assist low wage workers by increasing their purchasing power. No right thinking person could quarrel with this purpcse. However, in my opinion, the Bill would have a contrary effect.

The argument has been offered that it would be difficult to support a family with earnings based on the current Minimum Wage level. However, all employees are not ready, able, or required to support a family. The Food Service Industry has traditionally employed large numbers of unskilled, uneducated, and part-time employees. Many of these are youngsters who have dropped out of school, students who are working to pay for their education, and homemakers who augment their husband's income with part-time employment. Their wages, when added to the primary family income, can make the difference between "making ends meet" and a comfortable family living standard.

LOSS OF JOBS

When I first entered the Food Service Industry, the number of unskilled jobs were numerous and the general unemployment rate was low. I have seen Food Service Operators increasingly turn to labor-saving devices and methods since 1966 when faced with sharp increases in the Minimum Wage. You, I am sure, have seen the numbers of unemployed grow proportionately in this same period because no other industry would or could employ the displaced workers.

THE REAL TRAGEDY

For the student or housewife who is displaced from a Food Service job, the effects will vary from no new summer outfit or no ticket to the big game, to no new family car, no family vacation or no extra money for a college education. For the dropout or lower skilled person, the result is usually more drastic—weeks of unemployment benefits followed by years of welfare aid—both of which aggravate our already lagging national economy.

WHO IS PROTECTED?

The majority of American workers will not benefit by the increase in the Minimum Wage. Skilled and trained workers have generally risen above the Federal Minimum Wage level because of what they could contribute to the job. They need no protection from this Bill. Unfortunately, those

who the Minimum Wage Law seeks to protect are often forced out of the job market because the Law makes it more economically feasible for the employer to replace a salad making assistant with a food processing machine, a porter with a power floor scrubber, or a bus person with an added duty for the waiter or waitress.

SOCIAL IMPACT

Recent publications recite the plight of Social Workers who are unable to find jobs for Welfare raised youngsters. Many attribute the rise in the crime rate to this problem. The jobless rate for teenagers is reported to have hit 20% and the rate for minority teenagers has supposedly approached 40%. The increase in the Minimum Wage to $2.79 or $3.04 can only accelerate these figures.

I urge you to consider the ramifications when it comes time to vote on this issue and, if you doubt the effects of increasing the Minimum Wage to levels proposed by Mr. Dent, just ask yourself . . .

How many pin-setters have you heard of lately?

When was the last time your car was washed by a group of youngsters rather than a group of plastic brushes?

When was the last time you saw a clerk, or even space for a clerk, behind a retail counter?

When was the last time your weekly groceries were transported to your car by a carry-out boy rather than a stainless steel cart?

There are many people who would welcome the above jobs if they were available today. There are many more who would welcome today's minimum skilled jobs if they are still available tomorrow.

Sincerely,

JOHN W. TEETS.

MARRIOTT'S CAMELBACK INN,
Scottsdale, Ariz., March 9, 1977.

Hon. ELDON RUDD,
House of Representatives,
Washington, D.C.

DEAR MR. RUDD: Since Arizona doesn't have a member on the House Education and Labor Committee, please do everything you can to oppose HR 3744 . . . Congressman John Dent's bill to increase the minimum wage . . . and express my views to Congressman Dent.

The provisions of his bill are most inflationary, and will increase wage costs of the hospitality industry by hundreds of millions of dollars per year, leading to increasing unemployment.

Inflation is my biggest concern. We are told that the minimum wage has not kept pace with the cost of living. This is not true. The minimum wage for the hotel and restaurant industry advanced 130% from February 1967 to January 1977, while the CPI increased only 76.6% during that same period of time. Since the last minimum wage legislation in 1974, the food service industry's wage rate has risen 21.1% . . . the CPI 19.8%. Under that legislation, our minimum wage was again increased as recently as January 1, 1977. Now, Congressman Dent's proposal would increase it again 47.8% by January 1, 1978. (Industry wide increases are normally in the 6–8% range.) This threatens the economic viability of our industry. We all know that increases in the minimum wage have a ripple effect on all other wages.

Then his proposal would tie future increases in the minimum wage to average earnings in manufacturing. This would perpetuate an inflationary spiral that feeds on itself: a constantly rising minimum pushes up average earnings which, in turn, trigger further increases in the minimum.

In addition, this bill would eliminate the present 50% credit for tips (presently $1.15 of the $2.30 minimum wage). Why? Tipped employees are guaranteed at least the minimum wage. Labor Department studies show that on the average, their income is far higher. I don't know any tipped employee who would give up his tips for a fixed hourly rate. However, I know many who prefer to work for tips.

As minimum wage is increased, unemployment will also. It doesn't make sense to attack the problem of high unemployment by increasing the cost of employment. Of the unemployed, 19% are teenagers, 37% are minorities. The food service industry has over 5 million employees. Over 30% of them are teenagers and 68.7% are women.

Our industry is labor intensive, employs marginal labor, and has the lowest productivity per employee of any industry. Increases in the minimum wage, coupled with the economic burdens of the energy crisis will discourage the creation of new employment opportunities and actually encourage job cuts.

I have many more views on this subject, and can summarize them all by stating that HR 3744 is a bill designed to ruin the hospitality and food service industries. It is inconceivable that it was designed without consulting anyone in our industry, particularly our service (tipped) employees.

Oppose it vigorously!

Sincerely,

TED WRIGHT,
General Manager.

Mr. BADHAM. Mr. Speaker, the minimum wage is not a windfall for the poor. It is a law which, in reality, serves to defeat its basic purpose. Countless studies by liberals and conservatives alike have revealed that minimum wage laws contribute significantly to the unemployment roles of marginal workers. There are many teenagers attempting to develop marketable skills who are unable to get that first break in the labor market; housewives looking for supplemental part-time work; elderly people trying to make ends meet on their social security checks; and others who lack all but basic skills and education, seeking employment to support their families. It is these workers who are most harmed by an increase in the minimum wage. Unfortunately, the minimum wage is thought by many to be a panacea, a cure-all remedy for this group. But the following information reveals a situation quite to the contrary.

A study by Edward Gramlich for the Brookings Institution concludes that "as the minimum wage is increased beyond its historical range of 40 to 50 percent of the median wage more and more workers confront the grab-bag combination of a higher wage but a reduced possibility of having a job." Mr. Gramlich actually favors a lower minimum wage for teenagers, a "youth differential" as a way of reducing teenage unemployment.

A study conducted by Colin and Rosemary Campbell reveals that, for the employment period from 1950–65, the rate of unemployment in areas with minimum wage laws was on the average six-tenths of a percent higher than in areas without such laws.

Those who are endeavoring to acquire skills and improve their chances of moving into better-paying jobs with those skills have been frustrated in their attempts to do so, having been priced out of the low-paying jobs which many times provide these opportunities.

Ask any adult in America today about his first job, about that first opportunity to participate as an active contributor to the American economy. Not only did this mean a certain amount of financial independence but also served to bolster his self-image as a productive, worthwhile unit of the busy world around him. Are we going to deny the youth of this great country the necessary opportunities that so many have enjoyed for so long? Can we advocate a program which could mean the demoralization of American youth, who actively seek and desire gainful employment but who are rejected because their labor may not be worth $3 an hour due to a correctable lack of skills? As opposed to the idea of mandatory minimum wage as I am, I believe any such law should include a "youth differential" as advocated by Edward Gramlich. Under this system youths under the age of 21 would not be subject to the minimum wage laws. This would mean the opportunity to be hired by employers who did not consider the fruits of their labor to be worth $3 an hour, but who could offer constructive employment at some figure less than this. They deserve a chance to prove themselves worthy of responsibility, can we deny this to our youth.

We need to be realistic and understand minimum wage for what it really is: a limitation upon marginal workers to obtain employment of their own choosing, and a mechanism which serves to inhibit the upward mobility of those who have been fortunate enough to secure employment. Is this really what the proponents of minimum wage have in mind when they decry the evils of pricing and laud the supposed benefits of their program? I think not. I truly believe that their intentions are commendable, but their mechanisms need to be reevaluated.

Mr. GOODLING. Mr. Speaker, last year I voted against a substantial increase in the minimum wage. This year I support the President in calling for a modest 20 cent-an-hour increase in minimum wages because it is the only proposal allowing workers to keep up with inflation while not adding new inflationary pressures to the economy.

The Committee on Education and Labor on which I serve is now considering the Fair Labor Standards Amendments of 1977 (H.R. 3477) which would raise the minimum wage by 55 cents an hour to $2.85 and automatically base all future increases on a percentage of the average hourly earnings of production workers. The bill would also repeal the "tip credit provision" which allows workers to receive less than the minimum wage if their salaries are augmented by customer gratuities.

I very much oppose the 55-cent minimum wage increase because of its long-term effects on the economy and on employment. The increase proposed by H.R. 3477 would most severely affect the small businessman who would have difficulty in paying such a wage while making ends meet. Also, unskilled and part-time employees would be priced out of the job market by the excessive increases. The solution to below-average wages is not excessive increases in the minimum wage but a small increase initially with future increases tied to the Consumer Price Index.

It is important to prevent the mini-

mum wage law from affecting the job opportunities of our young, temporary, and part-time workers. This group of employees should be exempt from minimum wage standards. Although Secretary Marshall and the administration have not addressed themselves to the proposed repeal of the tip credit provision, I am against such a repeal because of its inflationary impact.

Mr. HAGEDORN. Mr. Speaker, while old adages often sound trite, there is more truth to them than mere repetition. One such comes to mind: Those who refuse to learn from past mistakes are bound to repeat them. It comes to mind at this particular moment because the Congress seems bound and determined to repeat one of its most disastrous mistakes. What I am referring to is the proposed increase in the minimum wage. I am certain that those sponsoring the measure have the best intentions; however, there is another truism which says the path to perdition is paved with good intentions.

Now, I am not saying that any of my colleagues are on their way to the nether regions. However, their actions may make life somewhat hellish for the poor, the minority teenager, the elderly person, or any other individual who is marginally employable. This is because their actions are going to eliminate a lot of jobs those people might have been able to hold. How is this so? Well, colleagues, just look at the facts.

In every instance in which the minimum wage has been increased, there eventually has been a loss of marginal employment—a loss of jobs normally filled by those for whom work is most difficult to find. Can you not see that what you are doing is insuring that a certain percentage of our potentially productive population will be barred from entering the labor force?

Over the next few years, we are going to have to come up with 19 million jobs if we are going to meet the administration's goal of a 4 percent rate of unemployment. Just how, may I ask, are we to accomplish this if we continue to propagate policies which are eliminating jobs faster than we can create them? Seven million eight hundred thousand jobs have been wiped out fully by automation over the last 5 years. How many of these jobs would still be in existence if the minimum wage had not made it economically infeasible for businesses to use labor to perform them?

Gentlemen, I will be the first to grant that, even at the proposed new minimum wage, a worker is not going to get rich, but he is also unlikely to stay at that wage very long. As the worker develops skills which are marketable, he will become more productive and will either get more money from his employer or move on to another job which pays what he is worth. However, he has to get that first job in order to learn those marketable skills, and he cannot do so if an employer will not hire him because he would have to pay his employee more than he is then worth.

The fact is that the minimum wage limits the number of persons able to enter the labor force. Now, this is just fine for the skilled worker, for the union leaders, and for others who have a vested interest in limiting the competition for jobs. On the other hand, it is not so fine for certain other groups. It is not fine for the nonwhite teenager who, according to the Department of Labor, is currently suffering from an unemployment rate which is in excess of 37 percent. It is not fine for the housewife who has found that she has to enter the job market on a part-time basis in order to help keep the family's head above water financially. It is not fine for the elderly person who wishes to supplement his or her inadequate social security check. And it is not fine for the marginal small businessman who cannot afford to automate, and who, if he is unable to afford an unexperienced teen-ager at the minimum wage, may go out of business. These are the ones who suffer, who are eliminated from jobs by automation, who are effectively barred from the job market by the minimum wage.

Gentlemen, how can we in good conscience continue to condone a policy which dictates that people, both willing and able to work, may not be hired by employers because we, not they, have determined that the wage agreed upon by the two parties concerned is too low? Who are we anyway, gentlemen? We are the peoples' representatives, not their rulers. It is our responsibility to work the will of the people, not to work our will upon them. Nor, might I add, is it our duty to work the will of the labor leaders who wish to get a deathgrip on employment in our Nation.

The question of the minimum wage goes beyond the immediate problem. It strikes at a basic underpinning of our democratic system. It touches on the ability of individuals to enter freely into contract without coercion and without arbitrary restrictions for mutual profit. Have we so soon forgotten that the American Revolution was fought in part because of such restrictions? Have we forgotten that there is a correlation between a free market economy and the amount of personal freedom enjoyed by the inhabitants of a country? I certainly hope not. What we are accomplishing by setting a minimum wage is restricting the ability of persons to freely contract for their services and, in so doing, effectively limiting their opportunities to achieve economic well-being.

Further, we are effectively condemning a certain portion of our population to a stultifying existence on the dole—a portion of our population which is willing to work and for whom there exists work to do. The only problem is that the Federal Government has made it economically impossible for employers to hire those individuals. Does it not make more sense to give someone a job rather than a handout? Are we so resigned to the concept of third or fourth generation welfare families that we are unwilling to take the steps necessary to give some of our disadvantaged youth an opportunity to break out of the welfare syndrome?

Gentlemen, opponents of the minimum wage are frequently characterized as lacking in compassion. I would suggest that it is far more heartless to take away someone's opportunity to achieve the dignity and self-respect which comes from earning their own way, no matter how meager that way might be.

If we are truly compassionate, then we will act to remove the source of the problem for the marginally employable. Admittedly, the answer is going to be hard to accept for some people because they are going to have to recognize that they made a mistake. The minimum wage has not accomplished what it was intended to. However, is it not better to learn from your mistakes than to repeat them?

Mr. DEL CLAWSON. Mr. Speaker, today's special order offers a welcome opportunity to debate the minimum wage issue and to take a look at some evidence which paints an entirely different picture from the rosy projections of supposed benefits of increases for low-wage workers and for the national economy as a whole offered by proponents of increasing the minimum wage. The truth is closer to a classic illustration of how "more" rapidly becomes "less" through Government intervention.

There is little evidence to indicate that low-wage workers benefit from minimum wage supports. There is more evidence to indicate that these supports actually diminish the earning potential of low-wage workers and new entrants into the job market.

In America today, the person who wishes to enter the job market part time or for the first time and knows that his services are not worth $2.30 per hour finds himself priced out of the market. The effect is to keep people who are willing to work, and could provide needed services, from needed employment. It could also be argued that minimum wage supports are, for all intents and purposes, a form of discrimination as well, since they are more likely to bar minorities, youth, unskilled, and nonunion laborers from work.

Proponents of minimum wage argue that maintaining a relatively constant purchasing power within the covered labor force will maintain and perhaps even generate employment. This is contradicted by experience. When the minimum wage goes up it is the marginal worker, newly hired, probably only partially skilled or trained who is the first to suffer, for he is the one that is squeezed out for lack of funds. Hence we find one of two situations: fewer workers laboring for a bit more money, or, fewer workers laboring for the same amount of money with the additional capital invested in machines. Either way, it is a case of minimum wage supports generating rather than alleviating unemployment.

In 1973 it was estimated that a rise in the manimum wage would cost approximately 116,000 jobs. In the last year the minimum wage has increased by a modest 20 cents; unemployment among adult males, traditionally the group first considered for available jobs, has decreased to about 5.4 percent while unemployment for black teenagers, a hard-to-place group, has increased 3 to over 40 percent. While adults who have found their place

in the work force have profited from the rising minimum wage supports, the young blacks are being denied entrance into the job market because to many employers $2.30 per hour is simply too much to pay on-the-job training.

By arbitrarily raising the minimum-wage supports we are not only harming marginal workers of today, but causing them to remain marginal workers in the future. If teens, part timers, unskilled, and first-time entrants to whom further education is unavailable or undesirable are denied the opportunity to gain work experience, we are destroying the work force of the future and making it impossible for people to become productive members of economic society when they would have done so had they been given the opportunity.

Contrary to the discrimination and inequality which increases in the minimum wage foster, the choice of the House must be the development of a healthy economic base which allows free entry for anyone who is willing and able to work even for a somewhat lower wage. Freedom of opportunity is more than an honorable tradition in the United States. It is the strength of our system and should apply equally to industry and the working population. I join my colleagues who are participating in this special order today in urging that Members of the House vote against further increases in the minimum wage.

Mrs. HOLT. Mr. Speaker, every few years there is an emotion-charged debate over the question of the minimum wage. Time and again the specter rises of workers slaving away in sweat shops for avaricious businessmen of questionable ethics. Visions come to mind of ragged, starving figures queuing up to receive their weekly pittance from their niggardly employer. Charles Dickens could not have done better in conjuring up such pitiful souls. However, the danger in this view is evident: It obscures the many, very real questions which cry out for answers concerning the minimum wage.

Among these perhaps is the most important question: What is the degree to which requiring a minimum wage contributes to our Nation's unemployment? It may be enlightening, therefore, to take a brief look at the economics of the marginally employable and how minimum wage requirements affect them.

First of all, let us define just what we mean by "marginally employable." These are individuals who lack basic marketable skills. They are frequently young, or black, or women. In many cases they have never held a job or have been out of the job market for extended periods of time. In other words, they have little in the way of qualifications which would make them attractive to an employer. For this reason employers, quite logically, are unwilling to pay a premium for their services.

It is at this point that the "Catch 22" of the minimum wage enters the picture. An employer might be willing to hire someone with marginal skills at a lower starting rate in order to allow the employee to develop the skills necessary for promotion to better paying work. However, he would not do so if the wages he had to pay were higher than what the employer expected in terms of productivity. A businessman must be concerned with productivity or else he will not be in business very long. To expect him to pay someone more than they are worth is simply foolish. The result is that the employer simply does not hire the marginal worker.

The impact of this is staggering for those who are most in need of an opportunity to develop employment skills.

According to the February 21 U.S. News & World Report, the jobless rate for nonwhite teenagers stood at 36.1 percent as of January 1977; for white teenagers the figure was 18.1 percent. This means that nearly 2 out of every 10 teenagers who want work cannot find it; and, it should be noted that this is a continuation of a trend which has been growing over the past two and a half decades. As the minimum wage rate has gone up, so has teenage unemployment.

For women entering the job market for the first time to supplement family income in these times of high inflation, the picture is much the same. In many instances these women have children at home and are looking for part-time work to help make ends meet. Here again, they may have no marketable skills but are willing to work—in fact desperate to find some way to earn extra money. And, similar to the case of the unskilled teenager, whereas an employer might consider hiring them for some marginally productive task, he is unlikely to if required to pay a high wage. The result is that 10.2 percent of our Nation's part-time employees are out of work, and no small portion of those part-time employees are out of work because of the minimum wage.

I remind my colleagues of the simple fact that rather than helping the low wage earner, the imposition of a minimum wage merely puts him or her out of work. It acts as a barrier to employers who might otherwise hire the marginal worker and give him an opportunity to learn the skills with which to move on to better paying employment. In so doing it aggravates the economic disparities which exist between black and white and between men and women. How can we expect a ghetto teenager with no salable skills to develop any if we make it impossible for a businessman to hire him? How can we expect to make inroads into getting the so-called "hard-core" unemployed back into productive endeavor if we price them out of the market? How can we speak of trying to solve the unemployment problem while taking action which will surely aggravate it?

It just does not make sense. If we truly wish to get the teenager and the hard-core unemployed back to work, then we have to make it possible for businessmen to hire them. The way to do so is to make it economically justifiable. What ever happened to the principle of paying someone what they are worth?

There are those who will argue that the purpose of a minimum wage is to accomplish just that: Without the imposition of a minimum wage, workers would be exploited. This is a gross distortion of the facts, and any logical examination of just who is paid the minimum wage easily refutes this argument. After all, it is not the skilled craftsman or the professional or even the laborer who earns the minimum wage—it is the marginal employee. As a matter of fact, the disparity between the average industrial wage and the minimum wage has generally increased since the enactment of the Fair Labor Standards Act in 1938. Simple logic should tell one that a skilled worker does not have to work for such wages. Why? Because he is more productive.

This brings us back to the basic point. The wages an employer is willing to pay are a reflection of the relative productivity of the worker. If the worker is highly productive or possesses valuable skills, then the employer is going to pay accordingly. Conversely, if the employee is performing a relatively unproductive task, then the employer is again going to pay only what he perceives the task is worth.

We must not forget that the American worker is among the best paid in the world and enjoys one of the highest standards of living in the world. This standard of living could not have resulted from exploitation. Rather it occurred through free competition in the marketptlace where skilled workers were able to obtain fair wages. To the extent that the imposition of a minimum wage interferes with the processes of the market, it serves to undermine the very things which have brought this bounty to our workers.

If we insist on tampering with the market mechanism through artificially high wage requirements, we are denying to millions of our potential workers the opportunity to learn to compete. In so doing, we are also undermining the Nation's productivity; in every instance where a potential worker was denied entry to the job market due to artificially high minimum wages, that person's productive capacity was lost to the Nation. If multiplied by the countless numbers who have been so barred, the economic impact is tremendous. Gentlemen, the minimum wage is counterproductive. It is an entry barrier to the job market; it contributes to unemployment; and it has no sound economic justification. Let us recognize it for what it is, admit that in its enactment we have erred, and take action to eliminate it.

Mr. ROUSSELOT. Mr. Speaker, I wish to commend my colleague from Oklahoma (Mr. EDWARDS) for taking this special order and giving many of us an opportunity to speak against H.R. 3744, legislation to raise the minimum wage, index it, and make other adjustments in the Fair Labor Standards Act of 1938. Mr. EDWARDS is on the Education and Labor Committee which is currently considering the issue and has been in the forefront of opposition against an increased minimum wage. We appreciate his leadership on this most important economic matter.

While many individuals believe that such an increase—$2.85 within 30 days of enactment and $3.10 by 1978—will promote a higher standard of living and help to eliminate poverty, the opposite is actually true. Through minimum wage

laws, the Government has artificially mandated unrealistically high labor costs and, as a result, many Americans are denied employment simply because employers cannot meet the arbitrary wage standards set by law. For example, an individual who is only capable of producing goods and services worth $1.50 an hour is prevented from being hired since the Government says he must produce goods and services worth at least $2.30 an hour. In the view of many, the minimum wage is actually $3.22 an hour. Payroll taxes, indirect wages, overhead costs, plus the employer's profits, increases the productivity needed to support the official minimum wage of $2.30 an hour by at least 40 percent. Thus, workers who are unable to meet such a standard, and produce goods and services worth the Government minimum wage, are forced onto welfare rolls in order to sustain themselves because they are in fact legally barred from working. Tragically, the burden falls most heavily upon minority groups and young people. It is unfortunate to consider that it is against the law to offer to underprivileged minority groups work which pays $75 a week—implicitly suggesting that it is better to be prevented from earning $75 a week and go on welfare—if one cannot earn the minimum wage of approximately $100 a week. Such a capricious and arbitrary legislative decree fattens welfare rolls and generally promotes unemployment in our country.

What will happen in the marketplace if the minimum wage is increased to $2.85 within 30 days of enactment of H.R. 3744? It could cause the loss of approximately 2 million jobs—about 271,000 of those in my own home State of California. In addition, passage of this proposal would add billions of dollars to labor costs, thereby fueling inflation. In California, we could expect to see a 4.1-percent increase for all business labor costs and a 5.1-percent increase for small businesses. Who pays for all of these increases? The consumer, of course, in the form of higher prices and reductions in goods and services. High unemployment and skyrocketing inflation are in the hallmarks of such an initiative.

Mr. Speaker, a better way to generate real income for the 89 million working men and women in this country would be to reduce the Federal tax burden. By legislating a permanent tax cut, as I have proposed, all Americans will benefit; not only low-income groups. In addition, new jobs would be created as opposed to the unemployment which will result from this latest attempt to amend the Fair Labor Standards Act.

Mr. CRANE. Mr. Speaker, before joining the dialog on minimum wage legislation, I would like to thank my good friend and colleague from Oklahoma (Mr. EDWARDS) for taking the time to organize this special order. Ever since taking office in January, he has worked long and hard, both in committee and on the floor, and this effort here today is just one more indication of his diligence.

Ever since the inception of minimum wage laws, the commonly held view has been that, without such laws, employees would be exploited by employers. Any opinions to the contrary have been variously characterized as attacks on God, motherhood, and apple pie, scandalous if not sacrilegious, and unworthy of serious consideration. Unfortunately, both the conventional wisdom and the emotional defense of it, have obscured two key facts. One is that the only beneficiaries are those who still have jobs after the law has gone into effect; and the other is that all workers are consumers.

As any student of economics knows, the law of supply and demand applies to wages and labor as well as to prices and sales. If the cost of labor goes up, either due to a shortage of workers or by artificially raising their pay, the demand for those workers will eventually go down. Sooner or later if pay continues to go up a point will be reached where the price of a given commodity will reduce sales to the point that they will not support the hiring of new personnel or even retention of existing employees. And when that happens over and over again, in not just one industry but in all, an increase in the unemployment rate will inevitably result.

Unwittingly, Secretary of Labor Ray Marshall admitted this when he testified before the Subcommittee on Labor-Management Relations not long ago. In arguing for the administration's $2.50 per hour minimum wage bill, Marshall said it would increase productivity "* * * as employers are induced to seek more effective operations." Of course, the way employers would do that is by laying off help or automating, or both.

Additionally, the laws of economics tell us that when the money supply grows faster than the rate of productivity, inflation is the ultimate result. Not only do artificial increases in the minimum wage bear no relation to increases in productivity, but the deficit financing required to employ and train those denied employment as a result of minimum wage hikes jacks up the money supply. As both events occur simultaneously, more money begins chasing fewer goods thus increasing demand which, in turn, means higher prices for everybody—minimum wage beneficiaries included.

All theory aside, the statistics bear out the fact that increasing the minimum wage also increases both unemployment and inflation, often to the detriment of the very workers who can afford it the least. For instance, the U.S. Chamber of Commerce estimates that passage of H.R. 3744—which would increase the minimum wage to $2.85 immediately and then index it at 60 percent of manufacturing wages after 1 year—would eliminate over 2 million full and part-time jobs. Teenagers, particularly black teenagers, would be hardest hit. As it is now, the unemployment rate for 16-to-19-year-olds is 18.8 percent as compared to 7.3 percent for the work force as a whole, while the unemployment rate for minorities in the same age group is 40.1 percent.

Furthermore, a study conducted by Dr. Yale Brozen of the University of Chicago indicated that as the minimum wage has been increased over the years black teenage unemployment has increased dramatically relative to the white teenage unemployment rate. Before 1956, the unemployment rate never differed by more than 20 percent; after the 1956, 1966, and 1967 minimum wage increases, the rate for young blacks was 80, 130, and 140 percent higher, respectively, and there is no reason to think that another minimum wage increase will have any different effect. In fact, the U.S. Chamber has also estimated that, if H.R. 3744 were passed, 32.7 percent of the nonwhite teenage labor force would be pushed out of the job market. Even the minimum wage proposal being suggested by President Carter would, according to the Chamber of Commerce, cost 13.6 percent of nonwhite teenagers their jobs.

Sobering as those estimates are, they may understate the case if the so-called tip-credit provision is repealed as part of an upward revision of the minimum wage. According to one estimate, some 500,000 tipped employees, most of them waiters or waitresses, would be affected by any attempt to end the practice of counting tips toward the minimum wage. At present, waiters and waitresses are averaging approximately $1.37 per hour in wages plus $2.91 per hour in tips, meaning that repeal of the tip credit would force employers to double, approximately, their service payrolls. This, in turn, would mean that restaurants would have to raise their prices sharply, which would affect us all, or reduce their cost of doing business. The latter could take two forms—either more cafeteria style self-serve operations or fewer waiters and waitresses working shorter hours and more split shifts. In either case the result would be similar to the experience in California: After repeal of that State's tip credit provision, tipped employees suffered a 12-percent reduction in jobs and a 20-percent reduction in working hours.

Instead of repealing the tip credit, which would reduce unemployment opportunities particularly for young people, what would make far more sense is a youth differential that would help young people get their first job, get some needed experience, and get started in the work world. All of us are aware of the problem young people face at the outset; one cannot get a job without experience but one cannot get experience without a job. Yet given an artificially high and all-inclusive minimum wage, it is not reasonable to expect employers, particularly those whose products have to compete with foreign goods, to pay top dollar for an unskilled worker; but many would be glad to hire and train young workers if they could pay them less. Since many young workers are students, and are living at home, they can afford to work for less and they need the training.

The other factor that needs to be considered is the impact of minimum wage legislation on inflation. Last year, the Department of Labor undertook to evaluate the effect of a $3 minimum wage, which is what organized labor is pushing for, and concluded it would affect 11.2 million workers and would increase annual wages by $6.2 billion. Obviously such an increase would dramatically increase prices. The chamber of commerce has estimated the size of such an increase at almost 4.9 percent. Even an increase to $2.53 an hour, about what the President

is proposing, would drive up prices 1.8 percent. And that does not count the inflationary impact of all those federally financed programs to employ and train those put out of work by the minimum wage.

As if those figures were not enough, all of the minimum wage bills being considered by the Education and Labor Committee include provisions to make future minimum wage increases take place automatically. At present, the minimum wage level is—and has been—roughly 46 percent of the gross hourly earnings of production workers in manufacturing. Under the administration proposal, the minimum wage would be raised to the 50-percent level and kept there while the proposal sponsored by the AFL-CIO would index the minimum at 60 percent of average hourly manufacturing wages. The rationale for this automatic escalator feature is that the purchasing power of the minimum wage should not be eroded by inflation; the reality is that its enactment insures that it will be. With indexation of the minmum wage, cost-push inflation will literally be institutionalized with disastrous results for everybody, particularly senior citizens on fixed incomes who do not benefit from the minimum wage increase in the first place.

Perhaps the biggest irony of requiring that wages spiral automatically upward in times of inflation is that when a fixed minimum wage was first established in 1938, the idea was to keep wages from spiraling naturally downward in times of deflation. One then wonders why it is not just as bad to tie the minimum wage to private sector wages in times of inflation when too much inflation can lead to recession or even depression. If we must have a minimum wage and the minimum wage is to be tied to anything, let it be tied to productivity which would give workers a positive incentive to produce more and to be more efficient. That is the only way Secretary Marshall's analysis will ever come true without even worse side effects.

Given all these adverse effects, and the number of people who would be hurt by them, the question is who really wants this legislation and why? For the answer to that we need to look no further than the primary moving force behind this bill, organized labor, and to ask ourselves why an organization representing 22 percent of all American workers is so interested in legislation that ostensibly will help out the other 78 percent—few union workers are making only the minmum wage.

The reason organized labor wants this bill passed is because while it will help out some nonunion workers, it will help out unionized workers far more. For one thing, raising the minimum wage for nonunion members will reduce the wage differential between union and nonunion workers thereby making it easier for the unions to "justify" even higher wage demands by their own members. But, even more importantly, by keeping young people and more and more nonunion workers out of the work force, the unions protect the jobs of their own members. In short, what the unions want is higher wages and greater job security for their own members but not for anyone else. And to cover their intentions, and public reaction to them, they push for publicly financed job training and public works programs which ostensibly will take care of the victims of the minimum wage increase. Of course, the job-training programs are often unrelated to specific job vacancies and public works projects do not provide permanent employment. But consciences are balmed, and the truth is successfully obfuscated, all at the expense of the American taxpayer.

In that context, it is interesting to note that in the last year Congress has extended CETA—the Comprehensive Employment Training Act—continued the Job Corps, passed a $2 billion bill for public works construction and is about to add another $4 billion to public works construction. Can it be pure coincidence that now we are being asked to consider minimum wage legislation? If not, Congress should question the wisdom of robbing Peter to pay Paul.

If Congress is really serious about reducing inflation and unemployment, it should reject any major increase in the minimum wage at this time. Even more importantly, it should reject any suggestion that the minimum wage be tied to the average hourly earnings of production workers in manufacturing. Such an indexation would simply institutionalize inflation and erode the purchasing power of all Americans. Moreover, it would make the companies of this Nation even less competitive in world markets which in turn would adversely affect employment. Understandably, everybody wants to make more money, but as Abraham Lincoln once said: "You cannot help the wage earner by pulling down the wage payer."

In the final analysis, the key to economic prosperity is increased productivity. Instead of increasing the minimum wage, which bears little relation to productivity, what Congress should be doing is reforming the tax code in such a way as to stimulate the creation of investment capital which in turn will mean plant expansion, more jobs, higher profits and ultimately higher salaries—all without inflation. Enactment of such a program would inure to the benefit of all workers, union and nonunion alike, without being a detriment to everyone else.

Mr. ARCHER. Mr. Speaker, in this time of high unemployment, it is incumbent upon each of us to do our utmost to get our Nation's economy back on its feet. In spite of this weighty responsibility, however, there is currently before us a measure which would go a long way toward accomplishing the opposite result. What is worse is that the brunt of the deleterious impact of that measure would be felt by those least able to bear up under it: the marginally employable. The measure I am speaking of proposes to raise the level of the required minimum wage. It is allegedly aimed at assisting those at the lower end of the income scale. Its effect, however, will be to put those persons out of work.

Time and again, the Congress has been presented with evidence that demonstrates the major effect of minimum wage laws is to decrease the number of opportunities for the marginally employable. But do we listen? No. Time and again the debate centers not on whether or not we should have a minimum wage but rather on how much that minimum should be. Gentlemen, it does not matter what the minimum wage is if the persons whom it is intended to benefit are not offered employment.

With the declining level of capital investment that our country has experienced over the past several decades, it is going to be well-nigh impossible to provide sufficient jobs for those entering the labor market unless drastic steps are taken to reduce barriers to employment. One of the primary barriers to initial employment comes in the guise of the minimum wage. Does anyone in this Chamber honestly believe that an employer can afford to hire someone at a wage which is higher than what that employer expects the individual to produce? I would certainly hope not. And if one accepts the premise that an employer is going to pay a worker a wage which reflects that worker's productivity, does it not stand to reason that in setting a minimum amount which an employee may earn we are also setting a level of productivity below which no one will be hired?

The logic should be inescapable to any rational examination. Perhaps the Federal Government can afford to hire people to do nothing; my constituent files would certainly indicate that this appears to be the case in some of our Federal agencies and bureaus, but a business cannot.

A business enterprise is set up to make a profit, and they cannot do so if they have to pay people more than they are worth. Therefore, as the minimum wage goes up, the marginal employee—the one whose productivity is just at the level which justifies the previous minimum wage—is going to be discharged. the employer may not wish to discharge that employee and in fact might have kept him on at the lower figure; but the higher wage level removes the economic rationale for that worker's job.

Perhaps the most obvious example of the effect of the minimum wage increases over time is found among minority teenagers. The rate of unemployment for this group has consistently gone up with each successive increase in the minimum wage. It currently stands at over 37 percent. That means that nearly 4 out of 10 minority youth who are willing and able to work are unable to find any. While it may not be that all of this figure is represented by jobs eliminated by the imposition of a minimum wage, it should be pointed out that in 1951, before coverage under the Fair Labor Standards Act was as extensive as it is now and before minimum wage rates were as high as they are now, the unemployment rate for the same group was less than half the current rate. I cannot believe that there is no relationship between the two figures.

Gentlemen, while we talk of achieving "full employment" and speak of reducing the level of unemployment to under 4 percent, we are ignoring the fact that many of the measures we are proposing

are contributing to the increase in unemployment. In the case of the minimum wage law this is especially true. It is estimated that our Nation is going to need some 19.3 million new jobs in order to attain the 4-percent unemployment figure. The unfortunate thing is that individuals never will get a chance to enter the job market and develop the skills which will enable them to better themselves, that many of our poor and our minority youth will be trapped into living from the public trough without the opportunity to take that first step out of the ghetto, that much of the productive capacity of the Nation will be lost because of federally mandated barriers to entry into the labor force. It is an appalling situation, but there is an alternative solution. The alternative takes courage, however. It is to recognize the minimum wage for the problems it creates.

Mr. ABDNOR. Mr. Speaker, I would like to join my distinguished colleagues in opposing H.R. 3744, the minimum wage bill. I strongly believe that any increase in the minimum wage would only serve to put more people out of work and fuel our high inflation. Those groups that would suffer the most from such a proposal are those that are already suffering from high unemployment, such as our young people, the handicapped, and our minority groups.

I am especially opposed to any kind of minimum wage indexing mechanism, which has been proposed in H.R. 3744, and also by the administration. Such indexing provisions are perfect examples of built-in inflation and would be a serious blow to our Nation's economy. At a time when inflation is dangerously high, and threatening to go even higher, it is incredible that we are even considering such a proposal. If the minimum wage was tied to an index, it is very likely that we would never be able to get a handle on our inflation problem.

It is paradoxical that those groups which are arguing for a higher minimum wage are the first to complain when these proposals increase business costs and put more people out of work. And as a solution, Congress is expected to respond to this forced unemployment by providing public work job programs.

It has been clearly shown by a number of studies that increased inflation and higher unemployment can be directly attributed to minimum wage increases. It has to be remembered that such an increase would affect not only those individuals earning less than the new level, but also those who are presently earning more. In order to maintain wage differentials, all wages will rise at all levels. Because of these wage relationships, a self-perpetuating indexing mechanism will guarantee annual inflation.

An indexing of the minimum wage will also guarantee annual unemployment. Whether the labor bosses in this country will admit it or not, our small businesses cannot afford to absorb a wage increase without either raising prices or reducing the number of employees. Usually a business is faced with doing both. To give you a good example of the effects of a minimum wage increase, let me quote from a letter that I received last week from a small businessman in South Dakota:

> We have been in the retail business since 1922 and have seen good years and bad years. In 1975, due to both inflation and the drouth, we suffered a small loss, our first loss since the 1930's. And in 1976, out net profit was less than 1% of sales; so we do not have any leeway or "fat" in our operation to absorb any wage increases and would have to raise our prices and hope that the customers would pay these increases, and also reduce our number of employees and store hours. The history of previous minimum wage increases has proven this to be the case. In April 1974, we had 17 employees; today we have 13 employees and they are working shorter hours per week.

I would like to emphasize the fact that the above example is not an isolated case, but is representative of many of our businesses in South Dakota and the Midwest. One of our hospital directors has indicated that H.R. 3744 would increase the hospital's annual payroll by at least $300,000. In order to accommodate the increase, they would have to lay off 20 to 30 employees, and their patient care programs would ultimately suffer. I have received a great many similar responses from businesses, both small and large, in South Dakota, and virtually all of the input that I have received from my constituency has been in strong opposition to an increase in the minimum wage as proposed in H.R. 3744.

One popular justification of increases in the minimum wage is that the increase will be absorbed by wealthy owners or through a lower profit margin. Numerous studies of the impact of minimum wage legislation indicate that what actually occurs in that the workers bear a good part of the cost of increases in the minimum wage through man-hour reductions and other types of adjustments, including price decreases for material suppliers, reduced quality of customer services, and price increases for consumers. Also, there is evidence to indicate that the more workers affected by the increase, the more likely it is that they will suffer some direct hardship as a result of it. The more substantial the payroll costs of the increase in the minimum wage, the more adjustments are made in worker assignments and hours.

Perhaps the worst impact of the minimum wage affects the small retailer. It is a harsh reality that minimum wage rates do force some firms to close and others to shift to new industries. There are some who would argue that the decrease in the number of small firms in these industries is not really bad. They would argue that the firms were probably marginally productive and that their elimination makes the industry more efficient as a whole because larger plants can take advantage of economies of scale. This, however is not borne out by the evidence. Size is no guarantee of efficiency, and the undermining of small firms by the minimum wage may in fact be contributing to a decline in productivity rather than the opposite.

I would like to make special mention of the impact of a minimum wage increase on teenagers, the handicapped, and part-time workers. Businesses have historically trained young people by providing them job opportunities at pay levels usually commensurate with the minimum wage. If the minimum wage becomes too high, businesses would be much better off to hire full-time, experienced personnel. There are experienced individuals who would be ready and willing to work at a guaranteed high minimum wage, and employers would understandably be justified in turning to them over young, inexperienced workers. The unemployment rate for our youth in this country is disgracefully high, and it would be a crime to take away those opportunities, however limited, that are presently available. Our businesses have also provided employment for our handicapped citizens by giving them opportunities to develop their job skills. Again, if the minimum wage becomes too high, these individuals will be priced out of the market and we cannot realistically expect our small businesses to pay unreasonably high wages to provide these training opportunities because they simply would not be able to afford it.

Mr. Speaker, in conclusion I would like to again urge my colleagues to defeat H.R. 3744 and any other unreasonable minimum wage proposal that might come before us in the House. An increase in the minimum wage would put a severe strain on our struggling economy. It would fuel inflation and increase unemployment, and it would be a slap in the face to those disadvantaged groups which we have so often sought to help. The weight of evidence argues against an increase in the minimum wage, and it especially argues against an indexing scheme such as that proposed in H.R. 3744. Congress must recognize this legislation for what it is—a mechanism to obtain higher wages for union employees, without regard to the adverse consequences—and we must defeat it when it comes up for consideration in this body.

Thank you very much.

Mr. GRASSLEY. Mr. Speaker, it simply cannot be denied that, at this point in time, an increase in the minimum wage will be inflationary. We have been fighting inflation for several year now, and to pass legislation which will only cause it to increase is to negate all the efforts of recent years, in other words, foolish.

Earlier this year Arthur Okun, a former chairman of the Council of Economic Advisors under President Johnson, stated, in testimony before the Senate Budget Committee, that he was opposed to an increase in the minimum wage to $3. His opposition was based upon statistics which indicate that such an increase is tantamount to an across-the-board wage increase of 2.5 percent—an increase that will be paid by consumers in every sector of society. Minimum wage supports are said to help the low-wage worker, but, with the above figures in mind, how can this be? We raise his wages, and costs go up all along the line. We effectively price him out of the consumer market.

A study by Edward Gramlich from the Brookings Institution indicates that if

the minimum wage had been increased in 1974 from $2 to $3 the increase would have produced "nearly permanent one-shot upward change in the rate of price inflation." The same effect will be produced by a massive increase in the minimum wage now.

The minimum wage is intended to redistribute income to persons at the lower end of the economic spectrum. However, inflation, which is aggravated by precipitous increases in the minimum wage, hurts the low-wage earner more than nearly anyone else. Only those on fixed incomes suffer more.

So far my comments have primarily focused upon the inflationary aspects of an increase in the minimum wage. There is another factor to be taken into account which is of greater, if not equal, importance. It follows as night does day that any increase in the minimum wage would also cause greater unemployment—especially among young people and minorities.

A recent study concluded that should H.R. 3744 become law the price would be 2,700,000 jobs. The administration's proposal, while less objectionable, is still bad in that it causes a loss of approximately 900,000 full and part-time jobs.

Those groups within our society who already suffer from the highest rate of unemployment would be those most adversely affected by an increase in the minimum wage level. These are, as I earlier said, the blacks, Hispanics, and other minorities, as well as our young people. We have heard a good deal of talk about the need to find summer jobs for these persons. The passage of a new minimum wage level would mean that there will be fewer year-round jobs and a commensurate decrease in summer job opportunities.

There are already too many Americans who never have held a job and whose prospects for ever securing employment are grim. We should not swell the ranks of what may be referred to as the hopelessly unemployed by throwing, more Americans out of work.

Additionally, the best vocational education we can provide young people is entry into the labor market. Let's not make job entry more difficult for these people.

In conclusion, we should be aware of the problems that both inflation and unemployment cause in every sector of our society. These considerations far outweigh the advantages of increasing the minimum wage. Let us not make an already bad situation worse.

Mr. HANSEN. Mr. Speaker, since 1938, the Federal Government has attempted to dictate a wage floor for American workers. Today, we are asked once again to raise this floor. We are asked to do so in the name of charity. But there is no charity where sacrifices are imposed on unwilling and uncomprehending taxpayers. We are asked to increase the minimum wage in the name of patriotism—that we must do more for our country, for our fellow men, than for ourselves, and that when we do not sacrifice for ourselves we should feel guilty for our egotism and greed. I suppose it is a cliche to repeat once more that our country was founded on sacrifices which individuals gave for themselves or for those whom they chose to support and not on the forced levies imposed by special organized interest groups or by Byzantine bureaucracies. It may be a cliche, but expressions become cliches because they are often repeated; and when things are often repeated, it is frequently because they are true. In the case of the minimum wage, however, we do not have to rely merely on the traditions of our ancestors. We have the most sophisticated economic analyses of our time to support this wisdom.

The truth is, Mr. Speaker, that modern economists have shown repeatedly that minimum wage laws contribute to unemployment. An employer, especially one in a small business which he owns and operates himself, cannot afford to hire as many workers at a higher level of wages as he could at a lower level. When, therefore, he is forced to increase his wage payments for all his employees, he must cut back, lay off—in a word, fire—those workers he judges to be least efficient and least valuable for his enterprise. In practice, what this means is that the victims of minimum wages are often from those very groups whose problems and afflictions have become national problems: the poor, the black, the young, the female. Some years ago, according to Prof. Yale Brozen, University of Chicago, the crabmeat packaging industry in North Carolina was virtually wiped out, made extinct, because the minimum wages were raised at a Federal level. Ironically, perhaps to judge from the professions of many who advocate higher minimum wages, one of the biggest supporters of this particular increase was the New England crabmeat packagers. They knew that their transportation costs to the big, Northeastern markets for crabmeat were much lower than those of their Southern competitors, that with the increase in labor costs the higher wages would cause, the Southerners would be in trouble. And they were right. Perhaps it will give our perpetual critics of free enterprise, the malcontents, who never tire of downgrading business, some pleasure to learn that this Southern industry is now almost nonexistent. Perhaps it will also please them that the several thousand women who worked in this industry were thrown out of their jobs, and that the efforts of one of our poorer regions to better its economy were cruelly crushed.

Blacks, also, in the large Northern cities where they have increasingly moved, are hurt by minimum wage hikes. Not only do such increases result in joblessness for young black men and women, but also they force them into competition for unskilled jobs, which, as they are increasingly overcrowded, become more and more difficult to find. In other words, minimum wage laws contribute to the overcrowding of some types of jobs and the grotesque misallocation of our human labor resources. Let us say that an employer has hired two men at $1 an hour. Because they are different individuals, one is better at his job than the other. Then we in Congress decide that $1 an hour is not enough, and we make this employer pay each of them $1.20 an hour. But the employer can afford to pay only $2 an hour, $80.00 a week, for his labor costs. He cannot afford the $2.40 an hour, the $95 a week which our 20-cent increase would make him pay. So he must cut back on his labor costs by firing the least valuable of the two men. The victim in the employer's judgment is simply not worth $1.20 an hour, though his job may well be worth a mere $1. Unfortunately, it so happens that among the least skilled and valuable workers are those in the minority groups of our Nation, and it is they, Mr. Speaker, who must frequently get the ax.

My figures, of course, are hypothetical, but real ones—too complicated to be given here—are easily available to anyone who is willing to look for them.

Mr. Speaker, I include for the RECORD at this point information entitled "Federal Minimum Wage and its impact on the State of Idaho by Dr. Jack Carlson, vice-president and Chief Economist of the U.S. Chamber of Commerce:

An increase in the minimum wage is not like an increase in welfare payments. Wages are paid on the basis of the value of a worker's contribution to a product or service that a consumer is willing to purchase. Consequently, government-directed increases in wages make it impossible for business to hire inexperienced or less skilled workers. As a result, these workers become discouraged and cannot find jobs anytime now or in the future. This is a key reason why participation in the labor force and unemployment rates remain unsatisfactory even during good times and why public sector jobs are proposed by the same lawmakers that caused the problem by increasing the minimum wage.

Rep. Dent (D-Pa) and the AFL–CIO support an increase in the minimum wage from $2.30 to over $3.00 an hour with a built-in automatic increase each year to maintain the minimum wage at 60% of manufacturing wages, elimination of the tip credit, and elimination of a lower minimum wage for youth workers.

Applying the best study available, if the reaction to this increase is similar to what resulted from minimum wage increases in the past, this proposal could cause the loss of 2 million job opportunities that will not be created as a result of the higher minimum, plus 700,000 layoffs, 4.4% higher labor costs for all businesses, but 5.4% higher labor costs for small businesses which would reduce competition, and 2.9% higher consumer prices for all Americans.

The State of Idaho could lose about 9,000 jobs—2,000 jobs for adult women; 300 jobs for young male minorities (through age 24); and 400 jobs for older workers (65 and over).

Idaho would also experience a 5.0% increase in labor costs for all businesses; 6.2% increase for small business; and 3.6% increase in consumer prices. Of those workers still employed and at or near the minimum wage, only about one-half would be from household receiving low incomes. Increases in the minimum wage is an undesirable and cruel way to help a few households increase low incomes.

The Administration proposed a more reasonable increase in the Federal minimum wage from $2.30 to $2.50 with automatic adjustments to maintain 50% of average man-

ufacturing wages. However, even this seemingly moderate increase could cause a loss of 900,000 full and part-time jobs, an increase in labor costs of 1.4% for all businesses and 1.8% for small businesses, and an increase in consumer prices of 0.9% for Americans.

Under this proposal, Idaho would lose about 3,000 jobs: 700 adult women; 1300 white teenagers; 100 nonwhite teenagers; 600 white workers ages 20–24; and 100 older workers (over 65). Labor costs would increase by 1.6% for all businesses, 2.0% for small businesses, and consumers would have to pay about 1.2% higher consumer prices.

By way of contrast, the stimulus program proposed by President Carter in January was expected to create about the same number of jobs. What government giveth, government can taketh away.

Idaho would be better off without an increase in the minimum wage. If an increase is enacted it should be modest, not tied to automatic adjustments and recognize the importance of retaining a full tip credit and provide a 25% youth differential.

Mr. Speaker, minimum wage laws, so far from being humanitarian, charitable, or patriotic, are economically unsound and socially cruel. Too often, they are the weapons of special interests in labor and business in their war against their competitors. I urge my colleagues to reconsider their idea about this outmoded, 40-year-old abuse.

GENERAL LEAVE

Mr. EDWARDS of Oklahoma. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to extend their remarks and include extraneous material on the subject of my special order today.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

PERSONAL EXPLANATION

The SPEAKER pro tempore (Mr. OBEY). Under a previous order of the House, the gentleman from Montana (Mr. MARLENEE) is recognized for 5 minutes.

Mr. MARLENEE. Mr. Speaker, on rollcall 150 yesterday, I am listed as having voted "Nay." I should have been recorded as voting "Yea."

REPORT ON VISIT TO EAST TIMOR

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. GOODLING), is recognized for 10 minutes.

Mr. GOODLING. Mr. Speaker, last week I asked that my observations from a recently completed trip to Panama be included in the RECORD. Today, I ask that my observations from an equally important international trip also be included in the RECORD.

This time my remarks refer to the lesser known area of East Timor, an island in the Indonesian chain. I traveled to this remote area of the South Pacific at the request of the International Relations Committee and the State Department. I met with literally thousands of East Timorese who are trying to recover from a recent civil war. As the below report explains, I left the island with a new perspective on future United States-East Timorese relations.

I think it is important that each Member of the House take a few minutes to read my observations. I hope they shed some light on this relatively unknown part of the world:

REPORT ON VISIT TO EAST TIMOR FROM: CONGRESSMAN BILL GOODLING

After approximately 63 hours of flying time and 25 hours of sleep over a seven day period, I would offer the following summary of my findings, impressions, and conclusions of the trip I was requested to make into East Timor, which has just recently become part of Indonesia after 400 plus years of Portuguese rule.

As a way of background, two subcommittees of the International Relations Committee, under the co-chairmanship of Congressman Wolfe and Fraser, held hearings concerning the use of American arms by the Indonesians while attempting to end the civil war in East Timor. The war broke out when Portugal left East Timor before successfully arranging a peaceful takeover by the 3 major Timorese factions. Unfortunately, the one group—Fretelin—fell heir to probably as many as 15,000 weapons. After the apparent killing and torturing of many thousand Timorese, the Indonesian government moved in.

I flew from Washington to Tokyo and on to Jakarta (approximately 21 hours). Our ambassador in Jakarta "leaned on" General M. Pangtabean, Commander of Indonesian forces, to permit my entering East Timor—something that has not been permitted since the fall of 1975. However, our 7 seater Air Force plane, based in Jakarta, was only permitted to go as far as Kupany in West Timor. An Indonesian bush pilot crew took me on to Dili in East Timor accompanied by Al Lehn and Chuck Green of the Embassy—two tremendous partners—as well as Col. Subiakto, Col. Damanik and Mr. Dahlan of the Indonesian government, which made it a 7 hour trip.

We were met by more than 12,000 Timorese and we traveled from Dili to Bacau to Viqueque to Bobonaro via "bush pilot," helicopter and jeep transportation. As I shook some 6,000 hands of many Timorese who never saw an American before, and who walked as much as 10 miles to greet us, the cry was the same, from tribal chiefs to civil authorities, to the Bishop, the Spanish and Italian priests, and the Spanish nuns and the masses whose education was neglected by the Portuguese: "Please let's put the horrible civil war with all its atrocities behind us and move ahead toward a hopefully better new life."

I listened to an elderly Portuguese gentleman who has lived in East Timor for 41 years tell of the natural death of his wife, the murder of 2 of his sons by the Fretelin and the story of how his 3rd son is the Finance Minister of these very same Fretelin. The Bishop indicated it was war and both sides were guilty—the Fretelin atrocities caused because the Fretelin leadership ordered it and the Indonesian improprieties because of the actions of individual soldiers. Young priests in Baccau expressed concern that there may be more Fretelin action yet to come than the Timorese civil authorities think—opinion somewhat shared by the Sisters in Bobonaro who, it would appear, have some contact with the Fretelin. I was entertained by a brother of Horta, a leading Fretelin, who apparently has been given a 3 month visa to come to the United States. The teenage brother is the soloist and lead guitarist in one of the Vice Governor's newly formed bands. Many Timorese believe the several shipments of guns and ammunition that came in during the war were brought by the Australian Red Cross—a view apparently shared by the Governor but not by the Vice Governor who believes they were imposters carrying Austrilian Red Cross flags. Many tragic tales were repeated over and over again resulting in, perhaps, 40,000 to 60,000 deaths.

The following are my conclusions:

1. Yes, the Indonesians did use American arms, although they tried, I believe, to first not enter the fray at all and then use inferior weapons of other nations including Yugoslavia, before finding it necessary to use ours.

2. Our concern should be how we can help heal the civil war wounds and get them on to some road to recovery toward hopefully better than anything they have known in the past.

3. All wars are hell but this civil war illustrates how civil wars are doubly so.

4. No way could any Independent East Timorese Government survive—their only hope is a union with Indonesia and, because the country has so little to offer, there isn't too much hope even then.

5. Their only export of any means was coffee, and these plantings must be restored as quickly as possible.

6. The Indonesians should have entered the fray much earlier and perhaps more lives could have been spared.

7. The young Timorese Vice Governor is one of the most compassionate leaders I have ever met.

8. The Bishop, priests and nuns all indicated that things have been better the last several months and all indicated if they see something wrong by the Indonesian army the Indonesian leadership listens to them and corrects the problem and the same is true of the civil authorities. They desperately need medical supplies to combat malaria and tuberculosis.

9. No one can want the area for any reason other than security for it will be a financial noose around Indonesia's neck for years to come and maybe forever. The Japanese failed on two occasions to find enough oil to make drilling profitable. There are beautiful beaches available to attract tourism—but who has billions of dollars to construct the necessary communication and transportation facilities as well as the hotels?

10. The Indonesians estimate there are still 2,000 to 2,200 Fretelin in the hills who hit and run about 3 times a week.

11. The Indonesian Commander and the young Timorese Vice Governor, Lopes da Cruz, are dedicated to making the union work for the best of all Timorese and to prevent further suffering.

12. I can only surmise that the Australian Jim Dunn must have some personal interest in trying to prevent the union; hence his traveling about trying to bring world attention to the situation.

PANAMA CANAL—MAJOR MODERNIZATION AN IMPERATIVE NECESSITY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. FLOOD) is recognized for 10 minutes.

Mr. FLOOD. Mr. Speaker, the solution to the Panama Canal issue is to continue the work which has begun. The solution is major modernization. This large engineering and construction undertaking for the major increase of capacity and improvement of operations of the Panama Canal is a subject that has been under consideration for many years. The first positive step in that direction was the authorization by the Congress in 1939, on the eve of the outbreak in Europe of World War II, of what was designated as the third locks project.

The original plan for that project provided for a third set of larger locks (140' x 1200') for larger vessels near each of the existing locks (110' x 1000') and for joining the proposed new locks with existing channels by means of bypass channels.

Started in 1940, construction was on a "rush basis." Following the attack on Pearl Harbor, more urgent war needs for manpower, materials, and vessels led to the suspension of work after the expenditure of $76,357,405. The principal parts completed included two huge lock sites excavations at Gatun and Miraflores, the bed for relocating the Panama Railroad from its present site near the existing Gatun Locks to the east of the proposed new set of Gatun Locks, and a railroad-vehicular bridge across the Miraflores Locks. All of these contributions can be utilized in the major modernization of the canal. No excavation was undertaken at Pedro Miguel, which, as will be shown later, was fortunate.

Mr. Speaker, for an extensive bibliography on the "Isthmian Canal Policy of the United States," attention is invited to remarks by Representative Clark W. Thompson of Texas, former chairman of a special subcommittee to investigate the financial operations of the Panama Canal, in the CONGRESSIONAL RECORD of March 23, 1955, page 3610. Those remarks list many authoritative references in an immensely complicated subject and would be most helpful to those seeking background information on the present canal situation.

A post World War II project for improvement of navigation in the Panama Canal was the enlargement of Gaillard Cut from 300 feet minimum width to 500 feet. Started in 1959 and completed in 1970 at a cost of some $95 million, this work brought the total expenditures toward major canal modernization to more than $171 million—$76 million plus $95 million.

The suspension of the third locks project in 1942 enabled its restudy in the Panama Canal organization in the light of both war and peace operating experience. Those studies resulted in the preparation and submission of what is known as the Terminal Lake-third locks plan.

This plan includes the removal of the bottleneck Pedro Miguel locks the relocation of all Pacific locks in continuous steps near Aguadulce, which is just south of Miraflores, the creation of a summit-level terminal lake in the Pacific sector of the canal, and raising the maximum summit lake level 5 feet from 87 to 92 feet. The lock arrangment in the Pacific and of the canal would then correspond with that of the Atlantic end, and can be accomplished with every assurance of success.

Recognized by experienced ship canal engineers, navigators, including Panama Canal pilots, economists, and other experts as providing the best solution of the canal problem at least cost, it won the approval of President Franklin D. Roosevelt as a postwar project but is still in a suspended status.

As stated in a 1975 Memorial to the Congress on "Panama Canal: Sovereignty and Modernization" by the Committee for Continued U.S. Control of the Panama Canal of Fairfax, Va., competent, experienced engineers have officially reported that all "engineering considerations which are associated with the plan are favorable to it." Moreover, this committee emphasizes that such solution would—

First. Enable the maximum utilization of all work so far accomplished on the Panama Canal, including that on the suspended third locks project.

Second. Avoid the danger of disastrous slides.

Third. Provide the best operational canal practicable of achievement with the certainty of success.

Fourth. Preserve and increase the economy of Panama.

Fifth. Can be constructed at "comparatively low cost."

Mr. Speaker, the major modernization of the existing canal under the Terminal Lake-third locks solution can be under existing treaty provisions. It does not require the negotiation of a new treaty. These are paramount considerations and should be controlling.

The people of the United States and the Congress have always opposed the huge expenditures of public funds for a canal project at Panama except in territory under the sovereign control in perpetuity of the United States. Any other policy would place the United States in the untenable position of being saddled with grave responsibility without adequate authority.

As previously indicated, in the proposed major modernization there are two problems: First, increase of capacity; and second, operational improvement. Though separate, the two are closely related.

There are two aspects in the capacity problem: First, increasing the number of transits; and second, increasing canal capacity for larger vessels. While certain relatively minor changes of nonbasic character in the existing canal can enable the transit of additional numbers of vessels, they will not increase canal capacity for handling larger vessels in existing locks (110'x1000') or channels. The operational improvements demonstrated by prolonged experience, in addition to larger locks, include removal of the Pedro Miguel Locks from their position at the south end of Gaillard Cut, the creation of a summit level lake in the Pacific end of the canal to serve as an expansion chamber for traffic, and correlated channel improvements in Gatun Lake, especially at channel bends.

Mr. Speaker, the future need for the transit of larger tankers, which the canal cannot now handle, with fuel oil from Alaska to the industrialized east coast stresses the importance of major modernization as an imperative necessity. The time for further procrastination is over.

In order to provide the indicated increased transit facilities, my most distinguished and able colleagues from New York (Mr. MURPHY) and from Kentucky (Mr. SNYDER) and I have introduced proposed legislation to resume construction on the canal modernization project modified and improved to provide the previously mentioned summit-level terminal lake in the Pacific sector of the canal. Special attention is invited to its sections 2 and 15.

The indicated measure follows:

H.R. 1587

A bill to provide for the increase of capacity and the improvement of operations of the Panama Canal after the President terminates negotiations by the United States with the Republic of Panama to surrender the Panama Canal and the Canal Zone to the Republic of Panama, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Panama Canal Modernization Act."

SEC. 2. The Congress hereby finds and declares that—

(1) the United States of America is a high contracting party to the Hay-Pauncefote Treaty of 1901 in force with Great Britain;

(2) the treaty serves as the basis for daily regulation and management of the Panama Canal, including the establishment of tolls for use of the canal;

(3) the treaty imposes upon the United States obligations to uphold "the general principle of neutralization" of the Panama Canal; to maintain it "free and open to the vessels of commerce and of war of all nations observing these rules, on terms of entire equality, so that there shall be no discrimination against any such nation, or its citizens or subjects, in respect of the conditions or charges of traffic, or otherwise"; to insure that "the canal shall never be blockaded, nor shall any right of war be exercised nor any act of hostility be committed within it"; and "to protect it against lawlessness and disorder";

(4) under the direction of the President, the United States Department of State, despite the obligations of the United States under the treaty, has been negotiating with the Republic of Panama to cede the Canal Zone and Panama Canal to that country;

(5) such cession would render the United

States incapable of fulfilling its obligations under the treaty;

(6) further, the United States is a party to a treaty with the Republic of Colombia signed April 6, 1914, by which that country recognizes the title to the Panama Canal and Panama Railroad as "vested entirely and absolutely in the United States of America, without any incumbrances or indemnities whatever", and by which the United States guarantees that "the products of the soil and industry of Colombia passing through the canal, as well as the Colombian mails, shall be exempt from any charge or duty other than those to which the products and mails of the United States may be subject", an obligation we could not fulfill upon the surrender of the Canal Zone and waterway to the Republic of Panama or to any international organization;

(7) the undertaking of the United States in constructing, maintaining, operating, sanitating, and protecting the Panama Canal has proven to be of enormous benefit to the people of the United States, the Republic of Panama, and the entire world;

(8) the interests of defense and interoceanic commerce, and the increasing dimensions of ships, require an increase of canal capacity and operational improvement of existing facilities and installations;

(9) the greater marine operational and logistical capability resulting from a modernization of the canal based on decades of actual experience in transiting over half a million vessels would permit increased canal revenues; improved efficiency and economy of operations; simplified canal management and defense; capacity for handling larger ships, lessening of transit time; increased safety through diminished navigational hazards; reduction of fatigue factors for pilot personnel; minimization of dispatching problems; and a summit level lake anchorage and traffic reservoir at the Pacific end comparable to the Gatun Lock-Lake arrangement at the Atlantic end, allowing unrestricted operation of all locks, elimination of traffic bottlenecks, mitigation of the effect of fog on canal operations, and lessening of lockage water surges in Gaillard Cut;

(10) in addition to stimulating United States trade, industry, and employment, canal modernization would bring major benefits to intercoastal and international commerce and to hemispheric states, including reduced cost per cargo-ton to United States and foreign producers, suppliers, and consumers of the world's goods, as well as to canal users; generation of greater economic well-being for the American nations through improved trade and communication; strengthened hemispheric security through the canal's increased capacity for marine operations, and increased prosperity and economic opportunity for the people of the Republic of Panama by virtue of the enormous outlays for new construction involved in this Terminal Lake—Third Locks Project in the Canal Zone;

(11) canal modernization by the United States, initially called the Third Locks Project, was authorized by Congress in 1939 at a cost not to exceed $277,000,000, was started in 1940, but was suspended in 1942 because of World War II priorities;

(12) $76,357,405 was expended on that project before suspension, and later an additional $95,000,000 was expended on the enlargement of the Gaillard Cut, making a total of $171,000,000 already expended toward the major modernization of the existing canal;

(13) no new treaty or agreement with the Republic of Panama was necessary for the United States to initiate such modernization in 1939 inasmuch as the United States, in accordance with the Spooner Act of 1902, and the treaty of 1903 with the Republic of Panama, paid that republic $10,000,000 to acquire control of the Canal Zone; the Republic of Panama by said treaty of 1903 granted to the United States in perpetuity full sovereign rights, power, and authority over the Canal Zone, "to the entire exclusion of the exercise by the Republic of Panama of any such sovereign rights, power, or authority" (a grant recognized and not changed by subsequent treaties of 1936 and 1955 between the two nations); Panama by said treaty recognized as absolute the title of the United States to all lands and properties and rights purchased from the several companies holding railroad or canal concessions on the Isthmus of Panama; and under said treaty the United States took title to all remaining privately owned land property in the zone, purchasing such tracts from individual owners;

(14) completion under this Act of such modernization as modified and improved by additional experience with canal operations and current technology requires no new treaty arrangements with the Republic of Panama;

(15) it would be both unwise and a shedding of its responsibility to the citizen-taxpayers of the United States for the Congress to authorize any funds for modernization of the Panama Canal should there be any relinquishment or surrender of the sovereign rights, power, and authority currently exercised exclusively by the United States over the Canal Zone and the waterway;

(16) although one reason for approval of modernization in 1939 was to facilitate conversion of the Panama Canal to a so-called "sea level" waterway, at this time all factors in combination indicate no weighty advantage to be gained in converting the existing high level lake and lock canal to a "sea level" canal—actually a tidal level lock canal of very complicated construction necessitated both by alternating currents that would be set up by twenty-two-foot Pacific maximum tidal range versus Atlantic tidal range of only some twenty-two inches, and by flood control requirements—or in the construction of a new "sea level" canal at a different site, prior to either of which treaty modifications or new treaty arrangements, respectively, would have to be reached; nevertheless should new technology of the future or other considerations indicate a conversion of the Panama Canal, expenditures made in consequence of this Act shall not have been wasted, but rather shall have facilitated such a conversion by these accomplishments: (a) continuous traffic through the canal would be permitted during conversion construction; (b) the additional lockages would permit movement of construction equipment and excavated material as required; (c) lock overhaul and other major maintenance could be accomplished during conversion without traffic stoppage; and (d) transits even in excess of today's normal traffic could be handled during conversion.

SEC. 3. (a) Except as provided in section 15, the Governor of the Canal Zone, under the supervision of the Secretary of the Army, is authorized and directed to prosecute the work necessary to increase the capacity and improve the operations of the Panama Canal through the adaptation of the third locks project set forth in the report of the Governor of the Panama Canal, dated February 24, 1939 (House Document Numbered 210, Seventy-sixth Congress), and authorized to be undertaken by the Act of August 11, 1939 (53 Stat. 1409; Public Numbered 391, Seventy-sixth Congress), with usable lock dimensions of one hundred and forty feet by one thousand two hundred feet by not less than forty-five feet, except as recommended otherwise by the Board created under section 4 of this Act, and including the following: elimination of the Pedro Miguel locks, and consolidation of all Pacific locks near Agua Dulce in new lock structures to correspond with the locks capacity at Gatun, raise the summit water level to its optimum height of approximately ninety-two feet, and provide a summit-level lake anchorage at the Pacific end of the canal, together with such appurtenant structures, works, and facilities, and enlargements or improvements of existing channels, structures, works, and facilities, as may be deemed necessary, at an estimated total cost not to exceed $1,250,000,000, which is hereby authorized to be appropriated for this purpose: *Provided however*, That the initial appropriation for the fiscal year 1978 shall not exceed $50,000,000.

(b) The provisions of the second sentence and the second paragraph of the Act of August 11, 1939 (53 Stat. 1409; Public Numbered 391, Seventy-sixth Congress), shall apply with respect to the work authorized by subsection (a) of this section. As used in such Act, the terms "Governor of the Panama Canal", 'Secretary of War", and "Panama Railroad Company" shall be held and considered to refer to the "Governor of the Canal Zone", "Secretary of the Army", and "Panama Canal Company", respectively, for the purposes of this Act.

(c) In carrying out the purposes of this Act, the Governor of the Canal Zone may act and exercise his authority as President of the Panama Canal Company and may utilize the services and facilities of that company.

SEC. 4. (a) There is hereby established a board, to be known as the "Panama Canal Advisory and Inspection Board" (hereinafter referred to as the "Board").

(b) The Board shall be composed of five members who are citizens of the United States of America. Members of the Board shall be appointed by the President, by and with the advice and consent of the Senate, as follows:

(1) One member from private life, experienced and skilled in private business (including engineering).

(2) Two members from private life, experienced and skilled in the science of engineering.

(3) One member who is a commissioned officer of the Corps of Engineers, United States Army (retired).

(4) One member who is a commissioned officer of the line, United States Navy (retired).

(c) The President shall designate as Chairman of the Board one of the members experienced and skilled in the science of engineering.

(d) The President shall fill each vacancy on the Board in the same manner as the original appointment.

(e) The Board shall cease to exist on that date designated by the President as the date on which its work under this Act is completed.

(f) The Chairman of the Board shall be paid basic pay at the rate provided for level II of the Executive Schedule in section 5313 of title 5, United States Code. The other members of the Board appointed from private life shall be paid basic pay at a per annum rate which is $500 less than the rate of basic pay of the Chairman. The members of the Board who are retired officers of the United States Army and the United States Navy each shall be paid at a rate of basic pay which, when added to his pay as a retired officer, will establish his total rate of pay from the United States at a per annum rate which is $500 less than the rate of basic pay of the Chairman.

(g) The Board shall appoint, without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, a Secretary and such other personnel as may be necessary to carry out its functions and activities and shall fix their

rates of basic pay in accordance with chapter 51 and subchapter III of chapter 53 of such title, relating to classification and General Schedule pay rates. The Secretary and other personnel appointed by the Board shall serve at the pleasure of the Board.

SEC. 5. (a) The Board is authorized and directed to study and review all plans and designs for the Third Locks project referred to in section 3(a) of this Act, to make on-the-site studies and inspections of the Third Locks project, and to obtain current information on all phases of planning and construction with respect to such project. The Governor of the Canal Zone shall furnish and make available to the Board at all times current information with respect to such plans, designs, and construction. No construction work shall be commenced at any stage of the Third Locks project unless the plans and designs for such work, and all changes and modifications of such plans and designs, have been submitted by the Governor of the Canal Zone to, and have had the prior approval of, the Board. The Board shall report promptly to the Governor of the Canal Zone the results of its studies and reviews of all plans and designs, including changes and modifications thereof, which have been submitted to the Board by the Governor of the Canal Zone, together with its approval or disapproval thereof, or its recommendations for changes or modifications thereof, and its reasons thereof.

(b) The Board shall submit to the President and to the Congress an annual report covering its activities and functions under this Act and the progress of the work on the Third Locks project and may submit, in its discretion, interim reports to the President and to the Congress with respect to these matters.

SEC. 6. For the purpose of conducting all studies, reviews, inquiries, and investigations deemed necessary by the Board in carrying out its functions and activities under this Act, the Board is authorized to utilize any official reports, documents, data, and papers in the possession of the United States Government and its officials; and the Board is given power to designate and authorize any member, or other personnel, of the Board, to administer oaths and affirmations, subpena witnesses, take evidence, procure information and data, and require the production of any books, papers, or other documents and records which the Board may deem relevant or material to the performance of the functions and activities of the Board. Such attendance of witnesses, and the production of documentary evidence, may be required from any place in the United States, or any territory, or any other area under the control or jurisdiction of the United States, including the Canal Zone.

SEC. 7. In carrying out its functions and activities under this Act, the Board is authorized to obtain the services of experts and consultants or organizations thereof in accordance with section 3109 of title 5, United States Code, at rates not in excess of $200 per diem.

SEC. 8. Upon request of the Board, the head of any department, agency, or establishment in the executive branch of the Federal Government is authorized to detail, on a reimbursable or nonreimbursable basis, for such period or periods as may be agreed upon by the Board and the head of the department, agency, or establishment concerned, any of the personnel of such department, agency, or establishment to assist the Board in carrying out its functions and activities under this Act.

SEC. 9. The Board may use the United States mails in the same manner and upon the same conditions as other departments and agencies of the United States.

SEC. 10. The Administrator of General Services or the President of the Panama Canal Company, or both, shall provide, on a reimbursable basis, such administrative support services for the Board as the Board may request.

SEC. 11. The Board may make expenditures for travel and subsistence expenses of members and personnel of the Board in accordance with chapter 57 of title 5, United States Code, for rent of quarters at the seat of government and in the Canal Zone, and for such printing and binding as the Board deems necessary to carry out effectively its functions and activities under this Act.

SEC. 12. All expenses of the Board shall be allowed and paid upon the presentation of itemized vouchers therefor approved by the Chairman of the Board or by such other member or employee of the Board as the Chairman may designate.

SEC. 13. There are hereby authorized to be appropriated to the Board each fiscal year such sums as may be necessary to carry out its functions and activities under this Act.

SEC. 14. Any provision of the Act of August 11, 1939 (54 Stat. 1409; Public Numbered 391, Seventy-sixth Congress), or of any other statute, inconsistent with any provision of this Act is superseded, for the purposes of this Act, to the extent of such inconsistency.

SEC. 15. (a) This Act shall not take effect until the date the Speaker of the House of Representatives and the President pro tempore of the Senate receive written notice from the President that thenceforth during his term or terms of office, no negotiations will be conducted, nor will any plan be initiated, for the surrender by the United States of the Canal Zone and the Panama Canal, in whole or in part, to the Republic of Panama, or to any international organization.

(b) The provisions of this Act shall remain in effect only so long as all the sovereign rights, power, and authority granted in perpetuity to the United States by the Republic of Panama in articles II and III of the convention between the United States and the Republic of Panama signed on November 18, 1903, and reaffirmed in the General Treaty of Friendship and Cooperation signed March 2, 1936, and the Treaty of Mutual Understanding and Cooperation signed January 25, 1955, remain unaltered.

SEC. 16. The assets created by the expenditure of the funds authorized by this Act shall be considered by the Panama Canal Company as depreciable or nondepreciable in accordance with the provisions of subsection (b) of section 412 of title 2 Canal Zone Code (76A Stat. 27) as amended. The Company shall in its calculations of toll rates include as annual expense such amounts as will over the period of seventy-five years allow for a payback to the United States Treasury of 100 per centum of the funds appropriated in consequence of the provisions of this Act, except that in recognition of the defense value of said assets, and in conformity with the purposes of subsection (e) of section 412 of title 2 Canal Zone Code (76A Stat. 27), interest during construction shall not be included for purposes of repayment.

IN SUPPORT OF WELFARE REFORM THIS SESSION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. KOCH) is recognized for 10 minutes.

Mr. KOCH. Mr. Speaker, the members of the Welfare Reform Task Force of the Northeast-Midwest Coalition today sent a letter to Speaker O'NEILL expressing our concern that the issue of welfare reform may be placed on a "back burner" by the Congress. As chairman of that task force, I wanted to share with all of our colleagues the text of the letter sent to Speaker O'NEILL which advocates the creation of an Ad Hoc Committee on Welfare Reform. The text of the letter follows:

HOUSE OF REPRESENTATIVES,
Washington, D.C., April 26, 1977.

Hon. THOMAS P. O'NEILL, Jr.,
The Speaker, House of Representatives,
The Capitol, Washington, D.C.

DEAR MR. SPEAKER: As members of the Northeast-Midwest Economic Advancement Coalition Task Force on Welfare Reform, we are particularly distressed by the recent developments which indicate that the issue of welfare reform might be placed on the "back burner" by the Congress. Senator Byrd's comments to that effect have been compounded by the postponement of comprehensive welfare reform hearings which had been contemplated for late-May by the Ways and Means Subcommittee on Public Assistance.

We understand that these developments are the result of a desire to consider President Carter's energy proposals expeditiously. However, we believe that while welfare reform legislation may not be as dramatic as the Administration's energy proposals, it also deserves the Congress' special attention. We would like to suggest that the House take the lead in maintaining welfare reform as one of the major legislative goals of the 95th Congress.

We believe that the Congress should publicly state its commitment to welfare reform. We supported the establishment of the Ad Hoc Committee on Energy and commend your leadership in the effort to expedite the House' consideration of the energy proposals. We also support the establishment of an Ad Hoc Committee on Welfare Reform so that this equally complex issue can be appropriately addressed. The establishment of such an Ad Hoc Committee would prevent the issue of welfare reform from being needlessly neglected. If there are other options that you would suggest that would ensure expeditious consideration of welfare reform proposals by the House, we would be pleased to discuss these options with you.

We would be happy to meet with you to further discuss this matter in general and would appreciate your support.

Sincerely,

Edward I. Koch, Chairman, Welfare Reform Task Force, Northeast-Midwest Coalition; Michael Harrington, Chairman, Northeast-Midwest Coalition; Charles B. Rangel; William F. Walsh; Frank Horton, Co-Chairman, Northeast-Midwest Coalition; James L. Oberstar, Secretary-Treasurer, Northeast-Midwest Coalition; Donald M. Fraser; Elizabeth Holtzman; Abner J. Mikva; Silvio O. Conte; and Stephen J. Solarz.

HOSPITAL COST CONTAINMENT ACT OF 1977 AND HOSPITAL SURVEY CITED

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. MIKVA) is recognized for 5 minutes.

Mr. MIKVA. Mr. Speaker, I would like to call to the attention of my colleagues a bill introduced yesterday by Congressmen ROSTENKOWSKI and ROGERS, the Hospital Cost Containment Act of 1977.

This bill is one of the most significant pieces of medical care legislation that we will consider in the 95th Congress. The bill embodies the proposals of the Carter administration and is designed so that we may, at long last, get a handle on the

most inflationary part of the medical care system. In addition, the bill provides some of the first tangible steps toward a truly comprehensive national health insurance system.

Mr. Speaker, we will have little chance of slowing the rate of inflation in this country if we do not come to grips with health inflation, and we will have little chance to slow health inflation until we do something about hospital expenditures. The rate of inflation for hospital care is 15 percent a year, far above the general rate of inflation. And hospital expenditures comprise more than 40 percent of the total medical care expenditures.

It is no longer much of a secret that the high cost of hospital care is largely the result of such practices as overutilization, inefficiency and, in many instances, excess capacity stemming from the way current operations and capital investment are financed. Until now, however, there has been little in the way of a comprehensive plan to bring these costly practices under control.

The Hospital Cost Containment Act of 1977, by setting limits on reimbursements which hospitals receive from all sources, provides hospitals with an incentive to operate more efficiently and effectively. The goal is not only to improve the present system but to put into place the budgetary machinery necessary for national health insurance. President Carter yesterday reaffirmed his determination to phase in a workable national health insurance program. But he also noted that with current inflation, "the cost of any national health insurance program the administration and the Congress will develop will double in just 5 years." That is why it is imperative that the first phase of a national health insurance program be aimed at controlling costs.

No one suggests that hospitals and their boards are either rapacious or malevolent. Indeed hospital managers are much more the victims of inflation than the victimizers. But the results are passed on to the consumer. Because hospitals cannot manage these problems on a single institution basis, the results are often capricious, as well as heavy.

Mr. Speaker, I recently compiled a survey of hospital costs in my district, the 10th Congressional District of Illinois. The purpose of the survey was to get a more accurate and current picture of local hospital charges. Among other concusions, we found that charges for the same services sometimes fluctuated by more than 100 percent from the lowest to the highest charge.

In comparing preoperative tests, the survey found that charges for a complete blood count ranged from $7 to $17, a 142 percent increase; a cholesterol count ranged from $5.50 to $13, 136 percent; a urinalysis ranged from $3.50 to $7, 100 percent; a pap smear ranged from $2.50 to $13, 420 percent; a chest X-ray ranged from $15 to $38, 153 percent; and an electrocardiogram ranged from $15.50 to $22, 42 percent.

Fluctutations in charges also included hospital rooms. The per diem cost of a private room, for example, varied from a low of $115 to a high of $153, a 33 percent jump from the lowest to the highest charge. For a semiprivate room, the charges ranged from a low of $105 per day to a high of $146 per day, a range of 39 percent from the lowest to the highest charge.

Wide variations were also found in the hospital-quoted charges for operations including hernias, appendectomies and tonsillectomies, with the differences usually amounting to hundreds of dollars between the lowest and highest average prices quoted.

The higher cost of services at a particular hospital does not necessarily indicate superior quality or lack of efficiency. The cost differences may be attributable to a variety of factors. The hospitals frequently have to make up losses on medicare, medicaid, emergency room care, and even Blue Cross and Blue Shield payments in their charges for these other services. But the wide fluctuations in the cost of so many services between hospitals providing similar care inevitably raise doubts among people about the rationality of an important part of our medical care system. One of the goals of the bill introduced yesterday is to rationalize that portion of medical care. It is a goal that is worthy of our full pursuit.

At this time, I would like to report the complete results of the survey of the six hospitals that are located in the 10th Congressional District of Illinois:

HOSPITAL SURVEY RESULTS

Hospital	A Skokie Valley	B St. Francis	C Lutheran General	D Holy Family	E Evanston	F Community Hospital of Evanston
I. GENERAL INFORMATION						
Type	General nonprofit	Short term nonprofit	General nonprofit	General nonprofit	General nonprofit	Short term nonprofit.
Number of beds	246	459	697	247	500	47.
Average bed occupancy per day	75 percent	89 percent	89 percent	87 percent	92 percent	47 percent.
Teaching hospital	No	Yes	Yes	No	Yes	No.
Number of employees	510 full time, 230 part time.	1,384 full time equivalent.	2,000 full time, 828 part time.	365 full time, 355 part time.	1,600 full time equivalent.	60 full time equivalent.
II. PREOPERATIVE TEST AND ROOM COSTS						
Daily charge for private room	$127	$124	$153	$115	$145	$135.
Daily charge for semiprivate room	$121	$115	$146	$105	$125	$110 to $125.
Emergency room visit [1]	$10	$23	$30 to $60 [2]	$15 [2]	$20 [2]	$28.
Complete blood count	$7	$9	$7	$9	$16.50	$17.
Cholesterol count	$6	$9	$6	$7.50	$5.50	$13.
Urinalysis	$4.50	$5.75	$3.50	$5	$6.50	$7.
Pap smear	$5	$8	$2.50	$6	$6	$13.
Chest X-ray	$20	$19.25	$15	$19	$38	$22.
Electrocardiogram	$16	$18	$21	$18	$15.50	$22.
III. MINOR OPERATION CHARGES ON THE AVERAGE [3]						
Hernia [4]	$900 (4-day stay)	$1,255 (8.5-day stay)	$1,140 (5-day stay)	$826 (5-day stay)	Figures not available	$1,298 (7-day stay).
Appendectomy [4]	$900 (5-day stay)	$1,035 (7-day stay)	$1,745 (8-day stay)	$840 (5-day stay)	do	$1,298 (7-day stay).
Tonsillectomy [4]	$310 (1-day stay)	$400 (1-day stay)	$428 (1-day stay)	$355 (1-day stay)	do	$480 (1-day stay).
Delivery	$1,080 (5-day stay for mother and baby).	$950 (3-day stay	$950 (3-day stay for mother and baby).	$836 (4-day stay for mother and baby).	do	Not available.
State classification of emergency room [5]	Comprehensive	Comprehensive	Comprehensive	Comprehensive	Comprehensive, regional trauma center	Stand-by.
Number of beds occupied per month by:						
Medicare patients	33 percent	46 precent	30 percent	22 percent	30 percent	Figures not available.
Blue cross patients	28 percent	18 percent	25 percent	25 percent	24 percent	Do.
Medicaid patients	1 to 2 percent	7 percent	1 percent	4 percent	5 percent	Do.
Other patients (including private, other insurance and workman's compensation).	37 percent	29 percent	44 percent	10 percent	41 percent	Do.

[1] Does not include physician's services, drugs or supplies.
[2] Charge varies with severity of illness.
[3] Excluding physician's charges, including preoperative tests, drugs, supplies, operating and recovery room costs, room and board charges, anesthetic and nursing care.
[4] According to the Commission on Professional and Hospital Activities in Ann Arbor, Michigan, the average length of hospital stay for these operations are as follows: Hernia, 5.9 days; appendectomy, 6 days. Tonsillectomy, 2.2 days. Delivery, 3.5 days.
[5] The State of Illinois classifies hospital emergency rooms as follows:
Stand-by treatment—A registered nurse shall be on duty for emergency services at all times and a licensed physician shall be "on call" to the emergency department at all times.
Basic emergency treatment—At least 1 physician shall be in the emergency department at all times and physician specialists representing the specialites of medicine, surgery, pediatrics and maternity shall be available within minutes.
Comprehensive emergency treatment—At least 1 licensed physician shall be in the emergency department at all times. Physician specialists representing the major specialties and sub-specialties such as plastic surgery, dermatology, ophthalmology, etc., shall be available within minutes. Ancillary services including laboratory, X-ray and pharmacy shall be staffed at all times.
Regional trauma center—A comprehensive emergency room equipped to handle severe, multiperson accidents and acute trauma patients. The emergency rooms are capable of higher levels of communication with ambulances on the streets.

FBI AGENTS AND THE LAW: A SIMPLE QUESTION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. WEISS) is recognized for 5 minutes.

Mr. WEISS. Mr. Speaker, I have previously informed the House of Representatives of my request that hearings be held by the Government Operations Subcommittee on Government Information and Individual Rights into the recent intervention by FBI Director Clarence Kelley regarding criminal prosecutions of FBI agents.

Today, I would like to share with my colleagues a letter which appeared in the April 25 edition of the New York Times. This letter, written by Morris B. Abram, an attorney nationally respected for his knowledge of the Constitution, places Director Kelley's action in perspective, and clearly sets forth the true issue involved—

Whether the Justice Department will treat FBI felons as other Federal felons are treated or whether the FBI, as the CIA, is made a body exempt from the law.

I, again, urge my colleagues give attention to this most serious problem.

The full text of the letter follows:

FBI AGENTS AND THE LAW: "A SIMPLE QUESTION"

TO THE EDITOR:

The demonstration against the indictment of an FBI supervisor for a felony by several hundred FBI agents on the steps of the Federal courthouse in New York City, followed by the FBI Director's demand that the Attorney General stop the probe of other agents suspected of crimes, raises again the stark question whether the Federal intelligence and police agencies are above the law. The demonstration paradoxically took place on the premises of the court building in which FBI agents testify against other suspected felons regularly.

The Church Committee of the United States Senate documented thousands of instances of felonies committed by the FBI and the CIA. A Federal grand jury is still meeting to decide whether to indict former CIA Director Helms for perjury before Congressional committees. The Justice Department has for several years been in possession of the contradictory sworn testimony of Richard Helms and others and even that of Helms on one day against Helms on other days.

Patrick Gray, former FBI chief, admitted the burning of Watergate-related documents—certainly a crime.

The Cointelpro program of the FBI was essentially a gangster-style operation to ruin reputations by the fabrication of evidence plus overt setups to provoke a shoot-out with men and women designated for these desperate and potentially fatal traps by the FBI without trial.

Yet the first indictment of an FBI agent after due process of law results in demonstrations by agents and the declaration by the Director of the FBI which amount to a claim that the police are above the law.

At the Nuremberg trials, when questioned about the operation of the Nazi police state, Herman Goering correctly observed that all states have police—that the real question was who controls the police.

A distinguished feature of a democracy is that the civil authority, under the rule of law and by its due process, controls the military, the police and the intelligence services.

The CIA has up to now successfully resisted this principle. The FBI demands the same treatment. Soon the police departments in every state and city will claim the same exemptions. The question now is whether the Justice Department will treat the FBI felons as other Federal felons are treated or whether the FBI, as the CIA, is made a body exempt from the law.

The Founding Fathers would have had little trouble resolving such a simple question.

MORRIS B. ABRAM.

NEW YORK, *April 15, 1977.*

THE ENERGY BALANCE: WEIGHING PRESIDENT CARTER'S PROGRAM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts (Mr. DRINAN) is recognized for 15 minutes.

Mr. DRINAN. Mr. Speaker, in the past week the President of the United States proposed a comprehensive and far reaching energy program. This program has been put forth by the national energy plan, which will be acted upon by the Congress and used to address the very serious energy situation which faces America today.

I commend President Carter for focusing national attention on the seriousness of our energy supply problem and the need for immediate action in this area. The energy crisis which we faced during the Arab Oil Embargo in 1973 has not been solved, it has merely hidden its ugly head as American imports of foreign energy supplies have reached an all time high, surpassing the level of our imports in 1973. Indeed, if the OPEC nations decided to declare another oil embargo this year, the 1973 crisis would amount to a slight inconvenience by comparison. In short, the results could be disastrous, with jobs lost, our standard of living affected, and energy prices sent skyrocketing upward.

The fact that another oil embargo is unlikely at this time should not lull us into inaction. Rather, we must take this opportunity to forge a strong and sweeping national energy program which will begin to cut down on America's fuel waste, increase our domestic energy supplies, and develop new forms of energy for the future. Toward that end, I feel that President Carter has taken the first important step in formulating the beginning of a truly comprehensive national plan.

Mr. Speaker, while I congratulate Mr. Carter for his initial work in framing the national plan, I do not mean to indicate that I agree with all of his initiatives. I do find his emphasis on energy conservation, solar power development, and utility rate reform to be praiseworthy, but I feel that the President's program is seriously deficient in quite a number of other areas.

I fear that the program will have a heavy impact on the low- and middle-income individual and his family, with fuel prices due to increases in virtually every area—at the gas pump, in the home, and at the stores where consumer goods will increase in price. The inordinate use of tax incentives rather than Federal grants and loans in the Carter plan also concerns me, as this will make the U.S. Tax Code even more regressive than it is now, increasing the number of tax loopholes available to wealthy taxpayers and large corporations. Insofar as transportation alternatives, I was disappointed that no plans were included to provide options to the continued use of energy inefficient automobiles. And no divestiture proposals of any type were put forth, thereby allowing oil and gas companies to pyramid their existing monopolies, buying out developing coal, uranium, and solar power companies.

In spite of the deficiencies which I have mentioned, there can be little doubt that the national energy plan proposed by the President is comprehensive and exhaustive. There are many elements, facets, and nuances which I cannot adequately discuss here. However, I would like to take this opportunity to review what I feel are the major positive and negative elements in the Carter energy package. In the past several years, I have been very active in the field of energy, introducing more than 10 pieces of legislation, a number of which passed in the 94th Congress. Based on this experience, I would like to offer my insights into the President's plan which is before us.

POSITIVE ELEMENTS OF THE CARTER PROGRAM

Let me first comment, Mr. Speaker, on the positive aspects of the Carter plan which I feel will make a significant contribution in dealing with our energy problems. The President has suggested many noteworthy programs to cut down on America's fuel waste and develop our energy resources. A good number of these policies and programs promise to be highly successful, and they clearly deserve the support of the Congress and the public.

I am most impressed by the President's emphasis on energy conservation. For years, many of us in the Congress have been calling for a major energy conservation campaign which could reverse this country's growing fuel consumption. In the past two Congresses, for example, I have personally introduced the Industrial Energy Conservation Act, the Energy Conservation Implementation Act, and the Solar and Energy Conservation Commercialization Act, all pieces of legislation which call for increased focus on conservation practices. I have also assisted my colleagues in increasing the Federal budget for energy conservation expenditures.

The President has correctly called for an intense energy efficiency campaign because, first, Americans waste more fuel than we import. With the same standard of living, we use twice as much energy per person as do other countries such as Germany, Japan, and Sweden. Second, it is far cheaper to save a barrel of oil today than to produce that same barrel, and the savings continue year after year. Clearly, for the foreseeable future, energy conservation should be the major component in our national energy plan.

Mr. Speaker, the President has proposed a wide variety of conservation measures. I believe that many of them

should be enacted by the Congress in the very near future. A good example of these measures is the tax on new "gas guzzling" automobiles. This tax, which could rise as high as $2,500 on the most wasteful of cars by 1985, is likely to push our automakers to produce fuel efficient cars which will avoid any significant taxation. As a matter of fact, it is my feeling that the rebate which is offered for economy cars will benefit many more Americans than the gas guzzler tax will penalize. The reason for this is that the rebates will be highly attractive, with up to $500 being available as early as 1978 to those who purchase highly energy efficient cars or electric vehicles.

I similarly applaud the energy conservation program which is being proposed to cut down on energy wastage in our homes and buildings. Homeowners would be entitled to a tax credit of up to $410 to install insulation and energy conservation devices. The credit could be taken on 25 percent of the first $800 spent and 15 percent on the next $1,400. In addition to tax incentives, energy conservation loans will be made available through the Federal Home Loan Corporation and the Federal National Mortgage Association. There will also be funding provided for low-income residents for conservation programs whereby homes will be weatherized to avoid heating loss.

To insure that we properly insulate and construct our new homes and buildings according to sound conservation principles, the energy program proposes mandatory efficiency standards which will go into effect by 1980. These standards, as well as those for major home appliances, follow the dictates of legislation previously passed by the Congress, but strengthens that legislation even more.

Other commendable conservation provisions have been included in the package, such as a $300 million Federal grant program to schools and hospitals to install conservation measures. A major electrical cogeneration effort has been outlined as well, in which waste heat would be used to generate electricity in industries where on site energy production is feasible.

The second positive element in the President's energy program involves utility rate reform. Our present utility rates, especially for electricity, favor the largest users of energy and penalize the smallest consumers. As a result, there is a distincentive built into the rates which discourages sound conservation practices.

Mr. Speaker, the President's utility proposals closely follow legislation which I have introduced in my Electric Utilities Rate Reform Act, H.R. 4176. Both of these proposals would require state public utility commissions to phase out and eliminate promotional, declining block and other special rates for electricity that do not reflect actual cost. The rates will be set according to how much it costs the utility to provide the energy, not according to arbitrary and promotional rates which are designed to encourage greater electricity use.

As in my legislation, the President also calls for the implementation of peak power pricing to reduce energy demand during high usage times, generally 4 p.m. to 7 p.m. Utilities use their most expensive and inefficient generating facilities to produce electrical power during these hours. By encouraging consumption during off peak times with incentivized rates, we can avoid the need for new powerplant construction and reduce the cost of generating electricity.

The third major element in the program which I highly endorse is the extensive development of solar power and other alternative energy sources. President Carter has recognized the great potential which exists in solar power and he recognizes that without an attractive incentive program it will be very difficult to install enough solar energy units to truly make a difference. His goal is to utilize solar energy in two and a half million homes across America by 1985, an ambitious but realizable goal which would greatly help our energy predicament.

To stimulate the development of a large solar market, the President has posposed tax credits of up to $2,000 for the purchase and installation of solar equipment. The tax credit would represent 40 percent of the first $1,000 spent, and 25 percent of the next $6,400 paid for the installation of qualifying solar devices. The credit would be available between 1977 and 1984, but it would decline in value as the years pass. The tax credit would be accompanied by a joint Federal/State program of standards development, certification, training, and public education to assist the average homeowner.

Business and industry would be eligible to receive 10 percent tax credits for making energy saving investments which can include solar power equipment. On top of the grant programs which are available to hospitals and schools, these programs should help to encourage a real boom in solar technology.

Mr. Speaker, to insure that the Federal Government takes a leading role in promoting solar power installations, up to $100 million will be spent over the next 3 years to add solar hot water and space heating to suitable Federal structures. In combination with the program to design energy efficient Federal buildings, this should make our governmental structures among the most energy efficient anywhere.

Before leaving the solar power area, I would like to say that these proposals somewhat follow my own legislation in the solar field. I have introduced the Solar and Energy Conservation Commercialization Act, a bill which would provide loans and grants to help homeowners, neighborhood and community groups, nonprofit organizations, and small businesses install solar and energy conservation equipment. While I feel that the President has done a real service in proposing a major stimulus program in alternative energy sources, I feel that the grants and loans approach is much preferable to the use of the tax system. I will expand on this at greater length later in this statement.

A fourth major element of the President's program which I commend is his effort is to finally centralize energy information. For too long, this country has been dependent on the factual data and information of the oil and gas companies. Unbelievably enough, in setting its energy policies the Federal Government often depends most directly on the statistics delivered by the American Gas Association and American Petroleum Association. Given the importance of this information to energy policy, and given the conflict of interest which exists for the energy industries which supply this information, it is absolutely critical that this information be independent and objective.

Under the President's proposals, the Department of Energy would take over the energy audit and verification roles in all facets of energy. The oil and gas companies would be required to submit detailed financial information to the Federal Government on all aspects of their operations. The Government would also maintain extensive regional energy information to help in formulating regional energy strategies.

Mr. Speaker, the above points represent what I feel are the most positive elements of the President's energy package. I would now like to comment on those aspects which are more ill-advised and questionable in Mr. Carter's program.

NEGATIVE ELEMENTS OF THE CARTER PROGRAM

In the coming months the Congress will focus in on each aspect of the President's energy program. In many cases the Congress will follow the wishes of the President and pass legislation very close to the initial proposals. In other cases, modifications, improvements and deletions will have to be made to insure that the plan is both effective and fair to all Americans. The following section raises questions and objections which I and many others have with regard to the plan as it presently stands.

My first major objection is that I believe the Carter energy plan is going to bear down heaviest on the middle and low income individual and his family. While the President has proposed tax credits and rebates which are designed to soften the blow of higher energy prices, in fact, the inflationary and hardship impact of higher energy prices will be felt by the average consumer every day of the year. Significant prices increases will be experienced in heating oil and on natural gas, electricity, at the gas pumps, and on the vast array of consumer products which will cost more to produce as a result of higher energy costs.

The gas tax which the President has proposed is the most obvious example of significantly increased prices for the consumer. The President has suggested that the gas tax be imposed at the rate of 5 cents per gallon after January 15, 1979. He would then increase the gas tax by 5 cents each year thereafter when we do not reach specified conservation goals. The tax could eventually go as high as 50 cents per gallon.

Mr. Carter also intends to impose a

"crude oil equalization tax" on the price of domestic oil. The oil tax will equal the difference between the controlled domestic price of oil and the prevailing world price. Although the tax will again be refunded, the interim cost hikes will be felt by all Americans when they attempt to buy heating oil for their home or petroleum supplies for their transportation needs. Businesses will experience dramatically increased costs as well, with these costs simply being passed on to the consumer.

Higher energy prices are similarly going to be felt through the decontrol of gasoline and increases in the price for natural gas. Gas decontrol will allow the oil companies to finally jack prices up to their full uncontrolled "ceiling" price, a move which we have fought in the Congress for years. Then the regulated price for natural gas will be raised from $1.42 per thousand cubic feet to $1.75 per thousand cubic feet. The natural gas increase follows another recent cost hike which was just levied by the Federal Power Commission less than a year ago.

I think the important question which must be asked here is just how much good these price increases will bring about as opposed to the hardship and suffering which they will cause for the American public. Will these tax increases actually reduce our energy consumption very substantially or will they cause just greater inflation and a reduction in our standard of living?

Mr. Speaker, this country is just emerging from one of the worst recessions experienced in the United States in 30 years. The recession was characterized by high unemployment and high inflation at the same time. The recession has now retreated, but our unemployment remains high and our inflation rate, after dropping somewhat for a period of time has dangerously increased in recent months. Therefore, I do believe that we must be very careful in our energy program to avoid crippling inflationary pressures.

I think we must seriously question at this particular time whether a system of energy rationing would perhaps not be better than stiff energy price hikes for the consumer. Although the administrative burden of any type of rationing system would be large, it might be more effective in cutting down energy consumption at less overall costs to individuals and their families. If the time has come for such serious taxing proposals, then perhaps the time has come for equally serious rationing plans as a more effective but less costly alternative.

A second major negative element of the Carter energy program is found in its extensive use of the tax code. In virtually every case where a stimulus is required, a tax credit or deduction of some kind is offered. These tax incentives may do the job, but at a heavy price to the equity and fairness in the Federal tax system. Already we find that the average taxpayer feels that our tax system is not a model of reform. With the passage of this new tax stimulus program, new loopholes will abound for wealthy individuals and corporations who already pay a less than fair share of Federal tax revenues.

President Carter campaigned extensively on the promise that he would reform a tax system which has become "a disgrace to the human race." He was clearly correct in stating that our tax system has become increasingly regressive with the middle income taxpayer shouldering more of the tax burden while upper income individuals and large corporations pay a disproportionately smaller percentage of tax. Yet barely 6 months before the President is scheduled to announce his own tax reform plans, he has suggested an energy program replete with tax incentives of all types.

Mr. Speaker, I feel that we would be much better off if we used grants and loans to effect many if not most of the objectives desired in the energy plan. This avoids doing further harm to the tax code and guarantees that the grants and loans are processed through the standard congressional authorization and appropriation procedures. These procedures insure that Federal moneys are spent wisely and that the grant programs are halted when they are no longer needed. I would highly recommend a grants and loans approach to the President and I am hopeful that he will see the merits of proceeding in this way when the Congress begins to consider his proposals of last night.

A third unfortunate aspect of the Carter program is the absence of an integrated transportation program. The President began his address last night by pointing out that Americans waste more energy in the transportation area than anywhere else. He referred to the fact that buses, trains, and other mass transit alternatives are far more energy efficient. But his solution is to cut down on the use of the car as much as possible without building up our mass transit system as an alternative. Without these transportation alternatives we leave our citizens with no other choice but to use their car, at a higher cost to the commuter.

In fairness to the President, it must be stated that he does envision a major transportation study to be performed by a Presidential commission. However, I suggest that we need more than transportation studies. We need an action plan which will implement many recommendations which previous transportation studies have already proposed.

A fourth major objection which I have to the energy program involves the lack of any divestiture proposals of any type. I believe that we need competition in the energy area, and in spite of the growing monopolistic trends which have occurred within the oil and gas industries, the President's message states that divestiture proposals are not needed at this time. Not only does the President reject any need for vertical divestiture, but he states that horizontal divestiture is not being seriously contemplated by his administration.

Mr. Speaker, this position seems to run contrary to Mr. Carter's pledge during the campaign that he would implement horizontal divestiture to keep the great energy combines from taking over all new emerging energy sources. If the oil and gas companies take over coal, uranium, solar power and geothermal energy, we could find ourself faced with some of the most awe inspiring monopolies of all time. The oil companies state that they are not a monopoly, that the industries' assets are spread throughout a number of major companies; but the assets of these corporations amount to a de facto monopoly of frightening proportions. It is therefore wrong to allow these companies to extend their control into all phases of the energy business and it is wrong for the President to dismiss the need for at least horizontal divestiture at this time.

Mr. Speaker, in this statement to the Congress I have attempted to deal with both the strengths and weaknesses in the President's energy program. I have indicated that the plan is at its best in bringing about a major energy conservation and solar power implementation effort. Yet it is at its worst in bearing heavily on the low- and middle-income groups who will face sharply higher energy prices in the coming years.

I commend President Carter for the very significant effort which he has made in framing the issues, in alerting the American public to the increasingly short supply of energy which we face, and in directing the attention of his powerful office to the solutions of our energy problems. He has done a fine job in combining a comprehensive energy statement which covers most aspects in the energy area.

As the President stated in delivering his energy message to the Congress however, many individuals will disagree with particular provisions in his program. He is correct in that respect, as I like many others have pointed out some of the inadequacies of the plan. Yet by this criticism I do not mean to indicate that the Congress does not have a duty to work with the President on a priority basis in formulating a national energy plan which will be comprehensive, effective and fair. By correcting the deficiencies which I have specified today, I believe that the President's program could lead to the solutions which are so important to America's future progress in meeting our energy needs.

PERSONAL STATEMENT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Indiana (Mr. BRADEMAS) is recognized for 5 minutes.

Mr. BRADEMAS. Mr. Speaker, I insert in the RECORD at this point a statement regarding several recorded votes I missed on Monday, April 25, 1977, and an indication of how I would have voted had I been present.

The votes are as follows:

Rollcall No. 149, a vote on an amendment offered by Mr. ASPIN of Wisconsin to H.R. 5970, Department of Defense authorization bill for fiscal 1978, to place all future military enlistees under the congressional pension system. The amendment was rejected by a vote of 148 to 247. I was paired for the amendment.

and had I been present, would have voted in favor of it.

Rollcall No. 150, a vote on an amendment offered by Mr. TREEN of Louisiana to H.R. 5970, Department of Defense authorization bill for fiscal 1978, to prohibit the expenditure of funds for the purpose of advertising the existence of the special discharge review program. The amendment was agreed to by a vote of 291 to 96. I was paired against this amendment, and had I been present, would have voted against the amendment.

Rollcall No. 151, a vote on final passage of H.R. 5970, Department of Defense authorization bill for fiscal 1978. The bill passed by a vote of 347 to 43. I was paired for this bill, and had I been present would have voted in favor of it.

RECIPROCAL FISHING AGREEMENT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Washington (Mr. BONKER) is recognized for 5 minutes.

Mr. BONKER. Mr. Speaker, the reciprocal agreement with Canada represents, I believe, a conscientious effort on the part of Ambassador Ridgway to maintain some semblance of order in the fishing industries of our two nations until such time as the complexities that must be addressed at some length can be discussed and a long-term agreement reached.

However, I am disturbed that we cannot begin to address the tremendous stock interception that has existed since these fisheries began. Historically, Canadian fishermen have harvested a measureable, documented number of U.S. origin Pacific salmon as they migrate out of our waters into the water off Canada's shores. In fact, the buildup of Canadian troll fishing effort has occurred at a time when the U.S. troll fleet was experiencing a drastic reduction.

I am doubtful that there is a need or a possibility to hold this reciprocal fishing agreement with Canada ransom. but I do feel that I should make every effort to make the Department of State aware that the problem of stock interception is an urgent matter that should be resolved at the earliest possible time, and must in any case be an integral part of the long-term agreement when it is written.

In the meantime, I feel that Canadian officials should recognize that the harvest of Pacific salmon off their coast that originated in U.S. waters and would return to those waters if allowed, is intolerable if continued enhancement is to be financed by American citizens.

Even though the various members of the Pacific Council have stated and published the fact that the management plan addresses both conservation of fish stocks and Federal court-ordered allocation requirements, the fact is that this same management plan, or one very similar, was adopted last year before the Pacific Council came into being with a stated purpose of conservation only. The Canadian fishery management personnel's position that they cannot accept a similar management plan for their ocean waters because "this stated need to meet allocation requirements ordered by the American Federal courts is a domestic problem and not a conservation problem," lies at the base of my concern.

The conservation of U.S. fish stocks ordered by the Fishery Conservation and Management Act cannot be successful unless the same seasons and limits are required for all fishermen from California to Alaska. It is imperative that Canada recognizes that a transfer of salmon will occur if their season goes forward while American fishermen are curtailed—even if that fishing takes place only off Canada's shores—because of the migratory patterns of salmon from U.S. waters to Canadian waters.

Again, I would like to state my reluctance to be an obstructionist. I want to repeat again that I do not feel it is either necessary or possible to refuse to allow the reciprocal fishing agreement with Canada to become effective. But I cannot in good conscience vote to put this agreement into effect without giving notice to the State Department, the Commerce Department, and any Canadian officials who might get the chance to read this, that I feel this agreement negates the effort of the Fishery Conservation and Management Act to conserve the U.S. fish stocks.

The fact that the Pacific Council management plan chose to put major emphasis on the Federal court-ordered allocation need is unfortunate because that was not even handed down until long during committee considerations of the bill in its 6- to 8-year existence before Congress. In fact, the Federal decision was not even handed down until long after this bill first surfaced in Congress. But the Pacific Council did announce that the decision was a major factor in the development of the management plan and there is nothing that can be done to retract that statement, except to assure Canadian fishery managers again that the true concern that should be considered by them is conservation. I hope that message is clearly transmitted to them and that perhaps they can reconsider their salmon fishing season off their Pacific coast in their ocean waters so that it might be the same as that of American salmon fishermen.

INTRODUCTION OF THE FEDERAL INTELLIGENCE AGENCIES CONTROL ACT OF 1977

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. BADILLO) is recognized for 15 minutes.

Mr. BADILLO. Mr Speaker, we are introducing the Federal Intelligence Agencies Control Act of 1977, a comprehensive and far-reaching bill to restructure and reform every aspect of our civilian domestic and foreign intelligence structure.

The need for this legislation is self-evident. We have become numb to the almost daily revelations of crime and abuse within our intelligence operations during the past 7 years. And despite assurances that illegal spying and intrusion into our lives has stopped, there is evidence that indicates that it has not. Recently FBI agents, for the first time, have been indicted for illegal acts. The FBI, the CIA, the National Security Agency have been allowed to establish a separate—and not equal—branch of Government, unchecked and unrestrained in the havoc they have played on the civil rights and liberties of American citizens.

By now we have all learned about how these intelligence agencies have operated, but even today we have not begun to plumb the depths to which these agencies and their shadowy subdivisions have influenced our lives. Last year I served on the Subcommittee on Civil and Constitutional Rights of the Judiciary Committee. Within the jurisdiction of that subcommittee lay FBI oversight. As the session wore on, Attorney General Edward Levi would periodically produce a new set of guidelines to govern some aspect of FBI operations. And it was appalling to me how, each time he or his representatives would come up to the Hill with a new set of guidelines, the members of our subcommittee had no problems finding the loopholes and weaknesses in those regulations. And each time the Attorney General would aver as to how we were absolutely right and he would return to Justice to correct them. Some of those guidelines are in effect right now, and none of them begin to do the job.

The only conclusion I could draw from those hearings—and it was only a confirmation of the conclusion I had drawn earlier—is that no intelligence agency can honestly promulgate the regulations that govern it. Coupling my own experience with those of the Pike committee in the House and the Church committee in the Senate, both of which were obviously manipulated by the very agencies they sought to investigate, I became even more keenly aware that something had to be done, and done quickly, to put an end to the overwhelming potential of abuse that still exists. It is not nearly enough to have an administration that is honest and that respects the rights of Americans. We must have an ironclad law that will no longer countenance any Government criminality.

The bill which we are introducing today covers all Federal intelligence activities. It restricts the FBI to the investigation of crimes and prohibits it from conducting political surveillance; it controls and severely limits the use of covert surveillance, both domestically and in foreign countries, by the CIA and other agencies; it limits access to tax, bank, credit, and telephone toll records; it amends the Freedom of Information Act to limit the "national security" exemption and reduce secrecy; it would make lying to Congress by senior, nonelected officials a crime; it would provide legal protections to Government officials who release information to the Congress; and it would create a special prosecutor's office with jurisdiction over crimes committed by intelligence agency employees.

My colleagues will develop each section of this bill for you, but I shall begin with a more detailed summary of the proposed legislation. The bill consists of seven separate titles, each of which is

addressed to a different aspect of the intelligence issue:

In the domestic area—

All intelligence agencies are prohibited from conducting "political surveillance," that is, investigating the lawful political views and activities of citizens;

Preventive action aimed at disrupting or discrediting individuals or groups—such as the FBI's COINTELPRO—is prohibited;

Selective enforcement of the law against individuals or groups because of their political views or activities—such as IRS auditing of the tax returns of dissenters—is prohibited;

The FBI is sharply limited to a criminal jurisdiction and its Internal Security Division is abolished; and

Statutes now on the books which make criminal certain forms of controversial speech or advocacy—for example, the Smith Act—are repealed.

To insure compliance with these prohibitions in the domestic intelligence area the legislation—

Establishes procedures for initiating criminal investigations;

Contains reporting, inspection, and oversight rquirements at both the administrative and congressional level;

Requires the budgets of the FBI and other domestic intelligence agencies to be published; and

Provides criminal penalties and civil remedies for violation of the prohibition.

The bill would also sharply restrict the kinds of intrusive investigative techniques which intelligence agencies utilize by—

Prohibiting the use of electronic surveillance;

Making it a crime for a Government agent to join or associate, for the purpose of covert surveillance, with a group of persons engaged in activity protected by the first amendment;

Requiring the Government to obtain a warrant, or use a subpena with prior notice in order to inspect a person's tax, bank, or telephone toll records; and

Requiring judicial authorization for the use of mail covers.

In the area of foreign intelligence activities, the premise of the legislation is that there should not be—as there is now—one standard for American citizens and another standard for foreigners, justifying U.S. Government actions abroad which would be unconstitutional or illegal if conducted at home.

Foreign intelligence activities based on this double standard have corrupted American institutions and the principles of democratic government. Accordingly, the legislation—

Prohibits peacetime espionage or covert operations by the United States aimed at foreign countries;

Bars the payment of funds to individuals, businesses, foundations, universities, religious groups, news organizations, or other private bodies to conduct spying or covert operations in peacetime;

Changes the name of the CIA to the Foreign Information Service, the mission of which would be to collect and analyze foreign information from public sources or mechanical sources such as satellites, so long as the communications of U.S. citizens and resident aliens are not intercepted;

Requires all expenditures for foreign intelligence activities to be made through specific annual appropriations, which must be published; and

Creates civil remedies and criminal penalties for violation of these foreign intelligence restrictions.

To enforce these substantive controls which are imposed on the intelligence agencies, the bill contains a variety of measures designed to reduce secrecy and promote accountability to the public by agency officials. These enforcement mechanisms include—

An amendment to the Freedom of Information Act that would limit the categories of national security information subject to withholding from the public;

A provision making it a crime for senior, nonelected officials of the Federal Government knowingly and willfully to conceal or misrepresent an intelligence activity which violates the prohibitions of the Federal Intelligence Agencies Control Act;

A provision protecting "whistleblowers" against administrative reprisal—that is, Federal employees who make good faith disclosures of information when such disclosure is not specifically prohibited by statute and does not constitute a clearly unwarranted invasion of privacy; and

The creation of an independent Office of Special Prosecutor with exclusive jurisdiction to investigate and prosecute all violations of the Federal Intelligence Agencies Control Act.

Mr. CONYERS. Mr. Speaker, the Intelligence Agency Control Act of 1977 is legislation long overdue. The act essentially deals with a quarter-century of the so-called intelligence community operating, as an independent branch of Government, largely immune from the control of our Nation's political institutions and legal controls. Most significantly, the FBI, the CIA, and military intelligence, with Presidential complicity and congressional acquiescence, have persistently violated specific provisions and the integrity of the Constitution.

In the name of "national security," a term which is unknown to the Constitution, the rule of law has been nullified by domestic and foreign intelligence activities. Under the cover of the concept of "secrecy," the Congress and the American people have been subjected to systematic deception and rubterfuge. Ostensibly to protect the national interest, the American people have been denied information essential to the functioning of democracy. By default, Congress has been deprived of information essential to the functioning of the legislative branch. Perhaps worst of all, a large segment of Congress apparently has acquiesced to the assumption that, by evoking the concept of national security, the executive branch has a right to immunity from constitutional restraints.

Therefore, if our democracy is to survive, if our constitutional rights are to preserve their meaning, and if we are to avoid slipping toward police state tyranny, we must vigorously and diligently reinforce the system of checks and balances designed by the framers of the Constitution to prevent such abuses of Federal Government power. The weight of the public record on abuses of domestic and foreign intelligence powers provides us with an unprecedented mandate to insure that Federal law enforcement and intelligence agencies are never again allowed to transcend the control of the American people and to violate the basic principles and provisions of the Constitution.

For these reasons, we are introducing the Intelligence Agency Control Act of 1977. Title I of this act prohibits officials of all Federal law enforcement and intelligence agencies from spying on the lawful political activities of American citizens. It also defines, for the first time in law, the investigation jurisdiction of the FBI, and it provides procedures for making officials of the FBI accountable for their actions.

The shocking record on domestic intelligence investigations defies defense. The FBI and other Federal agencies, including the CIA and military intelligence, infiltrated and compiled secret dossiers on members of organizations across the whole spectrum of social and political dissent in this country. These agencies opened the mail, burglarized the offices, and bugged the phones of civil rights groups, the peace movement, the women's movement, and the student movement. Of course, certain Members of Congress were subjected to these indignities as well.

Even more dangerously, these same agencies intentionally acted to disrupt, neutralize, and discredit persons whose only "crime" was to exercise their first amendment rights. The vicious smear campaign against Dr. Martin Luther King, Jr. is only one example of these lawless tactics. The FBI's role in what appears to have been the police "murder" of Fred Hampton and Mark Clark, and other provocations of violence and dissension in the Black Panthers, are other examples.

Who among us have been the victims of these blatant abuses of state police power? The fact that we still do not know, and cannot even say with certainty that these kinds of crimes have stopped, should be a matter of the gravest concern to every American citizen.

Two critical lessons emerge from this shameful record of the unconstitutional abuse of police power. First, as Vice President MONDALE asserted during his campaign, the intelligence establishment must "be seen for what it was and for what it continues to be: a threat to our national survival as dangerous as any foreign enemy." Second, that the threat persists as long as we neglect to define and limit the powers of these agencies in law and to establish systematic oversight of their activities.

Title I would fill the legislative gap that has allowed the FBI, the CIA, and other intelligence agencies to operate with impunity in violation of the Constitution. The FBI has no legislative charter.

Clearly, before the FBI can be made to obey the law it must have a law that defines and circumscribes its authority and responsibilities. Astonishingly, for the last 40 years, the Bureau has relied on vague Executive orders issued by Presidents to investigate "subversive activities." Today the FBI operates under the so-called Levi Guidelines which FBI agents interpret to permit the same sort of surveillance they have engaged in for these many years. There is wide agreement that statutory definitions and prohibitions are necessary. The Senate Intelligence Committee advocated legislation. FBI Director Kelley advocates legislation. The Carter administration advocates legislation. During the campaign, now-Vice President MONDALE said that the administration would "press for a specific legislative charter to spell out the powers of the FBI, CIA, and other intelligence agencies; and the precise limitations on those powers. We will end the practice of using vague and elastic Executive orders to define the jurisdiction of these sensitive agencies."

Title I of the Federal Intelligence Agencies Control Act of 1977 prohibits "political surveillance" by an agency or official of the U.S. Government defined as the collection or dissemination of information about the first amendment activity of any person. It prohibits "preventive action," the FBI's euphemism for its COINTEL operations to disrupt and discredit citizens: Selective investigations are outlawed; for example, the IRS could no longer conduct politically motivated tax audits.

The FBI is limited by this legislation to the investigation of violations of Federal law. The act makes the Bureau what it is supposed to be—a criminal investigative agency. It would no longer investigate those who espouse unpopular opinions and causes. And to insure this, we have called for the repeal of statutes that on their face punish speech or expression, such as the Smith Act and Voorhis Act.

These are strict prohibitions. But it is our contention, supported by the record, that any threat to our "internal security" can be handled as a matter of law enforcement. If our laws are violated by those intent on harming the country, the FBI may investigate and violators may be prosecuted. The often-made claim of the Bureau that intelligence is necessary to "prevent violence" is not supported by any evidence. According to the Church committee, the FBI has conducted over 500,000 intelligence investigations over the last decade and a half without uncovering one single violent act worthy of prosecution. The GAO audit in 1974 established that the Bureau seldom if ever anticipates illegal or violent activity and usually begins an investigation involving violence after it has occurred. This, of course, is proper. The FBI should investigate when it has evidence of a crime, not when citizens make speeches, attend meetings, or hold rallies. An agency attempting to anticipate all crimes is a big brother agency that takes us down the road to a police state. We have already traveled too far down that road.

Mr. STARK. Mr. Speaker, the outpouring of revelations about Government surveillance of private citizens has proved that snooping into our lives is not just the act of an occasionally over-zealous official. It has become an established and frequent practice. The abuses that have come to light in the past few years show that our right to privacy is very fragile. Too often safeguards are simply ignored, and in many cases they do not even exist. Government intrusion into our lives cannot be allowed to continue. That is why I am sponsoring this bill.

Section 201 of title 11 prohibits the use of electronic surveillance. It is too easy to forget that wiretapping is nothing else but an electronic search. If the Government made a key to your house and had an agent come and go as he pleased, listening to whatever interested him, we would all be outraged. But this is just what the technology of electronic surveillance allows the Government to achieve albeit by a different, seemingly less intrusive means. But a wiretap is actually a far greater invasion of our privacy than a physical search of our home or person. The average wiretap in the year 1972 intercepted over 1,000 calls over a 3-week period—intercepting all conversations no matter how innocent, personal, or irrelevant. This represents a massive invasion of our rights and is precisely the kind of "general search" which the fourth amendment was adopted to prohibit nearly two centuries ago.

While law enforcement officials claim that bugging is a powerful crime-fighting tool, the facts do not bear this out. Very few convictions are the result of wiretaps; the vast majority of these are for gambling offenses. The question arises after an examination of the statistics as to whether wiretaps are worth the cost in both dollars and our liberty. I do not believe they are. I am joined in this view by former Attorney General Ramsey Clark, and it is worth recalling that President Lyndon Johnson urged the Congress—unsuccessfully—in 1967 not to enact the current Federal wiretap law which title 11 of this bill substantially repeals.

If the reports of court-ordered wiretapping show so much promiscuous Government eavesdropping, imagine what has gone on with so-called national security taps for which no warrants or reporting are required. Information from Senator KENNEDY's office indicates that there were almost as much national security taps in the years 1969 and 1970 as there were court ordered taps and that they usually lasted at least three times as long.

Most disturbing is the evidence that this surveillance apparatus was not used as much for gathering criminal evidence as it was for gathering general intelligence information about the social, business, and political associations of the person being listened to. The White House taps of 13 Government employees and 4 newsmen during 1969 and 1970 illustrate too clearly the common features of national security wiretaps. In the Morton Halperin case, the tap continued for 21 months, the last 17 of which he was not even a Government employee. Another example was the tap placed on Martin Luther King until a few days before his death. None of these had anything even remotely to do with criminal activity.

Section 202 bans the infiltration by Government informants of groups engaged in lawful activities. Only a few years ago, it would have been thought that this sort of prohibition was unnecessary. After all, the fifth amendment protects the lawful association of citizens. However, the record now shows that the Government, especially the FBI, systematically used paid informers to disrupt legitimate political groups. Government assertions to the contrary, the record of informers is one of almost constant violations of our rights and perversion of the political system. And despite the fact that the FBI emphasizes the role of informers in fighting crime, its budget for fiscal year 1976 allocated twice as much for intelligence gathering as for organized crime informant programs.

Informers constitute much more than a passive intrusion into political groups. They have often stolen membership lists, engaged in disruptive tactics, encouraged violence, and influenced the direction of the organizations which they have infiltrated. Because of this necessarily active role, informers often pose more of a threat to our liberties than wiretaps. Infiltration by Government informers amounts to a sanction against lawful political activity in far too many cases. It is critical that it be stopped.

Sections 203 and 204 deal with another area that has been left vulnerable—the protection of our personal records form access to Government officials. Hearings held by the Federal Privacy Protection Study Commission over the last 2 years have shown that institutions that maintain our private records—banks, telephone companies, credit card agencies, and the like—do not resist demands for access to information about their customers. From these records it is quite simple to create a profile of a person's life, complete with finances and acquaintances.

This unrestricted Government entry into our private records has been used on many occasions for the collection of purely political intelligence; access to the telephone records of reporters to pinpoint their sources, access to bank records of antiwar and civil rights groups to identify their contributors—indeed, access to practically anyone at all, for these intelligence gatherers operate with a completely free hand.

It is time that procedural protections guaranteed by the fourth amendment, which sanctifies the privacy of our home against general searches, be extended to those private records whose safekeeping we entrust to outsiders. Just like the search of a private home, a search of private records should be carried out only with a court order after having met specific conditions. We should not allow Government fishing trips into our personal lives.

Lastly, section 206 of title II establishes a procedure for conducting mail covers. Not until recent hearings before the Senate Select Committee on Intelligence was the full extent of mail surveillance operations revealed. We already knew

about the case of a New Jersey high school student who wrote to the Socialist Workers Party as part of a school project resulting in her being investigated by the FBI. But it was not until the Church hearings that we learned that over a 20-year period, a CIA office in New York filmed the envelopes of over 2 million letters and opened more than 200,000. There were similar operations in three other locations. Clearly, this type of search should also be governed by a judicial warrant procedure and conducted only when there is a probable cause to believe that a crime has been committed.

In sum, Government assertions of the need for general surveillance and secrecy cannot be allowed to overshadow our constitutional rights. Though there is no doubt in my mind that law enforcement might operate more efficiently without the Bill of Rights, we have chosen to pay that price to preserve our liberties. Without taking the steps called for in this bill to guarantee our rights to privacy as well as freedom from unwarranted Government searches, whether by physical or electronic means, we will be forfeiting our birthright as Americans.

TITLE III

INTRODUCTION

In 1947 Congress created the CIA and gave it a statutory mandate to coordinate intelligence analysis within the Federal Government. The surprise attack on Pearl Harbor had taught the need for a centralized intelligence service. The growing hostility between the United States and the Soviet Union gave it added urgency. Nowhere did that statute, the National Security Act of 1947, authorize the CIA to engage in clandestine collection of intelligence or covert action to influence foreign events. The legislative history of the 1947 act does not indicate that the full Congress intended to authorize such activities. Yet within 3 years clandestine activities, involving both covert operations and covert collection; that is, espionage, occupied the bulk of the CIA's energies. It became the first peacetime spying agency in our Nation's history.

The CIA developed clandestine techniques for use abroad, but as the atmosphere of the cold war and McCarthyism triggered a search for enemies at home, our Government began to apply the same techniques at home. By 1976, a Senate committee could conclude that domestic intelligence activities "undermined the constitutional rights of citizens." (Church Report, Book II, p. 289.)

This is a rough, tough, dirty business, and dangerous—

William C. Sullivan, former FBI assistant director in charge of the Bureau's intelligence program, recently testified—

No holds were barred. . . . We have used (these techniques) against Soviet agents. They have used (them) against us. . . . (The same methods were) brought home against any organization against which we were targeted. We did not differentiate. This is a rough, tough business.

Watergate, impeachment, and the Church and Pike committee investigations of CIA activities at home and abroad have taught the public to be far more skeptical about our Government's activities. There is thus growing support for efforts to curtail domestic intelligence activities at home and to restrict, if not abolish, covert operations abroad. However, with the possible exception of the suppressed report of the Pike committee which reviewed the failures of intelligence collection and analysis and questioned the need for some of the methods, few have seriously questioned whether the United States should continue to engage in covert collection as well. The general attitude has been that domestic abuses can be corrected without restricting foreign collection activities and that foreign abuses can be corrected by banning or at least limiting covert operations. We disagree. If the acknowledged domestic abuses, such as using the CIA to find a foreign basis for the anti-Vietnam war protests, and all covert operations, were to be banned tomorrow, the continuation of pure foreign intelligence collection by covert means would present the same dangers.

Democracy cannot afford involvement in peacetime espionage, any more than it can afford involvement in covert operations. Both require the same clandestine apparatus, the same clandestine bureaucracy, the same secrecy, the same cover, the same lies—in short, the same costs to democracy. We disagree fundamentally with the Church committee which, although warned about the impact which the secrecy mandated by both covert operations and espionage had on democracy, concluded that democracy had to yield.

A peacetime spying apparatus contributes little to our national security while posing a grave threat to constitutional rights and to open democratic procedures in the United States. The costs—corruption of our own institutions, secrecy, government deception of its own people, and the inevitable spillover of the "rough, tough business" against our own citizens—are simply too high.

We therefore propose: First, to abolish peacetime human espionage and to restructure the CIA as the Foreign Information Service, focusing on collection and analysis of information gathered from overt sources or by technical sources; second, to ban all covert operations abroad; and third, to restrict the use of counterintelligence investigations as an espionage tool, requiring instead that foreign spies who break our laws be investigated and prosecuted like other criminals.

Along with these fundamental changes, we would strengthen and expand the existing ban on CIA domestic activities, transfer the responsibility for background investigation of Foreign Information Service employees or contractors to the Civil Service Commission, and make the total budget of the Foreign Information Service—as well as the budgets of the FBI and other intelligence agencis—public, so that the allocation of Government funds for particular intelligence purposes could be publicly debated, as mandated by the Constitution.

Our argument for banning continuing U.S. involvement in classical espionage has two basic elements:

The costs of espionage in terms of corruption of our democracy are far too high.

The gains from espionage are illusory.

The costs of espionage in terms of corruption of our democracy are far too high.

A peacetime spying apparatus poses a grave threat to both constitutional rights and to open democratic procedures. It corrupts our institutions, both public and private. The secrecy it demands allows abuses to flourish. Spying involves the Government in secret relationships with individuals and institutions. The Church committee has documented the range of tasks which these institutions perform for the CIA—scholars and journalists collecting intelligence, journalists propaganda, U.S. publications abroad providing cover. In some cases CIA involvement is even hidden from the recipient.

Prior to 1967 the CIA covertly funded academic and philanthropic foundations in an extensive way. After disclosure of the CIA funding of the National Student Association caused a nationwide furor, a Presidential committee headed by Nicholas Katzenbach recommended ending such funding of educational or private voluntary organizations. Many important covert relationships were untouched: covert relationships with U.S. businesses, covert funding of foreign-based organizations, and covert relationships with individuals as opposed to institutions.

Today academicians—including administrators, faculty members, and graduate student teachers—at over 100 American colleges, universities and related institutions are still being used by the CIA. The CIA uses the U.S. media for both intelligence collection and cover. They have a network of foreign individuals who give the CIA access to and influence with foreign press institutions. The CIA produces or subsidizes books and articles for propaganda purposes. Although aimed at foreign audiences, many circulate in the United States. On at least one occasion, a CIA book was reviewed in the New York Times by a writer under contract with the CIA. Despite earlier flaps over the use of U.S. religious personnel, a small number are still being used for intelligence collection purposes, including a U.S. priest informing on students and religious dissidents. (Church Report, Book I, pp. 179–203.)

The CIA also makes wide use of American and multinational corporations. Banks secretly help move money. Corporations provide cover. According to William Colby, the CIA had over 200 operatives working under corporate cover as of February 1974. (Halperin et al., "The Lawless State," Penguin 1976, pp. 47–8.) These relationships weaken the moral fiber of our country and destroy our good name abroad. The covert use of American universities, journalists, teachers, and religious leaders—all of whom help to mold the beliefs of our own citizens,

and of those we seek to influence abroad by our example.

In the words of President Jimmy Carter:

> Our nation can be strong abroad only if it is strong at home, and we know that the best way to enhance freedom in other lands is to demonstrate here that our democratic system is worthy of emulation.
>
> To be true to ourselves, we must be true to others. We will not behave in foreign places so as to violate our rules and standards here at home, for we know that this trust which our nation earns is essential to our strength.

His words echo those written by Justice Brandeis 50 years ago:

> Our government is the . . . omnipotent teacher. For good or ill, it teaches the whole people by its example. Crime is contagious. If government becomes a law-breaker it breeds contempt for the law; it invites every man to become a law unto himself; it invites anarchy.

The existence of these covert relationships also corrupts the process of Government itself. The Church committee, in examining the CIA role on the American college campus, concluded that these activities pose a threat to academic freedom. However, the committee was prevented from accurately describing what the CIA does by the Agency's insistence that it could not maintain its peacetime spying apparatus without performing these activities on campus and that if they were described publicly they could not continue. Thus, we are prevented from having a public debate about whether we want to tolerate activities which a Senate committee believes threatens one of the very foundations of our society—the free university. It has been this way since the CIA began. As noted at the outset, the legislative history of the CIA does not indicate that the full Congress intended to authorize covert collection of intelligence and other clandestine activities. Supporters of these CIA activities claim they were authorized from the outset. The Church committee reports that—

> The legislating committees discussed the issue in some detail in executive session, but it was mentioned only briefly in public hearing and floor debates. (Church Report, Book I, p. 128)

If, as CIA supporters claim, this provided effective legitimate authority for clandstone collection, a basic decision about the way our democratic Government was to conduct its business for the first time in peacetime history was made in secret, without public debate and, indeed, without public knowledge.

An additional price of covert foreign intelligence collection in terms of corruption of the functioning of the Government itself is favoritism for those who provide "cover" for covert intelligence gathering. The inevitable result of "cover" arrangements for "pure" intelligence gathering, such as that which was maintained for the Hughes' Glomar Explorer—a $250,000 to $450,000 expenditure—is that those who give help receive favors. Whether ITT in Chile, or Howard Hughes around the world, they receive special treatment under domestic law. In a series of articles in the Philadelphia Inquirer, Bartlett and Steele, the winners of the 1975 Pulitzer prize, wrote of Hughes' antitrust law exemptions, his immunity from extradition, the refusals to prosecute him in Las Vegas, to tax him, and to prosecute him and other corporations for perjury or nondisclosure of facts under the securities laws.

Another startling example just recently came to light. Six years ago the CIA had a bug in the South Korean presidential palace. The bug picked up information about the South Koreans' plans to influence U.S. policy by making secret cash payments to Members of Congress and by establishing the Reverend Sun Myung Moon as a link to the American people. All the details of these plans were known to the CIA, but it decided not to reveal them to the Justice Department or any other Government agency because it didn't want to jeopardize its bug in the palace. An even more recent example of the corrupting power of secret funding for intelligence-gathering purposes involves newly elected President Jimmy Carter. Candidate Carter promised to curtail excessive secrecy. As indicated above, in his inaugural address, he said:

> We will not behave in foreign places so as to violate our rules and standards here at home . . .

Approximately 1 month later, President Carter sought to stop the publication of news stories revealing that the CIA had paid millions of dollars to King Hussein of Jordan. Faced with charges that the payments were bribes, administration spokesmen defended them as payments for intelligence-gathering and the President himself described these kinds of operations as "legitimate and proper" and described their revelation as "extremely damaging." The other administration response was to call for more secrecy. President Carter reduced the number of White House staff with access to intelligence secrets and endorsed a single congressional committee so as to limit the number of people to whom these same secrets would have to be revealed. CIA Director-designate Turner endorsed criminal penalties for those who disclose official secrets at his confirmation hearing.

In order to protect its ability to collect intelligence abroad, the U.S. Government has also tolerated actions of the undercover agents of friendly countries such as Iran, South Korea, Chile, and Taiwan. The Iranian secret service, as numerous articles and TV reports have documented, has surveyed and used physical violence against anti-Shah students in the U.S. State Department testimony before Congress confirmed the Korean CIA's physical attacks on Korean-Americans opposed to the Park regime and its subsidy of the Korean press in the United States. (See e.g. Marks, "'Friendly' Secret Agents," Washington Post, Nov. 8, 1976; "The Multinational CIA," The Nation, Nov. 13, 1976.)

Spying also involves the government in deceit and secrecy. For the last quarter century Presidents of the United States have regularly lied to the people in the name of "national security." Eisenhower lied about the U–2, Kennedy about the Bay of Pigs. Johnson had a "credibility gap." Nixon was forced to resign because of his lies, and Gerald Ford told the House Judiciary Committee he too would lie in the name of national security.

The need to lie, reinforced by pervasive secrecy, has encouraged Government officials to act beyond the law and in ways they know the public would never tolerate if it had the facts. As columnist Tom Braden, a former CIA official, has described it:

> You bring a group of people together, bind them with an oath, test their loyalty periodically with machines, spy on them to make sure they're not meeting secretly with someone from the Czech Embassy, cushion them from the rest of the world with a false cover story, teach them to lie because lying is in the national interest, and they do not behave like other men.

Such lies and deceptions about acts of government are inconsistent with democracy's basic tenet—government depends on the consent of the governed. Our best national security is not secrecy but the truth. A democratic government based on lies loses its legitimacy. Thomas Jefferson, in the Declaration of Independence wrote that "to secure the rights of liberty, governments are instituted among men, deriving their just powers from the consent of the governed." Only if Congress and the public can get at the truth can there be meaningful accountability. The secrecy which these activities mandate make effective control and oversight impossbile. The curtain of secrecy and deception enables the Government to conduct operations, many of which have important policy ramifications, without the knowledge or consent of the people.

If the Government is free to use covert techniques to collect foreign intelligence information and to hide them with secrecy and deception it is inevitable that they will be used against our own citizens. President Johnson and the CIA justified their voracious pursuit of information on American antiwar demonstrators for their foreign links. The CIA's Operation CHAOS was a covert foreign intelligence operation, as was its mail-opening program. No other basis is offered to support the practices of the National Security Agency in monitoring cable and telephone traffic to and from the United States. And recently, Senator KENNEDY and others, with the help of the Ford administration, fought hard for legislation to authorize, albeit under a kind of warrant, wiretapping of Americans in order to collect foreign intelligence information.

Critics of our proposal to abolish peacetime spying label it naive and unworkable. "Our enemies do it. We must do it too" goes the argument. But in fact one need not, and we believe should not, follow the other.

Second, information gotten from espionage is a very small percentage of the intelligence data we acquire, unreliable because of the constant risk of misinterpretation or double agents, often

not shared with analysts for fear of disclosure, useless for obtaining military information, inefficient and a waste of the taxpayers' money.

About 95 percent of our foreign intelligence comes from satellites and the analysis of public information, not from spies. Most of the means by which the United States now gathers information about foreign activities thus would not be affected at all by the adoption of this proposal. Spy satellites would still circle the globe taking pictures of, for example, Soviet missile silos. Other technical means of intelligence could be employed to intercept and decode foreign communications. American foreign service officers and military attaches abroad could still gather information. Open sources, including radio broadcasts, could be combed for clues as to capabilities and intentions.

These judgments are confirmed by the June 1975 Report of the Commission on the Organization of the Government for the Conduct of Foreign Policy—the Murphy commission. A paper accompanying that report estimates that approximately 20 to 25 percent of the information used by the intelligence community comes from open sources—newspaper and magazine articles, scholarly journals, books, radio broadcasts and the published documents of foreign governments and international organizations. Another 20 to 25 percent comes from official reports of U.S. Government officials openly stationed abroad—Foreign Service officers, U.S. AID mission officials, Treasury, Labor and Agricultures attachés and USIS personnel. Another 10 percent comes from U.S. military officials stationed abroad. The final source of information collected by humans, as opposed to by technical means, is information obtained by clandestine collection.

In this area, the report estimates "probably no more than 5 percent of the total information used by the intelligence community comes from classical espionage operations." The remainder of the information—probably over a third of the total—comes from technological methods which have rapidly grown since World War II—communications intelligence derived sometimes from the contents and also from analysis of the traffic, interception of noncommunication radio waves from weapons being tested, technical receivers for detecting shock waves from nuclear explosions, and, most importantly, imagery or photographic intelligence by satellite, reconnaissance planes and other means. William J. Barnds, "Intelligence and Policymaking in an Institutional Context," volume 7, report of the Commission on the Organization of the Government for the Conduct of Foreign Policy, 25–27, June 1975.

This same figure—that espionage accounts for only 5 percent of information collected—is repeated in another Murphy commission paper. Paul W. Blackstock. "Intelligence, Covert Operations and Foreign Policy", ibid at 101.

Information gained from espionage is inherently unreliable. Informants and spies have usually had intimate relations with the enemy country and it is difficult to determine where their loyalties actually lie. Furthermore, our agencies have little contact with their foreign agents and have no real way of knowing if their agents have been discovered and are continuing to send valid information. The uncertainty of covert sources and the inability to validate the information, according to many intelligence experts, makes clandestine collection almost useless. (Halperin, Mortion, "The Abuses of the Intelligence Agencies", pg. 128).

Certain events during the Cuban missile crisis clearly illustrate this reliability problem. Cuban informants reported seeing missiles several weeks prior to their discovery through aerial photography, but intelligence analysts had rejected the reports, feeling they were unreliable. Prior to this time Cuban informants had made numerous reports of missile sightings which had proved to be false. This clandestine intelligence network in Cuba, which was much more comprehensive and secure than that which exists in either the Soviet Union or China was still considered unreliable. Even when the information was reliable, analysts did not rely upon it. (Scoville, Herbert, "Is Espionage a Necessary Instrument for Intelligence Collection?")

Herbert Scoville, the former CIA Assistant Director for Scientific Intelligence, referred to above, argues that spies have only a limited area of usefulness—collecting political not military intelligence:

> Human covert sources rarely provide useful intelligence in the military area. It is hard enough to recruit an agent who has any inside knowledge on military affairs, but it is even more difficult to recruit one who has sufficient technical background to provide timely and meaningful information on the characteristics of modern weapons.

He argues:

> And even then, there are better and more reliable ways to obtain information. Even in the case of highly secure societies, public information and overt means are probably the most important source of political intelligence. Over the years, there have developed a coterie of experts on Soviet society and politics. . . . Similar groups, although far less extensive, follow other areas of the world.
>
> In sum, espionage would appear to have only limited potential as a source of intelligence information. In the national security and military areas, it rarely will supply data of any great value and is a relatively unimportant and less reliable adjunct to technological methods.

Supporters of CIA espionage activities cite most often the Soviet and Chinese threats. Victor Marchetti and John Marks—both former CIA agents—in their recent book, "The CIA and the Cult of Intelligence," page 24, claim that our agencies have been completely unsuccessful at placing spies in either the Soviet Union or China. Former Secretary of Defense Clark Clifford has testified that we have no penetration of the Soviet Union. (Cite Church, vol. 7, p. 91) Scoville, along with Marks and Marchetti, argues that espionage has proved successful only in the weaker, less secure Third World countries—countries which in no real way directly threaten us. The Church committee reports that the CIA's clandestine collection efforts are being reoriented against "denied areas"—that is, Communist countries—and away from Third World countries. (Church Report, Book I, p. 437) The Murphy commission paper referred to earlier states that—

> The police organizations of the Communist countries, especially the Soviet Union and China, make these societies especially hard to penetrate. (Barnds, op. cit at 26.)

The argument that in the area of political intelligence, there are better ways to collect information is made as well by anthropologist Margaret Mead. Writing in a popular magazine, she observes:

> Spying is neither efficient nor necessary for the orderly, intelligent conduct of human affairs. What can be learned by spying is inevitably piecemeal and subject to misinterpretation because it is torn from its context. In order to be effective, what we need to know about the political, economic and social life of any country depends in the first instance on a sound knowledge of the language and culture of that country.
>
> And what we need essentially is a well-trained and trusted career foreign service, whose members build up a sound working knowledge of particular areas of the world at first hand and who are in good communication with similarly well-trained analysts and policy makers at home. Knowledge that is openly arrived at and openly discussed can always be tested against the realities of the current situation and can be corrected as situations change. (Margaret Mead, Redbook Magazine, June 1976)

TITLE IV

Mr. CARR. Mr. Speaker, the substantive provisions of this legislation will have little effect unless they are reinforced by a drastic reduction in secrecy. In order to do that effectively, we must modify the premise underlying the security classification system. We have always assumed that information should not be made public if it had any effect at all on foreign or military affairs. We all know that this has resulted in millions of pieces of paper stamped secret by overzealous and self-protective bureaucrats. We have seen everything from the Pentagon Papers to information about break-ins at the Socialist Workers Party classified. And how many of us as individuals received, after much struggle, our own files—a thought appalling enough in itself—only to discover page after page crossed with heavy black lines for "national security" reasons?

To prevent the growth of illegal practices under the cloak of secrecy, this bill begins with the premise that all Government information should be disclosed. There would be exceptions to that relating to the technical details of weaponry, military operations in time of declared war, and military defense plans for response to a direct attack by a foreign power, but only when this information could reasonably be expected to cause damage to the national defense, and this damage would be severe enough to outweigh the public interest in disclosure. No other approach to classification can be consistent with an open, democratic society.

Section 401 of the bill amends the Freedom of Information Act so that the categories of national defense information that may be withheld from public disclosure are considerably narrowed.

The only information that could be withheld upon a request for public disclosure would be information relating to certain aspects of national defense, as I discussed earlier, and even in those instances, the information could not be withheld if it "appears to relate to illegal or unconstitutional activities engaged in by an official of the Federal Government." Of course, judicial review would continue to be available under the Freedom of Information Act.

Section 402 defines the categories of national defense information that may be withheld. As well as those mentioned above, it also includes restricted data as defined by the Atomic Energy Act of 1954, and information pertaining to communications intelligence and cryptography, the disclosure of which is prohibited by law.

We must reject the premise of government that secrecy is necessary for our national security. Secrecy corrupts. It corrupts institutions and it corrupts democracy by preventing people from evaluating their government, and permitting government agencies to grow without any accountability to the public. Title IV of this bill will help to put an end to it.

TITLES V–VI

To enforce the controls over intelligence activities which the bill we are introducing today would impose, it is necessary to protect Government employees who "blow the whistle" on illegal or improper conduct and to deter senior officials from lying to Congress or the public about intelligence operations.

No one is in a better position to expose illegal or prohibited official conduct than Government employees with first-hand knowledge of the facts. The way the system now works, however, when an employee blows the whistle on his superiors—as did Ernest Fitzgerald, the Air Force analyst who alerted the public to huge cost overruns on the C5A airplane—he or she will be ostracized, discredited, and ultimately forced out of Government. On the other hand, when a senior official lies to the public to protect himself or his agency—as Richard Helms did when he was questioned by Congress about the CIA's domestic activities and its involvement in Watergate—he will suffer no penalty for helping to protect illegal or secret activities by covering up the truth.

Our Government derives its power from the consent of the people. Yet that consent cannot be given when the people are not allowed access to facts; when abuses of the Constitution are shrouded by "national security"; when lies and deceit are cloaked by claims of executive privilege; and when actions that expose abuses of the public's trust are punished because they affect the "efficiency of the service."

The claim that firing or disciplining "whistle blowers" promotes "the efficiency of the service" is absurb. Sound public policy requires that malfeasance and misfeasance in the executive branch be exposed. We have learned dramatically that we cannot count on those at the top to assume this responsibility. People who refuse to participate in executive branch coverups—who reveal abuses of the public trust which others seek to hide—should be rewarded not penalized.

For each Government scandal exposed by investigation from outside, by the press or others, the question must be asked: Where were the loyal public officials whose very jobs make them responsible for protecting the public from wrongdoing? Why, during the Watergate period, did we have silence by so many employees in various Government agencies, such as the IRS, who were told to perform illegal and improper political deeds? Why did no one speak up to stop the illegal wiretaps, the burglaries, the surveillance? Why have there been so few Ernie Fitzgeralds?

Why did it take so long to expose the massive CIA violations of the law which the Church and Pike committees and Rockefeller commission have documented? Why did CIA Director Helms agree to provide President Johnson with information on American students knowing full well that doing so was outside the CIA's charter? Why did no one inside the CIA expose these things? It is the systematized acceptance of both secrecy and deception of the public which has made this all possible.

Titles V and VI of the bill we are introducing today seek to effectuate several constitutional interests: The public's rights to know; the right of Congress to obtain information to legislate and oversee the executive branch; and the right of the Government employees under the first amendment to speak out on public issues and to petition the Congress for redress of grievances. In implementing these important interests, this bill would reverse the assumption, under which the intelligence agencies have operated for so long. Good faith disclosures to the public by Government employees acting unilaterally and not in violation of any criminal statute would be protected, while high level official lies would be punished. In this way the secrecy and deceit which protect illegal intelligence activities can be eliminated.

Mr. DRINAN. Mr. Speaker, I am pleased to join Representative BADILLO and other Members of the House in introducing the Federal Intelligence Agencies Control Act of 1977. The measure is designed to bring the investigative and intelligence agencies of the Federal Government under effective control. For too long, agencies such as the FBI have operated without any guidance from Congress and without any restraint by the President. This bill seeks to correct those deficiencies by carefully defining the jurisdiction and permissible activities of the affected agencies.

Other Members today have addressed the provisions of this bill restricting the activities of intelligence and investigative agencies. I will not reiterate their descriptions of those features. I do wish to comment briefly, however, on one of the remedial devices in the proposal: The creation of an office of special prosecutor to deal solely with crimes arising out of "intelligence and counterintelligence activities." That office is established by title VII of the bill, which defines the jurisdiction of the office in a manner similar to the definition in H.R. 11357, a bill I introduced last year.

The need for a special prosecutor with jurisdiction over the intelligence community has been cogently stated by Senator CHURCH. I am appending to my comments here the full text of Senator CHURCH's analysis of the inadequacies of enforcing Federal criminal laws against these agencies through the regular channels at the Justice Department.

The principal objection is that the Department of Justice has been something less than vigorous in pursuing and prosecuting offenses committed by Federal employees engaged in intelligence or counterintelligence activities. The historical relationship between the Department and the agencies covered by this bill discloses a "sweetheart" arrangement which is inconsistent with is duty to enforce the criminal laws impartially.

We should recall that from 1954 until early 1975, the Justice Department essentially delegated its investigative and prosecutorial functions, involving alleged criminal conduct by employees of the CIA, to the Director of that agency. I understand that a similar arrangement obtained with the FBI, apart from the fact that it is a part of the Justice Department.

In addition the Justice Departments provides legal representation to present and former employees of these agencies in civil actions arising out of their official conduct, however illegal it might have been. That provision of legal counsel represents an inherent conflict of interest and argues strongly for an independent prosecutor to investigate the allegations of criminality.

It is of the highest importance that Federal employees engaged in intelligence or counter-intelligence be held to the same standards as all citizens. Their duty to obey the law cannot be relieved simply because of the nature of their work. The maxim that no one is above the law applies with equal force to these Federal agents. Title VII of this bill seeks to restore the belief of Americans in that premise, so seriously eroded by those to whom we have given very sensitive tasks.

I urge the Members of this House to support this omnibus bill and hope that the committees to which it is referred will undertake hearings at the earliest possible time. Congress has for too long allowed these agencies unbridled discretion in their operations. It is now time to regulate them and to place precise limitations on their authority.

I insert Senator CHURCH's statement in the RECORD at this point:

GOVERNMENT ADHERENCE TO THE LAW: A CALL FOR A TEMPORARY SPECIAL PROSECUTOR ON INTELLIGENCE ABUSES

Mr. CHURCH. Mr. President, a year ago the Select Committee on Intelligence began its investigation of the American intelligence service. Since then, the road we have traveled has been long and hard. But now the end of the journey is near. Soon the committee will present its final recommendations.

We have sat neither as judges nor jurors in this inquiry. It has not been our function to act as a grand jury. Our purpose, rather,

has been to obtain information to aid the legislative process. In particular, we have sought the knowledge and understanding, based on a close review of intelligence activities over the past three decades, which could help us develop sound legislative remedies to reform the intelligence agencies and prevent abuses of power in the future.

The criminal investigation and prosecution of officials within the intelligence service who may have violated the law is not the task of this, or any other, congressional committee. Yet all Members of Congress, and the citizens they represent, should be concerned that justice takes its proper and impartial course in this matter.

The Senate Select Committee has spent the better part of a year ferreting out the facts and has established that many laws have indeed been violated. The list is extensive:

From 1956 to 1971, the Federal Bureau of Investigation carried out five counter-intelligence programs, or "COINTELPROs," against a variety of organizations involved in peaceful protests. Among these organizations were the Southern Christian Leadership Conference, most black student groups, and various antiwar groups.

The FBI program against the New Left was the most wide sweeping of all. Its targets included underground newspapers, students protesting various university policies, the antiwar Inter-University Committee for Debate on Foreign Policy, and several colleges and universities.

The FBI tactics included the use of anonymous letters and telephone calls designed to disrupt families, friendships, careers, and organizations; the use of agents provocateurs to sow dissension and fragment groups; the dissemination of fake information about individuals to employers, credit bureaus, and creditors; the instigation of tax investigations against certain citizens for harassment purposes, alone; the investigation of the private life of group leaders for whispering to the press; and an almost endless list of equally deplorable assaults on first amendment rights.

From 1962 until his death, Dr. Martin Luther King was the target of a vicious campaign by the FBI to discredit him as the most prominent black activist in America. The full array of the Bureau's sophisticated devices of technical surveillance was turned against Dr. King. He was illegally bugged, tapped, and followed. Information on his private life was then delivered by agents of the FBI to clergymen, Members of Congress, the White House, U.S. Ambassadors, newsmen, the National Science Foundation, and the British Government, among others. Agents were sent to colleges to persuade them not to grant Dr. King honorary degrees.

Information obtained from microphone coverage of Dr. King was handcarried to prominent clergymen throughout the country. As one agent recalls:

"[Hoover] sent me . . . to talk to an Episcopalian Bishop. He instructed me to tell this Episcopalian Bishop, who had been speaking for King . . . all sorts of details. It was not a pleasant assignment. But it was an order, an instruction, and I did go. . . . [The Bishop] led me to believe that we could have done a more honorable thing if we had stayed in Washington and not carried that tale out there, and I'm inclined to think that he was right."

Thirty-four days before Dr. King was to fly to Norway to receive the highest honor an American can earn, the Nobel Prize for Peace, the Federal Bureau of Investigation even sent him a message urging him to take his own life. The unsigned note read:

"King, there is only one thing left for you to do. You know what it is. You have just 34 days in which to do it. (This exact number has been selected for a specific reason.) It has definite practical significance. You are done. There is but one way out for you."

The FBI has engaged in a host of other questionable activities, including the collection of intelligence on critics and political opponents of incumbent Presidents.

In 1969, the Internal Revenue Service established a special service staff—SSS. For the next 5 years the SS staff was used by the IRS and, indirectly, the FBI to gather intelligence on dissident groups. Its 11,458 files included dossiers on antiwar leaders, black political leaders, writers, labor organizers, tax reform groups, civil rights groups, women's liberation groups, clergymen, and many more.

In 1967, a special operations group was formed in the Central Intelligence Agency. Its purpose was to explore possible ties between hostile foreign nations and domestic dissent within the United States. The project received the code-name "Operation CHAOS." Over a 6-year period, CHAOS accumulated more than 13,000 files, including 7,200 on American citizens. Through this program the CIA became a storehouse for the stockpiling of large quantities of data on citizens of this country.

From 1940 to 1973, various illegal mail-opening programs were conducted intermittently by the CIA and the FBI. The CIA program ran—off and on—from 1952 to 1973, and involved the opening of mail to and from American citizens. This mail was intercepted in five major cities within the United States, with the largest operation taking place in New York City. In that metropolis alone, 9,000 letters were opened and read by CIA agents in the last year of the program. Among the individuals and organizations whose mail was examined were Arthur Burns, Mrs. Martin Luther King, Jr., Richard Nixon, Senators HUMPHREY and KENNEDY, the Ford Foundation, Harvard University, and the Rockefeller Foundation.

The FBI mail-opening program ran from 1940 to 1966, with Federal agents in seven American cities reading and photographing letters written by citizens of the United States. The FBI also cooperated with the CIA mail program in New York City, receiving copies of more than 50,000 intercepted letters from the Agency between 1958 and 1973. Military intelligence units shared the CIA take, too.

In the summer of 1970, the so-called Huston Plan was drafted for and approved by the President. Based on a sweeping review of intelligence collection methods prepared by officials of the CIA, the FBI, the National Security Agency—NSA—the Defense Intelligency Agency—DIA—and the separate military service units, the Huston Plan contained a series of illegal proposals. The plan, approved by President Nixon, invested the intelligence agencies with Presidential authority to monitor the international communications of U.S. citizens; intensify the electronic surveillance of domestic dissidents; read the mail of American citizens; break into the homes of domestic dissenters; and increase the coverage of college students.

Although the plan was rescinded 5 days after its initial approval, several of the programs continued—just as they had gone on before the Presidential appointment. They had a life of their own, apart from higher authority. The CIA mail program is but one example.

Among the programs approved by the President in the Huston Plan was a "watch list" maintained on American citizens by the National Security Agency. Messages carried over international communications facilities which were to, from, or about individuals whose names appeared on the watch list were automatically sorted out and monitored by NSA computers. The messages were also disseminated to the CIA, the FBI, and the Secret Service. Throughout the 1960s and early 1970's, over 16,000 American names were placed on the NSA watch list.

Moreover, since 1945, three international telegraph companies provided the U.S. Government with copies of telegrams sent abroad by American citizens. This program was turned over to the National Security Agency, when that agency was established in 1952 and it became known as Operation Shamrock. American names on the NSA watch list served as computer indexes or signals for the private companies to sort from their large volume of messages those which were of interest to the Government. These messages were then circulated to the Bureau and the CIA.

This is, by no means, a comprehensive list of unlawful conduct by the intelligence agencies. The possibility of perjury by intelligence officers before the Congress is not the least of several questions which have yet to be resolved by a thorough investigation of the evidence. This is an issue of utmost importance, since the Congress cannot hope to arrive at useful remedial legislation on the intelligence service—or any other public policy concern—if it is not told the truth.

The issue, then, is not whether laws have been violated, but rather when and how justice will be served. The "when" ought to be as soon as possible; the "how" is a more tangled problem.

An argument can be made in favor of allowing the usual processes and institutions to take their course. The Justice Department has begun to conduct criminal investigations of several cases uncovered by the Rockefeller Commission and the committees of Congress. It can be argued that these investigations should not be interrupted since they have already begun.

Certainly, the present Attorney General is a man of integrity. He has voiced his concern several times over regarding the abuses which have come to light through the investigations of the past year. He has been helpful to the select committee by providing documents and other information. I have full confidence in his good intentions and his respect for the law.

Nonetheless, the Attorney General faces an unfortunate dilemma. Since the Federal Bureau of Investigation is a subdivision of the Justice Department, it lies within the administrative responsibility of the Attorney General. He is thus placed in a position of investigating the very house over which he must preside.

It is not only the actuality of impartiality which is at stake. The appearance of impartiality is just as important. The American Bar Association standards for criminal justice provide that a prosecuting officer should have no conflict of interest or the appearance of a conflict of interest. As Chesterfield Smith, past president of the ABA, has noted:

"Under the Standards, it would be improper for an investigation . . . of the Executive Branch of the Federal Government to be conducted by a prosecutor subject to the direction and control of the President."

The fact that the FBI is a part of the Justice Department is not the only troubling aspect of this situation—though it is serious enough since, over the years, senior FBI officials and Justice personnel have had close contact in their daily work and have shared knowledge of the dubious activities brought to light by the select committee inquiry. The Justice Department and the CIA have also had a unique relationship. A secret agreement between the two was in effect for 20 years which exempted the Agency from the usual requirements of reporting to Justice any violations of the law among CIA personnel.

Moreover, it is the Justice Department which is supposed to represent intelligence officials who may be sued for civil damages as a consequence of the disclosures brought

about by the Congressional investigations. How can the Justice Department investigate and prosecute these officials, on the one hand, and defend their interests in civil suits on the other? It just will not work.

It is obvious that the public is deeply troubled by the findings of the investigations into the intelligence service. In a recent Harris survey, 80 percent of those interviewed agreed "it was wrong for the FBI to send a note to Martin Luther King suggesting that he commit suicide"; 74 percent agreed "it was wrong for the CIA to work out a deal with Mafia characters to try to assassinate Castro"; and 61 percent agreed "it was a violation of basic rights for the CIA and FBI to conduct spying on prominent Americans here at home."

The Government must move decisively. To avoid charges of a whitewash, it is in the best interests of the Justice Department to disqualify itself in this case.

What is vital now is to guarantee a full, thorough, and independent investigation. A special prosecutor should be enlisted for this purpose, and given sufficient authority to fully perform the task.

Last year, the American Bar Association Committee to Study Federal Law Enforcement Agencies addressed itself in a preliminary report to the question of a special prosecutor. The committee rejected the establishment of a permanent special prosecutor, but noted that—

"The public must be assured that crimes committed in high places will be investigated and prosecuted fearlessly and with integrity."

To this end, the ABA committee properly concluded:

"There may be exceptional circumstances requiring a special prosecutor from outside the Department of Justice who is not dependent on the Attorney General or the President for future promotion or other preferment. The primary obligation to appoint such an attorney should reside in the Attorney General."

The relationship between the Justice Department and the intelligence service unquestionably presents us with an exceptional circumstance.

The person chosen to perform the task of special prosecutor must possess the same impartiality and strength of resolution which Leon Jaworski demonstrated during his appearance before a committee of Congress in 1973. The following exchange occurred that year in hearings before the Senate Committee on the Judiciary:

"Senator TUNNEY. So as I understand your statement today, you feel that if there is evidence of criminal activity which is indictable, that you would be prepared to move ahead with an investigation and indictments despite the fact that the defendants involved might be prepared to claim that national security required them to do what they did?"

"Mr. JAWORSKI. That is right, sir. And they would have the burden of sustaining that position. I would not assume the burden. I would contest it."

The special prosecutor, moreover, should be imbued with the same faith in the law that possessed John Adams, who knew that the law "without any regard to persons, commands that which is good and punishes evil in all, whether rich or poor, high or low—'tis deaf, inexorable, inflexible."

The basic machinery of a special prosecutor's office is already in place as a legacy of the Watergate affair. It should not be too difficult to modify this machinery in the appropriate manner to carry out the investigation of unlawfulness in the FBI and other intelligence agencies.

It may be argued that we should concentrate on the reform of the intelligence agencies for the future, not on the punishment of individuals for misdeeds of the past. This is a beguiling argument. But the truth is that we can ill-afford to overlook the lawlessness of the past if we wish to avoid a repetition in the future. As two scholars from the Center for National Security Studies, Jerry J. Berman and Morton H. Halperin, noted in a recent New York Times article:

"One key element in bringing the intelligence agencies under democratic control is to insure that officials of intelligence agencies are prosecuted when they violate the law. Unless there is a thorough investigation by an impartial prosecutor followed by indictments and a report, the threat of criminal penalties will not deter future abuses."

I find it utterly deplorable that the President in his State of the Union message failed completely to say even a word about the need to make our intelligence agencies obey the law. As the journalist Anthony Lewis has commented:

"It is easy to denounce private crime, as Mr. Ford did. But it is more important, now, for Government to commit itself to law."

And so I must conclude that, in the present situation, resort to a temporary special prosecutor is both proper and necessary. Leon Jaworski, a former Special Prosecutor himself, and others in the legal community agree with this conclusion.

GENERAL LEAVE

Mr. DICKS. Mr. Speaker, I ask unanimous consent that all Members may extend their remarks and include therein extraneous material on the subject of the special order taken today by the gentleman from New York (Mr. BADILLO).

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

THE REVEREND THEODORE M. HESBURGH AND JAMES P. GRANT ON "AGENDA 1977: THE UNITED STATES AND WORLD DEVELOPMENT"

(Mr. BRADEMAS asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. BRADEMAS. Mr. Speaker, the Overseas Development Council, of which my distinguished constituent, the Reverend Theodore M. Hesburgh, C.S.C., president of the University of Notre Dame, is chairman, has just published a most significant volume entitled, "Agenda 1977: The United States and World Development."

The book was isued just 1 day after President Carter made his outstanding address to the United Nations setting forth the outline of our country's foreign policy, and I understand that leading officials of the new administration had read the page proofs of the publication before the address was prepared.

In his remarks of March 18, 1977, on the presentation of the volume, Father Hesburgh declared:

For the first time there is a realistic possibility of eliminating the worst aspect of human poverty, in less than 25 years, and at a cost the U.S. and other industrialized countries can afford to pay. The question is, is there the political will and, will the U.S. provide the necessary leadership?

Mr. Speaker, "Agenda 1977" makes an outstanding case for a vigorous role for American leadership in the attack on poverty in the world, and I commend the publication to the attention of all Members of the House of Representatives and Senate.

Mr. Speaker, at this point in the RECORD I insert the introduction to the book which was written by Father Hesburgh and James P. Grant, president of the Overseas Development Council:

INTRODUCTION

(By Theodore M. Hesburgh and James P. Grant)

Agenda 1977, the fifth annual assessment by the Overseas Development Council of relationships between the United States and the developing countries, is being published at one of those open moments in history when a series of developments combine to make changes possible on a scale normally not within the realm of possibility. The United States, under the leadership of a President who bears no burden of prior identification with past disputes, has a unique opportunity to contribute to the global leadership that is urgently required if the world is to work more effectively and equitably for people in both the developed and developing countries. The question now is whether or not this opportunity will be seized.

This sense that the next few years will be a period of considerable change in international development is reflected in the unprecedented statement to the world by President Jimmy Carter—reprinted on the facing page—that was broadcast on Inauguration Day. Addressed to those "citizens of the world who did not participate in our election but who will nevertheless be affected by my decisions," President Carter committed his Administration to shaping a world order that is "just" and "more responsive to human aspirations" as well as stable and peaceful. He spoke of the "basic rights" of every human being to be free not only of political repression but also of poverty, hunger, and disease. He further emphasized the need for an "equitable development of the world's resources" and the "proper safeguarding of the world's environment." While stressing the limitations of America's acting alone, he committed the United States to joining with others in addressing these issues and taking the lead in such efforts. His closing words called upon the citizens of the world to "join us in a common effort."

But what is the shape of the "common effort" to which President Carter referred? How far-reaching a response is needed? What is feasible? What might be done now to signal a U.S. will to respond constructively to global problems? Analysis and discussion of these critical issues is the main objective of Agenda 1977.

President Carter has come to power in the United States at a time when there is a growing understanding both in the United States and abroad that the world order created after World War II is coming to an end and that another is urgently required. A broad consensus is emerging among the leaders of both the industrialized democracies of the Northern Hemisphere and of the developing countries to their South that the economic, social, and political systems created after World War II require renovation, restructuring, and in some instances, replacement and supplement. Only through such changes will they once again meet the legitimate needs of the North and, at the same time, become far more responsive to the South's needs and aspirations for greater equality of opportunity. Existing arrangements in areas such as trade and monetary affairs need to be adapted to changed circumstances. Problems such as energy shortages and nuclear proliferation, the deteriorating environment, and growing population re-

quire major new approaches if they are to be adequately resolved.

There also is a second and growing area of agreement among citizens and leaders in many countries: the need for increased cooperation to accelerate development in the poorest countries in a way which more effectively addresses the basic human needs of this poorest fourth of humanity. More effective approaches are needed to the problems associated with their poverty—the increased migration from the countryside to the city, growing unemployment, population growth, and the continuing erosion in many countries of basic political rights. It is becoming increasingly apparent that major changes are required in both international and domestic policies if the prospects of the world's poorest billion people are to improve noticeably in the remaining decades of this century and millions are not to continue to die prematurely each year.

Beyond this very general level of awareness of the problem, however, there is no consensus on the goals and means for proceeding on a "common effort." Clearly, a far-reaching response is desirable and, in our view, indispensable. The critical question is how far reaching a response will be both needed and politically acceptable, and what forms of response are feasible.

This year the format of the Overseas Development Council's *Agenda* has been changed in order to illumine the choices that face the new Administration—and indeed *all* Americans. The opening essay, "The United States and World Development, 1977," by *Agenda* Director John W. Sewell sets the stage for the ensuing analysis of the central issues. It briefly describes global problems, surveys the present state of development progress in the Third World, reviews the record of the past four years of North-South relations, discusses some of the reasons behind the proposals of the developing countries for a "new international economic order," and identifies the need for new policies of global cooperation. This essay also describes the emergence of new international strategies to facilitate the attainment of "basic human needs" on an accelerated basis in all countries, but particularly in the world's poorest nations, and raises the numerous critical questions that must be considered by U.S. policy makers in the years ahead.

The central choices open to the Carter Administration are analyzed in the essay, "Major U.S. Options on North-South Relations: A Letter to President Carter," in which Roger Hansen sets forth the pros and cons on three principal "options" facing the new Administration; from among these, he formulates a preferred proposal which, in effect, represents a fourth possible choice. These four alternative policy "packages" may be briefly summarized as follows.

Option 1 provides for only marginal changes in existing policies—but with more effective implementation. Under this approach, there would be some increased U.S. responsiveness to developing-country concerns, with U.S. *actions* in areas such as aid, trade, commodities, etc., being consonant with the more responsive official rhetoric of the recent past—and especially since the September 1975 Seventh Special Session of the U.N. General Assembly. The prime objective would be to seek to take the heat out of the North-South confrontation. This would reduce the adverse impacts that this confrontation is having on the operation of various aspects of the present international system and would increase the capacity for collective action on a range of global issues.

Option 2 calls for a policy of "accelerated reform." In contrast to the "marginal change" approach of Option 1, this package of policies emphasizes the *active search* for a broader and more significant range of reforms of existing international political and economic systems. It suggests using the present North-South debate as an opportunity to not only examine and hopefully resolve some conflict-ridden North-South issues but also as a chance (similar in scope to that which confronted the Bretton Woods and subsequent negotiations in the post-World War II era), to lay the basis for the new, more relevant world order that so many believe is required for the balance of this century.

Option 3, which could be carried out in combination with either of the first two options, provides for greatly increased support for a "basic human needs" strategy of development designed to virtually eliminate, by the end of this century, the worst consequences of absolute poverty—including widespread malnutrition, mass underemployment, high birth rates, and low productivity of the poor.

Hansen's preferred proposal for the United States and the new Administration would combine early implementation of those "incremental" reforms of Option 1 which do not foreclose more far-reaching actions together with active exploration (with the developing countries) of the potential for the "accelerated reform" proposals of Option 2, as well as with a limited version of the basic human needs of Option 3. Any other choice, he concludes, would amount to selling ourselves short—for the future as well as the present.

Two major conceptual differences divide the proponents of Option 1 and the proponents of the more far-reaching proposals. The first is their differing assesment of the seriousness of the current predicament of mankind—an assessment which can differ in part depending on one's values. The second is a divergence of views over what is politically feasible. Clearly, far more than ad hoc pragmatic responses is required if the increasingly dangerous situation in which humanity now finds itself is to be avoided. Yet it is generally acknowledged that it is considerably more difficult to address world problems today than it was in the late 1940s. There now are far more national actors and a far greater diversity of interests represented on the world scene (the number of independent countries has nearly tripled since World War II). The United States is no longer the overwhelmingly dominant power among the market-economy countries; and domestic expectations of governmental action to provide jobs and protect human welfare are far higher among the developing countries than ever before.

Responsible and knowledgeable persons will take different positions on these two questions of need and feasibility. Our own personal judgment is that something considerably more substantial than marginal changes is required, and that such changes can be made politically feasible. But these are only *our* conclusions; the analysis in the "Letter to President Carter" is, we think, sufficiently comprehensive and balanced that others may reach different conclusions from the same information.

The third chapter of this *Agenda*, "Recommendations for U.S. Policy," presents a series of specific proposals—within a broader, long-term framework—for early U.S. action on issues relating to trade, commodities, developing-country debt, technology transfer, energy, oceans, food, basic human needs, population, human rights, development assistance, arms transfers, and decision-making processes on interdependence issues. The policy recommendations are of several different types. Some call for decisions which can be taken in the immediate future to signal a constructive intent on the part of the United States to reshape its policies toward the developing countries; others set forth actions which can be taken in the next two to four years. Still others identify major areas on which further studies and discussion should be initiated now to permit early decisions on a range of far-reaching reforms of various global systems and on a cooperative effort to address basic human needs so that the worst aspects of absolute poverty might be largely eliminated during the remaining years of this century.

An important addition to this *Agenda's* Statistical Annexes is the introduction of a "Physical Quality of Life Index" (PQLI) designed to complement per capita gross national product (GNP) in measuring development progress. This index is described in the introductory note to the Annexes; in Table A-3 of the Annexes, it is shown—along with other economic and social indicators—for 160 countries. The increased attention paid in recent years to addressing basic human needs more effectively has only strengthened the need for the development of an indicator that would parallel the GNP measure of output of goods and services and could be used to measure progress in terms of human well-being. The PQLI demonstrates that individuals in some areas (which differ widely in other respects)—for example China, Taiwan, Sri Lanka, and the Indian state of Kerala—have a far higher level of physical well-being than would be expected from an assessment of their per capita GNP figures alone—and that the reverse is true in other countries, including Algeria, Brazil, Iran, and South Africa.

Four final points merit mention in this introduction. First, the development of a coherent strategy for addressing the global problems of today will require a great deal of analysis and discussion among the developed countries, between developed and developing countries, and among developing countries. The atmosphere in which these discussions and negotiations are undertaken is critically important. Is the underlying assumption that where one party to negotiations gains, the other must necessarily lose? Or are negotiations undertaken with the commitment to address major problems in such a manner that there may be direct or indirect benefits to all principal parties? If the former, then it is highly likely that the confrontational atmosphere of the last three years will continue; if the latter approach is adopted (as already has been done in the mid-1970s on questions of world food policy), then the prospects for global solutions to these pressing problems will improve greatly.

If the United States were to take an active lead in implementing present policies on which there already is substantial agreement in principle—such as the partial lowering of trade barriers, noticeably increased aid flows to the poorest countries, and establishment of world food reserves—such actions should create a constructive atmosphere for the active exploration in 1977 and 1978 of the possibilities for greatly increased cooperation in reshaping the international system.

Second, analysis and discussion of the more far-reaching changes that will be required should be launched in many forums. Some will encompass both the public and private sector—as does the January 1977 proposal by World Bank President Robert S. McNamara for a commission of eminent persons to examine North-South issues. Action by the private sector is particularly important in the years ahead. Much of the progress that has been made in recent years in this country and internationally in such areas as environment, population, women's rights, and a more effective approach to solving the world food problem has resulted from private initiatives and leadership.

Third, more serious attention needs to be given to those individuals and groups within the United States who suffer losses even though our economy as a whole gains. Trade policy provides the best example of this problem. In the long run, freer trade will benefit all Americans by providing more

efficient and higher-paying jobs and less costly consumer goods. But liberalized trade also will mean allowing the developing countries greater access to our markets for their manufactured goods. Is the total price for these benefits to society as a whole to be paid by, for example, a Hispanic worker in the garment industry or a Southerner working in a textile mill who lose their jobs due to competition from other countries? Clearly we will need policies that not only accommodate the needs of the developing countries but also assure all Americans of just treatment in accommodating to changed circumstances.

Fourth, in the mid-1970s we are witnessing a tremendous increase in awareness and concern among Americans about human political and economic rights. It seems increasingly likely that an effective combination of international and domestic policies could overcome the worst aspects of absolute poverty by the end of this century. But far more analysis and thought is required on what might be considered minimum political rights and on how their acceptance can best be advanced, on the degree to which progress on political and economic well-being is associated, and on what goals—if any—we should seek to attain in these areas by the end of this century. Most studies to date have treated approaches to advancing political and economic well-being as two separate topics. President Carter, however, has quite properly encompassed both under the common heading of "basic rights."

The ideas and proposals contained in this *Agenda* may not find agreement among all or even a majority of Americans. They have been designed, however, to stimulate thinking about actions needed a year ahead as well as forward planning of the kind of world we want by the end of the century. A majority of those who read this *Agenda* will still be in their working lives by the year 2000. They have a stake in seeing to it that a reshaping of international institutions and structures begins now if they wish to glean any of the benefits of such changes in their lifetimes.

The industrial democracies should resist the temptation to see the current North-South dialogue as a situation in which losses are inevitable and negotiations are primarily designed to gain time or preserve the status quo. Rather, they should treat it as an extraordinary opportunity for initiating, in the words of President Carter, "a common effort"—which, by the end of this century, could create a world that not only better serves the already advantaged, but also is free of the worst aspects of absolute poverty and repression.

CRISIS IN THE CANOE COUNTRY

(Mr. FRASER asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. FRASER. Mr. Speaker, the January/March edition of the Living Wilderness, the Wilderness Society's quarterly publication, contained perhaps the most comprehensive and informative article I have read on the Boundary Waters Canoe Area in northern Minnesota. Entitled "Crisis in the Canoe Country," the article was written by Miron Heinselman, a research forester and principal plant ecologist for 26 years at the U.S. Forest Service's North Central Forest Experiment Station.

In January, I introduced H.R. 2820, the Boundary Waters Wilderness Act, a bill to bring full wilderness protection to the Boundary Waters Canoe Area. The Heinselman aritcle clearly and forcefully outlines the dimensions of the problems that have made my bill necessary. I commend it to my colleagues' attention. The article follows:

CRISIS IN THE CANOE COUNTRY

(By Miron L. Heinselman)

Few of America's wilderness areas have been embroiled in such persistent controversy as northeastern Minnesota's million-acre Boundary Waters Canoe Area. On its face BWCA would seem safe for the enthusiastic canoe travelers who already tax the carrying capacity of its more accessible lakes and streams, not many decades ago routes for the picturesque voyageurs who paddled furs out of the north country. By act of Congress—the 1964 Wilderness Act—the Canoe Area is part of the National Wilderness Preservation System, which is dedicated to human enjoyment without mechanized intrusion. And certainly in conservationists' eyes the BWCA has the credentials entitling it to unequivocal protection. It is the only large lakeland unit of the Wilderness System and the system's second largest unit of any kind; east of the Rockies it is larger than all other existing wilderness units combined and embraces the largest remaining virgin forest; and it attracts more recreationists than any other wilderness area in the nation.

But in the Wilderness Act framework the BWCA is a special case. Because of pressure from loggers and motorboaters, Congress in 1964 wrote a BWCA protective provision with two large loopholes. The law provides that the area must be managed "with the general purpose of maintaining . . . the primitive character of the area, particularly in the vicinity of lakes, streams and portages." But it also stipulates that this protection is to be "without unnecessary restrictions on other uses, including that of timber," and further provides "that nothing in this Act shall preclude the continuance within the area of any already established use of motorboats." No other wilderness area has been burdened with such compromises.

Because of these loopholes, the BWCA faces mounting threats. Some of the area has been logged already. After being halted by litigation, timber access-road building and logging are now about to resume on six federal timber sale areas covering 10,000 acres of virgin forest. Vast additional areas are vulnerable to future sales. Mining also is a threat. Snowmobilers and motorboaters are trying to nullify curbs on motor use and in a real sense to dismember the entire BWCA. All this is creating a growing preservation crisis.

Legislation dealing with this crisis was initiated in the last Congress, although not acted upon. A bill sponsored by Rep. Donald Fraser (D-Minneapolis) and backed by conservationists would have closed the entire BWCA to logging, mining and mechanized recreation. However, a competing bill sponsored by Rep. James Oberstar (D-Duluth), whose district includes the BWCA, and supported by some commercial and motor-recreation interests, while giving full wilderness protection to 60 percent of the area would bodily have removed the rest from the Wilderness System. The bill would have converted the latter portion to a national recreation area open to logging, motors and other non-wilderness uses, in the process setting a dangerous national precedent. Current plans of timber companies to resume logging next September will make this a crucial BWCA year of decision in the new Congress.

It would be difficult to exaggerate the BWCA's significance as a conservation and recreation resource. The area, in the first place, is truly big wild country. Stretching along the Minnesota-Ontario border for 110 miles, it is a land of a thousand pristine island-studded lakes connected by 1,200 miles of streams, portages and foot trails, where dark forests of jack pine and black spruce march out to the edges of plunging glacier-carved lakeside cliffs; where sturdy centuries-old white and red pines keep lonely vigil over canoe routes once followed by the Sioux, the Chippewa and the French voyageurs; where the mournful howl of the timber wolf and the haunting laughter of the loon awaken memories of primeval America.

Precisely because the BWCA is the last large relatively complete northern coniferous forest ecosystem east of the Rockies, scientists and students use it as a living laboratory, studying its areas of natural vegetation inhabited by such plant-eaters as the moose, beaver, snowshoe hare and porcupine and their natural predators, including such rare species as the eastern timber wolf, marten, fisher, lynx and bald eagle. Even many wilderness areas of the West lack such complete food chains. The area has become the focus of much research and education in forest and wildlife ecology, animal behavior, vegetation history, nutrient cycling and aquatic ecosystems.

Complementing the BWCA is Ontario's adjacent 1,120,000-acre Quetico Provincial Park, where logging and snowmobiles are banned and motorboats are barred except on the periphery; on the latter an early motorboat phase-out is proposed. Together these two wilderness expanses match the size of Yellowstone National Park.

Logging in what is now the BWCA began about 1895 in the heyday of big-time logging. By 1930 about a quarter of the area had been cut for lumber. Rafting and stream-driving were used to move the logs to the mills or to railheads mostly outside the area. Most early cutover tracts were later burned and not reforested. White and red pine seed sources were often lost. Such tracts now support second-growth forest of aspen, birch, jack pine, spruce and balsam. Where enough white and red pine seed trees survived, good second-growth stands often exist today. Pulpwood logging based on jack pine and black spruce began in the BWCA in about 1948, mostly on the original public domain lands where there were many recent burns or trees that had been too young to cut during the early big-pine logging. The pulpwood logging has involved clearcutting of timber-sale blocks encompassing many square miles, often followed by bulldozing or disking of the soil, artificial reforestation and herbicide use and sometimes no reforestation at all. Most sale areas have been cut only for pine and spruce, with aspen, birch and fir left to rot, causing severe changes in the ecosystem as well as scarring the landscape.

Heavy trucks requiring gravel roads are used, yet much of the pulpwood logging has occurred in the very areas that in 1926 Secretary of Agriculture William M. Jardine had promised to keep "free of roads of any character." The era 1948 to 1972 therefore saw the development of a spider-web network of roads in a fourth of the BWCA. There were dozens of crossings of portages and canoe routes by roads, bridges, fills and culverts. Many of these roads still exist, even though the Forest Service and timber industry call them temporary. Signs on several claim they will be "obliterated" when logging is finished, but the actual policy has been to "put to bed" the road grade by simply blocking off access and sometimes removing bridge spans and culverts. Many cutover areas are dotted with such reminders of civilization as old bed springs, stoves, refrigerators, truck tires, tarpaper shacks, bridge timbers, culverts, gravel pits and eroding cuts, fills and grades.

How well is the Forest Service carrying out the Wilderness Act's mandate to "maintain the primitive character of the area, particularly in the vicinity of lakes, streams

and portages"? For timber-management purposes the BWCA is divided into two general "zones"—the Interior Zone of some 600,000 acres where logging is banned and the Portal Zone of some 400,000 acres where it is permitted. Most of the lakes and streams are in the Interior Zone. This zone, however, is not a single, solid unit but an irregular strip along the Canadian border with a number of narrow appendages and small isolated units following streams and lake chains southward into the Portal Zone. Thus the effective contiguous area from which logging is excluded is smaller than the total area of the Interior Zone.

Some of the Interior Zone was established only recently. This means that much of it has already been logged—part years ago, part very recently. In 1975, 100,000 acres were added to the zone, but only about 15,000 acres of the addition had not been logged. (Much of the logging occurred after the Wilderness Act was enacted.) About 160,000 acres of the zone are virgin forest yet still subject to logging. Established administratively by the Secretary of Agriculture, the zones could be changed by any Secretary.

There has been much confusion and controversy over the nature, location and extent of the BWCA's remaining virgin forest and its relationship to the two zones. Some industry people have claimed that virtually all the BWCA has been logged and that conservationists concerned about logging do not know the facts. Others go to the opposite extreme, claiming that most of the BWCA forest is over-mature and decadent because of wilderness protection and will soon die of old age if not logged. Neither view is correct.

Most people will agree that a virgin forest is any forest area primarily the product of natural forces that never has been subjected to logging, land-clearing, roadbuilding, mining, agriculture or other direct alterations by man. We cannot limit the term virgin forest to particular species or age classes of trees, because the primeval forests of most regions, including the BWCA, consisted of a mosaic of different species and age classes of stands on various geological landforms and soils. Many virgin forest stands are nearly even-aged, at least in their upper canopy layers, because the larger trees all originated soon after some natural event that eliminated an earlier stand. Examples of such events are fires, windstorms and insect and disease attacks. If a natural disturbance occurred long ago the overstory trees will be very old. If it occurred only a few years ago they will be young. In the BWCA the maximum longevity of most tree species is 400 years or less. One should therefore expect the virgin forest to consist of a mosaic of species and age classes ranging up to about that age, with perhaps only a few stands near the maximum and a good scattering of age classes all the way down to new stands that have just begun life on recent burns or blow-down areas.

My own research has shown that virtually all of the present BWCA virgin forest originated following forest fires and that recurrent fires have been part of the natural environment for thousands of years. One can therefore describe the age structure of the total virgin forest mosaic by mapping out the stands on past burns and then determining the total area now occupied by forest that dates from each fire year. Such maps, called "stand-origin maps," are available for the entire virgin area of the BWCA. For a lakeland region like the BWCA there are two relevant kinds of estimates of the remaining virgin wilderness resource. One is the total area of landscape—land and water—never disturbed by logging. The other is the land area still supporting virgin forest communities. The latter can be broken down by stand-origin-year classes, to give a feel for the age-class structure of the forest mosaic. I have done this for the entire area of virgin forest in the BWCA, as shown in the accompanying table. It is very clear that the BWCA's virgin forest is *not* "all overmature and decadent," although there are large areas that do support scenic stands of large trees.

Actually, of the total 1,030,000-acre BWCA, about 540,000 acres or 52 percent still is virgin forest. This includes some 10,000 acres within the boundaries of six active federal timber sales. Within the total virgin area the actual virgin *forest* uncommitted to timber sales classifiable by stand ages is 416,000 acres (see table).

BWCA VIRGIN FOREST STANDS

Stand-origin fire year	Stand age (Years from 1977)	Stand area: Interior zone (acres)	Portal zone (acres)	Total BWCA (acres)
1971	6	96	1,936	2,032
1967	10	128	------	128
1936	41	7,920	48	7,968
1925	52	400	------	400
1918	59	416	160	576
1917	60	448	1,408	1,856
1914	63	32	------	32
1910	67	20,096	13,904	34,000
1904	73	304	1,648	1,952
1903	74	2,240	128	2,368
1900	77	------	512	512
1894	83	50,656	46,288	96,944
1890	87	32	------	32
1889	88	128	128	256
1887–8	90–89	160	16	176
1885–7	92–91	384	------	384
1882	95	288	------	288
1881	96	8,672	1,296	9,968
1875	102	63,552	27,062	90,614
1871	106	5,856	------	5,856
1863–4	114–113	61,120	22,480	83,600
1854	123	5,904	2,208	8,112
1846	131	2,288	368	2,656
1827	150	912	------	912

1648	329	64	------	64
1610	367	704	16	720
1595	382	16	------	16
Total		280,608	135,174	415,782

NOTE: Virgin areas as defined for the above table are those never logged, cleared, roaded, etc. Essentially all BWCA areas have been burned since 1595 A.D. The stand-origin year is the year of the last major fire from which the *overstory* dates. Only virgin forest in solid tracts of considerable size is included. Excluded are uncut areas within generally cutover lands, Shipstead-Nolan reserves within cutover areas, approximately 10,000 acres of virgin timber already sold to timber companies, and all lakes, streams and ponds within virgin areas. Area determinations by M. L. Heinselman, March, 1973.

The rest of the acreage is lakes, marshes and other non-forest types. Some 256,000 acres of this virgin forest consist of tree stands more than a century old (62 percent of the virgin forest or 25 percent of the entire BWCA). Most of the 10,000 acres of virgin forest in the six federal timber sales is also over a century old. Some 28,000 acres of the virgin forest support stands over 200 years old (seven percent of the virgin forest and three percent of the entire BWCA). About 10,000 acres contain stands with overstory trees close to 300 years old. The oldest-known pine stand of all is 382 years old. Some of the oldest and most scenic pine expanses are near Lac La Croix and Lakes Saganaga, Sea Gull, Rose, Duncan, Mountain, Clearwater and Alder. These areas would have been deleted from the National Wilderness Preservation System by the 1975 Oberstar bill. On the other hand, there are some 159,000 acres of virgin forest younger than 100 years. This is natural and desirable because in the cycle of a wilderness there must be young replacement trees coming along as older stands die and are regenerated by natural factors. Some of these will become the giant pine stands that one hopes our great-grandchildren will enjoy. Because of fire suppression over the last 60 years there is a deficiency of these younger age classes. Nevertheless, there are quite a few young stands.

It was in 1972 that the massive scale of modern mechanized pulpwood operations, and the rapid pace at which these operations were chewing into the remaining virgin areas, finally brought the BWCA logging issue to the crisis stage. Thirteen federal timber sales were active when litigation was instituted by the Minnesota Public Interest Research Group under the National Environmental Policy Act. In 1973 Federal District Judge Miles Lord ruled in favor of MPIRG, halting the logging on the seven sales that involved the deepest incursions in virgin

areas. The following year the Forest Service completed an environmental impact statement and new management plan and elected to continue cutting. A further suit then was brought by MPIRG and the Sierra Club under the Wilderness Act. Judge Lord granted a permanent injunction against further logging of any large contiguous blocks of virgin forest in the entire BWCA. (At that point some 160,000 acres of virgin forest survived in the Portal Zone, including about 10,000 uncut acres in six active timber sales that he enjoined.) But last August the decision was reversed by the Eighth Circuit Court of Appeals, and in November the injunctions were lifted. The Supreme Court declined to halt the logging pending the outcome of an appeal.

Last December Rep. Oberstar, with the Forest Service acting as mediator, persuaded the four logging companies (Boise Cascade, Abitibi Corp., Potlatch Forests and Kainz Lumber) to suspend cutting for six months so Congress could consider the issue. The moratorium actually will last until September 15 because of a Forest Service rule against logging in the canoeing season. But then the sawing of the virgin forest will resume unless Congress or the Supreme Court intervenes.

One of the six sales—the Sunnydale Sale—involves slicing a new road deep into the beautiful Lac La Croix region almost to the shores of pristine Oyster Lake, a "paddle only" lake in the Interior Zone. This road would also cross the Sioux-Hustler hiking trail. Another sale, the East Tofte, involves logging almost up to remote Cherokee Lake in the famous Sawbill region. To be sure, a provision of the 1930 Shipstead-Nolan Act that prohibits logging within 400 feet of BWCA lakes and streams would effectively hide the impact from the unsuspecting canoeist. Many visitors now travel for miles through logged-off BWCA country without realizing that the wilderness they see is only a thin facade. They may never learn the truth unless they cross an active logging road, and the full extent of the damage may go unrecognized unless they take the time to explore the whole timber-sale area. But this does not alter the fact that some of our choicest surviving wilderness is threatened with imminent destruction.

The timber industry's argument is that the wilderness needs to be cut for its own good. The claim is that if the Portal Zone forest is "locked-up" as wilderness it will become over-mature and decadent with no browse for deer and moose or aspen for grouse and beaver. When the deer and moose disappear, so will the timber wolf, so the argument goes—the thrust of many industry color commercials on Minnesota television. Logging, it is true, often benefits deer, and sometimes also moose. White-tailed deer invaded northeastern Minnesota in the wake of clearcut logging, slash fires and local land-clearing. Originally it was moose and caribou country and deer were rare. Now with better forestry and fire control the old slashings are growing back to conifers and the deer herd is declining, even in multiple-use forest outside the wilderness. Soon it may be possible to reintroduce woodland caribou, which still roam adjoining Ontario. The deer decline may well be permanent.

Of course we cannot literally preserve a tree or even a whole stand of trees of one particular age class. But the goal of wilderness preservation is not literally to save individual trees but to maintain and restore complete natural ecosystems—the dynamic mosaic of plant communities, wildlife habitats and animal populations of a natural region. In the primeval BWCA ecosystem fire was the key agent in maintaining diverse vegetation and animal populations, regenerating old forest, recycling nutrients and sustaining the long-term stability of the system. This is true of most of our best-known western wilderness areas and national parks, where management programs now include restoring fire to its natural role.

Burning after logging has effects different from natural fire in a virgin forest. For example, if red, white or jack pine or black spruce is cut for timber, when the slash-covered land is burned over the seeds are destroyed and it becomes necessary to re-seed or re-plant artifically in order to restore the species. If this is not done the area will be taken over by birch and aspen. In nature, jack pine and black spruce seeds are stored in closed or semi-closed cones which open and re-seed the area after the fire's heat has unsealed the resin coating. Red and white pine are very fire-resistant, and "seed-trees" usually escape the fire to regenerate their kind. When a stand is logged, the nutrients in the mature trees—which would have been recycled by fire—are lost to the system in the timber that is carted off. In the BWCA, too, herbicides have often been used—another ecological insult—to kill fast-growing deciduous trees that otherwise would shade out the planted pine.

If we log the BWCA there is just no way all the interactions of its natural ecosystem can continue. The ecological principles are the same as in such preserves as Yellowstone and Sequoia National Parks and the Bob Marshall and Selway-Bitterroot Wilderness Area. So if we must log the BWCA to "save" its forests as industry claims, then logically we must also log Yellowstone and all the rest! The best proof that the BWCA's virgin forest and its wildlife can persist without logging is that they have done so for 10,000 years—ever since the last ice age. And if logging is permitted on the rationale that it will maintain diversity and provide wildlife habitat, then the seeds of potential destruction will have been sown for all the nation's protected wilderness.

The present Forest Service BWCA management plan permits some noncommercial "administrative cutting" even in the virgin forest of the Interior Zone. It disavows a commercial motive for any BWCA logging, claiming that cutting and removal will be done in a manner achieving desirable vegetation diversity. In other words, man-planned vegetation rather than natural wilderness is the goal. Again, if such reasoning is tolerated for the BWCA's wilderness a fatal principle applicable to our entire Wilderness System will have crept in.

Industry in Minnesota complains of a shortage of softwood pulping timber (pine and spruce) and contends there are no alternative sources to fill the gap that would be created by closing the Portal Zone to logging. But it is obviously the remaining 160,000 acres of virgin forest in the zone that the industry wants, because there are vast areas of second-growth forest elsewhere in northern Minnesota of a quality equal or superior to the second-growth stands in the BWCA. Actually Minnesota has 16 million acres of commercial forest *outside* the BWCA. The Portal Zone virgin forest is a mere one percent of the commercial forest in the state. Although it has been closed to logging for three years by the courts, the industry has not suffered. The softwoods for which industry claims there are no alternatives are jack pine, spruce, balsam and tamarack, yet there are four million acres of these species outside the BWCA and only 70,000 acres of such virgin forest in the Portal Zone—only about two percent of Minnesota's softwood acreage.

From 1973 to 1975 the annual statewide timber cut of all species for all products averaged 2,189,000 cords, while the Portal Zone cut before the injunctions was 37,000 cords—less than two percent of the state cut. For jack pine and spruce, the softwoods most used by industry, the annual BWCA cut was 33,000 cords compared to an average statewide cut for pulpwood of 422,000 cords (1973–75). Thus the BWCA only contributed about eight percent of such pulpwood.

The "desirable cut" for Minnesota calculated by the Minnesota Forest Survey, in which industry participates, is an estimate of how much timber can be cut on a sustained basis. The last period for which such figures exist is 1960 to 1970. But when these figures are adjusted for changes in forest areas up to 1973 and for the Fraser bill's effects there is still a large timber surplus. The adjusted desirable cut for jack pine is 339,000 cords annually, while the actual cut of all products from 1973 to 1975 averaged 279,000 cords—leaving a yearly surplus of 60,000 cords. For spruce the desirable cut is 328,000 cords, the actual cut 224,000 cords—a 104,000-cord surplus. For balsam the desirable cut is 369,000 cords, the actual cut 95,000 cords—a 274,000-cord surplus. For aspen the desirable cut is 1,520,000 cords, the actual cut 827,000 cords—a 693,000-cord surplus. For all species the surplus is 1,552,000 cords.

Even if there might be local shortages of spruce and pine, the pulp industry has the technical capability of shifting its pulp mix to raise the percentages of aspen, birch and balsam—species with large surpluses. In Wisconsin and Michigan similar shifts have been made already.

Superior National Forest studies show that because of thin, rocky soils BWCA lands are that forest's least productive and most sensitive. If good foresty is practiced on the more fertile and accessible lands nearer the pulp mills, Minnesota can grow its present annual cut of two million cords of forest products on fewer than eight million acres—and all outside the BWCA. Superior National Forest alone has nearly two million acres of multiple-use lands outside the BWCA.

Before the 1973 ban, logging in the BWCA supported a mere 40 or so jobs for about five months each year. Since the ban, no jobs have been lost—the workers simply have shifted to other timber. Another pertinent fact is that thanks to several new taconite operations the economy of Minnesota's Iron Range is improving. According to studies by W. D. Brackel of the University of Minnesota College of Forestry, "the degree to which mining dominates the region's economy borders on the astounding." In fact the region's economic health depends fundamentally on iron mining, not logging. The BWCA itself supports many jobs in outfitting and other wilderness-related businesses.

There is another angle to the logging issue. Minnesota owns some 102,000 acres of the BWCA, about 56,000 acres of it still virgin forest Of the latter, about half is in the Portal Zone, where total state ownership is about 54,000 acres, much of it in two blocks in Burntside State Forest west of Burntside Lake. Minnesota has always honored the federal Interior-Portal Zone concept, confining its timber sales to the Portal Zone. However, both last year's Oberstar and Fraser bills included much of Burntside Forest in wilderness areas that they would have closed to logging. Industry spokesmen might well assert that Burntside Forest *cannot* be closed to logging because this land was given to Minnesota by the federal government expressly for forestry purposes. There is some legal opinion, however, that wilderness preservation legitimately can be construed to be a forestry purpose and not a violation of the terms of the gift. If Congress closes the entire BWCA to logging, it would then be logical for the Minnesota legislature to enact a parallel statute. The Shipstead-Nolan Act set the precedent for such action.

The conflict between wilderness-seeking paddle canoeists, skiers, snowshoers and hikers on the one hand and motorboaters and snowmobilers on the other is just as complex and longstanding as the logging issue. Pres-

ent motor zoning was established in 1965 after passage of the Wilderness Act, but it has been controversial ever since. Some 21 designated motorboat routes now encompass over 60 percent of the water area in the BWCA. Snowmobiles have been allowed on the ice of these same waterways on the ridiculous pretense that they are "winterized motorboats." The Interior Zone-Portal Zone concept applies only to commercial logging, and the Forest Service has designated motorboat and snowmobile routes and "paddle only" areas in both zones. Those few areas managed as true wilderness where both logging and mechanized recreation are banned are scattered and confined to small enclaves in the Interior Zone where there are no motor routes. It is hard to plan a cross-country skiing or snowshoeing trip into the Canoe Area free of competition with snowmobiles, because most of the access routes have been open to them. Closed routes have mostly been those requiring more than a day's travel from access points.

There is no provision for snowmobiles in the Wilderness Act, and the Forest Service recognized this in its 1974 BWCA plan. Yet the plan provided for stringing out a phaseout to 1980. In response to a Sierra Club appeal the machines were banned as of the 1975–76 season; but then in response to pressures from local snowmobile clubs and manufacturers use was extended for one more season pending appeals to the Secretary of Agriculture. Last September the Secretary imposed a snowmobile ban for this winter. Snowmobilers and manufacturers went to court, labeling the ban arbitrary and capricious. Minntour and the U.S. Ski Association countered with a contention that the ban was mandatory under the Wilderness Act. On January 18, U.S. District Judge Donald D. Alsop ruled that the matter was discretionary with the Secretary. The ban was left in effect. Locally snowmobiles are the most volatile of all BWCA issues. Pressure from snowmobilers will therefore be heavy in the congressional debates, even though so far there have been only about 7,000 snowmobile visits annually compared to 95,000 visits by paddlers, hikers, skiers and snowshoers. The Secretary's 1976 decision also instituted horespower limits on motorboats in certain areas, but these limits are so generous they will not affect many users.

Fortunately, most summer BWCA visitors accept the lakeland environment on its own terms. More than 70 percent of the use is by paddle canoe, and that percentage is increasing. According to a detailed study, "Sources of Congestion and Visitor Dissatisfaction in the BWCA," by Dr. David Lime, Forest Service geographer in St. Paul, 93 percent of the paddlers find their experience impaired by encounters with motors, and the conflict is worsening. Because their high speed allows them to cover great distances in a short time, motor travelers tend to crowd an area. "Permitting motor use to continue reduces the carrying capacity of the area and can only result in an earlier need to restrict the number of people permitted in the BWCA," the Lime report asserts. This prediction has already come true. Today a visitor-distribution program limits entry at the most popular access points during the summer season. No preference is shown toward the paddle canoeist over motorboaters. If such limitations are necessary, it seems logical that the incompatible uses should go first.

Motorboating is still increasing, but at a slower pace than canoeing. Much of the motorboat use is associated with fishing, especially on Lac La Croix and Basswood, Knife and Saganaga Lakes, and much of it is by local residents. Snowmobile use is heavily focused on fishing the hard-pressed lake trout. Most of the few remaining good native trout lakes east of the Rockies are in the BWCA, and unless this species is given relief soon the fishery will vanish. Most snowmobilers also come from northeastern Minnesota.

Although many still insist on crowding the wilderness, motorboaters and snowmobilers have ample opportunities outside the Canoe Area. Just beyond the BWCA boundary are dozens of large and attractive lakes open to motors. Minnesota has a whopping 14,000 non-BWCA lakes on which motorboating is legal. Snowmobiles legally can operate on those same 14,000 lakes when they are frozen over, as well as on national and state forest lands, in many state parks, on thousands of miles of state and private trails and along road rights-of-way. Vast areas in close-by Wisconsin and Michigan also are available to both motorboats and snowmobiles, including at least another 25,000 lakes. In contrast, many who wish to hike, canoe or ski in quiet wild country have virtually nowhere to go except portions of the BWCA. Interestingly, while an expectably high proportion of motorboaters and snowmobilers are local, most BWCA wilderness-seeking paddlers, hikers, skiers and snowshoers come from more distant parts of Minnesota and from Illinois, Wisconsin, Iowa, Indiana and beyond.

Banning motors would be especially controversial on a few large lakes with mechanized portages and/or a long-standing tradition of motorboat use, notably Lac La Croix, Big Trout, Basswood, the Moose-Birch chain, Saganaga and Sea Gull. All these lakes are popular with fishermen, and all have had some motorboating for 40 years or longer. Basswood long has been served by both the Four Mile Truck Portage and the Prairie Portage truck service. Lac La Croix has been served by two short tram-car portages on the Loon River for more than half a century. Big Trout has a short truck portage. These facilities are on land that has now been acquired by the Forest Service and are operated as concessions. Saganaga, Sea Gull and the Moose Lake chain have large summer resorts and private-cabin developments just outside the wilderness boundary.

Lac La Croix and Lake Saganaga also have several resorts and/or cabins outside Quetico Park on the Canadian shore and on Canadian islands and the Lac La Croix band of Indians lives on the Canadian side just west of the park boundary. Within the park, there are no private cabins, but both these large lakes are only partly within present park boundaries. The cabin owners, mostly Americans, as well as the Indians, still would have legal motorized access by water or air from the Canadian side. The Fraser bill would eliminate motorized access from the American side.

Assuming the Fraser bill were enacted, the Forest Service still might not have effective control over motorboats and snowmobiles on peripheral lakes with water access sites outside the BWCA. The problem is that Minnesota claims exclusive jurisdiction over all public waters. This is being tested in court, but if the state prevails the federal government might be able to control motor use only by prohibiting the transportation of motors and snowmobiles over federal land. This is how the Forest Service now regulates BWCA motor use. But this approach would in effect leave still open to motors all waterways having direct water access from outside the BWCA, even those deep inside the wilderness. This would include such vital lakes as Basswood, Fourtown, Big Moose, the Moose-Newfound-Sucker-Birch chain, Lake One, Sawbill, Brule, Saganaga, Sea Gull, Duncan, Daniels, Clearwater, Pine and many more.

A solution is available, however. This is simply to make Minnesota a partner in regulating motors on such lakes. The state already excludes motors from several peripheral lakes under its 1971 Regulation NR–1000, which parallels the federal motorboat rules and already supplements them for several lakes straddling the BWCA boundary. The Fraser bill is intended to close all such lakes to motors at the BWCA boundary. Some new signing along boundaries would be needed to enforce such a rule, but the long-standing partnership between the state and Forest Service in managing the BWCA points toward answers to this problem regardless of legal jurisdiction.

Another question that may surface in Congress is the effect of the Webster-Ashburton Treaty of 1842 on our government's ability to close the international boundary route to motors. Some believe that the provision in the treaty making portages along this route "free and open to the use of citizens and subjects of both countries" bars either nation from closing the route to motors. But an advisory letter from the Department of State to Rep. Oberstar last year said the treaty bars neither nation from applying reasonable regulations to the travel of its citizens along this route. And Ontario already has a horsepower limit on motors on its side of the boundary route in Quetico and is considering a motor ban on the route.

Copper-nickel mining poses yet another threat. In the 1950s exploratory test-drilling for copper-nickel sulfide ores began outside the BWCA, and about a decade ago it was resumed by International Nickel Company and other firms. Leases are concentrated near the Kawishiwi River and Birch Lake southeast of Ely. The presently known possible ore bodies are low-grade but very large, and there are know exposures of mineralized rock deep inside the Interior Zone. The potential for damage to the wilderness by air and water pollution and general industrialization of the region from mining these deposits is major.

In 1969 a prospecting crew hired by a businessman claiming more than 100,000 acres of mineral rights set up camp on Howard Lake in the heart of the Interior Zone. That December he notified the Forest Service that he would enter the BWCA with drilling rigs. The Izaak Walton League of America sued in federal district court to block exploration and mining. The league maintained that because the BWCA is zoned as wilderness private mineral-holders cannot exercise the rights to their minerals. Both the Forest Service and the state of Minnesota initially were codefendants. Later the state turned around and joined the IWLA side. Judge Philip Neville ruled for the conservationists, although his injunction later was lifted by the Eighth Circuit Appeals Court on procedural grounds. Fortunately, Judge Neville's acceptance of the substantive zoning argument still stands.

The 1975–76 Minnesota legislature enacted a law barring mining and related activity on state lands in the BWCA and use of any state resources for such mining or related activity. The law also in effect forbids development of many privately held BWCA mineral rights. Since 40 percent of the BWCA's mineral rights are state-owned and many of the rights on federal lands are held privately, the law also effectively prohibits mining most federal lands, since state resources would be necessary. Both Judge Neville's decision and this new Minnesota law are based on the classification of the BWCA as wilderness, however. If much of the BWCA were downgraded to a national recreation area this legal protection against mining could be lost.

Everyone seems to agree that new legislation defining what is and is not to be permissible within the BWCA is essential. Paragraph 4(d)(5) of the Wilderness Act dumped the whole problem in the Forest Service's lap, and the service is understandably sick of being in the middle. The question is what direction congressional action will take. Rep. Fraser again is sponsoring a bill that would

protect the entire BWCA as wilderness. (It would also add some 35,000 acres of critical adjoining de facto wilderness and certain lakes and streams that now straddle the boundary.) Rep. Oberstar undoubtedly will be sponsoring a different bill, although at this writing it had not been introduced. Probably, again, it will seek to remove part of the BWCA from the Wilderness System. On Congress' decision, if so, will hang not only the fate of America's only great lakeland wilderness but in some degree the strength of wilderness protection all across the nation.

If the partisans of logging, motorboating, snowmobiling and mining win legislation removing part of the BWCA from wilderness status, it will not only reverse direction for the BWCA and drastically shrink the sparse protected wilderness east of the Rockies, but will set a menacing precedent for the entire National Wilderness Preservation System. And if commercial logging is allowed in the BWCA on the rationale that mechanical manipulation of the ecosystem is necessary to maintain vegetation, another ominous precedent will be set.

PERSONAL EXPLANATION

(Mr. MIKVA asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. MIKVA. Mr. Speaker, I was out of town and missed a number of votes late last week. Had I been present on Thursday, I would have voted "yes" to the conference report on H.R. 4877—roll No. 142, making supplemental appropriations of fiscal year 1977. I also would have voted "yes" on roll No. 143, the amendments relating to the funding of the military medical school. I would have agreed to Senate amendment No. 35, relating to the funding of snow removal operations in four states, and cast a "yes" vote—roll No. 144.

On Friday, I would have voted "yes" on roll No. 145, to approve the Journal of Thursday, April 21. I also would have voted "yes" on an amendment to prohibit the procurement of the Airborn Warning and Control System Aircraft—AWACS—unless NATO agrees to purchase them—roll No. 146.

THE COGENERATION AND WASTE HEAT UTILIZATION ACT

(Mr. OTTINGER asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. OTTINGER. Mr. Speaker, I am today introducing the Cogeneration and Waste Heat Utilization Act which was authored and introduced in the Senate yesterday by Senator GARY HART. It provides various methods of encouraging use of industrial waste heat that can save vast amounts of energy.

Earlier this month I introduced an amendment to the ERDA authorization for 1978 to have a demonstration program for industrial cogeneration; this bill expands on that legislation to promote wide-scale use of cogeneration throughout our economy and to cover both incentives and regulations.

The President's energy message includes a call for a major effort in this country to utilize cogeneration principals and to greatly expand the use of cogeneration techniques. I thoroughly back this request and feel this legisiation will bring about accomplishment of this objective.

The United States wastes much of its energy by not making use of the energy represented by industrial heat. We discharge our waste heat into our waters or the atmosphere. With cogeneration we can use industrial waste heat for both process heat and for electrical generation at much more efficient rates.

Sweden, West Germany, and most other industrialized countries currently are taking advantage of cogeneration technology. Indeed, Sweden produces 29 percent of its total electrical needs through cogeneration. To show what this can mean in energy savings, the average European powerplant is 60 percent efficient, compared to 30 percent here, largely because of use by the Europeans of cogeneration. The bill which I am introducing will bring the United States into the mainstream of energy efficiency and the conservation of our energy resources.

H.R. 6661

A bill to promote the recovery of waste heat energy resources and the expedited development and commercial application of dual purpose powerplants, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Cogeneration and Waste Heat Utilization Act."

TITLE I—WASTE HEAT ENERGY RECOVERY POLICY ANALYSIS

SEC. 101(a). The Administrator of the Federal Energy Administration (hereinafter referred to in this Act as the "Administrator") is authorized and directed to conduct, in consultation with the Environmental Protection Agency, the Federal Trade Commission, and other appropriate agencies, a full and complete analysis of the economic, social, environmental and technological feasibility and consequences of implementing, on a nationwide scale, various waste heat energy recovery and use techniques. The policy analysis shall focus primarily on industrial site and utility site dual purpose powerplant systems, and shall include the development and application of industry-by-industry surveys of existing and projected patterns of steam or heat energy generation, according to steam pressure, size of installation, load curve characteristics and other appropriate criteria, to ascertain the national potential for recovering and using waste heat energy and for the development of industrial and utility site dual purpose powerplants.

At or before the expiration of each six-month period following the date of the enactment of this Act, the Administrator shall submit to the Congress and to the President an interim report on the status of the policy analysis provided for by this Title. A final report, in three parts, shall be prepared and submitted as hereinafter specified.

(b) PART 1: FEASIBILITY AND CONSEQUENCES. At or before the expiration of the twelve-month period following the enactment of this Act, the Administrator shall submit to the Congress and to the President Part 1 of the Policy Analysis Final Report. The scope of Part 1 shall be the potential benefits and impact of a national policy promoting the recovery of waste heat energy and the development of dual purpose powerplants. Part 1 of the Final Report shall include a thorough examination and assessment of at least the following subjects:

(1) the net potential energy, capital and consumer savings realizable from maximum development of industrial and utility site dual purpose powerplants;

(2) the effects of industrial site electric power generation on the United States electrical network;

(3) the reliability and defense security of multisource versus larger single source systems;

(4) any and all air, water, solid waste or other possible environmental problems associated with industrial and utility site dual purpose powerplants and with various coal-burning technologies such as fluidized bed combustors;

(5) the effect of existing public policies, including subsidies and economic incentives and disincentives, on efforts to recover and use waste heat energy; and

(6) waste heat energy conservation and recovery practices and policies in foreign countries.

(c) PART 2: COMPETITION IN THE ELECTRIC UTILITY INDUSTRY. At or before the expiration of the eighteen-month period following the enactment of this Act, the Administrator shall submit to the Congress and to the President Part 2 of the Policy Analysis Final Report. Prepared in consultation with the Bureau of Competition of the Federal Trade Commission, Part 2 shall analyze the interrelationship between increased competition in the electric utility industry and the objective of promoting the recovery of waste heat energy and the development of dual purpose powerplants. Part 2 of the Final Report shall include a thorough examination and assessment of at least the following subjects:

(1) appropriate ownership arrangements for equipment, transmission lines, and energy required or created by application of cogeneration or waste heat recovery techniques;

(2) the feasibility and consequences, from a regulatory, economic and technological standpoint, of separate ownership and operation of facilities for generating, transmitting, and distributing electric energy, and means to promote such separate ownership and operation;

(3) the effect on competition, and on the ability to compete, of tax and other public policies relating to the sale of electric energy;

(4) means to reduce legal and regulatory restrictions on entry into the business of generating, transmitting, and distributing electric energy;

(5) means to promote greater use of wheeling and sales of electric energy for resale; and,

(6) the feasibility and consequences of separate ownership and operation of facilities for electric energy and for natural gas distribution.

(d) PART 3: PROPOSALS FOR GOVERNMENTAL ACTION. At or before the expiration of the twenty-four month period following the enactment of this Act, the Administrator shall submit to the Congress and to the President Part 3 of the Policy Analysis Final Report. Part 3 shall identify the legal, regulatory, economic, and social factors impeding the rapid development of industrial and utility site dual purpose powerplants and other waste heat energy recovery techniques. In addition, Part 3 shall contain specific proposals for governmental action designed to reduce or eliminate existing impediments to such rapid development, and shall include a thorough examination and assessment of at least the following subjects:

(1) JURISDICTION—Identification of the governmental authority or authorities most properly charged with regulating the development and operation of industrial site and utility site dual purpose powerplants and related transmission, distribution and other facilities, including specifically:

(A) the determination of rates or guidelines for rates for sales of electric power from industrial site dual purpose powerplants to utilities and for sales of electric power from utilities to industrial site dual purpose powerplants; and,

(B) the establishment of a forum and procedure for the fair and efficient resolution of disputes between generators, transmitters and distributors of industrially generated electric power;

(2) REGULATORY MEASURES.—Identification of such regulatory action as may be appropriate to promote increased waste heat energy recovery and use, including:

(A) requiring that electric utility transmission facilities be deemed common carriers, with wheeling services available to all producers of electric power at a published tariff rate;

(B) reducing stand-by demand charges to industry in consideration of industrial assumption of a portion of the burden of providing electric power;

(C) granting industrial generation of electric power for sale to the utility system a priority use status in any national allocation of fuels;

(D) requiring industrial site dual purpose powerplants to provide auxiliary electric power generation capacity for use during industrial plant shut-down periods;

(E) assessing peak-load pricing as a policy tool for encouraging waste heat recovery and use;

(F) evaluating the effect of proposed rate structure changes such as time-of-day pricing, life-line costing, marginal pricing, and constant industry and residential rates on extensive development of waste heat conservation and recovery practices: and,

(3) INCENTIVES AND DISINCENTIVES—Identification of measures calculated to encourage private action leading to increased waste heat energy recovery and use, including:

(A) amendments or additions to those provisions of the Federal Power Act, Public Utility Holding Company Act, related federal legislation, and state and local public utility regulations having the greatest effect on waste heat conservation, recovery and use techniques;

(B) employing waste heat charges as a waste heat conservation, recovery and use strategy;

(C) various tax incentives and disincentives such as an increased investment tax credit and accelerated depreciation for properties and equipment dedicated to waste heat energy conservation and recovery uses, and increased taxes on enterprises wasting excessive quantities of heat energy;

(D) regulatory disallowance, in determining just and reasonable rates, of capital costs for the construction of additional electric utility generating capacity where industrially generated electric power is available; and,

(E) fuel taxes on enterprises requiring significant quantities of steam or heat energy that do not adopt measures to conserve, recover and use that energy.

SEC. 102. Beginning one year following submission of Part 3 of the Policy Analysis Final Report and continuing at annual intervals thereafter, the Administrator shall report to the Congress and to the President on the progress made toward definition and implementation of an effective national policy promoting waste heat energy recovery and development of industrial and utility site dual purpose powerplants. The Administrator's annual reports shall include at least the following subjects:

(a) Current forecasts of technological, economic, social and environmental factors bearing upon effective implementation of the national policy;

(b) Perceived trends and changed circumstances anticipated to effect the national policy;

(c) Effectiveness of policy measures thus far adopted; and

(d) Proposed additions or modifications to the national policy as then constituted.

SEC. 103. The Administrator and the Director of the Bureau of Competition of the Federal Trade Commission are each authorized, without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and without regard to the provisions of chapter 51 and subchapter III of chapter 53, title 5, United States Code, relating to classification and General Schedule pay rates, to appoint and fix the compensation of such additional personnel as may be necessary to enable the Administrator and Director to carry out their functions under this Act.

SEC. 104. There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this title.

TITLE II—INTERIM INCENTIVES FOR INDUSTRIAL COGENERATION

SEC. 201. INVESTMENT TAX CREDIT AMENDMENTS RELATING TO CERTAIN ELECTRICAL ENERGY GENERATING EQUIPMENT

(a) ADDITIONAL CREDIT ALLOWED.—Subpart B of part IV of subchapter A of chapter 1 of the Internal Revenue Code of 1954 (relating to rules for computing credit for investment in certain depreciable property) is amended by inserting immediately after section 46 the following new section:

"SEC. 46A. SPECIAL RULES RELATING TO CERTAIN ELECTRICAL ENERGY GENERATING EQUIPMENT

"(a) IN GENERAL.—In lieu of the amount which would be determined under section 46(a)(20) with respect to property which is qualified electrical energy generating equipment, the amount of the credit allowed by section 38 for the taxable year with respect to such property shall be an amount equal to 20 percent of the qualified investment (as determined under section 46 (c) and (d) in section 38 property which is (or, for the purpose of applying section 46(d), will be) qualified electrical energy generating equipment.

"(b) ADDITIONAL PERCENTAGE.—In the case of a corporation which elects to have the provisions of this subsection apply, the amount of the credit allowed by section 38 for the taxable year with respect to such property shall be an amount equal to the percentage determined under subsection (a) plus—

"(1) an additional percent of the qualified investment in such property (as determined under subsections (c) and (d) of section 46), and

"(2) an additional percent (not in excess of ½ percent) of such qualified investment (as so determined) equal in amount to the amount determined under section 301(e) of the Tax Reduction Act of 1975.

An election may not be made to have the provisions of this subsection apply for the taxable year unless the corporation making the election meets the requirements of section 301(d) of the Tax Reduction Act of 1975. An election by a corporation to have the provisions of this paragraph apply shall be made at such time, in such form, and in such manner as the Secretary may prescribe.

"(c) DEFINITIONS; SPECIAL RULES.—For purposes of this section—

"(1) ELECTRICAL ENERGY GENERATING EQUIPMENT.—The term 'electrical energy generating equipment' means any equipment or device of a character subject to depreciation installed in connection with, and as an integral part of, a system of heating, cooling, or providing power for manufacturing goods which, in addition to its principal purpose, generates electrical energy in excess of the user's needs in such a fashion as to produce commercially marketable quantities and durations thereof, as determined by the Secretary after consultation with the Administrator of the Energy Research and Development Administration.

"(2) QUALIFIED ELECTRICAL ENERGY GENERATING EQUIPMENT.—The term 'qualified electrical energy generating equipment' means electrical energy generating equipment (other than public utility property as defined in section 46(f)(5)) which is used to produce marketable quantities and durations of electrical energy, a substantial amount of which is used by the taxpayer to meet his electrical energy needs or which is sold by the taxpayer to a public utility.

"(d) CONVERSION OF ELECTRICAL ENERGY GENERATING EQUIPMENT TO OTHER USE.—If property with respect to which the credit allowed by section 38 was determined under this section is not used to generate substantial amounts of excess electrical energy in any taxable year before the close of the useful life which was taken into account in computing the credit, the taxpayer shall be treated, for purposes of section 47, as having disposed of such property on the first day of such taxable year.

"(e) REGULATIONS.—The Secretary shall prescribe such regulations as may be necessary to carry out the provisions of this section. Initial regulations shall be promulgated within 180 days after the date of enactment of the Cogeneration and Waste Heat Utilization Act.".

(b) CLERICAL AMENDMENT.—The table of sections for such subpart B is amended by inserting immediately after the item relating to section 46 of the following new item:

"SEC. 46A. SPECIAL RULES RELATING TO CERTAIN ELECTRICAL ENERGY GENERATING EQUIPMENT."

SEC. 202. UTILITY INCENTIVE.

Subsection (f) of section 46 of the Internal Revenue Code of 1954 (relating to limitation in case of certain regulated companies) is amended by adding at the end thereof the following new paragraph:

"(10) No credit shall be allowed by section 38 with respect to any property described in section 50 which is public utility property (as defined in paragraph (5)) of the taxpayer if the taxpayer—

"(A) is engaged predominantly in the trade or business of the furnishing or sale of electrical power, and

"(B) unreasonably refuses (as determined by the Federal Power Commission under standards prescribed by the Commission)—

"(i) to purchase electricity generated by customers of the taxpayer in excess of their requirements,

"(ii) to establish physical connection of its transmission facilities with the facilities of one or more other persons engaged in the transmission or sale of electric energy, or

"(iii) to sell electrical energy to, transmit such energy for, provide transmission services or wheeling for, exchange electrical energy with, provide pooling services for or coordinate with, such other persons.".

SEC. 203. PARTIAL REFUND OF EXCESS CREDIT.

(a) Section 6401(b) of the Internal Revenue Code of 1954 (relating to amounts treated as overpayments) is amended by adding at the end thereof the following new sentence: "If the amount allowable as a credit under section 38 (relating to investment in certain depreciable property) exceeds the limitation provided by section 46(a)(3), the amount of the excess shall be considered an overpayment to the extent that it is attributable to the amount determined under section 46A."

(b) Section 6201(A)(4) of such Code (relating to erroneous credit under section 39 or 43) is amended—

(1) by striking out "section 39 or 43" in the caption and inserting in lieu thereof "section 38, 39, or 43", and

(2) by adding at the end thereof the following new sentence: "If on any claim for refund of income taxes under subtitle A there is an overstatement of that portion of the credit allowable by section 38 (relating to investment in certain depreciable property) which is treated as an overpayment under section 6401(b), the amount so overstated which is allowed as a refund may be assessed by the Secretary in the same manner as in the case of a mathematical or clerical error appearing upon the return, except that the provisions of section 6213(b)(2) (relating to abatement of mathematical or clerical error assessments) shall not apply with regard to any assessment under this sentence.".

SEC. 304. EFFECTIVE DATE.

The amendments made by this title apply with respect to—

(a) property to which section 46(d) of the Internal Revenue Code of 1954 does not apply, the construction, reconstruction, or erection of which is completed by the taxpayer after December 31, 1976, but only to the extent of the basis thereof attributable to construction, reconstruction, or erection after such date and before January 1, 1981;

(b) property to which section 46(d) of such Code does not apply, acquired by the taxpayer after December 31, 1976, and placed in service before January 1, 1981; and

(c) property to which section 46(d) of such Code applies, but only to the extent of the qualified investment (as determined under subsections (c) and (d) of section 46 of such Code) with respect to qualified progress expenditures made after December 31, 1976, and before January 1, 1981.

SEC. 205. FINANCIAL ASSISTANCE TO STATE REGULATORY AUTHORITIES

(a) The Administrator is authorized to make monetary grants to State utility regulatory authorities, on an interim basis, for the specific purpose of assisting such authorities in efforts to:

(1) facilitate the recovery and use of waste heat energy;

(2) promote the exchange of electric power between industrial site dual purpose powerplants and electric utilities at reasonable rates; and

(3) encourage electric utilities to transmit electric energy, and provide transmission services or wheeling, to industrial site dual purpose powerplants at reasonable rates.

(b) No monetary grant shall be made under this section unless a formal application therefor has been submitted in such manner as the Administrator may require. The Administration shall promptly review, on a case-by-case basis, each application submitted by a State authority, but may not authorize the issuance of funds to such authority unless:

(1) the Administrator determines that explicit standards satisfying the objectives of this section have been prescribed by the applicant authority; or

(2) the Administrator determines that, although the applicant authority has not yet prescribed explicit standards satisfying the objectives of this section, such standards will be forthcoming in the near future. In such case, however, the Administrator may grant to the applicant authority no more than fifty per centum of the funds that would otherwise be granted, until such time as the authority has submitted, and the Administrator approved, explicit standards satisfying the objectives of this section.

(c) The Administrator may not approve the application of a State authority should the Administrator determine that the State has reduced, or intends to reduce, appropriations for its utility regulatory authority in anticipation of the receipt of funds pursuant to this section.

(d) The Administrator may withhold all or any part of a grant made pursuant to this section should the Administrator determine that the State authority is not diligently carrying out the program described in its application or is failing to abide by assurances given in such application.

(e) There is authorized to be appropriated under this section a sum not to exceed $20,000,000 in grants during any fiscal year. Such grants shall be allocated by the Administrator among the various States on an equitable basis, taking into consideration such objective criteria as population and existing energy deficiencies.

(f) No grant shall be made pursuant to this section after the close of a three year period commencing with the date of the enactment of this Act.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. QUAYLE), to revise and extend their remarks, and to include extraneous matter:)

Mr. MARLENEE, for 5 minutes, today.
Mr. FINDLEY, for 5 minutes, today.
Mr. GOODLING, for 10 minutes, today.

(The following Members (at the request of Mr. DICKS), to revise and extend their remarks, and to include extraneous matter:)

Mr. GONZALEZ, for 5 minutes, today.
Mr. ANNUNZIO, for 5 minutes, today.
Mr. FLOOD, for 10 minutes, today.
Mr. KOCH, for 10 minutes, today.
Mr. MIKVA, for 5 minutes, today.
Ms. HOLTZMAN, for 30 minutes, today.
Mr. WEISS, for 5 minutes, today.
Mr. DRINAN, for 15 minutes, today.
Mr. BRADEMAS, for 5 minutes, today.
Mr. BONKER, for 5 minutes, today.
Mr. BADILLO, for 15 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. RHODES, and to include a speech by former President Gerald Ford notwithstanding the fact that it exceeds two pages of the RECORD and is estimated by the Public Printer to cost $1,046.50.

Mr. FRASER, and to include extraneous matter notwithstanding the fact that it exceeds two pages of the RECORD and is estimated by the Public Printer to cost $1,127.

(The following Members (at the request of Mr. QUAYLE) and to include extraneous matter:)

Mr. WINN.
Mr. DERWINSKI.
Mr. SHUSTER.
Mr. SARASIN.
Mrs. FENWICK.
Mr. GRASSLEY.
Mr. STEERS in two instances.
Mr. SYMMS.
Mr. MADIGAN.
Mr. GOLDWATER.
Mr. O'BRIEN.
Mr. FINDLEY.
Mr. TAYLOR.
Mr. HAGEDORN in two instances.
Mr. CRANE.
Mr. WAMPLER.

(The following Members (at the request of Mr. DICKS) and to include extraneous matter:)

Mr. GONZALEZ in three instances.
Mr. PREYER.
Mr. ANDERSON of California in three instances.
Mr. OTTINGER.
Mr. MONTGOMERY.
Mr. DOWNEY.
Mr. MURPHY of Illinois.
Mr. EILBERG in five instances.
Mr. BEARD of Rhode Island.
Mr. YOUNG of Missouri.
Mr. LUNDINE.
Mr. KOCH in four instances.
Mr. DRINAN in 10 instances.
Ms. SCHROEDER in two instances.
Mr. VANIK in two instances.
Mr. SANTINI.
Mr. NIX.
Mr. ECKHARDT.
Mr. APPLEGATE.
Mr. RYAN.
Mr. MOAKLEY.
Mr. RANGEL.
Mr. CARNEY.
Mr. BROWN of California.
Mr. TEAGUE.
Mr. BONKER.
Mr. DANIELSON.

SENATE ENROLLED BILL AND JOINT RESOLUTION SIGNED

The SPEAKER announced his signature to an enrolled bill and a Joint Resolution of the Senate of the following title:

S. 385. An act to name a certain Federal building in Grand Rapids, Michigan, the "Gerald R. Ford Building"; and

S.J. Res. 44. A joint resolution to authorize the printing and binding of an edition of Senate Procedure and providing the same shall be subject to copyright by the author.

ENROLLED BILL SIGNED

Mr. THOMPSON, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a bill of the House of the following title, which was thereupon signed by the Speaker:

H.R. 4877. An act making supplemental appropriations for the fiscal year ending September 30, 1977, and for other purposes.

ADJOURNMENT

Mr. DICKS. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock p.m.), the House adjourned until tomorrow, Wednesday, April 27, 1977, at 3 o'clock p.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1344. A letter from the Comptroller General of the United States, transmitting a report on the need for and use of air launched and Tomahawk Cruise missile programs (PSAD-77-36, April 26, 1977); jointly, to the Committees on Government Operations, and Armed Services.

1345. A letter from the Comptroller General of the United States, transmitting a report on the Navy's fleet air defense (PSAD-77-82, April 25, 1977); jointly, to the Committees on Government Operations, and Armed Services.

1346. A letter from the Assistant Secretary of Defense (Comptroller), transmitting notice of the intention of the Department of Defense to obligate funds available in the DOD stock fund for war reserve inventory for the Defense Logistics Agency, pursuant to section 735 of Public Law 94-419; to the Committee on Appropriations.

1347. A letter from the Chairman, Board of Trustees, Public Defender Service for the District of Columbia, transmitting the Board's annual report for fiscal year 1976 and the transition quarter, pursuant to section 306(a) of Public Law 91-358 [D.C. Code, § 2-2226]; to the Committee on the District of Columbia.

1348. A letter from the Secretary of Agriculture, transmitting a draft of proposed legislation to amend the National School Lunch Act and the Child Nutrition Act of 1966 to revise and extend the summer food service program for children, to revise the nonfood assistance program, and for other purposes; to the Commtitee on Education and Labor.

1349. A letter from the Secretary of Commerce, transmitting the annual report of the Department of Commerce for fiscal year 1976 and the transition quarter, pursuant to section 8 of the act of February 14, 1903 [15 U.S.C. 1519]; to the Committee on Interstate and Foreign Commerce.

1350. A letter from the Chairman, U.S. Consumer Product Safety Commission, transmitting the Commission's views on H.R. 2482, a bill "To regulate commerce by establishing national goals for the effective, fair, inexpensive, and expeditious resolution of controversies involving consumers, and for other purposes," pursuant to section 27(k)(2) of Public Law 92-573; to the Committee on Interstate and Foreign Commerce.

1351. A letter from the Administrator, Federal Energy Administration, transmitting a report covering the month of December 1976, on gasoline service station market shares, pursuant to section 4(c)(2)(A) of the Emergency Petroleum Allocation Act of 1973; to the Committee on Interstate and Foreign Commerce.

1352. A letter from the Administrator, National Aeronautics and Space Administration, transmitting a supplemental list of names to the report on NASA and aerospace-related industry employment (Executive Communication No. 1124), pursuant to section 6 of Public Law 91-119, as amended; to the Committee on Science and Technology.

1353. A letter from the Comptroller General of the United States, transmitting a report on new approaches needed by the Department of Agriculture to control the production of major crops if surpluses again occur (CED-77-57, April 25, 1977); jointly, to the Committees on Government Operations, and Agriculture.

1354. A letter from the Comptroller General of the United States, transmitting the fifth report on the implementation of the Emergency Loan Guarantee Act, pursuant to section 7(b) of the act (Public Law 92-70); jointly, to the Committees on Government Operations, and Banking, Finance and Urban Affairs.

1355. A letter from the Administrator, Federal Energy Administration, transmitting a report on the equitable sharing of Alaska North Slope crude oil, pursuant to section 18 of Public Law 94-586; jointly, to the Committees on Interior and Insular Affairs, and Interstate and Foreign Commerce.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. MEEDS: Committee on Rules. House Resolution 523. Resolution providing for the consideration of H.R. 2. A bill to provide for the cooperation between the Secretary of the Interior and the States with respect to the regulation of surface coal mining operations, and the acquisition and reclamation of abandoned mines, and for other purposes (Rept. No. 95-222). Referred to the House Calendar.

Mr. DENT: Committee on House Administration. House Resolution 465. Resolution to provide for the expenses of investigations and studies to be conducted by the Select Committee on Assassinations; with amendment (Rept. No. 95-223). Referred to the House Calendar.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ALEXANDER (for himself, Mr. NOLAN, Mr. HUGHES, Mr. CHARLES WILSON of Texas, Mr. AKAKA, Mr. KINDNESS, Mr. RAHALL, Mr. BEVILL, Mr. ROSE, Mr. MCHUGH, Mr. BAUCUS, Mr. BLOUIN, Mr. RUPPE, Mr. AUCOIN, Mr. PERKINS, Mr. ERTEL, Mr. CORNELL, Mr. EMERY, Mr. SIMON, Mr. HAMMERSCHMIDT, Mr. RISENHOOVER, Mrs. MEYNER, and Mr. PATTISON of New York):

H.R. 6616. A bill to amend section 306(a) of the Consolidated Farm and Rural Development Act to prescribe criteria for determining the amount of grants made under such section, to prescribe the priority of applicants for loans and grants under such section, and for other purposes; to the Committee on Agriculture.

By Mr. ANDERSON of California (for himself, Mr. ADDABBO, Mr. AKAKA, Mr. AMBRO, Mr. BEARD of Rhode Island, Mr. BRODHEAD, Ms. BURKE of California, Mr. DELLUMS, Mr. DE LUGO, Mr. FRASER, Mr. GEPHARDT, Mr. GIBBONS, Mr. HARRINGTON, Mr. HOLLENBECK, Mr. JACOBS, Mr. KREBS, Mr. KOCH, Mr. KOSTMAYER, Mr. MCCLOSKEY, Mr. MIKVA, Mr. MITCHELL of Maryland, Mr. MOAKLEY, Mr. MOSS, Mr. OTTINGER, and Mr. PEPPER):

H.R. 6617. A bill to regulate the trapping of mammals and birds on Federal lands, and for other purposes; jointly, to the Committees on Merchant Marine and Fisheries, Interstate and Foreign Commerce, and the Judiciary.

By Mr. ANDERSON of Illinois (for himself, Miss JORDAN, Mr. ANDERSON of California, Mr. CONABLE, Mr. FINDLEY, Mr. FITHIAN, Mr. MCKINNEY, and Mr. PURSELL):

H.R. 6618. A bill to reorganize Federal regulatory agencies to prevent excessive, duplicative, inflationary, and anticompetitive regulation, and to make regulation more effective and responsive to the public interest; jointly, to the Committees on Government Operations, and Rules.

By Mr. BEARD of Rhode Island:

H.R. 6619. A bill to amend title VII of the Civil Rights Act of 1964 to extend the equal opportunity in employment provisions to prohibit employment discrimination against the handicapped; to the Committee on Education and Labor.

By Mr. BRODHEAD:

H.R. 6620. A bill to amend title XVI of the Social Security Act to establish a more adequate and realistic guaranteed annual income for all aged, blind, and disabled individuals by increasing benefit amounts, and to establish outreach procedures to assure that all potential recipients of benefits under such program will be fully informed concerning such benefits; to the Committee on Ways and Means.

By Mr. BUTLER:

H.R. 6621. A bill to designate certain lands within the National Forest System in the State of Virginia as wilderness, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. FAUNTROY:

H.R. 6622. A bill to amend part of the act of August 21, 1974 enacting the Education Amendments of 1974 so as to authorize the Commissioner of Education to grant to the District of Columbia, as to any State, financial assistance for the development and administration of an equalization plan; to the Committee on Education and Labor.

By Mrs. FENWICK:

H.R. 6623. A bill to provide that increases in rates of pay for Members of Congress, and other financial benefits specifically applicable to Members of Congress, may take effect only if approved by the Congress and deferred until the beginning of the following Congress; to the Committee on Post Office and Civil Service.

By Mr. FINDLEY:

H.R. 6624. A bill to study and recommend remedial measures to stabilize the bank of the Illinois River at Hardin, Ill.; to the Committee on Public Works and Transportation.

By Mr. FLORIO (for himself, Mr. PHILLIP BURTON, Mr. PATTEN, Mr. RODINO, Mr. THOMPSON, Mr. RINALDO, Mrs. FENWICK, Mrs. MEYNER, Mr. MINISH, Mr. HOWARD, Mr. HOLLENBECK, and Mr. MAGUIRE):

H.R. 6625. A bill to provide for the establishment of a Pines Barrens National Ecological Reserve in the State of New Jersey, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. HANSEN:

H.R. 6626. A bill to amend title 38 of the United States Code to deny veterans' benefits to certain individuals whose discharges from active military service under less than honorable conditions are administratively upgraded under the revised standards as implemented by the Department of Defense's special discharge review program; to the Committee on Veterans' Affairs.

By Mr. JACOBS (for himself and Ms. KEYS):

H.R. 6627. A bill to amend the Motor Vehicle Information and Cost Savings Act to provide minimum fuel economy standards for every passenger automobile manufactured in the United States; to the Committee on Interstate and Foreign Commerce.

By Mr. LAGOMARSINO (for himself and Mr. DON H. CLAUSEN):

H.R. 6628. A bill to provide for a continuing program of water resources research and development; to the Committee on Interior and Insular Affairs.

By Mr. LOTT:

H.R. 6629. A bill to amend the Wild and Scenic Rivers Act to designate a certain portion of Black Creek in Mississippi for potential addition to the Wild and Scenic River System; to the Committee on Interior and Insular Affairs.

By Mr. LUJAN:

H.R. 6630. A bill to amend the Internal Revenue Code of 1954 to allow individuals certain credits against income tax for certain expenses for education and a deduction from gross income for certain contributions to qualified higher education funds, and for other purposes; to the Committee on Ways and Means.

By Mr. MIKVA (for himself and Mr. HORTON):

H.R. 6631. A bill to amend the Internal Revenue Code of 1954 to permit a taxpayer to defer a portion of his income tax based upon the amount of certain expenses paid or incurred by him in connection with the education or training at an institution of higher education or a vocational school of the taxpayer, his spouse, or any dependent; to the Committee on Ways and Means.

By Mr MOLLOHAN (for himself and Mr. SISK):

H.R. 6632. A bill to authorize the disposal of tin from the national stockpile and the supplemental stockpile; to the Committee on Armed Services.

By Mr. NIX:

H.R. 6633. A bill to amend title 5, United States Code, to provide for grade retention benefits for certain employees whose positions are reduced in grade, and for other purposes; to the Committee on Post Office and Civil Service.

By Ms. OAKAR:

H.R. 6634. A bill to require that the Hungarian Crown of Saint Stephen and other relics of the Hungarian royalty remain in the custody of the U.S. Government and that they not be transported out of the United States, unless the Congress provides otherwise by legislation; to the Committee on International Relations.

By Mr. PICKLE:

H.R. 6635. A bill to amend the Second Liberty Bond Act to allow the interest rates paid on U.S. retirement plan and individual retirement bonds to be increased to the rate paid on U.S. series E savings bonds; to the Committee on Ways and Means.

By Mr. PICKLE (for himself, Mr. WON PAT, Mr. ROSE, Mr. ZEFERETTI, and Mr. HYDE):

H.R. 6636. A bill to provide a comprehensive program to improve cargo security for property being transported in interstate and foreign commerce; jointly, to the Committees on Interstate and Foreign Commerce, Public Works and Transportation, Ways and Means, and Merchant Marine and Fisheries.

By Mr. ROE:

H.R. 6637. A bill to make the provisions of the Public Safety Officers Benefits Act retroactive to January 1, 1972 and to include volunteer ambulance, first-aid and rescue squad members as Public Safety Officers eligible to receive benefits thereunder; to the Committee on the Judiciary.

By Mr. ROYBAL (for himself and Mr. LEACH):

H.R. 6638. A bill to establish an Office of Spanish-Speaking Affairs in the Executive Office of the President, and for other purposes; to the Committee on Government Operations.

By Mr. ST GERMAIN:

H.R. 6639. A bill to authorize the Secretary of Housing and Urban Development to make grants to local agencies for converting closed school buildings to efficient, alternate uses, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

H.R. 6640. A bill to amend the Internal Revenue Code of 1954 to encourage businesses to purchase surplus school or hospital buildings from governmental and nonprofit entities by providing rapid amortization for such buildings; to the Committee on Ways and Means.

H.R. 6641. A bill to amend title XVIII of the Social Security Act to provide payment for rural health clinic services; jointly, to the Committees on Ways and Means and Interstate and Foreign Commerce.

H.R. 6642. A bill to amend part B of title XI of the Social Security Act to assure appropriate participation by professional registered nurses in the peer review, and related activities authorized thereunder; jointly, to the Committees on Ways and Means and Interstate and Foreign Commerce.

By Mr. SANTINI:

H.R. 6643. A bill to amend the Mineral Leasing Act of 1920 and the Interstate Commerce Act, and for other purposes; jointly to the Committees on Interior and Insular Affairs, Interstate and Foreign Commerce, and Public Works and Transportation.

By Mrs. SCHROEDER (for herself, Mr. NIX, Mr. BLOUIN, Mr. CORRADA, Mr. PRICE, Mr. WAXMAN, Mr. JOHNSON of Colorado, Mr. DAVIS, Mr. KETCHUM, Mr. BEARD of Rhode Island, Mr. MILLER of California, Mr. GLICKMAN, Mr. FRASER, Mr. ERTEL, Mrs. CHISHOLM, Mr. EDWARDS of California, Ms. HOLTZMAN, and Mr. FISHER):

H.R. 6644. A bill to amend title 38, United States Code, to provide that the recipient of a veterans' pension or dependency and indemnity compensation will not have the amount of such pension or compensation reduced because of cost-of-living increases in social security benefits, railroad retirement annuities, or other retirement benefits; to the Committee on Veterans' Affairs.

By Mrs. SCHROEDER (for herself, Mr. RANGEL, Mr. CARR, Mr. JOHNSON of California, Mr. MURPHY of Pennsylvania, Mr. MCCLOSKEY, Mr. YATRON, Mr. DELLUMS, Mr. PANETTA, Mr. JACOBS, Mr. JOHN L. BURTON, Mr. MOAKLEY, Mr. STANTON, Mr KINDNESS, Mr. YOUNG of Alaska, Mr. ALLEN, Mr. CHARLES WILSON of Texas, Mr. PURSELL, Mr. WHITLEY, Mr. OTTINGER, Mr. ROSE, Mr. EDWARDS of Oklahoma, Mr. REUSS, and Ms. MIKULSKI):

H.R. 6645. A bill to amend title 38, United States Code, to provide that the recipient of a veterans' pension or dependency and indemnity compensation will not have the amount of such pension or compensation reduced because of cost-of-living increases in social security benetfis, railroad retirement annuities, or other retirement benefits; to the Committee on Veterans' Affairs.

By Mr. SHIPLEY:

H.R. 6646. A bill to amend the Internal Revenue Code of 1954 to allow an individual an income tax deduction for the expenses of traveling to and from a temporary construction project worksite; to the Committee on Ways and Means.

By Mr. ANNUNZIO:

H.R. 6647. A bill to amend title XVI of the Social Security Act to provide that supplementary security income benefits shall be payable to a resident alien only if he has continuously resided in the United States for at least 5 years; to the Committee on Ways and Means.

By Mr. BARNARD (for himself and Mr. SKELTON):

H.R. 6648. A bill to amend title 18 of the United States Code to increase the penalties imposed for certain firearms violations and to extend the mandatory imposition of those penalties to first offenses; to the Committee on the Judiciary.

By Mr. JOHN L. BURTON (for himself, Mr. LLOYD of California, Mr. KREBS, Mr. BADILLO, Mr. AUCOIN, Mrs. COLLINS of Illinois, Mr. CARNEY, Mr. HAWKINS, Mr. MILLER of California, Mr. MIKVA, Mr. WIRTH, Ms. MIKULSKI, Mr. NOLAN, Mr. PATTERSON of California, Mr. OTTINGER, Mr. RYAN, Mr. SANTINI, Mr. WAXMAN, Mr. WINN, and Mr. WON PAT):

H.R. 6649. A bill to amend the Disaster Relief Act of 1974, and for other purposes; jointly, to the Committees on Public Works and Transportation, Banking, Finance and Urban Affairs, Education and Labor, and Small Business.

By Mr. CRANE:

H.R. 6650. A bill to amend the Labor-Management Reporting and Disclosure Act of 1959 so as to prohibit the use for political purposes of certain funds collected by labor organizations from their members, and for other purposes; to the Committee on Education and Labor.

By Mr. EILBERG:

H.R. 6651. A bill to establish a Select Commission on Immigration and Refugee Policy; to the Committee on the Judiciary.

By Mr. GOLDWATER:

H.R. 6652. A bill to amend the Social Security Act to provide that future increases in retirement or disability benefits under Federal programs shall not be taken into consideration in determining a person's need for aid or assistance under any of the Federal-State public assistance programs; to the Committee on Ways and Means.

By Ms. HOLTZMAN (for herself, Mr. ADDABBO, Mr. BADILLO, Mr. BAUCUS, Mr. BINGHAM, Mr. BROWN of California, Mr. CAPUTO, Mr. CARR, Mr. GEPHARDT, Mr. GILMAN, Mr. MCKINNEY, Mr. MITCHELL of Maryland, Mr. MOAKLEY, and Mr. MOFFETT):

H.R. 6653. A bill to amend the Urban Mass Transportation Act of 1964 to require public hearings before any increase in fares and for other purposes; to the Committee on Public Works and Transportation.

By Ms. HOLTZMAN (for herself, Mr. MOSS, Mr. MURPHY of New York, Mr. OTTINGER, Mr. PANETTA, Mr. PATTERSON of California, Mr. RICHMOND, Mr. ROE, Mr. ROSENTHAL, Mr. SCHEUER, Mr. SIMON, Mrs. SPELLMAN, Mr. WEISS, and Mr. WOLFF):

H.R. 6654. A bill to amend the Urban Mass Transportation Act of 1964 to require public hearings before any increase in fares and for other purposes; to the Committee on Public Works and Transportation.

By Mr. REUSS (for himself, Mr. ASHLEY, Mr. BROWN of Michigan, Mr. MOORHEAD of Pennsylvania, Mr. ST GERMAIN, Mr. MITCHELL of Maryland, Mr. HANLEY, Mr. FAUNTROY, Mr. LA FALCE, Mr. AUCOIN, Mrs. SPELLMAN, Mr. BLANCHARD, Mr. HUBBARD, Mr. TSONGAS, Mr. EVANS of Indiana, Mr. LUNDINE, Mr. STANTON, Mr. WYLIE, Mr. MCKINNEY, and Mr. EVANS of Delaware):

H.R. 6655. A bill to amend certain Federal laws pertaining to community development, housing, and related programs; to the Committee on Banking, Finance and Urban Affairs.

By Mr. REUSS (for himself, Mr. ASHLEY, Mr. BROWN of Michigan, Mr. ALLEN, Mr. D'AMOURS, Mr. BADILLO, Mr. PATTISON of New York, Ms. OAKAR, Mr. VENTO, Mr. BARNARD, Mr. WATKINS, Mr. HYDE, Mrs. FENWICK, Mr. LEACH, Mr. STEERS, Mr. CAPUTO, and Mr. HOLLENBECK):

H.R. 6656. A bill to amend certain Federal laws pertaining to community development, housing, and related programs; to the committee on Banking, Finance and Urban Affairs.

By Mr. STEIGER (for himself, Mr. ERLENBORN, and Mr. KRUEGER):

H.R. 6657. A bill to amend the Internal Revenue Code of 1954 to allow persons covered by certain other retirement plans to establish personal savings for retirement; to the Committee on Ways and Means.

By Mr. WEAVER:

H.R. 6658. A bill to require that all timber harvested from lands owned by the United States located west of the 100th meridian be processed in the United States, that only certain products from the processing of timber harvested from certain lands owned by the United States be exported from the United States, and for other purposes; jointly, to the Committees on International Relations and Interior and Insular Affairs.

By Mr. ZEFERETTI:

H.R. 6659. A bill to amend the Tariff Schedules of the United States to repeal the special tariff treatment accorded to articles assembled abroad with components produced in the United States; to the Committee on Ways and Means.

By Mr. DINGELL (for himself, Mr. MOSS, Mr. OTTINGER, Mr. MOFFETT, Mr. MAGUIRE, Mr. FLORIO, Mr. TRAXLER, Mr. HARRINGTON, Mr. FORD of Michigan, Mr. VENTO, Mr. GORE, Ms. MIKULSKI, Mr. PRICE, Mr. SEIBERLING, Mr. MILLER of California, Mr. LEGGETT, Mr. ZEFERETTI, Mr. EDWARDS of

California, Mr. STUDDS, Mr. DOWNEY, Mr. MOTTL, Mr. PATTERSON of California, Mr. CAPUTO, Mr. THOMPSON, and Mr. DRINAN):

H.R. 6660. A bill to increase the efficiency of the production and use of electric energy, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. OTTINGER:

H.R. 6661. A bill to promote the recovery of waste heat energy resources and the expedited development and commercial application of dual purpose powerplants, and for other purposes; jointly, to the Committees on Interstate and Foreign Commerce, and Ways and Means.

By Mr. ADDABBO (for himself and Mr. BIAGGI):

H.J. Res. 416. Joint resolution authorizing the President to proclaim September 8 of each year as National Cancer Prevention Day; to the Committee on Post Office and Civil Service.

By Mr. ANDERSON of California (for himself, Mr. PATTEN, Ms. OAKAR, Mr. BAUCUS, Mr. PIKE, Mr. UDALL, Mr. MANN, Mr. SYMMS, Mr. WALGREN, Ms. MEYNER, Mr. VANDER JAGT, Mr. EVANS of Georgia, Mr. ROGERS, Mr. STEIGER, Mr. ROBINSON, Mr. ARCHER, Mr. KILDEE, Ms. COLLINS of Illinois, Mr. MARTIN, Mr. CAVANAUGH, Mr. VOLKMER, Mr. MCDONALD, Mr. HOLLAND, Mr. BIAGGI, and Mr. RYAN):

H.J. Res. 417. Joint resolution to provide for the designation of a week as National Lupus Week; to the Committee on Post Office and Civil Service.

By Mr. MOLLOHAN:

H.J. Res. 418. Joint resolution proposing an amendment to the Constitution of the United States; to the Committee on the Judiciary.

By Mr. KEMP (for himself, Mr. MCDONALD, Mr. WHITEHURST, and Mr. DORNAN):

H. Con. Res. 207. Concurrent resolution designating April 30, 1977, Vietnam Memorial Day; to the Committee on Post Office and Civil Service.

By Mr. ROUSSELOT:

H. Con. Res. 208. Concurrent resolution setting forth the congressional budget for the U.S. Government for the fiscal year 1978; to the Committee on the Budget.

By Mr. FAUNTROY:

H. Res. 518. Resolution relative to providing high quality telephone service; to the Committee on Interstate and Foreign Commerce.

H. Res. 519. Resolution relative to including optometric services in medical assistance programs; jointly, to the Committees on Interstate and Foreign Commerce, and Ways and Means.

By Mr. PICKLE (for himself, Mr. CARNEY, and Ms. HOLTZMAN):

H. Res. 520. Resolution to study the feasibility of installing solar energy equipment in the House office buildings; to the Committee on Public Works and Transportation.

By Mr. ROE:

H. Res. 521. Resolution expressing support for Solidarity Sunday; to the Committee on International Relations.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

106. By the SPEAKER: Memorial of the Legislature of the State of North Dakota, relative to retention of section 14(b) of the Taft-Hartley Act; to the Committee on Education and Labor.

107. Also, memorial of the Senate of the State of North Dakota, relative to common situs picketing; to the Committee on Education and Labor.

108. Also, memorial of the Legislature of the State of North Dakota, relative to overlapping jurisdictions on Indian reservations; to the Committee on Interior and Insular Affairs.

109. Also, memorial of the Legislature of the State of Hawaii, relative to construction grants for the improvement of public water systems in compliance with the Safe Drinking Water Act; to the Committee on Interstate and Foreign Commerce.

110. Also, memorial of the Legislature of the State of North Dakota, relative to permitting States to have flexibility in establishing standards and solving local problems; to the Committee on the Judiciary.

111. Also, memorial of the Legislature of the State of Delaware, relative to research and development funding for nuclear and coal energy development and alternate energy resources; to the Committee on Science and Technology.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BEILENSON:

H.R. 6662. A bill for the relief of Miladin Radenko Radicevich; to the Committee on the Judiciary.

By Mr. BOLAND:

H.R. 6663. A bill for the relief of Marco S. Marinello Associates, Inc.; to the Committee on the Judiciary.

By Mr. PHILLIP BURTON:

H.R. 6664. A bill for the relief of Lily Lirio Galindo; to the Committee on the Judiciary.

By Mr. MOFFETT:

H.R. 6665. A bill for the relief of Col. Donald G. Carpenter, retired; to the Committee on the Judiciary.

By Mr. BOLAND:

H. Res. 522. Resolution to refer H.R. 6663 to the Chief Commissioner of the U.S. Court of Claims; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

93. By the SPEAKER: Petition of the common council, New Britain, Conn., relative to low-cost spaying and neutering clinics; to the Committee on Interstate and Foreign Commerce.

94. Also, petition of the Board of Mahoning County Commissioners, Youngstown, Ohio, relative to low-cost spaying and neutering clinics; to the Committee on Interstate and Foreign Commerce.

95. Also, petition of the San Diego Regional Criminal Justice Planning Board, San Diego, Calif., relative to funding of programs under the Crime Control Act of 1968 to the Committee on the Judiciary.

96. Also, petition of the Village Board, Westmont, Ill., relative to the proposed flood control program for the village of Westmont; to the Committee on Public Works and Transportation.

97. Also, petition of the Louisiana AFL–CIO, Baton Rouge, relative to national health insurance; jointly, to the Committees on Interstate and Foreign Commerce, and Ways and Means.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H. CON. RES. 195

By Mr. ANDERSON of California:

Page 4, line 2, strike out "$19,935,000,000" and insert in lieu thereof "$20,435,000,000".

Page 4, line 3, strike out "$19,903,000,000" and insert in lieu thereof "$20,403,000,000".

Page 1, line 11, strike out the dollar figure and insert in lieu thereof "$501,264,000,000".

Page 2, line 2, strike out the dollar figure and insert in lieu thereof "$462,849,000,000".

Page 2, line 5, strike out the dollar figure and insert in lieu thereof "$64,755,000,000".

H.R. 2

By Mr. RUPPE:

Page 259, line 23 through page 260, line 13: strike out paragraph (6) in its entirety.

By Mr. STEERS:

To amend title 4, section 403 to read:

"ELIGIBLE LANDS AND WATER

"Sec. 403. The only lands and water eligible for reclamation or drainage abatement expenditures under this title."

By Mr. WAMPLER:

On page 227, following line 3, strike the period at the end of line 3 and add the following language, renumbering succeeding subsections accordingly: ", except as provided in subsection (d).

"(d) All existing surface coal mining operations producing 250,000 tons or less per year on lands on which such operations are regulated by a State shall be allowed 30 months from the date of enactment of this Act to comply with the provisions of section 515 of this Act."

Page 269, line 11, delete all following the colon in line 11 through page 270, line 22 and in lieu thereof insert the following: *"And provided further*, That in surface coal mining where the volume of overburden is large relative to the thickness of the coal deposit and where the operator demonstrates that the amount of overburden and other spoil and waste materials cannot be economically restored to the approximate original contour, the operator shall backfill, grade, and compact (where advisable) the overburden and other spoil and waste materials to the maximum extent possible in accordance with regulations of the regulatory authority and to cover all acid-forming and other toxic materials, in order to achieve an ecologically sound land use compatible with the surrounding region in accordance with the requirements of subsection (c)(3) and that such overburden or spoil shall be shaped and graded in such way as to prevent slides, erosion, and water pollution and is revegetated in accordance with the requirements of this Act;"

On page 284, delete all through page 285, line 18, inserting in lieu of the deleted text the following, and renumbering succeeding sections accordingly:

"(1) Insure that when surface coal mining is performed on steep slopes, no debris, abandoned or disabled equipment, spoil material, or waste mineral matter be placed on the downslope below the bench or mining cut, except that where necessary soil or spoil material from the initial block cut of earth in the surface coal mining operation can be placed on a limited and specified area of the downslope below the initial cut in accordance with regulations adopted pursuant to the provisions of paragraph 415(b)(3) if the permittee demonstrates that such soil or spoil material will not slide and that the other requirements of this subsection can still be met: *Provided*, That spoil material regulated under the provisions of paragraph 415(b)(3) or 415(d)(2) or excess spoil from a surface coal mining operation granted a permit under subsection 415(c) may be permanently stored at such offsite spoil storage areas as the regulatory authority shall designate and for the purposes of this Act such

areas shall be deemed in all respects to be part of the lands affected by surface coal mining operations. Such offsite spoil storage areas shall be designed by a registered engineer in conformance with professional standards established to assure the stability, drainage, and configuration necessary for the intended use of the site.

"(2) The operator may not disturb land above the top of the highwall unless the regulatory authority finds that such disturbance will facilitate compliance with the environmental protection standards of this section: *Provided, however*. That the land disturbed above the highwall shall be limited to that amount necessary to facilitate said compliance.

"(3) For the purposes of this section, the term "steep slope" is any slope above twenty degrees or such lesser slope as may be defined by the regulatory authority after consideration of soil, climate, and other characteristics of a region or State."

EXTENSIONS OF REMARKS

FIRST JOHN SHERMAN COOPER LECTURE

HON. JOHN J. RHODES

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 26, 1977

Mr. RHODES. Mr. Speaker, recently former President Ford gave the John Sherman Cooper Lecture at the University of Kentucky. I think it would be of interest to my colleagues, so I insert it at this point in the RECORD:

JOHN SHERMAN COOPER LECTURE, UNIVERSITY OF KENTUCKY, APRIL 11, 1977

It is an honor and a very special privilege for me to deliver the first John Sherman Cooper Lecture at the University of Kentucky.

To know John Sherman Cooper is to know one of the finest statesmen this country and the Commonwealth of Kentucky have ever produced.

For almost half a century, he has served the Nation with the highest distinction—as a legislator and judge here in Kentucky, as a soldier under General Patton, as a delegate to the United Nations and a founder of NATO, as Ambassador to India and East Germany, and as a United States Senator.

A few days before he retired from the Senate in 1972, the Congressional Record was filled with his tribute. From both sides of the partisan aisle, the sentiments were the same.

Integrity, vision, compassion, wisdom, honor—these were the words his fellow Senators used to describe their friend and define their loss on his retirement.

His magnificent record in foreign affairs, both in the Congress and in the executive branch, his sponsorship of the Appalachian Regional Development Program, his statesmanlike influence on his fellow legislators—all of these help form the legacy of John Sherman Cooper.

As a serious, constructive student of government, and as an able lawyer, Senator Cooper also devoted much of his time and thought to the search for a proper balance of powers—particularly in foreign policy—between the executive and legislative branches of government.

This fascinating, frustrating search is as old as our Constitution, with roots much deeper in the history of governments.

It has at various times concerned the Roman Senate and Caesars, the English King and Parliaments, and others fully as much as it concerns American Presidents and the Congress in our time.

The Framers of our Constitution, well schooled in the history of governments and deeply influenced by such political philosophers as Polybius and Montesquieu, recognized the need for separate powers as checks and balances among the executive, legislative and judicial branches.

They gave the Congress the power to coin money, collect taxes and appropriate funds; to regulate commerce; to establish courts; to raise and support an army and navy; to declare war; and to make all laws necessary and proper for executing the powers of government.

The President was assigned the powers of Commander-in-chief of the army and navy; the appointment of ambassadors, judges and other public officials; the veto of congressional legislation; and the power to convene the Congress in special session.

With powers thus divided, neither branch was intended to dominate the other.

Yet each has established a clear dominance at different stages in our history.

In 1885 a young Woodrow Wilson published his doctoral dissertation on the subject of "Congressional Government." He concluded that the Congress was the dominant branch of government, and that the President was "nothing but an ineffective figurehead."

He advised that "we think less of checks and balances and more of coordinated power," and that we achieve that coordinated power through "the encouragement of Presidential leadership."

Nearly a century later, after two Roosevelts, a Truman, an Eisenhower, a Kennedy, a Johnson, a Nixon—and an older Woodrow Wilson—Presidential leadership does not seem to need much encouragement.

But the question remains, "how should the powers of the executive and legislative branches be coordinated, especially in the field of foreign policy?"

I address this question tonight as one who has been honored to serve at both ends of Pennsylvania Avenue over the past 28-plus years.

As a Member of Congress, I sometimes wondered if the Presidents with whom I served weren't going too fast in making important decisions and commitments for the Nation.

I wondered if the White House didn't isolate them too much from public opinion and from the free expression of competing views.

Later, like many of the modern Presidents, I occasionally felt a certain impatience with the painstaking, deliberative process that is the heart and soul of the legislative branch.

The pace of this modern age has been so fast its problems filled with such urgency, the the parliamentary rules and customs so deeply rooted in tradition often seem antiquated, petty and maddeningly slow when viewed from the Oval Office.

So the problems of coordination can be troublesome, and they are magnified a thousandfold when foreign policy is involved.

In the years just following World War II, while two junior legislators named Cooper and Ford were learning their way around Washington, there was a remarkable degree of national consensus about the role America should play in the world.

We held the noble conviction that since we alone had emerged virtually unscathed by the destruction of war—since the war had in fact made us the most formidable military and economic power on earth—we had a special responsibility to build a new and better world from the ruins of the old.

We knew, too, that we had been dragged into two world wars we did not want by the collapse of the world political system in 1917 and 1941, and that we could not sit by and let that system collapse again.

This national consensus was made possible by such men as Arthur Vandenberg, my own political mentor, who championed bipartisanship in foreign affairs and helped cement with President Truman a common bond of purpose in international relations between the legislative and executive branches of government.

Working together, it was an easy and rewarding task to guide public opinion and mandate government resources for such monumental efforts as the Marshall Plan, the Point Four program, and NATO.

Consensus was also made possible by the recognition of a growing threat from the Soviet Union. In that early post-war era, the Soviets under Stalin were consolidating their power and authority over the nations of eastern Europe.

They were also probing for footholds in the Middle East, first in Iran and Turkey, and later in many other parts of the region.

No one knew how far their aggressive designs might reach, and none decided that if the Soviet march were to be stopped, the United States would have to assume the active leadership of the free world.

The nations which had guided European diplomacy for centuries no longer had the power to do so, especially before the massive threat of Soviet expansion.

These goals for a new and better world, and these challenges of the Cold War, established a foreign policy consensus that endured well into the 1960's.

It is the Presidential drama of this period we remember best: Eisenhower pledging to go to Korea; the dramatic summit conferences; Kennedy's courage in the Cuban missile crisis.

But underlying every Presidential initiative was a broad foundation of support in the United States Congress.

Even in the case of Vietnam, the SEATO Treaty was approved by the Senate, 82 to 1, in 1955, and the Gulf of Tonkin Resolution was passed in the Senate, 88 to 2, and in the House of Representatives, 414 to 0, in 1964.

But as that frustrating war went on year after year, our national unity was shattered, and with it the essential foreign policy coordination between President and Congress.

Old assumptions were challenged. Longstanding commitments were called into question. Bipartisanship in foreign affairs gave way to deep divisions within the two parties themselves.

Members of Congress who came to oppose the war would also come to oppose the Presidents who prosecuted the war.

In the end, they would argue that the Presidency itself had grown too powerful, that a usurpation of powers by the President from the Congress was chiefly to blame for our disillusioning involvement in Vietnam.

These concerns found legislative expression in the War Powers Resolution of 1973.

This resolution claimed for the Congress unprecedented power in the conduct of foreign policy, at the same time holding the President in strict account for his own actions in international affairs.

The resolution required that "the President in every possible instance shall consult with Congress" before committing U.S. combat troops abroad, and that the President report in writing within 48 hours to the Speaker of the House and President pro

tem of the Senate on any commitment or substantial enlargement of such troops.

It also required that after such forces are introduced, the President "shall consult regularly with the Congress" until forces "are no longer engaged in hostilities or have been removed."

A second major section of the resolution provided that any such troop commitment must be terminated within 60 days, unless Congress has declared war, specifically authorized the commitment, or has been unable to convene because of an armed attack on the United States.

The legislation also specified that, by the passage of a concurrent resolution, the Congress can direct the President to remove U.S. forces before the 60-day period expires.

"No more Vietnams" was the theme sounded over and over in the debate on this War Powers Resolution.

John Sherman Cooper, seeing only tragedy in Vietnam and knowing that it would, indeed, be dangerous to have too much power concentrated in any one branch of government, was a co-sponsor of this resolution.

But he did not agree with one of its underlying themes, that, in his words, "the executive has taken from the Congress its powers."

He reminded his colleagues that "the Congress, particularly since World War II, has not only acceded to, but has supported" executive requests for congressional authority "to use the armed forces of the United States, if necessary, in hostilities."

"These are settled facts of history," he said. "We can change our course but we cannot revise and rewrite history."

While debate on the resolution was underway, a new and distressing chapter in American history was being written across the front pages of the Nations newspapers.

Day after day, new allegations of excessive and misused presidential power were being unveiled. The scandal of Watergate became a national obsession.

It was in this highly-charged atmosphere, in the boiling passions of Vietnam and Watergate, and in defiance of President Nixon's veto, that the Congress finally passed the War Powers Resolution.

The debate was framed by constitutional issues. As Eugene Rostow has noted, "the battle cry of 'constitutional usurpation' quickens the blood of every Congressman, indeed of every American. We find it easy to conclude that whatever we dislike intensely must therefore be unconstitutional, as well."

But as John Cooper's good friend in the Senate, George Aiken of Vermont, has written, the War Powers Resolution was "largely a political effort . . ., an attempt to amend the Constitution by congressional resolution." The arrangements which the Constitution makes for the conduct of foreign policy involve a complex interplay between the legislative and executive branches.

Congress is given the power to declare war, and to raise an army and navy. The Senate is given the additional power of advice and consent in the ratification of treaties and the appointment of ambassadors and other officials, including the Secretaries of State and Defense.

The President is made Commander-in-Chief and head of state. By fundamental definition, the chief executive is also given the power to execute American foreign policy.

It was not intended that these powers be consolidated in the interest of efficiency, but rather that they be separated in the interest of democracy.

Coordination between the two branches was obviously to be encouraged. The brilliant system of checks and balances which the Founding Fathers devised was not meant to breed constant, paralyzing confrontation between the President and Congress of the United States.

But as former Undersecretary of State George Ball testified in hearings on the War Powers bill, this resolution "represents an attempt to do what the Founding Fathers felt they were not wise enough to do."

It seeks by simple legislation to codify the military powers of the President, spelling out exactly what he can and cannot do, and how, and under what circumstances, to defend the United States and its citizens from international danger.

The Resolution also grants to the Congress powers which tend to make it superior to the executive branch, as in the provision that Congress may order the withdrawal of troops within 60 days by a concurrent resolution not subject to Presidential veto.

Where are the constitutional checks and balances of this system?

The resolution also requires consultation with Congress in military emergencies.

Of course, consultation by the President with congressional leaders is a wise and normal feature of our constitutional and political life.

No President with commonsense would dream of neglecting this aspect of his obligation. But can it be mandated by law? And what does it mean?

Can the President satisfy the law by having breakfast with three or four or a dozen leaders he decides are the key people?

Does the law mean that the leaders of both houses, and key members of relevant committees, can speak for or bind the Congress?

Finally, there is a question of how closely this resolution would involve the Congress in the actual execution, as opposed to the general direction, of foreign policy, particularly in times of crisis.

Does the consultation provision require the approval of the Congress before executive action is taken? What if the President and Congress disagree? Which of these separate but equal powers would prevail in such a confrontation?

These arguments of dubious constitutionality can be more than matched by other arguments of workability.

The United States was involved in six military crises during my Presidency: the evacuation of U.S. citizens and refugees from DaNang, Phnom Penh and Saigon in the spring of 1975, the rescue of the Mayaguez in May, 1975, and the two evacuation operations in Lebanon in June, 1976.

In none of those instances did I believe the War Powers Resolution applied, and many members of Congress also questioned its applicability in cases of protection and evacuation of American citizens.

Furthermore, I did not concede that the Resolution itself was legally binding on the President on constitutional grounds.

Nevertheless, in each instance, I took note of its consultation and reporting provisions, and provided certain information on operations and strategies to key Members of Congress.

Let me stress that in my Administration it was customary to communicate with the leaders of Congress when an important executive action was about to be taken, particularly involving foreign affairs.

It is my view that when the President as Commander-in-chief undertakes such military operations, he would inevitably take the Congress into his confidence in order to receive its advice and, if possible, insure its support.

This type of consultation makes commonsense and certainly strengthens trust between the executive and legislative branches. But it is to be distinguished from the detailed information and time limits imposed by the War Powers Resolution.

The role of the President in these critical situations is clearly defined. As Commander-in-chief and Chairman of the National Security Council, my job was to concentrate on resolving the crisis as expeditiously and as successfully as possible. As you would expect, it is a full-time job.

When the situation permitted, as in the case of the Mayaguez, I consulted personally with the bipartisan leadership in the Cabinet Room. However, the nature of most of these crisis situations was such that the consultation process with the legislative branch had to be delegated to others, primarily my congressional relations staff at the White House.

In the interest of absolute accuracy, a summary of actions I proposed to take or had taken was drafted by the National Security Council staff. This summary was reviewed by senior officials at the Departments of State and Defense and at the White House.

This careful attention to detail was essential but it was also time-consuming for senior officials who were at the same time acting as my advisers in this fast-moving situation.

The summary often went through two and three drafts to ensure as nearly as possible that there would be no mistakes, no confusion of highly sensitive information.

Once the consultation process began, an inherent weakness of the War Powers Resolution from a practical standpoint was conclusively demonstrated.

When the evacuation of DaNang was forced upon us during the Congress' Easter recess, not one of the key bipartisan leaders of Congress was in Washington.

Without mentioning names, here is where we found the leaders of Congress: two were in Mexico, three were in Greece, one was in the Middle East, one was in Europe, and two were in the People's Republic of China. The rest we found in twelve widely-scattered States of the Union.

This, one might say, is an unfair example, since the Congres was in recess. But it must be remembered that critical world events, especially military operations, seldom wait for the Congress to meet. In fact, most of what goes on in the world happens in the middle of the night, Washington time.

On June 18, 1976, we began the first evacuation of American citizens from the civil war in Lebanon. The Congress was not in recess, but it had adjourned for the day.

As telephone calls were made, we discovered, among other things, that one Member of Congress had an unlisted number which his press secretary refused to divulge. After trying and failing to reach another Member of Congress, we were told by his assistant that the Congressman did not need to be reached.

We tried so hard to reach a third Member of Congress that our resourceful White House operators had the local police leave a note on the Congressman's beach cottage door: "Please call the White House."

When a crisis breaks, it is impossible to draw the Congress into the decision-making process in an effective way, for several reasons.

First, they have so many other concerns: legislation in committee and on the floor, constituents to serve, and a thousand other things. It is impractical to ask them to be as well versed in fast-breaking developments as the President, the National Security Council, the Joint Chiefs of Staff, and others who deal with foreign policy and national security situations every hour of every day.

Second, it is also impossible to wait for a consensus to form among those congressional leaders as to the proper course of action, especially when they are scattered literally around the world and when time is the one thing we cannot spare. Again, we should ask what the outcome would be if the leaders consulted do not agree among themselves or disagree collectively with the President on an action he considers essential.

Third, there is the risk of disclosure of sensitive information through insecure means of communication, particularly by telephone. Members of Congress with a great many things on their minds might also con-

fuse what they hear on the radio news in this day of instant communication with what they are told on a highly classified basis by the White House.

Fourth, the potential legal consequences of taking executive action before mandated congressional consultation can be completed may cause a costly delay. The consequences to the President, if he does not wait for Congress, could be as severe as impeachment. But the consequences to the Nation, if he does wait, could be much worse.

Fifth, there is a question of how consultations with a handful of congressional leaders can bind the entire Congress to support a course of action—especially when younger Members of Congress are becoming increasingly independent.

A survey reported by Congressional Quarterly last November indicated that an overwhelming majority of the Congress believed the legislative branch had an inadequate role in the international crises I have mentioned.

Sixth, the Congress has little to gain and much to lose politically by involving itself deeply in crisis management.

If the crisis is successfully resolved, it is the President who will get credit for the success. If his efforts are not successful, if the objectives are not met or if casualties are too high, the Congress will have seriously compromised its right to criticize the decisions and actions of the President.

Finally, there is absolutely no way American foreign policy can be conducted or military operations commanded by 535 Members of Congress on Capitol Hill, even if they all happen to be on Capitol Hill when they are needed.

Domestic policy—for housing, health, education, or energy—can and should be advanced in the calm deliberation and spirited debate I loved so much as a Congressman.

The broad outlines and goals of foreign policy also benefit immensely from this kind of meticulous congressional consideration.

But in times of crisis, decisiveness is everything—and the Constitution plainly puts the responsibility for such decisions on the shoulders of the President of the United States.

There are institutional limitations on the Congress which cannot be legislated away.

Yet since the Mayaguez incident, there has been talk of putting more teeth into the War Powers Resolution, intensifying congressional participation in actual crisis management.

There have also been attempts to introduce the Congress into sensitive negotiations with foreign nations.

The Jackson-Vanik Amendment to the Trade Act of 1972, in effect proposed to liberalize emigration from the Soviet Union by legislative decree, had precisely the opposite effect.

The Congressional restrictions on military assistance to Turkey after the latest Cyprus crisis prove how determined—and how wrong—the Congress can be, and how cumbersome diplomacy by rigid legislative dictate can be.

Where, then, does the balance of powers lie?

It cannot lie in a constant rivalry for power. As Professor Rostow has written, this "would tend to convert every crisis of foreign policy into a crisis of will, of pride and of precedence between Congress and the President."

Nor, obviously, does the balance lie in the dominance of one branch of government over the other.

The Constitution makes that plain enough, and our own history proves it.

The Reconstruction Congresses of the 1860's and 1870's—ignoring, thwarting, even impeaching a President, and dealing with the American South as a defeated, occupied enemy—inflicted wounds on this Nation that took a century to heal.

Woodrow Wilson refused to involve the Congress in his plans for a League of Nations—and saw his noble dream crushed on Capitol Hill.

The balance must lie, instead, in a frank recognition of the basic strengths and weaknesses of both the executive and legislative branches of government, in the institutional capabilities and limitations imposed by the Constitution and by common sense.

As I said in my State of the Union address earlier this year, "in these times, crises cannot be managed and wars cannot be waged by committee; nor can peace be pursued solely by parliamentary debate.

"To the ears of the world, the President speaks for the Nation. While he is ultimately accountable to the Congress, the courts and the people, he and his emissaries must not be handicapped in advance in their relations with foreign governments. . . ."

The notion that the President must sometimes use the armed forces of the Nation on his own ultimate responsibility comes hard to Americans because we are, and have always been, deeply concerned about democratic control.

But this power has been recognized as necessary—even as inescapable—since the earliest days of the Republic.

Pirates attack our ships off the coast of Tripoli—and we must respond. The Soviet Union blockades Berlin or places missiles in Cuba—and we must respond. An American ship is seized off Cambodia—and we must respond.

And if the nightmare danger of nuclear attack becomes reality on some dread future day—we must respond.

For such challenges, which vary from year to year and generation to generation, there is no substitute for Presidential leadership. But there is always democratic control in the electoral process, and in legislative action, as we know from Vietnam.

The bitter experiences of Vietnam and the national atmosphere in the last decade have encouraged, I believe, too much tampering with the basic machinery by which the United States Government has run successfully for the past two hundred years.

We must not abandon the wisdom of the ages in the passion of a moment.

If we have disagreements of policy, let us resolve them as matters of policy, rather than escalating them into constitutional confrontations.

Tragically, in recent years, the bases of trust, cooperation and civility between the legislative and executive branches of our government have been eroded.

In their place, there has been an attempt to build new and permanent structures on the shaky ground of mutual suspicion.

This is no way for the government to serve the American people. It is, instead, the sure way to division at home and danger abroad.

What we need, as Wilson said, is "more coordinated power."

We need to seek once again a common ground on which the President, the Congress and the American people can proudly and firmly stand through crisis and calm.

We must decide again, as a Nation, what is important to us, what goals we will set, what dangers we will risk, what burdens we will bear, in our dealings with the wider world.

The Congress has the responsibility to do now what it does best—debate these great issues, openly, freely and thoroughly—and help us find a new path on which we all may travel together.

The new Administration—free of the burden of war, unfettered by mistakes of the past—has an historic opportunity to lead America to a new age in foreign policy; an age in which the goals and commitments we hold precious as a Nation may be fulfilled through the quiet, beneficial strength that commands respect and invites cooperation.

All this will not be easy The world is very different now than it was thirty years ago We are different, and our problems and aspirations more complex.

But we are still Americans who love our country, who cherish peace and freedom in the world.

Let us in the months ahead open a constructive dialogue among the American people, the Congress and the President, leaders past and present, so we can preserve the bulwark of our strength—the Constitution—and find the mechanisms and the spirit that have made America what it is today—free and dedicated to a better world for all peoples.

NOAA PROGRAM SALUTED

HON. LARRY WINN, JR.

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 26, 1977

Mr. WINN. Mr. Speaker, I would like to draw the attention of my colleagues to a program being implemented by the National Oceanic and Atmospheric Administration. NOAA has instituted a public service program for radio designed to inform the public about such varied subjects as hurricanes, tornadoes, atmospheric pollution, and other environmental activities. From what is currently planned, the program promises to be one of great benefit to everyone.

I am particularly pleased that the first program features a man considered to be among the Nation's leading experts on tornadoes and severe storms—Allen Pearson, director of the National Severe Storms Forecast Center in Kansas City.

Mr. Speaker, at this time of year our weather is extremely unpredictable. This is a time when black thunderclouds threaten homes, property, and lives. However much some people may romanticize about being swept over the rainbow to adventure like Dorothy in the Wizard of Oz, anyone who has witnessed a tornado knows all too well the capabilities for destruction and terror these storms possess.

One of the goals of NOAA's meteorological service is to reduce the economic and social impact of these natural disasters. Certainly, in recent years, our progress in forecasting, monitoring, and warning against severe storms has been admirable and substantial.

However, our existing warning systems still continue to have problems, particularly in their capacity to pinpoint in advance the locations where these short-term severe storms will develop. Improvement of this record can be achieved, but it will be in direct proportion to our willingness to commit the resources necessary to develop tools and techniques suitable to the task.

In the past, I have repeatedly called for more Federal funding to coordinate the expertise of the National Aeronautics and Space Administration with that of NOAA in the field of meteorology. I believe NASA's expertise in the fields of aircraft instrumentation and satellite technology could be applied more vigorously to developing severe storm data collection and forecasting, without taking the preeminence away from NOAA.

In the meantime, however, I believe a lot can be accomplished through a program of public education, and this is what NOAA is attempting to do. So far, the response has been greater than expected.

Mr. Speaker, I rise today to commend NOAA for working in the public interest.

ARMED SERVICES COMPENSATION

HON. THOMAS J. DOWNEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 26, 1977

Mr. DOWNEY. Mr. Speaker, President Carter has announced his intention to establish a blue-ribbon panel to review the problems plaguing the armed services regarding compensation. This is a long-overdue step, and one that I believe has great potential for initiating worthwhile reforms.

The President's blue-ribbon panel would do well to consider as a foundation for much of their work the recommendations on the subject contained in the third quadrennial review of military compensation. This 10-volume study examines in great detail many of the political, economic, and social aspects of the differing reform proposals concerning military compensation. I recommend it to my colleague's attention—I am sure that even a cursory review would prove enlightening.

An area deserving the attention of both the panel and Members of Congress is that of military retirement pay. The military pension system has overstepped itself to the point that it is costing billions of dollars a year more than it should. This shocking trend must be stopped, and I hope that Congress will be able to consider this matter soon.

The problems with military retirement pay, which is of interest to me personally, was discussed in more detail in an article which I wrote for the April 10, 1977, edition of the Baltimore Sun. I submit it for my colleague's attention:

THE MILITARY PENSION SYSTEM IS TOO GENEROUS

(By THOMAS J. DOWNEY)

During the last few months there has been great interest among the media in the rising cost of military pensions. Most of this attention has been focused on "double-dipping," the procedure whereby a retired serviceman receiving a pension takes a civilian job in the federal government, collecting both the military pension and a salary.

Double-dipping is indeed a problem, one that has been acknowledged by President Carter as an area targeted for reform. Approximately 141,000 retired servicemen are now civil servants. They collect pensions and salaries at the rate of $2.8 billion annually.

But double-dipping is only a symptom of the overall problem of military pensions. The system as a whole has overextended itself to the point where it is costing billions of dollars more than it should in total unfunded liability. Consider these facts. The $8.2 billion spent for military pensions in fiscal 1977 represents more than the total cost of pay and travel allowances for the entire active Army. That reflects more than 7 per cent of the total defense budget, and covers a million persons.

The fiscal 1978 budget for military pensions jumps to $9.1 billion, reflecting a trend that began in 1964 when the tab was only $1.2 billion. By the year 2000, the pension system's cost can be expected to reach $30 billion a year and cover 1.7 million retirees. That could come to approximately $470 billion which will be spent by the military during the last quarter of this century on pensions. And, the nation does not have an ounce of defense muscle to show for it.

By enumerating these figures, I do not mean to imply that we do not need a military pension system. Retirement pay is necessary to provide a serviceman a degree of financial security after his military career ends. Therefore, these expenditures would be totally justified if—and it is a big if—the excessive outlays were necessary. Unfortunately, the pension system is too generous and too liberal when compared to any other system of its kind.

The average retired officer is 46 years old and receives a yearly pension of $15,400. The average enlisted man retires at age 41 and receives $6,400. Overall, the average retiree gets 55 per cent of his service pay and through his life can expect to take in 144 per cent of the amount he received while on active duty. In effect then, the military compensates a soldier 2½ times for his services.

Compare these figures with the federal Civil Service retirement system. Federal employees are not eligible to receive their benefits until they are 55 years-old. Compared to the military, they are paid a lesser percentage of their salary, their calculation base is devised to offer them less money, and unlike their military counterparts, they are forced to contribute 7 per cent of their salary to the pension fund. In addition—again unlike their military counterparts—they are not covered by Social Security.

Lest these statistics seem misleading, I should point out that with the exception of the military, the federal Civil Service retirement system is more liberal in its benefits than any other pension system in the country.

The purpose of a pension is to provide a retiree with financial security so that he or she might be able to maintain a comparable standard of living after retirement. Of course, some pension systems do not meet this goal. However, the Civil Service system goes beyond the goal, providing more than what is necessary for a comparable standard of living to the retiree. I believe the military pension system, in that it goes well beyond the purpose of a pension, is excessively generous and claims a large portion of the defense budget in the process.

A simple solution would be to bring the military pension system more in line with the Civil Service retirement program. This would still provide an adequate pension to servicemen, while at the same time saving billions of dollars. Additionally, it would eliminate double-dipping by former military men or women.

Most military-related occupations have near identical job descriptions as their counterparts in Civil Service employment. It is both discriminatory and costly to have two separate retirement compensation systems for two different sets of government employees when the greatest difference between these employees is that one group wears a service uniform and the other does not.

VETERANS' COST-OF-LIVING INCREASES

HON. PATRICIA SCHROEDER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 26, 1977

Mrs. SCHROEDER. Mr. Speaker, today I am introducing a bill with 41 cosponsors to allow cost-of-living increases in social security, railroad retirement annuities, or other retirement benefits to be passed through to eligible veterans.

Currently, benefits are being reduced considerably when veterans receive cost-of-living increases from other retirement programs. There are 2½ million veterans receiving some form of veterans' pension or survivors' benefits. The majority of these veterans are affected by this VA procedure.

In addition, my district office has received numerous letters and calls about veterans' pensions being reduced because of cost-of-living increases from other retirement programs. The following letter is typical of those I receive from veterans:

DEAR MRS. SCHROEDER: I am a medically discharged veteran of World War II and also have a pacemaker, a bad leg, emphysema and suffer from blackouts, to mention a few problems that are existent. My physical condition prohibits employment and has for the past several years.

Recently the veterans pension I was receiving was reduced substantially because I am now receiving some Social Security benefits.

It is difficult for me to understand why Social Security would or should have any bearing on a veterans pension.

It was suggested to me that perhaps, you could, if you desire, bring some attention to this in Congress. There are probably others who have experienced this same problem. Thank you for bearing with me.

Veterans are shocked to find the cost-of-living increase is counted as additional income by the Veterans' Administration, which then decreases the veterans' pension or survivors' benefits.

As a result of social security's cost-of-living increases, monthly VA benefits were reduced in some extreme cases from $120 to $6. Cost-of-living increases are supposed to help people on fixed incomes deal with inflation; to take back with one hand what we have given with the other is bureaucratic malevolence.

This bill is more comprehensive than most bills on this subject introduced by my colleagues, as I believe the need is now greater with the upcoming July 5.9 percent social security cost-of-living increase.

UNITED STATES-CANADIAN RECIPROCAL FISHERIES AGREEMENT

HON. STANLEY LUNDINE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 26, 1977

Mr. LUNDINE. Mr. Speaker, yesterday by unanimous consent the House of Representatives passed H.R. 5638, to provide for a United States-Canadian Reciprocal Fisheries Agreement. This legislation will waive certain requirements of the Fishery Conservation and Management Act, and replace the 1973 agreement, which expired on April 24, with an interim short-term agreement until December 31, 1977.

While I supported this legislation and agree that we must have an interim

agreement to regulate the fishing in U.S. and Canadian waters, I think we must not forget the fact that the reason this is a short-term agreement is because there have been real difficulties associated with maritime boundaries, salmon, and traditional fisheries between the two countries.

We must resolve these difficulties during the next 8 months before signing a longer term fishing agreement. Concern for an agreement that will provide parity for U.S. fishermen has been expressed by a number of my constituents, including the distinguished mayor of Dunkirk, N.Y., Gilbert Snyder, U.S. fishery in Canadian waters is valued at about $15 million per year, and I share the concern of my constituents that U.S. fishermen be treated with fairness under any agreement between the United States and Canada. Given the longstanding friendship between the United States and Canada, I am confident that we can arrive at a long-term agreement that is just and in the best interests of both United States and Canadian fishermen.

PROTECTION FOR DOWNGRADED FEDERAL EMPLOYEES

HON. ROBERT N. C. NIX

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 26, 1977

Mr. NIX. Mr. Speaker, demotions caused by downgrading of positions are one of the most pressing problems of the Government's civil service workforce. Thousands of positions may be downgraded shortly which will have the devastating effect of demoralizing the dedicated employees involved as well as severely hampering their career advancement. It is incumbent on the Congress to act with dispatch on this issue and, therefore, I have introduced a bill which will correct the inequities inherent in this process.

For the most part, the downgrading of a position is through no fault of the employee. Yet the major impact of such determinations is felt almost exclusively by the employee.

This bill will protect these employees by providing that they would retain their grade and salary for as long as they hold that position.

I also believe very strongly that this legislation is necessary in order to allow the executive branch to move forward with the important task of reviewing the classification of positions and taking appropriate action to correct improper classifications. It is equally important to protect the rights of the innocent Federal employees affected.

Overgraded positions are a serious and costly problem that must be corrected. There are too many indications of contrived or outdated position descriptions which lead to overgrading to allow the practice to continue. Yet at the same time, it is inequitable to expect the employees in the affected positions to be penalized for an action outside their control.

The bill, I believe, provides adequate protection from abuse and I am confident will lead to a better classification process in the future.

In general, the bill will apply to any employee whose position has been reclassified to a lower grade since July 1, 1975, if the positon had been classified at the higher grade for a period of at least 1 year.

The minimal direct costs of this legislation will be practically offset by the considerable savings of administrative costs connected with the current system, since employee appeals will no longer be necessary.

I expect the Post Office and Civil Service Committee to take quick action on this legislation so that the rights and entitlements in the bill will be enacted before there is even greater adverse impact on the employees involved.

PROTECT OUR COASTAL WATERS

HON. JOE MOAKLEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 26, 1977

Mr. MOAKLEY. Mr. Speaker, I rise today in order to bring to the attention of my esteemed colleagues of the House a resolution from the House of Representatives of the Commonwealth of Massachusetts. It calls on the Congress of the United States to protect our coastal waters from overfishing by foreign fleets to the full limit of the law. Recently, the Congress enacted a 200-mile fishing limit in order to preserve this precious resource for the people of our Nation. Since then, we have witnessed gross violations of this internationally recognized law. Surely as responsible public servants, we can take the appropriate steps in directing the U.S. Coast Guard to action. The Federal Government must safeguard the livelihoods of American fishermen and the abundance of the American dinner table. With these facts in mind, it is a great honor to relay these ideas of the Massachusetts Legislature on to my fellow representatives here in Washington:

THE COMMONWEALTH OF MASSACHUSETTS

Resolutions memorializing the Congress of the United States to apprehend, detain and prosecute to the full extent of the law violators of the two hundred mile fishing limit

Whereas, Fish has always been and remains one of the basic and necessary foods for all people; and

Whereas, The Fishing Industry is of vital importance to the Commonwealth and its people; and

Whereas, Overfishing has resulted in a substantial decrease in the species and quantity of fish available off our shores; and

Whereas, Recent legislation has been enacted which seeks to protect, preserve and thereby increase this tremendous resource within two hundred miles of the shores of our Nation; therefore be it

Resolved, That the Massachusetts House of Representatives memorializes the Congress of the United States to authorize and direct the United States Coast Guard to apprehend, detain and prosecute to the full extent of the law those who violate the two hundred mile fishing limit; and be it further

Resolved, That copies of these resolutions be sent by the Clerk of the House of Representatives to the President of the United States, the presiding officer of each branch of Congress and to the members thereof from this Commonwealth.

CONSUMER COMMUNICATIONS REFORM ACT

HON. RICHARDSON PREYER

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 26, 1977

Mr. PREYER. Mr. Speaker, there has been considerable controversy about a proposal known as the Consumer Communications Reform Act. This legislation was introduced in the 94th Congress and has been reintroduced in the 95th Congress. There have also been counterproposals, some of which specifically establish a policy of competition in the telephone industry and a so-called neutral resolution calling for an independent study of the effects of competition on individual telephone users.

The consumer communications reform proposal has been much maligned as being Ma Bell's bill and one which seeks to eliminate any competition in the field of telecommunications. It is not my intention as a cosponsor of this legislation to prohibit competition for the benefit of the Bell Telephone System, and I am not entirely convinced that the proposal is the appropriate vehicle for addressing the larger question of the impact of ever increasing competition on the individual residential consumer. However, it is this very consumer about which I am concerned and for this reason I believe that indepth congressional consideration should be given to the matter. While many organizations have been quick to label the consumer communications reform bill as anticonsumer, a well respected North Carolina consumer organization has indicated its support for the proposal. I wanted to share this letter with my colleagues as follows:

THE CONSUMERS CENTER
OF NORTH CAROLINA,
March 10, 1977.

The Honorable RICHARDSON PREYER,
House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN PREYER: As a consumer and a person vitally interested in consumer affairs, I am deeply concerned about prices—especially the rates paid for utilities. The telephone has long been a necessity, and we should do all we can from a public policy standpoint to see that the consumer's service remains excellent and available at the lowest possible cost to the residential user.

Lately there has been a great deal of concern about policy trends of the Federal Communications Commission in the name of "competition." Some people and organiza-

tions say the FCC's policies are good. The independent telephone companies, some unions, the Bell System, and a large number of state regulators (including our own Public Utilities Commission) believe the FCC's actions will eventually result in higher rates for home telephone service.

The issue should be investigated promptly, and there should be a review of the FCC's trends in order to protect the home telephone user. I believe strongly that Congress, not the FCC, is the proper forum for investigating the issues and setting national telecommunications policy.

I am aware that most members of the North Carolina Delegation demonstrated their concern by introducing or co-sponsoring the Consumer Communications Reform Act in the last session. I hope your interest will be sustained in the 95th Congress and that you will follow through by sponsoring similar legislation in this session. I sincerely believe the people of North Carolina deserve your help on this issue.

Sincerely,

LILLIAN C. WOO,
Director.

SECTION 601(b)(3) OF H.R. 2 (STRIP MINING BILL) WINS THE DODO AWARD

HON. JIM SANTINI

OF NEVADA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 26, 1977

Mr. SANTINI. Mr. Speaker, the Society for the Preservation of Bureaucratic Abuse—SPA—has presented section 601(b)(3) of the strip mining bill with the treasured DODO—delegated opportunity for disastrous obfuscation—award.

Within the Surface Mining Control and Reclamation Act is an indefensible provision which suffers from several legislative deficiencies. While I have previously gone on record as supporting the strip mining legislation, I cannot in good conscience and judgment vote in favor of this bill so long as the award-winning subsection (b)(3) of section 601 in title 6 remains. Therefore, I will be offering an amendment to strike this section.

Too often I have seen the Federal agencies get hold of some ambiguous but well intentioned language in a bill and completely change the meaning. I am afraid this will be the case in section 601(b)(3), which could lead to the demise and bankruptcy of the small miners. Under the provision, the Interior Secretary could shut off noncoal mining on Federal lands if it would harm "cultural, scientific or esthetic values."

I will be offering an amendment on the floor Wednesday to strike this section and to prevent the extension of still another undefined power to the bureaucratic octopus. I do not want to see its tentacles wrapped around the economic throat of the small, hard rock miner.

Here are just a few of my concerns, any one of which alone would justify rejection of section 601(b)(3):

1. The section is not germane to the overall objectives and purposes of H.R. 2.

2. The section represents a most enticing tidbit for bureaucratic abuse.

3. The "Federal Land Policy and Management Act of 1976" already contains a complete procedure for making and reviewing mineral withdrawals on public lands. H.R. 2 would only add contradiction and confusion.

4. There has been no testimony or evidence to support this section. In 4 years of the strip mining battle, I have seen no public hearing discussion on this section.

5. The language represents a piecemeal patchwork attempt at both land use planning and revision of the 1872 mining law. These two subjects will be considered individually (H.R. 5806 and H.R. 5831) and in depth by the Interior Committee in a more logical and proper approach.

I hope you will join me on the floor to strike this section from the bill.

TAY-SACHS MONTH

HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 26, 1977

Mr. EILBERG. Mr. Speaker, I wish to call to the attention of my colleagues a critically important effort being made in my home city, Philadelphia, Pa., to battle the disease Tay-Sachs. I speak as the Delaware Valley Chapter of the National Tay-Sachs and Allied Disease Association prepares to observe Tay-Sachs Month, starting May 15.

For 80 years after the identification of Tay-Sachs disease in 1881, this killer of Jewish children was a hidden disease. Few, except the families faced with this tragedy, were aware of the genetic mutation being inbred in the Jewish community. To the scientific community, it was a little understood puzzle. Children, seemingly normal at birth, would stop developing and soon deteriorate and die. The cause of this tragic degeneration was not known.

In February 1969, a small group of dedicated young women in Philadelphia, motivated by the need to combat this fatal disease, pledged themselves to fight against Tay-Sachs disease and allied neurodegenerative disorders. Organized in September 1969 as a chartered chapter of National Tay-Sachs and Allied Diseases Association—NTSAD—the Delaware Valley Chapter focused on three goals: to educate the community, to assist families of afflicted children through counseling, and to support research.

The Tay-Sachs prevention program of Thomas Jefferson University was formally opened in October 1972. Organized and fully funded by NTSAD, the program is aimed at testing every adult in the Jewish community of the Delaware Valley—total population 400,000—in order to locate an estimated 13,000 unsuspecting carriers of Tay-Sachs. To date, through community screenings, the program has tested over 16,000 individuals. Unsuspecting carriers have been identified, and carrier couples found and given vital genetic counseling and followup services. Through effective implementation of the Tay-Sachs prevention program, no family need ever again suffer the tragedy of Tay-Sachs disease.

The Tay-Sachs prevention program has brought testing to many and an awareness of Tay-Sachs to the entire Delaware Valley community. With this increased awareness has come a deeper concern and interest which has resulted in the creation of three affiliated branches of the Delaware Valley Chapter, NTSAD: Northeast Philadelphia Branch, Neshaminy Valley Branch, and Bux-Mont Branch.

Mr. Speaker, I offer this information with the hope of contributing to the effort of increasing the public's awareness of the ease with which individuals can be tested to discover Tay-Sachs.

KATYN FOREST

HON. CLEMENT J. ZABLOCKI

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 26, 1977

Mr. ZABLOCKI. Mr. Speaker, we are often reminded of the importance of our commitment to a moral world, and as we all know it is incumbent upon all of us to be diligent and speak out for human rights everywhere in the world. Certain events in history, when recalled, should serve as an added incentive and remind us of our responsibilities and obligations. In this respect, I would like to draw attention to a recent speech given by Mr. Aloysius A. Mazewski, president of the Polish American Congress and Polish National Alliance, at the Katyn Memorial Observance sponsored earlier this month by the Downstate New York Division of the Polish American Congress.

Aloysius Mazewski is a dedicated champion of human rights, and in his thesis of what happened at Katyn Forest he focuses on the need for our continued commitment to human rights. His views are worthy of our attention on this most important issue:

SPEECH OF ALOYSIUS A. MAZEWSKI

Going into details and historical data of the Katyn genocide would be, I believe, redundant on my part.

For these facts are known to all the Poles living in their homeland and abroad:

They are known to Americans of Polish origin and heritage as events of most shocking and enduringly disturbing facts not only in the history of Poland but of the entire western world:

They are known, or should and must be known to the American public, for it was by a Resolution of the United States House of Representatives that a Select Committee under former Congressman Ray J. Madden made a thorough and conscientious investigation of this fact of genocide and proved beyond any reasonable doubt that the Soviet Union is the perpetrator of this international crime.

The findings and conclusion of the Select Committee with indisputable documentation were turned over to the State Department with the request that the Katyn Massacre

be brought before the forum of the United Nations.

The State Department replied that the time was "not right" for such action.

This is why the Katyn Observances by American Polonia are of utmost importance.

It is imperative that we keep the memory of the Katyn genocide alive and keep reminding the Western World of its moral timidity and negligence in this matter of universal appeal and importance.

We know in our hearts that some day, somehow, the Soviet Union will be brought before the bar of international justice and the perpetrators of the Katyn genocide will be shown to world opinion in their true light as the most barbaric example in the long and torturous history of man's inhumanity to man.

There is no doubt in our minds that eventually justice will be meted out.

However, this is not the sole objective of the Katyn Observances annually organized by American Polonia.

Their second objective of equal, and perhaps even more importance in the long term of history is to show inherent savagery of the multi-national monster collectively, and, perhaps, rightly, called Russia.

The bloody expansion of the Russian Empire, whether under the Tsar or currently, under the Communist tyrants of the Kremlin, shows a Mongolian pattern of conquest, pillage and enslavement of entire nations.

The methods may have changed to conform with the requirements of certain periods of history, but the objective of the Russian juggernaut remain the same from the 13th Century to the present time.

It is a mixture of a Byzantine power structure of a Mongolian hunger and passion for conquest.

These were the main attributes that shaped the history and development of Russia, now referred to in Communist semantics as the Soviet Union.

The Katyn Massacre lies within this pattern of the Russian Empire evolution steeped in criminality of international scope and import.

The Katyn Massacre became the glaring example of Russia's genocidal fury, because of unusual circumstances in which it occurred during World War Two.

The world was shocked to learn that Russia at that time, ostensibly allied with Poland, savagely murdered some 15,000 Polish Army officers, intellectuals, professionals and priests.

This genocide was designed by the Kremlin masters to deprive the Polish nation of the military and civic leadership desperately needed by the Polish nation, facing at that time annihilation on two fronts—Nazi and Communist.

The treachery and perfidy of this mass murder left the leaders of the Western World literally speechless.

They found it more convenient and diplomatically more expedient not to see the enormity of the Katyn Massacre in its true light.

The same timidity and short-sightedness, supposedly dictated by war exigencies, led in 1945 to the Yalta Agreement and its tragic concomitant—the division of Europe into half free and half enslaved, which division was soon to spread across the world.

Verily, Katyn was the test case in closing years of World War Two, and the West has lost, because in its enthusiasm for accommodation with Russia, the West, in the case of Katyn, has abandoned the high moral and judicial principle of the Judeo-Christian ethics.

The wages of this collective sin were not long in coming.

The onset of the Cold War, the nuclear arms race, the ideological struggle for the heart and mind of modern man, are experiences painfully known in the West.

They are known, but not heeded to.

Today, in the same atmosphere of concessions or sophismatic justification of Russia and what it stands for are rampant in the area of international diplomacy.

It led to the wishful thinking of the ineffective Helsinki Agreement, with its grandiose declaration of human rights, not backed by any meaningful guarantee.

It is, of course, to America's credit that President Jimmy Carter speaks openly of the violations of human rights in Russia.

For those are the things that need to be said—diplomatic niceties and double talk notwithstanding.

There are many professional diplomats, supported by certain naive intellectuals, who profess to be scared by President Carter's insistence that human rights should and must be taken in universal terms.

They say that such remarks may impede the arms limitation negotiations with Russia.

Those are the same diplomats and intellectuals who are always ready to look in the other direction in order not to see the most brutal and savage genocide perpetrated by Russia in the Katyn Forest.

To them, every diplomatic smile of Russia is of tremendous importance and every frown from the Kremlin forebodes catastrophe.

Those apologists of Russia know the history of its empire only from textbooks written by such wishful thinkers as themselves.

Simply stated: that they do not know Russia, they never studied and thus cannot appraise the evolutionary forces that shaped the Russian Empire and keep it going today.

They apply western standards to the empire where byzantine servilism and tyranny together with cunning designs for conquest, are the way of life.

Certainly, we want arms limitation, particularly the nuclear arms limitations.

In the armament race in post World War Two years, uncounted resources have been wasted by both the free world and the Communist camp. Further race in sophisticated weapons and nuclear implement of total destruction, can be termed as international insanity.

But that insanity, if imposed on the world, will be exclusively of the Russian-Communist making.

We in the West have no desire for conquest and exploitation of weaker nations and states. Such desire, however, is the fixed objective of the Russian empire.

And if Russia persists in manufacturing ever more effective arms of death and destruction, we will not only match her effort—but we will surpass them in order to prevent Russia from committing another Katyn crime of genocide on a world wide scale.

Hopefully, some arms limitation agreement can be reached. But only by firmness on our part.

The Russians must be convinced that their diplomatic sophistries and international blackmail will not force us into a corner.

The Russians who built and keep their empire on raw power, have a healthy respect for real power, and that real power of free men must be demonstrated to them, by showing them that any agreement, be it in armaments or in human rights, must be a two-way street, and that no more accommodation at any price are available to them.

In this context, President Carter's statements in the defense of human rights and demanding that Russia abides by the letter, spirt and intent of the Helsinki Agreement is of utmost importance and deserves our enthusiastic acclaim and full support. President Carter is right in separating the basic, fundamental rights of man to free expression, free assembly and free exchange of ideas from technical and military details of the pending arms limitations negotiations. These two are separate and distinct matters.

Furthermore, we can rightfully assume that if Russia violates the Helsinki Agreement on Human Rights, she cannot be trusted in any other agreement.

In the firming up of its stand against the Russian Empire—the United States can draw a lesson from the Katyn Tragedy.

For this reason the Katyn Observances are of utmost importance, and their sponsors and organizers deserve our gratitude.

EULOGY TO AL KEY

Hon. G. V. (SONNY) MONTGOMERY

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 26, 1977

Mr. MONTGOMERY. Mr. Speaker, I am pleased to be able to share with my colleagues the following eulogy to a truly outstanding American—former Col. Al Key. A retired officer from the U.S. Air Force, Colonel Key served as mayor of Meridian, Miss., for several years. However, he is probably best known for having set the flight endurance record with his brother Fred. Their airplane, the Ole Miss has since been given to the Smithsonian. But this eulogy is even more remarkable, but it was written and delivered by a former Member of this body, the Honorable Aubert Dunn. Mr. Dunn served as a Congressman from Mississippi in the 74th Congress. I commend the following eulogy to my colleagues:

EULOGY TO AL KEY

It is my solemn hope here to do for Al Key in death that which he often promised to do for me though altogether I do not feel equal to the memory of the dead I love, nor of the great and worthy stature of manhood he bequeaths to his people in death. I therefore must humbly find enough strength in my heart during these brief services to speak of Al Key as a close and warm friend for the greater part of his exemplary life. Before I can find a name for any thought I must remember that words are often not subtle enough, tender enough, or warm enough to express in fact and substance all the feeling that abounds in my heart now in the presence of God, and the principality of Death. It is so because when language fails the highest and deepest respect and sorrow are translated into grief. And grief is the suffering climate of the soul as it floods the heart seeking refuge from so great a loss.

The people of this community, our city and the State of Mississippi, will miss the strength, the personal and moral influence, as well as the Christian endeavors of Colonel Al Key. So, too, will the multitude of friends scattered throughout the various precincts, nationally and internationally, who not only knew and respected the warmth of his friendship, but his accomplishments, courage and sturdy nobility in the precise arts and skills of flying, to which he dedicated the greater part of his life.

The landscapes of the life and career of Colonel Key belong to the unwritten biography of his life and so must await the handiwork of others as the future bids to enfold and embroider the breadth and depth of his life. My words are only a prelude to the ultimate victories lodged in these wider landscapes soon to be written in more unemotional and sturdier moments. Funeral

words are for the dead and lamentations and sadness are but spiritual bouquets of pain and regret for a loved one, but they are words bathed no less in the tears of human anguish to better endow memory, and to preserve it in the climate of the soul. To each of us then, there remains great and signal proofs which entitle all to an inestimable and memorable admiration and affection for Colonel Key, alike unto that we hold for his late and beloved brother Fred; admiration which belongs not only to the past, but to future ages as well.

In life as a person, a devout gentleman, a tolerant man of God, there was no timidity in his stainless character but there was a permissible and dignified reticence always present in deference to the voice and judgment of others. He had an immovable faith in everything that is good, all things that are high above and things generally that are acceptable beneath, if they would only persuade the tempo of the people of his country and the people he loved toward a power for righteousness in the welfare of the greatest nation on earth. No man loved the United States of America more than Al Key. To him, unqualified patriotism was never negotiable, duty was the archangel of democratic discipline. He lived to help facilitate these qualities by precept and example. His greatest and most sacrificial service to his people and his country was in the United States Air Force, along with his brother Fred. Both were fearless and skilled pilots, and both were of one mind and dedication to the flag of this nation. Both knew and experienced the anxieties of a troubled nation at war.

Colonel Al Key was a worshipper of liberty. He believed that America was the citadel of Justice and that all seasons were days of dedicated duty, humanity the perfect religion and truth and love the only high priest. His one unending joy was to be an uncompromising part of that which ensured his people the holiness of freedom in the pursuit of happiness. Hundreds and hundreds of hours found him, during hard and embittered flights, searching the elements of the world in sunshine, rain and storm in and out of the steel flack and torturing fire of the enemy guns from every perimeter of combat, doing that which only self-possessed men of war know how to do in high distress and professional anxiety. Flying by day and by night, seeking hard the true objective of his flight, in and out of dark crested clouds, angry and tornadic winds that rocked and scolded his sturdy ship, and all the while with a faith in victory he somehow knew in the end would rapidly vanish the enemy phantoms of the world.

Al Key loved the beautiful and he always was with color and manly form. A musician himself, he was often touched to tears in its melody and inspiration. He always sided with the weak and with a willing hand gave alms; with a tender and loyal heart and with purest mind and hands he faithfully discharged all public trusts. These things indeed, do I have reverend knowledge of.

As for me, I shall spend the remainder of my life in the cool, calm and endearing shadows of the warmth I held in simple friendship for Al and his delightful family. He might have touched the silver prongs of the restless stars at night in his long years of flying, or he may have had sweet and close communion with the celestial boundaries of God's infinite heavens which belong to eternity, but from the voiceless lips of the unreplying dead, while there come no words, I can see in the long night of death a star of hope, replenishing as it were, a listening rustle in my heart and those of his friends and family; a wilderness of flowers beddecking the memory we have for this departed friend, servant and trusted companion.

And to you Evelyn, his gracious and loving wife, and to you Neil, his daughter, and the small covey of beautiful and robust grandchildren, and other loving members of the family, what is there more to say in this hour of gloom when we consecrate this sacred dust? In the everlasting tenderness of the Bible there is, reposing in the eleventh chapter of Saint Luke, these words of God to one of his closer friends. It is a very short but beautiful commendation directed to Barnabas, Man of Antioch. God simply said, "Barnabas is a good man." If God chose to so eulogize his own servant, who are we to defer, or choose any such other title of endearment to the memory of one of our own. However narrow is the value of life, it holds well for Al in our wailing cry of bereavement. Each of you is a part of all that was good, commendable and pure in this husband, father, grandfather and companion. The billows that roared in the mighty conflict Al suffered in his divine appointment with God are stilled. Your solace is in God-tempered mercy and the full and acceptable promises that His mercy is for each of us in the end, and it is good.

And so, through the veil of the mysteries of death, and in this solemn hour when tears search for an understanding of reason and right, we acknowledge again the judgments of God in His all-wise and Providential wisdom as our Shepherd of love, the eternal keeper of the verdant and green pastures of hope and eternal rest. And we are persuaded that love and grief are the greatest of all passions and death is the final shadow. We also know that death gets all its human terror from love, and love gets its radiance, its glory and its rapture from the darkness of death, over which the Lord of all presides. Let us then remember that holy love is the Lily of the Valley, a flower that grows forever on the edge of the grave by the grace of God.

And now to you who have been set aside from among the many friends Al loved, may you tenderly perform the last sad chore for the dead as we put in your care his sacred dust.

UNIONS HOLD RALLIES ACROSS NATION TO FOCUS ATTENTION ON FOREIGN TRADE POLICIES

HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 26, 1977

Mr. EILBERG. Mr. Speaker, on April 13, members of the International Ladies' Garment Workers Union and the Amalgamated Clothing and Textile Workers Union staged rallies in a host of cities, large and small, across the country to focus public attention on the unwise foreign trade policies of the current administration.

The concern of these trade unionists is one which I, and many of my colleagues, share: A concern that the President's foreign trade policies are creating havoc in American industry, threatening the jobs of hundreds of thousands of American workers, and further undermining our domestic economy.

Mr. Speaker, the AFL–CIO News, in its issue of April 23, 1977, carried a detailed report on these rallies and for the information of my colleagues, I am making that news account a part of the RECORD at this point:

NATIONWIDE RALLIES SEEK LIMITS ON APPAREL, TEXTILE IMPORT RISE

Hundreds of thousands of apparel and textile workers took time off from their jobs April 13 to participate in a nationwide protest against damaging imports.

They joined in rallies, parades and demonstrations in big cities and small towns across the country—along with many workers who already have lost their jobs to imports—to plead for effective government measures to limit the increasing flow of foreign-made goods that threaten their livelihoods.

And in meetings with elected government officials at city halls, state houses and historical sites, representatives of the Ladies' Garment Workers and the Clothing & Textile Workers received indications that their warnings may be heeded.

The thrust of the joint ACTWU–ILGWU demonstrations was to make the public more aware of the widening import problem and for government trade negotiators to eliminate loopholes in a new Multifiber Arrangement.

As the demonstrations were being staged in more than 150 cities and towns, AFL–CIO President George Meany and President Murray A. Finley of ACTWU and Sol C. Chaikin of the ILGWU detailed the extent of the import problem for President Carter at a meeting in the White House.

The largest turnouts of ILGWU and ACTWU members were in Philadelphia, New York, Boston, Baltimore, Cleveland, Newark, Atlanta, Miami, St. Louis, Kansas City, Los Angeles, Milwaukee, Chicago, and a number of other major cities.

Addressing a crowd that Philadelphia police estimated at 17,000 in Independence Hall Mall, Rep. Joshua Eilberg (D-Pa.) called on Congress to make better use of the provisions in the 1974 Trade Act to safeguard the jobs of U.S. workers, including the authority to override faulty presidential decisions on foreign trade arrangements.

"We'd better use that power now, before imports destroy the American economy and prevent economic recovery," Eilberg declared.

"American workers don't want handouts, they want jobs," he said in stressing that it is the government's responsibility to protect its citizens from being deprived of their jobs.

In New York's Herald Square, Sen. Daniel P. Moynihan (D-N.Y.) told a crowd of more than 10,000 that apparel imports have had a serious impact on jobs in New York City and the Northeast. Over the last seven years, one job in three in the apparel industry has been lost to imports, he said.

"Those of us committed to free trade must show that we are equally committed to the well-being of the people and communities most affected by it," Moynihan said.

The safeguards labor is seeking from imports are routine practices of America's trading partners, he observed, but "only in America are they thought an aberration."

ACTWU Executive Vice President Sol Stetin charged at the New York rally that America is importing unemployment while exporting its technology and capital.

The cheap imports provide little savings for the American consumer, ILGWU Executive Vice President Wilbur Daniels added. "Goods on the racks from overseas don't cost that much less than those made here," he said. "But the retailers and the importers are making three times the profit."

In Boston, demonstrators marched through the streets before assembling for a rally at the State House. An estimated 10,000 union

members staged rallies in apparel factory towns throughout New England.

In Martinsburg, W. Va., workers rallied outside their plant at the request of their employer, who has been hit hard by the imports.

In Los Angeles, thousands of apparel and textile union members were joined by hundreds of other trade unionists in their demonstration on the City Hall steps where they heard an address from Mayor Thomas Bradley.

NO AID TO VIETNAM'S COMMUNIST RULERS

HON. ROBERT E. BAUMAN

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 26, 1977

Mr. BAUMAN. Mr. Speaker, a recent article in the Washington Post written by a Catholic priest long familiar with Vietnam, estimates that a minimum of 400,000 to 500,000 Vietnamese have been sent to concentration camps. The people who sent them there now want to get on our country's foreign aid rolls, having asked an interested President Carter for the aid to North Vietnam which the Ford administration refused them last year.

Irony is a mild word to describe the situation in which an American President outspoken in his zeal for universal human rights would even consider aid in any form to the Vietnamese Communists which as this is read continue to systematically jail, mutilate, and murder their own people. I know that I am not the only Member opposed to aid to North Vietnam, and I hope that the entire Congress will actively dissuade the President from following such a course of action. Kingsbury Smith's recent article in the Baltimore News American, "Hanoi's Blackmail Scheme," ought to be read over the commissary loudspeakers in the State Department. I do not think we should be aiding Pham Van Dong and his homegrown Himmlers and I hope that the majority of my colleagues will agree with me after they read the article which I now submit into the RECORD:

HANOI'S BLACKMAIL SCHEME

(By Kingsbury Smith)

Vietnam's Communist rulers want American taxpayers' money badly.

That was clearly evident in the smiling reception the first U.S. official mission to Vietnam received on its arrival in Hanoi.

The red carpet welcome included living quarters that United Auto Workers President Leonard Woodcock, chief of the American delegation, said were so comfortable "I would feel well even if I were tired."

Quite a difference from the brutal treatment accorded American war prisoners during the Vietnam conflict.

Then the Hanoi dictatorship was relying on Russia and Communist China for war supplies to kill American soldiers and conquer South Vietnam. Now it cannot get from the two Communist giants the economic and technical aid it needs to reconstruct the devastated, backward country.

So Hanoi has, in effect, been blackmailing the American Government by linking information about missing American soldiers with demands for some of the $3.25 billion of reconstruction aid it claimed Richard Nixon, when president, promised it if it would sign the 1973 peace agreement.

One clause of the treaty provided for U.S. postwar aid to North Vietnam. Another provided for Hanoi's help in accounting for dead and missing Americans estimated to number about 2,500.

On March 3, a Vietnamese foreign ministry spokesman said the United States must "disassociate itself from this erroneous policy" of wanting information on missing Americans but not wanting to provide the promised aid.

In his first meeting with Woodcock this week, Vietnamese Prime Minister Pham Van Dong made it clear Hanoi considers America still committed to the Nixon promise of $3.25 billion. Asserting that the question "does not relate to Mr. Nixon but to the United States," he said: "This is not just a question of money but of national responsibility and honor."

Either the man has colossal nerve or he thinks Americans are dopes. Henry Kissinger, as secretary of state, made it clear on June 18, 1975, that the North Vietnamese military conquest of South Vietnam in flagrant violation of the peace treaty invalidated that agreement and that all American undertakings in the peace accords thereby became null and void.

One former American ambassador to South Vietnam told me the U.S. has no moral obligation whatsoever to help the Vietnamese Communist regime. Nor does he understand why the Carter administration considers it in American national interests to help strengthen that regime's tyrannical control of Vietnam, especially when the ultimate objective of Hanoi's Red rulers is generally acknowledged to be domination of all Indochina.

Some American oil companies would like the administration to lift the trade embargo on Vietnam so they can bid for a share of the off-shore drilling concessions Hanoi has been negotiating with French, Japanese and West German oil companies. Oil deposits off South Vietnam's coast are thought to be substantial.

President Carter has made it clear he wants to normalize relations with Vietnam. Answering a question on his phone-in radio program March 5, he said Vietnam needed trade with the outside world so that it would not be completely dependent on the other Communist countries. He neglected to add they cannot give it what it needs.

In his apparent eagerness to recognize and help the Vietnamese Communist regime, the President seemed to be applying the apparent double standard that has marked the selective morality of his foreign policy.

While he and the State Dept. have risked impairment of relations with Russia, Brazil, Argentina, Uruguay and Ethiopia by taking a strong stand on the violation of human rights in those countries, his secretary of state, Cyrus Vance, told the Senate that South Korea's strategic importance to the United States out-weighed concern over human rights.

So apparently, does Vietnam's undefined importance to America outweigh concern over the inhuman treatment of those South Vietnamese who were loyal allies of the U.S. From almost every non-Communist foreigner who has left Saigon in recent months come reports of the ruthless repression of the South Vietnamese population, and especially of those who collaborated with the American forces.

One of the latest Catholic priest who lived in Vietnam from 1948 until he was expelled last year—15 months after the fall of Saigon.

In an article published in the Washington Post, Father Gelinas estimated that between 400,000 and 500,000 South Vietnamese have been sent to so-called "re-indoctrination" centers, which means concentration camps.

The cruel treatment of people in Saigon following the Communist takeover led, according to Father Gelinas, to an "epidemic of suicides. Entire families killed themselves with revolvers."

"The bureaucratic mind," he added, "is capable of a kind of sadism that is unbearable."

This is the kind of treatment the North Vietnamese Communist leaders have meted out to the people they used to claim they wanted to liberate from American imperialism.

If President Carter wants the morality tone of his foreign policy to ring true, a condition for normalizing relations with the Hanoi government should be respect for the human rights of those South Vietnamese who, encouraged by four American presidents to resist the Communists, stood with America to the bitter end.

CONGRESS URGED TO PROVIDE ADEQUATE FUNDING FOR ARTHRITIS PROGRAMS

HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 26, 1977

Mr. EILBERG. Mr. Speaker, on April 20, 1977, George E. Ehrlich, M.D., director of rhematology and of the Arthritis Center, Albert Einstein Medical Center and Moss Rehabilitation Hospital, and professor of medicine and of rehabilitation medicine at Temple University School of Medicine in Philadelphia, testified before the House Appropriations Subcommittee on Labor and HEW, on behalf of the Arthritis Foundation and the field of rehabilitation medicine in respect to the national arthritis plan and its implementation by the National Institute of Arthritis, Metabolism, and Digestive Diseases.

Dr. Ehrlich drew to the attention of the committee the fact that of a $50 million authorization for new arthritis programs, only $2.5 million has thus far been appropriated. He pointed out that over 20 million Americans have arthritis to a significant degree and that it has an influence on their lives, while many more millions have arthritis waiting to be initiated by injury, wear and tear, or other factors.

The cost of arthritis to the Nation is estimated to be increasing at the rate of $1 billion a year, and already costs $13 billion in direct costs and in wages not earned by those disabled or unable to find employment because of their arthritis.

Dr. Ehrlich therefore requested an increase in appropriations from the $25.8 million requested for fiscal year 1978 by the President's budget, to $42.5 million, with $12.2 million to be allocated to arthritis center programs. He pointed out that 66 applications for arthritis center grants, totaling over $25 million, have already been submitted—10 times the amount currently appropriated for the program. He also pointed out that less

than 1.5 percent of those being helped by the Vocational Rehabilitation Administration nationally represent victims of arthritis, despite the fact that arthritis is the single most important cause of absenteeism and disability at work.

This testimony by Dr. Ehrlich before the subcommittee was the only presentation on behalf of arthritis during the appropriations hearings. Because of his involvement in the development of arthritis centers, programs regarding arthritis and industry, and his writings in this area, Dr. Ehrlich was chosen to advocate appropriate funding for this major problem.

Mr. Speaker, I encourage my colleagues to read the full text of Dr. Ehrlich's testimony, which I am placing in the RECORD at this point:

TESTIMONY OF GEORGE E. EHRLICH, M.D.

Mr. Chairman, I am here today representing The Arthritis Foundation and the field of rehabilitative medicine in respect to the National Arthritis Plan and its implementation by The National Institute of Arthritis, Metabolism and Digestive Diseases (NIAMDD). As you are aware, Mr. Chairman, only $2.5 million has so far been appropriated of a $50 million authorization for new arthritis programs. In the light of the impact which arthritis has on the lives of over 20 million Americans, and of the fact that the cost of arthritis to the nation is estimated to be increasing at the rate of $1 billion a year, we in the arthritis community plead with you to recognize this national health problem by substantially increasing the President's budget for the arthritis programs of NIAMMD in FY1978 from $25.8 million to $42.5 million, of which $12.2 million would be allocated to the arthritis centers program.

This spring, NIAMDD has received 66 applications for arthritis center grants totaling over $25 million, ten times the amount appropriated for this new program. Besides this obvious indication of need, I would like to illustrate how the centers can play an important role in reducing absenteeism, low productivity, early retirement and extremely costly disability benefits.

Disability retirements attributed to musculoskeletal impairments increased by 500 percent between 1955 and 1974. Arthritis and related musculoskeletal diseases currently account for approximately 15 percent of Social Security Disability Insurance payments. The value of these payments is estimated at $1.1 billion, plus another $300 million which goes to the dependents of those disabled by arthritis, America's number one crippling disease. Nearly a half million persons, including dependents, are involved in this support program. In addition, nearly 160,000 persons are receiving $150 million a year in VA benefits because of arthritis.

Only heart disease outranks arthritis as a major cause of limitation of activity. In respect to limitation of mobility, arthritis is responsible for twice the cases attributable to heart condition—24.4 percent vs. 12.6 percent.

Approximately 3.5 million Americans are disabled by arthritis, nearly 750,000 of whom either require assistance to moving from place to place, or are confined to their beds. These figures relate only to the non-institutionalized population. According to the 1969–70 Public Health Service Household Interview Survey, over 14 million work days are lost each year because of arthritis.

The worker disabled as the result of arthritis is treated with almost complete neglect by his employer and by the rehabilitative system, especially, the Vocational Rehabilitation Administration, which in 1973 reported only 4,710 arthritis patients as being "rehabilitated", representing 1.3 percent of the VRA "population". This neglect must be eradicated if arthritis victims are to avail themselves of today's possibilities for rehabilitation.

Not all the blame can be attributed to industry or to the VRA. Much is the result of personal neglect. A recent survey by the Arthritis Foundation found that less than five percent of those severely disabled with arthritis and receiving disability insurance seek VRA assistance. The reasons given were (1) age; (2) lack of motivation resulting from a self-assessed unsuitability for being retrained for another job; (3) lack of sufficient or no prior work experience; (4) inadequate education; (5) discriminatory hiring practices, even with disability waiver; (6) risk of loss of disability compensation when re-employment is viewed as holding only short-term prospects for monetary gain, and eventual loss of income over the long-term; (7) unwillingness of employers and unions to allow jobs to be adapted to the applicant's disability in the belief that this job would henceforth be "frozen" and available only to persons "qualified by disability"; and (8) the inordinate length of time required to go through the VRA rehabilitative process, be retrained, and then wait for a position which may never develop.

With accessibility to care as one of the nation's major concerns, accessibility for displaced arthritis victims to care is especially important because of the economic impact this disease has on the national economy.

Obviously if we are to reduce the economic impact of arthritis, we must pay special attention to the educational needs of the 20 million patients with arthritis as well as their medical needs.

In addition to the 95 percent of severely disabled persons with arthritis who reportedly do not seek VRA assistance, recent surveys show that 12 million of the 20 million Americans with arthritis are not under a physician's care for this problem. Why? Fear? Ignorance? Lack of motivation? Lack of financial support? Lack of family support?

There are serious psychological accompaniments to arthritis caused by the progressive pain, debilitation and deformity caused by the disease. Some victims become slaves to their disease, relegating themselves to lives of loneliness, desertion by their families, and to the general abhorrence with which the well often treat those who are lame and disfigured. The emotional and psychological effects of arthritis are thus often as debilitating as the disease itself, and tend to exacerbate the disease process in an as yet not understood manner.

There are few persons with arthritis who today cannot be helped in some way, even though none of the causes of the some 100 forms of arthritis are yet known. Drug therapy, physical therapy, corrective surgery, psychological counseling, and vocational guidance are all available but too often the patient is not placed in contact with the few health professionals who are trained in the modern management of arthritis.

Let us look at what we can do with one group of arthritis victims—those who face disability retirement because of their disease.

Analysis of the relationship of the problem of arthritis patient as it relates to industry requires consideration of several factors. One factor is the relationship of occupation to the etiology of certain rheumatic diseases. Evidence indicates that some forms of rheumatic disease, particularly osteoarthritis, are in part occupational or traumatic and thus preventable or capable of modification. In addition, it is important to evaluate the prevalence of rheumatic complaints in the working population and to assess the effect on work capacity and work loss. Finally, of major import to both patient and industry, is the problem of employability of the arthritis patient.

It has been demonstrated in a number of studies that patients with major arthritic diseases are capable of effective full-time or part-time employment. The success of intensive rehabilitation programs in improving functional status and enabling up to 40 percent of patients disabled by rheumatoid arthritis to return to full-time employment is well-documented. Sample estimates of costs and benefits accruing from such programs have been made. In one British series, the cost of treating 100 cases was $40,000, which was offset by annual earnings of $90,000 by those placed in employment. Such programs include vocational guidance, the importance of which is well illustrated by the work of the New York State Employment Service. In its studies during the 1960's although only one in four arthritis job applicants was initially successful, expert help in selective occupational placement resulted in 80 percent finding employment.

Effective placement and work capabilities requires taking advantage of good personal attitudes and motivation on the part of the patient, appropriate rehabilitation techniques, intensive medical therapy, and full cooperation of knowledgeable persons in industry. Employer attitudes must change from a negative to a positive stance in accepting and retaining handicapped workers.

Goals of industry programs should include decreased absenteeism, employment for the first time of those patients with arthritis, retention of workers with arthritis, and return of the rehabilitated worker to his previous employment. These programs should include the severely disabled since great ingenuity has led to the availability of adaptive equipment and work methods which allows their successful employment in industry as well. Transit to and from work should be designed to provide practical methods for maintaining employment. Reduced absenteeism and continued employability of patients with arthritis can lead to substantial savings in terms of monies otherwise provided by public welfare.

Rehabilitation requires a team effort by the patient, the employer, social services in the community, physical therapy and occupational therapy facilities, vocational guidance and placement services, and work shops. A review by vocational counselors allows determination of prognosis of disease and the presence of disability which might adversely affect future employment. It is essential that the counselor have intimate knowledge of the requirements of the job at which the patient is to be employed and provide confidence. Close contact with both union and management is of major importance.

Some of the above goals can be accomplished in part by available resources; however, maximal achievement in solving the problem of employment of arthritics in industry requires development of large, well-organized work classification and employment centers. The goal is to place and maintain the handicapped arthritic individual in profitable employment so that he retains his dignity and avoids becoming a public charge. Consideration should be given to protection of the employer by a "hold harmless clause" backed by appropriate legislative measures which provide protection to industry resulting from such disabilities.

THE CONTROL OF ARTHRITIS IN INDUSTRY

Most arthritis patients in industry try to cover up their disease for as long as possible for fear they will be fired. Most industrial nurses report that their first knowledge of a worker with arthritis is when they come in for their retirement counseling session. The chronic absenteeism of many arthritis patients who are trying to self-medicate is

apparently seldom investigated. Only when their disease becomes too painful and disabling does the average worker with arthritis opt for disability retirement. By then, the disease has taken its toll, and rehabilitation is made much more difficult.

The earlier in the disease process an individual with arthritis can be identified, the greater the possibility for effective rehabilitation and control of the disease process. The initial years of rehabilitation in arthritis are the most critical and the most intensive, for if good management practices are not introduced at this point, the possibility of acute exacerbation becomes increasingly great.

And, since arthritis is a progressive disease, marked in certain forms by both acute episodes and sudden remissions, it must be carefully and regularly monitored, and the patient's total condition periodically re-evaluated to ascertain the degree of compliance with therapy, the effectiveness of the therapy, and the degree to which debilitation has either progressed or has been stabilized.

There are numerous forms of lesser arthritic or rheumatic complaints and disorders which are almost impossible to objectify. These include bursitis, tendivitis, low-back syndrome, neck and single-joint problems, tenosynovitis, etc. Some may be brought on by trauma, strain or excessive (unaccustomed) exercise. Many are easily treated, even in the acute form, and will gradually disappear. In some instance, changes of normal activity, even one's job, may be necessitated to ameliorate the stresses and strains which could have caused the temporary disability and which could exacerbate it if continued.

Thus, industry must learn how to set the psychological stage whereby a worker will no longer feel threatened if his arthritis is found out. Industrial physicians and nurses must be trained in the diagnoses of arthritis and must be made aware of community resources which can be brought to bear upon the needs of the patient.

Epidemiological studies of industrial populations should also be undertaken to examine factors of environment, stress, age, sex, ethnic group, familial aggregations, trauma and joint strain to see how these relate to the development, prevalence and exacerbation of arthritis.

THE NEED TO EDUCATE

The problem of inadequate information about arthritis being made available to the general public, to patients and to health professionals has already been noted as key to much of the disability caused by this disease. The National Commission on Arthritis and Related Musculoskeletal Disease cited the need for improved education at all levels as the number one priority in the implementation of The Arthritis Plan.

Much of this education—of the public, of patients, and of health professionals—can be accomplished through a national system of Arthritis Centers which would work closely with The Arthritis Foundation and its 73 local chapters. The Foundation began the initial financing of such a center's system in 1965 and is now providing token support to some 44 "centers", which are basically Rheumatology Units or Divisions in medical schools. The present level at which the Foundation is able to assist these "centers" is grossly inadequate to needs. This is demonstrated by the fact that when the National Institute of Arthritis, Metabolism and Digestive Diseases (NIAMDD) circulated the initial call for Arthritis Center grant applications last fall, 66 institutions responded, asking for over $25 million in aid, ten times that which was appropriated in the FY 1977 budget. Therefore, for FY 1978, the Foundation is requesting that $12.2 million be made available for Arthritis Centers, an amount still far from meeting the diverse needs of the applicant institutions in respect to the training of health professionals, patient and public education, community demonstration projects, and basic and clinical research.

During the past three years, over $9 million has been spent on arthritis outreach programs under the aegis of the now defunct Regional Medical Programs. These programs have been eminently successful for the most part in bringing knowledge from the medical center out into smaller communities where the general practitioner is the one from whom the average citizen seeks aid when suffering from arthritis. Unfortunately, 70 percent of these physicians have never been exposed to any formal training about arthritis, so the care they are capable of dispensing is sometimes minimal, sometimes non-existent, sometimes harmful, but seldom very effective. These physicians, their patients, and the allied health personnel who work with them, need to be brought into the mainstream of modern management of the arthritis patient. This will not happen without some stimulus from the Federal Government. And, unless, and until it does, millions of Americans will continue to receive grossly inadequate care, and thousands each year will continue to join the lists of those disabled by arthritis, unable any longer to lead fruitful, productive lives.

Despite this crying need, Congress failed to appropriate a single dollar for community demonstration projects in arthritis in FY 1977, although $3 million was specifically authorized for this purpose. The Foundation is requesting that $2 million be appropriated for community demonstration projects in FY 1978, and that the Associate Director for Arthritis be given adequate staff to effectively oversee these projects as well as for the administration of the Arthritis Centers program.

WHAT WILL AN ARTHRITIS CENTER DO BESIDES EDUCATE?

Arthritis is a uniquely human disease. It cannot be wholly duplicated in an animal model. Thus, clinical, or bedside, research is together with basic research, a requisite component of a national attack on arthritis. Clinical research, however, cannot easily be performed when arthritis patients are spread all over a hospital's wards. There therefore needs to be a central focus for clinical research, yet there are even very few teaching hospitals which have concentrated their arthritis patients in a single area to which the rheumatologist, orthopaedic surgeon, physical therapist, nurse, social worker, occupational therapist, and other members of the arthritis team can then attend. There is, however, a trend in this direction to which the Federally-funded Arthritis Centers program could make a major contribution, benefitting both patients and researchers, reducing duplication of effort, and leading to major reductions in patient care costs, especially when extended care facilities and outpatient care can be used as viable options to in-patient care. This of course will require major changes in the structure of third party payments for medical care.

There also needs to be a certain degree of targeted research in arthritis. During the hearings on the National Arthritis Act before the House Subcommittee on Public Health & Environment, the Director of the National Institute of Arthritis, Metabolism & Digestive Diseases (NIAMDD), Dr. G. Donald Whedon, provided a breakdown of the $8,343,000 expended on extramural research grants in arthritis during FY1974. Only $388,000 was spent that year on research into the causes of Juvenile Rheumatoid Arthritis, which affects some 400–500,000 children in the U.S.: $420,000 was spent on research in osteoarthritis which affects 13–14 million Americans; and only $344,000 on gout which affects 900,000—1,000,000 persons in this country. Systemic lupus erythematosus (SLE), which is a potentially fatal disease in young women if not treated quickly and expertly, although funded at a slightly greater rate—$608,000—is considered underfunded by at least three hundred percent. These are only a few of the major areas of arthritis which are begging for greater attention and for research results which will bring some greater relief to the millions disabled by these diseases.

Another primary research area is how torn cartilage relates to arthritis. Sports injuries often cause serious arthritis later in life if not properly cared for. Knowledge in this area is still insufficient to prevent several thousand high school and college athletes each year from facing possible crippling in their 40's. Only $179,000 was spent on research in this area in 1974.

The Foundation is requesting an increase of $5,595,000 in the arthritis research budget of NIAMDD in FY1978 to meet these critical needs.

EXPLANATION OF ENCLOSED BUDGET CHART

The enclosed Budget Chart reflects the Foundation's hopes for FY1978, in respect to the arthritis programs of NIAMDD. Of the $16.7 million increase requested over the President's Budget, half would go to Arthritis Centers, one-third to Research, and lesser amounts to initiate priority programs recommended by the National Arthritis Commission and authorized by the National Arthritis Act, as amended: Community Demonstration Projects, National Arthritis Data System, and a National Arthritis Information Services program. We also request that $300,000 be made available to the Institute to fund the activities of the National Arthritis Advisory Board.

TRANSPORTATION AND ENERGY—WILL AUTO PROPOSALS CHANGE AMERICAN VALUES?

HON. BUD SHUSTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 26, 1977

Mr. SHUSTER. Mr. Speaker, "Cars give poor people more choices." This quote came from a Washington Post article by William Greider sums up the basis for my deep-rooted concerns about President Carter's proposed gasoline tax increase.

Mr. Greider rightfully points out that—

If government regulation were to cripple the automobile society, in the name of saving oil, it would most surely hurt the least first and hardest, then ripple upward on the economic ladder to the rich whose lives would not suffer at all.

The automobile has become a way of life in America, and anybody who tells you he is going to do away with it is just whistling dixie. Furthermore, it has enriched the lives of Americans, especially poor Americans, by giving them opportunities that a less mobile society could not offer.

We are talking about American values, Mr. Speaker, and Mr. Greider correctly commends to the national energy debate the importance of those values in the automobile, particularly for the poor and underprivileged, both socially and economically.

Because this is an issue that will touch every American in some way, I commend the article by William Greider to you and our colleagues so that we may all better understand precisely what a substantial gas tax increase would do to our American values. The article, reprinted from the April 25, 1977, issue of the Washington Post, follows:

CAR CRAZY IN AMERICA, A NATION IN OVERDRIVE

(By William Greider)

My daughter, right at this moment, loves horses and, as sometimes happens when children develop intense interests, it educates the parents.

This time, on a Sunday afternoon, I learned something about the true nature of horse shows. I thought horse shows, especially jumpers going over fences, belonged to rich people, the town-and-country tweeds.

What we discovered at one of the stables in Rock Creek Park was an extraordinary scene—hundreds of ordinary folk (instantly recognizable as middle-middle (Americans) gathered to ride and jump in friendly competition. Scores of well-muscled horses. Friendly banter. The easy ambience of a country fair, right in the city.

But more startling still was the awesome fleet of monster vehicles assembled for this horse show. Bumper-to-bumper horse vans were parked around the ring. Not just your little single-horse trailers, but huge trucks with fancy interiors, capable of hauling four horses or six horses—gas-guzzling horse stables on wheels.

Only America, right? The puritan in me was naturally offended by the grossness. All that mechanical horsepower assembled for the purpose of playing horse-and-rider. You could probably run Europe on the oil Americans devoted to such non-essential marvels as horse vans.

But the small-d democrat in me felt good. I would like the kings and queens of Europe to come to Rock Creek Park some Sunday afternoon and try to guess who these people are. They are just regular people, ordinary Americans enjoying a sport invented for dukes and earls.

Automobiles, camper vans, pick-up trucks—they are gross, luxurious, wasteful vehicles. But they are also democratic engines. The horse show reminded me that someone ought to say this, now that the puritans are mounting another offensive.

I think cars and Interstate highways and even those ridiculous summer-homes-on-wheels called "recreation vehicles" spread equalitarian life values through America—the values of time and mobility—and they spread these qualities downward in our society, more directly than any patch-up government programs. Cars give poor people more choices. If government regulation were to cripple the automobile society, in the name of saving oil, it would most surely hurt the least first and hardest, then ripple upward on the economic ladder to the rich, whose lives would not suffer at all (I am reasonably certain that government regulation will not be allowed to cripple the automobile because too many politicians understand that the very idea contains the seeds of class war).

I can't prove these claims with statistics but anyone who has traveled much around this country has seen what I mean. The new pattern of country living is a man or woman who drives 100 or 150 miles a day from their farm or small town for a job in a medium-sized city. In Kentucky, people who live in benighted mountain counties drive the turnpike to good jobs in Lexington. In Illinois, a woman drives 140 miles a day commuting from Carbondale to Mt. Vernon. In the West, the distances are more awesome still.

The range of these working people in the country has been defined by the Interstates and, of course, it has greatly increased their job choices. The practice of long-distance commuting, outside metropolitan areas, has increased dramatically in the last few years, so has the population in those places. The energy statistics may put that mileage down in the luxury column, but I doubt that it looks that way to those people.

Here's another thing that doesn't show up very clearly in the statistics: cars help people, especially poor people, to create their own private "social security" systems to cope with their big problems—unemployment, family trouble, poverty. You can run away from home in a car (and also return when you get homesick). The Okies drove to California in the 1930s and that process, less obvious and dramatic, is still in motion today, all over this country.

I saw it years ago in Cincinnati, my hometown, where thousands of Appalachian mountaineers—"hillbillies," we called them—came north to look for work. They lived in the slums and were widely despised, and many could not find jobs.

But they did not just migrate to the city—they went back and forth, frequently. They might return to the home place in eastern Kentucky during lean times, come back to the city when jobs opened up, drive home to the mountains on the weekends, where friends and family were around for comfort. These were painful times, but the old cars they drove were part of easing the pain. The Cincinnati bridges are still jammed with cars, heading south, on Friday afternoons.

You can find the same thing on Indian reservations. Talk to the most impoverished families in a remote canyon of a South Dakota reservation and it is likely that some of them have been to Chicago or Cleveland or San Francisco. There are no jobs on the reservation; they do not like the wretched life in the cities. So they move back and forth, searching earnestly for modest improvement in their lives.

And it is not just the traveling around, private and unplanned by the economists. It is the idea of traveling that is important to us, transcending all class lines. This notion, the roaming American, is as old as the republic but it has survived, miraculously, in a new mythology built around the automobile (and lately the van).

The car is a subterranean linkage in this broad country: expressed in mad non-stop dashes from coast to coast, burning across the heartland's allnight radio band, tripping the continent on adrenalin. If you have not done it, if you don't understand why other people do it, read Kerouac's "On the Road" or Algren's "Walk on the Wild Side."

Cars are our leap into sensational experiences: I remember leaving lower Manhattan at midnight, plunging into the greasy air of the Lincoln Tunnel and 30 hours later we were sitting in a drugstore in a steamy small town of Mississippi, drinking Coke and listening to the dead voice of the counterman. Thirty hours later, we were in the rain forest of Mexico where tarantulas sometimes cross the highway.

I remember a wreck on the West Coast, coming back north, where a Mexican nun in a white habit sewed up my forehead. We limped north on buses and hitchhiking, feeling suspicious of ourselves without a car. I knew I was home at a used-car lot in Tucson when the salesman warned us: "This car

ain't got no gar-antee, you know." He was from West Virginia, a familiar voice and I can still hear it, though this was 20 years ago.

These cars, I think, burned images in all our young minds—painful, frantic, gaudy moments, sometimes suicidal, occasionally triumphant. I am thankful that I lived through it (a few friends did not) and I can still say that it seemed necessary, those escapes by car. Adults, I discovered later, are not so different, only more cautious as drivers. Think of Joan Didion's heroine in "Play It As It Lays," driving the freeways of Los Angeles for hours, days, suspended animation at 80 miles an hour.

This is all very untidy. Economically wasteful. In a better world, people would not wander around like this, burning up gasoline in futile searches (in a better world, people would not be poor or spiritually desperate). Still, there's an explosion waiting, I think, if the government tries to price Americans out of their wandering.

If you want to see what it looks like, examine a Latin American city where the poor lack mobility—where they stack up in the cities and build tarpaper slums, unable to find work and unable to return home.

Right now, the puritans are bringing up Europe again, to make us feel bad. Europe is more efficient, less wasteful. Europe does not squander oil the way we do. This is beyond dispute, but there are reasons which the puritans do not mention.

For one thing, we have lots of people in this country who drive the equivalent of halfway across France every day, just getting to work and back. The French do not do that much, especially the poorer French. It is a smaller place, more crowded, with less wandering.

Also the poor people in France do not own cars. They have motor scooters or bikes or they walk. With good fortune, they buy the bottom-of-the-line Citroen, a noisy sluggish beast which would strain its guts out driving halfway across France everyday.

These are my impressions from Europe. I looked up some statistics which confirm them. For starters, there are 245 million cars in the world—and 45 percent of them are owned by Americans. In the United States, there is more than one car for every two citizens. In France, there is less than one car for every three citizens. In thrifty West Germany, which we are supposed to emulate in energy matters, there is one car for every four citizens.

People in West Germany or France don't need cars as much—they live closer together in villages and towns and they move around less (and besides gasoline costs more than $1.60 a gallon). The population per square mile in America is 60 people. In France it is 250 people. In Germany it is 650.

I could not find any statistics to show who owns cars in Europe and who doesn't. I would be happy to bet my seven-year-old Ford station wagon that it is not the rich who sacrifice their mobility to save oil (if you saw the condition of my station wagon, you would not take it on a bet).

But Europe does have something which America doesn't have in automobiles: efficient design. European cars are smaller, less exotic, less powerful, but in the medium and upper price ranges they are as comfortable for families as American cars, merely less gross (if Detroit would sell Americans the same cars which it markets overseas, it would save us a lot of oil).

But here is something else that Europeans enjoy: speed. Strange but true that Frenchmen are driving along their Autoroute in smaller cars at 80 to 100 miles an hour while America chugs along the Interstates in their behemoths at 55 m.p.h.

If we are talking about inefficiency, this is one of the grossest inefficiences in America today. This nation spent billions of dollars building a rational system of high-speed highways; yet now millions of Americans are wasting millions of hours of their lives, driving slow in order to save a little oil. I know all the pieties about how slower is faster, but folks are already defeating that anyway with CB radios and native American stealth. If Americans drove better-designed cars, they would drive a lot faster, more efficiently.

Time and mobility. What I'm getting at is that the political solutions to the energy problems will make a lot more sense—and will have at least a prayer of popular acceptance—if the energy debate recognizes the importance of those values in the automobile, especially for the less privileged. The solutions could aim to preserve those social values—even enhance them—instead of denouncing us for statistical luxuries.

All sorts of wild ideas might flow from that recognition—that America is not Europe and there is no way it can become Europe (and no reason why it should want to). In the best American tradition, we can steal the best ideas from Europe and throw back the rest.

So why not make a deal with American car owners? When the nation's fleet of gross monsters become smaller and less wasteful, they can go back to driving 80 miles an hour on the Interstates. Make a trade: size for time, grossness in exchange for speed.

Or, since we are subsidizing every good thing in life and commerce, how about a federal program to help people buy new cars—more efficient cars, naturally—for the people who are driving old clunkers and can't afford new models? This sells cars for Detroit, reduces air pollution, saves oil and helps poor people.

Who could be against all those good things? It's as American as stock-car racing.

ELECTRIC MOTOR POINTS TO ENERGY CONSERVATION

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 26, 1977

Mr. ANDERSON of California. Mr. Speaker, yesterday at a press conference sponsored by the California Public Utilities Commission, Southern California Edison Co., and officials from the State's energy commission, a new electrical motor was unveiled which could mark a significant step toward greater energy conservation.

C. L. Wanless of Orange County has developed a new type of electric motor that uses 10 to 18 percent less energy than present motors consume. It has been estimated that the savings which could be had by converting to this motor could reach as high as 30 percent.

Called the Controlled Torque, the new engine was designed by its inventor using existing parts from conventional motors. Since electrical motors currently consume as much as 65 percent of all electricity generated in the United States, widespread use of this product in appliances and industry could save up to the equivalent of 1 million barrels of oil a day.

Mr. Wanless is to be congratulated for the imagination and inventiveness he has demonstrated in this new breakthrough. And perhaps it should serve as a lesson to us in dealing with the energy shortage. Real steps toward energy conservation may lie in examining the current technology available to us and giving it new applications.

Futuristic research into new energy sources is necessary, but in stressing it too much we may miss solutions which lie much closer to our grasp.

THE OUTRAGE OF CHILD PORNOGRAPHY

HON. ROBERT A. YOUNG

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 26, 1977

Mr. YOUNG of Missouri. Mr. Speaker, the abuse of children in pornographic materials has become a virtual avalanche that must be stopped. Police raids in cities across the country have gathered whole warehouses of pornographic photographs, magazines and motion pictures involving children. One Los Angeles reporter has gathered nearly 300 magazines dealing with sex involving children under the age of 16.

The fact that there is a demand for such material is a distressing example of moral decay in American society. But the terrible aspect of the problem is the effect that the pornography has on the children who are forced to engage in this activity. Children in the age range of 3 to 12 have little, if any, real sexual awareness; in nearly every instance an adult—sometimes even the parent—has forced the child into pornography for money.

A revealing article by Associated Press correspondent Peter Arnett in the St. Louis Post-Dispatch graphically described the extent of such child abuse. "The wide use of children in pornography is only now becoming apparent," according to the article:

Magazines featuring young boys have long been available to the homosexual trade, but in the last year police report an avalanche of publications and movies featuring children.

The article continues:

Robin Lloyd, a Los Angeles-based television reporter who has written a book on the subject, says he has 264 magazines, each costing about $7, dealing with sex involving children under 16. One publication deals entirely with sex between identical young twins.

Police raids have gathered up whole warehouses of pornography featuring children. A major find in a Houston raid in 1975 was 15,000 color slides of boys engaged in sex acts. New York police discovered last year that one-third of their 2,000 warehouse feet of pornography involved children.

The magazines range from Lollitots, which features young girls aping their big sisters in Penthouse and Playboy, to hard-core extravaganzas such as "How to Deflower a Virgin."

Lloyd reported that there are even several organized groups in the United States dedicated to the proposition that sex between adults and children is not only desirable but necessary for the mental well-being of the child . . .

Who are the children exploited in the magazines and the movies? Like the girl who

posed shyly in a nudist magazine and then graduated to hard-core pornography, most are totally anonymous. "We know every anatomical detail, but not their names and addresses," said Lt. Lloyd Martin of the Los Angeles police.

There is little doubt that most of the children are American. License plates on automobiles and street signs give Florida and California backgrounds even to films purportedly made in Europe.

Fred Cohen (executive director of the Odyssey Institute) says: "The Europeans have much stronger laws against using kids in this way." Ninety percent of all child porno in the world comes from America . . .

A New York housewife is known to have produced a nine-minute porno movie called "Susie and her Little Brother" starring her 10-year-old daughter and 9-year-old son . . . The institute said the housewife sold 60 copies of the movie last Christmas for $30 a copy. The girl is now being held in a New York Catholic home.

Much of the pornography involving older children also finds its way onto the market through parents. "It is the only way the really young kids can get involved," said Lt. Martin.

Advertising in magazines and the huge pornography mail order business allows untrammeled trade with little possibility of detection.

The profits of the child pornography business are enormous, with some estimates placing the total sales near the billion-dollar range. Retail prices of individual magazines range from $5 to $25, and crude, normally silent 8 mm films are sold for $20 to $50.

A study prepared by the Library of Congress showed recently that only six States have laws prohibiting the participation of minors in obscene performances in books or films. Five Federal laws now prohibit the distribution of obscene materials, but those laws depend on the much-argued definition of obscenity which the courts have had difficulty in reaching. Such vague definitions have greatly hampered the enforcement of the antiobscenity laws.

For these and other reasons, I have consponsored H.R. 4631, a bill which would amend the Child Abuse Treatment Act to prohibit the sexual exploitation of children and the transportation and distribution of photographs or films depicting such exploitation.

This bill describes a specific list of prohibited sexual acts which children under the age of 16 shall not be caused or permitted to engage in. The bill also calls for penalties of a $50,000 fine or 20 years imprisonment for the pornographer, photographer, or other responsible party. Persons who transport, receive, or sell such materials would be subject to a $25,000 fine, 2 years imprisonment or both.

I urge that the committees considering this bill move quickly so that the outrage of child pornography can be stopped.

SECRETARIES WEEK

HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 26, 1977

Mr. EILBERG. Mr. Speaker, this week has been set aside by the National Secretaries Association as Secretaries Week, and tomorrow, April 27, has been designated as Secretaries Day.

I would like to take this opportunity to pay my own tribute to the members of the secretarial profession, and I would like to signal out for special recognition the very dedicated and devoted secretaries who work in my congressional office here in Washington and in my district office in Philadelphia.

These are the people, Mr. Speaker, who day in and day out, provide the essential support services without which we, as Members of the Congress, simply could not function efficiently. They are the dedicated public servants who care about the problems of our constituents and who expedite the incredible flow of work which daily crosses our desks.

I, for one, could not get along without these invaluable people, Mr. Speaker, and I am pleased to have the opportunity, even in this small way, to say "thank you" to the secretaries who give such dedicated service each day of the year.

PRESIDENT'S ENERGY PROGRAM

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 26, 1977

Mr. DERWINSKI. Mr. Speaker, reaction is coming from across the country to Mr. Carter's energy package, and the first reports show far more pessimism and disfavor than optimism and support

Mr. Carter's energy plan is analyzed in twin editorials appearing in the April 22, Chicago Tribune. I insert these articles for the attention of the Members:

ENERGY: TOO LITTLE ON SUPPLY

President Carter's proposals for a national energy policy rely too much on curbing demand and consumption and too little on increasing domestic supplies of natural gas and petroleum. The President should have called for the gradual deregulation not only of natural gas prices, as he promised in his campaign, but also of petroleum prices.

That would help achieve conservation by allowing prices more nearly to reflect the true cost of replacing present supplies. Market-oriented prices would also provide producers with the capital and the incentive for more drilling. A sensible policy would also insure that producers plow increased profits back into petroleum, natural gas, and other forms of energy production Profits not used for energy development could be taxed away.

Instead, Mr. Carter's plan would tax petroleum producers so as to raise prices to world levels—set by the foreign oil cartel—and would pass the revenues on to the government, which would then return part of them to the public through rebates. That is backwards, since it is neither the government nor the public that needs the money for exploration and drilling. The Carter proposal is regressive also on natural gas. It would regulate the heretofore unregulated intrastate price and do little to increase supplies.

The demand side of the President's scheme, on the other hand, has several good elements. Taxing gasoline, "gas guzzling" autos, and other energy-inefficient machines and appliances might succeed in restricting the growth in U.S. demand for energy. It might insure a little more time than will perhaps actually be needed to bring into use energy sources to replace finite supplies of petroleum and natural gas. That would be desirable for this nation's economy.

But the program is so one-sided as to be self-defeating. It contemplates stiff taxes to conserve gasoline, but nowhere suggests that the resulting revenues might be used to improve alternatives to the highway—such as mass transit—or railroad trackage.

But very likely the chief failing of Mr. Carter's plan is that, by concentrating so heavily on holding down demand rather than increasing supply, it may end up paradoxically making us even more dependent on foreign energy sources. That could drive up the cost of nearly everything and could jeopardize our economic growth without the compensating promise of increased domestic oil and gas supplies.

. . . AND A BIGGER BUREAUCRACY

Thanks to what appears to be a paranoid fear of the free market, the Carter administration has produced an energy bill that would not only do little to encourage the development of new sources of energy, but would inevitably depend for enforcement on a gigantic, costly, and oppressive new bureaucracy.

And so we find an administration which was elected on a promise to streamline the federal government proposing a plan which would have the very opposite effect. In fact, the White House staff has already grown by about 30 per cent since Mr. Carter took office.

Oh, we know that Mr. Schlesinger, the federal energy administrator, and other White House spokesmen deny that a new bureaucracy would be required. But if there is not to be an increase, then how are all the new controls going to be policed?

To say that a bigger bureuacracy won't be necessary is to suggest that the new controls won't really be enforced at all—that people will go through all of the prescribed motions and fill out all of the required forms and that their work will then be filed away in warehouses, never to be seen again, or perhaps even thrown away like the dividend reporting forms which corporations have been submitting to the Internal Revenue Service at great expense.

Instead of moving toward the free market, as industry and most sensible economists have been urging, the Carter administration is inviting the worst of both worlds: tough and politically unpopular conservation measures plus tough and unpopular controls which may end up making the conservation measures futile.

For example, Mr. Carter is not calling for the deregulation of the price of natural gas, even though he once promised to do so. On the contrary, he is calling for a new ceiling on the price of gas which, though higher than the present one, links the price of gas to the price of fuel oil and applies the new ceiling to gas sold within the producing state as well as beyond its borders. Does anybody seriously believe this can be enforced without thousands of new payrollers?

Similarly, the incentive to produce new oil is based not on the free market, but on another intricate formula based on world prices. Who would police this? And who would police the complicated schedule of taxes and rebates attending the purchase of new cars, based on the fuel consumption of the cars? Who would determine the fuel consumption?

We're told that much of the suffering caused by higher fuel prices would be offset by higher credits for the poor on income tax returns and by direct payments to those who don't file income taxes. This sounds alarmingly like a reincarnation of the late and unlamented tax rebate—a scheme to distribute alms about the country without any apparent relationship to whether the beneficiaries pay for gasoline or heating oil.

In short, Mr. Carter has called coura-

geously for temporary sacrifices and would now impose a new array of agencies and controls whose long run effect, we suspect, would be to make those sacrifices permanent. And once again, the country is asked to suffer in order to gratify the ego of planners who think they can outsmart the free market.

SECRETARIES WEEK

HON. BOB ECKHARDT

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 26, 1977

Mr. ECKHARDT. Mr. Speaker, April 24–30, 1977, is being observed nationwide as Secretaries Week, with Wednesday, April 27, being highlighted as Secretaries Day. The National Secretaries Association—International—in cooperation with the U.S. Department of Commerce, originated Secretaries Week in 1952 to bring recognition to all secretaries and to inform the public of the secretary's contribution to the educational, professional, and civic growth of the community.

The National Secretaries Association—International—a nonprofit association with chapters throughout the United States, Puerto Rico, Canada, and many other countries, is the world's leading organization for secretaries. One of its major programs is the certified professional secretary program. In order to attain the CPS designation, the secretary must successfully complete a 2-day certifying examination in six important areas: First, environmental relationships in business; second, business and public policy; third, economics of management; fourth, financial analysis and the mathematics of business; fifth, communications and decisionmaking; and sixth, office procedures.

I wish to acknowledge the dedicated work of the secretaries in my own office—including a certified professional secretary—and also to pay tribute to secretaries everywhere for their vital role in business, industry, education, government, and the professions.

Secretaries Week is officially acknowledged by Federal, State, and municipal governments, by the issuance of official proclamations. Mayor Walter E. Washington has issued the following proclamation:

A PROCLAMATION BY THE MAYOR OF THE DISTRICT OF COLUMBIA

Whereas, the Capital and District of Columbia Chapters of the National Secretaries Association (International) together with other chapters throughout the nation are observing April 24–30, 1977 as "Secretaries Week"; and

Whereas, in keeping with the best tradition of their profession, secretaries continue to accept vital responsibilities and are performing important roles in commerce, industry and government; and

Whereas, professional development for secretaries should be stressed to remind the secretary of benefits from continued education, and to remind the employer he will gain a better qualified secretary; and

Whereas, to honor the secretaries now doing their jobs diligently and to encourage others to enter this worthy career, it is essential that rightful recognition be given them:

Now, Therefore, I, the Mayor of the District of Columbia, do hereby proclaim the week of April 24–30, 1977 as "Secretaries Week" in Washington, D.C. and ask that all employers in business, industry and government join with me in honoring and giving due recognition to this dedicated group of people, paying special attention to "Secretaries Day" on April 27, 1977.

WALTER E. WASHINGTON,
Mayor, District of Columbia.

In addition, President Jimmy Carter has issued a special message which states:

SECRETARIES WEEK, 1977

Secretaries are a mainstay of both business and government. On their skills, accuracy and discretion depend countless daily decisions that affect the success and quality of service provided in both the public and private sectors.

This Week gives all of us a splendid opportunity to applaud the individuals who pursue this fine career and to recognize their indispensable contribution to so many facets of our national life.

JIMMY CARTER.

SUPPORT FOR NEW INDIAN GOVERNMENT URGED

HON. DONALD M. FRASER

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 26, 1977

Mr. FRASER. Mr. Speaker, a group of 46 House Members have urged that the United States demonstrate its support for the new Government of India.

In a letter to President Carter, we wrote that U.S. support of the new Indian Government would give "tangible expression to the positive side of our commitment to human rights."

We told the President that a demonstration of U.S. support was warranted in view of the peaceful transfer of power to a new political group that intends to respect the rights of the Indian people.

The text of the letter follows with a list of the Members who endorsed its sentiments:

DEAR MR. PRESIDENT: We welcome your concern for human rights as an important ingredient in American foreign policy.

In the past, Congress has sought to express its concern over serious human rights violations by calling for limitations on assistance to governments committing such violations. We believe, however, that it is equally important to affirm our support for those governments that demonstrate a strong concern for human rights and hold power based on the exercise of the right of the people to select their own government.

In this connection, we invite your attention to the nation of India. India has been governed by one party for 18 years and for the last 19 months experienced a significant loss of democratic rights. However, as a result of the recent election in India, it appears that a peaceful transfer of power to a new political group has been achieved and that the new government intends to fully respect the rights of the people of India.

Under these circumstances, we believe the U.S. government should evidence its willingness to give support to the new government. This would give tangible expression to the positive side of our commitment to human rights and would underscore your inaugural pledge that the U.S. will give "preference to those nations which share with us an abiding respect for individual human rights."

India continues to face major challenges in its development efforts. Its per capita income is $150. Its population of 600 million accounts for 60% of the total population of noncommunist nations under $200 per capita G.N.P.

We will fully support action by the Administration that demonstrates support for nations such as India that share with us "an abiding respect for individual human rights."

Sincerely,

Donald M. Fraser, Henry S. Reuss, Paul Simon, Edward I. Koch, Tom Harkin, William M. Brodhead, Joe Moakley, Shirley Chisholm, Paul N. McCloskey, Jr., Barbara A. Mikulski,

Parren J. Mitchell, Melvin Price, James C. Corman, Millicent Fenwick, John J. LaFalce, John J. Cavanaugh, Leon E. Panetta, Stephen J. Solarz, Michael Harrington, Richard L. Ottinger,

Benjamin S. Rosenthal, Robert F. Drinan, Abner J. Mikva, Thomas J. Downey, Jerry M. Patterson, Gladys Noon Spellman, Elizabeth Holtzman, Don Edwards,

James L. Oberstar, Bob Carr, James Weaver, Peter H. Kostmayer, Ralph H. Metcalfe, Edward W. Pattison, Fortney H. (Pete) Stark, Anthony C. Beilenson, Robert N. C. Nix,

Paul Findley, Jonathan B. Bingham, Christopher J. Dodd, Paul E. Tsongas, Lloyd Meeds, Newton I. Steers, Jr., Les AuCoin, Bruce F. Vento, and Berkley Bedell.

TRIBUTE TO ANTHONY "TONY" ADDUCI

HON. MORGAN F. MURPHY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 26, 1977

Mr. MURPHY of Illinois. Mr. Speaker, I would like to pay tribute to one of Chicago's outstanding political figures, Anthony "Tony" Adduci, who died at the age of 63 on April 6, 1977.

Tony Adduci devoted over 45 years of his life to the Democratic Party, serving for 29 years as the party's ninth ward secretary, and then as administrative aide to the water commissioner.

Tony Adduci's career in the Democratic Party dates back to the 1930's, when the ninth ward was a Republican stronghold. Through skill, persistence, and devoted service to people, Tony Adduci turned the ninth ward into one of the Democratic Party's most reliable areas for support.

Tony Adduci's success as an organizer was due to a single-minded principle: serve the people. He constantly reminded politicians who ran in the ward of this simple, but important, principle.

Mr. Speaker, the loss of Tony Adduci is felt by his family, his many friends, by the Democratic Party, and by the people of Chicago. Mayor Bilandic recently paid tribute to Tony Adduci in these words: "He never failed to help me." The mayor's words neatly sum up the feelings of those who came to know Tony Adduci. He will be missed by all of us.

DRUG TRAFFICKING: A NEW TECHNIQUE

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 26, 1977

Mr. RANGEL. Mr. Speaker, as the representative from Harlem, the largest drug-prone community in the country, I have often been appalled by the methods used by our Nation's drug peddlers. This latest form of pushing the narcotics highlights quite clearly the need for action in this area.

Recently while I was in the district, community residents informed me of the way in which this system works. Juveniles are used as couriers, as they are known on the streets. These youths are used by the veteran pushers as peddlers to avoid the latter's prosecution under New York's strict narcotics law. As a result these youths become seasoned to the drug world before they reach their 16th birthday.

We as elected officials cannot allow this practice to continue. Our children must be insulated from this cancer. I urge my colleagues to carefully review the article from the New York Post of April 8 which I have inserted. Those committees that have jurisdiction over the narcotics issue must move and move expeditiously in order that this problem does not allow our children to be used as pawns in the pusher's pursuit of profit. The article follows:

SIX-YEAR-OLDS RUN DRUGS—IT KEEPS HEAT OFF PUSHERS

(By John L. Mitchell)

The drug pushers of Harlem have enlisted kids as young as six as their couriers.

According to police and community sources, the couriers—called "holders" or "runners"—are paid up to $300 a week to carry large amounts of concealed heroin within eyesight of the pusher.

In this way the older pushers—many of whom could be prosecuted as adults under strict state laws—can circumvent the mandatory life sentence for possessing or selling large quantities of heroin.

The Post last month revealed that young teens had entered the packaging and processing level of the drug hierarchy in a similar attempt to beat adult drug laws.

Yesterday afternoon police arrested an 11-year-old boy, accused of selling heroin, with his 18-year-old "boss" in an apartment in Harlem's notorious drug "marketplace."

Police said they seized 2.7 pounds of heroin—$19,000—and $1357 in cash.

It was the largest catch in a four-month crackdown on Harlem drug trafficking along Eighth Av.

"It's not rare. We arrest them that young every day," said Joseph Garcia, one of the arresting officers. "Yesterday we arrested a 12-year-old and a 13-year-old for possessing drugs.

"We've arrested them as young as 6," Garcia said.

HOLD THE DROPS

"As long as they're kids (under 16) and can walk and talk sensibly, the older pushers have them holding the drops on the street," he said.

"You'll never find one of the older pushers holding more than 'misdemeanor weight.'" Garcia said. Because their young helpers are treated as juvenile delinquents, charges against them don't specify whether they were selling or merely possessing the drug.

Another cop, an undercover officer who buys drugs on the street and then arrests the seller, told of a recent meeting with a pusher in a Harlem tenement hallway.

He asked the pusher for two bundles—each with 25 $10 bags. The pusher didn't have that much and called to a girl jumping rope with friends in the street.

She came inside the hallway, the officer recalled. "What do you want," she asked. "How much do you have on you," the pusher asked.

The girl rolled up her sweater sleeves and revealed seven bundles taped to her right arm and five to her left. The pusher took what he needed and the girl went back to jumping rope.

"She was no older than nine," the cop said. "It didn't seem like she knew it was drugs. It was something she was holding and she would get paid for it later."

In many cases the youths' parents encourage or quietly acquiesce to their children's activities, police and community sources told The Post.

One cop, who requested anonymity, recently arrested a nine-year-old boy and accused him of selling heroin. The boy had $1600 on him.

Called to the precinct stationhouse and informed about the money, the boy's mother said, "I told you to pay that furniture bill."

According to Garcia, the youths become "holders" because of the fast money and the prestige they receive on the block for being associated with the pushers.

But once they're part of the operation, Garcia said, "they're often threatened or beaten up to remain in—or just not to talk."

The alleged boss of the 11-year-old arrested yesterday was identified by police as Ronald Cherebin. Cherebin lives in an apartment at 262 W. 115th St. where drugs were being processed for street sale, police said.

SPOTTED FROM ROOF

Officers Garcia and James Woods spotted the 11-year-old pusher from a rooftop surveillance post after chasing a group of addicts loitering. They waited and watched the boy make several trips into the building.

The boy delivered the dope to customers and then Cherebin collected the money—Cherebin was charged with possession and sale of dangerous drugs, and impairing the morals of a minor.

The boy was arrested as a juvenile and released to his mother.

CIVIL RIGHTS FOR THE HANDICAPPED

HON. EDWARD P. BEARD

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 26, 1977

Mr. BEARD of Rhode Island. Mr. Speaker, I am introducing a bill today that would eliminate discrimination against handicapped persons in their search for jobs. I think it is about time the Civil Rights Act should be made to apply to handicapped persons. The whole country knows that the handicapped can provide good skills in many businesses and industries, that they have had an excellent record of attendance and are reliable. There are some industries that have made a practice of hiring skilled handicapped persons—some have even instituted training programs. All these enlightened industries report the splendid results. However, discrimination still prevents many from getting jobs and still more are excluded from training programs.

This bill would amend the Civil Rights Act of 1964 to extend the equal opportunity provision so that employment discrimination against the handicapped would be unlawful.

AMERICAN AGRICULTURE CANNOT AFFORD CHEAPER FOOD

HON. CHARLES E. GRASSLEY

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 26, 1977

Mr. GRASSLEY. Mr. Speaker, from time to time some self-appointed "consumer interest" group comes along and continues to foster the misconception that American food is expensive and that the consumer deserves "cheap" food. Well, as those of use who come from agricultural States know, American food is cheap. The only way it could be any less expensive would be to knock out the middlemen, the retailers, and the butchers—all of whom are consumers in their own right.

A recent editorial in the April 1977 edition of Beef explains the dangers these "consumer interest" groups pose to the agriculture industry.

I would like to share it with my colleagues:

NEW "FOOD POLICY" REPORT OVERLOOKS PAST EXPERIENCES

Muddle-headed thinking about agriculture isn't the exclusive domain of government bureaucrats and leaders, as proven by a report published by a private group a few weeks ago.

Entitled "Toward a National Food Policy," the report is the work of Joe Belden and Gregg Forte, members of a privately sponsored organization known as the Exploratory Project for Economic Alternatives.

The 228-page report contains a series of frightening recommendations and proposals as to how agriculture should be handled. In essence, the report seeks complete dominance of agriculture by the federal government.

Although past history has vividly demonstrated the chaos that is created when government intervenes too greatly in the affairs of agriculture, the report blithely ignores past bitter experience.

The basic premise of the report is that Americans should be guaranteed cheap food and that the federal treasury should be tapped for some $12 to $15 billion annually to hold down food price inflation and also to subsidize small farmers with direct payments to keep them in business.

According to the theory of the authors, this revenue would come by revising present income tax laws so that the top 25 percent of the taxpayers would foot the bill.

A key point in the report is that such crops as wheat and soybeans would be handled by "a publicly-controlled marketing agency similar to the Canadian Wheat Board."

The report says, "The board, in essence, would buy the domestic crop at guaranteed floor prices, sell it to domestic processors at guaranteed ceiling prices and market the remainder abroad at world prices.

"The initial payment to farmers would then be supplemented by proceeds from domestic and foreign sales and with direct payments from the government."

If this plan was followed the report authors conclude that, "Consumers need no longer be victimized by sudden high-volume private sales of grain or other foods to desperate foreign buyers."

If the writers of the report had taken time to study the workings of the Canadian Wheat Board they would have quickly found out that the system just doesn't work all that well and it is far from a panacea.

They also bring up another windmill to tilt at in the form of the old argument that Americans eat too much meat and grain should be used for people rather than "wasted" on feeding cattle.

"American cattle feeding lots now use valuable grain that could contribute to international emergency relief. Feedlots are heavy polluters and grain-fed beef is much higher in cholesterol than is meat from range-fed cattle," says the report.

"Therefore, though taxes and direct restrictions and feedlot operations, and through the exclusion of feedlots from the benefits of grain price controls, the U.S. could shift grain to human consumption and increase the production of cheaper, more healthful range-fed cattle."

Obviously, the authors chose to disregard all the data and evidence science has presented that feeding grain to cattle is not wasteful nor is there a health hazard in eating grain-fed beef. It is equally obvious they have not studied the economics of range-fed cattle or sampled any milo or corn silage recently.

In another portion of the report there is a recommendation that the USDA, the Food and Drug Administartion, the Agency for International Development and the Environmental Protection Agency be combined to form a new Food and Agriculture Department.

"Primary emphasis in this new department should be given to the needs and rights of the 100 percent of us who consume farm products," the report states.

The Exploratory Project for Economic Alternatives said the report wasn't its final conclusion on U.S. food policy and that, "It is being released to share the information and analysis with interested fellow citizens and to elicit comment and criticism."

You can do that by writing the group at 1519 Connecticut Ave., NW., Washington, D.C. 20036.

The best thing that can happen to this report is that it be consigned to molder away in some file cabinet and forever be forgotten.

GEORGE MAVROMATIS HONORED AS "BLUE COAT OF THE YEAR"

HON. DOUGLAS APPLEGATE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 26, 1977

Mr. APPLEGATE. Mr. Speaker, on Thursday, April 21, 1977, the Steubenville, Ohio, Council No. 472 of the Knights of Columbus presented their annual "Blue Coat of the Year" award to George Mavromatis, chief of police in Steubenville.

This award is given to the individual who best exemplifies the qualities and attributes of our "men in blue." Any policeman, fireman, or other public servant whose responsibility it is to protect our citizenry, is eligible for the award.

Chief Mavromatis has served the Steubenville Police Department for over 31 years, being selected as chief of police on January 1, 1969. He also serves as immediate past president of the Ohio Police Chief's Association as he was president in 1975–76. His record of public service is uncommonly fine.

We should all be proud of men and women with the kind of loyalty, dedication, and fairness that Chief Mavromatis possesses.

CONGRESSIONAL BENEFITS

HON. MILLICENT FENWICK

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 26, 1977

Mrs. FENWICK. Mr. Speaker, in February, the House approved a resolution adopting a strict new code of ethics for Members of the House. Recently, the House approved an amendment which will require a recorded vote to approve congressional pay increases. These changes are important, and I supported them. I hope they signify a new spirit of openness in Congress which will help restore the public trust in elected officials. But there is still more to be done.

Members can still vote themselves a pay raise which takes effect immediately. This is also true of office expense allotments and any number of other emoluments. Members of Congress are in a very delicate position because we are frequently asked to vote for a measure that will benefit us directly, whether it be a pay raise or a tax deduction. I think it would be easier and fairer if we could vote these benefits for future Congresses instead of ourselves. The effective date of benefits affecting Members directly, because of their status as Members of Congress, should be delayed. Members would have to stand for election before they could benefit.

I have joined a large number of my colleagues in introducing and cosponsoring legislation to delay the effective date of pay raises for Members of Congress. Today I am introducing legislation which would apply that philosophy to other benefits as well. The bill applies only to financial benefits "specifically applicable to Members of Congress or officers of the Congress." The text of the bill follows:

H.R. 6623

A bill to provide that increases in rates of pay for Members of Congress, and other financial benefits specifically applicable to Members of Congress, may take effect only if approved by the Congress and deferred until the beginning of the following Congress

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) notwithstanding any other law, any increase in the rate of pay for Members of Congress or officers of the Congress, and the adoption of or increase in any other financial benefit specifically applicable to Members of Congress or officers of the Congress, shall not take effect unless—

(1) such increase or benefit is established by Federal statute, and, in the case of any such increase or benefit which takes effect by reason of administrative action under any such statute, is specifically approved by each House of the Congress by resolution adopted by recorded vote; and

(2) such increase or benefit does not take effect before the first day of the Congress following the Congress in which the enactment of such statute or the adoption of such resolution, as the case may be, occurs.

(b) For purposes of subsection (a), any statute enacted or resolution adopted in any Congress during the period which begins on the Tuesday following the first Monday in November in any even-numbered year and ends at noon on the following January third shall be considered to be enacted or adopted, as the case may be, during the first session of the following Congress.

(c) For purposes of subsection (a)—

(1) the term "Member of Congress" means a Senator or Representative in, or Delegate or Resident Commissioner to, the Congress; and

(2) the term "officer of the Congress" means the President pro tempore of the Senate, the Speaker of the House of Representatives, the majority and minority leaders of the Senate and the House, and any Member of Congress holding any office in the Senate or the House who, by reason of holding such office, receives a rate of pay in excess of that which such Member would otherwise receive as a Member of Congress.

SEC. 2. No law enacted after the date of the enactment of this Act shall supersede this Act unless it does so in specific terms, referring to this Act, and declaring that such law supersedes the provisions of this Act.

MEDICAL FREEDOM OF CHOICE

HON. STEVEN D. SYMMS

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 26, 1977

Mr. SYMMS. Mr. Speaker, in today's Democratic Study Group Staff Bulletin the Honorable SHIRLEY CHISHOLM entered a letter regarding the medical freedom of choice bill, H.R. 54, in the constituent mail responses section.

I thank Mrs. CHISHOLM for entering the letter in the DSG Bulletin and I urge my colleagues to study her statement. There is no question that the American public is being denied access to many new, lifesaving drugs as a result of the excessive regulations of the Food and Drug Administration.

To date, 92 Members of Congress have cosponsored the medical freedom of choice bill. The cosponsors represent both political parties and all political philosophies. I hope that more of my colleagues will join in the effort to return the regulation of drugs in our country to a commonsense, practical approach by cosponsoring the medical freedom of choice bill.

Representative CHISHOLM's letter follows:

MEDICAL FREEDOM OF CHOICE BILL AND THE DRUG EFFICACY REQUIREMENTS

(Text of a letter by Representative CHISHOLM)

Thank you very much for your recent letter supporting the Medical Freedom of Choice bill, H.R. 54, which would repeal the "efficacy" provisions in existing Food, Drug and Cosmetic law. I truly appreciate your support and I am pleased to report that I am a cosponsor of the bill.

Naturally, everyone would like to see that all drugs on the marketplace are effective, but 15 years of experience and billions of dollars have shown very clearly that the 1962 Amendments to the Food, Drug and

Cosmetic Act have not helped achieve that goal. In fact, they have considerably harmed the American consumer. As Professor Sam Peltzman so succinctly stated in his book Regulation of Pharmaceutical Innovation: The 1962 Amendments, "If the Food, Drug and Cosmetics Act was intended to benefit consumers, the inescapable conclusion to which this study points is that the intent is better served by reversion to the status quo ante 1962."

There is overwhelming economic and medical evidence that the American people are being denied access to many drugs now in wide use in other countries for the treatment of serious diseases because of controversy over the efficacy of the drugs alone. It is our belief that so long as a drug is proven safe, and is properly labeled regarding all possible efficacy, it should be made available to patients and physicians who wish to use it.

In addition to the basic question of the rights of individuals to exercise freedom of choice of safe medical treatment, there is considerable evidence that internal problems at FDA and overly stringent proof requirements under the law have made it virtually impossible to meet efficacy standards in a timely fashion. Hence, this country suffers from a "drug lag" as compared to other developed nations.

As our drug regulatory system is now structured, medical freedom of choice is available only to those wealthy enough to travel outside the country to obtain treatment with drugs banned in this country. The situation is serious enough that the following statement appeared in the highly respected New England Journal of Medicine: "On the basis of past experience, years will pass before beclomethasone will be approved by the Food and Drug Administration (FDA). Needlessly, during this period many children will be stunted in growth, and adults will suffer spinal fractures. In the patient's best interest, the physician must advise leaving the country or obtaining the drug illegally." It is truly alarming that this is far from an isolated example and that this is what the 1962 Amendments have brought us to.

I have supported the Medical Freedom of Choice bill because of its pro-consumer, anti-monopoly nature. Professor Peltzman concluded: "Treated as a group, consumers seem clearly to have lost on balance from the Amendments . . . The measurable effects (of the 1962 Amendments) add up to a net loss of $250 to $350 million, or about 6% of total drug sales." The New England Journal of Medicine states: "The introduction of new drugs has become extremely expensive, preventing development of drugs for less common indications. Because smaller companies cannot afford to spend several million dollars for the cost of an FDA review large companies gain a monopolistic position and can maintain high prices."

It has been suggested that the public has neither the time nor the training to make scientific determinations as to the effectiveness of drugs. I think there is no question that the majority of doctors have a better idea of the value of drugs than the FDA, particularly when one reviews the recent statements of Dr. Richard Crout, Director of the Bureau of Drugs: "I can tell you that in my first year at the FDA—even actually longer than that, 1972, 1973—going to certain kinds of meetings was an extraordinarily peculiar kind of exercise. People—I'm talking about division directors and their staffs—would engage in a kind of behavior that invited insubordination: People tittered in the corners, throwing spitballs—now I'm describing physicians; people would slouch down in their chair and not respond to questions; and moan-and-groan, the sleeping gestures. This was a kind of behavior I have not seen in any other institution from a grown man. . . . FDA has a long-term problem with the recruitment of personnel, good scientific personnel. . . . It is a fundamental societal concern as to whether, over the long term, FDA can operate solely with an in-house staff, or what the role of the advisory committees will be, because I don't think we will ever solve the problem of a totally strong in-house staff." (Emphasis added)

I hope that I have provided you with some valuable information on this bill. Thank you, again, for your interest and support.

GARDENING IN NEW YORK CITY

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 26, 1977

Mr. BROWN of California. Mr. Speaker, spring is here and gardens are being planted in many backyards and available plots. But many of our urban dwellers do not have access to land even if they have the spirit for planting and growing their food. It is time to start using our many acres of barren, ugly city plots for the production of green, fresh vegetables.

Our distinguished colleague, the gentleman from New York, FRED RICHMOND has been doing just that. Two years ago he began pushing for funds and technical assistance by the Department of Agriculture's Extension Service for gardening projects in six major cities, including New York; $1.5 million was appropriated in the fiscal year 1976 budget.

Since that time, FRED has been insuring the rapid implementation of this program in New York City. Land in this city which was just a collection of eyesores is now being leveled and prepared for planting; novice gardeners are learning pointers about soil tilth, watering and proper care. I commend the gentleman from New York for his excellent achievements. I have long been a supporter of gardening and I find such progress extremely encouraging.

What better use of the public money than to have people working with the soil, learning about nature and its many cycles and frustrations, enjoying the sunshine and the cloudy days, and producing a little food that is tastier and healthier than most of that which is found in the local markets?

The following article, which I include in the RECORD, that appeared in today's New York Times, summarizes the progress and achievements of this gardening project. I hope my colleagues will review it and that those with urban districts will encourage such self-sufficient efforts:

ONE THOUSAND "FARMS" PLANNED ON LOTS IN NEW YORK

(By Murray Schumach)

Garbage-littered lots, many of them in the worst sections of New York City, will become vegetable gardens under a program to green the city by creating a thousand farms in low-income neighborhoods.

Residents of these areas, mostly young people, but some of them elderly, will do the farming—and keep the food—under the guidance of experts with the Cornell University Cooperative. The program is financed with $500,000 from the Federal Department of Agriculture.

"The whole idea," said Albert Harris, who heads the Cornell staff, "will be to let the people in the communities do the work. It will be their gardens. We will act as consultants."

The Cornell staff will supply expertise on soil and how to improve it. The program will provide tools and fertilizer, and will pay for the rental of any necessary vehicles.

"We are not getting involved in flower gardens," said John Ameroso, who will represent Cornell with Brooklyn community groups.

In the Bedford-Stuyvesant section of Brooklyn, Joan Edwards, the executive director of the Magnolia Tree Earth Center, which has been successful in working with community groups in creating vegetable gardens in littered lots, was enthusiastic about the program.

"We will not only be able to have more gardens in our own area," she said, "we may be able to expand the work into other parts of Brooklyn."

In the South Bronx, Jack Flanagan, the director of operations for the Bronx Frontier Development Corporation, said 25 community groups in the area were already interested in the program.

"We will be the liaison between the communities and Cornell," he said. "We don't want to build expectations too high, but it seems an excellent idea."

At the Queens Botanical Garden—the Cornell group is also working with the city's botanical gardens on this project—Diana Miller, community liaison, said:

"We will be meeting with community groups next month. I've already had requests from community groups, and we've been meeting with people from Cornell. This program has a tremendous potential."

Experts in nutrition are equally pleased with the program. Joan Dye Gussow, associate professor of nutrition and education, who directs a program in nutrition at Teacher's College of Columbia University, said:

"I think it's a terrific idea. When you've grown a vegetable it's hard not to eat it. I think a lot of people have stopped eating vegetables because they've forgotten what fresh vegetables taste like."

PROGRAM BEGINS MAY 8

The program is scheduled to begin officially on May 8, at a large lot in Brooklyn on Baltic Street, from Fourth to Fifth Avenue, where a sort of neighborhood garbage dump is to be converted this summer into a community vegetable farm.

However, preliminary work has already begun there, with youngsters clearing the ground to get the earth ready for the seeds.

In this, and all other vegetable gardens in the program, the community will get the food. Cornell will have nutrition and agricultural experts available for the community workers, who may be undecided about which crop to plant.

One reason the official opening will be in Brooklyn is that one of the main sponsors of the Congressional legislation that made this program possible was Representative Fred W. Richmond of Brooklyn, a member of the Appropriations subcommittee of the House Appropriations Committee.

Five other cities will have similar programs this summer under the legislation that will call for an expenditure of $1.5 million. The other cities are Los Angeles, Chicago, Philadelphia, Detroit and Houston.

"This is a step to improve urban blight," Representative Richmond said. "There are lots of areas that are just rubble, and nothing is being done about it. The people who work on such projects will feel a pride in their community. We are relating a Federal growing program to New York City."

In recent years, a number of community groups in New York have tried converting lots into vegetable or flower gardens. Many have failed—some because of vandalism, others because of indifference—but some have been very successful.

For instance, last year, under the auspices of the Magnolia Tree Earth Center, a block association was so successful in growing vegetables in what had been just another cluttered lot on East 95th Street that it won a $500 prize awarded by Molly Parnis for the best such garden in Brooklyn.

The urban farmers according to the Magnolia Earth Center, have decided to spend the money to beautify the garden.

The Cornell group conducted a pilot project last summer with 11 lots. The results were promising. Only two of the projects were absolute failures and the rest had varying degrees of success.

The average farm in last summer's experiment by Cornell was 1,800 square feet, and the farmers included 135 adults and 283 youngsters. The successful farms, the Cornell study showed, had good yields of tomatoes, peppers, radishes, collard greens, zuchini, egg plant and an assortment of beans.

SOIL IS REPORTED ACID

Mr. Ameroso, who was in charge of last year's pilot project, said most soil in city lots was "pretty acid." He said it was worse where the lots had been covered by brick buildings than where they once supported wooden houses.

"In cases where there were brick buildings that were abandoned and razed," he said, "we may have to bring top soil. In many cases we will probably just have to add lime. Lime is not expensive. You can cover one of these lots for $2 worth of lime."

Last summer's experience showed that urban farmers tend to be stingy with water. They see the ground is wet and assume that is enough.

"We will be holding classes with them in the fields or at community centers," Mr. Ameroso said. "They will learn how to poke their hands or a stick into the earth to see that the water has gone 12 inches or so."

Mr. Harris said some community groups were planning to plant a single crop because it would be easier to share among the farmers—or to sell and share the proceeds.

"We hope, no matter what they plant," he said, "that they will realize what farmers have to do to grow a crop."

IN MEMORY OF BERNARDINO VACCARO

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 26, 1977

Mr. OTTINGER. Mr. Speaker, the Port Chester community was deeply saddened recently by the passing of Bernardino Vaccaro. A lovely tribute appeared in the Port Chester Daily Item, which I would like to share with my colleagues at this time:

A LOSS FOR ALL

The passing of Bernardino (Billie) Vaccaro is a sad loss, not only for the Vaccaro family but for the entire area as well.

Epitomizing the American dream, the immigrant from Italy was noted not only for his popular grocery store, but for the many charitable and civic endeovors that he and his family have been associated with.

Vaccaro's Supermarket has been a Post Chester fixture for more than 50 years and draws shoppers from all parts of the Sound Shore area. Founded by him and his wife, the little "mom and pop" grocery store has twice expanded, and now, under the direction of his sons, the Midland Avenue store will soon embark on a new expansion program.

It is sad to lose such a pillar of the community, but we know that the many good works of Bernardino Vaccaro accomplished in his lifetime will help ease the sorrow now being felt by his family, associates and friends.

The founder has died, but the tradition he fostered lives on.

COST OF MEDICARE CHRONIC KIDNEY DISEASE PROGRAM CLIMBS TO $1.9 BILLION BY 1982

HON. CHARLES A. VANIK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 26, 1977

Mr. VANIK. Mr. Speaker, during the 94th Congress, the Ways and Means Oversight Subcommittee conducted an extensive study of the medicare chronic kidney disease program. During our work in 1975, we were told by HEW that the cost of the program might amount to as much as $1 billion for the treatment of some 70,000 patients in the year 1984. By early 1976, we were receiving warnings that the program could cost as much as $1.7 billion by 1990.

Health Subcommittee Chairman ROSTENKOWSKI and I have just received a new report from the Social Security Actuary that the cost of the program is now estimated at $1.9 billion by 1982, $3.6 billion by 1987, and $6.3 billion by 1992. In general, these enormous increases in costs are due to the high rate of inflation in the health sector and the fact that more people are being treating successfully for chronic kidney disease. Nevertheless, the fact remains that we must find ways to reduce the staggering costs of this program. If we cannot control costs in the case of this one small program treating one disease, then we cannot even begin to consider national health insurance or coverage for other catastrophic diseases.

We must control costs in this program—even if it means directing physicians and patients who are currently using expensive modes of treatment to use less expensive but equally sound methods of treatment.

Earlier this year, Chairman ROSTENKOWSKI and I introduced legislation designed to control the costs in the kidney disease program without reducing the quality of care provided to patients. This legislation (H.R. 3112) was the subject of hearings on Monday, April 25.

Basically, the bill encourages kidney transplants and kidney dialysis in a home setting as ways of reducing program costs. While there is some disagreement with the bill, the subcommittee received a wide range of testimony from physicians and patients, many of whom described the benefits of home dialysis and ways to encourage greater use of home dialysis—a form of treatment that is approximately one-third as expensive as other forms of therapy. I would like to enter in the RECORD at this point a statement by Mr. John Moore representing the Kolff Foundation of Cleveland, Ohio. This statement demonstrates some of the ways in which we can achieve major savings in this program:

We assume that House Bill 3112 is an effort to contain the costs caused by a very bad law which did an enormous amount of good for a very small segment of our population at great expense to the Government. Noting that the original estimate of 120 million dollars per year for the ESRD program has ballooned to 600 million dollars per year and will surely reach one billion dollars per year by 1980, something must be done to reverse the rising trend especially since this program is a reasonable facsimile of what to expect if national health insurance is enacted by expanding the same procedures governing ESRD.

In my humble judgement, ESRD costs have escalated for the following reasons:

(1) The complete failure of most of the health community to recognize any social or economic limiting factors in prescribing treatment modalities.

(2) The trend established almost immediately after the enactment of H.R. 1 in 1973, in many areas of the country, where home dialysis became a neglected treatment and center dialysis units were allowed to proliferate.

(3) Increasingly expensive artificial kidney machines and dialyzers were prescribed and justified through the use of the "Uncle Sam is paying for it, why worry syndrome" without valid medical reasons for the use of such equipment.

(4) Complex regulations and creation of overlapping agencies, with similar functions and the consequent increase in already burdensome paper work for hospitals, medical personnel and administrative personnel in all units providing dialysis services.

(5) The regrettable tendency for H.E.W. and Social Security to fund studies which become obsolete before they are finished. A four year study of dialyzers and a study to determine why more patients are not opting for home dialysis come to mind. The many thousands of dollars spent on useless projects like these could be much better applied to equipment which could greatly reduce dialysis costs in the next few years. I refer to such items as a wearable artificial kidney, smaller portable units, further miniaturization and the like.

Action on all of these fronts is needed now since their development will totally change present dialysis procedures.

I should like to establish the credentials for us to make such judgements without previous medical knowledge, except what might have been acquired by osmosis in a close connection with home dialysis kidney patients for some twelve years beginning with our involvement in a very minor way in procuring hardware for the kidney machine Dr. Willem Kolff produced at the Cleveland Clinic using a tub washing machine as a base. The finished product cost $950 and home patients using it made up their own dialyzers or filters at a cost of about $10 per dialysis. We might remark in passing that some of these patients are still alive, but have graduated to more sophisicated devices. At the time this was developed, an artificial kidney machine cost in the neighborhood of $10,000.

The Foundation's next project was a program to rent artificial kidney machines at between $50 to $65 per month to home dialysis patients. Some 50 such patients were assisted over a five year period. The main funding source was money borrowed at a Cleveland bank with the machines being used as security for five year chattel mortgages. It is worthy of note that none of our projects

to date have involved federal funding except the program we completed in September last to train dialysis aides, which was partially funded by CETA.

With the enactment of H.R. 1, we proposed to Medicare a per dialysis billing program, which removed most of the inequities in home patient dialysis coverage caused by provisions in prior regulations of Medicare enacted before the ESRD program was thought of. With the assistance and guidance of Phillip Jos and Matt Pionski of the Medicare Department of Social Security, this program began with seven home patients of the Cleveland Clinic in August of 1974 and now covers nearly 200 patients in ten states with some fifty more patients presently in process. Without going into the mechanics of our plan, it suffices to say that the billing for each dialysis covers the cost of the artificial kidney machine, its maintenance and repair, storage and transportation and reconditioning when necessary, when a patient no longer needs the device, and all the ancillary supplies necessary for each dialysis including the dialyzer and blood lines.

No patient is accepted on the plan without a prescription signed by his doctor which sets forth the type and make of dialyzer to be used, the type and make of artificial kidney machine and ancillary supplies needed for each dialysis, as well as indicating the supplier who will send these items on a regular basis to the home dialysis patients on the program.

Our chief concern has always been the welfare of home dialysis patients.

With this procedure in mind, we have acquired complete cost data from some 90 patients in 1976 who were on the program for a full year. Our study shows that the cost of dialyzers and ancillary supplies run from an average low of $43 to a high of $75 or more per dialysis, a cost variance, of $30 per treatment or $360 per month per patient. This cost variance, except in rare cases, cannot be medically justified. Second, artificial kidney machines cost from $2,000 to $6,000, this cost variance, except in rare cases cannot be medically justified.

Prescriptions for nearly all patients now being trained for home dialysis designate high priced dialyzers and artificial kidney machines. It is our belief that the criteria for selection of dialyzers and supplies for the home dialysis patients should be established with the idea of keeping the patient usefully, safely and comfortably alive.

Since we happen to be firmly committed to home dialysis as a preferred modality, second only to a successful kidney transplant, we feel that the criteria for all kidney patients should be examined, not only from the medical aspect, but with due consideration of the social and economic factors as well.

We also happen to believe that the average kidney patient has presently no influence at all in opting for a transplant, hospital dialysis, center dialysis, self care dialysis or home dialysis. Where nephrologists are firm believers that transplants should be the first choice, that procedure will be adopted. Where nephrologists have empty stations in a dialysis center, that treatment will be promoted. Where nephrologists are committed to home care or, to a lesser degree, self care, that will be the accepted modality. We have only to instance the Northwest Kidney Center in Seattle, Presbyterian University in Pittsburgh, MacMillan Hospital in Charleston, W. Va., St. Barnabas and Holy Name in New Jersey, Henry Ford in Detroit and Dr. Eli Friendman's program in New York, as instances of units where many home dialysis patients are being trained.

Florida and California which used to have a great number of patients at home, have dwindled to practically nothing. Home dialysis support programs in Pennsylvania supplementing the Medicare program, the very fine KDI program administered by Henry Bochner in New York, splendid assistance by the American Kidney Fund, many local kidney foundations, the UMWA, The United Labor Agency, Blue Cross and Blue Shield, some insurance companies and many industries both large and small have kept the home dialysis population from dwindling to almost nothing.

Having said all this, what do we feel about the provisions of H.B. 3112 which might reverse the trend to higher cost dialysis treatment modalities.

(1) Elimination of the ninety day waiting period would be a step in the right direction and extension of the after transplant coverage period is very necessary.

(2) An arbitrary quota system of 40 or 50% of future ESRD dialysis patients to be in self care or at home would only increase costs. Rigid restrictions on construction of further facilities for in center or hospital dialysis would help. I know of two recent cases where limited care centers have opened in close proximity to other centers which are not yet fully utilized.

(3) Elimination of many of the conflicting alphabets which presently have their fingers in the ESRD soup should be a must. I refer to HEW in Washington, Social Security in Baltimore, HEW regionals, SNCC's, HSA's, PSRO's ESRD medical review boards, and the ESRD regions as now constituted. By the time a project clears that group the need may have already been modified or vanished.

(4) Elimination or simplification of the gobble-de-gook now contained in the final regulations governing ERSD units, produced after two and one half years labor by the planning agencies in H.E.W. and Medicare. Most laymen would give up in utter bewilderment after the first several pages. I know of no way that the presence of a certain number of RN's, LPN's, a graduate social worker, even a nephrologist or two, guarantees quality care for the patient. Since the Lord made no two of us alike in His infinite wisdom and since we are dealing with people and not cards falling out of a computer, there are too many human factors to be considered which may well be beyond the competence of a many degreed RN, or a social worker or even a highly competent nephrologist. Neither do I think that the success of a transplant unit can be judged by the number of such operations performed.

One hundred percent coverage for home patients is not an answer, at least as far as our program is concerned. Using 100 as a factor, 96.5% of our patients were fully covered one way or another in 1975–76. What then can we do? First for starters, remove the financial disincentive which now favors doctors in hsopitals and dialysis centers so that home dialysis physicians are equally rewarded for their continued care of home patients and increasingly rewarded for the number of home patients they train.

Secondly, devise new rewards for the home patients themselves. One way would be to establish a maximum per year fee the government would allow for home dialysis with the indigent being allowed to keep any savings they realize. If environment is a limiting factor, relocate such patients in government housing affording them the highest priority. Get jobs for them if they are able to work. For those in higher income brackets, offer some tax incentives. For those making over $50,000 per year as showing in their tax reports, eliminate their coverage entirely. I purposely chose $50,000 so that Congressmen would still be covered.

Thirdly, study home dialysis patients who have been provided with dialysis aides for many years before Medicare coverage. Study self care in Seattle Washington. Dr. John Sullivan's unit in New York City, and Dr. Norman Deane's in Hawaii competent investigator can find out all he needs to know about any such procedures in less than a week without hiring an outside source to make a stratified random sampling, whatever that is.

Fourthly, I would be very remiss if I did not pay tribute to the staff at HEW. Struggling to implement regulations which they did not instigate, with little or no budget, they have performed a yeomans job in attempting to reconcile conflicting interests. I would also like to pay tribute to Dr's Schupak, Hampers and Hagar, who established a number of dialysis centers throughout this country well before the advent of H.R. 1. They now care for almost 25% of the dialysis population. It is rumored that they made some money but since when has profit been a dirty word in the American economic system. Incidentally most of these units dialyze on coils and a relatively inexpensive bedside monitoring system. Thus far no one has said the BMA patients are less well cared for than those using expensive dialyzers and monitoring equipment. Some years back Dr. Hampers assembles a monitoring system for home patients costing less than $1,000.00. What ever happened to it?

I want to thank the committee for allowing me to express my views and their patience in listening.

PREVAILING WAGE CONCEPT

HON. TOM HAGEDORN

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 26, 1977

Mr. HAGEDORN. Mr. Speaker, while the "prevailing wage" concept of the Davis-Bacon Act applies only to direct Federal construction, Congress has seen fit to extend its application to federally assisted construction on at least 80 occasions. In the past 4 years alone, we have extended its coverage on at least 17 occasions, invariably without comment or debate.

I would like to insert at this point in the RECORD a listing of legislation passed by Congress over the years which specifically incorporates the provisions of the Davis-Bacon Act. In each of these instances, we have imposed additional construction costs of at least 5 to 15 percent—estimated by the General Accounting Office—upon the States, local communities, or private institutions which have received the Federal assistance. In each of these instances, we have also insured that the ultimate program beneficiaries will have received fewer services or less extensive facilities than they would have in the absence of the Davis-Bacon Act. A study by the Wharton School of Business estimated in 1975 that the cumulative costs of Davis-Bacon were in the neighborhood of $20 billion.

I would ask my fellow Members of Congress to consider whether or not we can continue to exact this kind of fee on public construction projects so that highly paid building trades laborers can be subsidized at the expense of intended program beneficiaries. This, it should not be forgotten, is the basic result of Davis-Bacon.

The listing follows:

STATUTES RELATED TO DAVIS-BACON ACT REQUIRING PAYMENT OF WAGES AT RATES PREDETERMINED BY THE SECRETARY OF LABOR

1. The Davis-Bacon Act (secs. 1–7, 46 Stat. 1494, as amended; Public Law 74–403, 40 U.S.C. 276a–276a–7).

2. The Federal-Aid Highway Act of 1956 (sec. 108(b), 70 Stat. 378, recodified at 72 Stat. 895; 23 U.S.C. 113(a), as amended), see particularly the amendments in the Federal-Aid Highway Act of 1968 (Public Law 90–495, 62 Stat. 815).

3. National Housing Act (sec. 212 added to c. 847, 48 Stat. 1246 by sec. 14, 53 Stat. 807; 12 U.S.C. 1715c) and repeatedly amended.

4. Federal Airport Act (sec. 15, 60 Stat. 178; 49 U.S.C. 1114(b)).

5. Housing Act of 1949 (sec. 109, 63 Stat. 419, as amended; 42 U.S.C. 1459).

6. School Survey and Construction Act of 1950 (sec. 101, 72 Stat. 551, 20 U.S.C. 636(b)(1)(E), Public Law 85–620).

7. Defense Housing and Community Facilities and Services Act of 1951 (sec. 310, 65 Stat. 307, 42 U.S.C. 1592i).

8. U.S. Housing Act of 1937 (sec. 16, 50 Stat. 896, as amended; 42 U.S.C. 1416).

9. Federal Civil Defense Act of 1950 (sec. 3(c), 72 Stat. 533, 50 U.S.C. App. 2281, Public Law 85–606).

10. Health Professions Educational Assistance Act of 1963 (sec. 2(a), 77 Stat. 164; 42 U.S.C. 292d(c)(4) and 42 U.S.C. 293a(c)(5), Public Law 88–129).

11. Mental Retardation Facilities Construction Act (secs. 101, 122, 135; 77 Stat. 282, 284, 288; 42 U.S.C. 295(a)(2)(D), 2662(5), 2675(a)(5), Public Law 88–164).

12. Community Mental Health Centers Act (sec. 205, 77 Stat. 292; 42 U.S.C. 2685(a)(5), Public Law 88–164).

13. Higher Educational Facilities Act of 1963 (sec. 403, 77 Stat. 379; 20 U.S.C. 753, Public Law 88–204).

14. Vocational Educational Act of 1963 (sec. 7, 77 Stat. 408; 20 U.S.C. 35f, Public Law 88–210).

15. Library Services and Construction Act (sec. 7(a), 78 Stat. 13; 20 U.S.C. 355c(a)(4), Public Law 88–269).

16. Urban Mass Transportation Act of 1964 (sec. 10, 78 Stat. 307; 49 U.S.C. 1609, Public Law 88–365).

17. Economic Opportunity Act of 1964 (sec. 607, 78 Stat. 532; 42 U.S.C. 2947, Public Law 88–452).

18. Hospital Survey and Construction Act, as amended by the Hospital and Medical Facilities Amendments of 1964 (sec. 605(a)(5), 78 Stat. 453; 42 U.S.C. 291e(a)(5), Public Law 88–443).

19. Housing Act of 1964 (adds sec. 516(f) to Housing Act of 1949 by sec. 503, 78 Stat. 797; 42 U.S.C. 1486(f), Public Law 88–560).

20. Commercial Fisheries Research and Development Act of 1964 (sec. 7, 78 Stat. 199; 16 U.S.C. 779e(b), Public Law 88–309).

21. Nurse Training Act of 1964 (sec. 2, 78 Stat. 909; 42 U.S.C. 296a(b)(5), Public Law 88–581).

22. Appalachian Regional Development Act of 1965 (sec. 402, 79 Stat. 21; 40 U.S.C. App. 402, Public Law 90–103).

23. Act to provide Financial Assistance for Local Educational Agencies in areas affected by Federal activities (64 Stat. 1100, as amended by sec. 2, 79 Stat. 33; 20 U.S.C. 2411, Public Law 89–10).

24. Elementary and Secondary Education Act of 1965 (sec. 308, 79 Stat. 44; 20 U.S.C. 848, Public Law 89–10).

25. Cooperative Research Act of 1966 (sec. 4(c), added by sec. 403, Public Law 89–750, 79 Stat. 46; U.S.C. 332a(c)).

26. Housing Act of 1961 (sec. 707, added by sec. 907, 79 Stat. 496; 42 U.S.C. 1500c–3, Public Law 89–117).

27. Housing and Urban Development Act of 1965 (sec. 707, 79 Stat. 492; 42 U.S.C. 3107, Public Law 89–117).

79. Health Professions Educational Assistance Act (Public Law 94–484, 90 Stat. 2243).

80. Urban Mass Transportation Act (Public Law 88–365, 78 Stat. 302).

81. Disaster Relief Act of 1969 (Public Law 89–769, 80 Stat. 1316).

THE NORTHEAST SHOULD HAVE EFFICIENT PIGGYBACK SERVICE

HON. EDWARD I. KOCH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 26, 1977

Mr. KOCH. Mr. Speaker, amidst all the sound and fury surrounding the current efforts to salvage the railroads in the Northeast and to establish high-speed passenger service along the Northeast corridor, one important matter which promises to be of great economic

benefit to the region is receiving little attention—namely "intermodal" or "piggyback" service in which a truck trailer is transported over long distances by railroad and then delivered locally at the end of the line by truck.

At present, virtually no freight to or from the Southern States moves in this manner north of Washington, D.C., because of low clearances in tunnels and under highway bridges crossing above the tracks. Trailers on conventional flat cars stand higher than box cars and cannot get through these tunnels or under these bridges. Rather than break the trip in half at Washington, most shippers send their goods the entire distance by truck on our already congested highways. Similarly, all intermodal traffic destined for New York and New England from Chicago and the Midwest has to be unloaded in northern New Jersey and trucked across the Hudson by highway bridges to New York City, Long Island, and up into New England. The resulting traffic congestion, noise, air pollution, and wear on the roads are well known to all who live in the area. The energy waste in this situation is obvious. It is estimated that 3.4 times as much fuel is burned up transporting a shipment by truck than piggback.

Another crucial factor to be considered, given the adverse economic position of much of the Northeast, is the additional costs inherent in the inefficient means of transportation available. According to a study by the New York City Department of City Planning, it costs $414 to transport a trailer 970 miles by train from Chicago to the city's freight terminals in northern New Jersey and then it costs an $110 more—including tolls—to pull the trailer an additional 20 miles to Brooklyn. Meanwhile, it costs only $50 to pull it to Arlington, N.J., near the terminals. This extra cost is a significant factor discouraging businesses from locating in the Northeast and encouraging those presently in the region to relocate elsewhere.

The need to improve intermodal service to the Northeast is particularly urgent because then major output from the region is high-value manufactured products, like appliances, which are especially suited to intermodal shipping. Unlike bulk raw materials such as coal or grain which are adequately handled by traditional rolling stock and the marshalling-yard system, these goods call for speedy and reliable delivery. Trucks now handle most of this market because on-time delivery and low-damage rates outweigh the extra cost to the shipper.

What the Northeast needs is an efficient piggyback freight system which resembles passenger service more than traditional freight service. Separate trains would be dedicated to this kind of service, leaving on a regular schedule, whether full or not, operating at high speeds, and bypassing freight yards, where traditional freight cars often sit for days to be routed.

Modern terminals would be built which could quickly load and unload entire trainloads of trailers, enabling a shipper to deliver a trailer to the terminal up until a half hour or an hour before departure time. The goal would be a system offering 8-hour shipment time from Boston to Washington, thereby achieving a competitive edge over the use of trucks for the entire haul.

Because intermodal trains are lightweight and can operate at high speeds, they could be routed up the existing Northeast corridor, interspersed with passenger trains or during off hours, without damaging the roadbed or slowing Amtrak service.

As mentioned earlier, however, low clearances along the corridor, specifically in Washington, Baltimore, New York, and southern Connecticut, presently obstruct trailer-on-flat-car—TOFC—trains. Several localities are engaged in studying ways to overcome the obstructions under their jurisdictions, but what is needed is a comprehensive study of the entire Northeast to identify physical obstacles to intermodal service and the most practical way to overcome them. I believe it to be in the best interests of the Northeast for the Federal Railroad Administration to conduct, in coordination with interested localities, just such a study.

One promising proposal that has been offered as a low-cost solution to the clearance restrictions is to design and construct a lightweight, low-profile railroad car which could carry a trailer low enough to pass under the lowest clearances in the Northeast. I have appended a letter from the chairman of the Sierra Club's National Transportation Committee describing in detail the benefits of such a car, which go beyond solving clearance problems to include energy savings and stability.

At least one manufacturer claims to have designed a car that could negotiate the most severe clearances, namely those in the North River tunnels of New York City. The study I propose would determine the accuracy of that claim and would decide whether this approach or another, such as the construction of a new railroad bridge or tunnel or some kind of railroad ferry service, would be the most practical solution. I have also appended an article from the March 28, 1977, issue of Railway Age discussing lightweight, low-profile cars being built and tested by the Sante Fe Railroad.

The time has come to do something to restore economical and energy-efficient freight railroad service to the Northeast. Because this region has the potential of becoming the most important intermodal market in the country, this kind of service should be given special attention.

The letter from the Sierra Club and the article from Railway Age follow:

SIERRA CLUB,
New York, N.Y., March 4, 1977.

Re: Rail Intermodal Service.
Congressman EDWARD I. KOCH,
House Office Building,
Washington, D.C.

DEAR CONGRESSMAN KOCH: The Sierra Club strongly supports the improvement of rail intermodal service; and we furthermore support appropriate measures by the Federal Government to foster the development of improved equipment, such as rolling-stock, for rail intermodal service. The Sierra Club Board of Directors adopted on January 9th an interim Policy on Transportation which explicitly mentions the encouragement of rail intermodal service; a copy of this Policy is enclosed under separate cover.

The Federal Railroad Administration's proposal to test a demonstration fleet of low-profile intermodal railcars represents an extremely promising development: such railcars could both improve the potential for rail intermodal service nationwide by sharply upgrading the quality of equipment available, and in addition would confer particular benefits on the entire Northeastern region, where limitations in the railroad physical plant—due to rail tunnels which carry major rail routes under river estuaries—prohibit the operation of conventional intermodal (piggyback) equipment.

The encouragement of technological improvements, such as the proposed low-profile intermodal railcar represents, is an especially appropriate role for the Federal Government when the project involved promises to yield benefits far exceeding the costs. The potential benefits for energy conservation, and for the environment, are major. In addition, consumers would benefit economically through low-cost rail delivery to cities and towns in the Northeast which cannot now be reached by rail intermodal service.

An amendment to the Conference Report accompanying H.R. 8365 presently precludes Federal participation in such railcar development and testing. We urge that this amendment be stricken, and that the Federal Railroad Administration be given the flexibility to fund part or all of the development and capital costs involved in manufacturing a demonstration fleet of low-profile intermodal cars. Furthermore, we urge that this project, which can make a significant contribution to national goals of energy conservation and independence from petroleum energy sources, be given a high priority: the implementation of a National Intermodal Rail Network should be accelerated.

The benefits of improved rail intermodal equipment would be both national and regional:

Nationally, the improved energy-efficiency of lighter-weight, aerodynamically improved rail intermodal cars would make a direct contribution to energy conservation, and would contribute to the economic condition of the railroads through lower fuel costs; in addition, improved competitiveness of rail service employing this equipment would encourage a shift to more energy-efficient long-haul rail transport;

In addition, if expected electrification of certain major rail routes takes place, then improved intermodal service will provide the nation with a competitive system of long-haul freight transport whose energy requirements will not depend on petroleum;

Finally, shifting heavy freight loads from highways to rails will directly reduce the requirements for expensive highway repairs in future years—repairs which are likely to impose a heavy financial burden on taxpayers.

In the Northeastern region, potential benefits will be both economic and environmental:

Intermodal freight service could cross directly by rail to New York City, Long Island, and southwestern Connecticut, bypassing (via rail) the congested conditions of the New York metropolitan area. The economic benefits, if existing rail tunnels could be used, would be major: examination of present freight tariffs suggests that savings of around $50 per trailer may well result. Such economies could result in lower food costs in metropolitan New York, Long Island and Connecticut; furthermore, more competitive transportation costs could encourage manufacturers and other industries to consider locating in this economically depressed area.

Environmentally, downstate New York, Connecticut and New England would benefit from an alternative to heavy volumes of air-polluting truck traffic which presently pass through congested metropolitan New York. Congestion is not only costly to freight haulers, who must pay for time consumed, but generates sharply increased amounts of pollution. Both metropolitan New York and neighboring areas in Connecticut presently suffer from undesirably high levels of air pollution: as you are well aware, New York City is being required to implement strong measures to conform with the Clean Air Act. Shifting some freight to the uncongested and smoothly-operating rail system, which generates minimal pollution as compared with congestion-impeded truck movements which create exorbitant quantities of pollutants, could make a significant contribution to the attainment of clean air standards in the Northeastern region.

In addition, the noise impact of present heavy truck movements in built-up areas, which is particularly acute in New York City and along I-95 in Connecticut, provides a further argument for encouraging rail intermodal service.

The benefits of such improved equipment would by no means be restricted to the Northeastern region. For example, over such distances as the over 2,000 mile trip from Chicago to the West Coast the savings in fuel costs due to the improved efficiency of such equipment would be significant.

Therefore we strongly support the Federal Railroad Administration's improved intermodal railcar development proposals, and we urge that existing legislative impediments to funding of this project be removed. Any efforts which you or others may make in this direction would be a positive contribution to improvement both of the economy and of the environment.

Sincerely,

CHRISTOPHER WASIUTYNSKI,
Chairman, Sierra Club National Transportation Committee.

[From Railway Age, Mar. 28, 1977]

SANTA FE TRIES "ARTICULATED SKELETON" FOR TOFC/COFC LOADS

(By Gus Welty, Senior Editor)

Imagine a new concept for handling TOFC/COFC traffic in which:

The basic railcar equipment costs much less to build and is less costly to maintain.

Locomotive requirements are significantly reduced; so is fuel consumption.

There is less potential for lading damage as well as for pilferage.

Flexibility is built-in, in terms of the railcar's being able to handle both 40-foot trailers and 45-foot units in more economical fashion.

Imagine all that, and you have the concept Santa Fe will begin testing in May.

Essentially, the road's mechanical engineers began their design work with one overriding goal: to reduce railcar tare weight in order to improve still further the energy efficiency of rail transportation. Though the concept might well have application to other types of equipment, they concentrated on TOFC/COFC for a couple of reasons: Piggyback, Santa Fe believes, holds the greatest potential for traffic growth in the foreseeable future; and piggyback equipment offers the best opportunity to make improvements in the lading-to-tare ratio and thus to improve fuel efficiency.

PROTOTYPE A-BUILDING

The concept that evolved is that of a series of short, skeleton-type cars, semi-permanently connected by articulated couplings, with each coupling supported on a conventional truck equipped with 28-inch wheels.

The prototype now under construction at Topeka Shops will have six such short cars, but Santa Fe is looking to eventual revenue operation using sections of 12 cars each; ends of these sections will be equipped with conventional couplers to permit fast make-up/breakup of trains. Cushioning, the designers say, may not be required, because the concept promises a significant reduction in slack action.

In TOFC configuration, each car will have a fixed hitch at one end and trailer-wheel aprons at the other end; trailers will ride in a level attitude but low-down, with the wheels riding several inches below the top of the center sill. In COFC configuration, bolsters will be positioned at the ends of the car for corner-casting securement of containers.

Santa Fe emphasizes that the system is designed for true unit-train operation on a point-to-point basis (though sections of cars could be picked up and/or set out at intermediate points). The center sill need only be of sufficient strength to withstand pull and buff train forces and to support the trailer or containers; side-bearing support members will be attached to each end of the sill to stabilize the car.

As for riding qualities, Santa Fe expects them to be excellent, because the trucks will be located at the very ends of the cars; in addition, designers say, with the pivot point of the coupling at the extreme end of the car, any tendency of cars to jacknife in a compression situation should be greatly reduced (as compared with conventional cars, where the bolster pivot point is some distance back from the coupling point).

REDUCTIONS IN FORCE

In operation, trains made up of skeleton-car sections would be scheduled to avoid forces to which conventional equipment is ordinarily subjected. Cars will not be humped or kicked in switching operations; this, combined with virtual elimination of train-action forces, is another major factor permitting the equipment to be less rugged, and thus much lighter in weight.

As Santa Fe points out, there is a definite need for equipment meeting the specifications of what Topeka Shops is building (the half-dozen cars, nicknamed, logically enough, The Six-Packer). Traditionally, rail equipment has been built heavy—to withstand flat-yard and hump switching impacts and in-train operating forces—and while a number of efforts have been made to reduce equipment weight through use of higher-strength and lighter-weight materials and components, the results of those efforts have not been spectacular. Now, the road notes, the need for a reduction in tare weight "has been brought sharply into focus . . . with the increasing scarcity of fuel resources and the resulting increase in fuel costs and its impact on railroad profitability."

A CONSTRUCTIVE ALTERNATIVE

HON. RONALD A. SARASIN

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 26, 1977

Mr. SARASIN. Mr. Speaker, we are all concerned about the national economy and the continuing problem of unemployment throughout much of the country. Millions of words have been written and spoken on how best to deal with this problem, many of them in this very Chamber, but we really have made little progress.

I believe what we should be doing is going back to the basics of economics, to the kind of programs and policies which allowed this country to become the greatest in the world. This, of course, has been recognized by many others, including our colleague, JACK KEMP, who has long been a leader in the effort to restore our economy to its natural state of health.

The correctness of Mr. KEMP's prescription is increasingly being recognized, and support seems to be growing. The case was recently put most succinctly by former U.S. Senator James Buckley, in a nationally distributed radio commentary. I submit Mr. Buckley's comments for the consideration of my House colleagues:

Under the leadership of New York Congressman Jack Kemp, House and Senate Republicans are developing a new strategy for creating real jobs without triggering higher rates of inflation. What they propose is permanent tax reductions that will benefit producers and investors as well as low to middle income consumers.

This strategy is based on what ought to be the self-evident fact that too high a burden of taxation discourages economic growth. What we need is not gimmickry such as one-time tax rebates and non-productive public service jobs, but permanent, meaningful, tax reductions; reductions that will leave more money in private hands and increase the kind of capital investment that will keep our economy competitive while generating jobs.

What is more, this kind of tax reduction will stimulate enough new economic activity to more than offset the loss of revenues on existing income. When John Kennedy initiated his controversial tax cuts in 1962, the Treasury predicted a 1963 net revenue loss of $2.4 billion. Instead, we realized a net revenue gain of $7 billion, and similar gains were experienced after the tax cuts that took effect in 1964 and '65.

Because the Democrats can claim that President Kennedy pioneered the new Republican strategy, perhaps we can hope that it won't be doomed for partisan reasons.—James Buckley broadcast over WINS, NYCity, Boston, LA., Pittsburgh, Chicago, Philadelphia and Ft. Wayne—early April, 1977.

SERGEANT BOWMAN RETIRING FROM STATE POLICE FORCE

HON. GOODLOE E. BYRON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 26, 1977

Mr. BYRON. Mr. Speaker, F./Sgt. Glenn L. Bowman will retire this summer from the Maryland State Police after 30 years of distinguished service. During these years in western Maryland he has gained the respect of the public and his fellow law-enforcement officers.

Glenn grew up in my hometown, Williamsport. He joined the Maryland State police in 1947 and, since that time, has served in central and western Maryland.

I am sure my fellow residents in the Sixth Congressional District join in congratulating F./Sgt. Glenn Bowman on a job welldone. And, I would like to share with my colleagues in the U.S. House of Representatives, this article from the Daily Mail newspaper in Hagerstown:

SERGEANT BOWMAN RETIRING FROM STATE POLICE FORCE

First Sgt. Glenn L. Bowman, fourth in command of the local Maryland State Police barracks, will be retiring this summer, after 30 years service.

Sgt. Bowman announced his retirement plans recently, saying that "30 years in any one department is plenty."

Bowman, a Williamsport native, plans to start a second career, he says, in some public safety field.

Bowman, 51, has been the administrative sergeant at the Hagerstown barracks since 1973. As such, Bowman has coordinated local Prevent-A-Tragedy and Operation Yellow Jacket traffic safety programs, both of which are aimed at getting the drunk drivers and speeders off the roads.

Bowman's brother, Harry, retired several years ago after spending nearly 26 years on the force. Harry Bowman later became Williamsport Police Chief for a year, before going to work for a private industry.

In a recent interview, Sgt. Bowman said that while he's had "no regrets" about being a state policeman, he didn't know whether he could be a rookie trooper today.

"You don't get the cooperation from the people—they don't want to get involved—like they used to. A policeman's lot is much harder. People don't get involved except when they're in trouble themselves."

"But I have no regrets. It's been a pleasure, an honor," he said.

Bowman worked as a road trooper for 20 years. He joined the state police in 1947 and was assigned to the Waterloo Barracks in Howard County, remaining there until 1950.

The next 12 years, Bowman worked the roads in Washington County. After being promoted to corporal in 1962, he worked in Frederick County for five years. He was promoted to sergeant in 1967 and returned to Hagerstown. Except for a year in Montgomery County, Bowman has since remained in Washington County.

Bowman said the nature of law enforcement here has changed considerably since 1950. "When I first came to Hagerstown there were five troopers." The number now is closer to 50.

In 1950 the troopers worked out of "one room on the fourth floor of City Hall." With the addition of Interstates 81 and 70, the county was transformed from rural to suburban and demands for police protection intensified, he said.

He lives in Williamsport with his wife Violet Wilfong Bowman. A daughter, Karen Bowman Grove, is married. Another daughter, Candy, is a recent college graduate.

SALUTE TO WOODLAND HILLS CHAMBER OF COMMERCE

HON. BARRY M. GOLDWATER, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 26, 1977

Mr. GOLDWATER. Mr. Speaker, today, the Woodland Hills, Calif., Chamber of Commerce celebrates the distinct honor of accreditation after 35 years of hard work and dedicated service to the community.

There are but 2 accredited chambers in the San Fernando Valley, 25 in the State of California, and only 326 in the entire United States. Accreditation is clearly an honor that is bestowed upon only the very best.

In 1942, a small group of businessmen in Woodland Hills—there were but 20 or so businesses in the community then—met to form an organization that, 4 years later, incorporated as the nonprofit Woodland Hills Chamber of Commerce. They helped build the community center building that was later to become the Woodland Hills Community Church; they were the voice of the community in vital zoning matters where they fought for "clean" industry, and that concern helped establish the West Valley as a major aerospace center, beginning with Rocketdyne, and then with the later arrivals of Litton Industries and Hughes Aircraft, among others. The chamber was active in the master plan for the community from its inception in 1954; freeways, streets, and highways were a source of great concern and active involvement during the ensuing expansion years.

The Woodland Hills Chamber of Commerce has constantly been in the forefront of the effort to keep the community an attractive, interesting, satisfying place to live, and it has succeeded admirably. I know that firsthand, as I am proud to call Woodland Hills my home.

I ask my colleagues to join with me in saluting the Woodland Hills Chamber of Commerce on this important, and well-deserved day.

WHY "NO" ON PAY RAISE

HON. JIM SANTINI

OF NEVADA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 26, 1977

Mr. SANTINI. Mr. Speaker, want more pay? You bet—who does not? Is our $13,000 pay raise justified? I believe the emphatic answer is "no." Many House colleagues of substantial stature would conclude with an emphatic "yes."

An examination of the basic arguments offered in support of the pay raise abundantly demonstrates the indefensible premise for retaining the raise:

First. Economic privation.—Some Members are indeed experiencing economic hardships. It is understandably difficult to elicit outcries of sympathy for our meager annual wage of $44,600—with raise, $57,500—when the struggling majority of Americans are earning less than $15,000 a year.

There are sizable additional expenses that are part of this job. Most of those financial sacrifices—and some Members have experienced significant income reductions—were foreseeable and considered when we filed for office. For those unexpected expenses, we were certainly well educated about those expenses when we refiled for office. Under our election system, a Member can decline reelection, returning to the lucrative environment of private business or professional practice. We chose to pursue our congressional goals with knowledge of the pay scale. There may be a money sacrifice for some but it is certainly a sacrifice that we voluntarily accepted.

That does not preclude seeking periodic raises. But it cannot justify this whopping increase that is near the median income of the average American family. This excessive acceleration in congressional pay is not a commendable precedent for the 95th Congress.

Second. "Without the pay raise, we will become a select club of millionaries," is a second contention which is oft repeated. This assertion is totally specious.

Millionaires indeed. What are we now? The $44,600 salary scale prior to the $13,000 pay increase places each Member of the House and Senate in the upper 4 percent of all American incomes. This assertion implies that unless the salary remains at $57,500, "paupers need not apply."

There are hardships, as discussed, but there are a large number of Americans who would relish the opportunity to "struggle" along at $44,600 a year.

It is wholly fallacious to suggest that a significant number of men and women are—or would be—discouraged from seeking Congressional office because of the deficient wage of $44,600.

Third. Any pay raise should be determined by an outside panel.—There is logic to this assertion. However, this conclusion implicitly neglects the concept of legislative accountability. If a "blue ribbon" panel recommends a substantial salary increase—and expenditure of taxpayer money—for government officials, who is accountable to the taxpayer-public whose money has been spent? Not the panel—they are immune.

It is always difficult for any public official to vote a pay raise. It should be. If a raise is justified, then that case should be forthrightly presented to the people. It should not be implemented by legislative circumvention. Otherwise, the American people, whose money is being spent, are in all practicality cut off from any avenue of either protest or affirmation. That is not a defensible or intelligent legislative posture.

Mr. Chairman, another part of concern should be raised. A pay raise should not be permitted to take effect during a House Member's term of office.

We took our 2-year mandate at a specific salary. As discussed above, we knew exactly what that wage was when we sought election. So did all prospective opponents. If the salary had been higher—for example, $57,500—perhaps a larger number of opposition candidates would have sought the office. It is dubious because the cold, hard fact of the matter is that every Member in this distinguished assemblage did not seek the office because of the salary level.

In conclusion, most Members have chosen the election process and public service because of the combination of compelling personal drives. One of the primary drives is public service. We conclude that it is important to us to participate, and hopefully, formulate, within our Nation's political system. That will always serve as our primary reward. It can never be the dollars returned for labor expended.

THE B–1 BOMBER, DEFENSE AUTHORIZATION BILL FOR FISCAL YEAR 1978

HON. PATRICIA SCHROEDER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 26, 1977

Mrs. SCHROEDER. Mr. Speaker, I would like to offer a few comments on the B–1 bomber to clarify my position on this issue. I still remain convinced that the B–1 is an unnecessary weapons system given the cost we are asked to pay. However, as several of my colleagues and I noted in our dissenting views to the report of the House Armed Services Committee on H.R. 5970, we have not opposed

the $1.1 billion included in the bill solely out of deference to the right of the Carter administration to make its own decision on the B–1 in an atmosphere as free of congressional prejudice and pressure as possible.

While this is not the time or place to fully engage the debate again, I have been disturbed by news reports that suggest that the Pentagon study group examining strategic bomber options seems to have considered all options but one—that the day of the bomber as a strategic weapons system has passed. A viable decision is not possible without returning to this more basic premise. The one simple but recurring question I have is if the B–1 is all it is cranked up to be why do the Soviets show no fear of it as they do the cruise missile. A recent CBS television program on the strategic military balance presented a powerful visual image when in one shot they panned rows of neatly arranged B–58's sitting on a deserted airstrip collecting dust. The B–58, as you might recall, was one of two follow-on bombers to the B–52 that the Congress has been asked to accept. The other was the B–70. It is now in a museum. I can only imagine the B–1 joining them.

MINIMUM WAGE AND HEALTH CARE COSTS

HON. GEORGE M. O'BRIEN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 26, 1977

Mr. O'BRIEN. Mr. Speaker, I would like to draw my colleagues' attention to the question of how an increase in the minimum wage would affect the costs of health care in this country.

President Carter has proposed a hospital cost containment measure which would limit reimbursements hospitals receive to 9 percent a year—which is supposed to be a reasonable figure to cover "general inflation." At the same time, the House Subcomimttee on Labor Standards is considering a bill which would raise the minimum wage by 30 percent immediately. It also would tie future increases in the wage to 60 percent of the average manufacturing wage.

Hospital operations are labor intensive; about 50 percent of their total operating costs are attributable to labor. These costs are relatively controllable in that the hospital can determine when, and in what amount, raises will be passed on to employees. According to information I have received from the Illinois Hospital Association, labor costs averaged between 10 to 11 percent in the year 1974–75. Nonsupervisory personnel—who would be affected by an increase in the minimum wage—account for roughly 40 to 50 percent of total operating costs. Although there are few hospital employees who work at the minimum wage, there is strong evidence that an increase in the minimum base would trigger wage increases for many hospital employees.

While reimbursements would be limited to a 9-percent increase per year, and while the minimum wage may be increased by as much as 30 percent, the President proposes to allow hospitals to pass these wage increases on to its nonsupervisory employees. Will hospitals be able to pass the wage increases along? The costs of labor rose at 10 to 11 percent, and the uncontrollable costs of energy, equipment, drugs and the like rose at about 15 to 20 percent a year. In order for hospitals to be able to afford wage increases for their employees, they will have to keep their uncontrollable costs well below the 9 percent limit.

What does this mean for health personnel in this country? First, hospitals may not be able to pay for wage increases. There are no assurances that the uncontrollable costs will increase at a rate below 9 percent per year. We may see lay offs of hospital employees as well as possible pay freezes for the remaining employees. We should ask ourselves how this will affect the quality of health care delivery in the short-term as well as over a period of years.

In my opinion, these two bills, taken together, are another example of incomplete planning. It seems improper for us to increase the costs of operating a hospital and, at the same time, limit the revenues necessary to pay for those costs. I urge my colleagues to write to their hospital administrators to find out exactly how their operations will be affected by these two bills.

ARMENIAN MARTYRS DAY REMEMBERED

HON. GEORGE E. DANIELSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 26, 1977

Mr. DANIELSON. Mr. Speaker, on April 24 of each year many of my colleagues in Congress have joined me in marking the anniversary of the Armenian martyrs who suffered so much at the hands of the Turkish Ottoman Empire.

We all know that the great Armenian people were the tragic victims of the first genocide of this century, the emotional scars of which are still borne by many today who lived through those dark days and yet, Mr. Speaker, to this day the government of Turkey has chosen to ignore the responsibility for that human holocaust. We all know that it happened. Have all those who lived through that nightmare told lies? Are all the books written about it mere fabrication? As we stand up each year in Congress to remember the Armenian martyrs who suffered under Turkish atrocities, are we basing our remarks on hearsay? And is the 1976 testimony on this subject gathered by the House International Relations Subcommittee to be overlooked, ignored, or forgotten? I hardly think so.

The evidence is all there, it is overwhelming and it has been there for far too long without remedy or reparation. Under the new administration, we have heard glowing commitments to "human rights." This is highly commendable, to say the least, because it means we now recognize a moral obligation to speak out for equal justice for all.

Mr. Speaker and my colleagues, I ask that you join me, in the spirit of the April 24, 1975, resolution overwhelmingly passed by this House designating that day as "National Day of Remembrance of Man's Inhumanity to Man," in this tribute to the memory of the Armenian martyrs whose sacrifices we must never forget.

LONDON TIMES EDITOR WILLIAM REES-MOGG ON THE RELATIONSHIP BETWEEN INFLATION AND THE MONEY SUPPLY

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 26, 1977

Mr. KEMP. Mr. Speaker, William Rees-Mogg, distinguished editor of the Times, is one of England's most distinguished journalists. His research indicates that Great Britain's high inflation results almost totally from an excess supply of money. As he points out, so long as the pound was tied to gold, as it was prior to 1913, money growth was restricted by the availability of gold. As a result, prices in 1900 were the same as in 1700. Now, however, the Government capriciously increases the supply of money to avoid increasing taxes, without regard to productivity. As Rees-Mogg put it, the consequences of this action are inevitable:

Excess Money Supply is like water flowing from a tap attached to a hosepipe which is about two years in length. Once you have turned the tap on nothing will stop the water coming out at the other end of the hosepipe in the form of price increases. Therefore the essential matter is to see that the tap is not turned on.

Interestingly, a recent staff report by the Domestic Monetary Policy Subcommittee completely supports this view. It argues that more than 70 percent of the rise in the consumer price index in the United States between 1966 and 1975 can be attributed to excessively rapid monetary growth. Furthermore, every 1-percent increase in the Consumer Price Index in one year led to a 1-percent decrease in real GNP the following year.

Thus we may attribute not only Great Britain's poor economic condition to excess monetary growth but the present economic malaise in the United States as well. Therefore, I urge my colleagues to read this important article by Mr. Rees-Mogg from the Times, July 13, 1976:

[From the London Times, July 13, 1976]

HOW A 9.4 PERCENT EXCESS MONEY SUPPLY GAVE BRITAIN 9.4 INFLATION

The strongest for monetarism has always been that it works. Whereas many economic theories—like many phychological theories—can neither be proved nor disproved, the theory of monetariasm can be tested scientifically. It can be used to make predictions, and the fulfillment or nonfulfillment of the predictions can be observed.

The basic monetarist claim is that changes in the money supply cause other economic changes and particularly changes in price levels, but after a time lag. The most complete exposition of these relationships is to be found in Professor Milton Friedman's classic work: *A Monetary History of the United States, 1867–1960.* In that work he states:

"Throughout the near-century examined

in detail; we have found that: (1) Changes in the behaviour of the money stock have been closely associated with changes in economic activity, money income and prices; (2) The interrelation between monetary and economic change has been highly stable; (3) Monetary changes have often had an independent origin; they have not been simply a reflection of changes in economic activity."

The American experience is supported by British experience in the gold standard period; gold was simply an automatic regulator of the money supply. In the eighteenth and nineteenth centuries gold stabilized the money supply, and the money supply stabilized prices, so that in 1900 prices in Britain were no higher than they had been in 1700—two centuries of substantial price stability.

There are some people who distrust economic history as a guide to the present; they believe that changes in economic institutions, and particularly in trade union power, have altered the fundamental relationships of economic processes to each other. To convince them that monetary policy works it is necessary to show that these relationships, which Professor Friedman traced in the history of the United States, have persisted in recent years, even in the economy of Britain which has suffered such serious inflationary experience.

The most important and consistent relationship is that between money supply and prices. The natural comparison to make is therefore between increase in money supply and rises in the retail price index.

There are technical difficulties about both aspects of the comparison. The most suitable definition of money supply is M3, which includes money and what might be termed near-money, but there is room for argument about the degree to which M3 is a perfect definition of money supply. Equally there is room for argument about the quality of the retail price index as an indicator of price movements. Nevertheless, one would expect to see a broad agreement between movements in M3 and movements in the retail price index.

Dr. Friedman established that there was a time lag, normally of about two years, between changes in the money supply and consequential changes in prices. To take account of this time lag one should compare changes in the money supply with changes in the retail price index occurring approximately two years later. In addition one ought to take account of increases in the real gross domestic product. In theory the money supply needs to rise at the same rate as the increase in the real gross domestic product to maintain stable prices, and an increase in the money supply less than the increase in the gross domestic product would cause prices to fall.

The sum is however quite a simple one. You take the annual rate of growth of the money supply; you deduct from it the annual rate of growth of the domestic product. The residue of that sum is the Excess Money Supply, that is the increase in the money supply over and above what was needed to finance the real growth of the economy. The Excess Money Supply ought to predict future movements of the rise in the retail price index about two years ahead. Because of changes in the time lag and difficulties in the statistics one would not expect the prediction to be precise, but one would expect a reasonably good fit between the prediction and the result.

I decided to do these sums for the increase in the money supply in the years 1965–1973, net of the increase in the gross domestic product, and for the rise in the retail price index in the matching years, 1967–1975. The results are in the attached table.

It will at once be apparent that they show a closer match than the most confident monetarists could reasonably have expected. Over the period as a whole the average Excess Money Supply was 9.4 percent at an annual rate; the average annual rise in prices was 9.4 percent.

As one would expect, the individual years show considerable variations. In eight of the nine years the Excess Money Supply gave a prediction which was in the same broad area as the resulting rate of inflation. The odd year out was 1971 which seemd to reflect the rising Excess Money Supply of 1970 rather than the very low Excess Money Supply of 1969. Nevertheless it should be emphasized that the timing is not consistent (if only because of changes in the velocity of circulation). The method is more reliable in providing a forecast over a period of years than for a single year.

If these figures stood on their own they could hardly be dismissed as coincidence. In fact they merely confirm, thought to a striking degree, a great deal of work on money supply in a wide variety of other countries. The most recent report of the Bank for International Settlements has a special section which deals with the question. It can be summed up in the statement that "the past decade has provided further strong prima facie evidence of the close long term relationship between monetary expansion and price levels, on a worldwide as well as on a national level." The value of the British figures is that they give a local and recent proof of a historical and worldwide phenomenon.

To use a simple analogy, the money supply, or more precisely the Excess Money Supply, is like water flowing from a tap attached to a hosepipe which is about two years in length. Once you have turned the tap on nothing will stop the water coming out at the other end of the hosepipe in the form of price increases. Therefore the essential matter is to see that the tap is not turned on. To reduce the Excess Money Supply to a low level, and keep it at a low level, becomes the central objective of economic policy, central because no other economic policy objectives can be secured if that is not.

These figures have changed further my own attitude to incomes policy. If the Excess Money Supply determines the rate of inflation equally closely in years subject to incomes policy and in years without, there seems to be no evidence left that incomes policy has any significant influence on inflation. Nor did incomes policy help in these years to keep down the increases in money supply, which were actually highest in incomes policy years.

At the end of 1974, six months before phase one of the present incomes policy was adopted, the Excess Money Supply already predicted an inflation rate of over 20 per cent in 1975 and of under 15 per cent in 1976. The first prediction was fulfilled; the second is apparently being fulfilled; all the intervening incomes policy decisions seem not to have changed the rate of inflation at all. The whole movement of prices in the last ten years, in which there were three incomes policy phases, two Labour and one Conservative, is accounted for by surplus money leading to higher prices.

That does not of course wholly remove the other arguments for incomes policy, which can still be defended on the grounds that it helps to avoid a rise in unemployment, or larger deficits in public industry. It is doubtful, however, whether the sacrifices that are made in support of incomes policy would be made if it were not believed to be a defence against inflation. If it does not affect inflation, its other benefits have to be weighed carefully against the serious distortions it causes.

The evidence also suggests that a high Excess Money Supply is bad rather than good for employment. A leading article recently discussed the reasons for supposing that inflation naturally produces higher levels of unemployment than would result from price stability. During this period the Excess Money Supply tended to rise and unemployment tended to rise with it. Sharp reductions in money supply can also increase unemployment, and a stable but low rate of increase would seem to be best both for employment and for prices.

If one makes international comparisons one can see what monetary policy can do and what it cannot do. The countries with a low rate of Excess Money Supply have been the United States and Germany. They have both enjoyed a much lower rate of domestic inflation than the world average. Countries with a middle increase have included France and Japan; their inflation rates have not been good but have been better than the high Excess Money Supply countries, such as Italy and the United Kingdom.

There does not appear to be any correlation between growth rates as such and the money supply; countries with low and high growth rates appear at both ends of the money supply scale. Standards of living are however higher in countries with low Excess Money Supply, partly because their currencies have a good external value and their terms of trade are therefore relatively favourable. If one takes the six major industrial trading nations, the order of the rate of increase of the Excess Money Supply is the United States lowest, Germany, France, Japan, the United Kingdom and Italy highest. Those are the rankings for the period 1969–1973. They are also the rankings for the standard of living of the nations concerned.

BRITAIN'S EXCESS MONEY SUPPLY AND RISING PRICES

	1965	1966	1967	1968	1969	1970	1971	1972	1973	1974	1975
Increase in money supply	7.7	3.7	9.9	7.7	3.1	9.6	13.0	25.8	27.6	12.6	7.6
Increase in domestic product	3.0	1.8	2.1	3.7	1.8	1.8	1.6	2.4	5.4	.2	−1.7
Excess money supply	4.7	1.9	7.8	4.0	1.3	7.8	11.4	23.4	22.2	12.4	9.3

	1967	1968	1969	1970	1971	1972	1973	1974	1975	1976	1977
Increase in prices	2.5	4.7	5.4	6.4	9.4	7.1	9.2	16.1	24.2		
Variation of price increases from Excess Money Supply	−2.2	−2.8	−2.4	+2.4	+8.1	−.7	−2.2	−7.3	+2.0		
Variation as a running average	−2.2	+.3	−.6	+.15	+1.7	+1.3	+.8	−.2	+.05		
Average Excess Money Supply	1965–73	9.4									
Average price rises	1967–75	9.4									

Note: All figures are in annual percentage terms. Gross Domestic Product is average estimate at 1970 factor cost. Money supply is M3. Prices are taken from the index of retail prices.

Professor Friedman's recommendation is that money supply should be increased at a steady rate slightly above the expected increase in the domestic product. The conclusions to be drawn from these figures certainly support such a policy. There is no evidence in these figures that increases in money supply above the level recommended by Professor Friedman had anything but a damaging effect, even if at the time it seemed hard to avoid them.

There are various ways in which the money supply could be stabilized. It could be done through Mr. Peter Jay's suggestion of a currency commission. It was historically done by the device of the gold standard. An increasing number of nations are doing it by setting money supply targets. Those targets can either be explicit operational targets for the increase in money supply, or for the increase in the reserve assets of the banks, or both. A money supply target reducing the growth of the Excess Money Supply to 2 percent by 1979 would be an immediate recommendation; but it should be followed by a national agreement that money supply should be held to that rate of growth permanently, or as permanently as people prefer stable jobs and prices to inflation and unemployment.

One of the advantages of such a permanent target or limit is that it would have, if trusted, a favourable effect on long term interest rates, therefore on investment, and through investment on employment and growth. Short term interest rates are largely determined by the immediate balance of demand and supply for money; a reduction in the rate of expansion of money supply can therefore raise short term rates, particularly if there is an excessive Budget deficit, as there now is.

The demand for long term fixed interest securities is more dependent on long term expectations about the inflation rate. If it were guaranteed that Excess Money Supply would not rise by more than 2 percent in any of the 10 years from 1979, the yield on undated British Government stocks should fall sharply, and funding operations and industrial finance would be greatly assisted.

A low, definite, long term and announced monetary policy would therefore offer Britain great advantages. The question of money supply and inflation is a simple central decision which has been wrongly made but can be made rightly in the future. That leaves the questions of industrial relations, of management incentives, of industrial investment, of productivity and profitability, and of growth; we can only start to solve them when we have stopped the wasteful and unnecessary process of generating our own inflation.

FEDERALIZATION OF WELFARE

HON. TOM HAGEDORN

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 26, 1977

Mr. HAGEDORN. Mr. Speaker, a new group calling itself the Businessmen's Committee for the Federalization of Welfare has urged Congress to provide complete Federal financing of welfare benefits. We are told that this is required by virtue of the fact that the "burden of poverty is preventing the older urban portions of the country from fulfilling their functions in the Nation's economy and retaining their attractiveness to business and individuals." and that "poverty is a national problem."

Noting that the overwhelming majority of the 131 signatories are from the New York City area, I would suggest to them that they could do a great deal more for their area's economic climate by urging some budgetary restraint upon their local officials than by trying to export the city's woes throughout the Nation.

The businessmen signing the letter also argue that federalization is necessary to alleviate the complexity of regulations that now burden the welfare system. In view of the history of Federal rulemaking, I would further suggest that federalization is about as likely to simplify welfare regulations as Federal debt ceilings are to limit deficit spending. I would like to insert the committee's letter, along with a list of signers. I await, with great anticipation, the next occasion on which one of these men complains about what Washington is doing to his business or industry.

BUSINESSMEN'S COMMITTEE FOR THE FEDERALIZATION OF WELFARE

Whereas poverty is a national problem that burdens different parts of the country to different degrees, and

Whereas this burden of poverty is preventing the older urban portions of the country from fulfilling their function in the nation's economy and retaining their attractiveness to business and individuals;

Whereas the present welfare system discourages people from working or from keeping their families together, and

Whereas regulations are so complex and cumbersome that the system is inefficient, unfair to many recipients and extremely difficult to keep free of ineligibles,

Therefore, we the undersigned Businessmen's Committee for the Federalization of Welfare, hereby petition the Congress and the President to reform the system of welfare payments and finance it entirely by federal taxes.

The signatures were collected over an eight-month period.

SIGNERS

Barnes, Wallace, President, Barnes Group, Inc., Bristol, Conn.

Barnhill, Howard E., President & CEO, North American Life & Casualty, Minneapolis, Minn.

Bates, Edward B., President, Connecticut Mutual Life Insurance Co., Hartford, Conn.

Beach, Morrison H., Chairman & CEO, The Travelers Corporation, Hartford, Conn.

Beretta, David, Chairman & President, Uniroyal, Inc., New York, N.Y.

Berlinger, George F., George Berlinger Investments, New York, N.Y.

Block, Joseph L., Honorary Director, Inland Steel Co., Chicago, Ill.

STRIP MINE BILL AMENDMENTS

HON. WILLIAM C. WAMPLER

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 26, 1977

Mr. WAMPLER. Mr. Speaker, it is my intention to offer the following amendment to H.R. 2, the so-called strip mine bill, when it comes to the floor. In view of President Carter's tough energy proposals calling for more coal production, and the loss in coal production in my State and throughout the Appalachian region and elsewhere that will result if the strip mine bill is enacted, it is my view that delaying the effective date of Federal control now contained in H.R. 2, leaving it with the States until we get through the rough period of this crisis, would ease the impact of this bill on our severe energy problem. The amendment follows:

Section 528, on page 331, line 6, add a new subsection (3) as follows:

"(3) the extraction of coal for commercial purposes where the surface mining operation is conducted on any steep slope as defined in Section 515(e) until six years after enactment of this Act."

CORN SWEETENER

HON. EDWARD R. MADIGAN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 26, 1977

Mr. MADIGAN. Mr. Speaker, some confusion exists as to what a corn sweetener is—what it can be used for—and what the relationship is between the corn sweetener and the sugar industry. Mr. Donald Nordlund, a resident of my district, has devoted a great deal of his time and energy to the development of corn sweetener. For the benefit of Members who would like to better understand the corn sweetener industry both in regard to its history and its current status in the marketplace, I am submitting remarks by Mr. Nordlund which I feel will contribute substantially to a better understanding. Mr. Nordlund is chairman and president of A. E. Staley Manufacturing Co., Decatur, Ill.

Mr. Nordlund's remarks follow:

CATALYST IN THE SWEETENER WORLD

(By Donald E. Nordlund)

Corn sweetener producers and the sugar industry have much in common, but I believe we view each other differently today than we did in the past. Sugar, of course, is still the dominant nutritive sweetener, but corn syrups can no longer be relegated to their former role. They have come of age primarily because of one important development—high fructose corn syrup.

This afternoon I would like to focus my comments on this significant product—to examine its remarkable growth record, present status, and promising outlook. In so doing, perhaps we may see more clearly the direction of the sweetener industry in the years ahead.

Although the adjective "new" is still often applied to it, high fructose syrup has been available in commercial quantities for nearly 10 years.

Two companies generally are considered the pioneers in high fructose syrup but, in a sense, the entire corn wet milling industry can share the credit. The product's introduction in 1967 marked the fruition of an industry goal. It reflected a long-standing willingness by corn wet millers to commit capital for sweetener research and development. From its very beginning, the wet milling industry has been sensitive to the needs of its consumers. Perhaps this was out of necessity inasmuch as we were trying to match and surpass the standard of sweeteners—namely, sugar. It is this consumer orientation which continues to direct the industry today.

High fructose corn syrup, in a sense, epitomizes a corn sweetener evolution that has been in progress for 50 years. It is an evolution that has carried corn syrups from a very minor percent of the domestic sweetener

market in the 1920's to over 25 percent today.

Every decade since the 20's has been highlighted by progress in corn sweetener technology—dextrose, enzyme converted syrups, maltodextrins, to name a few. With each product and process advance, corn sweeteners extended their market share. But, even with this success, the full potential for corn sweeteners was not being realized as sweetness differences remained the major challenge to the wet milling industry.

The situation significantly changed in the late 1960's with the development of commercial processes for the isomerization of dextrose into fructose, a monosaccharide considerably sweeter than sucrose. By 1972 two companies with a combined capacity of about 800 million commercial pounds comprised the entire industry capability in high fructose syrup. Much has transpired in the five years since 1972.

HIGH FRUCTOSE ACCEPTANCE

Because of extraordinary circumstances, the formative years of high fructose syrup were compressed into an abnormally short time frame. The results have been both positive and negative.

Despite what one reads in the press today, sweetener users did not and do not rush to accept high fructose syrup. It did not sell itself in the early 70's any more than it sells itself today. High fructose syrup was an unknown, and food and beverage processors do not readily change formulas to accommodate an unproven ingredient.

Reflecting the highly competitive nature of the sweetener market, high fructose syrup in 1972 was priced at a discount to sugar. It was hoped that this discount would illustrate the basic economic advantage of high fructose syrup and permanently open the door for this new sweetener.

This cost differential did attract attention; however, it did not sell high fructose syrup. First, the product had to be proven to the entire food and beverage world.

To accomplish this, high fructose producers relied upon the same technical service approach that had been used successfully with other corn sweeteners. Customers' products were reformulated using high fructose syrup as a total or partial replacement in an effort to demonstrate cost savings while maintaining quality standards. This time-honored technique was especially important in areas where corn sweeteners had never been utilized to any substantial degree, such as in the soft drink industry.

By late 1973, the efforts began to pay off. High fructose syrup recognition and acceptance were growing and sales were increasing.

I might add that manufacturers of high fructose were learning more about their processes and, as a result, eliminated some initial product shortcomings. We also were discovering the high quality standards, effective distribution systems, and blending facilities of sugar refiners. In short, we quickly came to realize that the sugar industry had done an outstanding customer service job, one which we had to match in order to sell our new syrup.

Initially high fructose was sold as a sugar replacement in existing products, but as sugar prices began to move upward in 1973, it began to be included in new products as food and beverage companies became increasingly concerned with rising sugar costs and consumer resistance to higher retail prices. Major credit must be given to food and beverage processors as the effectiveness of their research programs permitted quick evaluation and incorporation of high fructose into many of these new products.

The period of 1974 and 1975 will be long remembered by everyone associated in any manner with the sweetener world. As sugar prices rose to record levels, demand for high fructose syrup grew in proportion. Though industry capacity increased to about 2 billion wet pounds, demand far outstripped it, a fact which attracted a number of companies to the high fructose business.

While 1974–75 was a positive period for the producers of high fructose syrup, it also was one of difficulty.

It was positive in the sense of speeding the acceptance of HFCS and establishing its position as a full-fledged alternate to liquid sugar. It was a difficult time in that high fructose syrup had to be placed on allocation and the task of trying to meet customer requirements became impossible. High fructose syrup usage was not only maximized, it sometimes was overused—reminding everyone that it, too, was a sweetener with some limitations.

There is no need to detail what has happened to sweeteners since that 1974–75 peak, but its significance for HFCS is worth examining. In many ways, what has happened recently is more meaningful than the experience of prior years.

Reflecting the high sugar prices of 1974–75, corn sweetener consumption reached 31 pounds per capita in 1975, with high fructose accounting for nearly 7 pounds. Corn sweeteners then accounted for 25 percent of total nutritive sweetener consumption. Last year, with considerably lower sugar prices, corn sweeteners advanced even further—to 33 pounds per capita or 26 percent of overall sweetener usage. High fructose syrup accounted for all the increase, climbing to 9½ pounds per person.

The point is clear. Availability of lower priced sugar did not cause an exodus from HFCS by sweetener users. The markets for high fructose syrup have continued to develop at a steady rate. The expanded variety of corn sweeteners, including HFCS, now available from the industry and the success they have achieved is a good example of the fruits of industrial research.

The continuing growth in high fructose syrup usage is coming from several quarters: customers who are increasing their use as they gain more confidence in it, and first-time users who had to be convinced that the sweetener's cost advantage would remain even in the face of lower sugar prices.

The economics of high fructose syrup have been graphically illustrated in recent months. An important factor in the continued profitability of HFCS in the face of sharply reduced prices has been the industry's continued progress in processing efficiencies, especially as it relates to enzyme utilization.

However, even though high fructose sales continue to expand and we have been able to earn a profit on our investment, the industry is not without problems. The primary one today has been caused by the rapid expansion of productive capacity.

As I mentioned a moment ago, the 1974–75 high fructose syrup market attracted several companies into the business. They since have entered the market or are currently doing so. This year and early next, the industry will add some 3 billion pounds of capacity—essentially doubling last year's output. As a result, 10 or 12 years of normal expansion are being compressed into a two-year period.

The market will develop to consume this sizable addition, but not as rapidly as the new capacity is coming on-stream.

Corn wet milling is a capital intense business, and considering the time required to build a plant, additional high fructose entries are unlikely for the next few years. High fructose syrup supply and demand, therefore, could reach equilibrium in a year or two. Among the factors which will dictate the extent and timing of such supply and demand balance will be the price of sugar, which apparently will be determined by governmental action more than by normal market forces.

A second factor will be degree of progress made by second generation high fructose syrups.

Regarding governmental action, it would be inappropriate for me to discuss the pros and cons of recent sugar policy pronouncements since, at this point, it is unclear exactly what will develop. There is one observation I will make; namely, that usage of high fructose syrups will continue to grow regardless of sugar policy changes, short of placing it under new sugar legislation as has been suggested by some.

CORN RESEARCH BENEFITS CONSUMERS

On this matter I would note that we in the corn refining industry see no logical reason for such inclusion. We have not asked for governmental assistance nor do we wish any. Further, we believe that any such inclusion of corn sweeteners would eliminate an important segment of our free enterprise system and deprive the American consumer of the benefits of progress resulting from research conducted by our industry.

In addition to the price of sugar, second generation products will be an important influence in the growth of high fructose syrups. Several producers have introduced such products with most emphasis centered upon 55 or 60 percent fructose products and, to a lesser extent, a 90 percent product. The present industry standard, as you know, is 42 percent.

While high fructose syrup is used extensively in soft drinks—it has not been approved for use in either of the major cola brands. Considering the importance of these two brands, we hope our new 55 percent product will hold the key to success. I would quickly add that we are optimistic.

Since the announcement of the proposed saccharin ban, increased attention has been given to the 90 percent fructose product. It is about one-and-one-half times as sweet as sugar and therefore does permit the formulation of lower calorie foods and beverages with a nutritive sweetener.

Predicting the future is always risky. It is especially risky where weather, international relations, and government policies are involved.

However, I do want to leave you with some food for thought on the longer term outlook.

First, there can be no doubt that—despite significant inroads by corn syrups—sugar will remain the standard of the sweetener industry for years to come. On the other hand, we can expect the sweetener industry to be in a state of transition as the result of technical developments, not just from corn wet millers, but from sugar refiners as well. There are indications that research emphasis is growing in the sugar industry—a significant and positive trend!

Hopefully, one of the more immediate results will be development of low-calorie nutritive sweeteners, whether from corn, cane, beet, or other sources. Longer range, another goal will be an economic process for crystalline fructose, a development that would place a corn sweetener in the consumer's sugar bowl for the first time. The capability to produce such a product exists now at the laboratory level, and it is conceivable that granular fructose will become commercially available in the early 1980's.

In the coming decade, we also will see more corn sweetener producers and sugar refiners redefining their positions. The present trend toward becoming "full line" sweetener suppliers—both corn syrups and sugar—will continue.

Advancing technology also may lead the sugar industry and corn processors into entirely new and promising areas. There is evidence of this in the growing science of sucrochemicals and in continued modified corn starch developments. Because of these new potentials—corn, beets, and cane can be-

come increasingly valuable to this nation as renewable natural resources. In a nation looking down the road to the depletion of its petroleum reserves and other such resources, the implications could be beyond our present understanding.

In summary, the sweetener world has undergone dramatic change and it can expect to undergo more of the same. High fructose corn syrups will continue to serve as the catalyst. Every segment of the sweetener business must face the reality of change, view it as an opportunity, and prepare to participate fully in it.

RESEARCH PROGRAMS TO AID THE HANDICAPPED

HON. OLIN E. TEAGUE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 26, 1977

Mr. TEAGUE. Mr. Speaker, your Committee on Science and Technology recently conducted a study, via a panel of expert consultants, on research programs to aid the handicapped. This study pointed out a number of significant findings, too many to enumerate and elaborate on here.

One of the findings, however, was the need to inform the public, particularly the professional communities serving the disabled and the disabled individuals themselves, about the results of our national research and development efforts. Many great innovations have never reached the marketplace and the intended handicapped users, because of the lack of communication regarding these developments.

Fortunately, the intended user population of handicapped individuals is small compared to the general consumer population; however, this creates a problem in that the usual marketing techniques become cost prohibitive when added to the often high costs of production for a rather limited number of sophisticated, high-technology devices.

For this reason, I am happy to bring to the attention of my colleagues an article which appeared April 17, 1977, in the Washington Post, Parade magazine, entitled "New Devices to Help the Blind and Near-Blind." I congratulate the Washington Post for publishing this article, thereby bringing these advancements of benefit to the visually impaired to public attention; and I commend this article to my colleagues:

NEW DEVICES TO HELP THE BLIND AND NEAR-BLIND

(By Lawrence Galton)

In a Philadelphia suburb, a blind man today gets around as he never could before—with the aid of a laser cane that probes the environment for him. Resembling an ordinary cane, the device, with its three built-in lasers, sends out thin beams of light that not only tell him when there's an obstacle directly ahead—they warn him with auditory and tacile signals when he's approaching a drop-off such as a curb or down stairway and also when he is nearing a low-hanging tree branch, awning or sign. When the cane is silent, he knows there is an open path he can safely travel.

Daily now in Chicago, a blind World War II veteran uses his laser cane—it weighs only one pound—to go from the end of the city where he lives to the end where he works as an X-ray darkroom technician. He has to take the elevated train and two buses. "For the first time," says his wife, "I feel at peace when he leaves home."

NOW MASS-PRODUCED

The result of 25 years of Veterans Administration-sponsored development by Bionic Instruments, a Bala Cynwyd, Pa., bioengineering firm, the laser cane now is being produced in quantity. Its cost is $1950. Thirty to 40 hours of training in its use over a period of two weeks are needed. The Mobility Foundation of North Wales, Pa., has been formed with the primary objective of providing laser canes for those who need, want and are not financially able to purchase them.

The cane is one of a series of developments that promise to improve the lives and opportunities of many of the blind and the near-blind.

READING MACHINES

It's called the Optacon—for optical-to-tactile conversion. In one hand, a user holds a miniature camera about the size of a small pocketknife to read printed material and convert it into impulses. And with the index finger of his other hand, the user can feel the letters and numbers via a 1" x ½" tactile array of 144 miniature vibrating rods contained in a portable, battery-operated electronics section about the size and weight of a portable cassette tape recorder. For example, as the camera moves across an "E," the user feels a vertical line and three horizontal lines moving beneath the finger.

Selling for $2895, the Optacon was developed with federal aid by a team headed by Dr. James D. Bliss of Telesensory Systems, Inc., Palo Alto, Cal., which now produces it, and Dr. John G. Linvill of Stanford University, whose own blind daughter has also been involved in the project since 1964.

As of now, more than 3200 of the machines have been produced. With the ability to read print directly, their users can independently carry out many everyday tasks—reading their letters, bank statements and bills, following cookbook recipes, and enjoying books and magazines.

And many users have been helped to advance in jobs and enter vocations previously closed to them. Various accessories increase the Optacon's occupational usefulness. For example, accessory lenses allow a blind computer programmer to read displays on a computer video terminal and a blind secretary to read what she is typing, make corrections, and fill out preprinted forms.

SOON IT WILL TALK

The Optacon in its present form is hardly the last word. Its top reading speed now is 80 to 90 words a minute. But well within the next five years, it's expected, new accessory equipment will let the machine speak out in words and phrases, making reading speeds of up to 200 words a minute possible. And, in fact, the text-to-speech technology is well along in development by Dr. Jonathan Allen at the Massachusetts Institute of Technology.

Meanwhile, a machine that reads aloud to the blind has been developed by a brilliant, 28-year-old inventor, Raymond Kurzweil, president of Kurzweil Computer Products in Cambridge, Mass. It consists of a reading unit that resembles a tabletop copying device and a small keyboard.

When a user places a printed page face down on the unit's glass top, a camera scans it line by line, converting light into electronic signals much like a photocopier. A miniature computer groups letters into words, determines how they should be pronounced according to a preset program, then produces speech sounds, enunciating words into sentences with stresses and pauses in a metallic but understandable voice at a rate of about 150 words a minute. At the push of a button, the user can repeat or skip passages, or mark a point on the page he wants to come back to later.

Half a dozen of the machines have been built for practical testing—with promising results—in the Perkins School for the Blind, West Virginia Rehabilitation Center, Boston school system and elsewhere. At this stage, the cost of a machine is $50,000. But, with further development and volume production, it's expected to sell for about $5000 within a few years and eventually to be as portable as a briefcase.

TALKING CALCULATOR

In 1976, a hand-held, battery-powered calculator that talks was chosen as one of the most significant new products of the year by Industrial Research magazine.

Called Speech Plus and developed by Telesensory Systems, makers of the Optacon, the $395 machine, weighing 17 ounces and measuring 1½" x 4½" x 7", can add, subtract, multiply, divide, subtotal, do square root and percentage calculations. Its numeric keys are arranged like a push-button phone because the blind are more familiar with this configuration. And the device lets the operator hear every key he presses in a clear machine voice so he knows he is making no mistakes as he goes along.

ELECTRONIC EYES

Two systems now under development could hold even greater promise for the sightless.

At the Smith-Kettlewell Institute of Visual Sciences, Pacific Medical Center, San Francisco, Dr. Paul Bach-y-Rita and a research team are working with a Tactile Vision Substitution System (TVSS).

TVSS uses a tiny, battery-powered TV camera worn in the frame of a pair of glasses which picks up images, serving much like the normal lens of the eye. The camera transmits visual images to an elastic garment that fits over the abdomen and has sewn into it more than 1000 tiny electrodes. As images from the camera, translated into electrical impulses, activate the electrodes, the wearer feels vibrations on his skin in the pattern of the original images; so the skin, in effect, serves somewhat in the same way as the retina of the eye.

OBJECTS RECOGNIZED

Wearers of the experimental system have quickly learned to recognize drinking glasses, telephones and other common objects and to wend their way through tables, chairs and other obstructions in a room. A blind psychologist at the institute can move around obstacles at the rate of two feet a second, far faster than with a cane.

The institute team also developed a similar stationary system in which the camera is attached to a microscope and, instead of wearing an electrode pack, the user presses his abdomen against a bench-mounted electrode array. Using the system, one man is able to assemble small components at an electronics plant as quickly and accurately as sighted workers.

The stationary system may become available for wide use within a year or two; the portable system, still being refined, may become available a few years after that.

In an entirely different approach, Dr. William Dobelle and a research team at the University of Utah's Institute for Biomedical Engineering are working toward a system which only a few years ago would have seemed inconceivable: one that would stimulate visual centers in the brain to let the blind see.

In experiments with a 33-year-old volun-

teer, blind from a gunshot accident, they have implanted a plastic strip with an array of electrodes against the visual cortex at the rear of the brain, with wires emerging through the skin above and behind an ear.

As electrical signals reach the electrodes, they're seen as spots of light, or phosphenes. In one experiment—with electrodes connected to a TV camera which sent images to a computer to be simplified and then transmitted as electrical impulses—the volunteer could see horizontal and vertical lines in the pattern of phosphenes. In another experiment, with the system hooked up to transmit Braille images, he could read words in phosphene form five times faster than with his fingertips.

Dobelle and his colleagues foresee a miniature system that the blind could wear and use constantly. It would consist of a small camera implanted in an eye socket. The camera would transmit light electronically to a tiny computer built into an eyeglass frame which would, in turn, translate the light into electrical impulses to be sent to the implanted electrodes in the visual cortex. With such a system, a wearer could perceive people and objects as well as read.

HELP FOR THE NEARLY BLIND

In addition to the totally blind, half a million Americans are legally blind, with 20/200 visual acuity or with normal acuity but field of vision sharply restricted to 20 degrees or less.

Effective new devices to help them are coming out of laboratories—in particular, from the nonprofit National Institute for Rehabilitation Engineering (NIRE) in Pompton Lakes, N.J. There, a team of ophthalmologists, optometrists and engineers develops means for individual patients to make best use of their remaining sight.

CORRECTS TUNNEL VISION

Not long ago, a 42-year-old man was referred to NIRE because an eye disease, retinitis pigmentosa, had left him with tunnel vision so severe that he retained only two degrees of the normal visual field, causing him to bump into objects and restricting his activities. The institute's staff designed and built for him "field expander glasses" mounted on a conventional eyeglass frame. By looking alternately through the regular lens and the field expander, he can now see a full 180 degrees. The field expander glasses now offer full-field vision, too, for people blind in one eye or with half-vision in each eye as the result of brain injury or stroke.

At NIRE, special wide-angle magnifying telescopic spectacles in bifocal form are made for people with impaired central vision or poor visual sharpness, enabling them to see clearly at a distance and drive a car again.

Strong reading spectacles with long working distances are made to help people who have been able to read only by holding print to the face. With the spectacles, they can read at a comfortable distance of 10 to 14 inches.

Miniaturized electronic devices that can be held in the hand or worn on the head are helping people unable to see adequately in dim light.

Among the remarkable achievements of NIRE are cross-vision glasses for people blind in one eye. Through technical legerdemain, the glasses provide full-field, high-acuity vision by detecting images on the blind side and conveying them to the brain through the normal optic pathways on the sighted side without causing double vision or confusion. One of those wearing the glasses is Israel's Gen. Moshe Dayan, who never expected to regain the ability to see on his left side.

Nothing can ever take the place of the priceless gift of normal sight. But increasingly now technological developments promise to help many of the partly sighted and the totally blind to gain, literally, a new outlook on the world.

SENSELESS SLAP

HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 26, 1977

Mr. FINDLEY. Mr. Speaker, I would like to call to the attention of my colleagues the excellent Washington Post editorial of April 22, "A Senseless Slap at Pakistan."

This editorial questions the recent State Department decision to rescind an earlier decision in favor of a tear gas shipment to Pakistan. This decision, whatever its motives, is an affront to a nation that has been a longtime friend and ally of the United States. It also represents an unfortunate prejudgment of the involvement of Prime Minister Bhutto in election fraud when evidence of wrongdoing is not available. Prime Minister Bhutto's many previous achievements in the interests of his nation should not be so easily discounted:

A SENSELESS SLAP AT PAKISTAN

By what sort of self-indulgent pseudo-idealism did the State Department decide to rescind its own decision of March 15 to let tear gas be sold to Pakistan? "Conditions have changed substantially in the four weeks since the license was issued," the department says, by which it means that protests against Prime Minister Bhutto, whom the opposition accuses of having rigged the elections of March 7, roll on. It is apparently the department's view that further deliveries of tear gas could be interpreted as endorsement of the Bhutto government at a moment when its end may be near.

This is absurd. Pakistan has been a good friend and longtime treaty ally of the United States for decades. Mr. Bhutto, who took over after East Pakistan was torn away in 1970, has since been credited with genuine achievements in settling his country down, pushing development forward and, yes, enhancing human rights. He does not take orders from Washington, and he has made his mistakes at home, but he is unquestionably one of the best Third World leaders currently going. It is his government that Washington has stopped providing with a normal and, under the circumstances, humane means of coping with street disorders; one alternative, of course, is bullets. The political insult is plain.

Aha, say the pure of heart, he rigged the elections. Did he? Has the State Department so established? On March 15, after all, one week *after* the elections, the department was prepared to ship the tear gas. Whatever Mr. Bhutto did, was it more heinous than what went on in, say, Cook County in 1960? It strikes us as both arrogant and pusillanimous of the department to have decided that Mr. Bhutto's electoral performance, whatever it was, negated the many other ties between the United States and Pakistan and required the Carter administration to deal him, at a moment of his extreme duress, a small but savage vote of no-confidence.

We are not unmindful of the new administration's effort to take a fresh look at arms transfers. Some foreign governments are bound to get caught in the gears of American policy change. We offer no endorsement of blind acceptance of past arms-transfer patterns. But in this case a major error has been made. Apparently intent on not appearing to be interfering by sending a pro-Bhutto signal to Pakistan, the State Department seems not to see that it is interfering much more blatantly by sending an anti-Bhutto signal. That is the way Pakistanis will surely read the department's conspicuous departure from the normal course: a routine approval of the tear gas shipments. And the department seems equally blind to the fact that it is also sending a lot of other countries the wrong message—one that says that when otherwise unoffending friends get in trouble, the Carter administration quickly gives them the back of its hand. The tear gas shipments should be promptly resumed.

ORGANIZED LABOR AND CAMPAIGN FINANCING

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 26, 1977

Mr. CRANE. Mr. Speaker, in the wake of the 1976 Presidential election, the first in which candidates campaign expenses were paid by the taxpayers, increasing attention is being given to the possibility of providing public financing for congressonal races. The major argument being raised by proponents in favor of such a step is that expanding the scope of the public financing law would further reduce the influence of the special interest groups.

Even if this assumption were accurate, its importance would have to be weighed alongside the fact that public financing not only gives incumbents an unfair advantage while restricting individual freedom of expression but it requires people to financally support candidates with whom they are in disagreement. However, the plain fact of the matter is that such an assumption is blatantly incorrect as the events of 1976 and 1977 clearly show.

Most political experts agree that President Carter would have fallen short in his effort to become President had it not been for the tremendous effort of organized labor. Unquestionably, that effort was the key in States like Ohio and Wisconsin which gave President Carter his narrow victory. What's more, it is quite clear from subsequent events that AFL–CIO boss George Meany thinks organized labor was responsible for the Carter victory and expects to be rewarded. Not only have the labor bosses presented the biggest package of labor legislation in recent memory, but even the slightest rebuff brings howls of protest indicating just how deeply they feel the President is indebted to them. The only question seems to be, how long can he withstand the pressure, if indeed he is withstanding it now.

If one has any doubt about the extent of President Carter's indebtedness, one would do well to read an excellent column, written by John Lofton, which appeared in the April 3 issue of the Arkansas Democrat. In it, Mr. Lofton passes along some highly relevant information about the extent of labor's financial commitment to the Carter campaign and the ways in which labor can contribute but others cannot. From all this, Mr. Lofton concludes that it is little wonder the labor bosses like public financing of campaigns and hope to see it extended to the congressional level.

To one who has long been concerned about the relationship between compulsory union dues and political contributions by organized labor, Mr. Lofton's column takes an added significance. Prior to passage of public financing at the Presidential level, it was bad enough that some folks saw their hard-earned money being used—by virtue of union activities financed out of union dues—for candidates not of their choosing; with passage of public financing that concept was not only extended to everybody, but extended twice to the union member. First, he sees the union spend his dues for a candidate he does not favor, then he sees the Government spend his tax dollars in the same fashion. The very least we can do, instead of providing public financing of congressional campaigns, is to do away with the most discriminatory of these two evils—the use of compulsory union dues for political purposes.

To that end, I have decided to reintroduce a bill I first introduced back in 1971 before public financing was even likely. My bill would make it a crime, punishable by a $5,000 fine or 1 year in prison, or both, for any labor leader to spend "* * * dues, assessments, or other moneys collected by any person covered by an agreement requiring membership in such labor organization as a condition of employment for any political purpose whatsoever * * *." Left unaffected would be political or lobbying activities financed by voluntary contributions and lobbying activities directly related to legislation affecting wages, hours, and working conditions.

Under the circumstances, I think enactment of this legislation would be both timely and appropriate. Aside from the moral issues involved, amending current law to reduce the advantage public financing of campaigns gives the special interest, can only benefit the national interest. And there is no doubt that organized labor is a special interest group; not only does it represent less than one-quarter of all American workers, but it is recognized as a special interest group under both labor and antitrust law. Were it not for that fact, compulsory membership in labor unions would not be a fact of life and the bill I am proposing would not be necessary.

But compulsory membership, despite the existence of first amendment guarantees of freedom of association, is a fact of life; and given the advantages—to the unions—of combining its financial features with the existing campaign financing law, my bill is necessary. If there was any doubt about that my colleagues might take a look at Mr. Lofton's column and, to that end, I insert it in the RECORD at this time:

LABOR AND PUBLIC FINANCING

WASHINGTON.—How many times have you heard it said, by those who favored it, that financing last year's presidential elections with our federal tax monies was a great idea because now, at long last—praise the Lord and Hallelujah!—finally, after all these years, we have a man in the White House who is "free" and in no way indebted to any "special interest" groups?

Well, if your experience has been the same as mine, you've heard this repeatedly. Some would say, like me, that we've heard this asserted ad nauseam. But what you've not heard said over and over again, if at all, is that this is simply not true. What is true is that despite the 1974 and 1976 amendments to the campaign finance law, Jimmy Carter has assumed the presidency in hock up to his eyeballs to Big Labor.

(Organized labor must, by definition, be considered a "special interest" since George Meany and Company represent only about one in four members of the American work force. Even then, the word "represent" is used here loosely because the union leadership doesn't necessarily speak for the rank-and-file on all issues.)

Writing in this month's "National Journal," a Washington-based weekly that covers politics and government, reporter Michael Malbin observes:

"Public financing for the general election campaign shut off private contributions to the two major presidential candidates. Contributions to the national party committees were permitted, but even this was limited. In contrast, labor was able to spend as much as it wanted to in communicating with union members and their families, registering them to vote and getting them to the polls."

The "net result" of the new campaign finance law, Malbin writes, is "that a law that appeared to be even-handed in theory has proven to be uneven in practice. With the virtual extinction of the individual big giver, a number of different groups appear to be the gainers in terms of political influence. But when the relative positions of these groups are assessed, labor comes out well ahead of the rest."

Although it is impossible to determine with any precision just exactly how much money Big Labor spent in behalf of the Carter-Mondale ticket, says Malbin, a "conservative estimate" puts this amount at $8.5 million. Uncounted and additional unreported spending "almost certainly" pushes this total up to or over the $11 million mark, which is over half the $21.8 million the ticket was legally allowed to spend under the new federal campaign finance law.

On so-called "internal communications" with its members, which are not limited by law, the AFL–CIO reported spending $400,558, of which $315,982 was spent to help Carter. Most of the $289,139 spent by the United Auto Workers (UAW), and most of the $120,424 spent by the Communications Workers of America for this same purpose, was also spent on the Carter campaign.

According to "National Journal" estimates, Big Labor reported spending $26 on behalf of Carter for every dollar anybody spent on behalf of President Ford for "internal communications," and this figure counts only those "communications" required to be reported by law.

Malbin notes that the help Carter received from Big Labor in just this form alone exceeded the sum that Nixon got in 1972 from any single source, with the sole exception of a $2.1 million contribution from Clement Stone, a Chicago insurance executive. But, since Nixon outspent Carter almost three-to-one, Big Labor's "internal communications" spending for Carter was more important proportionately than Stone's money was to Nixon.

Registration and get-out-the-vote drives bankrolled by Big Labor in behalf of the Carter-Mondale ticket, and also unlimited by law, were even more important financially and politically than was "internal communications" spending, says Malbin.

While no hard figures are available, AFL–CIO and UAW sources are quoted as saying that their unions spent about $3 million each on these efforts, which "probably played a decisive role in Carter's victory."

Malbin writes that because they were so intertwined:

"By the time the campaign was over, it became difficult to distinguish between labor's efforts and those of the Democratic National Committee (DNC) or Carter . . . This network enabled the DNC and organized labor to target their efforts in a manner that best fit the Carter campaign strategy.

"It meant that registration efforts could be concentrated in large states that Carter's polls showed to be up for grabs. It also meant that the DNC and labor did not duplicate their efforts. In some key states, labor's registration efforts were almost the only ones in operation."

But this is not all. Besides all this, there were a variety of other "miscellaneous activities" by Big Labor in support of the Carter-Mondale ticket. For example, Robert Hartman, associate director of the National Education Association, says his union spent more than $400,000 to help elect Carter-Mondale.

In conclusion, Malbin writes:

"The flat-grant public financing system creates a possibility that never existed before. When labor unites behind one candidate, as it did in 1976, a flat-grant system in which private contributions are prohibited leaves it in a position no other group can match. Little wonder that labor calls the campaign finance experiment a success."

And, little wonder that Big Labor is now going all-out lobbying very hard to see that in the future all congressional elections are "publicly financed." There's nothing like a monopoly to assure success.

PERSONAL EXPLANATION

HON. STANLEY LUNDINE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 26, 1977

Mr. LUNDINE. Mr. Speaker, I regret that I was unavoidably detained in my district on business last Monday and, therefore, was not able to be here to record my vote on H.R. 3340, the business use of homes for day care services bill. I am a cosponsor of this legislation, because I believe that in tightening the deduction for use of the home for business purposes, an unintentional hardship was worked on family day care centers in my district and throughout the country. These centers attempt to provide a warm home environment for child care and receive no other Federal assistance. Family day care providers, however, would be thwarted in this goal without H.R. 3340. Otherwise, to preserve their deductions, providers would be required to isolate that portion of the home used for day care and keep their own family out of that portion of home during nonbusiness hours. This bill by restoring the deduction in this instance would preserve a homelike atmosphere in the day care center while leaving intact the general intent of the business deduction reforms of the 1976 Tax Reform Act.

THE LIBRARY BUILT BY SHARING

HON. GENE TAYLOR
OF MISSOURI
IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 26, 1977

Mr. TAYLOR. Mr. Speaker, while more and more of our citizens seem to be looking to the Federal Government to solve more and more of their problems, I am proud to state that we still have those rugged individuals down in the Ozark hills who firmly believe in themselves and in their ability to care for their own needs without calling on the Government for assistance.

On Sunday afternoon, April 24, it was my privilege to participate in the results of such an endeavor, the dedication of the new Taneyhills Community Library located in Branson, Mo.

The new $100,000 library building was financed by club funds, donations, and financial aid from many groups. In addition, volunteer services and materials, plus a low interest loan were added in.

Mr. Speaker, the Taneyhills Community Library was built by the same spirit that created this Nation. It is an outstanding example of what people can do for themselves and their communities when they work together to reach a common goal.

Kathleen Van Buskirk recently reviewed the history of the library in an article that was published in the Ozark Mountaineer. I would like to submit that story so that my colleagues might also share in this rewarding endeavor. The article follows:

THE LIBRARY BUILT BY SHARING

(By Kathleen Van Buskirk)

If Bill Ellen Hall and Josephine Madry are wearing triumphant smiles during Library Week this spring their friends will understand.

For the past 44 years, supporting the Taneyhills Community Library in Branson, Mo., has been part of the two women's daily lives. This year's Library Week plans include dedication of a new $100,000 library building which they, as hard-working members of the Taneyhills Library Club, helped to build.

Josephine and her late husband, James Madry, moved to Branson from Aurora in 1925. While he operated the Madry Lumber Company and later became president of the Security Bank, she helped develop and operate the Anchor Village Resort.

Bill Ellen left her home near Green Forest, Ark., when she was 12 years old to attend high school at the School of the Ozarks, and on completion of normal school at Warrensburg, she returned to Taney County. Three years ago she retired after 40 years of teaching grade school. Her busy life also included helping her late husband, Ted Hall, run a store in Branson and raising their son, Jerry.

Mrs. Hall was a new bride in 1931 when she and Mrs. Madry signed the membership list at the first meeting of the Taneyhills Study Group. Members of the "Maids and Matrons" class at the Branson Presbyterian Church formed the club in an effort to break the cultural isolation of the area. The two young women had no way of knowing they were making a lifelong commitment.

Mrs. Madry credits the library's beginnings to her friend, Fannie Dawes. "I had taken over the Sunday School class, but I didn't enjoy teaching."

"Mrs. Dawes and her husband, Frank, had moved from Chicago for the sake of their chronically ill small son. Frank Dawes' uncle was Charles G. Dawes, who became Vice President of the United States in 1925. There was tremendous activity surrounding the family in Chicago in the mid-20's and Fannie and Frank just had to leave. They moved south of Hollister and raised chickens until Frank went to work for the REA in 1940.

"When tutors started the boy's schooling, Fannie had time to spare, and I was happy to turn the class over to her. Right away she saw that we needed a study group."

Though the club name didn't reflect its responsibilities until 1945, members started the library in 1933. Artists, lawyers and visitors of note were introducing the young women to a new world, but few books were available to foster their knowledge.

"The plan to pool our books in a library generated much enthusiasm," Mrs. Hall recalls. "The J. J. Pattons offered us a hall in the Branson Hotel, and someone donated shelves."

"We were so excited about it. Members mentioned our efforts in letters to friends, and books came by mail from all over. Some arrived with postage due, so we started raising money for expenses. We couldn't buy new books for several years. Later we bought best sellers and rented them to defray the cost."

"Dorothy Jaenicke was our first librarian," Mrs. Hall remembers. "She served without pay for several years, but we still had an annual budget of $105, one hundred for the library and $5 for the club. We served our own monthly luncheons so the 25c dues could help pay library bills, and we provided meals for other groups, bringing the food from our own larders until that got too costly."

The first annual report showed 500 volumes crowding the hotel hall. Branson businessmen offered to pay three months' rent on larger quarters, and January, 1935, found the library moving to what is now Aehle's Jewelry Store.

Both Mrs. Hall and Mrs. Madry remember well the moving process, which was repeated several times as the book collection increased. The store front building, shared with a real estate office, quickly became overcrowded, and the $15 monthly rent was hard to support once the subsidy ended.

Friends at the Civil League cleared two small rooms in their building, and book borrowers found their community library in offices that now house the automobile licensing bureau.

The librarian's job grew increasingly demanding. When 1,514 books were moved next door to the ground floor of the new Community Building in January, 1937, reports showed 4,261 books loaded during the previous 12 months! The club faced more fundraising, for surely the librarian deserved a small salary.

An ardent library supporter introduced a new, continuing source of income. Mary Elizabeth Mahnkey had not transportation from her Oasis home, south of Long Creek, so she couldn't attend monthly lectures, but she loved books and borrowed many from the library.

For 53 of her 65 years Mrs. Mahnkey had written a newspaper column about community events. In July, 1935, her warm-hearted news notes and story-filled poems brought her national acclaim as Crowell Publishing Company's "best country journalist of the year." Friends suggested a book of her poems be published, and the writer decided to help the library by letting the Taneyhills Study Group handle the sales and reap any profits.

Club records show that three printings of her *Ozark Lyrics* were ordered and sold out before the books arrived. By today's economics the resulting funds were small, but club members were delighted. In September, 1935, Mrs. Mahnkey became the group's first honorary member.

Elated members then investigated further book sales. "The Shepherd of the Hills", Harold Bell Wright's 1907 novel about White River hill folk, was long out of print, but visitors frequently looked for copies.

"When we decided to get Wright's book back in print," Mrs. Hall recalls, "we had to get reprint rights and arrange production on a continuing basis.

"The first books arrived in the late 1930's and Mrs. Jaenicke and I went all over the area, talking stores and tourist places into taking them for resale. During my first term as president in 1940 we sold 1,100 copies."

The project was so successful that Wright's book now stands among the country's all-time bestsellers. In 1976 some 6,000 copies were distributed through tourist centers, stores and restaurants.

With only one part-time librarian, club members have been called on to assist the library's operation in many ways.

"In the mid-forties," Mrs. Madry smiles wryly, "after several very wet years, books began moulding on the shelves. The club board arranged to move the 5,000 volumes upstairs. All our 70 members worked to clean and catalogue the books, and businessmen and civic clubs helped refinish the new rooms."

Over the years 32 women have guided the club as president, coordinating the many money-raising efforts. New members who joined for the cultural and social contacts found, as did the original members, that the library was a big responsibility.

Today, the club has 200 members. Those who have worked for so many years to keep the library operating share the load with daughters and with new residents.

Nonetheless, Mrs. Hall served again as president in 1964 and was finance chairman in 1975 when the campaign to build the new library began. And Mrs. Madry, in addition to serving on the library board, has spent considerable time in the 1970's compiling historical records and helping re-catalogue the books.

From the early 1940's both women recall repeated discussions of the need for a permanent building, but funds were never available.

In 1975 many problems faced the library. Shelves were crammed with 18,000 books. Boxes of still usable volumes, displaced by new acquisitions, cluttered the aisles. Cartons of "Shepherd of the Hills" books awaiting distribution filled one wall. Elderly patrons complained of the stairs, and there were indications the library might soon be displaced by city offices that already occupied the ground floor below.

The possibility of tax support was studied, but Taney County has no towns large enough to vote a library tax, and even if voters approved a county levy, it would be many years before a building project would be possible.

So, a little less than two years ago, encouraged by sufficient donations to buy a desirable lot, and sparked by Jane Arend, Mrs. Madry's energetic niece who was club president in 1973 and 1974, the club embarked on a building campaign.

Such is the loyalty that the volunteer library has generated over the years, that enough funds were collected within a year to erect the building shell. Volunteer services and material, plus a low interest loan, made possible the completion of the project in time for a December, 1976, opening. Dedication ceremonies do not, of course, mark the end of the fund-raising, for the loan must be paid and the operating budget is increased by several thousand dollars.

Mrs. Mahnkey reported years ago that she had walked many a mile to borrow a book.

Josephine Madry and Bill Ellen Hall don't count the effort in miles but their commitment of almost half a century continues, so that books will be available for those who love to read.

ALLAN BROWNFELD COMMENTS ON AID TO HANOI AS IMMORAL

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 26, 1977

Mr. KEMP. Mr. Speaker, the recent visit of the U.S. mission to the Communist regime was warmly received as one might expect from a government soliciting a handout from the American taxpayers. Aid to the Hanoi regime assumes a far more important dimension than merely another foreign aid boondoggle. Not only does the Hanoi regime occupy South Vietnam as a consequence of a broken international agreement, but it is also one of the worst regimes of an era characterized by odious totalitarian regimes. In assimilating power in 1956, it routinely executed 50,000 of its own citizens simply to facilitate the collectivization of its agricultural system. Upon taking power in South Vietnam, they have placed more than 300,000 South Vietnamese priests, civil servants, teachers, and former officials of the regime in concentration camps which rival the Gulag Archipelago in raw brutality.

A new organization led by the widow of an American military officer killed by the North Vietnamese, Mrs. Barbara Keating, known as the National Committee Against the Recognition of Communist Vietnam has recently been formed to remind us that a concern for human rights should not exclude Vietnam. Nor should we forget the sacrifice made by the thousands of Americans killed or wounded to help preserve human rights in Southeast Asia.

In a recent article published in Human Events, Allan C. Brownfeld, the very able journalist, has called attention to the situation now apparent—even to former devotees of the Communist order in North Vietnam. I ask unanimous consent that Mr. Brownfeld's important essay be published in the RECORD at the conclusion of my remarks:

AID TO HANOI WOULD BE IMMORAL

(By Allen C. Brownfeld)

The government of Communist Vietnam gave the recent U.S. mission to Hanoi what has widely been called a "friendly reception." These words were, in fact, used in a New York Times headline in its issue of March 24 to describe the Hanoi meeting.

The fact is, however, that the mission led by UAW President Leonard Woodcock came back to the U.S. with little information about the several thousand Americans who are still listed as Missing in Action. They were provided with 12 bodies, two of which turned out not to be Americans at all.

What was certain at the Hanoi meeting was that the Communist regime wants U.S. aid, and it states clearly that it wants it in return for any further information about missing American servicemen. By any estimate, this is what we have traditionally called "blood money."

The Hanoi regime states that the U.S. "owes" it this money as "reparations" for the war. While President Carter rejects the notion that the U.S. owes a "debt" to Hanoi, he seems much too willing to entertain the idea of providing this brutal regime with financial assistance. He declared that the U.S. would "respond well" on the question of economic aid if the assistance was arranged as part of successful negotiations to open normal diplomatic relations.

President Carter's willingness to adopt such a conciliatory posture toward the totalitarian government in Hanoi flies in the face of his own rhetoric concerning human rights. He has applied stringent standards to Brazil, Uruguay, Argentina, Rhodesia and South Africa. Why not apply the same standards to an autocratic government which is responsible for the death of more than 50,000 Americans and the torture of thousands of prisoners of war?

It is a fact of life which many Americans prefer not to recognize that those who opposed the war in Vietnam, arguing that we were supporting "the wrong side," and that the Vietcong and National Liberation Front were virtuous, not really Communists at all, have now been proven wrong. Why have so many Americans who originally supported the war effort—Hubert Humphrey, Harold Brown, Cyrus Vance, Robert McNamara, etc.—seen fit to "admit" their error? Wasn't this simply pandering to the changing winds of public opinion which have now proven to be mistaken?

The fact is that the people we were fighting in Vietnam were exactly what we said they were. We said that the National Liberation Front was simply a tool of the North Vietnamese government, not an independent, nationalist body.

Recently the NLF was laid to rest in a quiet ceremony in Ho Chi Minh City (formerly Saigon). Also no longer in existence are the Vietcong, which have been melded into the regular army, the Provisional Revolutionary Government, which has been subsumed into the Hanoi government, the Lao Dong (Workers party), which has been coopted by the Communist party of Vietnam.

Martin Woollacott, writing in the distinguished English journal, the Manchester *Guardian*, declares that "It is clear that the NLF was never a true coalition of Communist and non-Communist forces, nor was it ever an independent Southern entity. The NFL has gone the way (i.e., into oblivion) of all the other organizations that once loomed large on the Vietnamese and the world horizon."

Even the "doves" of the war years now admit that the side they supported was not as virtuous as they naively believed. In December, a petition declaring that the Communist regime in Vietnam is a "gross abuser" of civil liberties—suppressing free speech and filling prisons with civilians accused of nothing more than possession of their religious and ideological beliefs—was presented to the permanent Vietnamese observer at the United Nations.

"The Communists were accused of grievous and systematic violations of human rights," including the detention of an estimated 300,000 Vietnamese in so-called "re-education" camps, the suppression of cultural and political expression and the stifling of dissent.

Who were the signers of this petition? Not conservatives. Not hawish military figures. Not spokesmen for the "Establishment." Instead, the signers included Hanoi's former friends on the American left: folksinger Joan Baez; Roger Baldwin, founder of the American Civil Liberties Union; Paul O'Dwyer, president of the New York City Council; the Rev. John Neuhaus, a founder of Clergy and Laymen Concerned about Vietnam; poet Allen Ginsberg. The list is a long one.

Vietnam is a slaughterhouse of the naive worldview of the American left. Even the *New York Review of Books*, a leader of the pro-Hanoi movement, recognizes its error. It recently reprinted an article from the French journal *L'Express*, by Andre Gelinas, a French-Canadian Catholic priest and Chinese scholar who settled in Vietnam in 1948, and was expelled in July 1976, 15 months after the North Vietnamese troops arrived in Saigon.

He observes that "the methods, the doctrine, and the very weight of the police bureaucratic apparatus" in the South "are entirely Russian." He reports that "In our Catholic education center we had some 80,000 volumes, a large number of which we had to burn. Lists were compiled of all . . . intellectuals. . . . An epidemic of suicides followed. Entire families killed themselves. . . . The regime evidently felt it had to take the population in hand and instill fear. One day I saw a little vendor who did not get out of the way quickly enough. A soldier took out his pistol and fired a bullet right next to his head."

This is the status of human rights in Vietnam. This is the regime which brutally tortured American prisoners of war and now refuses to account for those who are missing. To even consider financial aid to such a regime is immoral, and flies in the face of any real concern for human rights.

REPRESENTATIVE BONKER PROPOSES MILITARY AID CUTOFF TO ZAIRE

HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 26, 1977

Mr. BONKER. Mr. Speaker, I will be offering an amendment to strike the administration's fiscal year 1978 FMS request for Zaire of $30 million. My amendment to omit any fiscal year 1978 FMS funding for Zaire is based on the cold hard facts of the security situation in Zaire and the advisability of our involvement in it. The facts are these;

In 1974, DOD sent a military technical assistance team under General Rockwell to Zaire at the request of General Mobutu to survey the security needs of that country. Congress appropriated $19 million in FMS credits for Zaire for fiscal year 1976 to fund six C–130 aircraft, plus support, and some communication and transportation equipment. The last of this money is now being spent, with the departure of the last C–130 to Zaire.

With the end of the Angola war, in 1976, the Rockwell team returned to Zaire, again at Mobutu's request, to resurvey a decidedly shakier security situation. After its second visit, the Rockwell team issued a "consultant's" report, advising Mobutu how he might upgrade his armed forces to meet his perceived threat. A 15-year upgrading program was outlined which would result in the

equivalent of one modern army division, fully trained and supported.

The first tranche of the suggested upgrade program was a $38 million "impact package" to create one highly mobile armored cavalry squadron for use in Shaba. This package was to be funded by FMS appropriations of $10 million in fiscal year 1976T and $28 million in fiscal year 1977. The armored cavalry squadron, ACS, would be carefully created over 3 to 4 years, starting with armored cars and preliminary training and ending with the supply of one company of M–60 tanks and sophisticated training. The "impact package" was designed in phases, in consideration of Zaire's absorptive capacity. Initial contracts for the package were to be signed in April 1977 with the actual implementation to begin in the fall of 1977. Although the $38 million impact package funded in fiscal year 1976T and fiscal year 1977 represents the only outstanding USG FMS commitment to Zaire, the administration expects future requests from Zaire over the next decade or so to implement the rest of the original 15-year Rockwell program.

RECENT CRISIS

The 1977 timetable for contracting and implementing the impact package was scrapped because of the Shaba crisis; $17 million of the $38 million which was to have been spent on the package was used instead to pay for emergency nonlethal supplies shipped to Zaire since March 8 of this year. The sum of $21 million remains for implementation of the impact package—$17 million short of the necessary total.

FISCAL YEAR 1978 FMS REQUEST

The administration has requested $30 million for fiscal year 1978 FMS credits for Zaire. Since the impact package had already been funded by earlier appropriations, this $30 million was purely a contingency figure when it was proposed to OMB last fall, before the current crisis. At that time, with the exception of funding any cost over-runs in the impact package, there were no definite projects on which the $30 million was to be spent. Now, however, because of the diversion of $17 million of FMS credits originally destined for the impact package, part of the fiscal year 1978 $30 million authorization could conceivably be used to replenish the impact package funding.

I would argue against such replenishment at this time. The impact package was designed as a 3 to 4 year program and the start of its implementation seems certain to be delayed until 1978 at the earliest. The $21 million remaining in the pipeline from the fiscal year 1976T and fiscal year 1977 appropriations is enough to start the program off. There will be plenty of time to complete the necessary funding for the impact package with authorizations in fiscal year 1979. I believe that such a funding delay, which need not in fact delay the actual implementation of the package at all, is prudent for the following reasons:

The Rockwell estimates may need to be changed after the experience of the Shaba crisis. Zaire may need more, or less, or something different than that envisaged before Zairean troops had actually been tested in battle;

An effective fighting force needs more than just modern equipment and training. It needs morale, esprit, commitment—all of which are said to be in short supply in Zaire because of widespread corruption and maldistribution of income. It may be that no amount of equipment can create an effective fighting force in Zaire without a basic restructuring of the social and economic structure of the country, giving the soldiers something to fight for. If Mobutu is in fact another Ngo Diem Dinh, then our money is wasted. In short, I believe we should keep our fingers on the tap. Let the impact package start off with the funding already there and let us, over the next few years, monitor closely Mobutu's efforts to effect morale improvements, as well as military ones in the army. If he makes progress, then perhaps we go ahead to complete the impact package. If he does not, then it makes no sense to throw good money after bad.

Beyond the $17 million replenishment I have just argued against, there is even less justification for the remaining $13 million. With the 3 to 4 year impact package delayed, it makes no sense to consider funding for projects to follow that package in the 1980's—which in any case have yet to be designed. At this time, that $13 million constitutes a blank check which I strongly urge this body not to sign. If and when the impact package is successfully implemented, and Mobutu is able to genuinely improve morale in the Zaire Army, there will be plenty of time to fund further FMS credits for future fiscal years.

NEED FOR ACTION TO HALT TEXTILE INDUSTRY JOB LOSS DUE TO IMPORTS

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 26, 1977

Ms. OAKAR. Mr. Speaker, I am deeply concerned about the loss of jobs in this country due to imports, and of particular concern to me is the threat posed by the rising level of textile imports. Workers in the textile industry in Cleveland, Ohio, have been hit very hard by these imports. One union official reported to me that the clothing division of his union has lost 20 percent of its members because of imports.

Thus I am very interested in the negotiations that will be taking place to extend the multifiber arrangement under the General Agreement on Tariffs and Trade. Last week, the Informal House Textile Committee, of which I am a member, adopted a set of recommendations regarding the arrangement. For the information of my colleagues, I would like to insert its statement into the RECORD, along with a newspaper article which describes the concern that workers in Cleveland have over imports:

TEXTILE TRADE POLICY, A RESOLUTION OF THE INFORMAL HOUSE TEXTILE COMMITTEE, APRIL 20, 1977

The GATT Multifiber Arrangement (MFA) is presently scheduled to expire December 31, 1977. The President has endorsed the principle of orderly trade in textiles embodied in the MFA.

The Informal House Textile Committee is a bipartisan organization of Members working for a sound United States textile trade policy which will preserve the viability of the fiber-textile-apparel industry and the 2.3 million jobs its provides.

To that end, we:

(1) Support the MFA and its extension for a period of at least five years beyond 1977, with the present 6% quota growth factor reduced to a level no greater than domestic market growth; and with revision of those provisions which permit carryovers of unused ceilings to the following year, "borrowing" of ceilings from the following year, and "borrowing" from other categories.

(2) Urge that new bilateral agreements allow no quota growth in those categories of products already heavily impacted by imports, defining such impact in terms of total imports of a particular product from all countries; that such bilaterals limit year-to-year import growth when substantial unused quotas would result in excessively increased shipments; and that the provisions of the bilaterals be monitored and enforced more effectively.

(3) Request expeditious conclusion of a bilateral agreement with the Peoples Republic of China, the major remaining uncontrolled low-wage supplier of textiles and apparel to the United States, and suggest a U.S. policy of prompt negotiation of such bilaterals with any nation whose imports threaten or significantly impact the U.S. market.

(4) Urge that textile and apparel tariffs be cleanly and completely exempted from the present round of multilateral trade negotiations.

[From the Cleveland (Ohio) Plain Dealer, Apr. 14, 1977]

IMPORT CLOTHES ROB JOBS, RALLY TOLD—UNION LEADER ATTACKS CHEAP OVERSEAS LABOR

(By Joseph L. Wagner)

Organized labor protested yesterday the increasing imports of foreign clothing and said the trend has cost thousands of Americans their jobs.

Labor leaders in Cleveland and other cities told rallies that public pressure must be brought on Congress to impose strict import regulations.

More than 300 unionists, carrying signs and singing patriotic songs, marched on Public Square. They received assurances from representatives of area congressmen that legislation favoring imports will be opposed.

Sam Janis, regional direcotr and an international vice president of the International Ladies' Garment Workers Union, called the increase in imports shocking.

He said the number of sweaters imported last year increased 111.5% over the previous year, sport coats, 44.9%; trousers, 36% mens' suits, 20.8%, and womens' coats, almost 35%.

Janis said the clothing industry lost 271,000 jobs between 1969 and 1975. The industry employs 2.3 million, one of the largest in the United States, he said.

"An unusually high proportion of the

workers are members of minority groups, women and others, who won't find it easy to obtain other jobs if imports keep taking jobs away," he said. "The result is more people on welfare, rising taxes—all the things our nation is trying to avoid."

Janis said much of the imported clothing is made by persons earning low wages, ranging from 38 cents an hour in Korea to 74 cents in Hong Kong.

"Consumers don't benefit from most of these imports," Janis said. "In most cases, the advantages of low wage costs are taken by the retailer who is able to improve his profit."

"We don't want to cut off trade or even reduce it," said Janis, "merely to regulate the flood."

He said Congress should act to reduce the annual growth of imports.

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of all meetings when scheduled, and any cancellations or changes in meetings as they occur.

As an interim procedure until the computerization of this information becomes operational, the Office of the Senate Daily Digest will prepare such information daily for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Wednesday, April 27, 1977, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

APRIL 28

8:00 a.m.
Agriculture, Nutrition, and Forestry
To continue markup of S. 275, to amend and extent through 1982, the Agriculture and Consumer Protection Act of 1973.
322 Russell Building

9:00 a.m.
Governmental Affairs
To hold hearings on the nominations of Gladys Kessler, Robert M. Scott, Robert A. Shuker, Annice M. Wagner, and Paul R. Webber, each to be a judge of the District of Columbia Superior Court.
457 Russell Building

9:30 a.m.
Appropriations
Interior Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for ERDA.
1114 Dirksen Building
Commerce, Science, and Transportation
Consumer Subcommittee
To continue hearings on S. 403, the proposed National Product Liability Insurance Act.
5110 Dirksen Building
Commerce, Science and Transportation
Merchant Marine and Tourism Subcommittee
To hold hearings to receive testimony in connection with delays and congestion occurring at U.S. airports-of-entry.
1202 Dirksen Building
Human Resources
Child and Human Development Subcommittee
To consider S. 961, to implement a plan designed to overcome barriers in the interstate adoption of children, and proposed legislation to extend the Child Abuse Prevention and Treatment Act.
Until 10:30 a.m. 4232 Dirksen Building

10:00 a.m.
Appropriations
State, Justice, Commerce, Judiciary Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for the Federal Maritime Commission, Renegotiation Board, and SBA.
S–146, Capitol
Banking, Housing, and Urban Affairs
Securities Subcommittee
To hold hearings on proposed fiscal year 1978 authorizations for the SEC.
5302 Dirksen Building
Energy and Natural Resources
Energy Research and Development Subcommittee
To resume hearings on S. 419, to test the commercial, environmental, and social viability of various oil-shale technologies.
3110 Dirksen Building
Environment and Public Works
Nuclear Regulation Subcommittee
To resume hearings on proposed fiscal year 1978 authorizations for the Nuclear Regulatory Commission.
4200 Dirksen Building
Finance
To mark up proposed legislation authorizing funds for fiscal year 1978 for the U.S. International Trade Commission, and to consider pending nominations.
2221 Dirksen Building
Foreign Relations
International Operations Subcommittee
To hold hearings to receive testimony from representatives of Voice of America.
4221 Dirksen Building
Governmental Affairs
Intergovernmental Relations Subcommittee
To mark up S. 2, to require reauthorization of Government programs at least every 5 years (proposed Sunset Act), and S. 904, to establish a center within OMB to provide current information on Federal domestic assistance programs.
357 Russell Building
Select Intelligence
To continue hearings with a view to determine whether disclosure of fiscal year 1978 budget figures for Government intelligence activities is in the public interest.
S–407 Capitol

2:00 p.m.
Appropriations
Transportation Subcommittee
To continue hearings on porposed budget estimates for fiscal year 1978 for the National Highway Traffic Safety Administration.
1224 Dirksen Building

2:30 p.m.
Environment and Public Works
Water Resources Subcommittee
To mark up legislation on projects which may be included in proposed Water Resources Development Act amendments.
4200 Dirksen Building

APRIL 29

8:00 a.m.
Agriculture, Nutrition, and Forestry.
To continue markup of S. 275, to amend and extend through 1982, the Agriculture and Consumer Protection Act of 1973.
322 Russell Building

8:30 a.m.
Commerce, Science, and Transportation.
Science, Technology, and Space Subcommittee
To continue hearings on S. 1069, increasing authorizations for programs under the Toxic Substances Control Act for fiscal years 1978 and 1979; and S. 899, the Toxic Substances Injury Assistance Act.
6202 Dirksen Building

9:30 a.m.
Commerce, Science, and Transportation
Consumer Subcommittee
To continue hearings on S. 403, the proposed National Product Liability Insurance Act.
5110 Dirksen Building
Human Resources
Labor Subcommittee
To continue hearings on S. 995, to prohibit discrimination based on pregnancy or related conditions.
Until noon 4232 Dirksen Building

10:00 a.m.
Appropriations
State, Justice, Commerce, Judiciary Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1978 for the Judiciary and FCC.
S–146, Capitol
Banking, Housing, and Urban Affairs
Rural Housing Subcommittee
To hold hearings on rural housing legislation with a view to reporting its final recommendations thereon to the Budget Committee by May 15.
5302 Dirksen Building
Energy and Natural Resources
Energy Production and Supply Subcommittee
To hold hearings on S. 259, to extend certain noncompetitive oil and gas leases in Wyoming.
457 Russell Building
Energy and Natural Resources
Subcommittee on Parks and Recreation
To hold hearings on S. 1125, authorizing the establishment of the Eleanor Roosevelt National Historic Site in Hyde Park, N.Y.
3110 Dirksen Building
Environment and Public Works
Nuclear Regulation Subcommittee
To mark up proposed legislation authorizing funds for the Nuclear Regulatory Commission.
4200 Dirksen Building
Governmental Affairs
Energy, Nuclear Proliferation, and Federal Services Subcommittee
To resume hearings on S. 897, to strengthen U.S. policies on nuclear nonproliferation, and to reorganize certain nuclear export functions.
6226 Dirksen Building
Governmental Affairs
Intergovernmental Relations Subcommittee
To mark up S. 2, to require reauthorization of Government programs at least every 5 years (proposed Sunset Act), and S. 904, to establish a center within OMB to provide current information on Federal domestic assistance programs.
357 Russell Building

2:30 p.m.
Environment and Public Works
Water Resources Subcommittee
To mark up legislation on projects which may be included in proposed Water Resources Development Act amendments.
4200 Dirksen Building

MAY 2

8:00 a.m.
Agriculture, Nutrition, and Forestry
To continue markup of S. 275 to amend and extend through 1982, the Agriculture and Consumer Protection Act of 1973.
322 Russell Building

9:30 a.m.
Commerce, Science, and Transportation
To hold hearings on S. 1347, to establish a National Advisory Committee on Oceans and Atmosphere.
5110 Dirksen Building

10:00 a.m.
Environment and Public Works
Nuclear Regulation Subcommittee
To mark up proposed legislation authorizing funds for the Nuclear Regulatory Commission.
4200 Dirksen Building
Rules and Administration
To hold hearings to receive testimony in behalf of requested funds for activities of Senate committees and subcommittees.
301 Russell Building
Environment and Public Works.
Water Resources Subcommittee
To resume hearings on the proposed replacement of Lock and Dam 26, Alton, Ill.
4200 Dirksen Building
*Select Small Business
To hold hearings on proposed fiscal year 1978 authorizations for programs of the Small Business Administration.
424 Russell Building

1:00 p.m.
Commerce, Science, Transportation, and Human Resources
To hold hearings jointly on S. 1350, increasing authorizations for programs under the National Sea Grant Program Act for fiscal years 1978 and 1979.
5110 Dirksen Building

2:30 p.m.
Environment and Public Works
Water Resources Subcommittee
To continue markup of legislation on projects which may be included in proposed Water Resources Development Act amendments.
4200 Dirksen Building

MAY 3

8:00 a.m.
Agriculture, Nutrition, and Forestry
To continue mark up of S. 275, to amend and extend through 1982, the Agriculture and Consumer Protection Act of 1973.
322 Russell Building
Appropriations
Interior Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1978 for the Smithsonian Institution.
1114 Dirksen Building

9:00 a.m.
Energy and Natural Resources
To hold hearings to receive testimony on the President's energy proposals from Dr. Schlesinger.
1202 Dirksen Building

9:30 a.m.
Environment and Public Works
Water Resources Subcommittee
To mark up legislation on projects which may be included in proposed Water Resources Development Act amendments.
1224 Dirksen Building
Judiciary
Antitrust and Monopoly Subcommittee
To hold oversight hearings on the effectiveness of antitrust enforcement by the Justice Department and FTC.
2228 Dirksen Building

10:00 a.m.
Banking, Housing, and Urban Affairs
To hold oversight hearings on U.S. monetary policy.
5302 Dirksen Building
Commerce, Science, and Transportation
Consumer Subcommittee
To hold hearings on S. 1288, proposed legislation amending the Federal Trade Commission Act.
5110 Dirksen Building
Environment and Public Works
Resource Protection Subcommittee
To resume hearings on proposed authorizations for fiscal years 1978 for the Energy Research and Development Administration.
4200 Dirksen Building
Governmental Affairs
To hold hearings on S. 555, to establish Federal offices to effect and implement certain reforms in the Federal Government, and related legislation: S. 113, 290, 383, and 673.
3302 Dirksen Building
Rules and Administration
To hold hearings to receive testimony in behalf of requested funds for activities of Senate committees and subcommittees.
301 Russell Building

10:30 a.m.
Commerce, Science, and Transportation
To hold a business meeting.
235 Russell Building

2:30 p.m.
Banking, Housing, and Urban Affairs
To mark up S. 208, proposed National Mass Transportation Assistance Act, and on proposed fiscal year 1978 authorizations for the SEC.
5302 Dirksen Building
Commerce, Science, and Transportation
To hold hearings on the nomination of Fabian Chavez, Jr., of New Mexico, to be an Assistant Secretary of Commerce for Tourism.
6226 Dirksen Building

MAY 4

9:00 a.m.
Energy and Natural Resources
Energy Research and Development Subcommittee
To continue markup of proposed fiscal year 1978 authorizations for ERDA.
Room To Be Announced

9:30 a.m.
Human Resources
Employment, Poverty, and Migratory Labor Subcommittee
To consider H.R. 2992, to amend and extend the Comprehensive Employment and Training Act, and S. 1242, to provide employment and training opportunities for youth.
Until 1 p.m. 1202 Dirksen Building
Judiciary
Antitrust and Monopoly Subcommittee
To continue oversight hearings on the effectiveness of antitrust enforcement by the Justice Department and FTC.
2228 Dirksen Building
Rules and Administration
To hold hearings on S. 1072, to establish a universal voter registration program; S. 926, to provide for public financing of primary and general elections for the U.S. Senate; and the following bills and messages which amend the Federal Election Campaign Act: S. 15, 105, 962, 966, 1320, and 1344, President's message dated March 22, and recommendations from the FEC submitted March 31.
301 Russell Building

10:00 a.m.
Appropriations
Transportation Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the Federal Highway Administration.
1224 Dirksen Building
Banking, Housing, and Urban Affairs
To consider all proposed legislation under its jurisdiction with a view to reporting its final recommendations thereon to the Budget Committee by May 15.
5302 Dirksen Building
Commerce, Science, and Transportation
Consumer Subcommittee
To continue hearings on S. 1288, proposed legislation to amend the Federal Trade Commission Act.
235 Russell Building
Energy and Natural Resources
Parks and Recreation Subcommittee
To hold hearings on H.R. 5306, Land and Water Conservation Fund Act amendments.
3110 Dirksen Building
Governmental Affairs
To continue hearings on S. 555, to establish Federal offices to effect and implement certain reforms in the Federal Government, and related legislation: S. 113, 290, 383, and 673.
3302 Dirksen Building

1:00 p.m.
Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee
To resume hearings on S. 1069, increasing authorizations for programs under the Toxic Substances Control Act for fiscal years 1978 and 1979; and S. 899, the Toxic Substances Injury Assistance Act.
5110 Dirksen Building

MAY 5

9:00 a.m.
Energy and Natural Resources
To consider proposed fiscal year 1978 authorizations for ERDA.
3110 Dirksen Building

9:30 a.m.
Environment and Public Works
To mark up legislation on projects which may be included in proposed Water Resources Development Act amendments.
4200 Dirksen Building
Judiciary
Antitrust and Monopoly Subcommittee
To continue oversight hearings on the effectiveness of antitrust enforcement by the Justice Department and FTC.
2228 Dirksen Building
Rules and Administration
To continue hearings on S. 1072, to establish a universal voter registration program; S. 926, to provide for public financing of primary and general elections for the U.S. Senate; and the following bills and messages to amend the Federal Election Campaign Act: S. 15, 105, 962, 966, 1320, and 1344, President's message dated March 22, and recommendations of the FEC submitted March 31.
301 Russell Building

10:00 a.m.
Banking, Housing, and Urban Affairs
To consider all proposed legislation under its jurisdiction with a view to reporting its final recommendations thereon to the Budget Committee by May 15.
5302 Dirksen Building
Commerce, Science, and Transportation
Consumer Subcommittee
To hold hearings on S. 957, to promote methods by which controversies involving consumers may be resolved.
5110 Dirksen Building
Governmental Affairs
To continue hearings on S. 555, to establish Federal offices to effect and implement certain reforms in the

Federal Government, and related legislation: S. 113, 290, 383, and 673.

To hold hearings on S. 103, 667, and 785, to convey certain Federal land to the Ely Indian Colony, Paiute, and Shoshone Tribes.
Room to be announced

MAY 19

10:00 a.m.
Banking, Housing, and Urban Affairs
To hold hearings on S. 695, to impose on former Federal procurement personnel an extended time period during which they may not work for defense contractors.
5302 Dirksen Building

MAY 20

9:00 a.m.
Energy and Natural Resources
Public Lands and Resources Subcommittee
To hold oversight hearings on the implementation of the Wild Horses and Burros Act.
3110 Dirksen Building

10:00 a.m.
Banking, Housing, and Urban Affairs
To continue hearings on S. 695, to impose on former Federal procurement personnel an extended time period during which they may not work for defense contractors.
5302 Dirksen Building

MAY 23

10:00 a.m.
Banking, Housing, and Urban Affairs
To continue hearings on S. 695, to impose on former Federal procurement personnel an extended time period during which they may not work for defense contractors.
5302 Dirksen Building
Select Indian Affairs
To hold hearings on S. 905, the Central Arizona Indian Tribal Water Settlement Act of 1977.
Room to be announced

MAY 24

9:30 a.m.
Select Small Business
To resume hearings on alleged restrictive and anticompetitive practices in the eyeglass industry.
424 Russell Building

10:00 a.m.
Governmental Affairs
Subcommittee on Reports, Accounting, and Management
To resume hearings to review the processes by which accounting and auditing practices and procedures, promulgated or approved by the Federal Government, are established.
6202 Dirksen Building

MAY 25

9:30 a.m.
Select Small Business
To continue hearings on alleged restrictive and anticompetitive practices in the eyeglass industry.
424 Russell Building
Select Indian Affairs
To hold hearings on S. 660, seeking an agreement with the Cherokee, Choctaw, and Chickasaw Indian Tribes of Oklahoma for the purchase or lease of their rights in the riverbed of the Arkansas River.
Room to be announced
Veterans' Affairs
To hold hearings on S. 247, to provide recognition to the Women's Air Forces Service Pilots.
Until noon 318 Russell Building

1:00 p.m.
Governmental Affairs
Governmental Efficiency Subcommittee
To hold hearings to receive testimony on a GAO study alleging inaccurate financial records of the Federal flood insurance program.
1224 Dirksen Building

MAY 26

9:30 a.m.
Select Small Business
To continue hearings on alleged restrictive and anticompetitive practices in the eyeglass industry.
235 Russell Building

10:00 a.m.
Governmental Affairs
Subcommittee on Reports, Accounting, and Management
To continue hearings to review the processes by which accounting and auditing practices and procedures, promulgated or approved by the Federal Government, are established.
6202 Dirksen Building

JUNE 6

10:00 a.m.
Select Indian Affairs
To hold oversight hearings on the Indian Education Reform Act (P.L. 93-638).
Room to be announced

JUNE 7

10:00 a.m.
Select Indian Affairs
To continue oversight hearings on the Indian Education Reform Act (P.L. 93-638).
Room to be announced

JUNE 13

9:30 a.m.
Commerce, Science, and Transportation
Communications Subcommittee
To hold oversight hearings on the cable TV system.
235 Russell Building

JUNE 14

9:30 a.m.
Commerce, Science, and Transportation
Communications Subcommittee
To continue oversight hearings on the cable TV system.
235 Russell Building

JUNE 15

9:30 a.m.
Commerce, Science, and Transpotration
Communications Subcommittee
To continue oversight hearings on the cable TV system.
235 Russell Building

CANCELLATIONS

MAY 3

9:00 a.m.
Energy and Natural Resources
Energy Research and Development Subcommittee
To mark up proposed fiscal year 1978 authcrizations for ERDA.
3110 Dirksen Building

10:00 a.m.
Energy and Natural Resources
Energy Conservation and Regulation Subcommittee
To hold hearings to receive testimony on Federal Energy Administration price policy recommendations for Alaska crude oil.
3110 Dirksen Building

SENATE—*Wednesday, April 27, 1977*

(Legislative day of Monday, February 21, 1977)

The Senate met at 10:30 a.m., on the expiration of the recess, and was called to order by Hon. EDMUND S. MUSKIE, a Senator from the State of Maine.

Mr. MUSKIE. We are delighted to have as our guest chaplain this morning, on the occasion of his 25th anniversary as president of the University of Notre Dame, Father Theodore M. Hesburgh.

PRAYER

The Reverend Father Theodore M. Hesburgh, C.S.C., president, University of Notre Dame, Notre Dame, Ind., offered the following prayer:

Almighty God and Father, we pray this day for our country and for those who formulate and enact its laws. We pray that You may always inspire them with a deep sense of justice, for without justice there are no good laws and no civic peace. We pray that You also give them the wisdom to know what can and should be legislated and what cannot. We pray that You give them insight to ask first and only what is right, not what is popular, and having seen the right, to follow its course courageously, whatever the cost. And finally, Lord, we pray that we may follow where they lead, support what they rightly enact, espouse the justice that good laws represent and achieve for ourselves, our country, and our world the peace that is not just the absence of war, but, more important, the tranquility of order established by law and respect for law. We ask this in the name of the Father, the Son, and the Holy Spirit. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The second assistant legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., April 27, 1977.

To the Senate:

Being temporarily absent from the Senate on official duties, I appoint Hon. EDMUND S. MUSKIE, a Senator from the State of Maine, to perform the duties of the Chair during my absence.

JAMES O. EASTLAND,
President pro tempore.

Mr. MUSKIE thereupon took the chair as Acting President pro tempore.

THE JOURNAL

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Journal of the proceedings of Tuesday, April 26, 1977, be approved.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

HOW NOT TO END NUCLEAR PROLIFERATION

Mr. BAKER. Mr. President, Sunday's Washington Post published a most insightful article by our colleague in the House, MIKE MCCORMACK. Representative MCCORMACK's thoughts, under the title "How Not To End Nuclear Proliferation," deserve the attention of all of us.

I ask unanimous consent that this article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Apr. 24, 1977]

HOW NOT TO END NUCLEAR PROLIFERATION

(By MIKE MCCORMACK)

President Carter's recent proposals to modify America's long-range nuclear energy policies, although intended to reduce the threat of nuclear weapons proliferation, could well have precisely the opposite effect; and would probably deny our country its only chance to produce the energy we will need for economic stability.

The President has proposed that we:

Defer indefinitely nuclear fuel reprocessing;

Restructure our nuclear breeder program and defer the date of breeder commercialization;

Fund research and development programs in alternate fuel cycles—"which do not involve direct access to materials usable in nuclear weapons."

The President also proposed a substantial increase in the number of conventional nuclear power plants, and proposed increasing our uranium enrichment capacity for domestic and foreign fuel requirements.

I commend the President for his initiative in making the energy crisis a major national issue, and I support his emphasis on conservation and shifting from oil and gas to the use of coal. I commend him for his attempts to reduce the threat of nuclear war and nuclear weapons proliferation.

However, his specific recommendations dealing with nuclear fuel reprocessing and breeder programs are clearly based on several fundamental assumptions that are unsubstantiated, and which I believe constitute a serious threat to the success of any program to overcome the energy crisis. They have been challenged by experts in this country and by our friends overseas, with whom we have obligations under the Nuclear Non-Proliferation Treaty. The assumptions are based on a recent report, funded by the Ford Foundation, which the President has apparently embraced in its totality.

BREEDERS AND WEAPONS

The first of these assumptions is that a program of research, development and demonstration involving the liquid metal fast breeder (LMFBR) will, in itself, uniquely contribute to the potential for nuclear weapons proliferation and constitute a "potential security risk." There is no theoretical or other justification for this assumption, and all experience demonstrates that it has no foundation in fact.

As far as is known, no weapon has been made from any fuel produced in any commercial nuclear power plant in the world. (India's nuclear explosive did not come from a power plant, but was made from a research reactor sold to India by Canada. This demonstrates the ease with which many nations can, if they wish, make weapons totally outside the energy program.)

There is every reason to believe that diversion to weapons would be less likely for breeders, because breeder fuel will be more difficult to handle than fuel from conventional nuclear plants. The next U.S. demonstration breeder reactor to be built, known as the Clinch River plant, will produce only about one-third as much plutonium, one of the materials that can be used to make weapons, as is produced in conventional nuclear power plants now going on the line in this country.

The reason that weapons have not been made from commercial nuclear power plant fuel is that it is much cheaper and simpler to make nuclear weapons from natural uranium using facilities designed and built exclusively for that purpose. Trying to divert nuclear power plant fuel into weapons production is the most expensive, clumsiest, dangerous and inefficient way for any nation to make a weapon.

The virtue of a breeder is that future models, which should be in operation late in this century, will produce more fuel than they consume. Thus, with a breeder program, the otherwise useless uranium-238 (which comprises 99.3 per cent of natural uranium) provides a potential fuel resource of extraordinary value to almost every nation. The United States has many tons of purified uranium-238 in storage which, when used in a breeder program, will produce the electrical equivalent of more than five times all the oil possessed by all the oil-exporting nations combined.

It will be easily seen why the breeder offers many nations of the world their only discernible hope of relative energy independence from OPEC and from the nightmare of worldwide inflation and economic chaos.

However, bringing a breeder technology to the point where commercialization can occur (possibly starting about 1990 in the United States) constitutes a difficult engineering challenge requiring many years. This country has had a small breeder in operation in Idaho since 1963. The next larger one, the Fast Flux Test Facility, is about 80 per cent complete at Hanford, Wash. The Clinch River plant will be the third in the series, followed by a full-size prototype plant to be built before 1990. Other nations, including France, England, Germany, Japan and the Soviet Union, have breeder programs under way. Each nation has chosen the same specific type, the liquid metal fast breeder, because it holds the most economic and technological promise. France and the Soviet Union are far ahead of us, and all these nations probably will be soon. France may soon start selling breeders on the international market.

Knowledgeable scientists throughout the world, dedicated to minimizing the threat of nuclear weapons proliferation, scoff at the suggestion that these breeder development programs, by themselves, constitute any special threat of weapons proliferation. What is required, they insist, to provide protection against weapons proliferation originating from the civilian nuclear energy program is strict controls over the reprocessing of nuclear fuels, including the manufacture of new fuel elements from reprocessed fuel.

OTHERS WON'T FOLLOW

The next assumption is that, if the United States defers or abandons breeder development and nuclear reprocessing programs, other nations will follow our lead. This suggestion has left our friends overseas openmouthed with amazement. Japan and most Western European nations do not have our supply of fossil fuels, and we cannot supply them with their requirements for either nuclear or fossil fuels. In their view, it is absolutely vital to their survival to proceed promptly with their breeder programs.

Only Canada and Australia, which have large supplies of uranium and a comparatively small electrical demand, can afford the "throw-away nuclear fuel cycle." (This involves burying the fuel rods, with the unused uranium and newly created plutonium still inside, after they are removed from a power plant.) No more profligate waste of energy resources could be imagined. If we were to do this, it would deprive us of the only source of fuel available to give us a chance at energy self-sufficiency, even if the President's proposals for conservation, coal and solar energy are successful. Other nations will not follow us if we choose this course.

The next assumption is that there are some "safe" breeder technologies which this country, and the other countries of the world, have bypassed in favor of the "unsafe" liquid metal fast breeder program. This represents a flight of fancy apparently born of wishful thinking. The basic fact is that any nuclear material which will produce energy in a power plant can be extracted from the fuel and used in a weapon, if one is willing and able to build the complex and expensive equipment to do it. (There are three nuclear fuels; uranium 233 and 235 and plutonium 239. All three will produce energy in a power plant and all three can be used in weapons.)

An alternative to the LMFBR, breeding uranium-233 from thorium, is no safer than any other fuel cycle, especially since it, too, produces plutonium. The ease or complexity of extracting weapons material varies, but the difference between a simple technology and a more complex one is insignificant compared to the difficulty of diversion from one of them—if simple technological and institutional procedures are, as they should be, adopted for all.

Any reprocessing and fuel fabricating system can easily be designed to make clandestine diversion of nuclear fuel immeasurably difficult, even for large terrorist groups. Furthermore, all fuel cycles and all breeder technologies, whether they use uranium, thorium or plutonium, require, within a factor of two, the same amount of weapons material. In short, there is no magic or simple proliferation-proof technology to which the United States can switch if we abandon the LMFBR.

GAMBLING ON URANIUM

The most dangerous unverified assumption of the Ford Foundation report is that far more recoverable uranium will be found in this country than intense exploration has indicated will be available.

During recent years a series of studies by federal and private agencies, and more recently by the National Academy of Sciences, have agreed that the known and probable reserves of uranium in this country total about 1.8 million tons and that this should be considered as the "prudent planning base." It will provide fuel for about one-half of the nuclear energy production required by this nation during this century, using a throw-away cycle and the President's figures for conservation and other energy sources. The Ford Foundation report simply assumes that much more uranium will be found and that recycling will therefore be unnecessary.

No one can know for certain how much uranium will or will not be discovered but we would be taking a completely unacceptable risk if we were to proceed under the assumption that we will not need a breeder technology until sometimes in the 21st Century because fuel will be found as we need it. This may happen, but if it does not, we will almost certainly suffer a serious energy shortage, with all the attendant social and economic disruptions—and be without the technology to do anything about it. The result would be catastrophic. Therefore, our energy policy must include the development of one or more breeder technologies and the reprocessing of our nuclear fuel, one of the most important energy conservation undertakings available to us.

We don't need to decide now whether or not we must commercialize one breeder technology or another, or to what degree. Such decisions can be made as late as 1990. However, we must be able to make such a choice at that time, and the cost of the research and development, between now and then, is insignificant compared to the losses we will suffer if we don't have the breeder when we need it, or the benefits if we do.

REGIONAL REPROCESSING

There is a rational solution to the dilemma that nations face in attempting to provide adequate supplies of energy while minimizing the potential for nuclear weapons proliferation. I suggest that our national

energy policy should include a positive approach to making it work, rather than a negative approach that nothing can be done. If we adopt a positive approach, the other nations of the world may follow our leadership.

The rational solution involves the establishment of regional nuclear reprocessing centers, closely supervised by the International Atomic Energy Agency, with the involvement of all the participating nations. Two regional fuel centers could be established in the United States, and one each in Europe, Japan and the Soviet Union. (There is no secret national defense information involved.) Additional nuclear fuel centers could be established as needed, possibly in the Middle East and in South America.

In the United Statse all nuclear fuel would be owned by the Federal Government, which would be responsible for all facilities, security and accountability. Fuel elements would be leased to foreign and domestic utilities on the condition that they be returned and on condition that the leasing nations be subject to IAEA inspection.

No plutonium or other weapons material would ever be produced in pure form or in any form in which it could be used for weapons fabrication. Weapons material would always be blended with other materials to make it unworkable for weapons. For instance, a chemical reprocessing step would produce only blended uranium and plutonium, which could be used for fuel elements, but which would simply not work in a weapon.

Fuel fabricating facilities would be built immediately adjacent to the chemical separation plant, as would a facility for glassification of all waste for deep burial. New fuel elements could be slightly irradiated as a last step before being shipped from the facility. Thus, they would require the same heavy shielding that is necessary to return irradiated fuel elements from a nuclear power plant. There would be no shipment anywhere of any material which could be used for weapons, unless it would first be reprocessed through large, expensive, remote separation facilities.

With these procedures, it would be necessary to steal at least one, and perhaps several, 50-ton shipping casks in order to steal enough material to make a single weapon. Then it would be necessary to extract the weapons material, even from new fuels. This would reduce the potential for illicit diversion of weapons material virtually to zero.

U.S. LEADERSHIP REQUIRED

Of course, no system is perfect or foolproof. It should be obvious, however, that this nation and the world can have the energy required for economic stability and a high degree of nuclear security as well.

If some nation decides that, in spite of all the attendant problems, it is determined to obtain nuclear weapons, then it will obviously be much easier to make the weapons outside the fuel cycle, as was done by India. This could be done secretly today, regardless of any restraints the United States places on its own energy programs. It is more likely to happen if the United States does not provide leadership for a workable program to assure adequate controls and supplies of energy.

Above all else, this nation must lead, and from a credible position. The other nations of the world do not believe that we can provide them with nuclear fuel unless we have a breeder program and unless we recycle and reprocess our fuel. They are already turning away from us. Nations which are our friends are looking even behind the Iron Curtain for nuclear facilities and fuel.

One of the obstacles facing this nation as it attempts to deal with the energy crisis is the lack of understanding of the complex programs involved and the difficulty in obtaining accurate information concerning them. Nevertheless, we must demand that our nation's energy policies be based on scientific, engineering and economic facts.

ROUTINE MORNING BUSINESS

The ACTING PRESIDENT pro tempore. Under the previous order, there will now be a period for the transaction of routine morning business, not to extend beyond 11 a.m., with statements therein limited to 5 minutes each.

FATHER THEODORE HESBURGH

Mr. BAYH. Mr. President, today's session of the Senate was opened by a prayer by the Reverend Theodore Hesburgh, president of the Univerity of Notre Dame. I would like to express the sense of privilege that I am sure all Members of this body feel in having Father Hesburgh with us this morning and the sense of pride which I feel in a man who has made such a great contribution to this country and to society.

Mr. President, it is almost incomprehensible that any one man could achieve as much as Father Hesburgh has in one lifetime. His leadership has made the University of Notre Dame one of the most important centers of higher education in the Nation. As Chairman of the Civil Rights Commission he was instrumental in the passage of some of the most important legislation to be enacted in this century. As a spokesman for human rights, he has helped in shaping basic human values throughout the Nation.

It is coincidental that in the same week he is here with us a major article regarding his career and accomplishments appears in Time magazine. I ask unanimous consent that that article be printed in the RECORD, and I highly recommend it to my colleagues.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From Time Magazine, May 2, 1977]

PRINCE OF PRIESTS, WITHOUT A NICKEL

(NOTE.—In 1952 Father Theodore Hesburgh, then only 35, was appointed president of the University of Notre Dame. Over the following quarter-century—a longer term than that of any other major university president—he has changed the school profoundly and become one of the most influential figures in the country. As Notre Dame prepared for its 25th graduation of the Hesburgh era, Time Correspondent Robert Ajemian talked with the priest and wrote this report:)

The familiar Roman collar had been pulled off and hung up with the black jacket. It was well past midnight and Father Hesburgh was still working through the piles of mail in his old, high-ceilinged office. He routinely stays up until 3 or 4 o'clock in the morning.

Traces of his fame are all around him. On the walls and tables of the big room are autographed photos of a younger Ted Hesburgh standing comfortably beside Popes and Presidents. His hair is less black now and his heavy jaw fuller, but he still has the handsome black-Irish looks of his mother. There is an inscribed silver plate from Jackie Kennedy and an emerald-studded ring from Pope Paul. He has become a virtual prince among priests. The sound of a Beethoven recording, a gift from the president of RCA, plays softly in the background.

MONASTIC LIFE

On the other hand, Hesburgh for all his years at Notre Dame has continued to sleep on the same iron cot in his tiny room at nearby Corby Hall. The shelves of his outer office are stacked with cans of orange juice and Campbell soup, a sharp reminder of his monastic life. His rickety hot plate sits on the counter. It is the mark of an asceticism that Ted Hesburgh seems to impose on himself—almost as though he felt a need to reassure himself that he still is a priest. "After all these years, I haven't got a nickel in the world," he says, "and I like that."

Hesburgh's batch of mail touched on the widely contrasting aspects of his life—appealing to the simple pastor as well as to the clerical entrepreneur. There was a letter from Cardinal Franz Koenig of Vienna congratulating Hesburgh on his recent elevation to the chairmanship of the Rockefeller Foundation. A woman friend in terrible emotional trouble begged for help. Teddy Kollek, the mayor of Jerusalem, wanted Hesburgh to fly over and help stop the rapid development of high-rise buildings. There was a hopeful note from the freshman class asking if Hesburgh would attend their formal dance. Another letter told him that the Chinese Communists, who generally view priests as only slightly more admirable than locusts, were interested in inviting him to China.

Hesburgh searched for one letter in particular, a reply from Alexander Solzhenitsyn, who had been offered a Notre Dame degree this year. He finally found it: a polite no. Hesburgh was disappointed—but he had already landed his friend Jimmy Carter as the commencement speaker. The graduation ceremony will be a deliberate show of support for Carter on human rights, one of Hesburgh's passions. Hesburgh will award degrees to Bishop Donal Lamont, who was ousted from Rhodesia; Stephen Cardinal Kim, who has fought against government repression in South Korea; and Paul Cardinal Arnes, who has spoken out against human rights violations in Brazil.

When Hesburgh took over the university in 1952, Notre Dame was best known for football and dedicated to the production of believing Catholics. In those days students had to attend Mass three times a week or face disciplinary reprisals. Notre Dame boys were even advised to pray before dates with girls at nearby St. Mary's. Outside lecturers were picked for orthodoxy more than for probing intellect.

Hesburgh, who had been a prison priest as well as a chaplain for the armed forces—and was no great lover of football—soon began changing all that. He steered Notre Dame away from the control of the church and into the hands of a lay board of trustees. It was a painful and uncommon achievement, which freed the school from a burdensome authority and historically redefined Catholic higher education in the U.S. At the same time, Hesburgh struggled to retain the moral quality of his school. "We stress values here," he says. "American universities have become obsessed with objectivity. They turn out highly competent but morally neutral people." Hesburgh upgraded the quality of faculty and curriculum, and in 1972 instituted his second dramatic reform: Notre Dame became co-ed.

Almost from the beginning, the priest made a remarkable impression on the Establishment. He began getting invitations to join more and more of America's powerful private foundations and Government commissions. At times he was considered simply "the necessary Catholic," but Hesburgh eagerly accepted the chance to make himself

heard. Eisenhower named him to the Civil Rights Commission in 1957. He became a member of the Carnegie Commission on higher education, later accepted a place on the board of David Rockefeller's Chase Manhattan Bank. The Vatican appointed him representative to the International Atomic Energy Agency.

He did not always accept. When Lyndon Johnson asked him to take over the space program in 1964, Hesburgh declined. "I couldn't see a Catholic priest handing out $6 billion in contracts." He similarly turned down Richard Nixon's offer in 1969 to head the poverty program. His priesthood always had to be reckoned with. Says he: "I didn't want to become some sort of Cardinal Richelieu."

OVER THE ANDES

Nonetheless, the clergyman became irresistibly more and more involved in power and politics. He was soon criscrossing the globe, logging as many as 150,000 miles a year. His messages often included lines like "I am writing this from over the Andes." Back home, his spectacular travels were at first greeted with pride and then, as the years passed, a certain amount of sniping. A campus statue of Moses, with hand pointed skyward, inspired the gag: "There goes Hesburgh."

No matter that he was a place dropper, Hesburgh had the ear of the elite. He remembers waiting for Lyndon Johnson outside the Oval Office late one evening with his civil rights team until Johnson, looking limp, ushered them in. Johnson was so exhausted he lay down on a couch, gathered the group around him like visitors to a sickbed and kept his eyes fastened on the ceiling as Hesburgh outlined the difficult goals. Johnson accepted all of them.

Hesburgh's advice was often blunt. He once told Richard Nixon, with whom he developed a special closeness, that young people were scornful of the President. He urged Nixon to end the draft and allow 18-year-olds to vote. When Hesburgh's civil rights commission sharply criticized Nixon, the President's patience ran out. A White House secretary soon called Hesburgh and demanded that he resign by 6 o'clock the same day.

Carter offered Hesburgh a job working in the State Department for Cyrus Vance, but Hesburgh again held back. Of all the political leaders he has encountered, Hesburgh says that he finds Carter by far the most forthright. When Carter told him during the election that he was worried about Catholic support, Hesburgh reassured him. Then he offered a typically direct piece of advice: "I don't think people like to hear a man yakking about religion all the time."

Hesburgh is a fascinating, if exhausting, conversationalist, with strong opinions and an enormous range of subjects. Racism is the world's biggest problem, in Hesburgh's mind, although he is hopeful because he finds young people round the world much less prejudiced than their parents. It shows up, he says, in their confessions. "They feel worse about their sins of omission than they used to." Today's theologians, on the other hand, bother Hesburgh. "They have no faith," he says. "They teach theology like a science. They're not believers themselves. At least the scientists do believe in a chemistry table or the speed of light." Hesburgh worries about educators too. "We've got a bunch of faint fellows who don't want to make educational waves. The '60s took a terrific toll. We lost a whole generation of university presidents. Only King Brewster [of Yale] and I survived."

BIG MISTAKE

On some of the moral issues that confront his students, Hesburgh is fairly traditional. He is opposed to young people living together before they marry. "I think the girls get shortchanged," he says. "Some of these young people get so jaded they can't ever settle down with anybody." He is proud of some statistics indicating that 93% of the marriages of Notre Dame alumni hold together. Although he is against abortion, he believes that the Vatican encyclical forbidding artificial contraceptives was a big mistake. He supports more work on a reliable method of determining the ovulation cycle. He ends up sounding ambivalent on celibacy. "I don't recommend it for everybody," he says with a shrug. "It's not easy, but it's right for me. For some priest on the Amazon, it might not be. After all, priests in the Middle Ages lived with women, and all the Apostles were married."

Hesburgh sounds more confident on the subject of happiness. "It can only come," he says, "from giving at least a corner of yourself to others. People today are so egocentric. God help the person who goes through life doing nothing for someone else. He's doomed." He finds that young people today are less ambitious than a generation ago, duller than in the '60s but more eager to find some meaning in their lives. Hesburgh keeps a close rein on his own ambitions, even as he enjoys the trappings of success, smoking a Cuban cigar and sipping a Grand Marnier. Ambition among churchmen, says Hesburgh, is corrosive: "I've seen it ruin so many."

Hesburgh the outer man seems unfailingly optimistic. Close friends say they never find him in a bad mood. But his is a calling where true feelings are often submerged. For all his heartiness, the inner Hesburgh seldom surfaces. "I think he's probably a lonely man who makes up for it by work and talk," says a colleague. Hesburgh laughs at this. He says his religion protects him from loneliness. While he says Mass every day, whether in a Moscow hotel room or at the South Pole, he seldom quotes the Bible in conversation. He is not a scholar or even especially profound. "Ted is a doer," says one close friend, "not a tormented intellectual seeking some kind of truth."

Though he is popularly viewed as a kind of Catholic Mr. Chips, Hesburgh is now held in such awe by Notre Dame students that they seldom deal personally with him. Student Body President Mike Gassman says he would not dare interrupt the president with ordinary school problems because "he's too important now." Another student says, "Father Ted is usually too busy playing world savior." Both of them are swift to add, however, they think Hesburgh is the main force behind Notre Dame's stress on values.

Even as Hesburgh buries himself in his work, no one really understands what drives him. Is it his need for prestige or power, or is it his need to keep building for the greater glory of his God? His answer is just to keep working. He turns 60 this month and has no plans to retire. Instead, he announced a week ago that Notre Dame is undertaking the largest fund-raising drive in its history: $130 million. "Show me the top ten endowments," says Hesburgh, "and I'll show you the top ten schools in the country." Notre Dame's campaign will lift it close to the top ten, but everybody knows in the long run that will not be good enough for Ted Hesburgh.

ENERGY-RELATED PUBLIC LAWS

Mr. ROBERT C. BYRD. Mr. President, during the last few days, I have listened to criticism of the energy proposals outlined by President Carter. In response, I have called on Members of the Senate to step back and carefully study this package before closing their minds in opposition.

I have also listened to criticism of congressional action on energy—criticism which I feel is unjustified. I think the record should be set straight on congressional energy initiatives. The Senate, in fact, has been in the forefront in seeking a national energy policy. At the urging of my distinguished colleague from West Virginia, Senator RANDOLPH, the Senate in 1961 focused on this need by establishing a National Fuels and Energy Study Group—an action that preceded by 10 years the first Presidential message on energy. That study group identified policy issues that were subsequently examined by the National Fuels and Energy Policy Study group created in 1971 by Senate Resolution 45 and composed of members from the legislative committees concerned with energy. While making the first exhaustive investigation of the Nation's energy policy in many years the Senate Resolution 45 group held hearings on issues ranging from fuel shortages to deepwater ports and laid the groundwork for the extensive energy legislation enacted by subsequent Congresses.

During the 93d Congress, the national attention was concentrated on Watergate matters. The Congress, however, continued to try to come to grips with energy issues and wrote into law 42 energy-related measures. Among the most important of these were:

Emergency Petroleum Allocation Act of 1973 (Public Law 93–159) which authorized the President to deal with existing or imminent shortages of crude oil or refined petroleum products and provided for a price ceiling on domestic crude oil from fields which were producing before May 22, 1972; that is, old crude oil;

Federal Energy Administration Act of 1974 (Public Law 93–275) which established the FEA, an independent agency within the executive branch, "to assure a coordinated and effective approach to overcoming energy shortages";

Energy Supply and Enviromental Coordination Act of 1974 (Public Law 93–319) which authorized the Federal Energy Administrator to prohibit a powerplant or other major fuel-burning installations from burning crude oil or natural gas, if the Administrator makes certain findings including that the powerplant has the capability to burn coal;

Energy Reorganization Act of 1974 (Public Law 93–438) which established the Energy Research and Development Administration, an independent executive agency, to exercise central responsibility for policy planning and management of research and development programs respecting all energy sources to be developed consistent with warranted priorities; to conduct demonstrations of commercial feasibility of any energy source or phase of utilization of any energy source; and to develop new and improved conservation measures with "the goal of the most expeditious possible application of these measures." This statute also established the Nuclear Regulatory Commission with the general purpose of separating promotion of the use of nuclear energy from health and safety regulation of nuclear powerplants; and

Nonnuclear energy research and de-

velopment (Public Law 93–577) which authorized $20 billion over the next 10 years to undertake a comprehensive national program of basic and applied research and development.

At the convening of the 94th Congress, Democratic Senators designated an ad hoc group of Senators to forge a comprehensive congressional energy program and to expedite its enactment. Many of their proposals became law as part of the following two multipurpose acts which incorporated modified provisions of eight separate bills:

Energy Policy and Conservation Act of 1975 (Public Law 94–163) which provided for regulation of domestic crude oil at the wellhead; continued price controls on refined products; provided for automobile fuel efficiency standards; provided for home appliance energy efficiency standards; and

Energy Conservation and Production Act of 1976 (Public Law 94–385) which extended the Federal Energy Administration; provided a broad range of energy conservation measures including Federal energy conservation standards for new residential and commercial buildings, a $200 million grant program to permit low-income persons to weatherize their homes, a $2 billion loan guarantee program to foster investments in energy conservation in public and commercial developments, and a $200 million demonstration program to encourage energy-conserving home improvements.

It is readily apparent from the above listing that Congress has assumed leadership in the formulation of an energy policy. Enactment of these programs, however, has not been easy. In fact, the following 12 measures important to a national energy policy were vetoed by Presidents Nixon and Ford:

ENERGY VETOES—1971 TO THE PRESENT

First. October 27, 1972—Mining and Minerals Research Centers, S. 635.

Second. March 2, 1974—Energy Emergency, S. 2589.

Third. October 12, 1974—Nuclear Incidents—Insurance, H.R. 15323.

Fourth. December 30, 1974—Energy Transportation, H.R. 8193.

Fifth. December 30, 1974—Strip Mining, S. 425.

Sixth. March 4, 1975—Oil Import Fees, H.R. 1767.

Seventh. May 20, 1975—Strip Mining, S. 425.

Eighth. July 21, 1975—Oil Pricing, H.R. 4035.

Ninth. September 9, 1975—Emergency Petroleum Allocation, S. 1849.

Tenth. July 3, 1976—Coal Leasing, S. 391.

Eleventh. September 13, 1976—Electric Car Research, H.R. 8800 (Public Law 94–413).

Twelfth. September 24, 1976—Automobile Research and Development, H.R. 13655.

In the coming months, Congress will be examining new approaches to the many facets of the complex energy issue. We will be building upon the very respectable record we have already made. Although I have outlined some of the most important of congressional initiatives, I feel that it would be useful to include for the record a more detailed account of all 79 energy-related measures we have enacted in the last 8 years. I therefore ask unanimous consent that such a report, prepared by the staff of the Democratic Policy Committee, be printed at this point in the RECORD.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

ENERGY-RELATED PUBLIC LAWS, 1969–77

91ST CONGRESS (1969–1970)

1. Public Law 91–158, Interstate Oil Compact Commission, 2-Year Extension, S.J. Res. 54.

2. Public Law 91–173, Coal Mine Health and Safety Act of 1969, S. 2917.

3. Public Law 91–245, Oil and Gas Leases, S. 1193.

4. Public Law 91–581, Geothermal Steam Act of 1970, S. 368.

5. Public Law 91–631, National Mines and Minerals Policy Act, S. 719.

92ND CONGRESS (1971–1972)

6. Public Law 92–84, Atomic Commission Authorization, 1972, H.R. 9388.

7. Public Law 92–307, Temporary Operating Licenses for Nuclear Powerplants, H.R. 14655.

8. Public Law 92–314, Atomic Energy Commission Appropriations, 1973, S. 3607.

9. Public Law 92–401, Natural Gas Pipeline Safety Act of 1968, H.R. 5065.

10. Public Law 92–500, Federal Water Pollution Control Act Amendments of 1972, S. 2770.

11. Public Law 92–583, Coastal Zone Management Act of 1972, S. 3507.

12. S. Res. 45, to establish the Senate National Fuels and Energy Policy Study Group.

93RD CONGRESS (1973–1974)

13. Public Law 93–28, Economic Stabilization Act Amendments of 1973; Voluntary Petroleum Allocation, S. 398.

14. Public Law 93–60, AEC Authorization, S. 1994.

15. Public Law 93–74, NSA Authorization, H.R. 7528.

16. Public Law 93–87, Federal-Aid Highway Act, S. 502.

17. Public Law 93–88, Euratom Corporation Act of 1958 Amendments, S. 1993.

18. Public Law 93–119, Oil Pollution Act Amendments, H.R. 5451.,

19. Public Law 93–153, Mineral Leasing Act of 1920, Amendments, and Trans-Alaska Oil Pipeline Authorization, S. 1081.

20. Public Law 93–159, Emergency Petroleum Allocation Act of 1973, S. 1570.

21. Public Law 93–182, Emergency Daylight Saving Time Energy Conservation Act of 1973, H.R. 11324.

22. Public Law 93–208, G.I. Bill Benefits During Energy Crisis, S. 2794.

23. Public Law 93–239, Highway Speed Limit Reduction, H.R. 11372.

24. Public Law 93–245, Supplemental Appropriations; Naval Petroleum Reserves, H.R. 11576.

25. Public Law 93–248, Intervention on the High Seas Act, S. 1070.

26. Public Law 93–249, Fuel Cost Pass-Through for Truckers S.J. Res. 185.

27. Public Law 93–275, Federal Energy Administration, H.R. 11793.

28. Public Law 93–276, AEC Authorization Act, S. 3292.

29. Public Law 93–316, NASA Authorization Act, H.R. 13998.

30. Public Law 93–319, Energy Supply and Environmental Coordination Act of 1974, H.R. 14368.

31. Public Law 93–322, Special Energy Research and Development Appropriations for 1975, H.R. 14434.

32. Public Law 93–377, AEC Omnibus Legislation of 1974, S. 3669.

33. Public Law 93–383, Housing and Community Development Act, S. 3066.

34. Public Law 93–386, Aid to Energy Affected Small Businesses, S. 3331.

35. Public Law 93–403, Natural Gas Pipeline Safety Act, as Amended, Additional Appropriations, H.R. 15205.

36. Public Law 93–409, Solar Heating and Cooling Demonstration Act of 1974, H.R. 11864.

37. Public Law 93–410, Geothermal Energy Research, Development, and Demonstration Act, H.R. 14920.

38. Public Law 93–426, Defense Production Act of 1950, 2-year extension, S. 3270.

39. Public Law 93–434, Emergency Daylight Saving Time Energy Conservation Act of 1973, Amendments, H.R. 16102.

40. Public Law 93–438, Energy Reorganization Act of 1974, H.R. 11510.

41. Public Law 93–454, Federal Columbia River Transmission System, S. 3362.

42. Public Law 93–473, Solar Energy Research, Development and Demonstration Act of 1974, S. 3234.

43. Public Law 93–482, Duty Free Entry of Methanol for Use as Fuel, H.R. 11251.

44. Public law 93–485, International Nuclear Cooperation Act, S. 3698.

45. Public Law 93–496, National Railroad Passenger Corporation, H.R. 15427.

46. Public Law 93–511, Emergency Petroleum Allocation Act of 1973 Extension, H.R. 16757.

47. Public Law 93–514, Nuclear Information Annual Report, S. 3802.

48. Public Law 93–522, Sequoia National Park Hydroelectric Project, H.J. Res. 444.

49. Public Law 93–577, Federal Nonnuclear Energy Research and Development Act of 1975, S. 1283.

50. Public Law 93–627, Deep Water Ports Act, H.R. 10701.

51. Public Law 93–643, Federal-Aid Highway Act Amendments of 1975—Fuel Exports to U.S.S.R., S. 3934.

52. Public Law 93–646, Export-Import Bank Act Amendments, H.R. 15977.

53. S. Res. 138, National Consumer Effort to Save Gas.

54. S. Res. 249, Oil Price Increase.

55. S. Res. 279, Washington Energy Conference.

94TH CONGRESS (1975–1976)

56. Public Law 94–12, Tax Reduction Act of 1975; Repeal of Depletion Allowance, H.R. 2166.

57. Public Law 94–18, Nuclear Regulatory Commission Authorization, S. 994.

58. Public Law 94–79, Nuclear Regulatory Commission Authorization, S. 1716.

59. Public Law 94–139, TVA Bonding Authority, H.R. 9472.

60. Public Law 94–163, Energy Policy and Conservation Act, S. 622.

61. Public Law 94–180, Public Works—ERDA Appropriations 1976, H.R. 8122.

62. Public Law 94–187, ERDA Authorization 1976, H.R. 3474.

63. Public Law 94–197, Nuclear Accident Indemnity, H.R. 8631.

64. Public Law 94–227, International Petroleum Exposition, S.J. Res. 59.

65. Public Law 94–258, Naval Petroleum Reserves Production Act of 1976, H.R. 49.

66. Public Law 94–269, ERDA Supplemental Authorization, 1976, S. 3108.

67. Public Law 94–291, Nuclear Regulatory Commission Authorization, S. 3107.

68. Public Law 94–332, Federal Energy Administration Extension, S. 3625.

69. Public Law 94–355, Public Works—ERDA Appropriations, 1977, H.R. 14236.

70. Public Law 94–364, Motor Vehicle Information and Cost Savings Act, S. 1518.

71. Public Law 94–370, Coastal Zone Management Act Amendments, State grants, S. 586.

72. Public Law 94–377, Federal Coal Leasing Amendments Act, S. 391.

73. Public Law 94-385, Energy Conservation and Production, H.R. 12169.

74. Public Law 94-413, Electric and Hybrid Vehicle Research, Development and Demonstration Act of 1976, H.R. 8800.

75. Public Law 94-422, Land and Water Conservation Fund Act, S. 327.

76. Public Law 94-477, Natural Gas Pipeline Safety, H.R. 12168.

77. Public Law 94-493, Interstate Oil and Gas Compact, S.J. Res. 126.

78. Public Law 94-586, Alaskan Gas Transportation, S. 3521.

95TH CONGRESS (1977)

79. Public Law 95-2, Natural Gas Emergency, S. 474.

SUMMARIES OF ENERGY-RELATED MEASURES ENACTED BY CONGRESS, 1969-77

91ST CONGRESS (1969-70)

Federal Coal Mine Health and Safety Act

S. 2917—Public Law 91-173, approved December 30, 1969

Established interim mandatory health and safety standards applicable to all underground coal mines until superseded by standards promulgated by the Secretary of the Interior.

Directed the Secretary of the Interior to develop and promulgate safety and health standards for coal miners, which standards shall be no lower than those established by Title II. Provided civil penalties for violation of such health or safety standards.

Required the Secretary of the Interior to appoint an Advisory Committee on Coal Mine Safety Research to consult with and make recommendations to the Secretary on matters involving coal mine safety research. Required the Secretary of Health, Education, and Welfare to appoint an Advisory Committee on Coal Mine Research with duties to parallel the Advisory Committee for safety.

Authorized inspection and investigation of coal mines. Provided that whenever a representative of the miners has reasonable grounds to believe that a violation or imminent danger exists, an immediate inspection may be obtained upon proper notice.

Authorized a disability program for miners totally disabled due to pneumoconiosis and insured that future adequate benefits are provided to coal miners and their dependents where disability or death occurs from such disease. Provided for payments of benefits claimed before or on December 31, 1972 for persons suffering from Black Lung Disease and set up a procedure for the payment of benefit claims after December 31, 1972.

Geothermal resource development

S. 368—Public Law 91-581, approved December 24, 1970.

Opened to exploration and development, through private enterprise, the geothermal steam and associated geothermal resources underlying certain of the public domain lands of the United States.

National mining and minerals policy

S. 719—Public Law 91-631, approved December 31, 1970

Established a national mining and minerals policy to foster and encourage the development of the domestic mining and minerals industry, the development of domestic mineral resources to meet industrial and security needs, mining, mineral, and metallurgical research and study and development of methods for the disposal, control and reclamation of mineral waste products and reclamation of mined lands.

Oil and gas compact

S.J. Res. 54—Public Law 91-158, approved December 24, 1969.

Granted the consent of Congress to an extension and renewal for a period of 2 years, from September 1, 1969 to September 1, 1971 of the Interstate Compact to Conserve Oil and Gas, originally signed in Dallas, Texas, on February 16, 1935.

Oil and gas leases

S. 1193—Public Law 91-245, approved May 12, 1970.

Conferred discretionary authority on the Secretary of the Interior to prevent, administratively, termination of certain oil and gas leases on Federal lands and to reinstate terminated leases under certain limitations and conditions.

92D CONGRESS (1971-1972)

Atomic Energy Commission authorizations

H.R. 9388—Public Law 92-84, approved August 11, 1971.

Authorized $2,325,187,000 for the Atomic Energy Commission for fiscal year 1972.

Atomic Energy Commission temporary licensing for nuclear power reactors

H.R. 14655—Public Law 92-307, approved June 2, 1972.

Added a new section "Temporary Operating License" to the Atomic Energy Act, and authorized the Atomic Energy Commission (for an interim period which will end on October 30, 1973) to issue a temporary operating license for a nuclear power reactor whose electrical energy is needed to meet energy needs in its service area, provided the Commission determines that the plant can be operated on a temporary basis, safely and with adequate protection of the environment.

S. 3607—Public Law 92-314, approved June 16, 1972.

Authorized $2,110,480,000 for operating expenses and $492,995,000 for plant and capital equipment, making a total authorization of $2,603,475,000 for the AEC for fiscal year 1973.

Coastal Zone Management Act of 1972

S. 3507—Public Law 92-583, approved October 27, 1972.

Established a national program for the management, beneficial use, protection, and development of the land and water resources of the Nation's coastal zones; authorized Federal grants-in-aid to coastal states for up to 66⅔ percent of the cost of establishing and administering coastal zone management programs; authorized Federal grants to States for up to 50 percent of the cost of acquisition, development, and operation of estuarine sanctuaries; and contained other provisions.

National fuels and energy policy study

S. Res. 45—Agreed to May 3, 1971.

Authorizes the Senate Committee on Interior and Insular Affairs and ex officio members of the Committees on Commerce and Public Works and the Joint Committee on Atomic Energy to make a comprehensive study of programs and policies required to meet national energy needs.

Natural Gas Pipeline Safety Act amendments

H.R. 5065—Public Law 92-401, approved August 22, 1972.

Amended the Natural Gas Pipeline Safety Act of 1968, so as to extend the deadline by which a State must have in force legislation authorizing the State enforcement agency to impose monetary and injunctive sanctions from August 12, 1970, to August 12, 1973; authorized the Secretary of Transportation to make grants-in-aid of up to 50 percent of the cost of activities of State safety programs; * * * year 1973, and $5 million for fiscal year 1974 for the purpose of carrying out the provisions of the Act; and contained other provisions.

Water Pollution Control Act amendments

S. 2770—President Nixon Vetoed October 17, 1972; Senate overrode Veto October 17, 1972; House overrode Veto October 18, 1972; S. 2770 became Public Law 92-500, without the President's approval, October 18, 1972.

Established a policy that the discharge of pollutants should be eliminated by 1985, that the national chemical, physical, and biological integrity of the Nation's waters be restored and maintained, and that an interim goal of water quality providing for the protection of fish, shellfish, and wildlife and for recreation in and on the water be achieved by 1981; charged the enforcement mechanism of the Federal water pollution control program from water quality standards to effluent limits; balanced the Federal-State effort in the pollutant discharge permit system; authorized $14 billion during fiscal years 1972 through 1975 for Federal grants to communities for construction of sewage treatment facilities; and contained other provisions.

93RD CONGRESS (1973-1974)

Alaska pipeline

S. 1081—Public Law 93-153, approved November 16, 1973.

Authorizes the Secretary of the Interior, or appropriate agency head, to grant rights-of-way through Federal lands (except for National Park System, Indian, and Outer Continental Shelf lands) for transportation by pipeline of oil, natural gas, synthetic liquid or gaseous fuels, or any refined product produced therefrom; provides that this width of a right-of-way shall not exceed 50 feet plus the ground occupied by the pipeline and related facilities unless the Secretary or the agency head determines otherwise; provides that a right-of-way may be supplemented by a temporary permit for the use of Federal lands in the vicinity of the pipeline with the approval of the Secretary or the agency head; contains provisions concerning the suspension or termination of a right-of-way, the reimbursement to the government for the use of the right-of-way at the fair market rental price as well as for certain other expenses, and the joint use of rights-of-way; provides that pipelines and related facilities be constructed, operated, and maintained as common carriers; prohibits the export of domestically produced oil unless the President certifies to Congress that such exports (1) will not diminish the total quantity or quality available to the United States, (2) are in the national interest, and (3) are in accord with the Export Administration Act of 1969 and Congress does not disapprove within 60 days;

Provides, in Title II, Trans-Alaska Pipeline Authorization Act, that the trans-Alaska oil pipeline, from the North Slope of Alaska to Port Valdez, be constructed promptly without further administrative or judicial delay under the National Environmental Policy Act of 1969 (NEPA); authorizes and directs the Secretary and other Federal officers to issue rights-of-way and other authorizations necessary for the construction and operation of the trans-Alaska oil pipeline system, including roads and airstrips, as described in the final Environmental Impact Statement issued on March 20, 1973; imposes strict liability of up to $50 million without regard to fault on the owners of the pipeline for any one incident on land; imposes strict liability on the owners of tankers carrying oil from the pipeline without regard to fault at $100 million for any one oil spill, with the owner and operator jointly liable for the first $14 million and the Trans-Alaskan Pipeline Liability Fund liable for the remainder up to $100 million; establishes the Trans-Alaskan Pipeline Liability Fund as a non-profit corporate entity to be administered by the holders of the trans-Alaska pipeline right-of-way, and provides that a fee of five cents per barrel will be collected from the owner of the oil at the time it is loaded on the vessel until $100 million has been accumulated in the Fund and resumed when the Fund falls below $100 million;

Authorizes the President to negotiate with Canada, in Title III, to determine its willingness to permit the construction of pipelines or other transportation systems across Canada for the transport of natural gas and oil from Alaska to U.S. markets, including the use of tankers by way of the Northwest Passage; requires the President to report to the

House and Senate Interior and Insular Affairs Committees on the results of such negotiations;

Contains miscellaneous provisions, in Title IV, regarding vessel construction standards, vessel traffic control by the Coast Guard in the Valdez area, Senate confirmation of the Director of the Energy Policy Office and the head of the Mining Enforcement and Safety Administration except for the present appointees unless such nominations are disapproved by the Senate, exemption of the first sale of crude oil and natural gas from striper wells (those wells with an average daily production of not more than 10 barrels) from price restraints and allocation programs, and advance payment to Alaska natives of $5 million every six months beginning fiscal year 1976; grants the Federal Trade Commission the requisite authority to insure prompt enforcement of the laws the Commission administers by granting statutory authority to directly enforce its subpenas and to seek preliminary injunctive relief to avoid unfair competitive practices; exempts independent Federal regulatory agencies from obtaining advance approval from the Office of Management and Budget before collecting information from ten or more persons and provides a procedure for advance review by the General Accounting Office to insure that such information requested is obtained with a minimum burden upon businesses or persons required to furnish such information;

And contains other provisions.

Amtrak improvement and authorizations

H.R. 15427—Public Law 93–496, approved October 28, 1974.

Authorizes funds for the National Railroad Passenger Corporation (Amtrak) for 1975 including funding of a study to determine the feasibility and economic practicality of a high-speed ground transportation system between Tijuana, Mexico and Vancouver, Canada, the various means of providing such transportation, the cost, usage, and energy utilization and impact on energy resources.

Atomic Energy Commission authorizations

S. 1994—Public Law 93–60, approved July 6, 1973.

Authorizes $2,429,055,000 for the Atomic Energy Commission for fiscal year 1974 which includes funds for high energy programs and facilities.

S. 3292—Public Law 93–276, approved May 10, 1974.

Authorizes $3,667,433,000 for the Atomic Energy Commission for fiscal year 1975 of which $2,551,553,000 is for operating expenses and $1,125,900,000 is for plant and capital equipment.

Atomic Energy Commission omnibus legislation

S. 3669—Public Law 93–377, approved August 17, 1974.

Amends the Atomic Rewards Act of 1955 to authorize rewards for furnishing of information with respect to the attempted or actual introduction, manufacture, or acquisition of special nuclear material or an atomic weapon; includes authorization for rewards for information concerning the export, attempted export, or conspiracy to introduce, manufacture, or acquire a special nuclear material or an atomic weapon; places the determination of entitlement to a reward in the Attorney General, in consultation with the AEC, rather than an Awards Board; changes the title of the act to "Atomic Weapons and Special Nuclear Materials Act"; amends the Atomic Energy Act of 1954, as amended, to provide for Congressional review of proposed increases in the amounts of special nuclear material authorized for distribution to the International Atomic Energy Agency or other groups of nations, and proposed changes in the duration of agreements for such distribution whereby all such proposals would be submitted to Congress for a 60-day period and referred to the Joint Committee on Atomic Energy who, within the first 30 days, must report its views and recommendations to the Congress together with a proposed concurrent resolution favoring, or not favoring the proposal and gives to a concurrent resolution of disfavor the legal effect of barring the execution of the proposed increase or change in duration; permits the AEC to exempt minimal quantities of special nuclear material from licensing requirements; extends for 5 years, to fiscal 1979, the compulsory licensing provisions of the act; and clarifies the AEC's statutory authority to institute a materials access approval program for safeguard purposes.

Daylight saving time

H.R. 11324—Public Law 93–182, approved December 15, 1973.

Seeks to alleviate the national energy shortage by imposing 1 hour advanced time on a year-round basis for a two-year trial period throughout the country, beginning January 6, 1974; amends the Uniform Time Act of 1966 to allow States the option to go permanently on year-round daylight saving time and authorizes the President to exempt any State upon a proclamation by the Governor of that State, prior to the effective date, that such an exemption from uniform advanced time is necessary to avoid undue hardship or to conserve fuel requires the Secretary of Transportation to report to Congress on the operation and effects of this act on the use of energy, traffic safety (including the safety of children traveling to and from school) and school hours; and requires the Federal Communications Commission to permit certain daytime broadcast stations to operate before local sunrise.

H.R. 16102—Public Law 93–434, approved October 5, 1974.

Amends the Emergency Daylight Saving Time Energy Conservation Act of 1973 (Public Law 93–182) to put the entire nation on nonadvanced time for the winter months beginning at 2:00 a.m., October 27, 1974, until 2:00 a.m., February 23, 1975, and changes from June 30, 1975, to July 31, 1975, the date by which the Secretary of Transportation must submit to the Congress his final report on the effects of advanced time in winter months.

Deepwater ports

H.R. 10701—Public Law 93–627, approved January 3, 1975.

Establishes a licensing and regulatory program governing offshore deepwater port development beyond the territorial limits and off the coast of the United States for use to transfer oil and natural gas transported by tanker to and from States of the United States; authorizes the Secretary of the Department in which the Coast Guard is operating (currently the Department of Transportation) to issue licenses to own, construct and operate deepwater ports; requires the Secretary to exercise this authorization in consultation with other Federal agencies (Interior, State, Environmental Protection Agency and the Corps of Engineers) and with the approval of the governor of the adjacent coastal state; requires the Federal Trade Commission and the Attorney General to comment on whether issuance of a license would adversely affect competition, restrain trade or promote monopolization; requires a detailed environmental impact statement to satisfy the requirements of the National Environmental Policy Act; creates levels of liability for damages for oil spills and a $100 million Deepwater Port Liability Fund which is financed by a charge of 2 cents per barrel of oil flowing through any licensed deepwater port; and contains other provisions.

Defense Production Act Extension

S. 3270—Public Law 93–426, approved September 30, 1974.

Extends the Defense Production Act of 1950 for 1 year, from June 30, 1974, to June 30, 1975; changes the method by which stockpile materials are purchased from Treasury Department loans to regular congressional appropriations in order to guarantee uninterrupted defense prouction when necessary.

Energy reorganization (ERDA)

H.R. 11510—Public Law 93–438, approved October 11, 1974.

Consolidates the Federal government's fragmented and uncoordinated energy research and development functions by establishing the Energy Research and Development Administration (ERDA), an independent agency formed from the transfer of the technical staff and national laboratories of the Atomic Energy Commission (AEC)—which is abolished by this Act—and certain research and development programs from the Department of Interior and the National Science Foundation; provides that ERDA will be headed by a single Administrator, appointed by the President and confirmed by the Senate, who will exercise broad functions to explore and develop all possible sources of energy—both nuclear and non-nuclear; provides safeguards against unwarranted priority being given to any single energy technology; establishes an Energy Resources Council to coordinate energy programs in the Federal agencies and to advise the President on energy matters;

Requires the President to report to Congress by June 30, 1975, additional recommendations for the organization of energy and related functions in the Federal government, including the advisability of creating a Department of Energy and Natural Resources;

Establishes the Nuclear Regulatory Commission, an independent bipartisan regulatory commission which is based upon the Regulatory Division of the AEC but with a revised internal organization and broadens the licensing and regulatory authority transferred to it from the AEC; requires Senate confirmation of the 4-member commission and chairman who are charged with protecting the nation's health and environment by ensuring the safety and the security of the nuclear industry and the weapons-grade and other radioactive materials used to fuel it; provides for three coequal directors, each with direct and independent access to the Commission, and each responsible for separate operations relating to nuclear reactor safety, nuclear materials security, and nuclear safety research; establishes civil and criminal penalties for noncompliance with regulations or failure to report potentially hazardous defects; requires the Commission to make quarterly reports to Congress on details of abnormal occurrences at licensed nuclear facilities and to widely disseminate initial information to the public within 15 days of learning of each abnormal occurrence which it determines is significant enough to be reported;

And contains other provisions.

Energy research and development appropriations, 1975

H.R. 14434—Public Law 93–322, approved June 30, 1974.

Appropriates $2,236,089,000 to accelerate the Federal program of energy research and development, particularly in the fields of atomic energy and coal gasification and liquefactions, including funds for the Atomic Energy Commission; Interior Department; National Science Foundation; Environmental Protection Agency; National Oceanic and Atmospheric Administration; Federal Energy Office; National Aeronautics and Space Administration; and Department of Transportation.

Energy supply—Clean air

H.R. 14368—Public Law 93–319, approved June 22, 1974.

Directs the Federal Energy Administration (FEA) to prohibit an electric powerplant from burning petroleum or natural gas if it has the capability to burn coal and author-

izes, but does not require such prohibitions with respect to other major fuel-burning facilities aside from powerplants unless coal or coal transportation are not available or electrical service would be impaired; authorizes FEA to require that powerplants be designed to burn coal as well as other fuels; authorizes FEA to allocate coal to any facility that is prohibited from burning oil or natural gas;

Permits the Environmental Protection Agency (EPA) to suspend until June 30, 1975, any stationary source fuel or emission limitation as it applies to the Clean Air Act if (1) there is an unavailability of fuels to meet the act's requirements, (2) a plant converted to coal between September 15, 1973, and March 15, 1974, or was ordered to convert to coal by FEA, or (3) the suspensions would result in emissions that exceed the primary air quality standard for a particular region; permits EPA to delay a plant's compliance schedule until January 1, 1979, if (1) emission limits to maintain primary air quality standards could be met, (2) the suspension would not result in emissions that would exceed the primary standards in an air pollution control region, or (3) EPA approved an interim compliance plan; prohibits EPA from using parking surcharges to control air pollution;

Continues emission standards established for 1975 model year automobiles during the 1976 model year and delays until September 30, 1977, final automobile emission standards for carbon monoxide and hydrocarbons and until September 30, 1978, final standards for nitrogen oxides; provides that after January 1, 1975, an automobile manufacturer may seek a 1-year suspension of the statutory standards for hydrocarbons and carbon monoxide applicable to the 1977 model year and requires EPA to establish interim standards for such a suspension; provides for allocation of low sulfur fuel to minimize adverse effects on the public health; clarifies the relationship between the National Environmental Policy Act and the Clean Air Act; extends the Clean Air Act authorizations for 1 year; and provides criminal penalties for willful violations of the act.

EURATOM cooperation

S. 1993—Public Law 93–88, approved August 14, 1973.

Amends section 5 of the EURATOM Cooperation Act of 1958, as amended, by increasing the amount, from 215,000 kilograms to 583,000 kilograms, of contained uranium 235 which the United States Atomic Energy Commission is authorized to transfer to the European Atomic Energy Community under the Agreements for Cooperation between the United States and EURATOM.

Export-Import Bank extension

H.R. 15977—Public Law 93–646, approved January 4, 1975.

Requires congressional notification of loans, guarantees or a combination thereof of $25 million or more for the export of goods or services involving research, exploration, or production of fossil fuel energy resources in the Soviet Union; places a ceiling of $300 million in the aggregate on loans and guarantees to the Soviet Union in connection with exports, and provides that the ceiling may be raised if requested by the President and approved by the Congress by concurrent resolution, and provides that no more than $40 million of this aggregate amount shall be for the purchase, lease, or procurement of any product or service which involves research or exploration of fossil fuel energy resources.

Federal-Aid Highway Act amendments

S. 3934—Public Law 93–643, approved January 4, 1975.

Makes the temporary 55 mile per hour speed limit permanent, and authorizes $7.5 million for grants for demonstration projects designed to encourage the use of carpools in urban areas.

S. 507—Public Law 93–87, approved August 13, 1977.

Includes authorization to encourage the development, improvement and use of bicycle transportation and pedestrian walkways and evaluate public mass transportation systems in all urban areas.

Federal Energy Administration

H.R. 11793—Public Law 93–275, approved May 7, 1974.

Establishes the Federal Energy Administration (FEA) as an independent executive agency, to be headed by an Administrator to be appointed by the President with the advice and consent of the Senate; transfers to the Administration four existing agencies now in the Interior Department—the Offices of Petroleum Allocation, Energy Conservation, Energy Data and Analysis, and Oil and Gas; transfers the Energy Division of the Cost of Living Council into the new Administration; requires policy coordination with the Environmental Protection Agency; authorizes the Comptroller General to monitor FEA operations and make public its reports; authorizes the Government Accounting Office to issue subpenas to obtain information from companies engaged in any phase of energy supply or major consumption of energy; creates an Office of Private Redress and Grievances to handle complaints; requires the Administrator to prepare a comprehensive energy plan mapping out the Administration's proposed course of action for the next two years; and contains other provisions.

Geothermal energy

H.R. 14920—Public Law 93–410, approved September 3, 1974.

Establishes a Geothermal Energy Coordination and Management Project composed of the Federal Energy Administration, the National Science Foundation, the Department of the Interior, the National Aeronautics and Space Administration, and the Atomic Energy Commission, which will be headed by an Administrator to be appointed by the President, and shall have overall management responsibility for geothermal resource inventory, research and development inventory programs; directs the National Aeronautics and Space Administration (NASA) to carry out geothermal energy technology research and development programs assigned to it by the Project, including the establishment of an inventory and assessment program and requires the Administrator to carry out a comprehensive program definition with respect to the development of geothermal energy with an interim report to be submitted by November 30, 1974, and the final report by August 31, 1975; authorizes the Project to initiate a research and development program with respect to commercial utilization of geothermal resources and to enter into cooperative agreements with non-Federal entities for the construction, operation, and maintenance of demonstration developments for the production of electric or heat energy from geothermal resources; authorizes the Chairman of the Project to designate the head of a Federal agency to guarantee loans (up to 75 percent of cost) for projects involving geothermal energy development and provides that such loans shall not exceed $25 million for a single project or $500 million to a single borrower; limits the life of the loan guarantee program to 10 years; requires the Chairman of the Project to submit annual reports to the President and Congress; and authorizes therefor for fiscal years 1976 through 1980 such sums as may be appropriated following enactment of the Act plus $2.5 million to NASA for fiscal year 1975 to fund the preparation of the required Program definitions and $50 million annually for the loan guarantee program.

GI bill benefits during the energy crisis

S. 2794—Public Law 93–208 approved December 28, 1973.

Amends Chapter 36 of title 38, United States Code, to authorize the Administrator to continue to pay educational benefits to eligible veterans, wives, widows, and children during periods when educational institutions are temporarily closed pursuant to an established policy proclaimed by the President, such as closings to conserve energy, or are closed due to emergency conditions.

Housing and community development—Home mortgage assistance

S. 3066—Public Law 93–383, approved August 22, 1974.

In title VIII, includes provisions which establish a National Institute of Building Sciences to evaluate and promulgate criteria for housing and building regulations.

NASA authorization

H.R. 7528—Public Law 93–74, approved July 23, 1973.

Authorizes $3,064,500,000 to the National Aeronautics and Space Administration for fiscal year 1974 including funds to formulate a long-term energy program that would explore options for energy generation and management from the many technologies the agency has developed.

H.R. 13998—Public Law 93–316, approved June 22, 1974.

Authorizes $3,266,929,000 to the National Aeronautics and Space Administration for fiscal year 1975 as follows: $2,372,815,000 for research and development including continued funding of the space shuttle and space station programs; $144,490,000 for construction of facilities; and $749,624,000 for research and program management.

National consumer effort to save gas and arrive alive

S. Res. 138—Senate adopted August 2, 1973.

Calls for all motor vehicle operators travelling on high-speed roads on week-ends and holidays, between the date of passage of this resolution and Labor Day, September 3, 1973, to: (1) travel at speed no greater than 10 miles per hour less than the posted speed limit; and (2) turn on headlights to encourage fellow travellers to join in the nation-wide campaign to slow down, save gas, save lives and save money.

Natural gas pipeline safety authorizations

H.R. 15205—Public Law 93–403, approved August 30, 1974.

Authorizes $2 million for fiscal year 1975 and $2.85 million for fiscal year 1976 to carry out the provisions of the Natural Gas Pipeline Safety Act of 1968 and authorizes $1.8 million for fiscal year 1975 and $2.5 million for fiscal year 1976 for the Federal grant-in-aid program for which States would receive compensation of up to 50 percent of their costs in carrying out pipeline safety activities.

Nonnuclear energy research and development

S. 1283—Public Law 93–577, approved December 31, 1974.

Authorizes $20 billion over the next 10 years to undertake a comprehensive, national program of basic and applied research and development, including but not limited to demonstrations of practical applications of all potentially beneficial energy sources and utilization technologies within the Research and Development Administration (ERDA); directs the Administrator of ERDA to transmit to Congress by June 30, 1975, and annually thereafter, a comprehensive plan for energy research, development, and demonstration designed to achieve solutions to environmental problems which are immediate and short term (to the early 1980's), middle term (the early 1980's to 2000), and long term (beyond 2000); provides that such research programs shall include research, development and demonstrations designed: (a)

to advance energy conservation technologies; (b) to accelerate the commercial demonstration of technologies for producing low-sulfur fuels suitable for boiler use, for producing substitutes for natural gas, including coal gasification, and for producing syncrude and liquid petroleum products from coal; (c) to demonstrate improved methods for the generation, storage and transmission of electrical energy; and (d) to explore a variety of other nonnuclear energy sources as well as to improve methods for the prevention and clean-up of marine oil spills; authorizes the Administrator to utilize various forms of Federal assistance and participation including: joint Federal-industry experimental, demonstration, or commercial corporations; contractual arrangements with non-Federal participants including corporations, universities and non-Federally owned facilities; Federal purchases or guaranteed prices of demonstration products; and Federal loans and loan guarantees; provides that the establishment of a joint Federal-industry corporation must be approved by Congress; contains provisions regarding the patenting of inventions made or conceived in the course of a project; and contains other provisions.

Nuclear agreements

S. 3698—Public Law 93-485, approved October 26, 1974. NOTE: (Comparable provisions for distribution of special nuclear material are contained in S. 3666, the Atomic Energy Commission Omnibus Legislation.)

Amends the Atomic Energy Act of 1954, as amended, to require that proposed international agreements for peaceful cooperation in nuclear energy which deal with nuclear reactors capable of producing more than 5 megawatts of heat and fuel be submitted to the Congress under the procedure for military agreements for a period of 60 days of continuous session during which Congress may disapprove the agreement by passage of a concurrent resolution; directs that such agreements be referred to the Joint Committee on Atomic Energy who, within the first 30-day period, must report its views and recommendations together with a proposed concurrent resolution stating that the Congress does or does not favor the agreement of cooperation; and provides that any concurrent resolution so reported shall become the pending business of the House in question within 25 days and voted on within 5 calendar days thereafter unless otherwise determined; and provides that the act shall apply to all proposed agreements and amendments thereto submitted to Congress after its enactment.

Nuclear information report

S. 3802—Public Law 93-514, approved December 6, 1974.

Amends section 202 of the Atomic Energy Act of 1954, as amended, to establish a requirement for an annual report by the Joint Committee membership to their respective Houses on the development, use and control of nuclear energy for the common defense and security and for peaceful purposes in order to provide Members of Congress with factual information concerning nuclear energy, weapons and policy.

Oil pollution

H.R. 5451—Public Law 93-119, approved October 4, 1973.

Amends the Oil Pollution Act to conform with the 1969 and 1971 amendments to the International Convention for the Prevention of the Pollution of the Sea by Oil, 1954, as amended dealing with intentional discharges of oil and oily wastes from vessels and expands the penalty provisions of the Act.

S. 1070—Public Law 93-248, approved February 5, 1974.

Incorporates into statutory law the rights, duties, and responsibilities of the United States under the International Convention Relating to Intervention on the High Seas in Cases of Oil Pollution Casualties, signed November 29, 1969, at Brussels, which permits a coastal nation to take whatever action it deems necessary to prevent, mitigate, or eliminate a threat of oil pollution resulting from a maritime accident beyond that coastal nation's territorial limits by vesting such authority in the Secretary of the Department in which the Coast Guard is operating; gives the Secretary the authority to determine the extent of danger resulting from a collision, stranding, or other disablement of a vessel carrying oil, and to remove and, if necessary, destroy the ship and cargo which is the source of the danger; incorporates general guidelines for determining the permissible scope of intervention actions; authorizes actions against the United States in the Federal courts by persons claiming compensation; creates a mechanism for settling controversies between signatory nations, or between such nations and claimants relating to compensation for excessive measures; authorizes the Secretary to issue rules and regulations to carry out the purposes of this Act; imposes criminal penalties to insure full compliance with the legislation; and extends the right of intervention now inherent in the Federal Government for vessel incidents in territorial waters to incidents on the high seas involving potential oil pollution damage.

Oil price increase

S. Res. 249—Senate adopted January 29, 1974.

States a sense of the Senate that it be an urgent matter to communicate to the governments of Canada, Venezuela, and the Arab oil producing countries that the United States views with the utmost concern the recent oil price increases as detrimental to prices, real income and employment in the United States and that such actions should not be taken by these countries without regard for these effects on the life of the American people and for the possibility of reciprocal economic action by the United States which might adversely affect the economies of these countries.

Pacific Northwest Power

S. 3362—Public Law 93-454, approved October 18, 1974.

Establishes a Bonneville Power Administration Fund in the U.S. Treasury to receive revenues from electric power sales, appropriations made by the Congress, receipts from the sales of bonds, and miscellaneous other receipts of the Bonneville Power Administration; and authorizes the Bonneville Power Administrator to issue bonds and sell them to the Secretary of the Treasury to assist in financing the construction, acquisition, and replacement of the Bonneville electric power transmission system.

Petroleum allocation—Mandatory

S. 1570—Public Law 93-159, approved November 27, 1973.

Requires the President to implement a comprehensive mandatory allocation program providing for the compelled distribution of crude oil, residual fuel oil, and refined petroleum products in amounts and at prices in accordance with regulations to be promulgated not later than 15 days after the enactment date of this Act (with a 30 day delay permitted with respect to the allocation of gasoline and any allocation of products which are allocated under section 203 (a) (3) of the Economic Stabilization Act prior to promulgation of the regulations under this act) which are to be designed to meet the following objectives: (1) the protection of public health, safety, and welfare (including residential heating), and the national defense; (2) the maintenance of all public services and agricultural operations; (3) the preservation of an economically sound and competitive petroleum industry; (4) the allocation of suitable types, grades, and quality of crude oil to refineries in the United States to permit such refineries to operate at full capacity; (5) the equitable distribution of crude oil, residual fuel oil, and refined petroleum products at equitable prices among all regions and areas of the United States and sectors of the petroleum industry, including independent refiners, small refiners, nonbranded independent marketers, branded independent marketers, and among all users; (6) the allocation of residual fuel oil and refined petroleum products as necessary to maintain exploration for, and production of, fuels; (7) economic efficiency; and (8) the minimization of economic distortion, inflexibility, and unnecessary interference with market mechanisms;

Provides that in specifying prices the regulations shall provide for (1) a dollar-for-dollar pass-through of net increases in the cost of crude oil, residual fuel oil, and refined petroleum products to retail distributors and (2) the use of the same date in the computation of markup, margin, and posted price for all distributors at all levels;

Directs, to the extent practicable, allocations of each refined petroleum products to each independent branded and non-branded marketer, and of crude oil to each independent refiner, in an amount equal to that which they were able to obtain in calendar year 1972, such allocations to be equitably adjusted to provide for new market entry, a change of circumstances, or a pro rata sharing of any greater or lesser amount produced than produced in 1972 but does not require supply at 1972 levels if to do so would be inconsistent with the objectives outlined above, and expressly authorizes the President to depart from 1972 allocation patterns if necessary to meet priority needs; exempts the first sale of crude oil from stripper wells (those wells having an average daily production of crude oil not exceeding 10 barrels per well) from allocation and price regulations of this Act;

Provides that the regulations shall remain in effect until March 1, 1975, with certain exceptions whereby the President may exempt products; provides that compliance with requirements of this Act are a defense to certain actions which might otherwise violate the antitrust laws; directs the Federal Trade Commission to monitor the program and report on its effectiveness to the Congress within 60 days after implementation; authorizes the President to delegate any part of his authority under this Act to any Federal officer or agency or to any State or officer thereof;

And contains other provisions.

H.R. 16757—Public Law 93-511, approved December 5, 1974.

Extends for an additional 6-month period, until August 31, 1975, the existing authorities under the Emergency Petroleum Allocation Act of 1973 to assure that the allocation and price control authorities contained in the Act will continue through the ensuing winter and spring and give Congress an opportunity to consider whether the Act should be further extended or whether substantive amendments should be made.

Petroleum allocation—Voluntary

S. 398—Public Law 93-28, approved April 30, 1973.

Gives the President authority to establish, after public hearings priorities of use and an allocation system of supplies of petroleum products, including crude oil, in order to meet essential needs in various sections of the country and to prevent anticompetitive effects which could develop from shortages of petroleum products, and contains other provisions.

Sequoia National Park Hydroelectric Project

H.J. Res. 444—Public Law 93-522, approved December 14, 1974.

Authorizes the Secretary of the Interior to issue a permit for the use of Federal land in Sequoia National Park for the Kaweah No. 3 Hydroelectric project of Southern California Edison Co.; terminates the permit when existing of future licenses granted by the Federal Power Commission expire or not later than 10 years; specifies that the permit is to contain terms and conditions considered necessary by the Secretary to protect the Park; and states that the permit shall set forth that the privileges granted by it are to be exercised in accordance with applicable rules and regulations of the Federal Power Act.

Small Business Administration Authority

S. 3331—Public Law 93–386, approved August 23, 1974.

Provides loan assistance, refinancing, and deferred payments, if need can be shown to small businessmen adjusting to the new requirements imposed by the energy crisis.

Solar energy research

S. 3234—Public Law 93–473, approved October 26, 1974.

Establishes an interagency Solar Energy Coordination and Management Project to coordinate and administer the Federal program of research and development of solar energy; directs the chairman of the Project to initiate a solar resource determination and assessment program and a research and development program to facilitate commercial utilization of solar energy; requires the Chairman to initiate a program to construct demonstration facilities or powerplants for the development and use of solar energy; requires the establishment of a Solar Energy Information Data Bank to collect and disseminate information with respect to solar energy technologies; directs the Chairman to cooperate with other nations on solar energy research and projects; delineates the following as the advanced solar energy technologies covered by the Act: (1) solar heat for industrial purposes, (2) thermal energy conversion for electric powerplant generation, (3) conversion of organic materials to energy, (4) photovoltaic conversion, (5) sea thermal power conversion, (6) windpower conversion, (7) solar heating and cooling of housing and of commercial and public buildings, and (8) energy storage; provides that the Chairman may proceed with the construction of any small scale demonstration plant not in excess of $20 million; authorizes $75 million for fiscal year 1976 and such amounts as may be necessary for construction of demonstration projects; establishes a Solar Energy Research Institute to carry out any research, development or related functions assigned to it by the Chairman of the Project; and contains other provisions.

Solar heating and cooling

H.R. 11864—Public Law 93–409, approved September 3, 1974.

Authorizes $5 million to NASA for fiscal year 1975, and $5 million to HUD for fiscal year 1975 to be used to reimburse the Department of Defense, the National Bureau of Standards, and the General Services Administration for expenses incurred by them in carrying out their respective functions, and an additional $50 million for fiscal years 1976 through 1979 for further development and testing for large scale commercial use of solar systems in heating and cooling residential and commercial buildings.

Speed limit reduction

H.R. 11372—Public Law 93–239, approved January 2, 1974.

Sets in this measure, the Emergency Highway Energy Conservation Act, a uniform nationwide maximum speed limit of 55 miles per hour; conditions continued approval of Federal-aid highway projects upon the establishment by a State within 60 days of its enactment of a maximum speed limit not in excess thereof; and contains other provisions.

Supplemental appropriations, 1974

H.R. 11576—Public Law 93–245, approved January 3, 1974.

Appropriates $1,703,125,386 in supplemental appropriations for fiscal year 1974, including funds to explore and develop naval petroleum reserves.

Suspension of duty on methanol

H.R. 11251—Public Law 93–482, approved October 26, 1974.

Suspends the duty on methanol when imported for use in producing synthetic natural gas or for direct use as a fuel.

Truck fuel prices

S.J. Res. 185—Public Law 93–249, approved February 8, 1974.

Provides that the Interstate Commerce Commission shall issue its final order in Docket No. MC 43 (Sub. No. 2) as soon as possible which shall become effective not later than February 15, 1974. * * *

Washington Energy Conference

S. Res. 279—Senate adopted February 6, 1974; Reconsidered and adopted by Senate amended February 7, 1974.

States as the sense of the Senate that the Washington Energy Conference, called by the President to provide a forum for the discussion of the common problems faced by the oil consuming nations, should consider: (1) conservation measures necessary to reduce demand; (2) procedures for the emergency sharing of oil resources; (3) guidelines for bilateral agreements between oil consuming and oil producing countries; (4) coordination of research efforts in developing conservation practices and alternative sources of energy; (5) the responsibility for and the means to help to alleviate the plight of the developing countries in the oil crisis; and (6) closer coordination of fiscal and monetary policies; and further states that the United States should continue to bring about conditions of peace and stability in the Middle East.

94TH CONGRESS (1975–76)

Alaskan gas transportation

S. 3521—Public Law 94–586, approved October 22, 1976.

Establishes a procedure for expediting a decision on construction of facilities to transport natural gas from the North Slope of Alaska to the lower forty-eight States; directs the Federal Power Commission (FPC) to consider reasonable alternatives, including pending applications, for the transportation of Alaskan natural gas to consumers and to transmit a recommendation for approval of a particular system, or that no system should be approved pursuant to this act, to the President by May 1, 1977; provides a period for Federal officers and agencies, State governors, other instrumentalities of government, and interested persons to comment on the recommendation and report of the FPC; requires each Federal officer or agency to report to the President by July 1, 1977, on actions to be taken by the officer or agency relative to each transportation system reported upon by the FPC; gives the Council on Environmental Quality specific responsibilities to hold hearings on the various environmental impact statements which have been prepared relative to the alternative transportation systems reported on by the FPC and to comment formally to the President on the legal and factual sufficiency of each such statement, with the report to be made to the President by July 1, 1977, and contemporaneously made available to the public;

Provides that the President is to review the recommendation and transmit his own decision to Congress by September 1, 1977; permits an additional 90 days for transmittal if necessary to obtain environmental impact statements or to reach a sound decision; provides that the President's decision shall become final if Congress enacts a joint resolution of approval within 60 days of transmittal, and provides that if the joint resolution is not so enacted the President may propose a new decision within 30 days for consideration under the same procedures;

Provides that if a decision of the President is approved by Congress, Federal officers and agencies whose permission is required to proceed with the construction and initial operation of the approved system shall issue the necessary certificates, permits, rights-of-way, leases or other authorization as soon as practicable; restricts judicial review of a certificate and other approvals required through the construction phase to the point of initial commercial operation of the system to claims alleging that an action will deny rights under the Constitution or that an action is beyond the scope of statutory authority; limits the time for bringing these claims to 60 days from the date of the challenged action (or the date of actual or constructive knowledge of the challenged action); provides that such claims shall be barred unless filed within the 60 day time limit in the U.S. Court of Appeals for the District of Columbia acting as a Special Court; gives the court exclusive jurisdiction over such claims; provides that the court shall render its decision within 90 days unless it determines that a longer time is necessary to satisfy constitutional requirements; provides that the enactment of a joint resolution approving the decision of the President shall be conclusive as to the legal and factual sufficiency of the environmental impact statements submitted by the President relative to the approved system and that no court shall have jurisdiction to consider questions respecting the sufficiency of such statements under the National Environmental Policy Act of 1969; prohibits discrimination on the grounds of sex, race, creed, color, or national origin, in activities under this act; and contains other provisions.

Coal leasing

S. 391—Vetoed July 3, 1976. Senate overrode veto August 3, 1976; House overrode veto August 4, 1976. Became Public Law 94–377, without approval August 4, 1976. Senate record vote number 364,* 456.

Makes basic changes in the Mineral Leasing Act of 1920 governing leasing of Federally owned coal which constitutes almost 50 percent of the recoverable coal reserves in the United States; provides that leases may be issued only by competitive bidding and that at least 50 percent of all lands leased within any year be on the basis of a deferred bonus bidding system;

Requires the preparation of land use plans where the United States owns both the surface and subsurface prior to sale of leases, and provides that, in cases where the Federal interest is nominal, a State or local land use plan or a land use analysis prepared by the Secretary would be required;

Eliminates prospecting permits and preference right leases to prospectors and replaces this with a system of non-exclusive exploratory licenses; eliminates collective prospecting contracts in favor of the concept of a logical mining unit; provides that a coal lease for a logical mining unit is not producing in commercial quantities at the end of 10 years shall be terminated; provides that coal leases shall be for a term of 20 years, and may be readjusted every 10 instead of 20 years, dependent upon diligent production; permits the Secretary to waive the requirement for a period not to exceed 15 years and accept in lieu thereof an advanced royalty; provides for a comprehensive Federal exploration program for lands to be offered for leasing;

Increases from 37½ to 50 percent the share of lease revenues to the State in which the lease is located; specifies that the 12½ percent shall be used for planning, construction and maintenance of public facilities, and provision of public services with pri-

ority to be given to those areas suffering impact problems as a result of energy development and provides that 12½ percent of the revenues accumulating under the Geothermal Steam Act are to be available to the States for the same purpose; and contains other provisions.

Coastal zone management

S. 586—Public Law 94-370, approved July 26, 1976.

Amends the Coastal Zone Management Act to assist States facing Outer Continental Shelf (OCS) oil and gas development or other energy-related developments and facilities affecting the coastal zone; provides assistance in the form of grants or loans to coastal States from a new coastal energy facility impact fund, which is to be available to States receiving or anticipating impacts in their coastal zones from the exploration, development, and production of energy resources, or from the location, construction, expansion or operation of any energy facility requiring a Federal license or permit; authorizes moneys for the fund at $250 million per year for 3 fiscal years and the 1976 transition period; provides that up to 20 percent of the moneys may be used for planning grants with the balance to be used for efforts to reduce or ameliorate adverse impacts from energy exploration and development or to provide public facilities and services necessitated by such activity; requires as a condition of eligibility the provision of public facilities and services necessitated by such activity; requires as a condition of eligibility for assistance from the fund that the State must participate in a coastal zone management program and must experience or anticipate a temporary or net adverse impact or have experienced an adverse impact with the 3 years prior to enactment; authorizes automatic grants payable from the general treasury to any State where OCS oil or natural gas is being directly landed (brought ashore); provides a Federal guarantee for State or local government bonds issued to pay for measures needed to reduce adverse coastal impacts; contains provisions to make Federal leases consistent with approved coastal zone management programs of the affected States; raises the Federal share for coastal zone management funding from 66⅔ percent to 80 percent; amends the Mineral Leasing Act of 1920 to increase from 37½ percent to 60 percent the amounts returned to the States as reclamation funds from royalties paid to the Federal Government by mining companies extracting federally-owned minerals; and contains other provisions.

Electric and hybrid vehicle research

H.R. 8800—Vetoed September 13, 1976. House overrode veto September 16, 1976; Senate overrode veto September 17, 1976. Became Public Law 94-413 without approval September 17, 1976. Senate record vote numbers *281, *606.

Establishes within the Energy Research and Development Administration (ERDA) a comprehensive research and development project which will focus on basic and applied research on electric and hybrid vehicle batteries, controls, motors, and overall vehicle design, with early emphasis on battery technology; provides that ERDA shall also carry out a three-stage demonstration project to provide for (a) development of baseline data to delineate the performance and other characterics of existing electric and hybrid vehicle and hybrid vehicle technology, (b) contracting for the purchase, or lease of 2,500 electric or hybrid vehicles which represent the best available state-of-the-art technology, and (c) contracting for the purchase or lease of 5,000 advanced electric or hybrid vehicles which must represent a significant improvement over present state-of-the-art vehicles; provides that ERDA shall, through contracts and loan guarantees, carry out the research, development, and demonsration project, and may utilize other Federal agencies to the extent they enhance the participation of small businesses concerned with electric and hybrid vehicle technology, and shall reserve a reasonable portion of funds to be made available for the research, development, and demonstration project for contracts with such small businesses; requires ERDA to undertake a number of studies on various factors which may hinder or encourage the utilization of electric and hybrid vehicles, and also to make annual reports on the progress of the project; and authorizes a total of $160 million over 5 years for the project.

Energy policy and conservation

S. 622—Public Law 94-163, approved December 22, 1975, Senate record vote number 138.

Extends in title I, domestic supply availability, the authority of the Federal Energy Administration (FEA) to direct powerplants, and other major fuel burning installations, to convert to the use of domestic coal; increases competition in the oil industry by limiting joint venture bidding by major oil companies in the development of crude oil or natural gas on the Outer Continental Shelf; authorizes the President to restrict exports of energy supplies and energy-related materials under certain circumstances, and authorizes the President to require the production of crude oil and natural gas from designated fields at the maximum efficient rate of production or the temporary emergency production rate; creates a Strategic Petroleum Reserve of up to one billion barrels of crude oil, residual fuel oil and refined petroleum products to insulate the domestic economy from future supply interruptions; provides that the plan for the Reserve, which is subject to review and disapproval by either House, must be submitted to Congress not later than December 15, 1976; requires that the plan include provision for the creation of regional petroleum product reserves in regions where more than 20 percent of demand for such products is met by imports; authorizes the FEA to require importers and refiners to store as reserves up to 3 percent of their imports as throughputs for the previous calendar year; creates also an Early Storage Reserve consisting of not less than 150 million barrels of crude oil, residual fuel oil and refined petroleum products, to be stored within 3 years of the date of enactment;

Authorizes in title II, standby energy authorities, the President to prescribe energy conservation plans, including rationing plans, and to authorize actions necessary to carry out U.S. obligations under the International Energy Program if a contingency plan for implementing this authority has been approved by concurrent resolution of the House and Senate and the President has determined that exercise of the plan is required by a severe energy supply interruption or the International Energy Program; and gives the President authority to authorize persons in the oil industry to develop and carry out voluntary agreements for international oil allocation under a grant of limited antitrust immunity and to transmit information to the International Energy Agency;

Establishes in title II, energy conservation programs, mandatory average fuel economy performance standards for passenger automobiles and other light duty highway vehicles, which are applicable in model year 1978 and thereafter; requires energy labeling of automobiles and major home appliances and major appliances; authorizes block grants-in-aid for States to assist in the development and implementation of State-administered energy conservation programs and establishes programs to encourage increased efficiency of energy use by industry, for energy conservation within the Federal Government, and to promote the use of recycled oil;

Amends in title IV, *oil pricing policy*, the Emergency Petroleum Allocation Act of 1973 to establish a pricing formula for domestically-produced crude oil which provides for initial crude oil price rollback and authorizes gradual increases in the prices received by domestic producers over a 40-month period as follows:

Establishes a domestic composite price of $7.66 per barrel, which represents a rollback of $1.09 from the current domestic average estimated by FEA at $8.75 per barrel which, in combination with the removal of the $2 per barrel import tariff, will result in a significant reduction in the price of the crude oil run in domestic oil refineries; requires that these reductions in crude oil costs be reflected in the price of refined petroleum products paid by consumers; grants the President broad flexibility to set prices for various categories of oil production as long as the average domestic price does not exceed the $7.66 composite price; permits upward adjustment of the domestic composite price for inflation, and allows a 3 percent price increase per year as an incentive for the development of high-cost production, to maintain production from marginally profitable properties, or to encourage the application of enhanced recovery techniques, with the sum of these adjustments limited to 10 percent per year unless further authority for upward adjustment is obtained from Congress; allows the President to submit proposals to modify the 3 percent and 10 percent ceiling to Congress at 3 month intervals, which will take effect unless disapproved by either House; directs the President to submit to Congress on February 15, 1977, an analysis of energy supply, demand and import relationships which have evolved under the Act; requires the President to submit to Congress on April 15, 1977, a report on the impact of anticipated Alaskan oil production levels and prices on domestic oil prices and on incentives to increase and maintain production in the lower 48 States, and authorizes the President then to propose, subject to Congressional review, the exclusion of up to 2 million barrels per day of Alaskan production from the composite price ceiling and the establishment of a separate ceiling for this production not to exceed the highest price granted to significant volumes within the composite;

Extends the basic petroleum allocation authority presently contained in the Emergency Petroleum Allocation Act for 40 months; converts this allocation authority and the oil pricing provisions in this act to an optional standby status at the end of the 40-month period, and terminates the authority 5 years after enactment.

In title V, *general provisions*, sets forth provisions of general applicability relating to procedural requirements for agency actions, judicial review, and enforcement.

ERDA authorization

H.R. 3474—Public Law 94-187, approved December 31, 1975. Senate record vote numbers 371,568.

Authorizes $5,014,133,000 for fiscal year 1976 and $1,347,283,000 for the transition period July–September 30, 1976, for the Energy Research and Development Administration (ERDA) which was established by the Energy Reorganization Act of 1974 and is responsible for the nuclear programs formerly administered by the Atomic Energy Commission and which also has the leadership role in implementing nonnuclear energy research programs; includes, among the nuclear programs funded: basic physical research; fusion research; fission research, including the development of advanced reactors which will permit increased utilization of nuclear fuel resources—uranium and thorium; a nuclear materials program to assure a sufficient supply of enriched uranium to fuel civilian power reactors; a national security program to enable continued maintenance of a nuclear weapons capability; and en-

vironmental and safety research, which also includes work on the artificial heart and nuclear medicine; and includes among the nonnuclear programs; fossil energy development programs in coal, oil and gas, fusion, solar and geothermal energy programs, and advanced energy systems research programs.

ERDA supplemental authorization

S. 308—Public Law 94-269, approved April 16, 1976.

Authorizes for the Energy Research and Development Administration supplemental appropriations for $34 million for fiscal year 1976 and $23 million for the transition period July 1-September 30, 1976, in budget authority and $26.5 million and $17.5 million in budget outlays for the respective periods to provide a balanced nuclear weapons research, development, and testing program, a capability to verify the peaceful nuclear exposive agreement now being negotiated with the Soviet Union as part of the Threshold Test Ban Treaty and to purchase, at reduced cost, a computer now being leased for the Lawrence Livermore Laboratory.

Energy conservation and production

H.R. 12169—Public Law 94-385, approved August 14, 1976. Senate record vote number *295.

Provides an 18 month extention of the Federal Energy Administration (FEA) until December 31, 1977; improves FEA procedures with respect to: the standards of hardship applicable to exception and exemption requests; appeals from adverse decisions on exception and exemption requests; holding of local hearings where the effects of a rule or regulation are essentially local in character; public access to the Project Independence Evaluation System model; and the gathering of energy information from small businesses so as to alleviate unnecessary reporting burdens; establishes certain limitations on the Administrator's discretion, including restraints upon retroactive application of rules and regulations under specified circumstances and upon the submission, in a single energy action, of a proposal to exempt an oil, refined petroleum product, or refined product category from both the price and the allocation provisions of the regulations under the Emergency Petroleum Allocation Act of 1973; increases Congressional oversight of the agency's operations; provides for authorizations of appropriations on a functional basis to assure that appropriated funds are utilized consistently with Congressional intent, and provides for a national energy information system for coordinating the gathering of energy information and energy data analysis to be established by newly-created Office of Energy Information and Analysis within the FEA;

Provides a broad range of energy conservation measures for new and existing buildings; contains Federal energy conservation performance standards for new residential and commercial buildings; a $200 million grant program to permit low-income persons to weatherize existing homes; a program at the state level designed to provide home owners and owners of public and commercial buildings with reliable information regarding the costs, savings, and benefits of energy conservation related investments; a $2 billion loan guarantee program to encourage energy conservation related investments in public and commercial buildings; and a $200 million demonstration program to identify incentives to encourage homeowners to make energy conservation related investments in home improvements;

Amends the crude oil pricing policy established in the Energy Policy and Conservation Act to remove the 3 percent limitation on the production incentive factor in adjustment by the President of the composite price per barrel on domestic crude oil, while retaining the 10 percent overall limitation on combined price increases attributable to the inflation adjustment factor and the production incentive factor; exempts stripper well production from price ceilings, but not from the calculation of the weighted average composite price for domestic oil; gives stripper oil production an imputed value in calculating the composite price, with the imputed price to be first calculated at $11.63, an approximation of today's average first sale price of stripper well production, which is to be adjusted to reflect increases in the actual average price of domestic production remaining subject to controls; directs the President, taking into consideration the greater flexibility attending the removal of the 3 percent limitation, to amend the regulations to provide additional price incentives for extraordinary and high-cost enhancement techniques associated with tertiary recovery of oil; authorizes $3 million for a program to promote commercialization of solar energy; and contains other provisions.

Federal Energy Administration extension

S. 3625—Public Law 94-332, approved June 30, 1976.

Extends for 30 days, from June 30, 1976, to July 30, 1976, the expiration date of the Federal Energy Administration.

International Petroleum Exposition

S.J. Res. 59—Public Law 94-227, approved March 11, 1976.

Authorizes the President to invite the several States and foreign nations to participate in the International Petroleum Exposition at Tulsa, Oklahoma, from May 16 through May 22, 1976, for the purpose of exhibiting machinery, equipment, supplies, and other products used in the production and marketing of oil and gas, and bringing together buyers and sellers for the promotion of foreign and domestic trade and commerce in such products.

Interstate Oil and Gas Compact

S.J. Res. 126—Public Law 94-493, approved October 14, 1976.

Extends until December 31, 1978, the consent of Congress to the Interstate Compact to Conserve Oil and Gas consisting of 30 oil and gas producing States and 6 associate member States whose purpose is to conserve oil and gas by prevention of physical waste thereof from any cause, and calls for a special report from the Attorney General on the activities of advisory committees used in connection with activities related to the purposes of the Compact to see if they are consistent with the antitrust laws.

Land and Water Conservation Fund—National Historic Preservation Fund—Oil shale revenues

S. 327—Public Law 94-422, approved September 28, 1976.

Amends the Land and Water Conservation Fund Act to increase the minimum annual level of the Fund from $300 million to $600 million in fiscal year 1978, $750 million in fiscal 1979, and $900 million in fiscal 1980 and annually thereafter through fiscal 1989; provides that not less than 40 percent in any appropriation shall be for Federal purposes to insure that the Federal portion for land acquisition in the National Park System and elsewhere is not drastically reduced; retains the present 40 percent distribution formula of Land and Conservation Fund moneys for the first $225 million and adds a formula by which such funds will decrease as the fund begins to grow; raises from 7 to 10 percent the maximum percentage of allocated grant funds to which a State is entitled in any one year with the District of Columbia, Puerto Rico, the Virgin Islands, American Samoa, and the Northern Marianas (when they achieve commonwealth status) entitled to receive, on the basis of their relative populations, an amount equal to the share of one State in terms of the portion of the fund apportioned equally among the States; requires States to submit their Statewide plans to the areawide clearing house created under the Intergovernmental Cooperation Act for comment; provides that not to exceed 10 percent of a State's annual allocation (including the matching funds for that 10 percent) shall be available for sheltered facilities; requires States to account for funds received on a project-by-project basis; directs the Secretary of the Interior to prepare and submit a comprehensive review and report on urban recreation within one year of enactment; clarifies the extent to which Land and Water Funds can be used to acquire land for endangered species or wildlife refuges;

Extends the National Historic Preservation Act of 1966 for 5 years; changes the formula for matching grants for planning, nationally significant properties, demonstration projects, and meeting houses; repeals the 50 percent limit on planning; establishes a National Historic Preservation Fund, similar to the Land and Water Conservation Fund, and authorizes therefor $24.4 million for fiscal year 1977, $100 million annually for fiscal 1978 and 1979, and $150 million annually for fiscal 1980 and 1981; makes necessary changes in the act to make the Advisory Council on Historic Preservation an independent agency; extends U.S. participation in the International Centre for the Study of the Preservation and Restoration of Cultural Property for these years and authorizes therefor $175,000 annually;

Clarifies that the provisions of Public Law 94-377, which permits each State to use its share of oil shale revenues for planning, construction, and maintenance of public facilities and provisions of public services, applies to all moneys paid to Colorado and Utah from oil shale leases and to any State as its share of Federal oil revenues.

Motor vehicle information and cost savings

S. 1518—Public Law 94-364, approved July 14, 1976.

Amends the Motor Vehicle Information and Cost Savings Act to authorize additional appropriations to implement the following titles of the bill for fiscal year 1976, the transition period July 1-September 30, 1976, and fiscal years 1977 and 1978, respectively, as follows: Title I, which requires the Secretary of Transportation to promulgate bumper standards applicable to all passenger motor vehicles: $125,000, $75,000, $130,000 and $395,000; Title II, which provides for an automobile consumer information program: $1,875,000, $500,000, $3,385,000 and $3,375,000; Title III, which provides for diagnostic inspection demonstration projects: $5 million, $500,000, $7,500,000 and $4,400,000; and Title IV, which sets odometer requirements: $450,000, $100,000, $650,000 and $562,000; redefines the special order vehicle diagnostic inspection demonstration project under title III to assure that the project will be designed for use by States for high volume inspection facilities to evaluate conditions of parts, components and repairs required to comply with State and Federal safety, noise and emission standards and to assist the owner in achieving the optimum fuel and maintenance economy; provide the Secretary with additional authority to enforce the odometer and anti-tampering provisions and imposes a civil penalty of not to exceed $1,000 for each violation up to a maximum of $100,000 for a related series of violations and criminal penalties of not more than $50,000 and/or 1 year in prison.

Natural gas pipeline safety

H.R. 12168—Public Law 94-477, approved October 11, 1976.

Amends the Natural Gas Pipeline Safety Act of 1968 to authorize an additional total

of $17.165 million to implement the Natural Gas Pipeline Safety Act through fiscal 1978 and to make certain improvements to protect the public from hazards associated with natural gas pipelines; authorizes from the total, $7 million for State grant-in-aid programs; defines the term "intrastate pipeline transportation" as that not subject to the jurisdiction of the Federal Power Commission under this act and includes within the definition those pipeline facilities which transport gas from an interstate pipeline to a direct sales customer purchasing gas for its own consumption; provides that the Secretary may establish standards relating to emergency plans and procedures; revises the State certification process to allow certification of a State agency even though it may not have adopted each Federal safety standard established within 120 days of the date of certification; requires States which are certified under this act, to encourage and promote programs designed to prevent natural gas pipelines and subsurface utility equipment from being damaged as a result of excavation; increases the amount of Federal contribution to State efforts to enforce Federal natural gas pipeline safety standards by authorizing the Secretary to pay the cost of not more than three full-time pipeline safety inspectors for each State (but not to exceed $60,000 for each State) in fiscal year 1978: continues the existing authority of the Secretary of Transportation to pay up to 50 percent of the cost of personnel, equipment, and activities with respect to interstate transmission lines; makes clear that the Department of Transportation's pipeline safety standards are the only Federal pipeline safety standards that an interstate pipeline operator is required to meet; requires the Secretary to include in his annual report to the President and Congress a full compilation of natural gas pipeline leaks occurring during that year; requires each person engaged in the transportation of natural gas to conduct a program to educate the public on the hazards associated with gas leaks and on the importance of reporting gas odors and leaks to the pipeline owner; authorizes the Secretary to develop materials suitable for use in such a consumer education program; and authorizes under specified conditions citizens' civil actions for mandatory or prohibitive injunctive relief against any person who is alleged to be in violation of the act.

Naval petroleum reserves production

H R. 49—Public Law 94–258, approved April 5, 1976. Senate record vote number 342.

Transfers, effective June 1, 1977, jurisdiction of Naval Petroleum Reserve No. 4 in Alaska from the Secretary of the Navy to the Secretary of Interior and redesignates it the "National Petroleum Reserve in Alaska"; provides for continued petroleum exploration of this reserve but prohibits development and production until authorized by Congress;

Amends chapter 64, title 10, United States Code, to provide for the full exploration and development of the naval petroleum reserves and to permit limited production of Naval Petroleum Reserves No. 1—Elk Hills in California, No. 2—Buena Vista in California, and No. 3—Teapot Dome in Wyoming, within 90 days of enactment, under the authority of the Secretary of the Navy; defines "national defense" for the purposes of permitting such production in terms broad enough to permit production to offset a situation such as the Arab embargo of 1973; provides that production will not exceed the maximum efficient rate determined in accordance with sound oilfield engineering practices for a period of 6 years with provision for 3 year extensions thereafter; authorizes the President at his discretion to direct that all or any part of oil produced from the naval petroleum reserves be placed in a strategic reserve or be exchanged for petroleum of equal value to be so stored; waives, for the period of production, the requirement that the Secretary consult with the Congress on every contract; retains the requirement that the sale of oil be by competitive bidding for periods of not more than 1 year; prohibits the sale of more than 20 percent of the estimated Federal share of petroleum produced from Elk Hills to any buyer in a single year; requires that pipelines and facilities at this reserve be capable of handling 350,000 barrels of oil a day not later than 3 years after enactment; establishes a special account in the Treasury to offset outlay requirements for continued exploration and development, construction and filing of a strategic reserve and for operations in the Alaska reserve; requires that pipelines operate as common carriers; and contains other provisions.

Nuclear accident indemnity

H.R. 8631—Public Law 94–197, approved December 31, 1975. Senate record vote number 600.

Provides for the phase-out of government indemnity under the Price-Anderson Act, which was enacted in 1957 to protect the public and the emerging nuclear industry by assuring the availability of funds up to $560 million for the payment of claims and by protecting the nuclear industry against unlimited liability in the unlikely event of a catastrophic nuclear accident; requires participation by licensees in an insurance retrospective rating plan under which, in case of accident, each licensee would be assessed a deferred premium which would be a prorated share of the damages over the amount of Government indemnity and eliminates Government indemnity at the point where the total of primary insurance and the number of licensees paying the deferred premiums is sufficient to provide $560 million for claims payment without using Government funds; provides that the $560 million limit on liability shall rise thereafter to correspond with the increasing total level of primary insurance and deferred premium funds as more licenses are issued; extends indemnity coverage outside the territorial limits of the United States for certain activities conducted by Energy Research and Development Administration (ERDA) contractors or involving licensed nuclear facilities or licensed activities, none of which involve indemnity for any shipment of nuclear technology abroad under an agreement for cooperation with nations or groups of nations; extends the Act, which is scheduled to expire on August 1, 1977, for a period of 10 years, and contains other provisions.

Nuclear Regulatory Commission authorizations

S. 994—Public Law 94–18, approved April 25, 1975.

Authorizes supplemental appropriations of $50.2 million to the Nuclear Regulatory Commission for fiscal year 1975 which is in addition to the $90,765,000 fiscal year 1975 Atomic Energy Commission authorization (Public Law 93–276) transferred to the Commission on January 19, 1975, when the Atomic Energy Commission was abolished pursuant to the Energy Reorganization Act of 1974 (Public Law 93–438) and its functions transferred to the Nuclear Regulatory Commission and Energy Research and Development Administration.

S. 1716—Public Law 94–79, approved August 9, 1975.

Authorizes $222,935,000 for fiscal year 1976 and $52,750,000 for the transition period July 1–September 30, 1976, for the Nuclear Regulatory Commission; authorizes an additional 131 employees for nuclear safety inspection and enforcement; prohibits the shipment by air transport of any form of plutonium (except if it is contained in a medical device designed for individual human application) until the Commission has certified to the Joint Committee on Atomic Energy that a safe container has been developed which will not rupture under crash and explosion of a high-flying aircraft; and clarifies the commencing date for the terms of the members of the Commission.

S. 3107—Public Law 94–291, approved May 22, 1976.

Authorizes $274,300,000 for the Nuclear Regulatory Commission for fiscal year 1976; permits the obligation of funds received by the Commission for the cooperative nuclear safety research programs only to the extent provided in appropriation acts; and permits the retention and use of funds received by the Commission under appropriations acts for the cooperative nuclear research programs during fiscal year 1976.

Public works—ERDA

H.R. 8122—Public Law 94–180, approved December 26, 1975. Senate record vote number 565.

Appropriates $4,310,156,500 for fiscal year 1976 and $1,173,526,000 fro the transition period July to September 30, 1976, for public works for water and power development and energy research, including the Corps of Engineers—Civil, the Bureau of Reclamation, the Bonneville Power Administration and other power agencies of the Department of the Interior, the Appalachian Regional Development Commission, the Federal Power Commission, the Nuclear Regulatory Commission, the Tennessee Valley Authority, and related independent agencies and commissions; and

Appropriates $3,130,756,000 for fiscal year 1976 and $941,507,000 for the transition period July to September 30, 1976, for the programs of the Energy Research and Development Administration (ERDA).

H.R. 14236—Public Law 94–355, approved July 12, 1976. Senate record vote number *321.

Appropriates $9,703,713,000 for fiscal year 1977 for public works for water and power development and energy research including the Corps of Engineers—Civil, the Bureau of Reclamation, power agencies of the Department of the Interior, the Appalachian regional development programs, the Federal Power Commission, the Tennessee Valley Authority, the Nuclear Regulatory Commission, the Energy Research and Development Administration, and related independent agencies and commissions, including the Appalachian Regional Commission, the Nuclear Regulatory Commission, the Federal Power Commisson, and the Tennessee Valley Authority; includes a substantial increase in funding over the budget estimate for research and development in the areas of solar energy and fusion power and for civil planning and construction projects of the Army Corps of Engineers; and provides that $200 million be charged to the fiscal year 1976 transition quarter for the Teton Dam disaster payment of claims.

Tax reduction of 1975

H.R. 2166—Public Law 94–12, approved March 29, 1975. Senate record vote numbers 112,117.

Amends the Internal Revenue Code of 1954 for a $22.8 billion net tax reduction;

Depletion Allowance: Repeals the 22 percent depletion allowance for major oil and natural gas producers; retains the 22 percent depletion allowance for independent companies, who do not have retail outlets, on a daily maximum of 2,000 barrels of oil or 12 million cubic feet of natural gas which is phased down to 1,000 barrels or 6 million cubic feet of gas by 1980 and to a 15 percent depletion allowance on the first 1,000 barrels or 6 million cubic feet by 1984.

TVA Bonding Authority

H.R. 9472—Public Law 94–139, approved November 28, 1975.

Amends the Tennessee Valley Authority Act of 1933 to increase from $5 billion to $15 billion the amount of revenue bonds which the Tennessee Valley Authority may have outstanding to finance additions to its power system and allow for annual payments to the Treasury for earlier appropriated investments as is the case of other Federal corporations.

95TH CONGRESS (1977)

Natural gas emergency

S. 474—Public Law 95-2, approved February 2, 1977. (21)

Authorizes the President to declare a natural gas emergency if he finds that a severe shortage exists or is imminent in the United States which would endanger the supply of natural gas for high-priority uses and the exercise of his authorities is reasonably necessary to assist in meeting requirements for such uses; provides that these authorities shall terminate when the President finds that shortages no longer exist and are no longer imminent;

Emergency Allocation: Authorizes the President, during a declared natural gas emergency, to require (1) any interstate pipeline to make emergency deliveries or transport interstate natural gas to any other interstate pipeline or a local distribution company served by an interstate pipeline; (2) any intrastate pipeline to transport interstate natural gas from one interstate pipeline to another or to any local distribution company served by an interstate pipeline; or (3) the construction and operation by any pipeline of necessary facilities to effect deliveries or transportation; directs the President, in issuing such orders, to consider the availability of alternative fuel to users of the interstate pipeline ordered to make deliveries and to determine that they would not have an adverse effect on the natural gas supply or exceed the transportation capacity of the pipeline; provides that these authorities shall terminate by April 30, 1977, or after the President terminates the emergency, whichever is earlier;

Emergency Sales at Deregulated Prices: Authorizes interstate pipelines or local distribution companies to purchase supplies of natural gas for delivery before August 1, 1977, from intrastate pipelines at unregulated prices as reviewed by the President for fairness and equity; provides that these purchases could be delivered from intrastate pipelines and any producer of natural gas not affiliated with an interstate pipeline unless such natural gas was produced from the Outer Continental Shelf, and the sale or transportation of the gas was not, immediately prior to the date of the contract for purchase of the gas, certificated under the Natural Gas Act; authorizes the President to require, by order, any interstate or intrastate pipeline to transport gas and operate facilities necessary to carry out emergency purchase contracts;

Miscellaneous: Authorizes the President to subpena information to carry out his authority under the Act; contains antitrust protection provisions available as a defense against civil or criminal action brought against any person for violation of the antitrust laws with respect to actions taken pursuant to a Presidential order; gives the Temporary Emergency Court of Appeals exclusive jurisdiction to review all cases including any order issued or other action taken under this act; imposes civil penalties of up to $25,000 a day for violations of orders and $50,000 a day for willful violations; directs the President to require weekly reports which shall be made available to the Congress on prices and volume of natural gas delivered, transported or contracted for, and to report to Congress by October 1, 1977, on all actions taken under this act; and authorizes the President to delegate all or any portion of the authority granted to him to such executive agencies or officers he deems appropriate.

ENERGY VETOES—1972

Mining and Minerals Research Centers

S. 635—President Nixon Pocket Vetoed October 27, 1972.

Amended the Mining and Mineral Policy Act to provide a more adequate national program of mining and mineral resources through the establishment of research centers throughout the United States; authorized matching grants to each participating state of $200,000 in fiscal year 1973, $300,000 in fiscal year 1974, and $400,00 for each fiscal year thereafter for the work of such centers; authorized additional funds for special mineral resource research projects; and contained other provisions.

1974

Energy emergency

S. 2589—Vetoed March 6, 1974. Senate sustained veto March 6, 1974.

Declares that current and imminent fuel shortages have created a nationwide energy emergency; calls for proposals for energy emergency rationing and conservation measures and authorizes specific temporary emergency actions to be exercised, subject to congressional review and right of approval or disapproval, to assure that the essential needs of the United States for fuels will be met;

Establishes a Federal Energy Emergency Administration (FEEA) until May 15, 1975, to be headed by an Administrator who will be appointed by the President with the advice and consent of the Senate; transfers certain powers and duties of the President under the Emergency Petroleum Allocation Act of 1973 to the FEEA Administrator; authorizes the promulgation of a rule to order priorities among users of crude oil, residual fuel oil, or any refined petroleum product, and for the assignment of rights entitling certain users to obtain products in precedence to others; requires the President to provide procedures by which any user may petition for review of priorities and entitlements;

Authorizes the FEEA Administrator to promulgate by regulation energy conservation plans to reduce energy consumption to a level which can be supplied by available energy resources through transportation controls, including highway speed limits, or other necessary and reasonable restrictions on the public or private use of energy, including limitations on energy consumption by businesses; provides that no energy conservation plan promulgated by regulation under this authority may impose rationing or any tax or user fee, or provide for a credit or deduction in computing any tax; terminates any such energy conservation plan on May 15, 1975; requires transmission of any plan to each House of Congress, and makes any plan which would become effective before March 15, 1974, subject to congressional disapproval; provides that any energy plan which would become effective on March 15, 1974, and before September 1, 1974, shall go into effect 15 days after its transmission to Congress if neither House disapproves; provides that any energy plan which would become effective on or after September 1, 1974, must be approved by act of Congress; provides procedures for congressional review of the plans;

Directs the Administrator, to the extent practicable, to prohibit, as its primary energy source, the burning of natural gas or petroleum products by any major fuel-burning installation (including any existing electric powerplant) which, on the date of enactment, has the capability and necessary plant equipment to burn coal;

Directs the Administrator, within 30 days after enactment, to propose a contingency plan for allocation of supplies of materials and equipment for exploration, production, refining, and required transportation of energy supplies and for the construction and maintenance of energy facilities, implementation of such a plan to be subject to congressional approval by a means similar to that for any energy conservation plan;

Authorizes the Administrator, in order to supplement domestic energy supplies, to require production of oilfields to be designated by the Secretary of the Interior or the Secretary of the Navy at the maximum efficient rate of production and, in certain cases, in excess of the maximum rate;

Requires the President to specify equitable prices for domestic crude oil, all residual oil, and all refined petroleum products; provides that within 30 days of enactment the ceiling price for all crude oil be the price for that grade of oil in that field at 6:00 a.m., May 15, 1973, plus $1.35, making the average basic price $5.25 per barrel with savings from a price rollback to be passed on to consumers on a dollar-for-dollar basis; provides that the President may establish a higher ceiling price up to $7.09 per barrel, upon proper justification to Congress, that a higher price is necessary for a recovery of costs as in the case of crude oil produced from stripper wells or by secondary or tertiary recovery;

Contains provisions for the protection of franchised dealers; provides, in relation to antitrust provisions, for procedures to achieve the goals of this act while retaining the integrity of the antitrust laws; authorizes the appropriate agencies to take action for conserving energy consumption by regulated carriers; authorizes certain restrictions on exports; provides for employment impact and unemployment assistance to those adversely affected by the energy emergency; directs the Secretary of Transportation to encourage the use of carpools; prohibits the use of limousines by Federal officials in the executive branch below the level of a Cabinet officer except for the Federal Bureau of Investigation and the Department of State for diplomatic assignment; prohibits the use of funds for furnishing a chauffeur for individual use to any Federal official; provides for administrative procedures and judicial review; and contains enforcement provisions; authorizes to FEEA to carry out its functions and to make grants to State $75 million annually for fiscal years 1974 and 1975, with an additional $50 million for 1974 and $75 million for 1975 grants to States to carry out conservation measures and $500 million for fiscal year 1974 for grants to States for unemployment assistance;

Amends the Clean Air Act to permit the Administrator of the Environmental Protection Agency to suspend, until November 1, 1974, any stationary source fuel or emission limitation; provides for implementation plan revisions; extends the interim standards for motor vehicle emissions to 1977; and contains other provisions.

Energy transportation

H.R. 8193—Pocket vetoed December 30, 1974.

Requires that 20 percent initially, 25 percent beginning after June 30, 1975, and 30 percent beginning after June 30, 1977, of oil for import into the United States shall be transported on U.S.-flag vessels to the extent that such vessels are available at fair and reasonable rates; authorizes the President to waive these requirements for a period up to 180 days if he determines that an emergency exists; applies the requirements to direct shipments from the original point of production and to and from any intermediate points used for storage, refining, processing, packaging, unloading, or reloading of oil; exempts refiners whose total refinery capacity does not exceed 30,000 barrels a day provided that the total quantity of oil imported by or for such refiner does not in any year exceed the rated refining capacity of such refiner; permits reduction of license fees for imports of oil by 15 cents per barrel of oil other than residual fuel oil and by 42 cents per barrel for residual fuel oil if

the oil is carried on privately owned U.S.-flag commercial vessels and the amount of the license fee reduction is passed on to the ultiamte consumer;

Requires that not less than 10 percent of funds appropriated or otherwise made available for the foreign-trade requirements of the United States shall be allocated to each of the Atlantic, Gulf, Great Lakes, and Pacific range of ports;

And contains other provisions.

Nuclear incidents—Insurance

H.R. 15323—Vetoed October 12, 1974.

Amends and further extends for five years from August 1, 1977, to August 1, 1982, the Price-Anderson indemnity provisions of the Atomic Energy Act which were designed to protect the public and the emerging nuclear industry by assuring the availability of funds for the payment of claims in the event of a nuclear incident up to a total amount of $560 million, which represents the sum of Government indemnity fixed at $500 million by the Congress and the then-existing (1957) maximum available private liability insurance of $60 million (currently $110 million);

Provides that the provisions of this bill shall not come into effect until 30 days after the Rasmussen Study on reactor safety and the probability of accidents has been completed and the Joint Committee on Atomic Energy has reported to the Congress its evaluation of the results of such study unless Congress within 30 days thereafter adopts a concurrent resolution of disapproval of extension of the Price-Anderson Act;

Amends the act to phase out Government indemnity for the nuclear industry; authorizes the Atomic Energy Commission (AEC) to establish the terms and conditions of the financial protection required of nuclear licenses and provides a deferred premium system whereby in the event of a nuclear incident resulting in damages exceeding the base layer of insurance each license would be assessed a deferred premium which would be a prorated share of the excess damages; sets the level of the standard maximum deferred premium at no less than $2 million per facility and an upper level for the premium of $5 million per facility; retains the present $560 million limit on total liability until the total of primary insurance and assessable retrospective premiums reaches the level necessary to completely replace the Government indemnity; places no ultimate limitation on the level to which this coverage could rise and has a projected level, which, at a premium level of $3 million per reactor, is $1 billion about 1987 and $1,346,000,000 in 1990;

Extends the coverage of the act (which is presently limited to the occurrence of a nuclear incident within the United States or involving the nuclear ship Savannah and to nuclear incidents involving activities under contract to the United States) to include occurrences outside the territorial limits of the United States and all other nations involving ocean shipments of fuel during transit from one AEC license to another and a nuclear facility such as an AEC licensed floating nuclear powerplant, and any occurrences resulting from theft;

And contains other provisions.

Strip mining control

S. 425—Pocket vetoed December 30, 1974.

Establishes a nationwide program to prevent the adverse effect to society and the environment resulting from surface mining; places the authority for the administration of the Act with the Secretary of Interior who shall prepare and publish within 6 months regulations concerning coal surface mining and reclamation operations and a detailed description of actions to be taken by a State to develop an acceptable State program to regulate such operations; establishes the Office of Reclamation and Enforcement in the Department of the Interior which will be headed by a Director to be named by the President, with the advice and consent of the Senate; gives States 18 months to submit their regulatory programs for approval by the Secretary which upon approval gives States full responsibility for all regulation of surface mining and reclamation within the State; provides for Federal regulation of strip mining and reclamation in any State which proves unwilling or unable to do so itself; establishes an interim surface mining permit program which is in effect until the deadline for approval of a State program; sets requirements for performance bonds which must be filed before a surface mining permit is issued, such bond to satisfy the costs for reclamation of the land mined; sets criteria to be met by all surface mining and reclamation operations under a State program, a Federal program, and Federal Lands Program or the State or Federal interim permit, including the banning of downslope dumping of spoil, and mined materials in mountainous areas and restoration to the approximate original contour of the land with all highwalls (vertical cuts in the mountainside), spoil piles and depressions eliminated; provides for civil and criminal penalties for certain violations of the act; provides for citizen suits against persons violating the act or against the responsible regulatory authority; establishes a process for designation of areas as unsuitable for surface mining and prohibits new surface mining on National Parks, National Wilderness and National Forest lands; applies the requirements of the Act to public corporations, agencies, and utilities, including the Tennessee Valley Authority, which engage in surface mining; creates an "Abandoned Mine Reclamation Fund" in the Treasury to be funded by a reclamation fee of 35 cents per ton of coal produced by stripmining or 25 cents per ton for underground mined coal or 10 percent of the value of the coal, whichever is less; provides that 50 percent of the funds collected annually shall be spent in the State contributing the funds; authorizes an in-depth study by the National Science Foundation and the National Academy of Engineering involving surface and open pit mining for minerals other than coal; provides that where the surface owner is not the owner of the mineral rights, written consent or waiver by the owner must be obtained, or the surface miner must in addition to the performance bond required; places a moratorium until March 1976 on all surface mining of property privately owned where the Federal Government owns the mineral rights; authorizes funds to be used on a matching basis for the establishment of a mining and mineral resources institute or center at one college or university in each State; authorizes grants to States to provide cash payments to persons who become unemployed as a direct result of the administration and enforcement of the Act and who are not eligible for regular unemployment assistance; and contains other provisions.

1975

Emergency petroleum allocation

S. 1849—Vetoed September 9, 1975. Senate sustained veto September 10, 1975. NOTE: (Provisions contained in H.R. 4035, Oil Pricing, which was vetoed on July 21, 1975.) Senate record vote numbers 281,388.

Extends the Emergency Petroleum Allocation Act of 1973, which contains the only existing authority for allocation and price control of oil, from August 31, 1975, to March 1, 1976; extends the authority of the Federal Energy Administration (FEA) under the Energy Supply and Environmental Coordination Act to require electric powerplants and major industrial facilities with the capability to utilize coal to convert from oil and natural gas to coal from June 30, 1975, to December 31, 1975; and requires the FEA to include in its quarterly energy information reports information on pricing and related developments in the coal industry and any other major energy industries not subject to Federal price regulation.

Oil import fees

H.R. 1767—Vetoed March 4, 1975. Senate record vote number 13.

Suspends for the 90-day period beginning on the date of enactment any authority the President might have to adjust imports of petroleum and petroleum products; negates any Presidential action to adjust petroleum imports taken after January 15, 1975, and before the date of enactment, and also provides for the rebate of any duties or import fees or taxes levied and collected pursuant to any such action; provides that the suspension of this authority will cease if at any time during the 90-day period war is declared, a national emergency occurs, or certain situations involving the commitment of U.S. Armed Forces arise; and provides that the import license fee system on petroleum and petroleum products which the provisions of this bill provide shall not affect the import license fee system on petroleum and petroleum products which was in effect on January 15, 1975.

Oil pricing

H.R. 4035—Vetoed July 21, 1975. Senate record vote numbers 161,287.

Makes more effective the mechanism in existing law for congressional review and right of disapproval of Presidential proposals to exempt petroleum products from the allocation or pricing controls currently in effect under the Emergency Petroleum Allocation Act of 1973;

Expands the time for congressional review from 5 to 20 days and contains procedures for expediting review to assure that the question of approval or disapproval can be brought to the floor of either House within the 20-day review period;

Requires the President to establish administratively price controls for presently noncontrolled "new oil" (oil produced at levels above the 1972 volumes) with price ceilings no higher than the January 31, 1975, prevailing prices (which averaged $11.28 per barrel on a national basis); does not make this authority subject to congressional review unless the proposal would bring the price over this maximum ceiling;

Provides for congressional review of any proposal to permit the price of presently controlled "old oil" (oil from properties producing at, or less than, their 1972 production levels) to increase substantially above its national average price of $5.25; grants specific authority to alter present price controls to allow a price incentive to take account of natural declines in field production and to encourage the most costly use of secondary and tertiary recovery methods where the costs are significantly greater than the regular methods; requires congressional review only where the total incentives are of such a magnitude as to cause an increase in excess of 50 cents per barrel in the national average price of "old" crude oil;

Extends the Emergency Petroleum Allocation Act, which contains the only existing authority for price control and allocation of crude oil and petroleum products, from August 31 to December 31, 1975; extends the authority under the Energy Supply and Coordination Act of the Federal Energy Administration to issue coal conversion orders requiring facilities using oil or gas to convert to coal and the authority under that Act to gather energy data from June 30 to December 31, 1975;

Provides a limited exemption for small refiners from the crude oil entitlements program in effect under current Federal Energy Administration regulations; and contains other provisions.

Strip mining

H.R. 25—Vetoed May 20, 1975. House sustained veto June 10, 1975. Senate record vote number 62.

Establishes a program for the regulation of coal surface mining activities and the reclamation of coal mined lands in order to assure that surface coal mining operations—including exploration activities and the surface effects of underground mining—are conducted so as to prevent or minimize degradation to the environment, and that surface mining operations are not conducted where reclamation is not feasible according to the terms and conditions of the Act;

Establishes the Office of Surface Mining Reclamation and Enforcement in the Department of the Interior to administer the programs for controlling surface coal mining operations, including the State programs which must be submitted for approval;

Requires the Corps of Engineers to approve the basic standards regulating mine waste disposal and review plans but with no responsibility for on-the-ground supervision and enforcement;

Establishes a fund and a program for the reclamation of abandoned mined lands and for relief of impacted areas; provides funding for such activities from reclamation fees collected at 35 cents per ton for surface mined coal, 15 cents per ton for all coal mined by underground methods or 10 percent of the value of the coal at the mine, whichever is less except that the fee will not exceed 5 percent of the value of lignite; provides that 50 percent of fees collected in any one State are to be expended in that State for reclamation or alleviating the impact of coal development in the area; provides that, in areas where there is relatively little damage from past coal mining, the States' share of the fees may be used for other purposes;

Sets a series of minimum uniform requirements for all coal surface mining operations on both Federal and State lands which deal with four basic issues—pre-planning, mining practices, post-mining reclamation and the protection of water resources; specifies that lands which cannot be reclaimed under the standards of the Act and lands within the National Park, Wildlife Refuge, Wilderness and Wild and Scenic Rivers systems, National Recreation Areas, National Forests, and certain other areas may not be strip-mined; makes special provision for mining which affects alluvial valley farming land; provides for certain limited variances to the prescribed standards where such variances provide equal or better protection to the environment and result in a higher post-mining use;

Provides, in regard to rights of private surface owners, for obtaining consent as a condition of issuing a new Federal coal lease, and requires payment of all damages, including lost income, and payment of limited additional compensation to the surface owner;

Establishes a grant program to fund mining and mineral resources and research institutes in public colleges and universities to train qualified personnel in mine-related fields and to conduct research related to mining technology;

Provides for a study, to be completed by 1976, to determine the appropriate program for regulating surface coal mines on Indian lands and requires, in the interim, that all leases on Indian lands include certain performance standards at least as stringent as those in the Act: and contains enforcement and other provisions.

1976

Automotive research and development

H.R. 13655—Vetoed September 24, 1976. House overrode veto September 29, 1976; Senate sustained veto September 29, 1976. Senate record vote number *283,*582,*674.

Establishes a 5-year program within the Energy Research and Development Administration (ERDA) for advanced automobile research and development to ensure the development of advanced automobile propulsion systems, advanced automobile subsystems, and integrated test vehicles; authorizes the Administrator of ERDA to establish in-house programs and provide grants and contracts outside ERDA; directs the Administrator to utilize the expertise of the Department of Transportation and other Federal agencies to the extent of their appropriate expertise; places the responsibility with the Administrator for testing and evaluating new technology as well as establishing a capability for information collection, analysis, and dissemination; requires the submission of an annual report to Congress on the research and development activities within the United States as well as on the need for a loan guarantee authority in order to perform research and development activities in automobile technology and commercialization thereof.

Coal leasing

S. 391—Vetoed July 3, 1976. Senate overrode veto August 3, 1976; House overrode veto August 4, 1976. Became Public Law 94-377, without approval August 4, 1976. Senate record vote number 265,*456.

Makes basic changes in the Mineral Leasing Act of 1920 governing leasing of Federally owned coal which constitutes almost 50 percent of the recoverable coal reserves in the United States; provides that leases may be issued only by competitive bidding and that at least 50 percent of all lands leased within any year be on the basis of a deferred bonus bidding system;

Requires the preparation of land use plans where the United States owns both the surface and subsurface prior to sale of leases, and provides that, in cases where the Federal interest is nominal, a State or local land use plan or a land use analysis prepared by the Secretary would be required;

Eliminates prospecting permits and preference right leases to prospectors and replaces this with a system of non-exclusive exploratory licenses; eliminates collective prospecting contracts in favor of the concept of a logical mining unit; provides that a coal lease for a logical mining unit which is not producing in commercial quantities at the end of 10 years shall be terminated; provides that coal leases shall be for a term of 20 years, and may be readjusted every 10 instead of 20 years, dependent upon diligent production; permits the Secretary to waive the requirement for a period not to exceed 15 years and accept in lieu thereof an advanced royalty; provides for a comprehensive Federal exploration program for lands to be offered for leasing;

Increases from 37½ to 50 percent the share of lease revenues to the State in which the lease is located; specifies that 12½ percent shall be used for planning, construction and maintenance of public facilities, and provision of public services with priority to be given to those areas suffering impact problems as a result of energy development and provides that 12½ percent of the revenues accumulating under the Geothermal Steam Act are to be available to the States for the same purpose; and contains other provisions.

Electric and hybrid vehicle research

H.R. 8800—Vetoed September 13, 1976. House overrode veto September 16, 1976; Senate overrode veto September 17, 1976. Became Public Law 94-413 without approval September 17, 1976. Senate record vote numbers *281,*606.

Establishes within the Energy Research and Development Administration (ERDA) a comprehensive research and development project which will focus on basic and applied research on electric and hybrid vehicle batteries, controls, motors, and overall vehicle design, with early emphasis on battery technology; provides that ERDA shall also carry out a three-stage demonstration project to provide for (a) development of baseline data to delineate the performance and other characteristics of existing electric and hybrid vehicle and hybrid vehicle technology, (b) contracting for the purchase, or lease of 2,500 electric or hybrid vehicles which represent the best available state-of-the-art technology, and (c) contracting for the purchase or lease of 5,000 advanced electric or hybrid vehicles which must represent a significant improvement over present state-of-the-art vehicles; provides that ERDA shall, through contracts and loan guarantees, carry out the research, development, and demonstration project, and may utilize other Federal agencies to the extent they enhance the participation of small businesses concerned with electric and hybrid vehicle technology, and shall reserve a reasonable portion of funds to be made available for the research, development, and demonstration project for contracts with such small businesses; requires ERDA to undertake a number of studies on various factors which may hinder or encourage the utilization of electric and hybrid vehicles, and also to make annual reports on the progress of the project; and authorizes a total of $160 million over 5 years for the project.

NATIONAL STANDARD DEDUCTION IN FOOD STAMP PROGRAM

Mr. LEAHY. Mr. President, about 3 weeks ago Secretary Bergland presented to the Congress the administration's proposal on reform of the food stamp program. The Secretary stated that their proposal is designed to streamline, overhaul, and tighten up the program, while providing greater access to those in need.

For the most part I agree with their proposal. I especially applaud the new administration for recognizing the benefits of eliminating the purchase requirement. This idea, which has been championed by my colleagues Senators DOLE and MCGOVERN, will remove one of the greatest hurdles to participation in the program: the purchase prices. Not only does EPR improve access, it also simplifies the program's operation.

Currently, we have 17.3 million recipients paying over $3 billion a year to 15,000 check cashing firms, banks, post offices, welfare offices, town clerks, churches, and even fire stations and corner stores. Each year these $3 billion worth of stamps must be printed, shipped, stored, issued, redeemed, and reconciled. Abandoning the purchase requirement would completely eliminate the cash transactions with their great potential for abuse, and would cut administrative costs at every level. I fully support this part of the administration's program.

In a further effort to streamline the program, the administration has recommended replacing the present system of itemized deductions with a single national standard deduction in the food stamp program. While a standard deduction may reduce administrative complexity, it also removes the responsiveness of the food stamp program to individual household differences throughout the country. A standard deduction gives

an average deduction to all those participating, whether they need it or not.

By removing this individual responsiveness, a standard deduction also removes the responsiveness to various factors which are specific to, and within, different regions of the country. At this time, I ask unanimous consent to submit for the record a table prepared by the Congressional Budget Office which outlines the average deductions in different regions of the country.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

CHART 1

ITEMIZED DEDUCTIONS PER HOUSEHOLD, U.S. AND REGIONAL AVERAGE

	Overall average	New England	Mid-Atlantic	Southeast	Midwest	Western	West-Central
1. Shelter	$46.50	$77.85	$49.16	$36.76	$44.86	$59.54	$28.27
2. Mandatory (taxes, etc.)	10.09	21.79	9.62	9.71	8.35	11.12	7.69
3. Medical expenses	7.42	10.58	4.04	12.72	5.28	5.14	10.73
4. Work allowance	5.72	7.60	5.46	6.84	4.36	5.68	6.08
5. Child care	2.30	.99	1.64	2.22	2.04	4.43	2.67
6. School tuition and mandatory fees	1.21	3.22	1.39	.55	.71	1.57	1.34
7. Alimony support	.35	1.47	.23	.60	.02	.02	.34
8. Casualty losses	.31	.05	.20	.07	.37	.35	.55
9. Other	1.12	.07	.04	.80	.82	.14	.45
Total deductions [1]	74.12	123.62	71.78	70.27	66.31	87.99	58.7

[1] Figures may not add to exact totals because of rounding.

NOTES

Mid-Atlantic: Delaware, District of Columbia, Maryland, New Jersey, New York, Pennsylvania, Puerto Rico, Virginia, Virgin Islands, and West Virginia.

Southeast: Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, and Tennessee.

Midwest: Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, Ohio, and Wisconsin.

Western: Alaska, Arizona, California, Guam, Hawaii, Idaho, Nevada, Oregon, Samoa, Trust Territories, and Washington.

West-Central: Arkansas, Colorado, Louisiana, Montana, New Mexico, North Dakota, Oklahoma, South Dakota, Texas, Utah, and Wyoming.

New England: Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont.

Source: CBO tabulations from USDA September 1975 Food Stamp Survey tape. Tabulations include Puerto Rico and outlying territories. Numbers may not add up to totals because of rounding.

Mr. LEAHY. This table shows that average deductions vary from $59 in the west-central region to $124 in New England. The major cause of this variation is the difference paid for shelter. In general, higher deductions are taken in the colder and more urban areas of the country reflecting the higher costs of shelter in those areas. Therefore, with such high variation in shelter costs, a standard deduction creates losers and gainers. In this case, those who live in the colder and/or more urban areas lose and those who live in areas with low shelter costs gain. This effect is clearly shown in an analysis of the administration proposal's effect on various areas of the country which I ask unanimous consent to submit at this time.

There being no objection, the analysis was ordered to be printed in the RECORD, as follows:

CHART 2

REGIONAL EFFECTS OF FOOD STAMP PROPOSALS [1]

[In percent]

	Northeast	North-central	South	West
Ineligible:				
Carter	10.9	10.6	5.0	10.9
Talmadge	13.9	13.1	7.0	13.2
Leahy	10.1	10.7	5.0	11.0
Lose bonus:				
Carter	50.2	24.7	19.9	37.3
Talmadge	45.7	20.5	19.8	32.6
Leahy	38.0	17.9	13.2	30.0
No change:				
Carter	22.1	24.5	27.6	27.9
Talmadge	17.4	23.9	23.5	28.0
Leahy	39.9	34.0	33.1	36.4
Gain bonus:				
Carter	16.1	39.4	47.1	22.6
Talmadge	22.3	41.7	49.2	25.6
Leahy	11.6	36.9	48.3	21.8

[1] These estimates were prepared by the Food and Nutrition Service, USDA.

NOTES

Northeast: Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, and Pennsylvania.

North-Central: Ohio, Indiana, Michigan, Illinois, Wisdonsin, Missouri, Kansas, Iowa, Minnesota, Nebraska, South Dakota, and North Dakota.

South: Delaware, Maryland, District of Columbia, West Virginia Virginia, Kentucky, Tennessee, North Carolina, South Carolina, Georgia, Florida, Alabama, Mississippi, Louisiana, Arkansas, Oklahoma, and Texas.

West: Montana, Wyoming, Colorado, New Mexico, Arizona, Utah, Nevada, California, Oregon, Washington, Alaska, and Hawaii.

Mr. LEAHY. Under the administration proposal, almost 11 percent of those now in the program in the Northeast are made ineligible, as compared to only 5 percent in the South. In addition, a full 50.2 percent, over half the recipients in the Northeast, lose benefits—whereas less than 20 percent of those in the South lose. Not only does the Northeast lose more but it also gains less. Only 16 percent of the recipients gain benefits under the administration proposal as compared to almost half of the recipients in the South. Clearly, a standard deduction discriminates both against regions of the country and against individuals within those regions.

But the answer is not to regionalize benefits, for that does not direct benefits only to those households with high shelter costs. The answer is to try to account for individual needs while aiming for improved program operation: To balance program efficiency with program equity.

Therefore, when the administration food stamp program proposal comes before the Senate Agriculture, Nutrition, and Forestry Committee, I plan to introduce an amendment to that proposal which would take into account higher housing, utility, and fuel costs in various areas of the country, in the Presiding Officer's (Mr. BURDICK) State and my own State.

My amendment would use the best of both systems—standard deduction and itemizing. The standard deduction would be retained, but lowered to $60. Second, increased benefits would be provided to those with truly excessive shelter costs, by allowing a household to deduct that amount of their shelter costs which exceeds 50 percent of their net income, up to $75. To give an idea of how this excess shelter provision will work, I ask unanimous consent to submit to charts which show the effects of the provision on households with different incomes and shelter costs.

There being no objection, the charts were ordered to be printed in the RECORD, as follows:

EFFECTS OF ADMINISTRATION AND LEAHY PROPOSALS ON HOUSEHOLDS WITH VARIOUS INCOMES AND SHELTER COSTS [1]

Proposal	Administration	Leahy	Administration	Leahy	Administration	Leahy
CHART 3						
Gross income	300	300	300	300	300	300
Standard deduction	80	60	80	60	80	60
Net income	220	240	220	240	220	240
Actual shelter costs	100	100	150	150	200	200
50 percent net income	(2)	120	(2)	120	(2)	120
Excess shelter costs	(2)	0	(2)	30	(2)	75
Eligibility income	200	240	220	210	220	165
Coupon allotment	166	166	166	166	166	166
30 percent eligibility income	66	72	66	63	66	50
Bonus stamps	100	94	100	103	100	116
CHART 4						
Gross income	400	400	400	400	400	400
Standard deduction	80	60	80	60	80	60
Net income	320	340	320	340	320	340
Actual shelter costs	150	150	200	200	250	250
50 percent net income	(2)	170	(2)	170	(2)	170
Excess shelter costs	(2)	0	(2)	30	(2)	75
Eligibility income	320	340	320	310	320	265
Coupon allotment	166	166	166	166	166	166
30 percent eligibility income	96	102	96	93	96	80
Bonus stamps	70	64	70	73	70	86
CHART 5						
Gross income	500	500	500	500	500	500
Standard deduction	80	60	80	60	80	60
Net income	420	440	420	440	420	440
Actual shelter costs	200	200	250	250	300	300
50 percent net income	(2)	220	(2)	220	(2)	220
Excess shelter costs	(2)	0	(2)	30	(2)	75
Eligibility income	420	440	420	410	420	365
Coupon allotment	166	166	166	166	166	166
30 percent eligibility income	126	132	126	123	126	110
Bonus stamps	40	34	40	43	40	56

[1] All examples are 4-person households with no income for employment.

[2] Not applicable.

Mr. LEAHY. My amendment, by limiting itself to those who pay over half their net income on shelter is truly an excess shelter deduction. Consider it for a moment: A poor family will be spend- at least 30 percent of their income on food, so surely it is not unreasonable to provide extra relief to those families who must spend almost the rest of their income to provide shelter for their families.

This amendment will not subsidize any luxury housing either. It places a $75 ceiling on excess shelter deduction, therefore, effectively limiting the level of shelter that will be allowed under the program.

I would also like to point out that this amendment would not benefit just one section of the country. In fact, it helps all areas. In the south, the west, the northeast, and the north-central regions, less households lose benefits than would under the administration proposal. And in the South, not only do less households lose benefits, but more also gain benefits.

Finally, one of my prime concerns when drafting this proposal was the cost. I am sensitive to the fact that the President will be concerned about any measure which would increase the cost over his administration's proposal. Therefore, I am pleased that my amendment would only be a reasonable increase over that proposal. According to USDA figures the increase would be approximately $100 million—a 2-percent increase.

I believe that if the administration's proposal is adopted with the amendments I have discussed here, we will have a balanced program, which is accessible, equitable, simplified, and cost-conscious—a true reform package.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

TIME LIMITATION AGREEMENT—AMENDMENT 200 TO H.R. 3477

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the last 20 minutes of the debate on amendment No. 200, as modified, by Mr. JAVITS and Mr. DANFORTH, be equally divided between Mr. LONG and the authors of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Chirdon, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees; and a message withdrawing the nomination of John Patrick White, of the District of Columbia, to be Assistant Secretary of Defense.

(The nominations received today are printed at the end of the Senate proceedings.)

REPORT OF THE DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT—MESSAGE FROM THE PRESIDENT—PM 72

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, which was referred to the Committee on Banking, Housing, and Urban Affairs:

To the Congress of the United States:

I am transmitting herewith the Twelfth Annual Report of the Department of Housing and Urban Development, describing its activities for the calendar year 1976.

This Report covers a period of time prior to the commencement of my term of office.

JIMMY CARTER.

THE WHITE HOUSE, *April 27, 1977.*

REPORT OF THE UNITED STATES SINAI SUPPORT MISSION—MESSAGE FROM THE PRESIDENT—PM 73

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, which was referred to the Committee on Foreign Relations:

To the Congress of the United States:

I am pleased to transmit herewith the Third Report of the United States Sinai Support Mission. This report describes the manner in which the Mission is continuing to carry out its peacekeeping responsibilities by operating an early warning system in the Sinai, as called for in the basic agreement between Egypt and Israel signed on September 4, 1975. This report is provided to the Congress in conformity with Section 4 of Public Law 94-110 of October 13, 1975.

The report emphasizes the successful completion on February 22, 1977, of one full year of operations. With the completion of initial construction activity, the Sinai Field Mission has had an opportunity to analyze in detail various elements of the Mission's activity. In particular, attention has been directed to improving operating procedures, to ugrading equipment and to reducing personnel through the introduction of advanced technology.

The parties to the agreement continue to affirm their satisfaction with the role of the United States in the Sinai and the fair way in which the Sinai Support Mission has discharged its responsibilities for the early warning system.

As our initiatives to help the parties to the Arab-Israeli dispute move toward a resumption of negotiations, it is important that the United States continue to fulfill its commitments. As long as the Sinai Support Mission is able to make a positive contribution to these efforts, I will urge that the Congress continue its support for this important mission.

JIMMY CARTER.

THE WHITE HOUSE, *April 27, 1977.*

MESSAGE FROM THE HOUSE

ENROLLED BILL AND JOINT RESOLUTION SIGNED

At 10:36 a.m., a message from the House of Representatives delivered by Mr. Berry, one of its clearks, announced that the Speaker has signed the following enrolled bill and joint resolution:

S. 385. An act to name a certain Federal building in Grand Rapids, Mich., the "Gerald R. Ford Building"; and

S.J. Res. 44. A joint resolution to authorize the printing and binding of an edition of "Senate Procedure" and providing the same shall be subject to copyright by the author.

The enrolled bill and joint resolution were subsequently signed by the President pro tempore.

COMMUNICATIONS FROM EXECUTIVE DEPARTMENTS, ETC.

The PRESIDING OFFICER laid before the Senate the following communications which were referred as indicated:

EC-1221. A leter from the Chairman of the United States Water Resources Council transmitting a draft of proposed legislation to provide the necessary authorization of appropriations for expenses in carrying out the Comprehensive Planning Program of the Council (with accompanying papers); to the Committee on Environment and Public Works.

EC-1222. A letter from the Acting Administrator of the General Services Administration transmitting, pursuant to law, a revised report of building project survey for the Government Printing Office, Washington, D.C. (with an accompanying report); to the Committee on Environment and Public Works.

EC-1223. A letter from the Secretary of Transportation transmitting, pursuant to law, the 1977 annual report on the Highway Safety Improvement Prorgams covering programs through June 30, 1976 (with an accompanying report); to the Committee on Environment and Public Works.

EC-1224. A letter from the Commissioner of the Immigration and Naturalization Service transmitting, pursuant to law, 1290 reports covering the period of January 16, through January 31, 1977, concerning visa petitions which the Service has approved according the beneficiaries of such petitions third and sixth preference cassification under the Immigration and Nationality Act (with accompanying reports); to the Committee on the Judiciary.

PETITIONS

The PRESIDING OFFICER laid before the Senate the following petitions which were referred as indicated:

POM-140. House Concurrent Resolution No. 3021 adopted by the Legislative Assembly of the State of North Dakota urging the President and the Congress of the United States to expeditiously enact a long-range and comprehensive energy conservation and development program; to the Committee on Energy and Natural Resources:

"HOUSE CONCURRENT RESOLUTION No. 3021

"A concurrent resolution urging the President and the Congress of the United States to expeditiously enact a long-range and comprehensive energy conservation and development program

"Whereas, the United States is an energy-consuming nation, which annually consumes more energy than it produces; and

"Whereas, there is a lack of readily available and renewable energy sources; and

"Whereas, the nation is faced with a growing energy shortage which will continue to become more acute; and

"Whereas, there are a number of alternative energy sources which may be available to meet the energy shortage, including solar, wind, geothermal, and magnetohydrodynamics;

"Now, therefore, be it resolved by the House of Representatives of the State of North Dakota, the Senate concurring therein:

"That the Forty-fifth Legislative Assembly urges the President and the Congress of the United States to expeditiously enact a long-range and comprehensive energy conservation and development program; and

"Be it further resolved, that copies of this resolution be forwarded by the Secretary of State to the President of the United States, the Secretary of the United States Senate, the Chief Clerk of the United States House of Representatives, and to each member of the North Dakota Congressional Delegation."

POM-141. Senate Resolution No. 5 adopted by the Senate of the State of Montana urging the United States Congress to stop treaty negotiations to transfer control, administration and ownership of our canal to the present Government of Panama; to the Committee on Foreign Relations:

"SENATE RESOLUTION NO. 5

"A resolution of the Senate of the State of Montana urging the U.S. Congress to stop treaty negotiations to transfer control, administration and ownership of our canal to the present Government of Panama.

"Whereas, the Panama Canal Convention in 1903 stated, "The Republic of Panama grants to the United States in perpetuity the use, occupation and control of a zone of land and land under water for the construction, maintenance, operation, sanitation and protection of said canal . . ."; and

"Whereas, the 1903 Treaty stated, "The Republic of Panama grants to the United States in perpetuity a monopoly for the construction, maintenance and operation of any system of communication by means of a canal or railroad across the territory between the Caribbean Sea and the Pacific Ocean."; and

"Whereas, 'Perpetuity' is defined as meaning, 'petpetual existence, duration, validity; something perpetual or perpetually held or maintained; endless time'; and

"Whereas, Article III of the 1903 Treaty says, 'The Republic of Panama grants to the United States all the rights, power, and authority within the zone mentioned . . . which the United States would possess and exercise if it were the sovereign of the territory within which said lands and waters are located to the entire exclusion of the exercise by the Republic of Panama of any such sovereign rights, power or authority'; and

"Whereas, the Treaty states, 'If the Republic of Panama shall hereafter enter as a constituent into any other government or into any union or confederation of states, so as to merge her sovereignty or independence in such government, union or confederation, the rights of the United States under this convention shall not be in any respect lessened or impaired,'; and

"Whereas, in 1903 Panama was offered ten million dollars 'in gold coin' plus 'an annual payment' of a quarter of a million dollars 'in like gold coin' for 50 square miles; and

"Whereas, the Panama Canal Convention was ratified on February 26, 1904; and

"Whereas, the Panama Canal Treaty was updated and reaffirmed by all parties in 1936 and in 1955, and no further negotiations are either desired or necessary; and

"Whereas, when acquired by the United States, the land that later became the Canal Zone was jungle covered, insect ridden, and disease infested. There was no canal on it. The United States of America cleared the jungle, eradicated the malaria problem, and built the Canal—at a huge cost in American lives, times, and money; and

"Whereas, the Panama Canal is undeniably the most important waterway in the western hemisphere.

"Now, therefore, be it resolved by the Senate of the State of Montana:

"That the United States of America should retain all of the right, title and interest of and to the Panama Canal.

"Be it further resolved, that a copy of this resolution be sent to the President of the United States, the United States Senate, and to the United States Secretary of State."

POM-142. A petition from Mr. Albert Carter Tipton, Elizabethton, Tennessee requesting an investigation concerning the disposition of information transmitted to the Department of Justice in 1940; to the Committee on the Judiciary.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. NELSON, from the Select Committee on Small Business:

Without amendment:

S. Res. 140. A resolution authorizing additional expenditures by the Select Committee on Small Business for inquiries and investigations. Referred to the Committee on Rules and Administration.

By Mr. CANNON, from the Committee on Rules and Administration:

With an amendment:

S. Res. 136. A resolution authorizing the furnishing of copies of certain documents or affidavits for in camera inspection by the court in the case of Common Cause et al., against Benjamin Ballar, et al. (Rept. No. 95-105).

By Mr. NUNN, from the Committee on Armed Services:

With an amendment:

H.R. 583. An act to amend chapter 5 of title 37, United States Code, to extend the special pay provisions for reenlistment and enlistment bonuses (title amended) (Rept. No. 95-106).

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. SPARKMAN, from the Committee on Foreign Relations:

Kingman Brewster, Jr., of Connecticut, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the United Kingdom of Great Britain and Northern Ireland.

POLITICAL CONTRIBUTIONS STATEMENT

Contributions are to be reported for the period beginning on the first day of the fourth calendar year preceding the calendar year of the nomination and ending on the date of the nomination.

Nominee: Kingman Brewster, Jr.

Post: Ambassador to United Kingdom.

Contributions; amount; date; and donee:

1. Self—none.
2. Spouse—none.
3. Children and spouses—none.
4. Parents—none.
5. Grandparents—none.
6. Brothers and spouses—none.
7. Sisters and spouses—none.

I have listed above the names of each member of my immediate family including their spouses. I have asked each of these persons to inform me of the pertinent contributions made by them. To the best of my knowledge, the information contained in this report is complete and accurate.

KINGMAN BREWSTER, JR.

Philip Henry Alston, Jr., of Georgia, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Australia.

POLITICAL CONTRIBUTIONS STATEMENT

Contributions are to be reported for the period beginning on the first day of the fourth calendar year preceding the calendar year of the nomination and ending on the date of the nomination.

Nominee: Philip Henry Alston, Jr.

Post: Proposed Nominee as United States Ambassador to Australia.

Nominated: March 1977.

Contributions by

1. Self, Philip H. Alston, Jr.:

Amount; date; and donee:

$1,200, January 25, 1973, Democratic National Committee.

$100, February 9, 1973, Democratic Party of Georgia.

(The foregoing nominations were reported from the Committee on Foreign Relations with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

Mr. NUNN. Mr. President, as in executive session, from the Committee on Armed Services, I report favorably the nominations of Vice Adm. Jon L. Boyes, U.S. Navy, for appointment to the grade of vice admiral on the retired list; and Lt. Gen. Warren D. Johnson, U.S. Air Force, to be placed on the retired list in the grade of lieutenant general; and Henry M. Miley, Jr., U.S. Army, for reappointment to the active list for a period of 1 day, to be major general and general, and to be placed on the retired list in the grade of general. Also, Lt. Gen. Ray B. Sitton, U.S. Air Force, to be placed on the retired list in the grade of lieutenant general; and Lt. Generals James M. Meck, Joseph Wilson, Maurice F. Casey, U.S. Air Force, to be placed on the retired list in the grade of lieutenant general; and Lt. Gen. Lew Allen, Jr., U.S. Air Force, to be general. Also, Lt. Gen. James R. Allen, U.S. Air Force, to be general; and Gen. Louis T. Seith, U.S. Air Force, to be placed on the retired list in the grade of general; and Maj. Gen. Dewitt C. Smith, Jr., U.S. Army, to be lieutenant general. Also, Lt. Gen. Harold G. Moore, U.S. Army, to be placed on the retired list in the grade of lieutenant general; Maj. Gen. Abbott C. Greenleaf, U.S. Air Force, to be lieutenant general; and Maj. Gen. Russell E. Dougherty, to be general. I ask that these nominations be placed on the Executive Calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NUNN. In addition, Mr. President, there are 267 in the Navy for permanent and temporary appointment to commander and below (list beginning with Richard R. Van't Hof); and 47 in the Air Force for appointment to the grade of colonel and below (list beginning with Gerald Strohmeyer). Also, there are 729 cadets of the class of 1977 of the U.S.

*This was for two air fares to New York for the Democratic Convention on a chartered plane. We elected not to go on this plane and this sum of $256.00 was refunded shortly after July 10, 1976 by a check from the Committee for Jimmy Carter.

*Inquiry pending—Supplemental information will be supplied after their reply.

* Payment of Campaign Debt.

Military Academy for appointment in the Army in the grade of second lieutenant and one for reappointment on the active list of the Army in the grade of colonel (list beginning with Bruce C. Abbott); and 65 for temporary appointment in the Marine Corps in the grade of first lieutenant (list beginning with Clarence T. Anthony, Jr.). Since these names have already appeared in the CONGRESSIONAL RECORD and to save the expense of printing again, I ask unanimous consent that they be ordered to lie on the Secretary's Desk for the information of any Senator.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The nominations ordered to lie on the Secretary's desk were printed in the RECORD of March 29 and 30, 1977, at the end of the Senate proceedings.)

ENROLLED BILL AND JOINT RESOLUTION PRESENTED

The Secretary of the Senate reported that today, April 27, 1977, he presented to the President of the United States the following enrolled bill and joint resolution:

S. 385. An act to name a certain Federal building in Grand Rapids, Mich., the "Gerald R. Ford Building"; and

S.J. Res. 44. A joint resolution to authorize the printing and binding of an edition of Senate Procedure and providing the same shall be subject to copyright by the author.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated;

By Mr. HUMPHREY:

S. 1396. A bill entitled the "National Domestic Development Bank Act"; to the Committee on Banking, Housing and Urban Affairs.

By Mr. PROXMIRE (for himself and Mr. CRANSTON):

S. 1397. A bill to amend the Federal National Mortgage Association Charter Act to increase the size of the board of directors thereof, and for other purposes; to the Committee on Banking, Housing and Urban Affairs.

By Mr. EASTLAND:

S. 1398. A bill for the relief of Jin Suk Park.

S. 1399. A bill for the relief of Kwan Do Sun.

S. 1400. A bill for the relief of Margret Chun; to the Committee on the Judiciary.

By Mr. DOLE:

S. 1401. A bill for the relief of Elvi Engelsmann Jensen; to the Committee on the Judiciary.

By Mr. DOLE:

S. 1402. A bill to establish a National Agricultural Research, Extension, and Teaching Policy Advisory Board, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. DOMENICI (for himself and Mr. SCHMITT):

S. 1403. A bill to provide for conveyance of certain lands near Dixon, N. Mex., to the University of New Mexico; to the Committee on Energy and Natural Resources.

By Mr. STONE (for himself and Mr. CHILES):

S. 1404. A bill to amend the Federal Aviation Act of 1958 to provide improved air service for members of the traveling public who use Florida intrastate carriers, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. McINTYRE (for himself, Mr. HATFIELD, Mr. NELSON, Mr. WILLIAMS, and Mr. LUGAR):

S. 1405. A bill to amend the Tariff Act of 1930 and the Tariff Schedules of the United States to reduce the burden of paperwork involved in the customs entry process for travelers and goods entering the United States; to the Committee on Finance.

By Mr. DECONCINI:

S. 1406. A bill to amend the Internal Revenue Code of 1954 to limit the foreign tax credit to amounts paid to national governments, permitting a deduction for foreign taxes paid to subordinate levels of government; to the Committee on Finance.

By Mr. MATSUNAGA:

S. 1407. A bill for the relief of Raymond W. Milling; to the Committee on Governmental Affairs.

By Mr. EAGLETON:

S. 1408. A bill to amend the Flood Disaster Protection Act of 1973 and the National Flood Insurance Act of 1968 to permit the extension of credit secured by property in flood prone areas, to require cost benefit analyses relating to participation in the flood insurance program, to permit individual participation in the flood insurance program, and for other purposes; to the Committee on Banking, Housing and Urban Affairs.

By Mr. MAGNUSON (for himself and Mr. PEARSON) (by request):

S. 1409. A bill to extend the Marine Protection, Research, and Sanctuaries Act, as amended, for two years; to the Committee on Commerce, Science, and Transportation.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. HUMPHREY:

S. 1396. A bill entitled the "National Domestic Development Bank Act"; to the Committee on Banking, Housing and Urban Affairs.

NATIONAL DOMESTIC DEVELOPMENT BANK

Mr. HUMPHREY. Mr. President, I introduce today legislation to create a National Domestic Development Bank. The need for a new financial agency to support State and local public development is as pressing in 1977 as it was in 1967, when the Congress first systematically studied public capital expenditures.

In 1977 it is as important to the American public that they obtain adequate sewage treatment as it was in 1971, when I first introduced this legislation. In 1977 it is more important to the American public that all possible measures be taken to conserve energy in public buildings and usages than it was in 1975, the year in which I introduced this legislation in the previous session of Congress. In 1977 it is increasingly important to rehabilitate and rebuild our cities; to encourage small town and rural development; to modernize our public services; and to expand our recreational and health facilities.

These needs are not being met. These needs cannot be met by wishing. They cannot be met by thinking or planning alone. They must be met by construction and expenditures by governments which are given the responsibility under our federal system of government to provide goods and services for the benefits of the whole populace.

The problems of finding money to do this construction and to finance public development are the same today in 1977 as they were in 1967. Intervening events have just made the old problems more intractable. The 10 years which have passed since the Subcommittee on Economic Progress of the Joint Economic Committee reported on State and local public facility needs and financing, saw several municipalities approach the event which had not occurred during the brink of default and bankruptcy—and previous 40 years despite other trying economic times. The economic depression, which we have not left yet, was severe indeed for government. The combination of inflated expenditures and revenue shortfalls required substantial tax increases, employee layoffs, and service cutbacks.

The interest rates which municipalities paid for borrowed capital funds soared to new heights during the Nixon-Ford administration. As recently as last December municipalities with good credit ratings were paying 5.07 to 6.73 for long-term credit. This compares to a taxable yield of 9 to 12 percent. At the same time, over the same period the yields on long term Federal Government borrowing, which is taxable, was at 6.39. And since these figures are averages, there are thousands of municipalities and States which paid and are paying even higher rates. For example, the State of New York last fall paid 8.7 percent even despite its AA credit rating—the equivalent of a taxable yield of 13 to 15 percent. The city of Cleveland estimated that it was forced to pay an additional $450,000 in interest charges as a result of the near default by New York City. Investors who were willing to buy any sort of municipal bonds demanded and received a premium.

In 1975, State and local governments floated over 8,000 bond issues. The average yield on these issues was 6.89 percent—for the average so-called high grade municipal security. Ten years ago the yield, was 3.98 percent. The inflated interest rates that our local and State governments pay today add millions of dollars to the cost of the sewage treatment plant, the school, the community center, the clinic. On an average 10-year bond of $7.2 million, the difference between paying today's interest and the interest of 10 years ago is $2.1 million. It is $2.1 million that must be paid for interest rather than bricks and mortar. It is $2.1 million that may push the local government to its debt ceiling, thereby stopping development and construction of other essential community facilities. The cost of interest inflation is large and serious and one which the National Domestic Development Bank will help to reduce.

Ten years ago the Joint Economic Committee estimated the value of existing public facilities at $450 billion. It then suggested that to meet the needs of the coming decade an equal amount of capital would have to be raised and expended. We have not met that goal. Actually expenditures for public facilities construction did not keep pace with the requirements. We have now another decade in which crowded highways are more crowded; the inadequate streets,

water and sewage systems are more inadequate; and long waiting lines for using public facilities have become even longer. Out of necessity we have continued the use of overage facilities more intensively than originally contemplated.

Ten years ago the Joint Economic Committee could not see and could not predict the public facility requirements which have arisen from the energy crisis and from the awakening concern for environmental values.

The winter of 1977, under the pressure of the unusually cold weather, this country imported 50 percent of the oil burned. The need for serious energy conservation was made clear and graphic. The cold weather has presented a convincing demonstration of the need to reduce dependence on expensive foreign oil.

We are beginning a citizens campaign under the aegis of the Alliance to Save Energy to convince our citizens and our governments that it makes sense to invest to save energy. State and local governments will play an important role in overall energy saving—especially in constructing and rehabilitating public buildings, schools, municipal buildings, hospitals, courthouses, and jails, so that they are better insulated and more energy efficient; in capturing waste heat from municipal utilities and waste treatment facilities and other industrial plants; and in providing mass transit systems to reduce the need for personal automobiles on most trips.

Modern, efficient and up-to-date public facilities also are essential for our Nation's economic well-being. Private industry and commerce cannot flourish and provide jobs if there are no schools for the children of their employees; if there are poor roads for transport of supplies and products; if there are no treatment plants that can dispose of industrial wastes. Modernizing and improving the efficiency of public facilities and services is a valuable asset for private industry and commerce.

These trends, backlogs, and new developments all point to increasing need for public capital investment in the years ahead. These trends, backlogs, and new developments raise serious doubts about the adequacy of the system which we have relied upon exclusively for providing municipal capital.

We simply cannot allow a shortage of funds to prevent cities from financing needed projects in housing, environment, school and health care facilities and transportation. Neither can we force local governments to raise taxes to pay exorbitant interest costs.

If we are to meet our commitments as governments of the people, we must have a new source of capital funds—at rates which governments of the people can afford to pay. The new financial agency created by the bill which I introduce today will help assure that the essential public needs of our society get appropriate financial support. The Bank will provide new capital resources for public development, public redevelopment to save energy, expansion of basic service industries and job creation in the economic backwaters of this Nation.

The National Domestic Development Bank will offer long-term loans at low rates of interest. The Bank's regional offices also will provide planning and technical assistance. Representatives of local governments and economic groups will participate in the operation of these regional offices.

The Bank will also make loans available to nonprofit or quasi-governmental organizations which receive Federal funds and pursue public purposes in the construction of housing, medical, educational, and other public facilities. In addition, the Bank will provide loans to businesses in geographical areas and economic sectors which economic indicators show to be disproportionately affected by high unemployment, high welfare participation, and high capital costs.

The National Domestic Development Bank will be a national institution sponsored by the Federal Government. But it will emphasize decisionmaking at the local level where the problems are known first hand. Communities and regions will determine their own development priorities under their planning.

The Presidentially appointed Board of Directors will be composed of Federal, State, county, and local officials as well as representatives of the general public.

The Bank's lending activities will be carried out directly through regional operating divisions. Each region will have an advisory committee broadly representative of local governments, economic groups, and the public.

The Bank I propose will have a primary capitalization of $3.5 billion. This initial capital will be raised mainly through public stock subscriptions and dividend income will be partially exempt from the Federal income tax in order to provide an incentive for investors. Lending power of the Bank will be multiplied by the issuance of bonds on the national investment market.

National Domestic Development Bank loans will be made for the following purposes:

First, cities, counties, and States will be able to borrow money for basic community facilities at rates comparable to municipal bonds.

Second, 40-year loans also will be available to nonprofit or quasi-governmental organizations receiving Federal funds and pursuing public purposes for the construction of housing, medical, and other public facilities.

Third, loans over a 20-year period will be made to business organizations for economic development purposes in specially designated areas or sectors of the economy.

While financial assistance is crucial, it is not enough. To achieve sound community and economic development, the Bank will offer technical assistance in the planning of projects, the coordination of other funding sources, and the integration of current Federal programs with the overall development plans of the community.

The Bank must also develop the technical and financing expertise that is essential in anticipating the environmental impact of a rapidly changing and expanding technology in the United States. In addition to community and economic development, there is a basic demand in this Nation for substantially increased energy resources and for greatly improved transportation facilities and systems. An escalating pollution hazard will be the natural consequence of intensive efforts to meet these basic needs, unless effective assistance is provided to communities and our various industrial sectors to meet the environmental protection standards that will be increasingly applied and enforced by government.

It is important, at this point, to emphasize the basic philosophy and objectives of the financing of public development under this act.

The National Domestic Development Bank will provide an orderly, continuing source of capital funds for our financially beleaguered States and communities.

It will allow us to tackle local financial problems in a rational and comprehensive way by eliminating the stop-start history of public construction.

It will multiply the purchasing power of Federal, State, and local revenues by amassing long-term credit commitments for public construction.

It will facilitate economic development in areas of this Nation confronted with high unemployment.

It is a development program for the communities of America.

The National Domestic Development Bank can launch a comprehensive attack upon urban and rural blight. It can trigger new private investment and provide jobs in a slumping economy.

The list of needed public development has no end.

We have neglected public development too long. And, we have succeeded in becoming a nation that is privately wealthy but publicly poor.

The time to redress that imbalance is now.

It is time that we changed our antiquated methods of financing public construction to meet the mounting needs of our growing population.

My work with mayors, county commissioners, and other local officials, as well as my study as chairman of the Joint Economic Committee, of national urban and rural development needs, gives rise to the bill which I am introducing today.

Based on this first hand experience, it is my firm conviction that the cost of inaction, the cost of permitting the public needs of America to pile-up unmet, is too great a price to pay.

The cost to the Federal Government in establishing the National Domestic Development Bank will be a small fraction of the development value the Bank can generate. The Bank can facilitate urban revitalization. The Bank can effectuate the goals of the National Rural Development Act which assists small towns and rural counties. The Bank can assure that public facilities that serve all of the population are given proper priority.

I began working on legislation for a National Domestic Development Bank in 1964. Bills embodying the concept of a low cost source of municipal capital have been introduced by myself and others in every congressional session since 1968. I note with some satisfaction recent news stories that the concept is getting serious consideration from the administration

and the capital finance community. The time for adoption of this important improvement in public capital finance has come.

Mr. President, I ask unanimous consent that the text of the National Domestic Development Bank Act, a section-by-section analysis, a question and answer description of the act, and a recent report from the New York Times concerning Treasury Secretary Blumenthal's proposal for a reconstruction bank, be printed at this point in the RECORD.

There being no objection, the bill and material were ordered to be printed in the RECORD, as follows:

S. 1396

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "National Domestic Development Bank Act".

FINDINGS AND PURPOSE

SEC. 2. (a) The Congress hereby finds and declares that—

(1) population increases and rising demands for a safe and prosperous life have created an unprecedented demand for (A) basic community facilities, such as streets, schools, hospitals, housing, water, sewer, waste disposal, and mass transit facilities and parks and playgrounds, (B) economic development in urban ghettos, disaster areas, and labor surplus areas, as well as in new towns and new cities; and (C) economic health of basic sectors of the economy which provide essential services and goods to the public;

(2) the existing institutional structure for providing funds—the municipal bond-Federal grant arrangement—cannot provide at reasonable cost the amounts necessary to satisfy these growing demands. The financial needs of our growing communities require the full mobilization of skills and resources in all levels of government, Federal, State, and local, as well as in the private sector; and

(3) the most effective use of funds can only be made when information and technical expertise regarding engineering requirements, financial and economic factors, Federal programs and funding levels, and comprehensive area problems and planning are readily available from a single source.

(b) The purpose of this Act is to establish a national domestic development bank system which will provide an alternative source of funds for community facilities and economic development, which will involve national investment markets and all groups of investors, and which will furnish information to coordinate Federal, State, and local programs with local problems and governments.

DEFINITIONS

SEC. 3. As used in this Act—

(1) "bank" means the National Domestic Development bank established by section 4;

(2) "State" means the States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, and the Trust Territory of the Pacific Islands, or any agency or instrumentality thereof;

(3) "local government" means any county, municipality, or other political subdivision of a State, or any agency or instrumentality thereof, or any school or other special district created by or pursuant to State law, and

(4) "obligation" means any bond, note, debenture, or other instrument evidencing debt.

ESTABLISHMENT OF BANK

SEC. 4. (a) There is hereby created a body corporate to be known as the National Domestic Development Bank, which shall have succession until dissolved by Act of Congress. The bank, which shall not be an agency of the United States Government, shall maintain such offices as may be necessary or appropriate in the conduct of its business. For the purposes of jurisdiction and venue, the bank shall be deemed a citizen and resident of the District of Columbia.

(b) No individual, association, partnership, or corporation, except the bank, shall hereafter use the words "National Domestic Development Bank" as the name or a part hereof under which he does business.

GENERAL POWERS

SEC. 5. The bank shall have, in addition to the special authority conferred by section 8 of this Act, the power—

(1) to sue and be sued, and complain and defend, in its corporate name and through its own counsel;

(2) to adopt, alter, and use a corporate seal, which shall be judicially noticed;

(3) to adopt, amend, and repeal, by the board, such bylaws, rules, and regulations as may be necessary for the conduct of its business;

(4) to conduct its business, carry on its operations, have offices, and exercise the powers granted by this Act in any State without regard to any qualification or similar statute in any State;

(5) to lease, purchase, or otherwise acquire, and own, hold, improve, use or otherwise deal in and with, any property, real, personal, or mixed, or any interest therein, wherever situated;

(6) to accept gifts or donations or services, or of property, real, personal, or mixed, tangible or intangible, in aid of any of the purposes of the bank;

(7) to sell, convey, mortgage, pledge, lease, exchange, and otherwise dispose of its property and assets;

(8) to appoint such officers, attorneys, employees, and agents as may be required, to determine their qualifications, to define their duties, to fix their salaries, and to require bonds for them and fix the penalty thereof; and

(9) to enter into contracts, execute instruments, incur liabilities, and do all things which are necessary or incidental to the proper management of its affairs and the proper conduct of its business.

BOARD OF DIRECTORS: MANAGEMENT

SEC. 6. (a) The bank shall have a board of directors which shall initially consist of fifteen members to be appointed by the President of the United States as follows:

(1) one member to be appointed from the Federal Reserve System.

(2) four members to be appointed from among the heads of departments and agencies in the executive branch of the Government;

(3) four members to be appointed from among those who represent the public generally, one of whom shall be appointed, by and with the advice and consent of the Senate to serve as president of the bank and chairman of the board of directors;

(4) two members who are Governors of States from among nominees of the National Governors' Conference;

(5) two members who are elected officials of county governments from among nominees of the National Association of County Officials; and

(6) two members who are elected officials of city governments from among nominees of the National League of Cities.

(b)(1) Directors appointed under clauses (1), (2), and (3) of subsection (a) of this section shall serve at the pleasure of the President or until their successors have been appointed.

(2) One director initially appointed pursuant to each of clauses (4), (5), and (6) shall be designated by the President of the United States to serve until the first annual meeting of the stockholders, and one director appointed pursuant to each such clause shall be designated by the President of the United States to serve until the second annual meeting of the stockholders. Vacancies occurring pursuant to this paragraph at the time of each such annual meeting shall be filled by election by the stockholders at such meeting from among nominees as provided in subsection (a) of this section. Directors elected pursuant to this subsection shall serve for terms of two years. The board may appoint a member to serve for any unexpired term of any such director.

(c) The board shall hold regular bimonthly meetings and shall hold other meetings at the call of the chairman. A majority of the board shall constitute a majority for the transaction of business. Any vacancy in the board shall not affect its powers or duties.

(d) Any director who is an officer or employee of the United States shall serve without additional compensation for his services as a director.

(e) The management of the bank shall be vested in the President of the bank, subject to such policies as the board of directors shall prescribe from time to time.

INITIAL EXPENSES

SEC. 7. In order to facilitate the formation of the bank, the Secretary of the Treasury is authorized to pay initial organizing and operating expenses. There is hereby authorized to be appropriated a sum not to exceed $500,000 for this purpose.

SPECIAL AUTHORITY

SEC. 8 (a) Subject to the provisions of this Act, the bank is authorized—

(1) to make commitments to purchase, and to purchase, service, and sell, on terms and conditions determined by the bank, any obligation (or participation therein) of a State or local government issued to finance in total or in part the construction, or re-construction to energy efficient standards, of basic community facilities or public works of any type;

(2) to make or guarantee loans to State and local governments to finance the construction or re-construction to energy efficient standards of basic community facilities and public works of all types (including loans to non-profit or quasigovernmental organizations and entities to finance the construction of housing, medical facilities, and other facilities which are supported by Federal or State programs and are determined by the bank to have the attributes of public facilities; and

(3) to make loans for the purpose of creating jobs and facilitating economic development in geographical areas whose population consists of a high proportion of unemployed or low income individuals and families; that suffers a natural disaster; or that is in need of direct investment to further the national public interest; and

(4) to make loans for the purpose of financing continued operation of businesses and construction of energy efficient systems in sectors of economic activity which are found by the bank to need low cost capital in order to further the national public interest.

(b) The bank shall develop criteria to assure that projects assisted by it are not inconsistent with comprehensive planning for the development of the communities in which they will be located, or disruptive of Federal programs which authorize assistance for the development of like or similar categories of projects, or inconsistent with Federal policies directed at the protection of the environment.

(c) A loan made or guaranteed under this section may not exceed the total capital cost of the project to be financed, and shall be made for a term determined by the bank; except that the term of a loan made under paragraph (2) of subsection (a) shall not exceed the life of the project or forty years,

whichever is less, and the term of a loan made under paragraph (3) of subsection (a) to a private person for a project consisting primarily of profitmaking facilities shall not exceed twenty years.

(d) All obligations purchased and loans made pursuant to this section shall bear interest at a rate determined by the bank which shall be low enough to be competitive with municipal bonds, but in no event greater than 1 point over the average rate on Treasury borrowings of similar maturity.

(e) In any case in which the bank undertakes to provide assistance to a State or local government under subsection (a) for the construction of a project for which a department or agency of the Federal Government (under another law of the United States) will also provide funds—

(1) the assistance provided by the bank under subsection (a) may be in the full amount needed by the State or local government to finance such construction (including the amount of the funds which will be provided by such department or agency), with the funds to be provided by such department or agency with respect to such construction thereupon becoming payable (notwithstanding any contrary provision in the law under which they are payable) to the bank in lieu of being paid directly to such government; and

(2) the bank may accept in return (A) an obligation or obligations of such State or local government covering only the difference between such full amount and the amount of the funds which are payable with respect to such construction by such department or agency, plus (B) a commitment from such department or agency to pay the funds which are to be provided by it and are payable to the bank as described in paragraph (1), in order to insure that such State or local government will not have to include within its debt limit that portion of the indebtedness incurred for the financing of such construction which is attributable to funds provided by the Federal Government.

(f) The bank is authorized to establish a financial aid and technical advisory staff for any metropolitan area upon a determination by the board that the amount of the bank's activity in such area is sufficiently large to support a full financial and technical advisory staff. The staff shall process applications and requests for assistance from that area and shall assist applicants in obtaining such assistance.

(g) Except as otherwise specifically provided in this Act, the bank may impose charges or fees for its services with the objective that all costs and expenses of its operations should be within its income derived from such operations.

REGIONAL OPERATING DIVISIONS

SEC. 9. (a) The bank shall establish regional operating divisions. Each division shall be charged with responsibility for assessing borrower eligibility and making loans within its region or geographical area. To the maximum extent feasible, the boundaries of the regions or geographical areas respectively represented by the several regional operating divisions shall be the same as the boundaries of the areas respectively served by the regional offices of the various Federal departments and agencies.

(b) Each regional operating division shall transact all of the bank's business within its region with the assistance of the metropolitan area advisory staffs.

(c) Each regional operating division shall be supervised by a three member panel appointed by the board. In addition, an advisory committee of not less than eighteen nor more than twenty-five persons representing all governments and all socioeconomic levels within the division's region shall be appointed by the board to develop policies and guidelines for the division's activities.

TECHNICAL ASSISTANCE

SEC. 10. (a) The bank shall have, in addition to a staff adequately equipped in the field of development banking, personnel qualified to give advice in the following fields (and any other categories of advice appropriately related to the bank's activities):

(1) The Federal Government, particularly the organization and operation relating to State and local governments.

(2) All phases of all Federal grant-in-aid programs.

(3) Methods of administering the development and operation of community facilities.

(4) Technical data and requirements in fields appropriately related to the bank's activities, including the following:

(A) roads, hospitals, schools, and airports;

(B) urban mass transit systems and bridges;

(C) housing, municipal buildings, and parks;

(D) courthouses;

(E) water and sewage facilities and air pollution controls; and

(F) commercial developments.

(b) The bank shall give any necessary technical assistance under this section to applicants for assistance under section 8. No fees for preliminary advice shall be charged; however, after an application has been accepted for processing, the bank may charge reasonable fees for continued assistance under this subsection.

(c) The bank is also authorized to undertake research and information gathering, and to facilitate the exchange of advanced concepts and techniques relating to municipal growth and development among State and local governments.

STOCK

SEC. 11. (a) The bank shall have one class of common stock, which shall have voting rights and have a par value of $100 per share. Stock shall be sold to investors throughout the country.

(b) All moneys received by the bank in return for its common stock shall be accumulated in a stated capital account. All net earnings from the operations of the bank shall annually be transferred to its general surplus account. Such dividends as may be declared shall be paid by the bank to the holders of its common stock and shall be charged against the general surplus account, but in any one fiscal year dividends shall not exceed 6 per centum of the par value of the common stock issued and outstanding and shall be payable out of the net earnings of the bank for that year.

CAPITALIZATION OF THE BANK

SEC. 12. The bank's stated capital shall be limited to $3,500,000,000, which shall be raised, insofar as it is feasible, by the sale of the bank's common stock, and the remainder shall be provided as follows:

(1) The Secretary of the Treasury is authorized to purchase obligations of the bank in the amount of $300,000,000 a year for a period of ten years. If the Secretary finds it is necessary for the successful operation of the bank to waive the payment of interest and principal for any given year such interest shall then be added to the principal of the obligation. The bank is authorized to include appropriate provisions in the instruments evidencing the obligations provided for in this paragraph. Each purchase of obligations by the Secretary under this paragraph shall be upon such terms and conditions as to yield a return at a rate not less than a rate determined by the Secretary, taking into consideration the current average yield on outstanding marketable obligations of the United States of comparable maturities. The Secretary may sell, upon such terms and conditions and at such price or prices as he shall determine, any of the obligations acquired by him under this paragraph.

(2) The Secretary of the Treasury is additionally authorized to purchase debentures of the bank in the amount of $300,000,000 on emergency call of the bank.

(3) Each public borrower from the bank at the time of receiving loans shall be required to purchase stock until it holds an amount of stock equivalent of $.50 per capita for each person within its jurisdiction or for each person expected to be served by the facility or facilities involved. The borrower shall purchase stock equal to one-twentieth of the amount of his loans until he reaches the $.50 per capita maximum requirement. For the purposes of paragraphs (1) and (2) of this section, the Secretary of the Treasury is authorized to use as a public debt transaction the proceeds of the sale of any securities hereafter issued under the Second Liberty Bond Act, as now or hereafter in force, and the purposes for which securities may be issued under the Second Liberty Bond Act, as now or hereafter in force, are extended to include such purchases. All redemptions, purchases, and sales of obligations or debentures under such paragraphs shall be treated as public debt transactions of the United States.

OBLIGATIONS OF THE BANK

SEC. 13. (a) The bank is authorized to issue and have outstanding obligations (including but not limited to the obligations and debentures described in section 12) having such maturities and bearing such rates of interest as may be determined by the bank. Such obligations may be redeemable at the option of the bank before maturity in such manner as may be stipulated therein. The amount of the bank's indebtedness outstanding at any one time should be limited to fifty times the bank's paid-in stated capital.

(b) The Government National Mortgage Association (hereafter referred to as the "Association") is authorized, upon such terms and conditions as it may deem appropriate, to guarantee the timely payment of principal of and interest on such obligations (other than obligations and debentures described in section 12) as shall be issued by the bank. The Association shall collect from the bank a reasonable fee for any guaranty under this subsection and shall make such charges as it may determine to be reasonable for the analysis of any obligation proposed to be issued by the bank. In the event the bank is unable to make any payment of principal of or interest on any obligations guaranteed under this subsection, the Association shall make such payment as and when due in cash, and thereupon shall be subrogated fully to the rights satisfied by such payment. The full faith and credit of the United States is pledged to the payment of all amounts which may be required to be paid under any guaranty under this subsection.

FEDERAL PAYMENTS TO THE BANK

SEC. 14. (a) With respect to such amounts of loans of the bank as may be specified in appropriation Acts, the Secretary of the Treasury is authorized to make, and to contract to make, annual payments to the bank in such amounts as are necessary to equal the amount by which the dollar amount of interest paid by the bank on account of its outstanding obligations exceeds the dollar amount of interest received by the bank on account of obligations purchased or loans made by it pursuant to section 8.

(b) There are authorized to be appropriated to the Secretary of the Treasury such sums as may be necessary to carry out his functions under this Act, including such sums as may be necesary to make the annual payments required by contracts entered into

by the Secretary of the Treasury pursuant to subsection (a) of this section.

FEDERAL INSURANCE OF OBLIGATIONS TO THE BANK

SEC. 15. (a) The Secretary of Housing and Urban Development (hereinafter in this section referred to as the "Secretary"), upon application by the bank, is authorized to insure any loan made by the bank under section 8(a) (including, for purposes of this section, any obligation purchased as provided in paragraph (1) thereof), and to issue a commitment for the insurance of any such loan prior to the date of its execution or disbursement thereon upon a determination that all of the applicable criteria established by or under this Act will be met with respect to such loan.

(b) The insurance of any loan under subsection (a) and any payments pursuant thereto shall be made on such terms and conditions, and in such manner and form, as the Secretary shall by regulations prescribe, and shall provide for the payment in full to the bank of the outstanding principal balance of the loan together with any unpaid interest, upon default by the borrower, in accordance with procedures set forth in such regulations.

(c) The Secretary is authorized to charge and collect premiums for insurance under this section. Such premiums shall be fixed at the lowest possible levels which are determined by the Secretary to be reasonable and sufficient to keep the insurance program under this section in a sound and secure condition and maintain the fund established by subsection (d) at a level adequate to meet all anticipated losses, but in any event shall be lower for loans made under paragraphs (1) and (2) of section 8(a) than for loans made under paragraph (3) for such section.

(d)(1) There is established a revolving fund to be used by the Secretary in carrying out his function under this section. All premiums charged as provided in subsection (c), and all other receipts under the insurance program, shall be deposited in the fund. All payments with respect to insurance under this section shall be made from the fund. Moneys in the fund not needed for the payment of current operating expenses or the payment of insurance under the program may be invested in bonds or other obligations of, or bonds or other obligations guaranteed as to principal and interest by, the United States.

(2) There is authorized to be appropriated as initial capital for the revolving fund established by paragraph (1) the sum of $10,000,000.

(e) In the performance of, and with respect to, the functions, powers, and duties vested in him by this Act, the Secretary shall (in addition to any authority otherwise vested in him) have the functions, powers, and duties set forth in section 402 (except subsection (c)(2)) of the Housing Act of 1950.

AUDIT OF FINANCIAL TRANSACTIONS

SEC. 16. (a) The financial transactions of the bank shall be audited by the General Accounting Office in accordance with the principles and procedures applicable to commercial corporate transactions and under such rules and regulations as may be prescribed by the Comptroller General of the United States. The audit shall be conducted at the place or places where the accounts are normally kept. The representatives of the General Accounting Office shall have access to all books, accounts, financial records, reports, files, and other papers, things, or property belonging to or in use by the bank and necessary to facilitate the audit, and they shall be afforded full facilities for verifying transactions with the balances or securities held by depositaries, fiscal agents, and custodians.

(b) The expenses of any audit performed under this section shall be borne out of appropriations to the General Accounting Office, and appropriations in such sums as may be necessary for this purpose are authorized. The bank shall reimburse the General Accounting Office for the full cost of any such audit, and the General Accounting Office shall deposit sums received as reimbursed into the Treasury as miscellaneous receipts.

AUDIT REPORT TO CONGRESS

SEC. 17. A report of each audit of the bank for any fiscal year shall be made by the Comptroller General to the President and to the Congress not later than six months following the close of such fiscal year. The report shall set forth the scope of any such audit and shall include a statement (showing intercorpoarte relations) of assets and liabilities; a statement of capital and surplus or deficit; a statement of surplus or deficit analysis; a statement of income and expense; a statement of sources and application of funds; and such comments and information as may be deemed necessary to keep the Congress informed of the operations and financial condition of the bank, together with such recommendations with respect thereto as the Comptroller General may deem advisable, including a report of any impairment of capital or lack of sufficient capital noted in the audit. A copy of each report shall be furnished to the Secretary of Housing and Urban Development, the Secretary of the Treasury, and the bank.

TAX EXEMPTION

SEC. 18. (a) The bank, its property, its franchise, capital, reserves, surplus, security holdings, and other funds, and its income shall be exempt from all taxation now or hereafter imposed by the United States or by any State or local taxing authority: except that (1) any real property and tangible personal property of the bank shall be subject to Federal, State, and local taxation to the same extent according to its value as other such property is taxed, and (2) any and all obligations issued by the bank shall be subjected both as to principal and interest to Federal, State, and local taxation to the same extent as the obligations of private corporations are taxed.

(b)(1) Subsection (a) of section 116 of the Internal Reveue Code of 1954 (relating to partial exclusion from gross income of dividends received by individuals) is amended to read as follows:

"(a) EXCLUSION FROM GROSS INCOME.—

"(1) DOMESTIC CORPORATIONS.—Gross income does not include amounts received by an individual as dividends from domestic corporations (other than the National Domestic Development Bank), to the extent that the dividends do not exceed $100.

"(2) NATIONAL DOMESTIC DEVELOPMENT BANK.—Gross income does not include 50 percent of the amounts received by an individual during any taxable year as dividends from the National Domestic Development Bank."

(2) Such section 116 is further amended by striking out "Subsection (a)" in subsection (b) and inserting in lieu thereof "Subsection (a)(1)".

NATURE OF STOCK AND OBLIGATIONS

SEC. 19. (a) All obligations issued by the bank shall be lawful investments, and may be accepted as security, for all fiduciary, trust, and public funds the investment or deposit of which shall be under authority or control of the United States or of any officer or officers thereof. All stock and obligations issued by the bank pursuant to this Act shall be deemed to be exempt securities within the meaning of laws administered by the Securities and Exchange Commission, to the same extent as securities which are direct obligations of or obligations guaranteed as to principal or interest by the United States.

(b) The Federal Reserve banks are authorized and directed to act as depositaries, custodians, and fiscal agents for the bank, for its own account or as fiduciary, and such banks shall be reimbursed for such services in such manner as may be agreed upon; and the bank may itself act in such capacities, for its own account or as fiduciary, and for the account of others.

PREPARATION OF OBLIGATIONS

SEC. 20. In order to furnish obligations for delivery by the bank, the Secretary of the Treasury is authorized to prepare such obligations in such form as the board many approve, such obligations when prepared to be held in Treasury subject to delivery upon order by the bank. The engraved plates, dies, bed pieces, and so forth, executed in connection therewith, shall remain in the custody of the Secretary of the Treasury. The bank shall reimburse the Secretary of the Treasury for any expenditures made in the preparation, custody, and delivery of such obligations.

UNITED STATES NOT LIABLE

SEC. 21. Except as otherwise specifically provided in this Act, the United States shall not be liable for any debts, defaults, acts, or omissions of the bank.

ANNUAL REPORT

SEC. 22. The bank shall, as soon as practicable after the end of each fiscal year, transmit to the President and the Congress an annual report of its operations and activities.

AMENDMENTS RELATING TO FINANCIAL INSTITUTIONS

SEC. 23. (a) The sixth sentence of the seventh paragraph of section 5136 of the Revised Statutes (12 U.S.C. 24) is amended by inserting "or obligations of the National Domestic Development Bank," immediately after "or obligations, participations, or other instruments of or issued by the Federal National Mortgage Association or the Government National Mortgage Association,"

(b) Section 5200 of the Revised Statutes (12 U.S.C. 84) is amended by adding at the end thereof the following new paragraph:

"(14) Obligations of the National Domestic Development Bank shall not be subject to any limitation based upon such capital stock and surplus."

(c) The first paragraph of section 5(c) of the Home Owners' Loan Act of 1933 (12 U.S.C. 1464(c)) is amended by inserting "or in obligations of the National Domestic Development Bank," in the second proviso immediately after "any political subdivision thereof;"

(d) Paragraph (2) of section 14(b) of the Federal Reserve Act (12 U.S.C. 355) is amended by inserting, "or any obligation of the National Domestic Development Bank" immediately before the period at the end thereof.

SEPARABILITY

SEC. 24. If any provision of this Act or the application thereof to any person or circumstances is held invalid, the validity of the remainder of the Act, and the application of such provision to other persons or circumstances, shall not be affected.

AUTHORIZATION FOR APPROPRIATIONS

SEC. 25. There are authorized to be appropriated, without fiscal year limitation, such sums as may be necessary to carry out the purposes of this Act.

SECTION-BY-SECTION SUMMARY—NATIONAL DOMESTIC DEVELOPMENT BANK ACT

Sec. 2. Sets forth the Findings of Congress which make this bill necessary; that there is an unprecedented demand for community facilities to provide for our growing population and that an alternative method for financing these facilities is imperative. It states that the purpose of the Act is to create a National Domestic Development Bank System.

Sec. 3. Contains definitions of terms used in the Act.

Sec. 4. Establishes the Bank as a body corporate and reserves the use of the name "National Domestic Development Bank".

Sec. 5. Grants the Bank the general powers of a corporation.

Sec. 6. Provides for an initial fifteen (15) member Board of Directors, to be appointed initially by the President, with the following composition:

1 representing Federal Reserve System.

4 representing departments and agencies of the Federal Government.

4 representing the public generally (appointed by the President with advice and consent of the Senate).

2 State governors (nominated by the National Governors Conference).

2 elected officials of county government (nominated by the National Association of County Officials).

2 elected officials of city government (nominated by the National League of Cities).

Subsequently, the representatives of state and local governments will be elected from those nominated by stockholders of the Bank.

Sec. 7. Authorizes $500,000 for organizational and initial operating expenses.

Sec. 8. Outlines the special authority of the Bank:

(a)(1) To purchase obligations of state and local governments issued to finance community facilities or public works of any type.

(2) To make or guarantee loans to:

(a) State and local governments;

(b) Nonprofit and quasi-governmental entities for financing projects supported by state or Federal programs or otherwise having the attributes of public facilities.

(3) To make loans for economic development in areas needing government assistance.

(4) To make loans to businesses in sectors needing government assistance.

(b) To reject any projects inconsistent with comprehensive planning for the communities being served.

(c) To loan money for up to forty (40) years for public facilities and twenty (20) years for economic development projects.

(d) To set interest rates competitive with rates on municipal bonds.

(e) To loan the entire cost of a project which is partly financed by a Federal assistance program, taking back obligations from both the local and the Federal government for their respective shares so that only the amount of the local share will be counted for its debt limit.

(f) To provide a financial and technical advisory staff for each active metropolitan region.

(g) To impose appropriate fees and charges.

Sec. 9. Provides that the Bank's lending activity will be carried out through regional operating divisions supervised by a three (3) member panel appointed by the Board of Directors. Each region will also have an advisory committee of 18 to 25 persons broadly representative of governments and economic groups within the region.

Sec. 10. Authorizes assembly of a staff to give technical and economic advice including preliminary assistance with applications to the Bank and general advice during the construction period. In addition, the Bank may undertake research and facilitate information exchange among Bank customers.

Sec. 11. Provides for one class of common, voting stock with a $100 par. Dividends in any one year may not exceed six percent (6%) of the value of stock outstanding and must be paid out of net earnings.

Sec. 12. Capitalizes the Bank at $3.5 billion to be provided from the sale of common stock and, if necessary, by purchases by the Treasury Department of the Bank's obligations in yearly amounts of $300 million. Each public borrower must subscribe to purchase common stock in an amount equal to $.50 multiplied by the population within the jurisdiction, in increments of 1/20th of the face amount of a loan.

Sec. 13. Authorizes the Bank to sell bonds on the national market in an amount up to 50 times its stated capital to raise monies necessary to finance projects which are applied for by the users of the Bank. These bonds may be guaranteed by the Government National Mortgage Association and pledge the full faith and credit of the United States.

Sec. 14. Authorizes annual federal payments to the Bank in an amount sufficient to make up the difference between interest paid by the Bank on its obligations and the interest received from its loans to local governments.

Sec. 15. Provides for federal insurance of Bank loans, by the Department of Housing and Urban Development and authorizes appropriations of $10 million to establish a revolving fund for this purpose.

Secs. 16 and 17. Provides for an annual audit by the General Accounting Office and a yearly report by the General Accounting Office to the Congress.

Sec. 18. Amends the Internal Revenue Code to exclude from gross income 50% of the amounts received as dividends by a stockholder during any taxable year.

Sec. 19. Makes the bonds of the Bank lawful investments.

Sec. 20. Authorizes the Secretary of the Treasury to prepare and print the Bank's bonds.

Sec. 21. Provides that the United States is not liable for debts, defaults or actions of the Bank other than those specified in the Act.

Sec. 22. Orders that an annual report be submitted to the President and the Congress.

Sec. 23. Contains technical amendments to Federal banking statutes.

Sec. 24. Provides that any invalid provision of this Act may be severed and that the remainder continues in full effect.

Sec. 25. Authorizes to be appropriated without fiscal year limits such funds as may be necessary to carry out the purposes of the Act.

THE NATIONAL DOMESTIC DEVELOPMENT BANK ACT

1. What is the National Domestic Development Bank?

The National Domestic Development Bank is a national lending institution under the directorship of federal, state, and local officials as well as representatives of the general public. The Bank will provide a new source of capital funds to enable cities and towns to undertake a wide range of public projects.

2. What will the Bank do?

It will make 40 year loans to State and local governments to finance the construction of basic community facilities and public works of all types. Loans can also be made to nonprofit organizations for housing, medical, and other public facility construction.

The Bank is authorized to make 20 year loans to business organizations for economic development in geographic areas or economic sectors in need of direct investment to further the national public interest.

3. Why is this Bank needed?

First, there is a limited market for state and municipal bonds. These bonds are one of the first types of securities to be affected by tight money periods. The Bank will assure that municipalities will always have a market for their securities. It will provide communities with an alternative means of financing public development.

Second, the capital financing needs of our states and cities are growing at a rapid rate. In 1968, the Bureau of the Budget estimated a ten-year need of $58 billion.

At the same time, cities are fast approaching the fiscal breaking point. Cities need new ways of obtaining development money that do not sharply increase their public debt burden, putting an additional strain on limited revenues.

4. Won't the Bank complicate public development financing?

On the contrary, the Bank will create a more simplified, flexible, inexpensive, and efficient way to raise capital. It will provide a single source where cities and towns can obtain financial and technical assistance. It will coordinate aid under various federal programs with additional financing, cutting red tape and extended application review procedures.

5. Is this an agency of the Federal Government?

No, the Bank will not be an agency of the U.S. Government and its budget will be independent of the Federal budget.

6. How much will it cost?

The cost of the Bank will be very low. Start-up costs will be $500,000 for organizing expenses and $10 million to establish a revolving insurance fund at the Department of Housing and Urban Development to insure Bank loans. In addition, Congress will need to enact annual appropriations to make up the difference between interest rates paid by the Bank on its bond issues, and the interest rate it charges to borrowers. The net cost would be minimal, however, because the Treasury would collect taxes on the earnings of Bank bonds.

7. Will the Bank have unlimited bonding capacity?

No. It can only borrow on national investment markets for lending to state and local governments and other qualified users at fifty (50) times the amount of paid-in capital stock of this corporation. In addition, the Bank must lend at rates competitive with municipal bonds.

8. Where does the Bank's capital reserve come from?

It comes from three sources:

(1) Sale of stock to the public. One investment incentive will be the exclusion from gross income of 50 percent of dividend earnings from this stock, for Federal income tax purposes.

(2) Sale of stock to public users of the Bank. Each user must buy a small amount of stock in increments as it obtains Bank loans, until it has purchased an amount of stock equal to 50 cents per capita.

(3) The Treasury is authorized to purchase special bonds up to $300 million per year for ten years, and this money can be used for capital reserve.

9. What assurances are provided investors?

First, bonds sold by the National Domestic Development Bank may be guaranteed by the Government National Mortgage Association, and the full faith and credit of the United States pledged to the payment of all amounts under this guaranty.

Second, loans made by the Bank may be insured by the Federal Housing Administration, and a $10 million insurance revolving fund is established for this purpose.

10. What interest rates will be charged to the borrowers of this Bank?

Under this bill the Bank will set interest rates at a level that is competitive with municipal bond rates.

11. Will Borrowers have to come to Washington to apply for loans?

No. The Bank's lending operations will be carried out directly through regional operating divisions, coinciding basically with the regional offices of the various Federal departments and agencies.

12. Will the Bank assist in any way other than providing loans?

Yes. One of the major services of the Bank is to maintain a technical staff that can give advice on Federal programs, on comprehensive planning and administration of the development of community facilities, and on technical data and requirements relating to

the facilities eligible for financing. In addition, the Bank will do research, collect information, and facilitate the exchange of ideas on new technology and improvements in public administration relating to local and regional public development.

13. What projects will the Bank help finance?

A wide range of public facility construction is possible under this Act. Some examples are:

Schools and libraries.
Medical centers and hospitals.
Mass transit systems.
Industrial parks.
Police and fire departments.
Water and sewer systems and waste disposal and treatment facilities.
Parks and recreation areas.
Community service and day care centers.
Public housing.
Job-training and adult education centers.
The renewal of town and city business centers.
And the reconstruction or rehabilitation of all of these types of public facilities to energy saving standards.

[From the New York Times, Apr. 8, 1977]

UNITED STATES PLANNING BANK TO AID LARGE CITIES

(By Hedrick Smith)

WASHINGTON, April 7.—Treasury Secretary W. Michael Blumenthal disclosed today that the Carter Administration was drafting plans to set up an urban reconstruction bank to make borrowing easier for New York and other large cities with financial problems.

He compared the concept to that of the Reconstruction Finance Corporation set up in the New Deal period to aid failing businesses or to the International Bank for Reconstruction and Development, both known for providing loans not otherwise available from normal commercial lenders. Often, their loans are made at favorable interest rates and with other concessionary terms.

In New York, Felix G. Rohatyn, chairman of the Municipal Assistance Corporation, urged that the city try to issue its own notes to the public to meet some of its short-term borrowing needs next summer. His Proposal met with a favorable but qualified response from Mayor Beams, Governor Carey, City Comptroller Harrison J. Goldin and several bankers.

Although he has raised the issue before as one option before the Federal Government, Mr. Blumenthal went further today in a luncheon interview in suggesting that the Carter Administration was prepared to proceed with some sort of bank proposal.

In a luncheon interview with New York Times reporters and editors, Mr. Blumenthal said the Treasury Department and other Administration agencies were working to complete plans for the urban bank by summer, but he did not go into details of its operation.

Other treasury officials said that Mr. Blumenthal had already established an Office of Urban Finance in the Treasury Department and given it the task of developing financial assistance programs for central cities. The urban bank plan, they said, will not only require more refinement but ultimately Presidential approval and legislation passed by Congress before it can take effect.

The basic purpose, he explained, is to "create resources available to the cities that would not otherwise be available" in order to provide assistance to the older urban areas of the Northeast and Middle West and help them reverse the cycle of economic decline and higher tax rates that drive businesses and residents into the suburbs.

From his description, it sounded like an effort to set up a permanent mechanism for the kind of seasonal financing that New York City has received from the Federal Government for more than a year. The $2.3 billion seasonal loan authority established by the Ford Administration expires June 30, 1978. Other officials said that the plan, promoted by some New York officials, was still in an "embryonic" stage.

Speaking with considerable feeling about the "vicious circle" of financial problems that beset cities like New York, Mr. Blumenthal predicted that the Carter Administration's welfare reform package would provide "some" financial relief for the city, though it would not offer a "total" answer to the city's chronic budget deficits.

Last summer, in his speech accepting the Presidential nomination at the Democratic National Convention in New York City, President Carter asserted that the welfare burden "should be removed from the cities, with all welfare costs being paid by the Federal and state governments."

Today, Mr. Blumenthal, relaxed but looking tired from what he said was a heavier work schedule than in private industry, sounded a bit more tentative about how far the Administration would go in assuming the welfare costs of a city like New York. He carefully shied away from specifics.

In spite of the fact that, earlier this spring, New York City was able to put together a package to cover its debt moratorium, the 51-year-old Treasury Secretary asserted his belief that its financial problems were not "by any means over" nor was its need over for Federal assistance.

"I do believe that a good bit of progress has been made in cutting expenditures and moving towards greater efficiency," he said. "The problem that we want to address ourselves is how to help them in the longer run, after 1978. The present economic environment does not get you toward a balanced [budget] in the long run."

Mr. Blumenthal gave indications today that the seasonal loan authority might be replaced by the urban bank.

Puffing gently on a cigar as he spoke, Mr. Blumenthal outlined the Administration's philosophical approach to the cities. He said that experts from the Treasury Department and other agencies dealing with urban problems were examining such questions as these:

BOUNDARY PROBLEMS CITED

"Why are places like New York, Detroit, Cincinnati and similar old urban centers in financial trouble? Are there some common factors? To what extent can these factors be eliminated by more intelligent local governments? If in New York the pension system is abused, you can correct that. If there is padding of payrolls with a lot of people that don't do any work in a particular city, you can correct that. If you have improper budget procedures or controls over expenditures, you can correct that.

"So assuming therefore, you take these cities and you make them more efficient, you still have some inherent problems. One of them may be the load of welfare and with that we'll see what comes out of welfare reform. Let's assume that you have some changes in the welfare system such as you would be able to get through Congress, and let's assume that you would have a relatively efficient administration, are the cards simply stacked against large cities?"

The critical problem, he said, is that the "political boundaries of cities and the fiscal boundaries" do not match, meaning that cities cannot tax all those businesses and individuals who benefit from living in the metropolitan areas surrounding them.

By Mr. PROXMIRE (for himself and Mr. CRANSTON):

S. 1397. A bill to amend the Federal National Mortgage Association Charter Act to increase the size of the board of directors thereof, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

FNMA

Mr. PROXMIRE. Mr. President, I am introducing a bill for myself and Senator CRANSTON to make two changes in the charter of the Federal National Mortgage Association.

FNMA is a privately owned corporation which is chartered by Congress for the purpose of providing a secondary market for home mortgages. Its function is to buy mortgages from private, primary lenders, in order to supplement the funds available for housing, to help move mortgage funds from capital-surplus to capital-short areas of the country, and to implement certain special housing programs.

In 1968 FNMA was removed from the Federal Government and reconstituted as a quasi-private, quasi-governmental institution unlike any other. It is like a private corporation in that its stock is held and traded by private individuals, it makes a profit, and it pays full corporate income taxes. Its obligations are not backed by the full faith and credit of the United States, and it receives no operating funds from tax revenues, and it employs its own chief executive officer.

On the other hand, FNMA is far from being a true private corporation. It is chartered by Congress to meet the specific public purpose of supporting the housing market. It has a $2.250 billion emergency line of credit from the U.S. Treasury, which enables it to borrow at rates well below other private corporations. One-third of its board of directors is appointed by the President of the United States. It is statutorily subject to general and specific regulatory authority from the Secretary of Housing and Urban Development, and the Secretary of Treasury must approve its borrowing. Its securities are exempt from SEC requirements, Federal Reserve banks are authorized to act as its depositories and fiscal agents, and its stock and obligations are classified so as to make them highly desirable investments for Federal savings and loan associations.

In other words, FNMA is neither fish nor fowl. It is a unique, privately owned profitmaking company with a public purpose and extensive Government control.

This ambivalence makes it perpetually difficult to strike the appropriate balance between FNMA's public and private procedures and goals. In some ways I think the corporation has done a good job. It has pioneered the conventional mortgage purchase market and made initiatives in areas such as standard mortgage instruments and purchase of condominium loans, graduated payment mortgages, and apartment loans. In the process, it has grown into a corporation with more than $30 billion in assets which pays handsome dividends to its stockholders.

Despite its partial record of success, however, I believe that FNMA has not been nearly as responsive as it should be to the public interest for which it was chartered. I do not mean to say that FNMA should stop making profits, or should become a subsidy institution for

low-income housing. It should remain a sound, profitmaking company. At the same time, however, I believe that it can and should take on an increased role in the public interest. Let me cite three examples.

First, FNMA should do far more to purchase sound conventional loans made in inner-city neighborhoods. It is well documented that our urban areas contain many sound homes and creditworthy home buyers who have great difficulty finding conventional—or non-Government backed—mortgages. A typical refrain of lenders when challenged on this point is that they cannot make such loans because FNMA would not buy them. Furthermore, FNMA has promulgated standard appraisal criteria which tend to discriminate against properties simply because they are old or because they are located in areas which are subjectively evaluated as having high risks. Again, I do not advocate having FNMA buy high-risk, unsound loans. I do believe, however, that FNMA, with its great size, prestige, and expertise, should be a leader in getting the private mortgage market to seek the sound loan in the inner city, to keep our urban neighborhood alive and viable. Despite a few recent, very limited initiatives in this area, I believe FNMA has not been playing this role.

Second, I believe FNMA should make itself much more open and available to the public and to the public interest groups which have such an extensive and legitimate concern with its actions. There has been a recent series of incidents which lead me to believe that FNMA does not feel the public has a right to much of the basic information on its interests and activities.

One such incident occurred recently in Seattle, Wash., where FNMA was holding one of a series of local meetings for the stated purpose of encouraging lenders to make inner-city loans. A neighborhood-based church group which had spent several years researching and advocating increased mortgage lending was ignored in its efforts to be included in the meeting and to make input into its agenda. They ended up outside the door of the meeting, protesting, instead of inside talking to FNMA and their local lenders.

Another glaring example is the fact that FNMA's board of directors in March passed a specific resolution ruling that the public and press could not have access to public and industry comments which it solicits and receives on new program initiatives. FNMA offered no argument as to why the public interest is served by this policy. Instead, it has merely stood on the fact that it is a "private corporation" and thus is not, in its view, subject to the Freedom of Information Act.

In both of these specific cases, FNMA has partially corrected its initial stance following congressional objections to its actions. The point, however, is that its first reaction so often is to protect its "corporate prerogatives" rather than to promote the public interest.

A third example of FNMA's questionable actions is the fact that its board approved a contract for the president and chairman of the board, Oakley Hunter, on terms which insulate him from the need to be responsive to the public interest. Mr. Hunter's contract was executed in September 1975, and lasts for 5 years. It provides that he be paid no less than $122,000 a year. This year his salary has been increased to $140,000. The contract also provides for benefits to Mr. Hunter and his estate if he is removed from office or dies. These include the fact that, if he is removed without good cause, he need not seek other employment, and can collect his full salary, plus $5,000 a year to compensate for lost fringe benefits, through the end of the 5-year period.

Mr. Hunter presumably thought it advisable to secure this contract from FNMA's board, because his Johnson-appointed predecessor, Ray Lapin, was removed when President Nixon took office and was unsuccessful in litigating the issue. When Nixon removed Mr. Lapin and appointed Mr. Hunter, FNMA's charter gave the President direct authority to appoint FNMA's president. Today, FNMA's president is hired by its board, with the President of the United States empowered only to appoint one-third of the directors and to remove any director for good cause. Nevertheless, the precedent of changing FNMA's chief executive with a change in administrations made Mr. Hunter's position somewhat insecure in late 1975, when his 5-year contract was initiated.

The FNMA board which approved Mr. Hunter's contract was made up entirely of directors who were elected or appointed after President Nixon took office. Since then, there has been only one change in the elected directors, and this year the board has submitted the same slate of elected directors, without a single change, to the stockholders for ratification at their annual meeting on May 19.

It seems to me that these cases—FNMA's insensitivity to urban lending needs, its board's refusal to allow the public access to information, the staff's unwillingness to cooperate with the neighborhood group in Seattle, and the board's approval of an expensive contract insulating the chief executive officer from full accountability for 5 years—are signs of a serious problem with FNMA's attitude toward its mission. This attitude is at the heart of my concern. I think the orientation of the board and staff should be to start with the fact that FNMA exists to serve a public purpose, and that within the limits of its charter and responsibilities, they should do everything possible to promote the public interest. Instead, I think the people at FNMA start with the premise that they are part of a private corporation, and that they should only promote the public interest to the extent required by the charter.

This difference in emphasis is critical. There is a vast gray area between the things which FNMA clearly must do under its charter, and the things it clearly should not do under its charter. Within this middle ground are endless possibilities for pursuing the public interest, on which FNMA could go either way. It seems to me that their corporation attitude leans the wrong way. They seem to say to themselves, "when in doubt, do nothing."

Mr. President, the bill which Senator CRANSTON and I are introducing today is intended to try to get that attitude leaning a little more in the other direction. It does two things.

First, it would make it clear that FNMA must comply with the provisions of the Freedom of Information Act. At present there is apparently room for doubt on this question, with FNMA maintaining that they are not subject to this law and with several members of the press having considered litigating the matter. Our amendment would simply remove any ambiguity from the law by making it explicit that FNMA must observe these public information procedures.

Second, the bill would increase the number of FNMA directors which are appointed by the President of the United States. At present, the charter calls for a 15-member board, of which 10 are elected by the stockholders and five are appointed by the President. Of these five, however, three are statutorily required to be representatives of industry interest groups—one each from the lending industry, the homebuilders, and the real estate industry. By tradition, also, the other two presidentially appointed positions have normally included representatives of HUD and/or the Treasury.

Our bill would leave the number of elected directors at 10, and would increase the presidentially appointed directors from five to nine, making a board of 19 members. The bill leaves intact the requirement that three of these nine members be industry representatives.

By keeping the presidentially appointed members in the minority on the board, and by retaining the requirement that three of them represent industry, we hope to make it clear that our intention is not to change the nature of FNMA as a profitmaking privately directed corporation. The bill changes absolutely nothing else in the FNMA charter, including the clear provision that FNMA is to purchase loans for low-income housing only within the constraints of being able to make a reasonable profit.

Every one of the new appointees would have a fiduciary responsibility to the corporation, just as the presidentially appointed directors do at present. Every one of them would be charged with carrying out the continued mandates of the corporation's charter. In no way does the bill constitute a drastic or precipitous change in the corporation .

What it will do, I believe, is to increase FNMA's sensitivity to the public purpose in its charter. The four additional appointees will give the President the opportunity to name people of more varied backgrounds, including women and minorities, to the board .This will be a stark contrast to the directors elected by the stockholder, every one of whom is a

white, male representative of a financial institution or other business associated with FNMA. I feel that the change will result in better balance and increased sensitivity, without in any way changing FNMA's basic function.

Mr. President, FNMA is one of the largest corporations in the United States. It is the second biggest borrower of credit in this country, exceeded only by the U.S. Treasury, itself. It owes its size and success in large part to the extraordinary advantages which Congress has given it in order to help it serve its public purpose. I strongly feel that we should, accordingly, assure that FNMA keeps that public purpose uppermost in its mind as it pursues its chartered activities. I believe the bill offered today by myself and Senator CRANSTON will effectively accomplish that goal.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1397

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 308 (b) of the National Housing Act is amended—

(1) by striking out "fifteen" and inserting in lieu thereof "19";

(2) by striking out "one-third" and inserting in lieu thereof "nine"; and

(3) by adding at the end thereof the following: "The Federal National Mortgage Association shall be deemed to be an agency within the meaning of section 551 of title 5, United States Code, for the purpose of section 552 of such title.".

By Mr. DOLE:

S. 1401. A bill for the relief of Elvi Engelsmann Jensen; to the Committee on the Judiciary.

Mr. DOLE. Mr. President, the Senator from Kansas is introducing a bill on the behalf of Elvi Engelsmann Jensen, the adopted daughter of Mr. and Mrs. Donald Jensen of Larned, Kans.

Ms. Engelsmann first visited the Jensens in 1967, staying with them for several months. Over the next several years she periodically returned to the Jensen's home, developing a bond of affection which has lasted through the years, and eventually led to Ms. Engelsmann's adoption by the Jensens in 1976. Because she was over the age of 14 at the time of her adoption, she cannot earn special consideration under the law, and is now faced with voluntary departure from the United States by July 1, 1977.

To reaffirm the Jensen's request for permanent resident status, I ask unanimous consent that their letter be printed in the RECORD.

Mr. President, I urge the Senate to act upon this legislation as quickly as possible.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

MARCH 22, 1977.

Hon. BOB DOLE,
U.S. Senate,
Washington, D.C.

DEAR MR. DOLE: We received your letter dated March 17, and thank you very much for your concern. We would like your help in obtaining a private bill on behalf of our daughter Elvi.

Elvi was born in Copenhagen, Denmark, 7–16–58 to my sister and her husband Mr. Preben Engelsmann, but they were divorced while Elvi was still an infant.

When Elvi was 9 years old she was having personal problems in school and at home. Her mother had planned a short vacation with us here in Kansas and the school psychologist suggested a longer stay for Elvi in our family would greatly benefit her. She stayed for 6 months with us and by the time she left was a different girl. The most important thing she found here was a father in my husband, someone she needed all her young life, and being an only child, brothers and a sister. In the next few years she came back twice for visits, each time for 3 months. My sister made sacrifices to be able to send Elvi, but it meant so much to her to come over to "her daddy and family".

When Elvi finished her formal schooling at age 15, she went to work for a doctors family and lived with them. Elvi's mother remarried and her husband promised an open door for Elvi, but when Elvi returned home she found that her new step-father and her could not live in the same house. Elvi wrote us for advice, she did not want to break her mother's marriage and she didn't feel like she belonged anywhere. Could she come over here for awhile? She knew we loved her and she felt at home here. First it was to be a visit, but we soon felt that she rather stay in this country than anything else. We wrote to you then for help Mr. Dole and you contacted Mr. Carroll at the Immigration Dept. for us. We enrolled her in Larned Sr. High School and she graduated in May 1976.

We asked the help of Mr. Vincent Fleming, Attorney At Law to help us to keep Elvi, but it was like for every step forward, we went two backwards. Mr. Fleming, now deceased, contacted Mr. Sharp in Kansas City, who specializes in Immigration, he advised us that if we did adopt Elvi our problems would be over. Elvi's mother had agreed to adoption long before and she contacted Elvi's father who lived in east Berlin, he also gave his consent.

My sister felt that the best thing she could do for her daughter would be to let her stay with us where she knew she was wanted and loved by all. Soon after the adoption Mr. Fleming passed away and we asked Mr. Louis James, Attorney at Law to help us. Mr. James found there was an Immigration office in Garden City, Kansas and contacted them. Mr. Hasson of that office came out to talk to Elvi and us and informed us that the adoption was not valid for immigration and she now was here illegally. It seems that after two years we are right back where we started. We thought we did the right thing when we contacted the attorney, but according to the investigator nothing was right. We were told she would have 30 days to leave the country, but later in a letter she was given until July 1. We are thankful for this but hope she will never have to go back.

Mr. Dole, Elvi wants to stay here more than anything and we want her here with us as a family. She is now attending Barton County JUCO and getting along well. She can have a brght future here if she gets to stay. "If" she has to go back my sister will leave her husband to be with Elvi, but what will that do to Elvi?

I can never take the place of my sister as Elvi's mother, but my husband is truly her DAD in every way that counts and our children are her brothers and sister. It is hard to believe that this might have to come to an end because of immigration rules. Everybody needs to be loved and wanted. She did not feel that in Denmark but she found that here. She knows we love her and want her to have a bright future and God willing it will be in this country.

Mr. Dole, we have been told that a private bill to obtain a permanent visa for Elvi is our only hope and we ask for your help.

Hopefully yours,

Mr. and Mrs. DONALD JENSEN.

By Mr. DOLE:

S. 1402. A bill to establish a National Agricultural Research, Extension, and Teaching Policy Advisory Board, and for other purposes; to the Comittee on Agriculture, Nutrition, and Forestry.

NATIONAL AGRICULTURAL RESEARCH, EXTENSION, TEACHING POLICY ACT OF 1977

Mr. DOLE. Mr. President, in January of this year the Senator from Kansas introduced S. 248, the National Agricultural Research Policy Act. My purpose in offering this legislation was to place renewed emphasis on agricultural research so that the food and fiber needs of the Nation and the world may be met in future years.

Since the introduction of S. 248, the Committee on Agriculture, Nutrition, and Forestry has received the testimony of a number of expert witnesses representing a broad spectrum of the agricultural research and teaching community. The facts and suggestions offered by these witnesses have given me a better insight into the needs and problems of agricultural research. In consequence, the Senator from Kansas is pleased to submit new legislation which builds upon and improves the provisions of S. 248.

RESEARCH NEEDS

The record of past successes in agricultural science is impressive. The U.S. Department of Agriculture, universities, foundations, and private enterprise have all made important contributions. Today, a single American farmworker supplies enough food and fiber for 56 people. But past success has created a feeling of complacency. Expenditures on agricultural research have not kept up with inflation during recent years.

For example, in 1965, agricultural research funding from Federal, State agricultural experiment stations, and industry sources was estimated at $854 million. A comparable estimate for 1975 was about $1.6 billion. However, after discounting for inflation, the 1975 expenditure had less purchasing power than the amount spent in 1965.

The fiscal year 1977 budget of the major research arm of the U.S. Department of Agriculture, the Agricultural Research Service, is only about 60 percent of what it was 10 years ago in constant dollars. In 1940, 38 percent of the Federal government's research and development budget went to agriculture. In 1977, agricultural research accounted for only 1.8 percent of the total Federal research and development budget.

Beyond the immediate concern of dollar expenditures, however, is the knowledge that available research funds have had to be stretched again and again to cover emerging new needs. Human nutrition, environmental quality, and energy availability are examples of worthy research priorities. At the same time, though, these priorities have forced reductions in production and marketing research.

NEW DEMANDS

Demands for more food production continue to grow. Even with the declining birth rate in the United States our population is expected to increase from 214 to 270 million by the year 2000. Worldwide population is expected to increase from 4 billion to at last 6 billion during the same period.

Furthermore, as we look to the future, it appears that it will not be as easy to turn on the spigot of agricultural production as it has been in the past. We no longer have 60 million acres being held out of production as in the early 1970's. In many areas, chemical fertilizers have reached a point of diminishing returns. Crops yields appear to be nearing a biological ceiling unless there are research breakthroughs.

In 1974, the Economic Research Service of USDA gave this assessment of past research accomplishments and our prospects for the future:

An extensive inquiry was made into the root causes of productivity change in agriculture. Factors considered were: mechanization, hybridization, fertilization, and pesticides. Change in aggregate agriculture productivity was made a function of changes in the adoption of these major technologies. There is strong evidence that these few technologies were responsible for the bulk of productivity change during this century. Since most of the major technologies were nearly exploited by 1960, the productivity increase has slackened since that time. For the future, minor technologies will contribute a modest improvement in productivity but major change will have to wait the discovery of new major technology.

This means the day has passed when we can take for granted our excellent past record in bettering our agricultural performance.

FRAGMENTATION OF RESEARCH

While the evidence strongly suggests that there is a need for upgrading the priority given to agricultural research expenditures in this country, increased coordination of research is also needed. In addition to USDA, many colleges and universities—including the land grant colleges, State agricultural experiment stations, the National Science Foundation, the National Institutes of Health, the Department of Health, Education, and Welfare, the Environmental Protection Agency, and the Energy Research and Development Administration all carry out some farm-related research.

Such fragmentation greatly hinders our ability to focus the vast research capabilities of this Nation on the research needs of highest priority.

In short, this country needs to revitalize agricultural research through increased funding and better coordination. Then we can begin to tackle basic research in such promising areas as: Photosynthesis; nitrogen fixation; crop and livestock protection; water and nutrient efficiencies; genetics; biochemical aspects of handling and processing of crops, livestock, and fish; soil and water relationships; and alternative market arrangements.

This legislation is being introduced so that these goals can be realized.

PROVISIONS OF THE ACT

To accomplish the purposes outlined here, my act:

First. Establishes the position of Assistant Secretary of Agriculture for Research and Education;

Second. Establishes a Joint Council on Food and Agricultural Sciences to coordinate the research and related activities of the Department with State and private sector efforts;

Third. Establishes a Subcommittee on Food and Renewable Resources in the Federal Coordinating Council for Science, Engineering, and Technology;

Fourth. Mandates an annual report to Congress by the Secretary on research, extension, and teaching programs;

Fifth. Establishes a National Agricultural Research, Extension, and Teaching Policy Advisory Board to monitor Department activities and provide independent advisory opinions;

Sixth. Establishes new competitive grant programs for general research, nutrition research, and research facilities;

Seventh. Establishes an animal health program including grants to animal research institutions and matching grants to States for the creation of schools of veterinary medicine;

Eighth. Establishes a program and facilities for the research of forest and rangeland renewable resources;

Ninth. Mandates an assessment of current and projected weather patterns and their likely impact on food and fiber production;

Tenth. Redirects the Cooperative Extension Service toward a greater emphasis on education programs for small farmers, human nutrition, energy conservation, forestry, and animal diseases;

Eleventh. Mandates competitive grants to universities and colleges for teachers of agricultural science;

Twelfth. And establishes Department of Agriculture graduate assistantships and postdoctoral fellowships at eligible universities.

Mr. President, I believe that these provisions will restore research and education as a priority activity of the Department of Agriculture. Past investments in these areas have reaped rich returns, and a renewed commitment today assures greater returns tomorrow, to the benefit of producers and consumers alike.

By Mr. DOMENICI (for himself and Mr. SCHMITT):

S. 1403. A bill to provide for conveyance of certain lands near Dixon, N. Mex., to the University of New Mexico; to the Committee on Energy and Natural Resources.

Mr. DOMENICI. Mr. President, today I am introducing legislation which provides for a conveyance of land comprising about 110 acres of land to the University of New Mexico. I am pleased to be joined by my colleague, Mr. Schmitt.

Dr. Arthur Montgomery, the owner of the unpatented and patented claims, desires to donate the claims to the University of New Mexico for use by its geology department and students since the claims are of exceptional geologic interest. The unpatented mining claims were properly located, discovery thereon made, and the annual assessment work has been accomplished. For all practical purposes, and subject to continuing to do the annual assessment work, the right to the possession and extraction of the minerals is in Dr. Montgomery and he has expressed his desire to make a gift of these minerals to the university. The purpose of this bill is to avoid the necessity for the University of New Mexico to continue to do the annual assessment work, since as an educational institution is not readily equipped to do annual assessment work. The beneficial ownership of the minerals is already outside the United States and under mining law there is no royalty payable.

This bill provides for a conveyance "upon such terms and conditions as the Secretary shall deem necessary to insure proper land use and protection of the public interest." The university is seeking title to the claims for educational purposes and the restriction spelled out in the bill prohibiting transfer by the university and prohibiting commercial exploitation—except perhaps for production upon approval by the Secretary of the Interior if he deems it in the public interest to have the minerals produced—would seem to me fair to all parties.

Mr. President, I ask unanimous consent that a letter which I received from William C. Briggs, attorney at law, Albuquerque, N. Mex., be printed in the RECORD. This letter describes the matter more fully.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

NOVEMBER 30, 1976.

Hon. PETE V. DOMENICI,
U.S. Senate, Federal Office Building and U.S. Courthouse, Albuquerque, N. Mex.

DEAR SENATOR DOMENICI: In June of 1975 Peter Rask, counsel for the University of New Mexico, asked our office to represent the University with respect to certain mining claims in Section 29, Township 23 North, Range 11 East, near Dixon, New Mexico, consisting of one patented claim and some eleven unpatented claims. These claims contain or contained lithium, tantalum, beryl, and various rare element minerals. The claims are well known among geologists, and have an interesting history of prior production. I am enclosing with this letter some of the information with respect to the claims.

The holder of the claims, Dr. Arthur Montgomery, was Chairman of the Department of Geology of Lafayette College until his recent resignation. However, his association with the mines goes back to World War II when he personally with the help of others mined badly needed lithium. Dr. Montgomery is a very generous and high-minded individual who felt that the most significant use of the

claims would be in connection with education and that the claims should be the property of an educational institution. After a number of discussions, Dr. Montgomery in effect donated the claims to the University of New Mexico if the University is able to get fee title to the land. I enclose copies of letters from the Chairman of the University of New Mexico Geology Department, Dr. Woodward, and the Dean of the School of Earth Sciences and Professor of Geology at Stanford, expressing their opinions regarding ownership by the University. We finally worked out and entered into an agreement between Dr. Montgomery and the University in the nature of a lease giving possession of the claims to the University and allowing the University to attempt to obtain the title. I enclose a copy of this agreement.

I have explored at some length the cost and problems associated with attempting to patent the claims. I am convinced that this is not practical in this case. I explored with the office of the Commissioner of Public Lands the possibility of the State of New Mexico securing the land and transferring it to the University. This also appears highly impractical and substantially impossible. I explored with the B.L.M. the possibility of an exchange of lands with the University which would give the University title to the lands on which the claims were situate—we are talking of approximately 200 acres—the South West Quarter and the East Half of the South East Quarter in the section above mentioned. They advised that while they do not have any objection to ownership by the University of New Mexico and to an exchange, they felt it unlikely that we could ever complete an exchange where the land to be exchanged has value for mineral purposes.

This brings me after considerable length to the purpose of this letter. I ask on behalf of the University of New Mexico that you and your staff consider the introduction of a bill in Congress which would vest the fee to the lands and minerals in the University of New Mexico. My own feeling is that since the highest and best use of the claims seems to be for education or research purposes, it would be in the public interest to assure ownership in the University of New Mexico. I will be very happy to confer with you or with your staff at any time at your convenience if you feel my suggestion a feasible one.

Sincerely yours,

WILLIAM C. BRIGGS.

By Mr. McINTYRE (for himself, Mr. HATFIELD, Mr. NELSON, Mr. WILLIAMS, and Mr. LUGAR):

S. 1405. A bill to amend the Tariff Act of 1930 and the Tariff Schedules of the United States to reduce the burden of paperwork involved in the customs entry process for travelers and goods entering the United States; to the Committee on Finance.

CUSTOMS PAPERWORK SIMPLIFICATION

Mr. McINTYRE. Mr. President, today I am introducing the Customs Paperwork Simplification Act of 1977. Senators NELSON, HATFIELD, WILLIAMS, and LUGAR are joining with me as cosponsors on this piece of legislation. Similar legislation is being introduced in the House of Representatives.

You will recall that earlier in this session, I had introduced S. 683, dealing with the same subject matter. However, the bill today contains safeguards and controls which would prevent possible abuses of the process. It is designed to reduce paperwork and needless delay both for the international traveler and for the importer of small commercial shipments.

The bill would assess a flat rate of duty of 10 percent at retail value, for the first $500 worth of goods, less certain exclusions, which a traveler might bring in for personal use. This rate equates with the average of 15 percent of wholesale value which is now assessed.

The advantage here is that the amount due under the flat rate can be ascertained easily without the involved calculations required to establish a whole value and then determine the amount of duty for each item the traveler is bringing in for personal use. There would be no revenue loss to the Government, an estimated threefold increase in customs processing capacity, and a commensurate reduction in traveler waiting time.

The bill would also raise the limit of informal entries of commercial shipments into the United States from $250 to $500. This increase is intended to reflect, in a reasonably accurate way, the inflationary changes in the value of merchandise since the present limit of $250 was established in 1953. Here, too, there will be no loss of revenue to the United States, since the duty continues to be assessed based on the Tariff Schedules of the United States and not on the method of entry.

The informal entry system is much simpler and requires considerably less paperwork. Nevertheless, the statistics derived from the entry will be identical with those compiled from formal entries, so that import quotas, and other controls and monitors can still be maintained—the Customs Service estimates annual savings to importers of $6,000,000 in brokers fees and surety bonds, to say nothing of the time factor in the import process which would be considerably lessened.

In summary, the bill, which has received favorable reactions from both industry and labor, in our considered opinion is in the public interest and deserving of enactment.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1405

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Customs Paperwork Simplification Act of 1977".

SEC. 2. (a) Schedule 8 of the Tariff Schedules of the United States (19 U.S.C. 1202) is amended by redesignating "Part 6" as "Part 7", changing the phrase "Part 6 headnote" to "Part 7 headnote", and inserting a new Part 6 to read:

PART 6.—NONCOMMERCIAL

Importations of Limited Value

Part 6 headnote: 1. For the purposes of this part the rates of duty for articles provided for in this part shall be assessed in lieu of any other rates of duty except free rates of duty on such articles, unless the Secretary of the Treasury or his delegate determines, in accordance with regulations, that the application of the rate of duty otherwise applicable thereto adversely affects the economic interest of the United States.			
Articles for personal or household use, or as bona fide gifts, not imported for sale or for the account of another person:			
869.00	Accompanying a person, arriving in the United States and valued in the aggregate (exclusive of duty-free articles) not over $500 fair retail value in the country of acquisition, if such person has not received the benefits of this item (869.00) within the 30 days immediately preceding his arrival	10% of the fair retail value.	10% of the fair retail value.

(b) The amendment made by this section shall take effect with respect to persons and articles arriving in the United States on or after the thirtieth day following the date of enactment.

SEC. 3. Section 498(a)(1) of the Tariff Act of 1930 (19 U.S.C. 1498(a)(1)), as amended, is hereby further amended by striking "$250" and substituting "$500", and by adding the following after the semicolon: *"Provided, however,* That such regulations shall require the submission, as part of any declaration wtih respect to any shipment of merchandise which exceeds $250 in aggregate value, of an accurate statement specifying kinds and quantities of all articles imported in such shipment and the value of the total quantity of each kind of article.".

By Mr. DECONCINI:

S. 1406. A bill to amend the Internal Revenue Code of 1954 to limit the foreign tax credit to amounts paid to national governments, permitting a deduction for foreign taxes paid to subordinate levels of government; to the Committee on Finance.

Mr. DECONCINI. Mr. President, I am introducing a bill today which in my estimation brings a degree of equity to our tax treatment of American-owned corporations operating in foreign countries.

Corporations are allowed a tax credit for taxes paid to foreign governments, and I have no argument with this allowance. I do believe, nonetheless, that we need to examine carefully whether our present applications of the foreign tax credit are equitable.

A tax credit is allowed because we have decided to avoid double taxation by comparable sovereign nations. So, while under U.S. law an American corporation is liable for U.S. corporate taxes, that liability is waived to the extent that a payment was made to a foreign sovereign entity. If there is a difference between the amount paid to the foreign government and the amount of U.S. liability, the corporation is required to pay that difference when the income is repatriated.

Under present law, an American corporation operating in my own State of Arizona pays State and local taxes. These taxes are deductions against overall Federal tax liability. That same corporation operating abroad, however, has a unique advantage.

The reason is that not all foreign tax payments are payments to sovereign entities. For example, the taxes a corpora-

tion operating abroad pays to the municipality in which it is located is different from taxes paid to the country itself. In the United States, we make such a distinction. State and local corporate taxes are deductions, that is, expenses incurred as part of doing business; they are not treated as credits. Essentially, taxes paid to local governments are for services provided by the local governments.

To treat taxes paid by American corporations to foreign State and local governments as credits rather than deductions is a distortion of the tax credit concept. A distinction needs to be made between foreign taxes paid to the foreign sovereign and lesser units of government. The legislation I am introducing makes that distinction by treating foreign taxes paid to subnational—that is, the equivalent of our State and local governments—units of government as deductions and not credits.

To relieve the administrative burdens associated with a case-by-case determination of the precise amounts of payments to subnational units of foreign governments, the bill I am introducing uses a formula approach. The Treasury is mandated to determine the ratio between domestic Federal taxes paid by corporations, on the one hand, and State and local taxes paid on the other. The ratio expressed as a percentage figure—for example, if corporations in the United States paid 7 percent of their total taxes to State and local governments—will be applied across the board to foreign countries.

In other words, the assumption for the purposes of this legislation is that other countries have the same relationship in tax terms between the national government and lesser units. There are two provisions here of special note. First, there is an absolute limitation of 10 percent. That is, regardless of what the U.S. proportion of State and local taxes is of the total corporate tax assessment, it will not exceed 10 percent for purposes of assessment against U.S. corporations operating abroad. Second, there is provision for a phase-in. During the first year, the proportion cannot be more than 5 percentage points, the second year 6 percentage points, and so forth until the 10 percentage point limit is reached.

Assume, for example, that an American corporation operating abroad pays total foreign taxes of $1,000. Assume further that the U.S. proportion of State and local taxes is 6 percent. Then, the corporation would not be allowed the full $1,000 as a credit against U.S. taxes; it would be allowed only $940 in tax credits. The balance—that is, the $60—would be treated as a deduction. And since the corporate tax rate is approximately 50 percent—48 percent, in fact—the $60 would only be worth about $30 in tax benefits.

While this is a relatively small change, it is dictated by equity and the desire to make foreign investment—with its concomitant loss of jobs for Americans—no more attractive than domestic investment. It is my belief that our entire tax structure as it affects American corporations operating abroad tends to make overseas investments artificially more attractive. Investment decisions are distorted because tax preferences favor investing abroad rather than at home.

Any business executive will naturally want to invest his capital in such a manner as to maximize its return. Investment decisions will be made on the basis of the after-tax return potential. This means that two investments of equal profitability—one in the United States and one abroad—will be evaluated as to the return after taxes are paid. If we give special advantage to overseas investments through the tax code, it is natural that capital will, indeed, flow abroad. All recent data suggests that this is precisely what is happening. The net effect of the flight of American capital is fewer American jobs, the export of vital American technology and know-how, lagging capital formation, and, ultimately, transforming the American economy into a rentier economy.

There are obviously multiple dimensions to this problem and the legislation I am introducing today only addresses one aspect of the larger issue. It is, nonetheless, important and deserves the consideration of this body. By removing the tax credit for that portion of foreign taxes that can be reasonably assumed to have been paid to State and local units of government and replacing it with the deduction, we will have provided a degree of equity in our treatment of foreign and domestic earnings. Some of the undue advantage will have been removed, and the American economy will be better able to compete effectively for capital and jobs.

I ask unanimous consent, Mr. President, that the text of this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1406

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. LIMITATION OF FOREIGN TAX CREDIT TO AMOUNTS PAID TO THE NATIONAL LEVEL GOVERNMENTS.

(a) IN GENERAL.—Section 901 of the Internal Revenue Code of 1954 (relating to taxes of foreign countries and of possessions of the United States) is amended by redesignating subsection (h) as (i) and by inserting after subsection (g) the following new subsection:

"(h) LIMITATION OF CREDIT TO FOREIGN FEDERAL TAX EQUIVALENT AMOUNT.—

"(1) GENERAL RULE.—Notwithstanding the provisions of subsection (b), the amount of the credit allowed under subsection (a) for income, war profits or excess profits taxes paid or accrued by a taxpayer during the taxable year to any foreign country or to any possession of the United States shall not exceed an amount equal to the foreign federal tax equivalent amount for the taxpayer for such country or possession.

"(2) FOREIGN FEDERAL TAX EQUIVALENT AMOUNT.—For purposes of this subsection, the term 'foreign Federal tax equivalent amount' means an amount equal to the greater of—

"(A) in the case of taxable years beginning in—

"(i) calendar 1977, 95 percent of the sum of the income, war profits, and excess profits taxes paid or accrued during the taxable year to a foreign country or possession of the United States,

"(ii) calendar 1978, 94 percent of such sum,

"(iii) calendar 1979, 93 percent of such sum,

"(iv) calendar 1980, 92 percent of such sum,

"(v) calendar 1981, 91 percent of such sum,

"(vi) calendar 1982 and subsequent calendar years, 90 percent of such sum; or

"(B) an amount which bears the same ratio to the sum of the income, war profits, and excess profits taxes paid or accrued by the taxpayer during the taxable year to a foreign country or possession of the United States as the amount determined by the Secretary to have been paid under this chapter by domestic corporations for taxable years ending in the most recently ended calendar year bears to the sum of—

"(i) the amounts paid by such corporations for such taxable years under this chapter, and

"(ii) the income taxes paid by such corporations to States and political subdivisions thereof for such taxable years.

"(3) EXCEPTION.—This subsection shall not apply to amounts determined under section 907.".

(b) DEDUCTION OF NONCREDITABLE FOREIGN TAXES.—Paragraph (4) of section 275(a) of such Code (relating to certain taxes not deductible) is amended by adding before the period at the end thereof the following: "except to the extent that a credit is not allowed for such taxes under such section because of the application of subsection (g) of such section".

By Mr. EAGLETON:

S. 1408. A bill to amend the Flood Disaster Protection Act of 1973 and the National Flood Insurance Act of 1968 to permit the extension of credit secured by property in flood prone areas, to require cost benefit analyses relating to participation in the flood insurance program, to permit individual participation in the flood insurance program, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

Mr. EAGLETON. Mr. President, I send to the desk a bill to amend the National Flood Insurance Act of 1968. I ask unanimous consent that the text be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1408

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. Section 202(b) of the Flood Disaster Protection Act of 1973 is repealed.

SEC. 2. Section 201 of the Flood Disaster Protection Act of 1973 is amended by adding at the end thereof the following:

"(e) The Secretary shall determine, with respect to each tentatively identified community, the potential cost of participation by that community in the national flood insurance program and the potential losses to that community in the event of a flood absent such participation. In any case where the cost of participation outweighs the potential losses in the event of non-participation, such community may not be required to participate in the program and shall not be subject to section 202.".

SEC. 3. Section 1305(c) of the National Flood Insurance Act of 1968 is amended by adding at the end thereof the following flush sentence:

"In addition, notwithstanding the provisions

of section 1315, the Secretary shall make flood insurance available for property in other States or areas (of subdivisions thereof) where the Secretary finds that the failure of participation is not attributable to the individual making application for the insurance and that such individual has made good faith effort to encourage participation.".

SEC. 4. Section 1340 of the National Flood Insurance Act of 1968 is amended by adding at the end thereof the following:

"(c) Notwithstanding any other provision of this section, any determination made pursuant to subsection (a) shall not become effective prior to the date on which both Houses of Congress have agreed to a concurrent resolution stating in substance that they approve such determination.".

SEC. 5. Section 1346 of the National Flood Insurance Act of 1968 is amended by adding at the end thereof the following:

"(g) A contract under this section may not prohibit any pool or insurance company from offering flood insurance in the private market.".

SEC. 6. Section 3(a)(4) of the Flood Disaster Protection Act of 1973 is amended by striking out all after "mortgages or mortgage loans" and inserting in lieu thereof the following: "but shall exclude assistance pursuant to the Disaster Relief Act of 1974 (other than assistance under such Act in connection with a flood)".

SEC. 7. Section 202 of the Flood Disaster Protection Act of 1973 is amended by adding at the end thereof the following:

"(c) Nothing in this section applies to financial assistance which is being sought for the purpose of floodproofing or relocating any structure which is located in an area which has been identified by the Secretary as an area having special flood hazards.".

SEC. 8. Section 1362 of the National Flood Insurance Act of 1968 is amended—

(1) by striking out "INSURED" in the caption;

(2) by inserting "(a)" after "SEC. 1362."; and

(3) by adding at the end thereof the following new subsection:

"(b) The Secretary shall purchase any real property which is located in a flood-risk area from which the owner is required to move as a result of the application of land management and use criteria established under this title.".

SEC. 9. The Secretary of Housing and Urban Development, in conjunction with the Administrator of the Small Business Administration, the Secretary of the Army representing the Corps of Engineers, and such other officials and agencies as may be appropriate, shall carry out a study for the purpose of determining whether the standard for identifying special flood hazard areas and establishing base flood elevations which has been used in the past continues to be an appropriate standard for future application. Not later than one year after the date of enactment of this Act, the Secretary shall transmit to the President and the Congress a report on such study.

By Mr. MAGNUSON (for himself and Mr. PEARSON) (by request):

S. 1409. A bill to extend the Marine Protection, Research, and Sanctuaries Act, as amended, for 2 years; to the Committee on Commerce, Science, and Transportation.

Mr. MAGNUSON. Mr. President, I introduce for myself and Mr. PEARSON, by request, a bill to extend the Marine Protection, Research, and Sanctuaries Act, as amended, for 2 years, and ask that it be appropriately referred.

Mr. President, this bill was referred to the Committee on Commerce, Science, and Transportation pursuant to an executive communication from the Environmental Protection Agency, and I ask unanimous consent that the text of the bill and the letter of transmittal be printed in the RECORD.

There being no objection, the bill and letter were ordered to be printed in the RECORD, as follows:

S. 1409

To extend the Marine Protection, Research, and Sanctuaries Act, as amended, for two years

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 111 of the Marine Protection, Research, and Sanctuaries Act, as amended (33 U.S.C. 1420), is amended by striking "and not to exceed $4,800,000 for fiscal year 1977," and inserting in lieu thereof "not to exceed $4,800,000 for fiscal year 1977, not to exceed $1,400,000 for fiscal year 1978, and such sums as may be necessary for fiscal year 1979,".

U.S. ENVIRONMENTAL PROTECTION AGENCY,
Washington, D.C., April 6, 1977.

Hon. WALTER F. MONDALE,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: Enclosed is our proposed bill "To extend the Marine Protection, Research, and Sanctuaries Act, as amended, for two years."

The bill would extend our authorities under section 111 of the Act. These authorities expire on September 30, 1977.

This extension is suggested in order to enable us to continue the programs envisioned by the Act. We recommend that this bill be referred to the appropriate Committee for consideration, and that it be enacted.

The Office of Management and Budget advises that enactment of this legislative proposal would be consistent with the Administration's objectives.

Sincerely yours,

DOUGLAS M. COSTLE.

ADDITIONAL COSPONSORS

S. 35

At the request of Mr. BROOKE, the Senator from South Dakota (Mr. ABOUREZK), the Senator from Hawaii (Mr. MATSUNAGA), and the Senator from Michigan (Mr. RIEGLE) were added as cosponsors of S. 35, to amend section 1979 of the Revised Statutes.

S. 247

At his own request, the Senator from Kansas (Mr. DOLE) was added as a cosponsor of S. 247, to provide recognition to the Women's Air Forces Service Pilots for their service to their country during World War II.

S. 381

At the request of Mr. TOWER, the Senator from Oklahoma (Mr. BARTLETT), the Senator from Nebraska (Mr. CURTIS), the Senator from Utah (Mr. GARN), the Senator from Arizona (Mr. GOLDWATER), the Senator from Wyoming (Mr. HANSEN), the Senator from North Carolina (Mr. HELMS), the Senator from Nevada (Mr. LAXALT), the Senator from Louisiana (Mr. LONG), the Senator from Arkansas (Mr. MCCLELLAN), the Senator from Montana (Mr. MELCHER), and the Senator from North Dakota (Mr. YOUNG) are added as cosponsors of S. 381, a bill to amend the Federal Water Pollution Control Act.

S. 571

At the request of Mr. GLENN, the Senator from Indiana (Mr. BAYH) and the Senator from New York (Mr. JAVITS) were added as cosponsors of S. 571, to increase the civil rights enforcement powers of the Department of Housing and Urban Development.

S. 805

At the request of Mr. MCINTYRE, the Senator from Hawaii (Mr. MATSUNAGA) was added as a cosponsor of S. 805, the Solar and Energy Conservation Commercialization Act.

S. 806

At the request of Mr. MCINTYRE, the Senator from Connecticut (Mr. RIBICOFF) and the Senator from Hawaii (Mr. MATSUNAGA) were added as cosponsors of S. 806, the Renewable Energy and Energy Conservation Tax Act of 1977.

S. 807

At the request of Mr. MCINTYRE, the Senator from Hawaii (Mr. MATSUNAGA) was added as a cosponsor of S. 807, the Small Business Energy Research Incentives Act.

S. 819

At the request of Mr. MATHIAS, the Senator from California (Mr. CRANSTON) was added as a cosponsor of S. 819, to require appointment of interpreters for hearing-impaired individuals.

S. 840

At the request of Mr. ABOUREZK, the Senator from Minnesota (Mr. ANDERSON) was added as a cosponsor of S. 840, the Family Farm Antitrust Act.

S. 878

At the request of Mr. TOWER, the Senator from New Mexico (Mr. SCHMITT) was added as a cosponsor of S. 878, to amend the Internal Revenue Code.

S. 991

At the request of Mr. RIBICOFF, the Senator from Utah (Mr. HATCH) was added as a cosponsor of S. 991, to establish a Department of Education, and for other purposes.

S. 1072

At the request of Mr. CANNON, the Senator from Ohio (Mr. METZENBAUM) and the Senator from South Dakota (Mr. ABOUREZK) were added as cosponsors of S. 1072, to establish a universal voter registration program.

S. 1119

At the request of Mr. YOUNG, the Senator from Kansas (Mr. DOLE) was added as a cosponsor of S. 1119, to amend the Food Stamp Act of 1964.

S. 1162

At the request of Mr. INOUYE, the Senator from Hawaii (Mr. MATSUNAGA) was added as a cosponsor of S. 1162, to repeal section 222 of the Communications Act of 1934.

S. 1168

At the request of Mr. ABOUREZK, the Senator from Minnesota (Mr. ANDERSON) was added as a cosponsor of S. 1168, relating to payments to certain local governments by the Secretary of the Interior.

S. 1174

At the request of Mr. DOLE, the Senator from Texas (Mr. TOWER) was added as a cosponsor of S. 1174, the Critical Lands Resource Conservation Act of 1977.

S. 1262

At the request of Mr. RIBICOFF, the Senator from Massachusetts (Mr. KENNEDY), the Senator from New Hampshire (Mr. DURKIN), and the Senator from Hawaii (Mr. MATSUNAGA) were added as cosponsors of S. 1262, to establish an independent consumer agency.

S. 1287

At the request of Mr. GRAVEL, the Senator from Indiana (Mr. BAYH), the Senator from Minnesota (Mr. HUMPHREY), and the Senators from Montana (Mr. METCALF and Mr. MELCHER) were added as cosponsors of S. 1287, the Indian and Alaska Native Housing and Community Development Act.

S. 1295

At the request of Mr. TOWER, the Senator from North Carolina (Mr. HELMS) was added as a cosponsor of S. 1295, to reform the food stamp program.

S. 1307

At the request of Mr. THURMOND, the Senator from Virginia (Mr. HARRY F. BYRD, JR.) was added as a cosponsor of S. 1307, to deny title 38 benefits to G.I.'s whose discharges are upgraded under the Revised Standards.

S. 1318

At the request of Mr. MATSUNAGA, the Senator from Hawaii (Mr. INOUYE) was added as a cosponsor of S. 1318, to permit the State of Hawaii to use the proceeds from the sale, lease, or other disposition of certain real property for any public purpose.

S. 1362

At the request of Mr. ROBERT C. BYRD, the Senator from Tennessee (Mr. BAKER) and the Senators from Kentucky (Mr. HUDDLESTON and Mr. FORD) were added as cosponsors of S. 1362, to amend the Small Business Act.

SENATE RESOLUTION 153

At the request of Mr. METCALF, the Senator from Tennessee (Mr. BAKER) was added as a cosponsor of Senate Resolution 153, relating to radio and television coverage of Senate proceedings.

SENATE JOINT RESOLUTION 9

At the request of Mr. BROOKE, the Senator from New York (Mr. MOYNIHAN) was added as a cosponsor of Senate Joint Resolution 9, to designate Martin Luther King Day.

AMENDMENT NO. 185

At the request of Mr. RIEGLE, the Senator from Minnesota (Mr. HUMPHREY), the Senator from Iowa (Mr. CLARK), the Senator from Kansas (Mr. DOLE), the Senator from Vermont (Mr. LEAHY), and the Senator from Tennessee (Mr. SASSER) were added as cosponsors of Amendment No. 185, intended to be proposed to S. 275, the Food and Agriculture Act of 1977.

AMENDMENT NO. 191

At the request of Mr. MOYNIHAN, the Senator from Pennsylvania (Mr. HEINZ) and the Senator from New York (Mr. JAVITS) were added as cosponsors of Amendment No. 191, intended to be proposed to H.R. 3477, the Tax Reduction and Simplification Act of 1977.

AMENDMENT NO. 207

At the request of Mr. PROXMIRE, the Senator from Ohio (Mr. METZENBAUM) was added as a cosponsor of Amendment No. 207, intended to be proposed to Senate Concurrent Resolution 19, the first budget resolution.

SENATE RESOLUTION 154—SUBMISSION OF A RESOLUTION AUTHORIZING CERTAIN PRINTING

(Referred to the Committee on Rules and Administration.)

Mr. RIBICOFF submitted the following resolution:

S. RES. 154

Resolved, That the committee print of the Committee on Governmental Affairs entitled "U.S. Participation in International Organizations" be printed as a Senate document, and there be printed two thousand additional copies of such document for the use of the committee.

AMENDMENTS SUBMITTED FOR PRINTING

TAX REDUCTION AND SIMPLIFICATION ACT OF 1977—H.R. 3477

AMENDMENT NO. 224

(Ordered to be printed and to lie on the table.)

Mr. GRIFFIN submitted an amendment intended to be proposed by him to the bill (H.R. 3477) to provide for a refund of 1976 individual income taxes and other payments, to reduce individual and business income taxes, and to provide tax simplification and reform.

AMENDMENTS NOS. 225 AND 226

(Ordered to be printed and to lie on the table.)

Mr. CHAFEE (for himself and Mr. PELL) submitted two amendments intended to be proposed by them jointly to the bill (H.R. 3477), supra.

AMENDMENT NO. 228

(Ordered to be printed and to lie on the table.)

Mr. MOYNIHAN (for himself, Mr. YOUNG, Mr. STAFFORD, Mr. MAGNUSON, Mr. METCALF, Mr. JAVITS, Mr. SCHWEIKER, Mr. WILLIAMS, Mr. HELMS, Mr. ANDERSON, Mr. GRAVEL, Mr. SCHMITT, Mr. BURDICK, Mr. MELCHER, Mr. CHILES, Mr. SASSER, Mr. ALLEN, Mr. RIEGLE, Mr. JACKSON, Mr. GRIFFIN, Mr. HASKELL, Mr. LEAHY, Mr. BENTSEN, and Mr. STONE) submitted an amendment intended to be proposed by them jointly to the bill (H.R. 3477), supra.

AMENDMENT NO. 229

(Ordered to be printed and to lie on the table.)

Mr. PACKWOOD. Mr. President, today I am submitting for myself and Senators MATSUNAGA and NUNN, an amendment to H.R. 3477, the Tax Reduction and Simplification Act of 1977. This amendment permits savings and loans and mutual banks to use the full investment tax credit. Currently these taxpayers are limited to one-half of the investment tax credit.

The one-half reduction for savings and loans and mutual banks was created in 1962 with the original investment tax credit. Then, because of the bad debt reserve, savings and loans paid very little taxes.

In 1962 and 1969, the bad debt reserve was substantially restricted. The full effect of the 1969 restrictions will not be felt until 1979.

Because of these new restrictions, savings and loans now have an effective tax rate of about 26 percent. This is comparable to the effective rate of tax paid by the major U.S. corporations, and higher than commercial banks.

Yet, savings and loans still get only one-half the investment tax credit—and commercial banks get the full credit. The Packwood-Matsunaga amendment would eliminate this anachronistic rule from the Internal Revenue Code.

The revenue loss of this amendment is $10 million per year if the investment tax credit is 10 percent, and $12 million if it is 12 percent.

This issue was before the Ways and Means Committee when it considered H.R. 3477. H.R. 3477, as proposed by President Carter, contained an optional 2-percent additional investment tax credit. This meant the general issue of the investment tax credit would be before the Ways and Means Committee. Because of this, the U.S. League of Savings Associations submitted testimony to the Ways and Means Committee in favor of the substance of the amendment we are introducing today. However, the Ways and Means Committee deleted the investment tax credit feature from the bill, and it was not reinstated by the House of Representatives. Therefore, no testimony was submitted to the Senate Finance Committee on this issue.

Mr. President, I ask unanimous consent that the amendment be printed in the RECORD.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

AMENDMENT NO. 229

At the appropriate place, insert the following new section:

SEC. . REPEAL OF CERTAIN LIMITATIONS ON THE INVESTMENT CREDIT OF CERTAIN MUTUAL SAVINGS BANKS, ETC.

(a) IN GENERAL.—Section 46(e) (relating to limitations with respect to certain persons) is amended—

(1) by striking out subparagraph (A) of paragraph (1) thereof and redesignating subparagraphs (B) and (C) of paragraph (1) thereof as subparagraphs (A) and (B);

(2) by striking out subparagraph (A) of paragraph (2) thereof and redesignating subparagraph (B) and (C) of paragraph (2) thereof as subparagraphs (A) and (B); and

(3) by striking out "subparagraph (B)" in the last sentence of paragraph (2) thereof and inserting in lieu thereof "subparagraph (A)".

(b) The amendments made by subsection (a) shall apply to taxable years beginning after the date of the enactment of this Act.

NATIONAL SCIENCE FOUNDATION AUTHORIZATIONS—S. 855

AMENDMENT NO. 227

(Ordered to be printed and to lie on the table.)

Mr. HATCH (for himself, Mr. BURDICK, Mr. EASTLAND, Mr. ROTH, Mr. THURMOND, Mr. GARN, Mr. MCCLELLAN, Mr. MCCLURE, and Mr. METCALF) submitted an amendment intended to be proposed by them jointly to the bill (S. 855) to authorize appropriations for the activities of the National Science Foundation, and for other purposes.

Mr. HATCH. Mr. President, I am submitting an amendment to the National Science Foundation bill, S. 855, which would require that not less than one-quarter of 1 percent of the total program funds—about $2.1 million—be paid to qualified individuals and institutions, based on merit proposals, in each State and the District of Columbia.

In the 1950 Act establishing the National Science Foundation, Congress clearly mandated that the NSF should "avoid undue concentration" in carrying out its function (Public Law 81-507, Sec. 3 (b)).

Actual figures show that over 40 percent of all NSF program funds are being allocated to only four States. The fiscal year 1978 authorization asks $898 million, of which $850 million are funds authorized for program activities. It is my belief that for an authorization of that amount, for which all U.S. taxpayers are expected to contribute, there should be a more equitable distribution of program funds.

Passage of the amendment I am submitting will be positive action by Congress to insure the fair distribution of funds to dedicated researchers in all 50 States and the District which was intended by the NSF Act of 1950.

NOTICES OF HEARINGS

RESCHEDULING OF HEARINGS

Mr. JOHNSTON. Mr. President, the hearings on Federal policy with respect to the pricing of crude oil to be produced on the Alaskan North Slope which had been scheduled for Tuesday, May 3, 1977, by the Subcommitee on Energy Conservation and Regulation of the Senate Committee on Energy and Natural Resources have been rescheduled for Monday, May 9. This hearing will commence at 9 a.m. in room 3110 of the Dirksen Senate Office Building. Questions concerning this matter should be addressed to Betsy Moler or Ben Cooper at 224-0611.

NOMINATION HEARING

Mr. WILLIAMS. Mr. President, I wish to announce that the Committee on Human Resources has scheduled a hearing on Monday, May 2, 1977, at 10 a.m. in room 4232 Dirksen Senate Office Building, on the nomination of Richard C. Atkinson of California to be Director of the National Science Foundation.

Persons wishing to testify or submit statements, please contact: Lisa Walker, room 6302 of the committee staff.

NUCLEAR NONPROLIFERATION AND POSTAL SERVICE

Mr. GLENN. Mr. President, the Subcommittee on Energy, Nuclear Proliferation, and Federal Services will hold 3 days of hearings on S. 897, the Nuclear Nonproliferation Act of 1977.

On April 29, hearings will be held at 10 a.m. in room 6226, Dirksen. On May 6, hearings will be held at 10 a.m. in room 3302, Dirksen. On May 10, the subcommittee's hearings will be held in room 3302 Dirksen at 10 a.m.

Also scheduled by the Energy, Nuclear Proliferation, and Federal Services Subcommittee is a hearing on May 2, in room 3302 on the report of the Special Commission on Postal Service.

Additional hearings on S. 897 and on the Commission on Postal Service will be announced at a later date.

ADDITIONAL STATEMENTS

PRESIDENT CARTER'S UNWISE DISCHARGE REVIEW PROGRAM

Mr. HARRY F. BYRD, JR. Mr. President, late last month the Carter administration announced plans to implement a program for upgrading the undesirable and general discharges given to some Vietnam-era veterans.

This program has been described as one of "forgiveness and compassion" by the Carter administration and is now being put into effect.

I have studied the details of this program and I find that the Carter program goes far beyond forgiveness and even beyond compassion. It will not only forgive the many individuals who received less than honorable discharges but will reward them at the taxpayer's expense.

The Carter program will automatically entitle to Veterans' Administration benefits all those who have their discharges upgraded, and could cost the taxpayer as much as $230 million annually.

Under the Carter program former servicemen guilty of offenses that range from the very serious to the petty will all receive the same assemblyline treatment. They will receive an automatic upgrade of their discharge regardless of the seriousness of the offense.

The exceptions are those persons separated from the service for reasons involving violence, criminal intent, use of force, or desertion from a combat zone.

This Carter administration program goes far beyond forgiveness and compassion for it not only erases an individual's record of less than honorable service but, in fact, requires the U.S. Government to certify that the individual's service was "honest and faithful."

I do not believe that the United States should give a testimonial to those individuals—and that is what the discharge paper is—"a testimonial of honest and faithful service."

Furthermore, once an individual's discharge has been upgraded, the individual will then become eligible for veteran's benefits—a reward at the taxpayer's expense. These benefits would include such things as:

Home loan guarantees;

G.I. education benefits;

Use of veterans' hospitals;

Preferential hiring for Federal jobs; and

Veterans pension programs and more.

The Department of Defense has made a preliminary estimate that as many as 173,000 individuals, who are not now eligible, would be made eligible for VA benefits when this program is carried out.

Using figures from the Veterans' Administration for Vietnam era veteran usage of VA benefits, it is estimated that the Carter discharge review program could cost the taxpayer as much as $230 million per year if every eligible individual were to utilize these benefits.

I believe the American people are capable of great forgiveness and great compassion, and I believe there is room for compassion for those individuals concerned.

But this program cheapens the honorable discharges of those millions of Americans who served honorably during the Vietnam era; and it is a precedent which may have serious negative consequences in the years ahead.

Further, it goes beyond forgiveness and provides a very tangible reward for less than honorable service.

Senator THURMOND of South Carolina has introduced a bill which would mitigate some of the harshest effects of this ill-advised program and I want to indicate my strong support for that bill—S. 1307.

Senator THURMOND's bill, if passed, would have the effect of preventing automatic entitlement to veterans' benefits to those individuals receiving an upgraded discharge under the relaxed standards of the Carter administration.

It would not deny entitlement to benefits to anyone who can qualify under the standards in existence prior to the Carter administration program, and it would not prevent the upgrading of discharges according to President Carter's newly established standards.

It would, however, prevent the American taxpayer from footing the bill for an unjust reward for service that has not been rendered.

I urge my colleagues to support S. 1307.

DEFINING GENOCIDE

Mr. PROXMIRE. Mr. President, genocide means any of the following acts with intent to destroy, in whole or in part, a national, ethnical, racial, or religious group, as such:

First. Killing members of the group;

Second. Causing serious bodily or mental harm to members of the group;

Third. Deliberately inflicting on the group conditions of life calculated to bring about its physical destruction in whole or in part;

Fourth. Imposing measures intended to prevent births within the group; and

Fifth. Forcibly transferring children of the group to another group.

There is no question, at least in my mind, that all of the aforementioned items are immoral acts and should be legally condemned by the United States. I cannot understand why the Senate has failed to ratify the Genocide Convention, a treaty which simply denounces the mass murder of any particular group because of their beliefs or origin.

Some opponents of the Genocide Convention say that the term genocide is too general, extending to the violent ex-

pression of prejudice against individual members of groups. This is not so. It is clearly written in the treaty that genocide refers to those acts committed "with the intent to destroy the entire group concerned," not just certain individuals. As Senator McMahon said in 1950 in a Genocide Subcommittee hearing:

In other words, an action leveled against one or two of a race or religion would not be, as I understand it, the crime of genocide. They must have the intent to go through and kill them all.

Other opponents claim that the term genocide is too narrow, covering only the destruction of entire groups and not the murders of parts of a group that are obviously intended to lead to the abolition of the entire group. Again, this is clearly not the case. Then Deputy Under Secretary of State Dean Rusk stressed in 1950 that—

The United Nations negotiators felt that it should not be necessary that an entire human group be destroyed to constitute the crime of genocide, but rather that genocide meant the partial destruction of such a group with the intent to destroy the entire group concerned.

It is obvious that genocide is very clearly defined in the treaty and that those who fail to ratify the Convention because of the supposed uncertainty of the term do so on faulty grounds. Mr. President, there are no valid arguments whatsoever against the Genocide Convention. We must ratify the treaty now.

THOSE MAGNIFICENT WOMEN IN THEIR FLYING MACHINES

Mr. GOLDWATER. Mr. President, with hearings on the Women's Air Force Service Pilots planned by the Senate Veterans' Affairs Committee for May 25, I am happy to call to the attention of my colleagues an excellent article which explains why I, and 12 other Senators, have joined in sponsoring legislation providing veterans status to these ladies.

The article, which appears in this month's issue of Viva magazine, accurately depicts the extraordinary aviation skills the women pilots contributed to the war effort during World War II. The dangers and difficulties of their task, the subtle and not-so-subtle discrimination which the girls encountered simply because they were women, and the indifference with which their organization was treated by their Government at the close of the war are all described with clarity and eloquence in the article.

Mr. President, so that my colleagues may have this factual history of the WASP available before the congressional hearing, I ask unanimous consent that the article by Sally Van Wagenen Keil, in the May 1977 issue of Viva be printed in the Record.

There being no objection, the article was ordered to be printed in the Record, as follows:

THOSE MAGNIFICENT WOMEN IN THEIR FLYING MACHINES

(By Sally Van Wagenen Keil)

On a spring afternoon in 1943, twenty-six-year-old Jill McCormick revved the engine of an army-air-force A–24 dive bomber on the runway of Old Harbor Air Base in Maryland. Taxiing into position, she pushed the throttle to full power, and, with a roar, the dive bomber began to roll. As the ship lifted smoothly off the runway, Jill breathed a sigh of relief and then exhilaration—the typical pilot's reaction in the first moments of achieving the miracle of flight.

Three thousand miles away, that same year, twenty-four-year-old Helen Schaefer, in the cockpit of a P–40 fighter plane, circled San Francisco Bay on her approach into an Oakland military air base. The P–40, a rough-and-ready, 1,150-horsepower single-engine pursuit aircraft, bore the distinctive insignia of the growling Bengali tiger on its cowling—the instantly recognizable markings of Gen. Claire Chennault's famous Flying Tigers. But here was Helen Schaefer, en route from Buffalo to Oakland, flying the first leg of its long journey to combat over the Hump in China.

A year later, twenty-five-year-old Dawn Rochow held her B–17 Flying Fortress steady at 3,000 feet over the Gulf of Mexico. Male gunners in the bomber's turrets hammered rounds of fifty-caliber bullets at muslin targets towed behind a sister ship 400 yards away. When the gunners had finished, Dawn barked over the intercom, "Get ready to climb!" As the gunners reloaded, pilot Rochow lifted the nose of the lumbering four-engine bomber and forced the ship toward 22,000 feet. As the altimeter passed 20,000, the gunners adjusted their oxygen masks to compensate for the ever rarified atmosphere and tested their machine guns against the suddenly arctic temperatures.

Military pilots Jill McMormick of New York City, Helen Schaefer of Cincinnati, Ohio, and Dawn Rochow of Rochester, New York remain three of America's better-kept military secrets. Along with 1,100 other women pilots during World War II, they were members of a special unit of military aviators whose existence was virtually stamped top secret by the male military hierarchy in the army air corps, and which, three decades later, remains a subject of political controversy. They were called Women's Air Force Service Pilots, or WASPs, and were an historic military experiment in the utilization of women in the war effort. The success of the experiment was so extraordinary that even today, significant sectors of America's military and political establishment seemingly seek to deny that the WASPs ever existed.

The WASPs began as an official military program to determine the feasibility of substituting women pilots in domestic flying missions in order to release men for combat duty. In point of fact, from September 1942 until they were disbanded in December 1944, WASPs flew over 60 million miles crisscrossing the United States and Canada in every single type of airplane manufactured in the United States for the war effort, including the colossal B–29 Superfortress, the lightning-fast P–51 Mustang fighter, and even the experimental P–59X, the first jet in America's aviation history.

WASP ferry pilots flew airplanes hot off the factory assembly line to airbases and ports of embarkation for shipment overseas to combat zones. WASPs were also stationed on air-corps training fields across the country and were frequently required to test-fly airplanes just out of the repair shop. In addition, they were heavily involved as staff pilots in every training mission designed to prepare males for air-combat duty. WASPs taught men how to strafe, drop bombs, lay blankets of smoke, and track enemy aircraft with blinding searchlights. They taught gunners to shoot at airplanes from turrets and tanks and from batteries of ground artillery. WASPs worked in intelligence against sabotage. As evidence of the reality of their immediate involvement in war, thirty-eight WASPs crashed to their deaths flying for their country.

But perhaps the most incredible WASP assignment was to make their male counterparts act like men. In this role, the military authorities asked the WASPs to tackle some of the relatively untested new airplanes that America's assembly lines were pumping out like late-model cars—which many men were understandably leery of flying. The B–26 was given the name of the "Flying Prostitute"—its short wingspan, the joke went, appeared to give it no visible means of support. It was also ominously known as the "Widow Maker." The P–39 fighter—with its engine behind the cockpit, auxiliary tanks in the belly, and center of gravity far to the rear—required innovations in landing techniques that caused dozens of male pilots to crash during initial flights. WASPs, however, adapted to the tricky nuances of this odd fighter and thereby set an example for their male counterparts.

The B–29, introduced in the summer of 1944, was, in its time, the biggest ship anyone had ever seen. It inspired tremors of distrust among the men who faced the vast expanse of Pacific Ocean between American-held islands and targets in Japan. But twenty-one-year-old WASP Dora Doughterty Srother flew the B–29 in its very early days. "This was a demonstration flight to show that it was so easy even a woman could fly it," said Dr. Strother, now chief of Bell Helicopter's Human Factors Engineering Group in Fort Worth, Texas. Her B–29, called *Lady Bird*, wore the WASP mascot "Fifinella"—designed for the group by Walt Disney—painted on the side. "Another WASP and I were selected and checked out by Col. Paul Tibbets, who dropped the atomic bomb on Hiroshima. He had seen two girls fly a B–26 into a base in England, and the reaction among the men had been just electric. They all had to fly it, because they were chicken if they didn't. So when the brass assigned Tibbets the task of introducing the B–29, he said, 'I need two girls to fly that.' We flew from Birmingham, Alabama to New Mexico, stopping several times en route. Word really got around in a hurry." Indeed, the legend of the WASPs and the new B–29 got around so fast and created such a stir that high brass put an end to their B–29 flights—but not before the "girls" had once again made their point.

Six months later, however, women pilots were no longer flying for the AAF at all. The story is a bit complicated, but grounding the WASPs was a relatively easy matter. Although WASPs enjoyed flight-officer status, they were accorded only civil-service rank. Unlike the men they flew with, they were denied military hospitalization and insurance, and their salaries were pegged a full 20 percent lower than men's. The matter was brought to a head in 1944, when H.R. 4219, a bill to accord full military status to the WASPs, was introduced in Congress by Rep. John Costello of California. For a variety of reasons, Congress responded to the bill as if the seniority principle—or their manhood—were being attacked. The debate on the floor of the House was so strident that even the WASPs' most ardent supporters—Gen. H. H. "Hap" Arnold, commanding general of the army air forces, and Director of Women Pilots Jacqueline Cochran, founder (with airline pilot Nancy Harkness Love) of the WASPs—knew the time had come to abandon ship. The idea of female pilots had been shot down by the heavy guns in Congress.

Today, thirty-three years later, women are again flying for the air force, and just recently legislation has been introduced to provide veterans' benefits to former WASPs. Now in their fifties, these women are World War II veterans in every sense but in law, because they are women.

As General Arnold said, addressing the last WASP graduating class on December 7, 1944, "You and more than 900 of your sisters have shown that you can fly wing tip to wing tip

with your brothers. If there was a doubt in anyone's mind that women can become skillful pilots, the WASPs have dispelled that doubt. We of the AAF are proud of you. We will never forget our debt to you." General Arnold's emotional endorsement was, alas, largely ignored by most of America's male decision makers. A World War I "ace," a longtime friend and admirer of Amelia Earhart and a visionary military strategist, General Arnold knew what women pilots could do and threw the massive power of his office behind Jacqueline Cochran and her WASPs. But even General Arnold could not defeat the army of men who opposed the idea of women doing *their* jobs, and thus, to this day, the debt to the WASPs has yet to be paid.

Interestingly, these WASP pioneers were not the obvious, preselected "types" one might assume. Rather, they personified the consummate all-American young woman of the 1940s. Jill McCormick was an assistant buyer of teenage apparel in New York. Dora Doughterty Strother was a history student at Northwestern University. Other WASPs were teachers, actresses, midwives, nurses, models (one posed for the Dragon Lady in the comic strip "Steve Canyon"), stunt women in Mack Sennett and Busby Berkeley films, and wives with husbands overseas. But they all had one thing in common: they wanted to fly. In the era of barnstormers and biplanes, the romance of flying was *not* solely in the hearts of men.

Betty Phillips Whiting was seven years old when Charles Lindbergh made his historic solo flight across the Atlantic in 1927. "A newspaper boy came down our street in Indianapolis selling "extras," she said as we talked in the back room of her bicycle shop in San Jose, California. "All the neighbors were out on their porches, and I sensed the excitement of the adults. After that I always wanted to fly. Every time a plane went over, I asked my mother, 'Is that Lindy?' I can see Lindbergh riding down the street, up on the backseat of a touring car. Everybody was waving and cheering, and the sunshine was streaming through his hair. I thought he was right up there with the angels." Betty Whiting became a WASP test pilot.

Betty Gillies received her pilot's license in 1929. "I was in nurse's training at Presbyterian Hospital in New York," she said over lunch in San Diego. "I was having difficulty trying to catch a certain navy aviator, when I read an article by Amelia Earhart entitled 'You Too Can Fly.' So I said, 'By golly, that's not a bad idea at all.' I'd get off duty and break all speed records driving out to Roosevelt Field, have half an hour of flying, dash back to the wards, and tell my patients what I'd learned that day." Betty Gillies not only became a WASP, but she also married her navy aviator.

Lucille Friesen McVey grew up on a wheat farm in a German community in Kansas. "I couldn't see just getting married and having babies like my sisters," said the WASP B–17 pilot as we talked in her home in Novato, California. "That was probably part of why I wanted to fly. I had to get out, you see. I had this feeling I had to get out and *do* things. It was always the greatest sensation once I got that airplane up in the air. I would think, 'Boy, I got it up!' It was just heavenly to be up in that great big wide sky."

COCHRAN'S CONVENT

The women chosen to be WASPs passed the same stringent physical and aptitude exams as did men fighter pilots (though, unlike male recruits, WASPs had to have at least thirty-five hours of previous flying experience). They also submitted to extensive personal interviews by Director of Women Pilots Jacqueline Cochran, or by one of her staff from Washington. Many endured thorough security investigations of their families and backgrounds. Once accepted in this select coterie of female talent, they then had to pay their own way to Avenger Field, the WASP training base in Sweetwater, Texas.

At Avenger Field—affectionately called "Cochran's Convent"—each new class of WASP trainees began a six-month course in learning to fly the "army way." The new WASP recruits embraced the army *esprit de corps*. They loved the life. The army had no flight clothes for women so the WASPs willingly accepted ill-fitting GI overalls, laughingly dubbed "zoot suits," which they then wore into the showers in a stubborn effort to get them to shrink. Songs were composed to familiar tunes. To "Bell-bottom Trousers" they sang, "Zoot suits and parachutes and wings of silver, too/He'll ferry planes like his mama used to do. . . ." After completing their solos in the primary, basic, and advanced trainer airplanes, they threw each other into a reflecting pool called the "Wishing Well," zoot suits and all—splashing right onto a brass plaque affixed to the bottom that read, "To the Best Women Pilots in the World, from Gen. H. H. 'Hap' Arnold."

The "army way" of dealing with sexuality was to keep trainees physically exhausted. WASPs had six-day weeks. After four hours of flying instruction, they spent five hours in ground school studying physics, math, navigation, weather, and engine maintenance. Then they were called out for an hour of calisthenics or a rousing game of baseball or volleyball. Their feet grew a size larger from marching.

The WASPs were at Cochran's Convent to work—and to prove themselves. Twice during each phase of training, stern, often disgruntled military check pilots flew into Avenger Field to test the women trainees. If a WASP failed her check ride, she was given a pink slip. Two pink slips and she washed out. "Each month, I'd put $36 in a bank account to pay my fare back to St. Louis," said WASP Dolores Meurer Reed, a balloonist and Powder Puff Derby veteran who owns a ranch in New Mexico. "At the end of the month, I'd drink it up to celebrate. There was one check pilot who washed out so many WASPs that we called him Captain Maytag. Captain Maytag took me up once for a check ride. When we landed he had one comment: 'Well, I guess you won't kill yourself.' "

GUINEA PIGS AND CLAY PIGEONS

After graduating from Sweetwater, WASPs excitedly reported for duty to air bases across the country. But once out of Cochran's Convent, WASPs found that America's vast and intricate war machine had its bugs. WASP Peg McNamara Slaymaker (whose brother, future Secretary of Defense Robert McNamara, had sent her CPT forms after he had failed the eye exam) was assigned as a test pilot to Craig Field, Selma, Alabama. "We went to report for duty, and the commanding officer was on the telephone," Peg recalled from her home in Tiburon, California. "Finally there was a pause in his conversation, and he looked up and said, 'What do you ladies want?' We said, 'We're reporting. We're pilots.' He dropped the telephone and fell out of his chair. He didn't even know that women flew. They didn't have any facilities for women pilots, so he put us in the nurses' quarters and gave us the choice of eating at the officers club or with the nurses. Obviously we chose the officers club."

Women pilots were not expected by airbase control towers either. One spring day in 1944, WASP ferry pilot Carol Fillmore flew one of America's hot new P–51 fighters into an all-male training field in Georgia. "I needed gas, so I got near a base and called in for landing instructions," Carol said as we sat in the living room of the house she designed overlooking San Francisco Airport. "No one answered, so I got in the pattern and kept calling and calling, and still no one answered. Finally a voice with a southern accent said, 'Will the lady who's trying to get in, please stay off the air. We're trying to bring in a P–51!' 'For your information,' I said, 'the lady on the air is in the P–51.' I made a beautiful landing and got over to the flight line and everyone was gawking."

The WASPs adapted to such reactions. But they also had to adapt to the airplanes, built, of course, for men. Betty Gillies, barely five feet tall, had wooden chocks specially made to fit over the rudder pedals so that her feet could reach them. Even WASPs who were five foot eleven, like Adele Beyer, discovered that certain airplanes raised havoc with female anatomy. "The AT–10 attack bomber had a special landing quality," she said. "The pilot and copilot rode tandem with dual controls. My instructor was in the back telling me over the intercom what he was doing as I followed the written tech orders. We came around to land, and he had to pull back hard on the stick. My controls did the same, of course, and the stick slammed right into my chest. After a couple of days of this, I got up enough nerve to tell him my problem, and he ordered special chest protectors."

In case after case, WASPs dispelled all doubts about their abilities to fly even the heaviest bombers. For example, if one of the engines went out in a twin-engine B–25, the pilot in command needed considerable strength of body and presence of mind to correct for the torque and keep the plane flying level. Men assumed that women were much too frail to handle the task, until WASP Margaret Kerr Boylan proved them wrong. "We were taking our instrument training in the 25," she said in her office at the Federal Aviation Administration in Washington. "I said if we're getting our instrument rating in these planes, why can't we check out as first pilot in them? One of the officers said, 'Well, we're not sure that women can hold the B–25 in a single-engine procedure. I said, 'There's one way to find out.' We went up, and 200 feet off the ground he cut out an engine. Well, standing up on the rudder was all I needed to do."

WASPs took their assignments to dangerous training missions with the same adventurous attitude. Col. W. Bruce Arnold, Gen. "Hap" Arnold's son, was a young artillery officer in North Carolina, where women towed targets. (Colonel Arnold has now taken over for his father to champion the WASPs in this spring's legislative efforts.) "They had positions for batteries of antiaircraft guns all along the beach," he recalled. "So the gal would start at one end of the beach, with the sleeve target out behind her, and fly at a specific altitude for the big guns, then fly down lower for the small-arms guys. Officer instructors would walk up and down the beach shouting to the gunners, 'More lead! More lead!' "

"I got a couple of slugs in the fuselage," said Dora Doughterty Strother, one of the WASP "clay pigeons," as they called themselves. "But I don't think we were frightened. The major thing was that we were finally contributing. We were at all-out war."

But the WASP experiment was more than just flying airplanes and missions. The WASPs also pioneered in a "prop set" lifestyle that only recently seems commonplace. As women officers stationed on air bases where the female/male ratios were 1–100, WASPs enjoyed outstanding social lives. Pilot Frances Green met her future husband when gunners from the B–17 she was piloting shot at the target he was towing behind his B–26. "Who are you?" he asked over the radio. "I'm Greenie," she said. "I'll meet you on the flight line. I'm blond." For the next few weeks they courted curled up in the plexiglass nose of a B–17, enjoying the panoramic view as the plane flew over the Gulf of Mexico.

Their new marriage underwent a few bumps, however, when Greenie took off on a ferrying trip. "On the way back, I ran into a storm," said Greenie, now a retired police

inspector in Salt Lake City. "Then my radio went out. I tried to follow the coastline, but all I could see were whitecaps. The gas gauge was bouncing down lower and lower when suddenly I saw a great big long strip with lights. I thought, 'There is a landing strip!' I went down to look it over and saw something shining on the surface. It was an open oil-storage tank elevated about thirty feet in the air and marked with lights. If I'd been ten feet lower, my exhaust flames would've blown up me and half of Florida. I turned back toward home, and the minute my wheels hit the runway, the engine went blub, blub, blub and died. George came racing out in a jeep saying, 'Where in hell have you been?'" After the war, Greenie was told by her husband, "There is going to be one pilot in this family, and it is going to be me."

THE BATTLE OF THE WASP

When the WASP bill was first introduced in Congress in the spring of 1944, the WASPs prepared themselves to be militarized. More than 400 of the women successfully completed an officer's-training course in Orlando, Florida, where they learned military law, chemical warfare, military flow charts, and various survival techniques—including how to cook rattlesnake meat.

But the "Battle of the WASP" (a term coined by columnist Drew Pearson, an ardent WASP opponent) had already begun. WASP ferry pilot Jill McCormick encountered the prevailing sentiments firsthand while waiting in Raleigh for an airline connection back to her home base after delivering a P-47 fighter. "The town was full of troops," she said in West Lafayette, Indiana, where, after serving with the WASPs, she founded the Department of Aviation Technology at Purdue University. "I bought a paperback, went into a hotel lobby, and sat down to read. Before I knew it, a group of GIs and sailors spotted me in my uniform. They came up to me and started saying what a slut I was, what a crummy organization I was in. Finally an officer came over and shooed them away. He and I talked for a while, and then the bus to the airport was announced. He looked disappointed. 'You know,' he said, 'I was trying to get my nerve up to ask you to come up to my room."

Rep. James Morrison, a freshman congressman from Louisiana hot on a reelection issue, began his anti-WASP campaign with an article entitled "Wanted—Female Impersonators," which he inserted in the CONGRESSIONAL RECORD in April 1944. "How about some of these thirty-five hour female wonders swapping their flying togs for nurses' uniforms?" said the article. "But that would be downright rub-and-scrub work—no glamour there—and we do mean glamour."

The House Committee on Military Affairs favorably reported H.R. 4219, having heard its sole witness, General Arnold, say that the AAF needed the WASPs. Secretary of War Henry L. Stimson wrote to the committee, expressing support of the bill on behalf of President Roosevelt. But in June, as the Allies marched into Cherbourg, Congress waged war on the WASPs.

"There is absolutely no need for girl pilots in the army at this time," said Representative Morrison. Said another congressman, "The army says, 'You cannot pass the examination, so out you go, but we will uniform these women and let them take your places.' Is that not a fine situation?"

Representative Costello gallantly defended the WASPs." . . . If you like to be covered with grease," he said, "if you like to sweat out piloting an airplane through stormy weather from one coast to another, then vote against this bill. If they are doing the work that calls for the grade and calls for the pay, they are entitled to it . . . I do not think that a woman . . . should be discriminated against."

But on June 21, 1944, one week after passage of the GI Bill of Rights, the House voted down the WASP bill by nineteen votes. After four terms in Congress, Representative Costello was later defeated in his fifth primary bid, because of—according to one newspaper report—his support of the WASPs.

Denied congressional authorization, the WASPs were disbanded on December 20, 1944. "It was just torture," remembers WASP Jean Landis, a physical-education professor at San Diego State University. "It was like a coach saying, 'Clean out your locker, you're through.'" WASPs offered to continue flying for a salary of a dollar a year, but the AAF said, "Thank you, but no."

Though the WASPs were some of America's more experienced pilots, few flying jobs were available to women. Betty Phillips Whiting tried to recapture her idol Lindbergh's pioneer spirit by becoming a bush pilot in Canada. Frances Green, whose husband was sent overseas, became a wing walker with Sammy Mason and the Hollywood Hawks, Jean Landis tried ferrying war-surplus trainers from Wickenburg, Arizona, to Portland, Oregon—until she found out why she had been offered the job. On her first trip, her engine quit, almost sizzling her alive as she snapped two power lines. Her carburetor iced up over the mountains into Portland, and her hands nearly froze in the open cockpit. "I took my teeny-weeny check for this hazardous, harrowing experience, and I came home. I said, 'If this is all that's left for women in flying, I quit.' It bothered me for a couple of years. I still had this terrible passion to fly. But there just wasn't anything available for women, so I thought, 'Quit torturing yourself; get interested in something else.' But nothing will ever match the years in the WASPs—nothing."

THE YEAR OF THE WASP

Today, the children of WASPs are living lives their mothers could only dream of. Western Airlines' first woman pilot is twenty-eight-year-old Terry London, daughter of WASP Barbara Erickson London (the only woman during World War II to receive the prestigious Air Medal). "I was still in the womb, and I had more hours in the air than most people," said Ms. London, who flies 737s out of San Francisco Airport. "My mother flew until she coudn't pull the stick back any more. Having an air-force pilot for your mother is a great motivation. Even now it still impresses people."

How is a woman pilot received today? "I get strange looks," said Ms. London. "But no one has questioned my ability. A couple of mothers have even brought their little girls up to the cockpit, saying, 'See what you can do?'"

Today, women are flying with the army and the navy. In September 1976, ten women were accepted for the first time into the year-long undergraduate pilot-training program at Williams Air Force Base outside of Phoenix. Air-force publicity did not mention the women pilots of World War II, but developers of the air-force test program did consult Jacqueline Cochran's final report on the WASPs—submitted to the commanding general of the army air forces in 1945. Only one thing has changed. WASPs had flown all the weapons of war. Today's women pilots, however, are barred by legislation passed in 1948 from being assigned to aircraft engaged in combat missions—i.e., the prestige aircraft.

Last fall, 320 Women's Air Force Service Pilots—a third of the WASPs believed still to be alive—flew, many in their own planes, into the misty hills of Hot Springs, Arkansas, for a weekend of reminiscences, booze, and news. Only in recent years have the WASPs begun to hold regular biennial reunions. At last fall's gala, however, the main topic of conversation was politics—the progress of another WASP bill pending in Congress. Introduced by Sen. Barry Goldwater and Congresswoman Lindy Boggs, this bill will provide the WASPs with Veterans Administration hospitalization benefits and will accord them the official recognition they have been denied for more than thirty years. The Order of Fifinella (the WASP organization) has mobilized a cross-country network of former WASPs and their supporters to push for passage of the bill.

At last the times are recognizing their unusual past. National news cameras caught the WASPs at the reunion banquet—grayer but, to a woman, handsome and flamboyant—singing songs from Sweetwater and swapping tales from their flying days.

Congratulatory telegrams from their congressional supporters and the ailing Jacqueline Cochran were read aloud and applauded. Incredibly, one of the telegrams had been sent by the WASPs' sisters in Russia. The room hushed as the telegram was read:

"Soviet Women Air Force Pilots Veterans World War Two send greetings to American women Air Force pilots participants of common struggle of nations of anti-Hitler coalition and highly value their contribution to complete defeat of Germany fascism in 1945. Soviet women former Air Force pilots wish American Women's Air Force Service Pilots Association successes in struggle for peace and express their hope for further extension of our friendly contacts—Soviet War Veterans Committee Group of Women, Air Force Pilots Veterans of World War Two.

And so the WASP movement has now gone international. "We felt we were army pilots," said WASP B-29 pilot Dora Dougherty Strother. "I would look out and see that star on my wing and choke up inside. I do now when I think of it. I was so proud that I was allowed to contribute.

The Order of Fifinella has declared 1977 the "Year of the WASP." Whether or not Congress gets around to passing the long overdue WASP legislation, it seems clear that this year will be remembered as a turning point in the little-known history of the WASP.

Two identical bills granting veteran's benefits to the WASPs have been simultaneously introduced before the Senate and the House of Representatives. Both bills—H.R. 3321 (sponsored by Rep. Lindy Boggs of New Orleans, Louisiana) and S. 247 (cosponsored by Sen. Barry Goldwater of Arizona and Sen. Clifford Hansen of Wyoming) have now been referred to committee, where they await hearings before coming to a floor vote. Readers interested in expressing support for these two bills are urged to write to their individual senators or congresspersons, or to the committee chairmen themselves.

In the Senate:

Hon. Alan Cranston, Chairman, Veterans Affairs Committee, U.S. Senate, Washington, D.C. 20510.

In the House:

Hon. Ray Roberts, Chairman, Veterans Affairs Committee, U.S. House of Representatives, Washington, D.C. 20515, or: Hon G. V. (Sonny) Montgomery, Chairman, Compensation, Pension, and Insurance Subcommittee, U.S. House of Representatives, Washington, D.C. 20515.

NATIONAL PERIODICALS PROTESTING EXCLUSION FROM PRESS GALLERIES

Mr. METCALF. Mr. President, freedom of the press disputes usually arise in the adversary relationship between newsmen, on the one hand, and an official or agency of Government on the other. But the dispute I wish to bring to the Senate's attention today—although it turns on a rule of Congress—is primarily between journalists representing different kinds of publications.

For several years, reporters for Science

magazine, Consumer Reports, and other periodicals published by nonprofit groups have been protesting their exclusion from the Senate and House periodical press galleries. Under the rules of these galleries, only periodicals that are "published for profit and supported chiefly by advertising or by subscription, and owned and operated independently of any industry, business, association or institution" may be accredited.

Reporters for such publications as Science and Consumer Reports have alleged that their first amendment right to access to the news is being violated because they are not permitted the privilege of the galleries.

Moreover, a number of reporters who are not excluded as well as professional societies in the field of journalism have argued that the present rule is grossly unfair. The Columbia Journalism Review, for example, has twice editorialized against the exclusionary rule, the last time in its January–February issue. Also, the National Association of Science Writers decided just a few weeks ago to seek redress for reporters on the staffs of Science and other similarly affected publications such as Chemical and Engineering News, Science News, and the Chronicle of Higher Education.

George Alexander, a science writer with the Los Angeles Times who is president of the Science Writers Association, has advised my office that the association believes application of the rule constitutes an "abridgment of the freedom of the press."

However, the executive committee of the Periodical Correspondents Association here in Washington has continued to defend the existing rules and exclusions vehemently.

The bitterness of the dispute—and I think the venting of personal animosities it has led to on both sides is most unfortunate—is reflected in an exchange in the March issue of Harper's, and I ask unanimous consent that it be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. METCALF. Mr. President, underlying the rhetoric of this exchange between Peter Schuck, an attorney with Consumers Union, and Neil MacNeil of Time, who is the leading spokesman for the executive committee of the Periodical Correspondents Association, is a relatively simple question: Should the reporters for all periodicals published by nonprofit groups be barred from the galleries just because some such groups engage in lobbying?

I believe that any such blanket exclusionary rule is inequitable, unnecessary, and indefensible.

As Senators know, the authority to change the gallery rules rests, at least initially, with the Committee on Rules and Administration in the Senate, and, in the House, with the Speaker. Knowing of my interest in this matter, Chairman Cannon last August asked me to meet with the executive committee of the Periodical Correspondents Association, to see if the accreditation problem could be resolved. I agreed to do so and, concurrently, circulated among all concerned parties an analysis of the problem and detailed proposals for remedying it.

Because of the pressure of other matters, I have not yet had an opportunity to talk with Mr. MacNeil and the executive committee. But I plan to arrange a meeting as soon as there is some indication that a discussion of the problem—and not the personalities involved—is likely to be constructive.

Mr. President, as a preliminary step, I believe all members of the executive committee should give careful consideration to the proposals that I circulated some while ago. I am by no means wedded to the details of these proposals, but I remain convinced that full accreditation can and should be afforded to all bona fide reporters for established periodicals who, first, agreed not to lobby or engage in any other unprofessional conduct, and, second, can demonstrate a need for continuing access to the galleries. Temporary credentials could be offered to other bona fide reporters who need access to the galleries only occasionally.

To sum up, Mr. President, the existing rules on accreditation to the periodical galleries are an embarrassment to the members of the Capitol Hill press corps—who, more than anyone else, should be acutely aware that their first amendment rights are not divisible—and to the Congress as well.

The sooner the exclusionary rule is changed, the better. I hope that other Senators and, particularly, the executive committee of the Correspondents Association will join in working toward this end.

EXHIBIT 1

WHISPERING IN THE PRESS GALLERY

(By Peter H. Schuck))

Long ago Congress established a press gallery to facilitate coverage of its proceedings. Over time this evolved into four separate galleries for the daily press, the periodical press, radio and TV correspondents, and press photographers. Unlike the public galleries, which strictly forbid spectators to take notes and rotate visitors in and out, the press galleries are the home away from home of the Congressional correspondent. They are equipped with telephones, typewriters, and complimentary copies of the Congressional Record, and are staffed by attendants who take messages and keep up with the day's proceedings. More important, the press galleries provide special access to the floor and assure admission to the daily on-the-record press conferences held by the leadership of both chambers. Gallery membership also confers a certain journalistic cachet, making it easier to obtain other press privileges; for example, such membership normally assures credentials for White House press conferences.

The Periodical Press Galleries are run by the Periodical Correspondents' Association, a large group of journalists working for publications which have been admitted to the galleries. Through its executive committee, composed of senior Congressional correspondents from Time, Newsweek, and several other leading publications, the association administers the galleries, nominally under the supervision and control of the Speaker of the House and the Senate Committee on Rules and Administration.

Until recently the gallery rules, first approved by Congress in the mid-nineteenth century, provided that a periodical could be admitted only if it was "published for profit and supported chiefly by advertising, and owned and operated independently of any industry, business, association or institution." The purpose of the rules was to protect members of Congress from being importuned by special-interest lobbyists disguised as journalists, a real problem in the early 1800s, when journalists sat on the floor of the Capitol, but one which apparently vanished after special galleries were built above the chamber in the 1850s. However, the rules, which assumed that nonprofit organizations could not possibly engage in bona fide journalism, have remained essentially unchanged.

Science is a well-known and prestigious periodical, the third most widely read publication among faculty members at major universities (after the New York Times and Time). It is published by a nonprofit organization, the American Association for the Advancement of Science, and therefore ineligible under the rules for admission into the galleries. Nevertheless, in the mid-Sixties a lenient galleries administrator issued to Science's Capitol Hill reporter, Luther Carter, a temporary pass, and that pass was routinely renewed for years. In 1971 Carter left Science to write a book on land-use and growth problems in Florida. After returning in early 1973 to resume his duties at Science, Carter requested that his gallery privileges be restored. It seemed a routine matter, but Carter's request was quickly denied, without explanation. From a thoroughly respectable publication with full access to the galleries. Science was suddenly transformed into a journalistic pariah not fit to enter the galleries' precincts.

Carter soon discovered what lay behind the Periodical Correspondents' Association's volte-face. The association, he learned, had excluded numerous periodicals in the past, all with impunity. These included such substantial publications as The Village Voice (allegedly because it was believed to be an "underground" publication), the Chronicle of Higher Education, Consumer Reports, the highly regarded, 2 million-subscriber monthly published by Consumers Union, and a number of Washington-based newsletters reporting on governmental affairs and excluded from the galleries because they were sustained by subscriptions rather than by advertising. The publishers of some of these newsletters had retained a lawyer and, in exasperation, threatened suit.

After protracted negotiations, the newsletters finally succeeded in gaining entry to the inner sanctum by having the rules amended to permit admission of subscription-financed periodicals. Their admission, however, was not unanimous. Neil MacNeil, Time's Congressional correspondent and a leader of the association's executive committee, was so piqued by the rules change and so scornful of the committee's acquiescence that he refused to attend the meeting at which it was approved: "I did not wish to seem to condone this action by my presence," he wrote in a letter of protest. "The Committee has surrendered under simple coercion."

MacNeil's philippic seemed to have stiffened the galleries' resistance to any further enlargement of the fraternity that might admit Consumer Reports, which had also threatened legal action. Consumer Reports, like Science, is published by a nonprofit institution and therefore, according to the association, could not be an "independent" publication. Indeed, Consumers Union was, as the association put it, "a self-proclaimed advocate of consumer interests" and could not properly share the galleries with true journalists. MacNeil later explained his position in a letter to Sen. Edward Kennedy: "To date no one has come up with any change of rules which would satisfy the Congress's long determination to exclude from

press accreditation any individual or organization engaged in lobbying the Congress and still allow accreditation of organizations such as Science magazine." After almost nine months of fruitless negotiations, Consumers Union decided to file suit.

In its action, Consumers Union noted that a publication of any size is published by a legally distinct corporation, and that Consumers Union, as a matter of long-standing policy, had scrupulously avoided any lobbying activity whatsoever. It also pointed out that if the association were truly concerned about journalists affiliated with lobbying organizations, it could begin with its own executive committee, which was dominated by a reporter (MacNeil of Time) for a periodical owned by a large corporate conglomerate with substantial nonpublishing interests. Indeed, investigation revealed that Time Inc. employed a registered lobbyist to promote its corporate interests on the Hill, and that the galleries' membership list swarmed with special-interest publications. These included such journalistic stalwarts as Modern Tire Dealer, National Timber Industry, Automotive News, Baking Industry Magazine, Drug Topics and Drug Trade News, Food Processing and Marketing, Leather and Shoes Magazine, and Investment Dealer's Digest, to name just a few. Consumers Union also showed that the other Congressional press galleries had admitted not only consumer publications but even Communist-bloc news agencies, requiring only that they refrain from lobbying.

Consumers Union, which had felt the heavy hand of the censor years earlier when postal authorities tried to seize copies of an issue describing a pamphlet on contraceptives, argued in court that the correspondents, by arbitrarily excluding Consumer Reports while accrediting numerous industry organs, had violated its First Amendment rights to equal access to Congressional news as well as its right to equal protection of the laws. In October 1973, Judge Gerhard Gesell of the Federal District Court of Washington ruled in Consumers Union's favor, declaring the galleries' rule unconstitutional.

"There should be no glossing over what this record discloses. Under a broad, generalized congressional delegation, authority has been given certain newsmen to prevent other newsmen from having access to news of vital consequence to the public. As a result, a group of established periodical correspondents have undertaken to implement arbitrary and unnecessary regulations with a view to excluding from news sources representatives of publications whose ownership or ideas they consider objectionable.

"The situation disclosed by this undisputed record flouts the First Amendment. It matters not that elements of the press as well as Congress itself appear to have been the instruments for denial of constitutional rights in this instance for those rights limit the actions of legislative agents and instrumentalities as surely as those of Congress itself."

Shortly before the court's decision, Luther Carter had submitted his gallery membership application once again, but had been requested by the executive committee to await the outcome of the Consumers Union case. He had graciously complied. When Judge Gesell issued his ruling, Carter was elated. But he soon learned that his frustrations, rather than ending, had only begun. Even temporary accreditation of Science, the executive committee insisted, might prejudice the association's legal position to appeal the decision, which would drag the case out for at least two more years. In the meanwhile, neither Consumer Reports nor Science could enter the galleries.

Mindful of Judge Gesell's emphatic decision, the correspondents decided to take a different tack on appeal. Citing a section of the Constitution providing that "the Senators and Representatives . . . for any speech or debate in either House . . . shall not be questioned in any other place," the association argued that, even assuming that it had violated the First Amendment, it was nevertheless immune from suit.

This argument seemed preposterous, a mere clutching at straws. After all, the "speech-or-debate clause" had been inserted into the Constitution merely to protect legislators from being harassed by litigious political adversaries, and to ensure robust, untrammeled debate and an unconstrained legislative process. The Supreme Court had carefully confined the immunity from suit to strictly "legislative tasks" performed by members of Congress or their legislative aides; it had never been deemed to extend to a group of private citizens, much less one performing a task—accreditation of periodicals—so remote from the process of legislating. Indeed, the correspondents had not even bothered to raise the issue in the trial court. (Judge Gesell, a jurist renowned for his thoroughness, had considered the clause on his own initiative, but concluded that it was clearly inapplicable to the correspondents.)

To Consumers Union's astonishment, the appeals court ruled in July 1975 that the association was indeed immune from suit. It was not necessary to decide whether the correspondents had violated the First Amendment rights of Consumers Union, the court noted; because they were acting as agents of Congress in running the galleries, they were entitled to invoke the speech-or-debate clause immunity to shield themselves from any potential liability. When the Supreme Court declined to hear the case, the correspondents were safe from further challenge.

Some Members of Congress, however, were not at all pleased with the handiwork of their "agents." Back in 1974, when the *Consumers Union* case was still on appeal, Sen. Sam Ervin, the Hill's acknowledged constitutional authority, had protested to his colleagues "the injustice being done to reputable journalists such as Mr. Carter," demanding that the galleries' rules be changed to prevent "further injury to legitimate newsgathering." After the Court of Appeals decision, several other members of Congress, including Senators Philip Hart of Michigan and Lee Metcalf of Montana, voiced similar concern and urged that the rules be revised perhaps along the lines adopted by the other press galleries and first suggested by Luther Carter and Consumers Union almost three years earlier—that is, by replacing the ambiguous requirements of "for profit" and "independent" ownership with a flat prohibition against lobbying activities by any accredited journalist.

When Sen. Howard Cannon, the chairman of the Rules Committee which nominally supervises the galleries (but in practice defers to the views of the executive committee) took up these and other Congressional letters of protest with the correspondents in October 1975, he was assured that the committee had established a subcommittee—chaired by Neil MacNeil himself—which would "study the rules to see if any revisions are warranted." Only later did Cannon learn that the subcommittee had been subsequently dissolved at MacNeil's request without ever having met formally despite several attempts by one of its members, Mark Arnold of *The National Observer*, to get MacNeil to convene a meeting so that a report could be prepared. When Arnold urged a compromise rule change that would admit organizations with IRS-approved tax-exempt status in return for their agreeing not to lobby, MacNeil, defending the independent authority of Congress, put through a substitute resolution opposing any rule change that relied upon prior determination by an executive branch agency.

Carter recently discussed the situation with Sam Shaffer of *Newsweek*, a member of the executive committee. Shaffer noted that the question of *Science's* exclusion was not closed, but that the galleries were waiting for someone to come up with an acceptable solution. Carter, ever tenacious, again suggested that instead of the committee attempting to evaluate applicants on the basis of its perception of their political orientation, all correspondents should be required to submit affidavits swearing that they would not engage in lobbying. Shaffer replied that such a requirement would be "demeaning." Carter pointed out that it was far more demeaning for *Science* to be barred from the galleries while Tass, the Soviet news agency, was admitted. Shaffer, growing impatient, denounced Carter for "pestering" the galleries for the past three years.

There the matter rests. *Science* and *Consumer Reports* remain exiles from the galleries, along with other reputable periodicals. The illegality of the correspondents' exclusion of them continues without remedy. This injustice was underscored by a federal court decision in July 1976 ruling unconstitutional the refusal of Ron Ziegler and the Secret Service "for security reasons" to accredit Robert Sherrill of *The Nation* for admission to White House press conferences. The court, noting that the Congressional immunity from suit was not available to the White House, relied heavily on Judge Gesell's views on the First Amendment issues in the *Consumers Union* case.

The galleries controversy contains many disturbing ironies. If any group should be our most passionate defender of the First Amendment, it should be the correspondents who report on the exercise of political power. Yet some of the correspondents who run the galleries apparently regard the First Amendment as some men regard a mistress—someone to be embraced with ardor when one needs a refuge and discarded when she becomes a nuisance.

For correspondents to lend their energies to an official allocation of journalistic privileges according to vague, invidious criteria, is to relinquish that remoteness from power that justifies a free press. That professional writers, enjoying access to the Justice Department's lawyers, are unable to draft a rule that can fairly distinguish between journalists whose organizations lobby and those whose organizations do not, suggests a notable want of imagination and of will.

The vitality of a free press depends upon journalists maintaining their independence from friendly politicians as well as hostile ones. Yet some of the galleries' leadership has chosen, in Judge Gesell's words, to "flout the First Amendment" and then, when pursued by the law, to hide behind the skirts of the same Congress that they, as journalists, are supposed to investigate and chronicle at arm's length. They have taken upon themselves the awesome power to decide (in Sam Shaffer's words to Senator Cannon) that the work of *Science*, and presumably *Consumer Reports* and many others as well "falls outside the function of the Press as an American institution." If these are the friends of the First Amendment, God save it from its enemies.

THE FOURTH ESTATE

(By Neil MacNeil)

The author of the preceding article has told a remarkable tale of what he views as an unholy alliance between powerful leaders of Congress and a small band of Congressional correspondents to suppress the constitutional rights of certain publishers and reporters. He protests that by a trick of legal finesse my colleagues and I have escaped culpability for our crimes.

Peter Schuck and I agree on little, but I agree with him that this case was a matter of great moment to Congress, the nation's press, and the Washington lobbyists. What was at hazard was nothing less than the integrity of the Congressional press corps and

the ability of Congress to control access by lobbyists to its members.

Schuck's title at Consumers Union, "Washington director," has a special meaning in the nation's capital, for it is frequently used as a polite euphemism for "chief lobbyist." It is so in Schuck's case, and his suit challenged that section of our galleries' rules which excludes lobbying organizations from membership: "owned and operated independently of any industry, business, association or institution." Those who judge between his account and mine should know that his was written by a lobbyist as skilled as any in that line of work.

I am aware that Schuck has repeatedly denied that he or his organization lobby either Congress or federal agencies, a not unusual disclaimer by lobbyists. He has admitted, however, because he had to, that he regularly testifies before Congressional committees and intervenes before the government's regulatory agencies. That is exactly what lobbyists do. He once claimed that his organization's purposes were "purer" than those of some already accredited to the press galleries, but he abandoned that argument when, presumably, he realized that the rules prohibiting lobbyists do not differentiate between "pure" and "impure" lobbies. He then argued that he advocated only general interests, not "special" interests, but the rules are not concerned with that difference either. Schuck further argued that when he testifies he does so only on invitation. Everybody in political Washington knows that no one testifies before a Congressional committee without invitation, even when that invitation takes the form of a subpoena. Besides, Schuck has no trouble getting invitations. To cite just one of his connections, Michael Pertschuk, chief counsel of the Senate Commerce Committee, a key committee on consumer legislation, serves on Schuck's board of directors.

There is, of course, nothing inherently wrong about lobbying, even though most lobbyists shrink from describing themselves by that name and relatively few feel compelled to register under the loosely drawn Lobbying Act of 1946. The right to lobby is guaranteed by the constitutional right of petition, and some of Washington's lobbyists have proved themselves immensely helpful to Congress. They often provide valuable information and insights, as I am sure Schuck does when he testifies. It is wrong, however, for lobbyists to pose as journalists—wrong for the press, wrong for Congress, wrong for the lobbyists themselves. And that is why the rules of all Congressional press galleries were written as they were.

Schuck states that the purpose of the rules was to protect members of Congress from "special-interest" lobbyists, and he would have you believe that although this was a real problem in the early 1800s, it apparently vanished when the reporters were given their own seats upstairs in the 1850s. An ingenious argument, that. In fact, the rules were written as much to protect the legitimate press corps. Congress did have problems before 1850, primarily from claims agents, but professional lobbyists appeared in Washington only when Congress began voting huge subsidies to railroads, steamship lines, and other industries in the later part of the nineteenth century. For a price, this new man, the lobbyist, would work to pass or defeat any bill, an effort that sometimes included bribing Congressmen. Lobbyists saw the intimacy reporters enjoyed with the Congressmen, and some finagled press credentials for themselves or hired venal reporters. By the 1870s, the Capitol was overrun with lobbyists and claims agents. In 1875, in one notorious instance, four reporters were paid fees ranging from $5,000 to $30,000 for a lobbying scheme. The corruption of Congress and its press corps had become a national scandal.

The Senate and the House of Representatives repeatedly tried to write protective regulations, for their members knew, as Will Rogers later said, that no Congressman ever corrupted himself. They tried to keep claims agents and lobbyists at a safe distance, but they failed. There were honest and reputable reporters covering Congress in those years, and they were appalled by the "journalistic jobbers" in their midst "bleeding corporations and getting money easily from divers lobbying schemes," as one of them put it. On November 5, 1877, a group of them met with Speaker of the House Sam Randall and asked for the power to cleanse their own membership. Randall authorized them to form a committee to regulate the press galleries under new rules. They were charged with protecting the members of Congress, but, more important for them, with protecting the integrity of the press corps. Their assignment has never been successfully completed, and it never can be, for by the very nature of the legislative process the temptations do not vanish, despite Schuck's happy conclusion to the contrary.

When the Periodical Press Galleries were created in 1941, a special problem arose because many organized lobbies published periodicals, ranging from house organs to national magazines. That was why the special language was needed on ownership of periodicals, on the theory that he who pays the piper calls the tune. Schuck lists, as he did in court, what he calls "special-interest" publications accredited to our galleries as though they were admitted because they serve special interests. He knows they qualify because they are owned and operated independent of any potential lobby. Moreover, Schuck neglected to mention the powerful lobbies excluded from our galleries by the very words he sought to eliminate: the National Rifle Association, the American Medical Association, the AFL–CIO, the National Association of Manufacturers. All publish periodicals, as do hundreds of other lobbies operating in Washington.

Schuck chose to mix his case with two other questions then before our executive committee, the accreditation of *Science* magazine and a request to change the rules to qualify newsletters. All three posed distinctly different questions, and, of course, we dealt with them differently. In the case of the newsletters, the committee's decision was sudden and made under the threat of a lawsuit. I wanted my colleagues to consider some alternatives, but they would brook no delay.

Schuck saw how the executive committee surrendered before the newsletters' threat; he was at the same meeting arguing for the admission of *Consumer Reports*. What worked for them might work for him: he made his own threat, as he called it, to sue. He credits me with stiffening my colleagues' resistance. I doubt that. No one questioned the journalistic legitimacy of the newsletters. The only question was how, not whether, they should be accredited. I believed they were entitled to their own gallery and volunteered to help them get it. Schuck's challenge went to the very heart of the lobbyist question, and my colleagues knew it. We voted unanimously against *Consumer Reports*. Schuck then appealed to the Speaker of the House and the Senate Rules Committee. The Speaker ignored his appeal, and the Senate committee met, considered his arguments, and then ratified our decisions. Schuck appealed to both because they write the rules for our galleries. We enforce their rules, but we have no power to change them, only to make suggestions.

Schuck sued us, not the Speaker or the Senate committee. This was shrewd, for had he sued them, as he should have, his case would have received scant hearing in any court, as he knew. I confess I paid no attention to the suit; neither did most of my colleagues. Since it involved Congress, the U.S. Attorney's Office provided defense counsel, and we assumed it was in competent hands. We also assumed that the language Schuck questioned was validly drafted under Congress constitutional authority to write its own rules and its common-law powers to protect itself. Not until Judge Gesell handed down his decision did we discover the seriousness of Schuck's suit: Gesell agreed with him and declared unconstitutional that phrase in our rules meant to exclude lobbyists from our midst.

I read the decision with disbelief and only belatedly the transcription of the hearing on which it was based. I promptly telephoned the U.S. Attorney's Office to ask for a rehearing of the case. I got short shrift. The Attorney's Office had no interest, and an official there explained why. They knew Judge Gesell well, he said, and they knew that Gesell, a judge with a flair for headlines, wanted a "freedom-of-the-press" case for his career portfolio. The "facts" did not matter, I was told. As a journalist, I was not unfamiliar with cynicism in public office, but I had no idea it ran so deeply in the legal community. Only later did I discover that the U.S. Attorney's Office was so uninterested in this case that it had been routinely assigned to a young lawyer fresh from law school. A case involving the constitutional powers of Congress and the integrity of the Washington press corps had been argued by a defense attorney who had never before tried a case in court!

At the hearing, the defense attorney had failed even to raise the question of the court's jurisdiction, the obvious threshold question in a constitutional case, and, when it was raised by the judge, confessed he was taken "somewhat by surprise." He admitted he found the galleries' rules "puzzling," and in his helplessness he was simply overrun by Schuck and Gesell. Schuck discovered that he could say without protest whatever he wanted. He stressed that we voted against Consumer Reports because of its "advocacy" of consumers' interests and thereby led the judge to believe we had set ourselves up as censors. Gesell actually suggested from the bench that under Congress's auspices he had established a "private club" and decided among ourselves who should be members. "The prohibition is one addressed to ideas," Gesell said, "unless I have missed something here." He had missed something. Defense counsel did not know what, and Schuck, understandably, did not tell him. Gesell concluded at last that we had excluded the magazine "because of their ideas." He had not a shred of evidence. He had not heard a single witness. Renowned for his thoroughness, indeed!

Gesell's decision was unprecedented: never before had a court struck down an internal rule of Congress. He went further: "The Constitution requires that Congressional press galleries remain available to all members of the working press, regardless of their affiliation." That dictum made almost every lobbyist in town eligible, and in the next few days we received a flood of applications from them. At my urgent request, the Speaker and the Chairman of the Senate Rules Committee wrote to the acting Attorney General on behalf of our committee, in effect demanding a top-flight attorney for the appeal. The Justice Department reacted quickly, assigning to the case one of its most experienced lawyers, Neil Koslowe.

Schuck says he was astonished at the appeals court's decision. No one else was. In fact, he lost the case before that court ever met. In pre-hearing briefs, Koslowe destroyed his arguments, and he never had a chance in the hearing. The court found that our rules were reasonable and legally valid and stated

that we "were acting in good faith" in carrying them out under a proper mandate from Congress. We won on the merits, not on mere technicalities, and we won by a unanimous decision of the three-judge court, a decision that was confirmed and ratified by the Supreme Court.

With the Consumer Reports case won, I suggested that our committee initiate a study to examine whether our rules might be changed to remove any inequities. We had in mind the application of Science, a magazine technically disqualified but one whose sponsors did not lobby Congress. Because we believed the rules worked an undue hardship on Science, for some years we had afforded its reporter, Luther Carter, the "courtesies" of our galleries—that is, use of such facilities as we have. We had done the same with other reporters in like circumstances from time to time, on the theory that we should try to do what we could to assist fellow journalists when we could. After Gesell's decision, on advice of counsel, we withdrew our offer to Carter on the grounds that Schuck might be able to use it against us in court. After the Supreme Court decision, we renewed the offer to Carter, but he declined: he insisted on full accreditation or none.

All of us on the committee spent several months examining and discussing various proposals for changes in the rules, but we could find none that would at the same time satisfy Congressional control of the rules, admit technically disqualified but bona fide reporters, and exclude lobbyist organizations. One member, Mark Arnold, had language he felt did the job, and I moved the dissolution of the rules subcommittee so that the full committee could consider his proposal. At a special meeting called for that purpose, Arnold's proposal was fully discussed, but finally rejected. The concept was flawed by its dependence on the Internal Revenue Service, an executive agency, for definitions.

There is a ready solution for Science—the way Tass was handled years ago. Tass correspondents were admitted to the newspaper press galleries, not ours, even though not qualified under the rules, by direction of the Congressional leaders on the urgent plea of the State Department. The department's officials stated this would help lessen tensions with Russia and prevent Soviet retaliation on American reporters in Moscow. The Speaker and the Senate Rules Committee have that authority over the press galleries. So far neither has chosen to use it on behalf of Science or its reporter.

[From Harper's Magazine, April 1977]

PETER SCHUCK REPLIES

FIRST AMENDMENT DEBATE

In my article ["Whisperings in the Press Gallery," March], I showed that the journalists of the Periodical Press Galleries in Congress had, by refusing accreditation to periodicals published by nonprofit groups, trampled on the First Amendment rights of many of their colleagues in an arrogant and arbitrary fashion. Neil MacNeil's response confirms my point, while careering wildly between canard, error, insult, irrelevancy, and evasion.

First, the canards. The major premise of MacNeil's entire argument is that I am a lobbyist, and he repeats it continually. Yet it is demonstrably, utterly, unequivocally false. As MacNeil well knows, Consumers Union and its employees do no lobbying, as was established through sworn evidence in court; the correspondents did not even dispute it, Judge Gerhard Gesell explicitly stated this in his opinion, and the Court of Appeals did not question that finding. MacNeil's argument to the contrary—based entirely on the word Washington in my title and the fact that I do one thing that lobbyists sometimes do (i.e., testify before Congress)—reflects the logic of the Red Queen. Finally, MacNeil knows that Consumers Union testifies only upon written invitation from a Congressional committee and that this is not lobbying, yet he implies that we inveigle the invitations through our "connections." If MacNeil believes that nonsense, perhaps Time needs a new Congressional correspondent.

MacNeil litters his piece with other errors and omissions. I shall mention only a few:

(1) The correspondents' original lawyer was not "fresh from law school" and had in fact tried many cases in Court.

(2) The correspondents did not win in the Court of Appeals on the First Amendment issue; the court twice stated that it would not reach that issue because it found them immune from suit. (Incidentally, several recent cases rejecting claims of legislative immunity suggest that even on that issue the Court of Appeals decision was an aberration.) The Supreme Court did not "confirm and ratify" that decision but merely declined to hear the case, a very different thing.

(3) MacNeil states that he suggested a committee to study a possible rule change, but neglects to mention that this occurred only after letters protesting the exclusions were sent by Senators and members of Congress.

(4) MacNeil suggests that his gallery spent months reviewing possible changes, but there is no evidence that serious consideration was given to a change or that any outsiders were ever consulted in the process

Not content with building defenses on a foundation of innuendo and error, MacNeil proceeds to publish a scurrilous ad hominem attack on Judge Gesell's motives (Gesell, he says "wanted a 'freedom-of-the-press' case for his career portfolio"). MacNeil does so by hiding behind some unnamed official's words disingenuously attributing "cynicism" to the official. It is ironic—but wholly consistent with the theme of my article—that MacNeil should hurl his most corrosive acid at a distinguished judge who had the temerity to uphold First Amendment rights against the journalistic establishment.

When MacNeil is not gratuitously insulting actual men (me, Gesell, and the lawyer who represented the correspondents in the trial court), he is savaging straw men. Thus he discusses at length the problem of lobbyists disguised as journalists (a point my article made as well), but it is a problem quite irrelevant to Consumer Reports and Science, whose reporters and publishing organizations have never lobbied. (Indeed, the ancient abuses he recited were not committed by reporters for such nonprofit publishers as Consumers Union and the American Association for the Advancement of Science, but for others, including the New York Times.)

The important point is that, of the four special Congressional galleries, only MacNeil's excludes bona fide journalists whose organizations do not lobby, while admitting some organizations (such as his own Time Inc.) which do. The answer to the lobbying problem is really quite simple and straightforward—as Luther Carter, I, and a number of Senators and Congressmen have been saying for over four years now. It is to accredit all bona fide reporters for publications that carry a substantial volume of government-related news, provided that they swear in writing that they do not and will not lobby. Sam Shaffer of Newsweek once rejected this suggestion as "insulting," a term that better describes the refusal of the gallery to give Science the privileges accorded to Tass and Modern Tire Dealer.

What is the real issue lurking behind MacNeil's straw men? It is, of course, the First Amendment rights of Luther Carter and other fine journalists who are arbitrarily excluded from the galleries. Nothing in MacNeil's response is more intriguing or revealing than his failure to even mention the First Amendment (except to suggest Judge Gesell's ignoble motives in defending it). The First Amendment does not permit privileges to be parceled out among newsmen according to whether or not their magazine's publisher seeks a profit, accepts advertising, or is separately incorporated.

Under the First Amendment, it matters not that a publisher may use his magazine for personal crusades, as *Time's* Henry Luce did in becoming the very personification of the "China lobby"; that some commercial publishers are so subservient to their advertisers that their editorial independence vanishes; that many narrowly focused trade periodicals (of the kind already accredited to the gallery) are virtually as one with the interests or trades for which they write; or that some association publications are little more than organization mouthpieces. If MacNeil's crabbed view of the First Amendment were applied in a consistent way, his gallery would have to purge half its membership and *Time* itself would be excluded. That's not about to happen.

NEIL MACNEIL REPLIES

Peter Schuck in a way reminds me of the member of the British Parliament of whom Lord Acton wrote: "He knew only one thing and that was wrong." Schuck *knows* that his was a "freedom-of-the-press" case, and he is wrong. It was the most dangerous challenge to the integrity of the Washington press corps in modern times. Had he won, he would have opened the Congressional press galleries to untold hundreds of lobbyists; they were lined up waiting to apply. That's what brought me into this case, and that's why the leaders of Congress joined in the fight.

Schuck would have you believe that I, with my "crabbed view" somehow bamboozled the three-member U.S. Appeals Court and the Supreme Court itself into permitting the blatant violation of the constitutional rights of fellow journalists. No, he lost his suit because his claim that this was a First Amendment case did not withstand the scrutiny of competent counsel and the federal courts.

Sen. Sam Ervin once told me, jokingly, an old lawyer's maxim: if the facts are against you, argue the law; if the law is against you, argue the facts; and if the facts and the law are both against you, attack your opponent. Schuck lost on the facts and the law, and although I did not expect him to play the graceful loser, I am surprised that his invective has now reached the level of a common scold's.

I am more disturbed by his abuse of the legal processes he initiated. He claims that only Judge Gesell understood the case. He dismisses as a mere "aberration" the unanimous judgment of the Appeals Court overturning Gesell, and, incredibly, he suggests that the Supreme Court's approval of that action should not count. Schuck has turned the federal judiciary upside down, with a district judge the supreme authority in his case.

Schuck's posturing as the friend of the press would be comic, were it not grotesque. His self-gratulatory lecture on *my* professional standards approaches the obscene. For two decades and more, my father was the editor who each night decided what the *New York Times* would print the next morning. By the very nature of his position, he became in his time a leader in the never-ending struggle to protect the freedom of the press and the integrity of the press corps. I learned from him at the start that the words of the First Amendment are living words: cut them and they bleed. I learned from him at the start the meaning of professional probity. I need no lawyer-lobbyist to teach me the ethics of my craft or my responsibilities as a journalist. I had a better tutor.

THE WORTH OF A RIVER TO PEOPLE

Mr. TOWER. Mr. President, not many news articles or editorials, by virtue of their excellence, capture the essence of an issue, but one I had the pleasure of reading recently, by the editor of the Texas Almanac and appearing in the April 13 issue of the Dallas Morning News, must be considered of that caliber.

Mr. Fred Pass addresses "The Worth of a River to People" in making the case for water resource development. I hope each of my colleagues will take a few moments to read this article, for it surely has application beyond my State's borders.

I want to take this opportunity to thank Mr. Pass for saying so well what many of us here in the Senate would like to say to those who question the value of flood protection and water development projects. He has done us an invaluable service.

Mr. President, I ask unanimous consent that a copy of the article entitled "The Worth of a River to People" be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE WORTH OF A RIVER TO PEOPLE

(By Fred Pass, Editor, Texas Almanac)

What is a river project, such as a reservoir, really worth to a community?

The governmental entity that plans and builds the project has a responsibility to determine the cost-benefit ratio that must justify the expenditure. In the case of most reservoirs on the Trinity River, the U.S. Army Corps of Engineers has this responsibility.

But how can the value of a dam built with dollars and under conditions of one time be projected decades into the future with a high degree of accuracy?

Take, for example, three reservoirs on the Trinity in the Dallas-Fort Worth area—Lewisville, Benbrook and Grapevine. They were built at a total cost of $42 million.

In one weekend—the last weekend of March when heavy rains fell in the watershed—the three dams prevented $95.5 million in flood damages, according to John F. Wall, district engineer of the Corps of Engineers' Fort Worth District.

Thus, in one flooding condition, the savings in dollars—not to mention lives—amounted to more than twice the cost of the three dams.

If that's impressive, consider this:

In the approximately two decades that the three dams have been in service, they have prevented flood damages valued at almost half a billion dollars, more than 11 times their cost. You won't find many investments with that kind of return.

And that is only from flood prevention. Added to that must be the value of water to the metropolitan area and the recreation the lakes provide.

The estimates of a river project's values can be based on known quantities. But there always seems to be an unknown factor that crops up, one that had not been calculated in the estimation. Perhaps a 7-year drouth, such as the one that lingered through much of the 1950s in North Texas making water a scarcity in Dallas, can be anticipated. Floods can be expected at intervals.

But how was the subsidence of land along the Gulf Coast in the Houston area, caused by heavy use of water from wells, to be figured into a formula a couple of decades ago? This subsidence is causing serious damage to a wide area today and makes other sources of water necessary.

Who would have known a couple of decades ago that the enormous lignite deposits within the watershed would be worth billions of dollars because of a shortage of natural gas and a sharply rising cost of fuel? This development will have impact for years to come on the region's economy.

We may expect the unexpected. Perhaps it will be a food shortage that will require the cultivation of all land capable of producing food crops, especially land in river bottoms that are protected from floods. Or it may be a serious water shortage (one has already been predicted) that will require the impoundment of vastly greater amounts of water.

Critics of reservoirs along the Trinity River prefer, instead, a nonstructural flood plain. That proposal was rebutted at a recent congressional hearing by Anderson County Judge N. R. Link, chairman of the Tennessee Colony Lake area improvement committee.

"Their solution is the so-called nonstructural approach, a nice way of saying that they want the government to buy the flooded land, take it off the tax rolls, put a fence around it and let it flood," said Judge Link. "We want to reclaim this valuable farm and ranch land by the same structural flood control methods that have built Dallas and Fort Worth and have added millions (of dollars) to their tax rolls, and that have provided those cities their jobs and wealth."

He said that while most of the river improvement projects have served the upper Trinity basin, providing water and recreation and preventing floods there, the midsection of the river is suffering greater losses.

He urged the construction of Tennessee Colony reservoir to reduce these damages from flooding downstream. But if that is denied, he added, that area of the river will seek relief by asking the Congress or federal courts to reduce the amount of water stored in the upper stream reservoirs around Dallas and Fort Worth in order that they may hold back more flood water.

Such an arrangement would provide less—not more—water for this metropolitan area as we approach the day of water scarcities.

A river takes many twists and turns. And so does its worth to the people who must depend on it.

TOWARD DECENT RURAL HEALTH CARE

Mr. CLARK. Mr. President, last November, the Second National Conference on Rural America was held in Des Moines, Iowa, and was attended by 400 people who share a deep concern for the future of small towns and rural areas.

A wide range of topics was discussed in depth, including housing, transportation, employment, poverty, education, and health. I was very impressed by a speech presented by Dr. Lorin E. Kerr entitled, "Toward Decent Rural Health Care," which I would like to share with my colleagues.

Dr. Kerr is the director of the United Mine Workers' Department of Occupational Health and also the chairman of the Health Advisory Council for Rural America, Inc., a national constituency based organization that sponsored the conference.

Dr. Kerr identifies three major tasks that face our Nation with respect to health care in rural areas:

First, to devise a national system through which people can pay for the medical care that they require;

Second, to place the necessary facilities and services in rural areas;

And third, to influence the training of medical personnel and to redirect the distribution of existing health professionals so as to assure the right of every citizen to adequate health care.

Speaking on the responsibility of the Federal Government to alleviate the problems of rural health care, Dr. Kerr states:

> Fundamental to my thinking is the recognition that any system of health care must rely on Federal leadership and Federal financing. Citizens in this country are national citizens, and their rights should be viewed as national rights, and not circumscribed by where they choose or are forced to reside.

The Federal Government is beginning to grapple with the obstacles to health services in small towns and rural areas. The Health Manpower Act of 1976 authorizes new initiatives to promote the training of primary care physicians and to encourage physician practice in medically underserved areas. In addition, Congress may soon enact legislation to permit medicare reimbursement for rural health clinic services. Forty-eight Senators have joined me in sponsoring S. 708, which would change the medicare program in this way.

However, Dr. Kerr suggests that the rural health agenda is far from completion in a number of areas. I urge my colleagues to review his recommendations, and I ask unanimous consent that the speech be printed in the RECORD.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

TOWARD DECENT RURAL HEALTH CARE

(Remarks by Dr. Lorin E. Kerr, Director, Department of Occupational Health, United Mine Workers of America)

I am Dr. Lorin E. Kerr, Director of the United Mine Workers' Department of Occupational Health. I am also a member of Rural America, and serve as the chairman of Rural America's Health Advisory Council.

Many of you here today participated in the first National Conference on Rural America, which was convened in Washington a little over a year and a half ago. In addition to helping to launch Rural America as a national constituency-based organization, the Conference produced this very important booklet entitled "Toward A Platform for Rural America." In it, we attempted to outline some sense of the dimensions and scope of the problems affecting rural people—in housing, transportation, education, health and nutrition, and other areas of human need. In effect, it represents an unprecedented attempt to take a holistic approach to rural needs.

Included in the platform for Rural America is a brief section in which rural health problems are identified and some suggestions made for corrective action. By some standards, those recommendations might appear today to be woefully inadequate, and perhaps, reflected limitations in our understanding of the existing health care delivery system in this country. However, it is a significant and sturdy little document, and becomes a part of the limited but growing amount of literature which looks at the special needs of rural people and their communities in obtaining adequate medical and health care.

In the intervening 18 months, and currently, I suspect that many of you have devoted and will continue to devote most of your energies to dealing with immediate and

pressing issues, running from simply trying to get Federal reimbursement for services provided through rural clinics and health centers, to seeking full consumer and rural representation within health planning structures, or simply trying to keep a small clinic operating. These, of course, are critical matters, and I hope we will have sufficient time here and during the workshop which follows this panel to explore them further. However, I believe that my most useful contribution to this Conference may be to push for a discussion of rural health issues in terms of national policy alternatives and principles.

Let me begin, then, with a brief sketch of the health conditions of Rural America. Nowhere in the United States is the need for an improved health system more pressing and nowhere is it less adequate than in rural America. From the standpoint of nearly every measure available, the people of small town and rural America are health disadvantaged.

There are several specific examples which should leave little doubt about what I am talking about. In a recent survey of infant mortality, the figures show that infant deaths in the poor and rural areas of this country, such as in the rural counties of West Virginia, are double those in the highest-income urban states. Put another way, the probability of an infant dying during its first year of life is twice as great in our most rural areas. Moreover, this gap, measured by the number of preventable infant deaths, has been increasing rather than declining in the last ten years.

If we look at the number of deaths among women related to child birth, i e., maternal mortality, we find a similar situation. While women in rural America make up only 20 percent of all women of childbearing age, they account for 50 percent of all maternal deaths in the country. The message of these figures on infant and maternal mortality is quite clear for both, rural America offers a more hazardous environment than urban America.

Work related death and disability in rural communities has long constituted a major health problem, and has only recently begun to attract serious national attention. This should come as no surprise, however, particularly because traditional rural occupations such as mining, timbering and agriculture are among the most dangerous to working people. And although our system of collecting information concerning work related injury is inadequate, particularly with regard to such rural issues as farm accidents and the effects of pesticides on humans, there is evidence that the mortality rate for rural workers is almost double that of their urban counterparts. Overall, our record is extremely poor compared to other industrialized nations of the world.

And finally, let us examine data on two other rural health problems.

First, data on chronic health problems for all income groups indicate they are significantly higher for rural than urban people. Secondly, we find the intolerable situation in this society that one of the most serious health problems confronting the rural poor is under-nutrition and hunger. It is estimated that less than ½ of the 26 million Americans who cannot afford an adequate diet are receiving assistance through the Federal food programs. A majority of these Americans live in rural America.

This, then, is the status of health in rural America. It is not a statistic situation, it is changing. In fact, in this century, we have managed to reverse the traditional relationship between urban and rural areas as far as the public's health. Today, on the basis of most indicators, rural America is far less healthy than the dominant, more urbanized part of society.

THE DISTRIBUTION OF HEALTH RESOURCES IN AMERICA

It should come as no surprise to most of us that the distribution of health resources and personnel in rural America is as bad (and in some cases worse) as the distribution of other vital resources. As noted by Professor Navarro during the First Rural America Conference, "the greater the need for resources," in rural America, "the lower their availability."

The quickest way to learn what is wrong with our health system in general is to observe its particular malfunction in rural areas. At the heart of the crisis lies the gross maldistribution of medical personnel. Overall, the United States averages one doctor for every 665 persons; in rural areas the ratio is one doctor for every 2,400 persons. Looked at another way, although roughly a third of our national population currently resides in rural America, they are served by only 12 percent of the nation's doctors and just 18 percent of the nurses. Since 1963, the number of counties without a physician has increased from 98 to 135, and in a large number of rural counties the number of doctors has declined. Additionally, it is estimated that over 5,000 towns in rural America do not have access to the services of a single physician.

Not surprisingly, the relative lack of health resources is concentrated among the rural poor. Examples abound, including clear inequities in the allocation of publicly provided resources, such as Medicaid and Medicare, between urban and rural areas; the lack of needed rural primary and secondary care facilities; and the limited budgets and services of many local health departments in rural communities. All tend to adversely affect rural people's access to medical care. And despite recent expansion in community health care facilities; hospital construction, and other programs affecting rural America, inadequate health services in rural areas remain a serious problem. Today, rural people remain well behind their metropolitan counterparts in access to quality health care.

TOWARD DECENT HEALTH CARE IN RURAL AMERICA

It is clear then, that we are faced with at least three major tasks with respect to health care in rural areas. The first is to devise a national system through which people can pay for the medical care that they require.

The second is to place the necessary facilities and services in rural areas. And the third is to influence the training of medical personnel and to redirect the distribution of existing health professionals so as to assure the right of every citizen to adequate health care.

In the time remaining to me, I would like to discuss some of the basic principles which should underlie our approach in each of these three areas. Fundamental to my thinking is the recognition that any system of health care must rely on Federal leadership and Federal financing. Citizens in this country are national citizens, and their rights should be viewed as national rights, and not circumscribed by where they choose or are forced to reside. Therefore, the bulk of my comments are directed toward bringing about some fundamental shifts in public policy at the national level and setting the stage for effective Federal legislative initiatives.

NATIONAL HEALTH CARE SYSTEM

The single most important need is for the development of an adequate national system of financing good health care. I don't care whether it goes by the name of National Health Insurance, Health Security, or something else, we must have a comprehensive, national program of financing medical costs. To be effective, I strongly believe that such a system must contain the following elements:

It must provide for universal entitlement for all citizens;

It must be comprehensive in terms of coverage and compulsory;

It must have no barriers to service or participation, either geographic, economic, or other;

It must rely on public financing, preferably through a progressive tax on income;

It must recognize the special problems faced by rural people in obtaining adequate medical care and respond to the unique circumstances surrounding smaller, rural communities' participation in such a national system; and

It must be administered by a public agency or public corporation, free of domination by either the private insurance industry, organized medicine, or other special interests, and subject to full consumer control.

There are those who will quickly say that we simply cannot afford such a system of national health insurance. It costs too much! We have certainly heard a lot of that kind of talk during the recent national and congressional campaigns. Too frequently endorsement of a system of national health coverage has been linked with these imaginary budgetary constraints. For instance, some proponents have called for phasing in a national health insurance program only "as funds become available."

The fact is, we cannot afford our present health care system. We now spend over $100 billion annually on health care. That's over 8 percent of our gross national product, and all indications are that the health sector of our economy, if unchecked, will grow to even more alarming proportions. Currently we spend in this country roughly $500 per person per year on medical care, and yet we have been unable to provide a level of general care equal to many other countries which devote substantially smaller portions of their national resources to health care.

The fact is, and I am sure the new Carter Administration will quickly come to understand, that under most of the proposed national health insurance programs, we will not be spending any more for health care than we are spending now. What we would have, however, is a far more rationale system for allocating medical resources and services and for underwriting the basic health needs of most of our citizens.

Similarly, we must have a comprehensive system of health coverage. Any substitution of a partial program of health insurance such as medicare or medicaid, or others geared to special age groups or specific coverage, will, in the long run, leave out rural and other disadvantaged people. We have developed in this country a system of medical assistance which Max Fine has described as "Medigap" insurance. Since we tend to approach things incrementally, and since in the health area at least, much of our social legislation has been heavily influenced by both the insurance and medical industries, we have evolved a wholly inadequate program of partial reimbursements, gaps in coverage, and barriers to service which have little relationship to actual needs.

I say it is time we had an efficient national program, with universal coverage, and paid for by everyone in some proportion to their resources.

ACCESS TO DECENT HEALTH CARE

The establishment of a national program of health insurance will not automatically result in the provision of adequate health resources and services for rural people. Unless specific steps are taken and a conscious effort made to meet existing rural needs, the present imbalance in the allocation of health

personnel, facilities, and other health resources will continue.

We need to do two things. First, we need to develop an effective means for placing necessary services in rural areas. Simply put, we must have places where preventive and curative medicine can be provided. Capital funds to construct or rehabilitate offices, clinics, health centers, and hospitals in rural areas must be increased substantially. Similarly, funding the operation of those facilities, including the hiring of professional medical personnel, must be made available on a continuing basis.

The current Rural Health Initiative (RHI) and Health Underserved Rural Areas (HURA) projects may serve as useful models. But we must be prepared to move beyond the research and demonstration stage by committing sizeable amounts of public funds to the continuing operation of these important primary care facilities, and begin to integrate their functions into an overall publicly supported health delivery system. And finally, it is important that we do not overlook some of the existing health facilities in rural areas. There is a clear need to expand the activities and resources available to local public health departments to conduct health education, preventive as well as curative medical functions. Wherever they exist, publicly controlled institutions need to be strengthened, both by expanding their traditional public health roles and encouraging those local health agencies which are prepared to move into the provision of primary care directly in their communities.

The second major issue affecting rural people's access to decent health care runs to the existing overall shortage and maldistribution of trained medical personnel in this country. Unless we can make some dramatic changes in (1) the way we recruit and train our physicians and other medical personnel; (2) the way we finance medical education; (3) the way we allocate medical personnel; and (4) the way we license and utilize nonphysician providers of medical care—rural people will continue to be denied essential care.

In recent years, the costs of medical education have risen almost as quickly as the cost of medical care itself. One of the results is that increasing numbers of medical students come from non-rural, upper middle-class backgrounds. One out of every three is the son of a physician. And according to a study made by the U.S. Public Health Service, only 18 percent of medical students come from towns of less than 5,000 people. In part, these figures are reflected in the fact that increasing numbers of medical school graduates are locating in metropolitan areas, despite the existing concentration of physicians there. Senator Kennedy's office estimates that at the present rate, in the next 15 years, it can be expected that roughly 95 per cent of the doctors will be located in urban areas unless the present patterns are altered.

We agree with the American Medical Association and with the Association of American Medical Colleges that medical manpower training requires considerable public subsidy. But we insist that medical manpower and training is a public issue, and that policies affecting them ought to be decided by the American people, rather than by an exclusive coalition of doctors, deans, and demographers.

Additionally, we need to take new and fresh looks at the structure of medical practices and the way in which traditional medical services are delivered. Just as we need to stimulate, encourage, and support a variety of pre-paid group practices in rural areas, we also need to recognize nonphysician providers of medical care as major elements in the rural health care delivery structure, and work actively to remove all existing administrative and legal barriers to their fullest participation.

As a part of the effort to expand the availability of improved health care in rural and other manpower shortage areas, therefore, we need to move on several fronts simultaneously. With respect to existing shortages of medical personnel, the following would appear to be a minimal national agenda:

Dramatically expand the numbers of physicians and other health specialists now being trained;

Reduce the out of pocket cost of medical education to permit access by lower income and working class families;

Require service in rural areas and other manpower shortage areas for all medical school graduates;

Increase recruitment of rural and minority students;

Increase emphasis on primary care, general practitioner, and family medicine, and reduce specialization;

Increase support of special health education programs which offer training in rural areas; and

Expand utilization of non-physician providers in rural areas and remove existing reimbursements, licensure, and related constraints.

CONCLUSION

I hope that we can use the balance of this meeting to discuss further these and related issues affecting rural health care. I am most encouraged by the progress I have seen since our earlier meeting in April 1975. Certainly, the fundamental issues remain. But they are the same issues which are always present or confront those who seek social change in this country—the problems of commitment, of leadership, of resources. But what has emerged in the past 18 months, is a new association of people, a network of individuals and organizations seeking to improve conditions in rural areas. That organization, RURAL AMERICA, along with the people who share similar concerns, can make an important contribution to the continuing national stuggle for a decent health care system. I am most encouraged by the formation of RURAL AMERICA's Health Policy Committee, which I believe can provide a very useful forum for the exchange of information and ideas between rural groups as well as for deliberation on critical matters of policy. I have been pleased to chair the Health Advisory Council, as I hope I have been able to contribute to the purposes of this session. I look forward to obtaining your contributions during today's discussion.

TO GIVE RECOGNITION TO THE WOMEN'S AIR FORCE SERVICE PILOTS

Mr. DOLE. Mr. President, for 33 years the United States has neglected to correct a glaring injustice by granting active duty veterans' status to the Women's Air Force Service Pilots who served their country so valiantly in World War II. This discrepancy has been before Congress at regular intervals since 1944, but we have failed to act.

I am cosponsoring S. 247, which would recognize the service of the WASP's and make them eligible for veterans' benefits.

It will be recalled by some of my colleagues that only last year we passed H.R. 71, a bill to provide certain veterans' benefits to any citizen of Poland or Czechoslovakia who fought on the side of the Allies during World War II and who has been a citizen of the United States for at least 10 years. An amendment by the senior Senator From Arizona (Mr. GOLDWATER) was adopted by the Senate. That amendment would have provided that same eligibility for veterans' benefits to the WASP's—women who fought on the side of the allies and who were born American citizens. Four days later, the WASP amendment was rejected by the House, one of the stated reasons being that no hearings had been held on the question.

GREAT ACHIEVEMENTS BUT NO RECOGNITION

Mr. President, the record of the WASP's contains ample evidence of often heroic achievements under the most hazardous conditions without exceptions being asked or given because these pilots were women. Unfortunately, it also contains a history of deplorable inequities.

For instance, on October 2, 1944, at Victorville, Calif., an Army Air Corps B–25 bomber crashed and burned. The Air Corps lieutenant pilot, the WASP copilot, and the crew chief, an Air Corps sergeant, were all killed.

The two men received full military honors and their families received insurance payments and other veterans' privileges.

The WASP and her family received nothing.

This WASP was one of 38 who died while flying with the Army Air Corps. In each case the same treatment—or lack of treatment—was experienced by the WASP and those family members who survived her.

It is our badge of national dishonor that on more than one occasion these military pilots "passed the hat" to help defray burial costs of former comrades. Parents and relatives could not even display a gold star because the WASP's rated none of the death or separation benefits of their designated military counterparts.

And, while they took the same oath and flew the same airplanes in performance of the same hazardous flight missions, attended the same drill formations, and were subject to the same regulations and disciplines of their male counterparts, they were paid 20 percent less than male pilots in the Army Air Corps.

WASP'S BELIEVED THEY WOULD BE MILITARIZED

In spite of the danger and death experienced by this group of patriots, the fact is that the surviving WASP's—there are some 800 of these gallant women alive today—accepted these differences willingly because they believed them to be temporary. They anticipated the eventual formal militarization of their unit. When they took the oath, the WASP's believed they would be commissioned later into full military service.

As the Senator from Arizona (Mr. GOLDWATER) pointed out so convincingly when he introduced S. 247, the WASP program proved its merit. The Army Air Corps recommended to Congress in 1944 that the WASP's be officially militarized. This bill was approved by the House Military Affairs Committee and was reported favorably to the House of Representatives. The bill failed to pass, however, due mainly to the opposition of a well-organized lobby of civilian male pilots. The record of that debate is available and revealing. It could not have occurred today. Without the support of Congress, the Army realized it was unfair to allow these women to continue

their duties. The Army had no choice but to abolish the organization.

WASP'S STAND APART FROM OTHER WWII SERVICE GROUPS

There are still those who oppose WASP recognition. The main reason given is that recognition of the WASP's would force similar recognition of hundreds of World War II splinter groups who served with but not in our Armed Forces.

I do not agree. To me there are too many ways in which the WASP's stand apart from other civilian groups which could and might petition for recognition.

The WASP's were organized and trained from the outset to become a part of the Army Air Corps after being proven operationally effective.

The organization was tested and made to prove its military capabilities before being militarized.

During recruitment of personnel, new members were informed that they were to be militarized.

Members were required to take the same oath of office that the male officers took.

The WASP's were officially sponsored for militarization by the U.S. Armed Forces during the war years.

A special staff officers school was organized in preparation for commissioning its officers.

WASP's were decorated by military orders in military ceremonies. One woman received the Air Medal, a decoration which, by regulation, can only be given to military personnel.

Mr. President, the Senate Veterans' Affairs Committee has scheduled hearings on S. 247 for May 25. It is my hope that after these hearings are conducted the Senate will act quickly and favorably to give long overdue recognition to the Women's Air Forces Service Pilots.

ANNOUNCEMENT OF REDUCTION IN DAYS OF PUBLICATION OF COMMITTEE SCHEDULES

Mr. CANNON. Mr. President, title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the office designated by the Rules Committee—of the time, place, and purpose of all meetings when scheduled, and any cancellations or changes in meetings as they occur.

As an interim procedure until the computerization of this information becomes operational, the office of the Senate Daily Digest prepares such information daily for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD.

The cooperation of committees in notifying the Daily Digest office of their meeting schedules has been outstanding. This response is very gratifying to those of us who seek ways to assist committees to avoid scheduling meeting times that conflict with other important business of the Senate. I am informed that committees have found this information very helpful in planning meetings.

I am also aware that "subscribers" to the RECORD not in the Congress find it very helpful in being aware of what is coming and scheduling appearance at hearings. Its value should increase even more as we become accustomed to its use.

There is one aspect of the publication that gives me some concern. Some days the publication of committee schedules covers at least 5 pages in the Extensions of Remarks. Some days it has reached 8 pages. The Public Printer has calculated the cost per page of the CONGRESSIONAL RECORD to be in excess of $300. Therefore, each day we spend $1,500 to $2,400 in printing costs. The Joint Committee on Printing, the Daily Digest office, and the Rules Committee have studied several approaches to reducing this cost. The most feasible solution seems to be to reduce the days of publication.

As Senators know, in each Friday's issue of the CONGRESSIONAL RECORD, the Daily Digest contains a list of committee meetings scheduled for the following week in the heading "Congressional Program Ahead." Therefore, if we limit publication of the entire schedules to 2 days each week, Monday and Wednesday, and continue the publication of the "Congressional Program Ahead" on Friday, information relating to committee schedules will appear 3 times each week.

I believe this is a reasonable compromise between cost and the need to inform.

Mr. President, I wish to announce that this change will become effective May 2, 1977.

BAN ON SACCHARIN

Mr. TOWER. Mr. President, I would like to insert in the RECORD the official position of the American Cancer Society opposing the ban on saccharin. Dr. R. Lee Clark, who is president of the American Cancer Society as well as president of the University of Texas System Cancer Center, has been kind enough to provide me with this statement.

No one has questioned the motives behind FDA's exercise of responsibility as delegated by specific language of the Delaney amendment and by the Food, Drug, and Cosmetic Act. That responsibility is to protect the public. However, the people have been protesting in massive numbers about being protected from a risk they deem insignificant.

As FDA points out, there is no evidence that saccharin has ever caused cancer in human beings. We do know from the flood of letters and phone calls that withdrawal of saccharin from the market as a food additive will cause great personal harm. FDA now lacks the regulatory flexibility to make such risk/benefit decisions, and it is my contention that it should not have the authority to interfere in what is obviously a very personal decision.

We do not want to be protected against our will nor deprived of the ability to exercise our own judgment in such matters. It is time that we stopped and reexamined the steady depletion of our personal freedoms in the name of consumer protection.

Mr. President, I ask unanimous consent that this statement by an association dedicated to the prevention and cure of cancer, but which nevertheless urges an exemption for saccharin, be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT OF THE AMERICAN CANCER SOCIETY ON SACCHARIN, MARCH 25, 1977

It is clear that the Food and Drug Administration acted properly under the Delaney Amendment to the Food, Drug and Cosmetic Act in banning saccharin. If a food additive induces cancer in animals or in man, under appropriate tests, the law demands that it must be banned.

The Delaney principle is basically sound. The American Cancer Society wants to reduce exposure to all identifiable carcinogens whenever feasible.

But as a major national voluntary health agency whose primary responsibility is cancer, the American Cancer Society is vitally concerned with the general health and well-being of the public. Saccharin is of great value in dietetic foods used to help control diabetes and obesity, which afflict tens of millions of Americans and pose more immediate dangers than the possible carcinogenicity of saccharin. Banning saccharin may cause great harm to many citizens while protecting a theoretical few.

The Delaney Amendment has served the public well. But as more sophisticated and quantitative technology becomes available, issues of dosage, cost-benefit, risk-benefit, and the predictability of animal data to potential impact in people must be further and better evaluated.

All the evidence for and against saccharin should be further studied by independent scientists so that a course of action could be determined which would be of greatest benefit to the public. Although there is no evidence that saccharin causes human cancer, the Society's Department of Epidemiology and Statistics will be investigating this most important aspect of the problem.

In addition, saccharin requires special review by the Congress to determine if it should be exempt from the Delaney Amendment because of its importance at the present time in medical and health matters.

COMMUNITY DEVELOPMENT

Mr. SPARKMAN. Mr. President, I would like to urge my colleagues to support amendment No. 207 to the proposed budget resolution in order to restore housing and community development funds requested by the administration.

I was disappointed that the Budget Committee chose to cut back over $6 billion in housing assistance and $500 million in community development aid to local governments.

The community development program is now just 3 years old. Local governments throughout the country have declared the program a success. To cut back the funding requested by the President after thorough review by his Office of Management and Budget and after recommendations by both the Committee on Banking, Housing, and Urban Affairs and the Committee on Appropriations just does not make sense to me.

I understand that on the House side all of the involved committees—the Committee on Banking, Finance and Urban Affairs, the Committee on Appropriations, and the Committee on the Budget—have approved the President's request.

I am particularly disturbed by the cutback in housing assistance proposed by the Committee on the Budget. As one who has worked for many years to improve the Nation's housing, I have high hopes that the new administration will produce results. They are needed because, as you know, the past administration effectively shut down the Federal housing programs in 1973, and they are only now beginning to be implemented again. I cannot understand why when the new administration wants to carry out the housing goals set by the Congress, the Committee on the Budget would deny them the tools. This is the time to give the President the authority he has requested—not to deny him what he needs.

HUD has provided me with a State-by-State estimate of the reductions in housing units that will occur should the budget cuts be maintained. A corresponding estimate of the reduction in potential employment also has been prepared. I ask unanimous consent that a table presenting this information be printed in the RECORD at this point.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Potential impact of proposed reduction of $6.2 billion in housing budget authority, fiscal year 1978, by region and State

	Decrease in housing units	Decrease in potential jobs
Boston region:		
Connecticut	908	1,816
Massachusetts	1,855	3,710
New Hampshire	236	472
Maine	383	766
Rhode Island	304	608
Vermont	146	292
New York region:		
New Jersey	2,225	4,450
New York	6,844	13,688
Puerto Rico	2,781	5,562
Philadelphia region:		
District of Columbia	817	1,634
Maryland	850	1,700
Pennsylvania	3,841	7,682
Virginia	1,445	2,890
Delaware	141	282
West Virginia	696	1,392
Atlanta region:		
Alabama	1,721	3,442
Florida	3,107	6,214
Georgia	1,826	3,652
Kentucky	1,253	2,506
Mississippi	792	1,584
North Carolina	1,941	3,882
South Carolina	1,060	2,120
Tennessee	1,840	3,680
Chicago region:		
Illinois	3,652	7,304
Indiana	1,688	3,376
Michigan	2,590	5,180
Minnesota	1,324	2,648
Ohio	3,409	6,818
Wisconsin	1,464	2,928
Dallas region:		
Arkansas	886	1,772
Louisiana	1,633	3,266
Oklahoma	818	1,636
Texas	4,288	8,576
New Mexico	356	712
Kansas City region:		
Kansas	440	880

Denver region:		
Colorado	962	1,924
Montana	189	378
North Dakota	148	296
South Dakota	164	328
Utah	444	888
Wyoming	56	112
San Francisco region:		
California	6,430	12,860
Hawaii	653	1,306
Arizona	834	1,668
Nevada	181	362
Seattle region:		
Oregon	796	1,592
Washington	1,043	2,086
Alaska	107	214
Idaho	182	364
Nationwide	75,000	150,000

Mr. SPARKMAN. Mr. President, I believe this information will be of use to all of the Members in considering the action taken by the Committee on the Budget, and the amendment to restore the funds requested by the administration in its budget for fiscal year 1978.

I believe that when my colleagues consider the adverse effects that cutbacks in housing and community development assistance will have, they will vote to support the administration's budget proposals by supporting the amendment No. 207 to the First Budget Resolution for fiscal year 1978.

FLUOROCARBON LABELING REGULATIONS

Mr. HATFIELD. Mr. President, yesterday the Food and Drug Administration and the Consumer Product Safety Administration made important announcements regarding the use of fluorocarbon gases in aerosol spray products. Both agencies have announced their intention to require that all products containing these fluorocarbons be so labeled. The label would read: "Warning: contains a chlorofluorocarbon that may harm the public health and environment by reducing ozone in the upper atmosphere."

The labeling requirement of the FDA is to become effective on October 31, 1977. The CPSC's order is not due to become effective for at least 7 months. Between the two agencies most of the products containing these fluorocarbons should be required to carry the warning label.

It is my hope that these actions will be a prelude to the eventual banning of all nonessential uses of aerosol products containing these gases, which have been proven harmful to the ozone layer in the Earth's upper atmosphere. Further damage to this protective ozone layer will result in an increase in the incidence of skin cancer as a result of the atmosphere's reduced ability to filter out the more harmful rays of the sun.

I have cosponsored legislation, sponsored by my colleague from Oregon, Senator PACKWOOD, to ban all nonessential uses of fluorocarbons, and the State of Oregon enacted legislation recently along these lines. I applaud this preliminary step by the Food and Drug Administration and the Consumer Product Safety Commission, and hope that this will lead to even stronger controls in the future.

PROPOSED ARMS SALES

Mr. SPARKMAN. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $25 million or, in the case of major defense equipment as defined in the act, those in excess of $7 million. Upon such notification from the Department of Defense the Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulates that, in the Senate, the notification of proposed sale shall be sent to the chairman of the Foreign Relations Committee.

In keeping with my intention to see that such information is immediately available to the full Senate, I ask unanimous consent to have printed in the RECORD at this point the three notifications I have just received. A portion of the notifications which is classified information has been deleted for publication, but is available to Senators in the office of the Foreign Relations Committee, room S-116 in the Capitol.

There being no objection, the notifications were ordered to be printed in the RECORD, as follows:

TRANSMITTAL NO. 77-17, NOTICE OF PROPOSED ISSUANCE OF LETTER OF OFFER PURSUANT TO SECTION 36(b) OF THE ARMS EXPORT CONTROL ACT

(i) Prospective Purchaser: Israel.

(ii) Total Estimated Value:

[In millions]

Major defense equipment*	$70.8
Other	15.8
Total	86.6

*As included in the U.S. Munitions List, a part of the International Traffic in Arms Regulations (ITAR).

(iii) Description of Articles or Services Offered:

[Deleted] M-60A1 tanks and 1-year concurrent spare parts.

(iv) Military Department: Army.

(v) Sales Commission, Fee, etc., Paid, Offered or Agreed To Be Paid: None.

(vi) Date Report Delivered to Congress: April 25, 1977.

TRANSMITTAL NO. 77-18, NOTICE OF PROPOSED ISSUANCE OF LETTER OF OFFER PURSUANT TO SECTION 36(b) OF THE ARMS EXPORT CONTROL ACT

(i) Prospective Purchaser: Israel.

(ii) Total Estimated Value:

[In millions]

Major defense equipment*	$41.2
Other	12.5
Total	53.7

*As included in the U.S. Munitions List, a part of the International Traffic in Arms Regulations (ITAR).

(iii) Description of Articles or Services Offered:

[Deleted] howitzers [deleted] and 1-year concurrent spare parts.

(iv) Military Department: Army.

(v) Sales Commission, Fee, etc., Paid, Offered or Agreed To Be Paid: None.

(vi) Date Report Delivered to Congress: April 25, 1977.

TRANSMITTAL NO. 77-26, NOTICE OF PROPOSED ISSUANCE OF LETTER OF OFFER PURSUANT TO SECTION 36(b) OF THE ARMS EXPORT CONTROL ACT

(i) Prospective Purchaser: Republic of Korea.

(ii) Total Estimated Value:

[In millions]

Major defense equipment*	$32.4
Other	50.3
Total	82.7

*As included in the U.S. Munitions List, a part of the International Traffic in Arms Regulations (ITAR).

(iii) Description of Articles or Services Offered:

Modification kits to convert [deleted] battalions of basic Hawk to Improved Hawk configuration and 304 I-Hawk missiles.

(iv) Military Department: Army.

(v) Sales Commission, Fee, etc., Paid, Offered or Agreed To Be Paid: None.

(vi) Date Report Delivered to Congress: April 25, 1977.

FDA DECISIONMAKING AND SACCHARIN

Mr. HELMS. Mr. President, few regulatory actions by the Federal bureaucracy have raised as much public surprise and protest as has the recent Food and Drug Administration decision to ban saccharin from the American market. The FDA decision to ban saccharin was based upon a Canadian study which found that saccharin, when fed to rats in high doses, caused cancer. However, previous tests conducted in this country and elsewhere have not concluded that saccharin causes cancer in humans. Indeed, Americans have been consuming saccharin for about 80 years with no medical evidence that it causes cancer in humans. Against this background, the FDA action caused a storm of complaints and a broad public outcry. Furthermore, the fact that the Canadian study force fed rats the equivalent of 800 12-ounce cans of diet soda or 6,700 pieces of sugar-free chewing gum per day did not reassure the American public of the soundness of the FDA decision.

This decision to ban saccharin upon such slight and inconclusive evidence is even more astounding when one remembers that there are over 10 million diabetics in this country who must avoid consuming sugar. Millions of other Americans suffer from different conditions which also require them to restrict their consumption of sugar. Shortly after the ban on saccharin was announced, one leading heart specialist warned that the ban could result in as many as 25,000 more heart attacks each year.

Mr. President, on March 18, I joined with my colleagues, Senators SCHWEIKER, DOLE, HATFIELD, and RANDOLPH in introducing the "Food Additive Safety Amendments of 1977," S. 1046, in response to the Food and Drug Administration's proposed ban of saccharin.

This legislation amends the Federal Food, Drug, and Cosmetic Act so that before a food additive like saccharin may be banned by FDA, an evaluation of the risks and benefits of banning the product may be made, and that in the case of saccharin, it not be banned until such an evaluation has been made. This bill provides that in making such a finding, the Secretary of Health, Education, and Welfare shall consider the intake level at which the food additive causes cancer in animals, the quality of the test data, human consumption and exposure to the food additive and the available means of limiting human exposure to the additive. S. 1046 creates a special advisory committee made up of scientists, nutritionists, consumer and industry representatives, as well as other experts to assist the Secretary in making this risk/benefit determination. This bill also provides that the Secretary publish his proposed decision in the Federal Register and allow a time period for members of the public to comment on the decision before it becomes final. The provisions of this bill are similar to legislation introduced in the House by my friend and fellow North Carolinian, Representative JIM MARTIN.

Mr. President, I am pleased to cosponsor this bill. I will support any reasonable proposal to curb the excessive ardor of FDA bureaucrats. I have been concerned for sometime that the present regulatory mentality of officials at the Food and Drug Administration has overemphasized the potential risks of a product entering the market while neglecting the real and proven cost in lives and suffering when such a product is kept off the market.

For example, although there is no artificial sweetener to replace saccharin presently on the market, a new artificial sweetener made from orange and grapefruit rinds which is 1,500 times sweeter than sugar was discovered 10 years ago. However, it will still be sometime before FDA approves its use, since the company has not yet concluded the extensive number of tests required by FDA officials.

Turning for a moment to another area of FDA regulation, while 23 million Americans suffer with high blood pressure, a condition causing thousands of deaths yearly, not one new, antihypertension drug has been introduced in the United States since 1963. While more than 20 such drugs are being used in Europe, only one, and the oldest one at that, is available in the United States. One leading authority in the area of drug regulation estimates that this delay in introducing new drugs for this one condition alone is causing 10,000 unnecessary deaths annually in this country.

During the next few days, I intend to introduce legislation entitled the "Medical Freedom of Choice Act." This bill will reform procedures which presently delay the introduction of important new drugs into the American market. This legislation will allow Congress the opportunity to investigate on a broader scale the decisionmaking process at the Food and Drug Administration and make it more responsive to the American consumer.

PROF. CHENEY C. JOSEPH, JR.

Mr. JOHNSTON. Mr. President, within the next few weeks, the middle district of Louisiana will be losing an able and distinguished U.S. Attorney. Cheney C. Joseph, Jr., will be returning to his teaching responsibilities as associate professor of law, Louisiana State University, after serving for 10 months as U.S. Attorney.

When first approached by the district court in anticipation of the upcoming need for an interim appointee, Professor Joseph agreed, thereby demonstrating his dedication not only as an officer of the court but also as a servant of the law. He assumed the unfamiliar responsibilities of his new office with enthusiasm; immediately encountered serious and sensitive criminal investigations which were concluded successfully through the exercise of professional and mature judgment; and implemented policies and procedures in furtherance of his philosophical dedication to efficient, swift, and sure justice.

During his tenure in office, Mr. Joseph refused to play the role of a caretaker, even though his was an interim appointment. With a zeal for prompt and thorough handling of all cases, he plunged himself into every phase of the work of the office. No job was too menial, no task too burdensome. His organizational talent revealed itself by statistics indicating a tremendous increase in the number of cases handled with no resultant backlog.

I am informed that Professor Joseph has earned the respect and admiration of the various Federal, State, and local agencies which have dealt with him during his tenure, and I am likewise assured of the high esteem in which he is held by all personnel of the district court, in full affirmance of the original decision made by that court.

The body politic is indeed deeply indebted to Professor Joseph for his public service, and surely should, by this medium, transmit to him our heartiest "Well done and thank you."

EXAMPLES OF CONTINUED REASONS FOR CONCERN ABOUT SOVIET STANCE ON HUMAN RIGHTS

Mr. CASE. Mr. President, in the wake of the Soviet Union's rejection of the SALT proposals, some second guessers are suggesting that Moscow's reaction was affected by its displeasure at criticism of its violations of human rights. Some are even questioning why the United States should have raised the issue.

To the first point, I am satisfied after studying the reports of the meetings, including the testimony by Secretary Vance to the Senate Foreign Relations Committee, that the human rights controversy was not the reason for Moscow's rejection of the U.S. proposals. A SALT agreement is so important that it stands on its own. The proposals would have

been rejected—or accepted—regardless of Moscow's irritation at those in the administration, Congress, the rest of the Western World who believe the pledges of the Helsinki accord should be honored.

As to the second point, concern for human rights is a basic part of the American political, social, and historic fabric. We have not always achieved fulfillment of the ideals, even at home. But these ideals exist and we cannot forsake them. They were the motivating force behind our civil rights legislation, and they color our attitudes toward other nations, whether they be repressive regimes of the right or of the left, as manifested in the human rights amendments to the foreign aid legislation.

Even as the SALT talks were in process, certain incidents took place which can only add to our concern. I cite these incidents not to show another reason for criticizing the Soviet Government's actions, but to try to help them and others understand why we cannot turn a blind eye to our fellow human beings and the promises made to them by the Soviet Union as a signatory to the Helsinki accord.

A specific example took place recently in Leningrad. Even as Secretary of State Vance was meeting Soviet officials in Moscow, a young Russian who had sought to emigrate was hospitalized last week after apparently receiving the "burn treatment."

The person is Ilya Levin, a 28-year-old linguist and editor. According to those in the United States who talked to him by telephone, and later verified by U.S. officials, he attended a function at the Leningrad writer's club March 11, and after returning to his table, suddenly noticed a burning sensation. Later, severe burns and blisters developed on his leg and side, which caused him to be bedridden and finally hospitalized. The burns were diagnosed by a Russian doctor as chemical burns. According to the Helsinki Commission staff, there had been at least two other reported incidents in Leningrad during the past year or two in which activists had developed chemical burns—in one case after interrogation by the police.

This was not the first instance of "difficulties" suffered by Mr. Levin who, incidentally, has been accepted as a student at a Texas university if only he can get permission to emigrate. In December, he was arrested for 15 days to prevent him from attending the Jewish cultural symposium being held then in Moscow. In February, he was accused in a Leningrad newspaper of "trafficking in anti-Soviet slander with a West German diplomat."

This excerpt from the Soviet press indicates the extent to which the authorities use the possibility of foreign connections as a way of branding someone as "anti-Soviet." Thus, Soviet press statements play on and enhance what may or may not be genuine popular fear and suspicion of foreigners, linking both Soviet dissent and Jewish emigration to Western propaganda, emigre groups or even the CIA. Certainly such tactics are contrary to détente and the spirit of Helsinki.

The Soviet authorities do not restrict their activities to attempts to isolate dissidents and Jewish activitists, but also try to cut off the average Soviet citizen from contacts with the West.

People in the United States and in Israel who have relatives and friends in the Soviet Union recently have had even more difficulty than usual in maintaining contacts both by mail and by telephone.

I recently was told of an instance when it took 4 days of concerted efforts to reach someone in Moscow. The callers from the West were told that no one was home—although at one point the caller heard a familiar voice answer the phone and then it was abruptly cut off by the operator saying that there was no answer. When contact was finally made, the person in Moscow maintained that he heard the phone ringing, but it went dead as soon as he answered it.

Earlier events revealed that the official Soviet attitude of anti-Semitism is once again in high gear: Soviet television repeated a prime-time screening of "Buyers of Souls," a documentary which accused Israel and Zionists of using false promises to "lure" Jews into emigrating to Israel, and Izvestiya published a "confession" of a Soviet former Jewish activist in which he accused many leading Jewish dissidents, including Anatoly Shcharansky, Aleksandr Lerner, Vitaly Rubin and Vladimir Slepak, of being agents of the CIA. Since nothing appears in Soviet media without the active approval of the Government, these virulent expressions of official disapproval were expected to forebode further action on the part of the Soviet authorities.

Such action came of March 16, 1977, when Anatoly Shcharansky was arrested as he left Vladimir Slepak's apartment—where he had been staying since the ominous article in Izvestiya—to go across the street to make a phone call. No sooner did Mr. Shcharansky go into the hall, then he was seized by plainclothesmen—as two Western newsmen looked on helplessly—taken downstairs, and bundled into a waiting car. The Izvestiya article gives clear evidence on the reasons why the Soviets decided to arrest Shcharansky:

> Being alarmed by the prospect of declining interest in them by their foreign masters who have given them considerable material aid, they (Aleksandr Lerner and Vitaly Rubin) decided to team up with the so-called "Group for the Observation of the Fulfillment of the Helsinki Accords" headed by Yu. Orlov. V. Rubin was introduced into the group and then A. Shcharansky. This idea was presented by foreign correspondents (the article goes on to lambaste Alfred Friendly, Peter Osnos, and George Krimsky, the AP reporter who had just been expelled from the Soviet Union) as a step towards the consolidation of persons struggling for "human rights" in the USSR.

Shcharansky had served as an important link with the West and foreign newsmen—his excellent command of English had been useful for both Jewish activists and dissidents in communicating their news to the outside world—and this was an area of his activity which the Soviets particularly disliked.

Thus, Shcharansky's arrest was the culmination of a carefully orchestrated campaign both to discourage dissent and to dampen Soviet Jewish enthusiasm for emigrating to Israel. It appears that the end result of this official campaign against Shcharansky will be to charge him with espionage which, of course, is an extremely serious offense carrying very heavy penalties under Soviet law.

Surely such action on the part of the Soviet Government do not bode well for their fulfilling the promises they made at Helsinki. Greater freedom of information and human contacts were two of the areas which are covered in the basic three provisions of the Helsinki Final Act. I hope that the Soviet Government demonstrates its serious intention to fulfill some of the obligations it solemnly undertook at Helsinki by releasing Anatoly Shcharansky, Aleksandr Ginzburg, Yuri Orlov, and members of the Ukrainian-Helsinki group—Mykola Rudenko and Oleksiy Tykhy who are being punished only for actively collecting information about the Soviet record of compliance with the basic three provisions of the accords. I also call upon the Soviet authorities to grant some of the emigration requests by Soviet Jews such as Ilya Levin, Aleksandr Levich, Vladimir Slepak, and Anatoly Shcharansky—requests which the U.S.S.R. promised at Helsinki "to deal with in a positive and humanitarian spirit."

CABINET-LEVEL DEPARTMENT OF EDUCATION

Mr. JOHNSTON. Mr. President, it is a distinct pleasure to join with my colleagues in cosponsoring legislation to create a separate, Cabinet-level Department of Education.

Our Nation, since its earliest days, has been aware of the importance of education. We have consistently strived for the best in the education of our children; and that striving has resulted in obvious rewards in terms of the enormous growth of our Nation, its industry, its contributions to science and culture throughout the world.

The time has come, however, to refocus these efforts. Past involvement in the educational field by the Federal Government has insured the right to a free public education, the right to education for the handicapped, special aids for disadvantaged children, and highlighted the importance of continuing education for all our people, no matter their age. The value of vocational education has been recognized by the Congress and our efforts there are coming to fruition. But the vast array of programs has not led to the development of a truly comprehensive and coordinated policy on the part of the Federal Government.

The budget of the Office of Education, within the Department of HEW, is larger than many full Cabinet departments. Yet the Secretary of HEW in the course of his myriad responsibilities is unable to provide the attention and leadership

necessary to really develop this necessary cohesiveness within the Office of Education. I believe the time has come to recognize the importance of this organization to the education of our young people, and to the future of our country.

In order to do this, we must take this final step of consolidating all the education programs in a single, Cabinet-level Department of Education. Nearly one of every three of our citizens is involved in the educational process. It is incumbent upon this body to give that process a distinct and separate integrity. For these reasons, I am hopeful that we will see hearings on this important legislation in the very near future.

THE ALASKA GASLINE AND CANADIAN INTERESTS

Mr. STEVENS. Mr. President, the Federal Power Commission will soon make its recommendation regarding a system to transport Prudhoe Bay natural gas to the lower 48 States.

The FPC will recommend one of the three alternatives: the all-Alaska LNG project or one of two routes crossing Canada.

This decision is of great importance to Alaska and to the rest of the United States. It is also important to Canada, but in a different way than to the United States.

The Alaskan North Slope has a lot of natural gas. And the rest of the United States has a great need for more natural gas, as we saw this past winter. Alaska could be providing more than 12 percent of the U.S. gas supply by the year 2000, if the appropriate transportation systems are approved and constructed.

Those who advocate a pipeline across Canada to connect U.S. supply to U.S. demand must promise something to our Canadian neighbors to get their interest in the project, because the costs to Canada of such a project could be very great.

The proposed arctic gas project would pass through the Mackenzie Valley, where Native claims must first be resolved. Just today, an article appeared on the front page of the Wall Street Journal on this matter. The Natives insist upon settlement before a pipeline. They are not all unalterably opposed to any pipeline; but they insist upon a big share of the economic benefits and upon consideration of their other interests.

Sam Raddi, who testified earlier this year before the House Indians Affairs and Public Lands Subcommittee, is quoted as saying,

We don't want it and we don't need it, but we realize those resources will be taken out. What we must do is prepare for development and try to gain from it as much as possible for our people.

The story goes on to say,

But if the Canadian government breaks its promise of a fair deal, he warns, native groups will sue to try to block the pipeline.

As my colleagues will recall, the settlement of Native claims in Alaska, which was necessary before the construction of the trans-Alaska oil pipeline could begin, was a long and costly process. A Canadian settlement will be no easier and no less costly.

The Canadian Government would not push a settlement for the sake of a pipeline unless they have a lot to gain from the pipeline. And I do not think they do.

The proponents of the Arctic Gas line claim that their proposal would serve the Canadian national interior by facilitating the transportation of Canada's Mackenzie Delta gas to Canadian markets. That might be a nice idea, except for two facts:

First, the Mackenzie Delta does not have all that much gas. There is much more gas in another frontier region of Canada, the Arctic Islands. Sixteen trillion cubic feet (TcF) have been found here compared to less than 6 TcF in the Mackenzie Delta. Canadians might do better to invest in the Polar Gas project to bring this Arctic Islands gas to market.

Second, even if there was plenty of gas in the Mackenzie Delta, Canadian markets do not need it. Canadian producers are complaining that a surplus is making it extremely difficult to find buyers for their gas. Mackenzie gas would have to be exported to the United States to make the Canadian investment pay off. The producers and U.S. consumers might like that. But I doubt that the Canadian people or their government would go for it.

I have some excerpts from a statement by Mr. E. C. Phillips, whose Westcoast Transmission Co. has a share in the competing Alcan project. He says, in short, the Arctic Gas project is simply not in the Canadian national interest. There are not enough pluses to make it worthwhile for the Canadians to undertake the burden of expediting the settlement of Native claims or the risk of losing control over Northern development.

Mr. Phillips says that the project must be seen as a U.S. project only, without any attempt to "piggyback" Canadian gas. Thus he advocates the Alcan project.

Mr. President, these questions must be addressed. I urge the Senate to take a critical look at the arguments for and against a pipeline through Canada. So I ask unanimous consent to have printed in the RECORD these three press clippings.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Wall Street Journal, Apr. 27, 1977]

CANADIAN NATIVES SAY THEIR RIGHTS COME BEFORE ANY PIPELINE

(By Dorothea Katzenstein and Alan Bayless)

INUVIK, NORTHWEST TERRITORIES—Though its midday temperature lingers below zero even in springtime, this outpost 200 miles north of the Arctic Circle is getting a lot of visitors these days. Inuvik lies on the route of a proposed pipeline from Arctic natural-gas fields, and increasing controversy about the pipeline plan is making the settlement of 3,300 a familiar spot to government officials, executives and engineers who until recently had never heard of the place.

Inuvik is also the base of a group called the Committee for Original People's Entitlement. It represents the region's Inuit, or Eskimos, one of three groups of Canadian natives who are claiming a fifth of Canada's land. The Inuit, the Indians and the Metis (people of mixed white and Indian ancestry) differ on some matters, but they agree that their land claims must be settled before any major development of the mineral-rich frontier can take place.

The Canadian government hasn't decided what to do about a pipeline, nor about the natives' claims. It will be strongly influenced, however, by a royal-commission report due next month that will recommend ways to protect the northern culture and environment if a pipeline is built. Another ruling coming out even sooner also will affect matters. The U.S. Federal Power Commission must say by May 1 whether it thinks a pipeline should run through the disputed land or elsewhere.

NATIVES AREN'T UNITED

The Canadian natives are far from united about the pipeline. Leaders of Northwest Territories Indians adamantly oppose it, saying it threatens hunting, fishing, and trapping grounds. The Metis favor the project but insist that land claims be settled first. The local Inuit (they dislike the term Eskimo, which means eater of raw flesh) won't fight the pipeline if a land settlement first assures them of a share in its bounty. But this group has broken with the national Inuit organization over negotiating tactics. And the Indians of the Yukon, to the West, are bargaining separately.

Native leaders agree, however, that the push for a pipeline could give them the leverage to wring from the government a settlement of their long-standing land claims. "Before the pipeline, no one gave a damn about the North," says Ram Raddi, a blind ex-trapper who heads the Inuit Committee for Original People's Entitlement. "Now we have something to bargain with, and this time we aren't going to lose."

The 30,000 Canadian natives claim ownership of the land through native title as the region's first settlers. Indian groups contend that documents signed generations ago were understood by their ancestors as expressions of friendship, not treaties ceding land to Canada.

This concept of native or, as it sometimes is called, aboriginal right has gained some recognition in Canada. It was also such a claim that Alaskan natives pressed, holding up an Alaska pipeline, before Congress in 1971 promised 40 million acres and about $1 billion over 20 years. The Canadian natives acknowledge a debt to the Alaskans but say they wouldn't settle on the same terms because the Alaska Native Claims Act eventually extinguishes natives' special status.

RIGHTS "AREN'T FOR SALE"

"We want recognition of our rights, not an end to them," says Georges Erasmus, president of the 7,000-member Indian Brotherhood of the Northwest Territories. "They're not for sale."

The Northern natives also believe their cause has gained credibility from Quebec's recent election of a separatist government. "Quebec raised the question of whether two cultures, French and English, can exist within one country," Mr. Erasmus says. "We're asking the same question about the culture of Canada's original people."

The natives don't seek secession, however. Northwest Territories Indians want an "Indian nation" within Canada with "exclusive political jurisdiction," Mr. Erasmus says. The Inuit hope for a new territory to be called Nunavut, meaning "our land."

The various groups haven't said just what it would take to settle their claims to 750,000 square miles—more than Alaska and California combined—in the Northwest Territories and the Yukon. But they will insist on semi-autonomy and a voice in resource development. They also probably will demand mineral royalties and structures such as native corporations to ensure long-term economic benefits for the North.

While Canada tries to decide what to do about the Northerners' claims, its National Energy Board and the U.S. Federal Power Commission are weighing possible ways to bring natural gas south. One plan got an important boost in February when an FPC administrative law judge, Nahum Litt, recommended a Mackenzie Valley pipeline proposed by Canadian Arctic Gas Pipeline Ltd, a consortium of 15 U.S. and Canadian concerns. The $10.4 billion line would begin on the Alaskan North Slope, run southeast to the Mackenzie Delta to pick up Canadian gas and then head south. At a spot in Alberta near the U.S. border it would split, one leg going to the U.S. Pacific coast and one to the Midwest.

The FPC official rejected a plan by an El Paso Co. unit to transport only Alaskan gas, piping it through the state to the Pacific coast and taking it from there to California by tanker.

Mr. Litt also opposed a pipeline along the Alaska Highway corridor proposed by Alcan Pipeline Co., a unit of Northwest Energy Co. of Salt Lake City, and by three Canadian concerns. A Canadian panel recently began looking into the impact this plan would have on the Yukon Territory, through which it would pass. The three Canadian companies associated with Alcan also have proposed a separate pipeline through the Northwest Territories' Mackenzie Valley.

The FPC has to tell President Carter by May 1 which project it prefers. He then can take until Dec. 1 to choose a pipeline plan. His decision will be final for the U.S. unless Congress rejects it.

Once that decision is made, U.S. interests are likely to be impatient with delays in final approval stemming from land claims or other internal Canadian issues. The Arctic Gas consortium says that if it is chosen it will proceed with construction even if native land claims aren't settled. Alcan officials believe the claims must be settled before construction to ensure security, and they are considering offering natives some equity participation. The pipeline proposed by El Paso Alaska Co. wouldn't enter Canada.

Canada's government says it will make an independent ruling on the pipeline proposals based on its own economic and energy needs. It hopes to decide by September after weighing reports from the National Energy Board, from the panel looking at the Alcan plan's impact and from a royal commission studying social, environmental and economic effects of a Mackenzie Valley pipeline.

The royal commission, headed by British Columbia Supreme Court Judge Thomas Berger, has held 20 months of hearings, sometimes traveling to isolated northern settlements by dog sled or canoe for a first-hand look. Among hearing sites was the Yukon village of Old Crow, where investigators were told of an organized community dating back 1,000 years and of archaeological evidence that human beings had lived in the area 27,000 years ago.

"Many of us began to wonder," says Michael Jackson, a member of the commission, "whether we have the right to risk disappearance of a culture this old for a pipeline with a life span of 20 or 30 years that, in any case, offers no long-term energy solution."

The commission's staff recommended last fall that any pipeline be delayed for 10 to 15 years after a settlement of the Canadian natives' land claims. The delay would give natives time to set up institutions to guarantee a secure political, social and economic base, the staff members said. They cautioned that threats of sabotage against an unwanted pipeline should be taken seriously, and they warned that ignoring natives' wishes could turn the Canadian North into "an arena for a war of liberation." The commission isn't bound by its staff's views.

Not all Northern natives think their land claims are incompatible with developing natural resources. Richard Hardy, leader of the Metis, says most native people have left the land to live in villages, and what they need is economic independence. Metis view the proposed pipeline "as one of the economic projects we wish to take part in," Mr. Hardy says.

Sam Raddi, the Inuit ex-trapper, says of the pipeline: "We don't want it and we don't need it, but we realize those resources will be taken out. What we must do is prepare for development and try to gain from it as much as possible for our people." But if the Canadian government breaks its promise of a fair deal, he warns, native groups will sue to try to block the pipeline.

The Indian Brotherhood led by Georges Erasmus has emerged as the most militant group. If a pipeline company begins construction before the natives' land claims are settled "some of us will be very unhappy," the Indian leader warns. And he adds: "We're prepared to organize in any way necessary to protect our rights."

[From the Oil & Gas Journal, Apr. 18, 1977]

POLAR GAS TO FILE FOR ARCTIC ISLANDS GAS LINE

The Polar Gas Project has set September as target date for filing applications to lay a 2,300-mile pipeline along a route west of Hudson Bay to tap natural-gas supplies in the Canadian Arctic Islands.

John D. Houlding, president of the six-company consortium, says start of construction hinges upon issuance of permits by Canada's National Energy Board (NEB). Completion of the project to move gas to southern Canada would come within 5 years following receipt of permits.

Although reserves in the prime supply area, Melville Island, are still shy of the 20-trillion-cu ft threshold volume, the line is being designed to move an initial 2.5 billion cfd through a 48-in. buried system. The line will be refrigerated through areas of continuous permafrost.

PRICE TAG

Cost of the initial system is estimated at $6.6 billion in 1974 Canadian dollars, including financing and provision for return on investment during construction.

Design will allow expansion to 4.6-billion-cfd at a cost of $2.6 billion in 1974 Canadian dollars. The expansion would include an extension to other supply areas, particularly Ellef Ringnes Island, in addition to compressor stations on the main line.

Houlding says the consortium is updating to a current-dollar basis its estimates of capital and financing costs.

The consortium, formed late in 1972 and led by TransCanada PipeLines Ltd., figures it will have spent more than $60 million by the end of this year on engineering and environmental studies of a pipeline and other methods to transport gas from the islands. The other methods included use of LNG tankers.

Polar Gas envisions deliveries to TransCanada at a connecting point near Longlac, Ont. If exports are approved by NEB, U.S. lines could be supplied via interconnections at several points in southern Ontario.

Houlding believes exports of Arctic Islands gas are possible, because the region at first will supply more gas than Canadian energy markets can absorb. He foresees new exports licenses "tied to a periodic assessment of Canada's energy supply/demand balance."

Polar Gas chose a route west of Hudson Bay to save money and to avoid problems with deepwater crossings in the northern part of an alternate route east of the bay. Laying a line east of the bay would have added about $1.5 billion to construction costs, the consortium says.

Island reserves. Panarctic Oil Ltd., leading operator in the Arctic Islands, expects the 20-trillion-cu-ft threshold volume of reserves to be "in sight" in 1978.

Panarctic Pres. Charles R. Hetherington bases the outlook on a current supply of 16 trillion cu ft and historic discovery of 2.5–3 trillion cu ft/year. Of the current total, 12.5 trillion cu ft is in the Melville Island area and 3.5 trillion on and around Ellef Ringnes and King Christian islands.

The company's exploration budget amounts to more than $70 million this year, up sharply from 1976. The increase stems from a joint-venture program launched by Panarctic, Imperial Oil Ltd., Gulf Oil Canada Ltd., and state-owned Petro-Canada.

Hetherington forecasts that exploration/development programs will yield reserves of at least 100 trillion cu ft in the islands during the next 25 years.

His company holds interests in more than 80 million acres in the islands, about half lying offshore in ice-covered water. "A large number" of structures offshore have been found which appear similar to productive structures onshore, Heatherington says.

Current gas supplies, found as a result of the $400-million program conducted during the past 8 years, are free of hydrogen sulfide and will require only dehydration to be of pipeline quality. The gas is about 97% methane, with small amounts of nitrogen, carbon dioxide, ethane and propane, and traces of other hydrocarbons.

[From the Globe and Mail, Apr. 20, 1977]

WILL CANADA LOSE CONTROL OF DESTINY IN THE NORTH?

(By E. C. Phillips)

[NOTE.—Mr. Phillips is president and chief executive officer of Westcoast Transmission Company Limited. Following are excerpts from remarks to the annual shareholders meeting.]

Today I am compelled to expose a threat we see to Canada's national interest—the spectre of our country losing control of its own energy destiny in the North.

If you think this is unduly alarmist, consider this testimony by R. Clyde Hargrove, counsel for the Arctic Gas Project, given before a (U.S.) Congressional committee hearing Feb. 17, 1977:

Mr. Hargrove: "Now, the upshot of this is that regardless of which route is selected, that project is going to be owned on an equity basis and controlled by the majority of the shippers who are shiping gas through it. It is not going to be an El Paso Project; it is not going to be a Northwest Pipeline Project; it is not necessarily even going to be an Arctic Gas Project. It is going to be a project managed by the shippers who buy the gas.

"Now, if that pattern obtains which has been indicated in earlier contracts which were dismissed because of certain advance payment restrictions, and you include the recently announced tentative sales of Alaska royalty gas, the eight (U.S.) companies comprising the Arctic Gas consortium will have a 7½ (sic) voting control of any project that is put through."

The transcript phrase "7½ voting control" is unclear but the emphatic repetition of the word "project" leaves no doubt as to the totality of U.S. control envisaged by Arctic Gas. Quite obviously, that is not how Arctic Gas describes the control of their project when giving evidence this side of the border.

PUBLIC'S DECISION

The public of Canada will have to decide whether or not that exceedingly candid Arctic Gas statement about U.S. control sounds like the voice of a neighbor who will be truly grateful for the privilege of a 2,200-mile shortcut across Canada for a U.S. pipeline.

Nine years ago, Westcoast developed, with three U.S. partners, its own northern project called Mountain Pacific Pipelines Ltd. Other

firms were studying competitive plans which eventually evolved into two contestants, a large consortium of U.S. and Canadian companies commonly known as Arctic Gas, and a single-member company called Foothills. The latter was wholly-owned by Alberta Gas Trunk and its plan became known as the Maple Leaf Project.

Westcoast was invited to abandon its project and join the Arctic Gas consortium. In the searching analysis of our Mountain Pacific project, we discovered that its imperfections resembled features of the Arctic Gas scheme and that our own philosophy was far more in harmony with Foothills Maple Leaf.

Accordingly, we sought to join the Maple Leaf project although our participation had never been requested. Alberta Gas Trunk agreed to sell Westcoast 20 per cent of its ownership of Foothills. Later, the company purchased more shares to advance the partnership with AGTL to a 30–70 basis.

A subsequent development of the AGTL–WTCL partnership with Northwest Pipeline Corporation in a plan for an Alaska Highway pipeline exclusively for Alaska gas has enhanced our expansion opportunities. At this very moment our conviction as to the choice is just as firm; our determination just as resolute; our confidence just as high.

The Government of Canada must have the final word in deciding just one question: Is Canada's independence and sovereignty respecting its own energy resources established more clearly by approving two Canadian-owned and controlled northern pipelines (Foothills) mainly following established corridors (one for U.S. gas and one for Canadian gas) than it is by selecting a dual-purpose pipeline (U.S. gas commingled with Canadian gas) owned by a consortium (Arctic Gas) under powerful foreign influence?

No two trading countries in the world are as capable as Canada and the United States in making difficult deals work; but the joint pipeline concept is so barren of commonality that this marriage of convenience would not last. Serious international strains would be inevitable, and future legislation could be compromised by the entanglement.

The recent ruling of Judge (Nahum) Litt of U.S. Federal Power Commission was a revelation. Quite expectedly, as a dedicated U.S. public servant, he found the dual-purpose Mackenzie Valley pipeline to be superior in the U.S. public interest.

But the tone of the judge's unblushing praise for the joint U.S.-Canada scheme and his sarcastic denunciation of the Alaska Highway pipeline plan expose what could be the first quasi-official thrust from the United States for a continental energy-sharing policy.

Judge Litt saw his U.S. public duty and did it. He wants to share more than a pipeline; he wants to share our natural gas in the Delta. Consider this extract from his decision dated Feb. 1, 1977:

NOT SAME QUESTION

Finally, it is not irrelevant to U.S. interests when Canada brings frontier gas to market. Whether a political decision is reached to continue, or even expand, exports is not the same question as whether underlying reserves are attached that would make a favorable decision viable. Given what is represented as the existing Canadian view of Canada's natural gas supplies, absent attaching substantial Canadian reserves, no affirmative decision could be made to export additional gas even if the NEB were so inclined. Attaching Canadian frontier gas, therefore, can only help the U.S. prospects; certainly the climate will be improved even if the decision never is made."

And here again is what Mr. Hargrove told the congressional committee hearing on behalf of his client, Arctic Gas.

"Connection of Mackenzie-Beaufort reserves by Arctic Gas may permit some short-term increase in Canadian exports and should allow longer term continuation of present export levels.

"While we certainly cannot speak for the Canadian Government on export policies, this much is absolutely certain; the prospect for continued high levels of Canadian gas exports to the U.S. is incomparably better with the Mackenzie-Beaufort attached than without it."

I do not attribute any sinister or disloyal intent to the Canadian members of the Arctic Gas consortium. Their pipeline concept had some apparent practicality when originally proposed about 10 years ago; but the passage of time and dramatically changed circumstances (mainly disappointing Delta discoveries, improved Alberta gas supply, and the native land claims) created the serious international conflict of interest they could not have anticipated.

The National Energy Board may indeed authorize export of Canadian Delta gas some time in the future, probably no later than the time High Arctic gas becomes available through the Polar Gas Project. That decision, so favorable for the United States, could result from proper international bargaining producing valuable tradeoffs for our country. However, our federal negotiators must not be compromised by the indicative move of installing a 2,200-mile siphon from the United States right into our rich gas reservoirs before the export bargaining even starts.

As though he had forgotten his preferred pipeline was to cut through another nation's soil, Judge Litt cavalierly described the Canadian Berger Staff Report as nonsense; declared Canada would not let native land claims interfere with a Mackenzie Valley pipeline decision; disagreed with his own staff by suggesting Canada would export more of its gas to the United States by a dual-purpose pipeline decision; explained how the United States would fall into some cheap transportation expansibility for Alaska gas if there was not enough Delta gas to fill the Canadian 50 per cent share of the pipeline; and declared it would be "a work of joy" to loop the pipeline through Canada for extra gas for the United States.

Finally, he pre-empted Canadian judgment by implying that the timing of need for a northern pipeline is the same for both Canada and the United States.

I am compelled to refute Judge Litt's statement about timing with some emphasis. Indeed this is one of the features of the enormous incompatibility that renders a joint pipeline incapable of serving two masters in any equitable way.

First, the timing requirement for each country is demonstrably out of phase. At one time last winter, more than a million Americans were out of work and over a million youngsters were out of school for the lack of natural gas. The United States is suffering an immense economic penalty because of a gas shortage. In stark contrast, Canada actually has a gas surplus some did not expect.

Being the only Canadian pipeline short of gas, Westcoast Transmission needs frontier gas sooner than any others. However, we do not consider the urgency of our particular situation justifies callously disregarding many other local and national interests involved in the Mackenzie Valley.

Another substantial mismatch in the Arctic Gas proposal is the magnitude of the two nations' energy requirements.

BIGGER CONSUMER

The United States consumes an average 59 billion cubic feet of gas per day; Canada only four billion. Fifteen-to-one is a manifestly improvident balance on which two nations would equally share the equity ownership of a pipeline and split its capacity at 2¼ billion cubic feet per day each.

A third major incompatibility that foretells immense partnership friction is related to size but more deeply involves the divergence in financing ability and philosophy. Because the United States is 10 times Canada's stature in economic terms, there are unique hazards in a 50-50 deal. The national burden of a $10-billion project here is only matched by the relative impact of $100-billion in the United States. We would be up to our necks in this project, with the Americans only getting their feet wet.

As the pipeline is expanded in the future for the increased flow of Alaska gas, the Canadian members of the consortium would have to match, billion-for-billion, the big spending plans of the U.S. members solely for the benefit of U.S. gas users. The unsavory alternatives would be to obstruct the necessary U.S. expansion or to accept a progressive equity dilution to a minority role with loss of whatever control existed.

The disparity in consumer price impact is still another obstacle a single pipeline cannot neutralize for two nations at one and the same time. Rolling in 2¼ billion cubic feet a day with 59 billion from traditional U.S. sources has little effect on the average price the U.S. consumer will have to pay. Blend 2¼ billion high-cost Delta gas with only four billion cubic feet from our traditional sources and the average price to the Canadian gas user rises painfully.

I must acknowledge that Westcoast Transmission was built on the economic base of gas export to the United States, and export sales still are basic to our viability. Also, they are most profitable to the B.C. treasury and beneficial to our national balance of payments . . .

To our dismay, the public came to accept that this U.S.-Canadian pipeline, routed through our rich gas areas, is designed to give Canadian Delta gas a cheap "piggyback" ride to Canadian markets, which it is not; and to assume it is not designed to increase exports of our gas to the United States, which it is.

(Recently) Arctic Gas economists appeared before the National Energy Board in Ottawa to describe the economic impact of their project on Canada.

Their evidence was based on 50 per cent of the Delta gas being exported. At about the same time in Washington, before a hearing panel of four Federal Power Commissioners, F. E. John, representing the State of California said:

". . . we believe the United States should act in its best interests, and that is to bring gas from Alaska and hopefully to allow exports from Canada into the lower 48 states, and that is why we support the Arctic Gas project which will interconnect with Mackenzie Delta reserves at the earliest time possible." (FPC–45, 289 April 8, 1977.)

The U.S. Federal Power Commission Staff and judge have declared the type of northern pipeline they prefer for the United States. The FPC commissioners will decide soon and, in the U.S. public interest, could add their endorsement for Arctic Gas.

SEPTEMBER DEADLINE

President Jimmy Carter is required to advise Congress what he wants, between Sept. 1 and the year end. In the meantime, the National Energy Board is concluding its lengthy hearings preparatory to advising Cabinet about Canada's public interest. And Justice (Thomas) Berger's important report is expected in a few weeks.

It is in the face of that timetable I have chosen this occasion publicly to resist the thrust of the U.S. Federal Power Commission's judge for what could be a premature

international energy-sharing commitment, and to suggest what Canada's response should be.

CONFUSION AND DISARRAY FOUND IN ENERGY ADVISORY COMMITTEES

Mr. METCALF. Mr. President, the Subcommittee on Reports, Accounting, and Management in 1975 commissioned a study by the Congressional Research Service of the Federal advisory committees dealing with energy.

The study of 61 energy advisory committees—when their subgroups are included the total is 250—was published recently for the use of the Senate Committee on Governmental Affairs.

I ask unanimous consent that the subcommittee press release announcing its publication be printed in the RECORD.

There being no objection, the press release was ordered to be printed in the RECORD, as follows:

[Press Release]

CONFUSION AND DISARRAY FOUND IN ENERGY ADVISORY COMMITTEES

WASHINGTON, D.C.—A study of 61 Federal advisory committees dealing with energy finds "confusion and disarray symptomatic of the federal government's approach to the energy problem," Senator Lee Metcalf (D-Mont.) said today.

Metcalf said the study also found "overlapping committee membership, lack of balanced membership and, in some cases, that the principal work of committee subgroups was done by persons who were not members of the parent committee.

"It found dormant committees, and committees being kept on the books long after their responsibilities had been discharged."

The 18-month study by the Congressional Research Service of the Library of Congress, entitled "Energy Advisers: An Analysis of Federal Advisory Committees Dealing with Energy," is scheduled for publication today (25 March). Metcalf is chairman of the Senate Subcommittee on Reports, Accounting and Management, which oversees the Federal Advisory Committee Act.

"The study found inconsistent and incomplete reporting of the federal government's cost of funding and maintaining advisory committees," Metcalf said.

"It also found a major cost factor that should be recognized even though it probably cannot be charged to a given committee's operating cost—the sometimes great number of federal employees assigned to attend committee meetings as observers."

As an example, 37 federal government visitors attended a two-day meeting of the Outer Continental Shelf Research Management Advisory Board of the Interior Department in April, 1975.

The study noted that in 1974 the Interior Department had five advisory committees dealing with issues which were handled by the Office of Oil and Gas. When the Federal Energy Administration was established, this office was transferred to FEA, as were the persons who administered the advisory committees.

However, the Interior Department decided to retain the advisory committees, even though the functions they monitored were now housed in FEA. Three of the five committees then ceased meeting, and members of the other two expressed confusion about whom they were now supposed to be advising.

Metcalf asked that the CRS study include:

1. Analysis of the pertinent advisory committees, thorough examination of their charters, attendance at meetings and study of committee records, toward determining the requirements for and operating practices of each one;

2. Evaluation of the government's use of committee reports and recommendations in policy formulation, program planning, decision-making and achievement of economies and program objectives; and

3. Identification of persons who serve on more than one energy advisory committee, as well as identification of firms, institutions and groups represented on more than one energy committee, and evaluation of the extent of duplication of one committee's tasks by another.

SENATE RADIO AND TELEVISION COVERAGE

Mr. DOLE. Mr. President, I was pleased to join yesterday in the submission of a resolution for a 1-year trial of radio and television coverage of the proceedings in this Chamber. Making Senate floor debate accessible to the American people by way of their television and radio receivers is an idea whose time is overdue. It may be that some of our procedural customs will have to be changed as a practical consequence. But, if that is so, these are traditions which probably need to be modernized anyway. The executive branch makes full use of the electronic news media to communicate with the American people. We cannot continue to conduct our business in the dark if we are to earn the esteem of the people we serve.

Without in any way interfering with editorial decisions or censoring the contents, the Senate must, of course, maintain its supervisory authority over the physical broadcasting arrangements in the Chamber. The experimental period of 1 year will allow us to determine whether the opportunity for live coverage is abused, either by the irresponsible behavior of Members, or by the distorted use of the visual and audio reports by the news media. It is my hope that adverse constituent reaction will prevent grandstanding by Senators, and that viewers will demand fair and impartial coverage by the media themselves.

PROPOSED ARMS SALES

Mr. SPARKMAN. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $25 million or, in the case of major defense equipment as defined in the act, those in excess of $7 million. Upon such notification, Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulates that, in the Senate, the notification of proposed sale shall be sent to the chairman of the Foreign Relations Committee.

In keeping with my intention to see that such information is immediately available to the full Senate, I ask unanimous consent to have printed in the RECORD the notification I have just received.

There being no objection, the notification was ordered to be printed in the RECORD, as follows:

DEFENSE SECURITY ASSISTANCE AGENCY AND DEPUTY ASSISTANT SECRETARY (SECURITY ASSISTANCE), OASD/ISA

Washington, D.C., April 21, 1977.

In reply refer to: I-13385/76ct

Hon. JOHN J. SPARKMAN,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith, Transmittal No. 77-22, concerning the Department of the Army's proposed Letter of Offer to Korea for tank conversion kits, not major defense equipment as defined in the International Traffic in Arms Regulations (ITAR) estimated to cost $61.7 million. Shortly after this letter is delivered to your office, we plan to notify the news media.

Sincerely,

H. M. FISH,
Lieutenant General, USAF, Director.

TRANSMITTAL NO. 77-22—NOTICE OF PROPOSED ISSUANCE OF LETTER OF OFFER PURSUANT TO SECTION 36(b) OF THE ARMS EXPORT CONTROL ACT

(i) Prospective Purchaser: Republic of Korea.

(ii) Total Estimated Value:

[In millions]	
Major defense equipment	$0.0
Other	61.7
Total	61.7

(iii) Description of Articles or Services Offered: Four-hundred and sixteen (416) tank conversion kits to convert M-48A1 tanks to M-48A3 configuration. Kits components include diesel engines, improved optics, fire control and suspension system.

(iv) Military Department: Army.

(v) Sales Commission, Fee, etc. Paid, Offered or Agreed to be Paid: None.

(vi) Date Report Delivered to Congress: April 21, 1977.

THE NATIONAL CENTER FOR APPROPRIATE TECHNOLOGY

Mr. METCALF. Mr. President, President Carter's new energy policy is intended to signal the end of the era of cheap, abundant fuels and the beginning of a search for new ones. The American people are asked to conserve energy, and to apply their genius to devising new, efficient methods for doing so.

I am pleased to note that the Congress has already taken the initiative in energy conservation in many respects. In the 94th Congress, we created within the Community Services Administration the "National Center for Appropriate Technology." NCAT—or "EN-CAT" as its acronym is pronounced by those connected with it—is being located in Butte, Mont., and will shortly receive its second year of funding.

The focus on NCAT is "appropriate technology," or technology appropriate to its end use. Its principal function will be to help small inventors or consumer groups devise small-scale programs of energy conservation. This may mean conversion of low-income tenement buildings to solar heating, production of building materials from local soils, or devising new techniques of fertilization

from recycled home waste products. In each case, the attempt will be to achieve large-scale energy savings through thousands and millions of small-scale applications.

In its efforts to publicize the shift to appropriate technology, on March 21 NCAT sponsored here in Washington a speech by E. F. Schumacher, author of the widely discussed book "Small is Beautiful." His speech, entitled "Economics as if People Mattered," stressed the importance of developing systems that are much smaller in scale, energy conserving, and more labor intensive. Dr. Schumacher had earlier spoken on Capitol Hill to the Congressional Clearing House on the Future, with some 50 Members of Congress in attendance.

On March 23, the National Center for Appropriate Technology sponsored two forums, one each in the Senate and House of Representatives, to brief Members and staffs on the promise of appropriate technology, particularly as it relates to job creation, energy conservation, and the utilization of alternate sources of energy.

Mr. President, NCAT is now in the process of reviewing promising small-scale technology projects for possible funding.

I commend to my colleagues an inspection of this program. They may wish to make inquiry at my office, or directly to Executive Coordinator James F. Schmidt of the National Center for Appropriate Technology, P.O. Box 3838, Butte, Mont., 59701—telephone 406–723–6533.

NATIONAL ENERGY POLICY

Mr. STENNIS. Mr. President, I certainly fully realize that our country must have an effective, firm, and comprehensive energy policy. For too long now we have let events control us in the energy field rather than taking positive acts to control events and our future energy posture. The time for action is now. We must begin work on a program that, as nearly as possible, will balance our energy requirements and demands with the dwindling resources and, at the same time, will develop as boldly and rapidly as feasible new sources of energy as alternative to oil and gas.

While I have not yet reached mature conclusions on the details of President Carter's proposals, I certainly commend him for meeting the problem head on with forthrightness and specific recommendations for positive action. It is now incumbent on the Congress to match the President's boldness and decisiveness and fashion a comprehensive energy program which, as far as possible, will be fair to all and will spread the necessary sacrifices evenly and equitably.

I do want to take this occasion to stress—and I think this should be recognized clearly as we begin to fashion an energy program—that there is one segment of our economy which must be given special consideration and, if necessary, even a special priority. I am not talking now on behalf of a special interest but rather on behalf of the national and public interest and for the strength and welfare of our Nation.

We all recognize the tremendous job which the American farmer has done in providing vital food and fiber for the country and in assisting with the balance of trade problem. The American farmer is the marvel and at the same time the envy of every nation. If there is an area of international competition in which we are clearly ahead, it is the field of agriculture. There are only six or seven countries in the world which are net exporters of agricultural commodities. This Nation exports more than all the rest combined.

It is difficult to overemphasize the importance of agriculture to our national economy and world trade. Last year our bill for imported oil was $36 billion. This year it may reach $45 billion. This is a tremendous drain on our economy. Our agricultural exports of well in excess of $20 billion last year went a long way in partially offsetting and balancing this drain. Our foreign agricultural trade is one of our most basic "weapons" in international commerce.

I will not dwell on the obvious by discussing how important the farmer is in providing food and clothing for our Nation. He has taken care of the needs of the American consumer. He had a key role in raising our standard of living to the highest in the world. That standard cannot possibly be maintained without the farmer as a going concern.

The farmer has a vital need for oil and gas and other petroleum products. For example, natural gas is the feed stock for anhydrous ammonia, which is one of our most important and effective fertilizers. It is hardly necessary for me to point out that any increase in the price of natural gas to the manufacturer will show up in the increased price of fertilizer which, in turn, will show up in the increased cost of food in the grocery store. Petroleum products, including gasoline, diesel fuel, and bottled gas, are essential to farming operations in many ways and any increase in their cost to the farmer means an increase in the cost of the food we eat.

I make no specific suggestions or recommendations at this time, Mr. President. The point I want to make is that, in putting together an energy program, it is essential to the welfare of the country that we take into account the special needs of agriculture. Special consideration, special study, and special care are essential to insure that we do not take any action which unduly burdens, hampers, or injures this vital activity. I invite suggestions from any interested party.

PROPOSED ARMS SALES

Mr. SPARKMAN. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $25 million or, in the case of major defense equipment as defined in the act, those in excess of $7 million. Upon such notification from the Department of Defense the Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulates that, in the Senate, the notification of proposed sale shall be sent to the chairman of the Foreign Relations Committee.

In keeping with my intention to see that such information is immediately available to the full Senate, I ask unanimous consent to have printed in the RECORD at this point the four notifications I have just received.

There being no objection, the notifications were ordered to be printed in the RECORD, as follows:

TRANSMITTAL NO. 77–20—NOTICE OF PROPOSED ISSUANCE OF LETTER OF OFFER PURSUANT TO SECTION 36(b) OF THE ARMS EXPORT CONTROL ACT

(i) Prospective Purchaser: Jordan.
(ii) Total Estimated Value:

[In millions]

Major defense equipment*	$0.0
Other	33.0
Total	33.0

*As included in the U.S. Munitions List, a part of the International Traffic in Arms Regulations (ITAR).

(iii) Description of Articles or Services Offered: Technical assistance to support I-hawk air defense system to be provided by U.S. Government and contractor personnel. Further, to provide for contractor maintenance support and materiel management.
(iv) Military Department: Army.
(v) Sales Commission, Fee, etc. Paid, Offered or Agreed to be Paid: None.
(vi) Date Report Delivered to Congress: Apr. 25, 1977.

TRANSMITTAL NO. 77–23—NOTICE OF PROPOSED ISSUANCE OF LETTER OF OFFER PURSUANT TO SECTION 36(b) OF THE ARMS EXPORT CONTROL ACT

(i) Prospective Purchaser: Jordan.
(ii) Total Estimated Value:

[In millions]

Major Defense Equipment*	$0.0
Other	31.0
Total	31.0

*As included in the U.S. Munitions List, a part of the International Traffic in Arms Regulations (ITAR)

(iii) Description of Articles or Services Offered: Individual and unit training with missile firing and target support for I-hawk air defense system.
(iv) Military Department: Army.
(v) Sales Commission, Fee, etc. Paid, Offered or Agreed to be Paid: None.
(vi) Date Report Delivered to Congress: April 25, 1977.

TRANSMITTAL NO. 77–24—NOTICE OF PROPOSED ISSUANCE OF LETTER OF OFFER PURSUANT TO SECTION 36(b) OF THE ARMS EXPORT CONTROL ACT

(i) Prospective Purchaser: Saudi Arabia.
(ii) Total Estimated Value:

[In millions]

Major defense equipment*	$0.0
Other	121.0
Total	121.0

*As included in the U.S. Munitions List, a part of the International Traffic in Arms Regulations (ITAR)

(iii) Description of Articles or Services Offered: Planning, design and contracting for construction of two-hundred twenty (220) family housing units at King Faisal Military Cantonment, Khamis Mushayt.

(iv) Military Department: Army.

(v) Sales Commission, Fee, etc. Paid, Offered or Agreed to be Paid: None.

(vi) Date Report Delivered to Congress: April 25, 1977.

TRANSMITTAL No. 77-25—NOTICE OF PROPOSED ISSUANCE OF LETTER OF OFFER PURSUANT TO SECTION 36(b) OF THE ARMS EXPORT CONTROL ACT

(i) Prospective Purchaser: Saudi Arabia.

(ii) Total Estimated Value:

[In millions]

Major Defense Equipment *	$0.0
Other	30.0
Total	30.0

*As included in the U.S. Munitions List, a part of the International Traffic in Arms Regulations (ITAR)

(iii) Description of Articles or Services Offered: Procurement of construction and other procurements related to a 30 megawatt power plant at Tabuk military cantonment.

(iv) Military Department: Army.

(v) Sales Commission, Fee, etc. Paid, Offered or Agreed to be Paid: None.

(vi) Date Report Delivered to Congress: April 25, 1977.

SMALL BUSINESS AND THE HUMPHREY/HAWKINS BILL

Mr. HUMPHREY. Mr. President, today I would like to comment on the importance of the Humphrey/Hawkins full employment and balanced growth bill to small business.

Everyone has a major interest in a healthy, growing economy. Working people benefit when their services are in demand, and their income is assured. But profits are merely the income of corporations, proprietorships, and partnerships. And failures and bankruptcies are the equivalent of unemployment—often a stark equivalent—for small business.

So the ingredients of a great coalition of interests in successful and prudent macroeconomic management, designed to provide full employment and balanced, sustainable real economic growth, are present.

WHAT IS IN THE HUMPHREY/HAWKINS BILL FOR BUSINESS?

The Full Employment and Balanced Growth Act is the first national statement of confidence in the ability of the private sector to accommodate the social and economic needs of the United States and all of its people. And it calls for substantive action—policies and programs—in pursuit of its commitments. Thus, it goes far beyond past legislative initiatives which stopped short, calling only for studies and reports.

There is a widespread impression that the Humphrey/Hawkins bill exclusively contains big Government programs which are traditionally anathema to business. Nothing could be more distorted.

The bill sets forth requirements to overhaul regulatory and tax policies which interfere with the conduct of business without providing benefits justifying such interference. Reliance is placed primarily on "expansion of conventional private jobs," a commitment set forth in section 102. Specifically, that section calls for maintaining "trends in the ratio of private employment to civilian public employment similar to those from 1947 to the time of enactment of the act, which would mean a numerical growth in private employment several times as large as the numerical growth in civilian public employment."

To facilitate this, section 105 commits the President in his annual plan to review "existing Government rules and regulations to determine if they still serve a public purpose and are properly designed" and to annually evaluate "20 percent of the dollar volume of existing Federal programs which are in effect each year" submitting a "formal analysis of the economic and social impact and value of each program." These are specific, not value, objectives and obligations.

OTHER CHANGES IN THE NEW VERSION

Many attitudes toward the Humphrey/Hawkins bill unfortunately hardened during the vigorous debate surrounding past versions of the legislation. The new version has been modified to ameliorate several concerns about wording last year.

On the use of policy tools: The bill clearly prohibits national planning to be construed as permitting intrusion into the affairs of households and businesses through the following statement in section 102:

> Although it is the purpose under the act to seek diligently and to encourage the voluntary cooperation of the private sector of the economy in helping to achieve the objective of the act, no provisions of the act are intended nor shall be used, with respect to any portion of the private sector of the economy, to provide for government control of production or employment or allocations of resources, except to the event authorized under other legislation." (emphasis supplied.)

On inflation: Section 104 contains a new provision to prevent an interpretation of the bill's other parts from implying accelerating inflation. The much publicized employment objectives are now subject to the constraint that the best econometric or other analyses of the President's annual plan by the Council of Economic Advisers must not portend inflation rates higher than "such rates on the date of enactment of this act."

Unemployment of minorities and women: Section 401(e) now qualifies the overall unemployment objective by assuring that "every effort shall be made to reduce the differences between the rates of unemployment among women, minorities, and other labor force groups and the overall rate of unemployment, with the ultimate objective of removing them entirely." The new language specifically calls for use of nondiscrimination and structural approaches to attack the problem of severe, intractable unemployment among certain known groups.

On the wage standard: The present version clarifies the language setting the wage standard for all jobs created through direct implementation of any provision of the bill. New jobs would have to pay no less than that paid other employees of the same organization or company doing the same work. And in no event will new jobs pay less than the minimum wage. Under old versions of the bill, some contended that employers would have to offer the national average wage of workers in a given field.

THE PURPOSE AND THEORY OF THE UNEMPLOYMENT GOAL

In the present bill, the unemployment goal is still 3 percent within 4 years but it is now made clear in section 104 that the goal applies directly to those 20 years of age and over, and that teenagers, who face the special problems of new job entrants shall be brought in line as soon as feasible—but not necessarily within the timeframe for adults in the labor force. Since the Bureau of Labor Statistics derives the standard unemployment rate for people over age 16, the 3-percent total goal translates to about 4½ percent of the whole labor force.

The reason for having goals—for both unemployment and inflation—is that our historical experience with them confirms that we achieve more under their discipline than without them. Examples abound. In addition, they provide a yardstick for measuring progress. What if a goal is unachieved? Failure is a relative thing; if we progressed further than if we had never had a target to strive for, then we are still winners.

Some economists suggest that the labor markets currently become tight around 5 percent. Beyond that level, real wages are bid up, unit labor costs rise, and inflation sets in. So, is the 4½-percent objective unreasonable? If it is, then surely there can be a legislative reevaluation. But more broadly, we must understand why labor markets become tight at such a high level. This is largely due to structural imperfections which, within the course of 4 years, can be substantially eliminated through concerted microlabor market strategies. These include manpower training efforts, job search programs, and vocational education as well as other programs developed to fit unemployed workers to available, profitable private job openings.

Any jobs the Federal Government might directly create—to the extent they are needed—must serve well-ordered nonwasteful national priorities, an initial list of which is included in section 104.

LAST RESORT JOBS—THE UNWARRANTED FEAR

Probably the most familiar aspect of S. 50 is the so-called last resort job provision. Several things are worth noting: First, this provision, like others in the bill, is not self-enacting. It will require explicit legislative choices subject to constant review, probably through a vehicle such as CETA. Second, the 1977 version of the bill delays the potential availability of last resort Government hiring until 2 years from enactment, giving all other forms of job creation a full chance of success. And finally, this provision is included to offer the President the ultimate ability to keep the economy on track should it be apparent that other avenues of job expansion are temporarily falling short. It is not permanent, and it cannot be interpreted as an open-

ended, WPA-style program. Additionally, it is unlikely that these temporary, low-paying jobs, with no pension benefits and little chance of advancement, would seriously compete with available private jobs.

THE "COST" OF FULL EMPLOYMENT: A FALSE ISSUE

To speak of the "cost" of full employment is to be either purposefully deceptive or to entirely miss the concept. It is accurate, rather, to speak of the cost of not striving for full employment and balanced growth in our economy. If one must look at the Federal budget as a measure, as imperfect as it is, then look to transfer payments: AFDC, unemployment compensation, and food stamps. The Congressional Budget Office has confirmed that a high proportion of transfer payments would be substituted by employment income under the bill. And employment means productive use of human resources. The waste of labor is the prime cause of the GNP gap—the tremendous difference between what we could produce, and what we are producing. This is the real cost of not setting a full employment strategy—and every year we fail to set one irrevocably wastes more resources which, after all, cannot be put to work yesterday to make up for lost output.

THE BENEFITS OF GOVERNMENTAL POLICY PLANNING

The planning and coordination of national economic policy is perhaps the most misunderstood yet fundamental idea in the bill. Without question a rationalized Government approach to policy promulgation would help create a fertile atmosphere for business prosperity. Of course, rationalizing the policy process entails a number of institutional reforms and review procedures, several of which are in the bill.

What is governmental economic policy planning? First, it is not the central control planning of Gosplan and socialized economies which has universally failed to satisfy consumer needs. The bill recommits the Government to preserve the market system which has served us so well. This is explicit from section 102 cited previously.

Our proposal to reform the economic policy process is a commitment to streamline Government functions. Moreover, it is a general commitment to think ahead and out loud about future policy formation Whether one approves or not, it is inevitable that the Government through deliberate decisions will influence sectoral business activities by traditional techniques, including tax and subsidy tools, and regulation. Rational policy development processes, subjected to the political review established in the bill through the administration, Congress, and the States, would offer a systematic commitment of Government intentions in this critical area much further in advance than the present fragmented structure produces in piecemeal fashion. For business the policy statement may include a range of assumptions, thus increasing the utility of the information to internal business decisions.

The commonsense advantages to business of this new undertaking are obvious. The theoretical advantages are also convincing: Part of the cost of capital for any project reflects the uncertainty of return from the project. A large component of that uncertainty is the perceived capriciousness of governmental intervention. Governmental policy statement of the sort envisioned can only minimize such uncertainty, thus lowering the cost of capital, increasing investment and production, and encouraging a better market allocation of real economic resources. Likewise consumption and savings decisions by households are more fruitful with less uncertainty.

While the proposed economic policy planning process has been a focal point of some business misunderstanding and opposition, it should, by all rights, be one of the strongest selling points of S. 50 to the business community.

DEVELOPMENT LENDING

The United States has generously participated in multilateral efforts to provide developmental funds, at reasonable interest rates, to various portions of the world. And the Marshall plan, of course, was entirely conducted by the United States. But there has been no similar initiative to assist disadvantaged areas of our own country. Therefore, section 204 calls for "long-term loans at rates of interest no higher than the average rate of long-term Treasury borrowings plus service costs" to aid "depresesd regions, inner cities, economic sectors, and rural areas with substantial unemployment."

THE ROLE OF BUSINESS

The major emphasis of the bill is on the development of policies and programs which will create an economic climate promoting maximum business activity. In large measure, this means designing conventional fiscal and monetary policies which will encourage prosperous commercial activity. This is the way most of the job opportunities needed to meet the employment goals of the bill would be created and sustained. Judged from this perspective, H.R. 50 and S. 50 can be labeled "jobs legislation"—but only in the sense that virtually all of these jobs would be created by private enterprise.

The key to the legislation is the utilization of maximum commercial and industrial capacity. In this sense the legislation is truly a private sector jobs bill. Every other provision of the bill flows from this overriding point. Participation in the effort to win its passage is as important to the business community as it is to any other element in our economy.

FISCAL YEAR 1978 BUDGET LEVELS FOR HOUSING AND COMMUNITY DEVELOPMENT

Mr. CHILES. Mr. President, there has been a great deal of concern about the level of funding for housing and community development programs assumed in the first concurrent resolution on the budget for 1978 as reported by the Budget Committee. There has been considerable confusion about what was done and why it was done. I would therefore like to take this opportunity to clarify the record.

The first area of concern is the reduction of budget authority for low income housing assistance requested by the President. I would like to emphasize that the reductions assumed in the Budget Committee mark could be made without any reduction of funding for housing for the elderly under section 202 or any other program. Section 202 has been very effective in getting new housing built and I have supported it actively.

My presentation to the committee emphasized that a substantial reduction could be made in the private development—new construction portion of section 8, because this program has been particularly slow in moving through the "pipeline" from reservation of funds to actual construction. According to figures supplied by the Department of Housing and Urban Development, of 116,316 units for which funds were reserved in 1976 and the transition quarter, only 15,529 reached the stage of construction and only 12,525 reached final approval. I am very concerned that if we keep putting out billions of dollars in budget authority for which it takes 2 to 3 years to complete construction, then we will find ourselves with large increases in budget outlays in 1980 or 1981, when we are trying to move to a balanced budget.

Table I shows how funds have been authorized for section 8 private developer—new construction faster than they could be spent. Each year funds have been reserved for many more units than have been processed to the stage of final agreement or start of construction. The result is that an increasingly large pool of funds carries over for processing in the next year. Congress has then appropriated funds for additional reservations, ignoring the large carryover funds to which they are added. If we were to approve the President's request for an additional 103,400 units, the pool of reservations would be up to 264,846 units, almost three times the size of the annual program we have been presented.

I applaud HUD's determination to speed up processing and work off the pipeline. I would like to see more housing built. But we should not ignore the fact that the backlog exists. It is further expected that a considerable proportion of the funds reserved in a big rush last year will never reach final approval. As those projects drop off, funds previously appropriated will be freed up for new activity. We ought to take these realities into account before adding large sums to the back of the pipeline.

Mr. President, I ask unanimous consent that a table showing the pipeline buildups be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. President, assumption "C" on table I shows that we can reduce the backlog and still provide enough authority for over 100,000 units of section 8 private developer new construction to move ahead in fiscal year 1978. I suggest we do this by recognizing that we will have a

carryover of at least 160,000 units from fiscal year 1977. If we add authority to fund 50,000 additional units, we will have almost 212,000 reservations available in fiscal year 1978 and allow a smooth pipeline flow into 1979.

The Congressional Budget Office has calculated that there are already sufficient amounts of budget authority appropriated that outlays for housing assistance would rise from $3.1 billion in 1977 to $5.4 billion in 1978 even if we added zero new budget authority from now to 1982. On top of this increase to which we are already committed, the President requested to add an additional 400,000 units, requiring budget authority of $32.8 billion. This would increase outlays to $6.3 billion in 1982. Tax expenditures and GNMA subsidies could add another $1 billion net cost to the government. The Congressional Budget Office calculates that if we added 311,000 units a year, outlays would reach over $8 billion by 1982, plus over $2 billion for tax expenditures and GNMA subsidy costs. Taking the President's budget as a policy base for the next four years would thus add over $5 billion of outlays to the budget by 1982, and $7 billion of total cost.

The reason for the Congressional Budget Process is to be able to examine our goals for housing and all other programs within the context of a total budget restraint. If we commit ourselves now to large increases in section 8 housing expenses in 1982, we might find that those expenditures squeeze out new initiatives in housing or other programs we want to undertake later on.

The reduction I have proposed will not make a major reduction in this growth. Assuming we kept adding units at the same rate in fiscal years 1979, 1980 and 1982 as we do in 1978, the difference between my proposal and the President's budget would increase from $35 million of outlays in 1980, to $109 million in 1981, to $296 million in 1982, with increasingly large differences over time. Adding in the cost of tax expenditures and GNMA subsidies, the total savings to the federal government could double to about $600 million in 1982. This is not a massive reduction when we are facing an increase of over $5 billion in outlays, much of which is already beyond our control. But it does represent a significant amount of money that could be used to fund other housing programs or other new initiatives the Congress may want to undertake as we reexamine the condition of the country over the next few years. More important, by reducing the outstanding backlog of unobligated funds, it will allow us better control over the section 8 programs as we see how it actually operates. Since hardly any units have actually been built under section 8, we do not yet know what it will produce in either costs or benefits.

There is a second reason why I am concerned with the large amounts requested for new construction of low income housing. Studies by CBO and others have shown that new construction is the most expensive way to provide better housing for poor people. For any amount of available funding, we could subsidize 50% more units of existing housing than of new housing. My concern is not just for cost, but for fairness. The Congressional Budget Office has calculated that over 38 million households—40 percent of the country—are potentially eligible for section 8 assistance. We are currently committed to a total of 3.3 million assisted units by 1982. If there is no reasonable likelihood of serving all those who need some help, then I think we ought to look for ways to spread our housing dollars among the greatest number of recipients. When we build new housing to a very high level of standards for just a few people, then their neighbors who have the same level of income but no new housing feel cheated, and rightly so. We have heard expert testimony that it is possible to achieve a substantial amount of better housing by providing rent subsidies with a few controls. Higher rents can meet better maintenance of existing buildings and less urban decay. And that can mean more private construction without direct subsidies.

I believe we do need funding of new construction for the elderly, for the handicapped, and for areas where there is just not much existing housing available. But I also think Congress ought to look carefully at the mix of new and existing housing to see that it funds the programs which go out most quickly and provide the most units for the money. There has also been a lot of discussion about the community development block grant program. The current fiscal year 1977 level of funding for this program is $3.2 billion. The President requests an increase to $4.0 billion. The Budget Committee assumed a smaller increase to $3.5 billion. This should protect communities from having their current grants reduced. I am sympathetic to the needs of communities for physical development, and I think the block grant approach is a good way to do it with fewest Federal strings attached. However, with a deficit of over $60 billion, I think we have to look carefully for programs that achieve similar purposes in different agencies and different parts of the budget. That is the special role of the Budget Committee.

When we examined community development in this light, we became aware that in the same budget we were providing for $3.1 billion of outlays under the 1977 local public works program, plus $4.5 billion for EPA water and sewer grants, $1.7 billion for unrestricted countercyclical revenue sharing, and $5 billion for temporary public jobs. All that adds up to $14.3 billion that could be used for essentially the same purpose as community development block grants. In looking at the broad range of programs I have listed, I think it is useful to mention the recent Brookings Institution study which found that about: 37 percent of block grants are used for new capital spending; 38 percent are used for continuation of preexisting community development programs; 20 percent are used for noncommunity development programs (social services); 7 percent is "substituted" into general revenue offsets of the local government; and 8 percent is unallocable.

These uses are not in violation of the law, but they do demonstrate the considerable overlap with other programs of aid to local governments which have received large funding increases.

I recognize HUD's desire to start special grants for hard hit areas, but in light of the billions added in the last 2 years, I really do not think $400 million represents a turnaround. It is just one more grant program which local governments will depend on to finance their operations each year. The central thrust of mission budgeting, zero-based budgeting, and sunset legislation is that we are going to have to stop old programs to start new ones, not just keep piling them up on top of each other. If we can get agreement on what is the most effective community development strategy, whether it is funded by HUD, by the Department of Commerce, or by Treasury, then we ought to stop our less effective programs and adopt a new one.

I am very encouraged that the Budget Committee has begun to take a long-term perspective and deal with budget authority as carefully as outlays. Too often we have heard people say that we do not have to worry because a program is just adding budget authority and would not hurt next year's deficit. Then each year we try to find room for new high priority programs and find that most outlays are "uncontrollable" due to decisions or commitments made in the past. I think in this budget resolution we have begun to take the kinds of actions that will allow us more freedom and flexibility in the future.

EXHIBIT 1

Pipeline buildup, section 8 new construction-private development

	Units
Funds reserved in fiscal year 1976 and transition quarter	116,316
Minus final agreement reached (23%)	−12,525
Minus construction started (23%)	−15,529
Carried over in pipeline for processing in fiscal year 1977 (77%)	88,262
Additional reservations provided in fiscal year 1977 budget	+80,000
Additional reservations provided in fiscal year 1977 supplemental appropriation	+57,000
Total units to be processed in fiscal year 1977	215,262
Minus 25% of reservations reaching final agreement or construction in fiscal year 1977	−53,816
Reserved units carried over for processing in fiscal year 1978	161,446
President's request for additional authority to reserve units in fiscal year 1978	+103,400
Total units requested for processing in fiscal year 1978	264,846
Assumption A: Grant President's request, assume 25% processing rate:	
Reservations in fiscal year 1978	264,846
Minus 25% final agreement	−66,212
Carryover for processing in fiscal year 1979	198,634

EXHIBIT 1—Continued

Pipeline buildup, section 8 new construction-private development—Continued

Assumption B: Grant President's request, assume 50% processing rate:	
Reservations in fiscal year 1978	264,846
Minus 50% reach final agreement	−132,423
Carryover into fiscal year 1979	132,423
Assumption C: Reduce President's request by 53,000 units, assume 50% processing rate:	
Reservations in fiscal year 1978	211,846
Minus 50% reach final agreement	−105,923
Carryover into fiscal year 1979	105,923

OHIO NUCLEAR FUEL ENRICHMENT PLANT

Mr. GLENN. Mr. President, few issues during my term as Senator have stirred the people of Ohio as much as the possibility that my State may lose the uranium enrichment add-on that had been promised for Piketon, Ohio, between Chillicothe and Portsmouth.

Newspaper articles in recent days have outlined the scope of the crisis. Many millions of tax dollars have already been expended in developing the site, and firm commitments were made to the citizens of southern Ohio, an area that has unemployment ranging between 14 and 18 percent.

Last Saturday civic leaders in that part of the State, including the distinguished speaker of the Ohio House, Vern Riffe, met with local citizens in Portsmouth, at my request. I invited Robert Fri, acting administrator of ERDA, so that he could see first-hand how deep public sentiment runs in Ohio to have the Federal Government stand by its long commitment to building the plant there. I appreciated Dr. Fri's attendance and his comments to the audience that he would convey the sentiments expressed there to the administration.

This morning I joined my colleagues, Senators METZENBAUM, FORD, and HUDDLESTON, as well as Congressmen ASHLEY and HARSHA, in a very significant meeting with President Carter at the White House. The President is intensely interested in the case that has been made for locating the facility in southern Ohio, and I would like to express my thanks to him publicly for giving us the opportunity to present our viewpoint. Senators FORD and HUDDLESTON have a deep interest in the project because the proposed plan is only about 25 miles from the Ohio River and would provide employment for many citizens of their State, too.

At this time I ask unanimous consent to have printed in the RECORD a nine-point summary of why I believe the ERDA facility should be built at Piketon. I think the case for that location is very, very substantive. These are the same points that I made in our conversation today with the President. I think that my colleagues will agree that they add up to a solid summary of why the administration should stand by its commitment to southern Ohio, a commitment that has been made in unmistakably clear terms.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

MEMORANDUM REGARDING REASONS WHY URANIUM ENRICHMENT FACILITIES SHOULD BE LOCATED NEAR PORTSMOUTH, OHIO

1. A campaign commitment was made to construct facilities in Portsmouth to meet this nation's need for additional enriched uranium. This commitment reinforced the commitment made by the prior Administration to that same effect, and $176 million was appropriated for FY/77 to carry out the project.

2. In reliance upon the belief that this Administration was continuing the Portsmouth construction project, substantial federal funds have been spent, many people have purchased homes and moved into the area to work on initial phases, and an expectation developed that the severe unemployment and depressed economic conditions in the area would be somewhat alleviated.

3. Unemployment figures furnished by the U.S. Department of Labor show that unemployment in the Portsmouth area is generally double the unemployment in the Oak Ridge, Tennessee area. 1976 annual average unemployment for Scioto County, Ohio, was 15.5%. Adjacent Pike and Adams Counties in Ohio had 1976 annual average unemployment of 11.3% and 15.6% respectively. By comparison, counties in and around Oak Ridge, Tennessee, are Roane County, 7.3%; Anderson County, 6.9%; and Knox County, 4.6%. Unemployment in the Portsmouth area has been long-standing, causing substantial population loss and adverse economic conditions. Current unemployment figures (February, 1977) for Scioto County, Ohio, are 18.7%, while unemployment in Pike County, Ohio, is currently 12.3%.

4. 17 ERDA employees have moved their families into the area and 14 have either bought homes or lots for new home construction. Goodyear Atomic Corporation, which manages the existing facility, has to date hired an additional 110 scientific and professional employees to work on the anticipated construction, and approximately 75% of them have already moved into the area. All of these families made moves in reliance upon the federal commitment that the Portsmouth construction would be a reality.

5. The Environmental Impact Statement for the additional Portsmouth construction has been completed, at a cost of $750,000. The second preliminary draft was released in February, 1977, and the Statement is due to be published in final form in May. Almost all of the work done on the Statement in anticipation of a gaseous diffusion plant would remain applicable to a centrifuge plant. The Statement was over a year in preparation, and a move of the facility to Oak Ridge would require a new Environmental Impact Study, thus delaying completion of construction.

6. Approximately $4 million has already been spent in design work for parking lots, roads, warehouses and an Administration building. This work is transferable to the centrifuge facility, and the expenditures would be lost in the event construction does not go forward in Portsmouth.

7. A contract was entered into with Battelle Memorial Institute to do a socio-economic impact study with respect to the new construction. The contract was for $170,000, and approximately $140,000 has been spent to date. The study is scheduled for completion around the end of May, and virtually all of the results would remain applicable to construction of the centrifuge facilities.

8. Efforts to insure minority hiring are under way. Representatives from ERDA met with representatives of the NAACP in Columbus during the week of March 21 to work out plans for increased minority employment.

9. No apparent reason exists for moving the new construction to Oak Ridge. Hopes and expectations have developed to a substantial degree in the Portsmouth area based upon the anticipated economic benefits from the construction. No such long-standing expectations exist in Oak Ridge, and it has been reported that the effect of cancellation of the Clinch River breeder reactor project there is minimal. Approximately 450 jobs are involved with the breeder reactor project, and some of them will be saved because $33 million is still requested for FY 78. The President of the Oak Ridge Chamber of Commerce has stated that he did not think loss of the breeder would have a severe effect in Oak Ridge and the surrounding area, and was quoted in Saturday's New York Times as saying "much of the actual hardware for the breeder is being built elsewhere and it would only be assembled here." This compares with approximately 5,000 jobs to construct the uranium enrichment facility, and approximately 2,200 permanent jobs in connection with operation once the facility is built.

THE CASE OF RONALD R. HUTCHINSON VERSUS WILLIAM PROXMIRE AND MORTON SCHWARTZ

Mr. ROBERT C. BYRD. Mr. President, in April of 1975 Senator WILLIAM PROXMIRE of Wisconsin gave his "Golden Fleece of the Month" award to the National Science Foundation, the National Aeronautics and Space Administration, and the Office of Naval Research for spending almost $500,000 to determine under what conditions rats, monkeys, and humans bite and clench their jaws. As a member of the Senate Appropriations Committee, Senator PROXMIRE votes on the funds for all the agencies involved, and he chairs the Subcommittee on HUD-Independent Agencies, which has jurisditcion over both National Science Foundation and NASA funding.

Senator PROXMIRE gave a speech on the Senate floor in which he made the award. He also issued a press release, embargoed until the time of the Senate speech, which was a verbatim copy of the speech except for a slight change in which his introduction in the Senate speech was changed and deleted. In addition, the Senator later appeared on the Mike Douglas television show and stated that one of the awards had been for a study to find out why monkeys clench their jaws. He did not mention the researcher by name on that occasion. Additionally, Senator PROXMIRE sent out a newsletter to his constituents commenting further on the award and distributed copies of his original speech and release to those who requested them.

One year short a day after the speech, the researcher who had received the funds sued Senator PROXMIRE and his legislative assistant Mr. Morton Schwartz for $6 million in damages for alleged slander, libel, and other charges. Later the suit was amended to seek another $2 million in damages. In addition, the plaintiff failed to serve Morton Schwartz.

When the suit was filed, Senator PROXMIRE inquired as to what action he should take. He was told that routinely the Justice Department defends any

Federal official who is sued for conduct involving his official duties. The Senator wrote the Justice Department asking it to consider defending the case, and by letter they agreed to do so.

However, in the meantime the Senator's staff studied the precedents and cases and determined that there was a conflict between the rights and prerogatives of the Senate, as outlined in the speech and debate clause of the Constitution, and the position of the Justice Department in some previous cases.

When this was reported to the Senate leadership—Mr. Mansfield and Mr. Scott—they immediately wrote to the Senate Rules Committee saying that the Senate's rights were at stake in the case and sent Mr. Alan Raywid, a Washington attorney who had previously served in the Justice Department, to represent Senator PROXMIRE.

At a later date the Senate Rules Committee determined that the case was important to the Senate and passed a resolution supporting the Senator from Wisconsin's case. The Senate itself ratified this action.

We now have a decision in the case, which is of considerable importance to the Senate, the press, and the public.

It holds that the Senator's speech in the Senate was immune under the speech and debate clause. It also holds that the press release reporting the floor speech was within the informing function of Congress and was absolutely privileged. The Judge states that—

That press release, in a Constitutional sense, was no different than would have been a television or radio broadcast of his speech from the Senate floor.

The Judge also found that the statement Senator PROXMIRE made on national television was "innocuous" in that the researcher was neither identified nor could reasonably have been identified from the context of the statement.

The Judge further found that the researcher was both a "public official" and a "public figure," that no "malice" was involved in the Senator's remarks about his work, and that there was "no reckless disregard of the truth" with respect to the factual statement of Senator PROXMIRE, which was in fact accurate in every respect except for the spelling of the first name of the researcher.

Finally, the judge found that the statements were not libelous under the laws of either the District of Columbia or the State of Michigan, where damage might be said to have occurred.

Mr. President, this decision can have far reaching effects with respect to the conduct of the Senate. It is clear that the speech and debate clause has been upheld and strengthened as a result of this decision. A Senator's immunity from frivolous suits or harassment when involved in legitimate legislative activity is upheld.

As Senator PROXMIRE said:

This case goes far beyond the parties involved. What is at stake is the right of an elected Senator to comment upon and criticize publicly the spending of taxpayers' money.

If a Senator can be sued successfully for exercising his legitimate legislative activity, especially in criticizing government spending over which the Congress has a special Constitutional responsibility, the Congress itself could be muzzled and its legislative independence imperiled.

Mr. President, because this case is of such importance to the Senate I ask unanimous consent that a copy of the covering letter from the attorney who was hired by the Senate to represent Senator PROXMIRE and the memorandum decision be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

COLE, ZYLSTRA & RAYWID,
ATTORNEYS AT LAW,
Washington, D.C., April 26, 1977.

Hon. WILLIAM PROXMIRE,
U.S. Senate,
Washington, D.C.

DEAR SENATOR PROXMIRE: I am pleased to transmit to you Judge Leighton's opinion of April 22, 1977, granting summary judgment in your favor and also in favor of your staff member, Morton Schwartz, holding that your comments concerning the Plaintiff are privileged from suit in part and otherwise not actionable libel.

Contained in the opinion is a rather thorough examination of the Speech and Debate Clause and the standards for application of Congressional immunity. In defining the limits of legitimate legislative activity, you will note that Judge Leighton held that the press release reporting your floor speech is within the informing function of Congress and thus absolutely privileged. In reaching that conclusion, the Court relied on lower court opinions upholding the franking privilege. Other activity, such as the contacts with government agencies, the decision holds are similarly privileged as falling within the investigative function of Congress.

Because of the nature of the comments and the status of the Plaintiff, Dr. Hutchinson, as a recipient of public funding, the Court holds that your comments on the Mike Douglas Show, as well as the newsletters to constituents, are not actionable under the First Amendment rights as defined in the New York Times doctrine. That doctrine holds that to preserve free, uninhibited discussion of public issues a party may not be held liable for making a defamatory falsehood about a public official unless the plaintiff demonstrates that the publicataion was made with actual malice, that is with actual knowledge of falsity or reckless disregard of the truth. But, the Court went beyond the finding that your comments were absent actual malice and held, under applicable state libel laws, that your remarks were "fair comment".

In my view, the opinion is a helpful ruling in defining and clarifying both the informing and the investigative functions of Congress, and thus the scope of legitimate legislative activity. The decision is final unless appealed within 30 days.

Please accept my warm personal regards and congratulations.

Respectfully yours,

ALAN RAYWID.

[In the U.S. District Court for the Western District of Wisconsin, 76–C–257]

(Ronald R. Hutchinson, Plaintiff, v. William Proxmire and Morton Schwartz, Defendants, before the Honorable George N. Leighton, U.S. District Judge, Northern District of Illinois, sitting by designation)

MEMORANDUM

I.

This is a suit by a research scientist against a United States Senator, and one of his administrative assistants, seeking eight million dollars in damages for alleged slander, libel, malicious interference with contractual relations, malicious conduct or conduct with grossly negligent disregard for the truth, invasion of rights to privacy, and intentional infliction of emotional anguish. Jurisdiction is invoked under 28 U.S.C. § 1332 (a) (1). When this suit was filed the presiding district judge recused himself, and this court was appointed to sit by designation.

Thereafter, the United States Senator moved, in the alternative, for summary judgment. Therefore, the question to be decided is whether the motion, pleadings, depositions, exhibits, and affidavits disclose there is no genuine issue of material fact and that movement is entitled to judgment as a matter of law. However, to answer this question, this court must resolve three issues. 1. Whether the investigative activities of the United States Senator in connection with his duties as a member of Senate subcommittees were privileged. 2. Whether a press release issued by the United States Senate Service Department and containing the substance of a Senate floor speech by the United States Senator was privileged under the speech or debate clause of the United States Constitution. 3. Whether the statements made by the United States Senator to his constituents and in a television appearance were libelous or defamatory. The material facts are as follows.[1]

II.

The plaintiff, Dr. Ronald R. Hutchinson, is a research scientist, president of the Foundation for Behavioral Research, a non-profit organization, former director of research at Kalamazoo State Hospital, Fort Custer State Home, and former adjunct associate professor of psychology at Western Michigan University. From 1966 to 1975, he directed research projects under federal grants from the National Aeronautics and Space Administration (NASA), the National Institute for Mental Health (NIMH), the National Institute for Drug Abuse (NIDA) and the Office of Naval Research (ONR). These projects were investigations into various aspects of animal and human aggression.

Defendant William Proxmire is the senior United States Senator from Wisconsin. Among his congressional duties is service on subcommittees of the Senate Committee on Appropriations which have jurisdiction and review of budget and appropriations for ONR, NASA, NSF, NIDA, and NIMH. As a member of these subcommittees, he votes on appropriations for government obligations and makes recommendations regarding expenditures. Defendant Morton Schwartz is Senator Proxmire's administrative assistant in legislative matters. His duties included research into efficiency in domestic government spending so that he could make recommendations to his superiors on the desirability of particular appropriations.

Early in 1975, Senator Proxmire directed his staff to gather information on wasteful government spending and provide him with at least one example each month so he could dramatize it, call it to the attention of his colleagues, and thus discourage it. To this end, while speaking on the Senate floor in March, 1975, he established what he called the "Golden Fleece of the Month Award," a program through which he made monthly announcements of wasteful government spending identified by his staff. These announcements were routinely accompanied by

[1] This court acknowledges the invaluable assistance of Ms. Emily Nicklin, a third year student at the University of Chicago Law School, who did the underlying research, analysis of the cases, and the preliminary papers for this Memorandum. The caliber of her work reflects the high standards that characterize American legal education and the ability of the young men and women who are preparing to enter our profession.

a press release publicizing his selection for the award.

The Senate Service Department, under the Senate Sergeant-at-Arms, duplicates and distributes senatorial press releases after reviewing them for conformity with Senate regulations governing use of the mailing frank. Senator Proxmire's office routinely supplies the Service Department with a copy of a proposed release and a list of distributees composed at the Senator's direction with the view toward conveying information to his constituents, to interested segments of the news media, and his colleagues, either directly or through their constituents. Senator Proxmire established and approved the procedure by which his news releases were sent to the Senate Service Department for duplication and distribution.

In March 1975, Mr. Schwartz learned of Dr. Hutchinson's research from Dr. D. Greenburg, editor of a social science publication who had read of plaintiff's work in NTIS, a weekly abstract of government studies and publications. The NTIS abstract referred to two publications by NASA giving details of Dr. Hutchinson's research, both of which Mr. Schwartz subsequently obtained by mail from NASA's Congressional Liaison Officer, Mr. William Allen. The NASA publications cited other research conducted by plaintiff with grants from ONR, NSF, and the Michigan State Department of Mental Health. Mr. Schwartz contacted ONR and NSF seeking information concerning this research. He spoke with Dr. Robert Woodward of ONR and Mr. Richard Wilson, Congressional Liaison Officer for NSF, inquiring into their reasons for supporting Dr. Hutchinson's projects. at all times, he identifies himself as a member of Senator Proxmire's staff. Mr. Schwartz' review of the documents he obtained uncovered one grant to the plaintiff by NIMH, and the additional information that NIMH had rejected all but one 1962 research application Dr. Hutchinson had made to that agency. Having decided that the federal fundings of plaintiff's research constituted a potential "Golden Fleece of the Month Award," Mr. Schwartz spent approximately forty hours over a four-week period reviewing documents and preparing a draft of his findings. During this time, he contacted various state and federal agencies to inquire about the structure of the fundings and to determine their justification.

On or about April 11, 1975, defendant Schwartz telephoned NIMH, and was informed by Mr. Joseph Bracket that other than an expired 1962 grant, plaintiff's research had not been funded by that agency. After this inquiry, Dr. Hutchinson received from NIMH a $11,554 three-year grant commencing on June 1, 1975. Three days later, Mr. Schwartz made telephone calls to various agencies. He contacted the Michigan State Department of Mental Health to inquire about the structure of plaintiff's state fundings. He telephoned NIDA where he was informed that it did not fund any of plaintiff's projects.[2] He telephoned Mr. Fred Stollnitz of NSF and discussed the possibility of that agency receiving a Golden Fleece of the Month Award for its part in the funding of plaintiff's research. Mr. Stollnitz' telephone log of the conversation reveals that Mr. Schwartz criticized the NSF funding, stating that plaintiff's research was obvious and duplicatively funded by ONR; and that NIMH had not granted plaintiff any funds. On April 15, Mr. Schwartz telephoned Mr. Stollnitz to inform him that NSF would definitely receive the award and made comment about what he called Dr. Hutchinson's "grantsmanship." This having been done, a draft of the "Golden Fleece of the Month Award" for April 1975 was prepared and submitted for review by Senator Proxmire and Mr. Howard Shuman, another of his administrative assistants. After some editing, the award draft was finalized and approved. A copy of the news release concerning the award was sent to the Senate Service Department by Mr. Shuman on April 15 for release on the morning of April 18, 1975.[3]

On or about April 15, Mr. Schwartz telephoned Dr. Hutchinson, told him of the planned Golden Fleece Award, and read him the text of the press release. Plaintiff objected because he thought it did not fairly evaluate his work, and that his name was misspelled. As was his custom, Senator Proxmire made the award the subject of a Senate floor speech in which he stated that NSF, ONR, and NASA had spent:

"almost $500,000[4] in the last seven years to determine under what condition rats, monkeys, and humans bite and clench their jaws. From the findings of these studies, it is clear that the government paid a half a million dollars to find out that anger, stopping smoking, and loud noises produce jaw clenching in people . . . . All this money went to Dr. Roland [sic] R. Hutchinson of Kalamazoo State Hospital in Michigan. . . . Dr. Hutchinson's studies should make the taxpayer as well as his monkeys grind their teeth. In fact, the good doctor has made a fortune from his monkeys and in the process made a monkey out of the American taxpayer. . . . In view of the transparent worthlessness of Hutchinson's studies . . . it is time we put a stop to the bite Hutchinson and the bureaucrats who fund him have been taking out of the taxpayer."

In the next newsletter he mailed to his constituents following the release, Senator Proxmire told them of the April award. The news item was in the following language:

ROMANTIC LOVE STUDIED

Each month I have decided to offer a "golden fleece" award to the organization or person who has most utterly wasted your tax dollars.

Last month's award went to the National Science Foundation for a study of why people fall in love. For $84,000 the researchers were supposed to find out how people grow dependent upon each other in what they called "romantic love."

Not only is this a question that cannot be answered, like what is infinity, I'm not sure we want an answer. There should be some mysteries in life.

A BITE OUT OF YOUR POCKETBOOK

This month the award is shared jointly by the National Science Foundation, National Aeronautics and Space Administration and the Office of Naval Research. These three organizations have put up $500,000 of your tax money to reach the astounding conclusion that people and monkeys clench their jaws when angry or forced to stop smoking or confronted with loud noise.

In seven years of work by Dr. Ronald R. Hutchinson of Michigan, your money was used to discover that people get angry when they feel cheated and they tend to clench their jaws or even scream and kick. Did you know that? Did you know that monkeys become angry when they are given electric shocks? Or that drunk monkeys do not react as quickly as sober monkeys? That's what your taxes paid for!

Dr. Hutchinson has received one grant after another from various federal bureaucracies to study these earth shaking problems. He has examined crayfish, wasps, boa constrictors, turtles, alligators, opossums, foxes, pigeons, rats, monkeys and humans to discover under what circumstances they show signs of being angry.

TESTS ON ANIMALS

He has "stimulated" the animals by using physical blows, electric tail shocks, intense heat, brain probing, air blasts, foot shocks and loud noises. He has influenced them with morphine, tranquilizers, food, alcohol, caffeine and in the case of humans, with money.

He graduated from animals to humans in 1970. That's when he began to conclude that humans bite and clench their jaws under stress. And that when they feel cheated, they react by screaming and kicking on occasions.

These studies are continuing and several new proposals, if accepted, will mean another $150,000 for this program.

If this use of your tax money makes you want to kick and scream or clench your jaws, then join the club. The good doctor has made a monkey out of the federal bureaucrats.

I've told these government agencies it's time to get out of this "monkey business" and put an end to worthless studies be they scientific or social.

If you have any suggestions for my next "golden fleece" award, please write to me in Washington.

On at least one other occasion, Senator Proxmire mentioned plaintiff by name to his constituents and commented on what he thought was useless research at the expense of taxpayers. And on the same subject, he made some unspecified statements to a District of Columbia reporting firm, contributed to or authored an article in a popular publication called "Human Events Magazine" and gave an interview to "Behavior Today," a journal that publishes articles on subjects within the spectrum of the behavioral sciences. In the meantime, either Senator Proxmire personally, or his assistant Mr. Schwartz, made follow-up inquiries of federal and state agencies concerning their reaction to the April Golden Fleece of the Month Award.

Then on November 24, 1975, Senator Proxmire appeared on the Mike Douglas Show, a nationally televised interview program, and described his "Golden Fleece of the Month Award[s]." In response to questions, he gave three examples; and without naming him, alluded to Dr. Hutchinson's research, saying that one of the awards had been for ". . . a study that cost $500,000 to find out why people, rats, and monkeys clench their jaws. They found out they clench their jaws when they were angry, when they were prodded by sticks, when they were hungry, and they didn't clench their jaws as much if they had been drinking."

III.

The complaint that began this suit, originally in three counts with a fourth added by amendment, attaches the April 18, 1975 press release as an exhibit and alleges it contained untrue statements and omitted others so that the release incorrectly or falsely summarized studies with the result that Senator Proxmire, his agents and employees libeled, slandered and defamed him by implying that he improperly or illegally profited personally from his governmental research grants; that defendants' telephoning of various federal agencies and attempting to persuade or pressure them to terminate existing grants or contracts for research, prejudiced and prevented plaintiff from obtaining other grants or contracts from federal agencies in the future; that Mr. Schwartz in contacting the federal agencies

[2] Since the Golden Fleece Award was given to agencies funding plaintiff's research, he has received at least three federal grants: from NASA for one year commencing February 1, 1976, in the sum of $25,000; from NIDA for six months commencing May 30, 1975, in the sum of $54,800; and from NIMH for three years commencing June 1, 1975, in the sum of $11,554.

[3] The release is set out in full as Appendix A to this Memorandum.

[4] There are various estimates of how much federal money plaintiff actually received. Senator Proxmire states that plaintiff received $910,500; plaintiff says that the sum is $820,500.

involved identified himself as Senator Proxmire's staff member and uttered or published slanderous, libelous and defamatory statements which were false regarding plaintiff and threatened or implied to these agencies that if they continued funding of plaintiff's research they would receive Senator Proxmire's "Golden Fleece of the Month Award;" that as a result of defendants' actions, plaintiff lost research funding from various federal agencies, lost the respect of his profession, was subjected to humiliation, held up to public scorn, suffered extreme mental anguish, injury to his feelings, physical illness and pain to his person, accompanied by loss of income and ability to earn money in the future; and that defendants' conduct intentionally violated and infringed plaintiff's right to privacy, his right to peace of mind and tranquility, for which conduct plaintiff seeks judgment against defendants, jointly and severally, in the sum of $8,000,000.

Senator Proxmire's alternative motion for summary judgment concedes as true the issuance of the press release, his investigative activities and those of his administrative assistant, the news letters to constituents containing statements about Dr. Hutchinson, and the appearance in the Mike Douglas television show accompanied by the statement concerning the Golden Fleece Award for April 1975. The Senator, however, insists that summary judgment in his favor must be entered because the alleged misconduct was legitimate legislative activity and accordingly absolutely privileged by virtue of the speech or debate clause of the United States Constitution, article I, section 6. He argues that the conduct falls within the investigative or informing functions of Congress, and was related to public contracting and expenditures which are at the heart of congressional business. He insists that his statements and criticisms concerning the use of public funds were privileged under the free speech clause of the First Amendment to the United States constitution. He says that (1) Dr. Hutchinson, as a recipient of public funds, was and is both a public official and a public figure; and (2) there is no factual basis to support a judgment for the plaintiff in this case because (a) his statements accurately and truthfully reported the public contracting involved; (b) the record demonstrates an absence of malice; that is, knowledge of falsity or reckless disregard of the truth; (c) during his television appearance he did not make any statements that constituted actionable libel, defamation or slander; and (d) Mr. Schwartz' communications with government officials administering public funds were privileged. The motion, contention and argument are supported by a well-documented brief, affidavits, 72 exhibits and references to depositions.

Dr. Hutchinson meets this motion with counter-affidavits, 96 exhibits, and a well-written brief containing two arguments that raise what is claimed to be material issues of fact which can only be resolved by a trial. The counter-affidavits are those of fellow scientists familiar with Dr. Hutchinson's work, government evaluations of his research, newspaper articles about the plaintiff, and a number of scientific papers authored by him. From this, he argues that the conduct of Senator Proxmire and his administrative assistant was not legitimate legislative activity and therefore not privileged under the speech or debate clause. Plaintiff declares that his complaint is not directed at any speech on the floor of the Senate; it is at the libel by republication contained in the press release of April 18, 1975, that contained in newsletters to the Senator's constituents, the allegedly defamatory statement Senator Proxmire made during the Mike Douglas Show, the comments concerning plaintiff to news reporters, and communications with various federal agencies and their staffs. Dr. Hutchinson argues for a restrictive application of the speech or debate clause which, he insists, is mandated by decisions of the United States Supreme Court in a number of its recent pronouncements on the subject.

IV.

A.

The speech or debate clause of the federal constitution provides, in pertinent part, that ". . . Senators and Representatives . . . for any Speech or Debate in either House, . . . shall not be questioned in any other Place." U.S. Const. art I, sec. 6. In *Kilbourn* v. *Thompson*, 103 U.S. 168 (1880), for the first time, the Supreme Court dealt with a challenge to the immunity conferered by the clause. There, a congressional committee witness who refused to deliver certain documents to the committee was ordered taken into custody. He brought suit for false imprisonment against the House Sergeant-at-Arms and members of the House of Representatives who had voted for the order. It was held that in ordering the witness' imprisonment, the House had exceeded its authority; but that the speech or debate clause precluded imposition of liability on the congressmen who voted for the arrest, even though they had violated the witness' constitutional rights. The Court said:

"It would be a narrow view of the constitutional provision to limit it to words spoken in debate. The reason of the rule is as forcible in its application to written reports presented in that body by its committees, to resolutions offered, which, though in writing, must be reproduced in speech, and to the act of voting. . . . In short, to things generally done in a session of the House by one of its members in relation to the business before it." 103 U.S. at 204.

Thus, actions within the legislative role were held to be within the ambit of the privilege. And consistent with this holding, the Supreme Court has reaffirmed that once it is determined a member of Congress is acting within a "legitimate legislative sphere," the speech or debate clause is an absolute bar to interference. *Eastland* v. *United States Servicemen's Fund*, 421 U.S. 491, 503 (1975), citing *Doe* v. *McMillan*, 412 U.S. 306, 314 (1973). The standard for invoking congressional immunity under article I, section 6 of the Constitution is the standard of legitimate legislative activity. In the event of a suit, once it is determined that the conduct complained of meets that standard, the action must be dismissed. The Court has said:

"[L]egislators acting within the sphere of legitimate legislative activity 'should be protected not only from the consequences of litigation's results but also from the burden of defending themselves.' *Dombrowski* v. *Eastland*, [387 U.S. 82, 85 (1967)] . . . [A] private civil action, whether for an injunction or damages, creates a distraction and forces Members to divert their time, energy, and attention from their legislative tasks to defend the litigation. Private civil actions also may be used to delay and disrupt the legislative function. Moreover, whether a criminal action is instituted by the Executive Branch, or a civil action is brought by private parties, judicial power is still brought to bear on Members of Congress and legislative independence is imperiled." *Eastland* v. *United States Servicemen's Fund*, 421 U.S. 491, 503 (1975).

Although it is certain that legitimate legislative activity is within the privilege, considerable confusion exists as to what constitutes legitimate legislative activity because there are expansive dicta and a multiplicity of views in the cases examining various conduct alleged to be protected by the clause. Although the Supreme Court has always insisted that the clause must be read "broadly to effectuate its purpose," *United States* v. *Johnson*, 383 U.S. 169, 180 (1966), recent cases appear to adopt a restrictive view of what is legitimate legislative activity.

The conduct of Senator Proxmire and his administrative assistant can be divided into phases for the purpose of determining applicability of the speech or debate clause:

(1) investigation into federal funding of Dr. Hutchinson's research;

(2) delivery of a speech on the Senate floor by the Senator; and issuance of a press release reciting the facts and content of the Senate speech;

(3) follow-up investigation by the Senator's staff and by him at appropriation hearings; and

(4) the Senator's statement on the Mike Douglas Show, his newsletter to constituents, and his other comments about the plaintiff.

As to the investigation into federal funding of Dr. Hutchinson's research, the Supreme Court has always recognized the authority of Congress to investigate. In *Watkins* v. *United States*, 354 U.S. 178 (1957), dealing with the appeal from a conviction for contempt of Congress, the Court stated:

"The power of Congress to conduct investigations is inherent in the legislative process. That power is bread. . . . It comprehends probes into departments of the Federal Government to expose corruption, inefficiency or waste. But, broad as is this power of inquiry, it is not unlimited. There is no general authority to expose the private affairs of individuals without justification in terms of the functions of the Congress. . . . No inquiry is an end in itself; it must be related to, and in furtherance of, a legitimate task of the Congress. Investigations conducted solely for the personal aggrandizement of the investigators or to 'punish' those investigated are indefensible." 354 U.S. at 187.

In this case, Senator Proxmire serves on several subcommittees of the Senate Committee on Appropriations. These subcommittees review the budgets of the various agencies with which Dr. Hutchinson has contracted. As a member of these subcommittees, Senator Proxmire votes on appropriations, makes recommendations regarding the distribution of government funds, and concerns himself with their expenditure. Therefore, his inquiries, and those of his administrative assistant, into how American taxpayers' moneys are spent by the agencies over which the subcommittees in question had jurisdiction were privileged as legitimate legislative activity under the *Kilbourn* test of "things generally done in a session of the House by one of its members in relation to the business before it." 103 U.S. at 204. This being the case, the court will turn to the issue whether as to Senator Proxmire, the April 18, 1975 press release was also privileged under the speech or debate clause.

B.

The most recent Supreme Court pronouncements on the subject of legitimate legislative activity in the context of republication of congressional activity are *Gravel* v. *United States*, 408 U.S. 606 (1972), and *Doe* v. *McMillan*, 412 U.S. 306 (1973). These pronouncements have an important bearing on the issue to be resolved.

In *Gravel*, the government sought to subpoena a Senator's aide and compel him to testify before a grand jury investigating the release and republication of certain classified documents, the Pentagon Papers. It appears that Senator Gravel had convened a subcommittee meeting and had read extensively from the classified materials. He then inserted a forty-seven volume study into the Congressional Record and, some weeks later, arranged for their republication by a private printing company. The Senator, as intervenor, moved to quash the subpoena and to require the government to specify the questions it was going to ask his aide, contending that requiring the aide to testify would violate

the speech or debate clause. In a six to three decision, the Supreme Court agreed with Senator Gravel, holding that the speech or debate clause extended immunity to both him and his aide with respect to events which occurred in preparation for and conduct of the subcommittee meeting. However, the Court held that there was no immunity with respect to arrangements the Senator had made for private republication of the Papers. With regard to the immunity that extended to the Senator's aide, the Court said,

"[I]t is literally impossible, in view of the complexities of the modern legislative process, with Congress almost constantly in session and matters of legislative concern constantly proliferating, for Members of Congress to perform their legislative task without the help of aides and assistants; . . . the day-to-day work of such aides is so critical to the Members' performance that they must be treated as the latter's alter egos; and . . . if they are not so recognized, the central role of the Speech or Debate Clause—to prevent intimidation of legislators by the Executive and accountability before a possibly hostile judiciary [citation omitted]—will inevitably be diminished and frustrated." 408 U.S. at 616–617.

The court emphasized that aides are only protected insofar as they "perform or aid in the performance of legislative acts." 408 U.S. at 618. Thus, they are protected only to the extent they perform acts which would be privileged were the legislator-superior to perform them.

In holding that the privilege precluded questioning of either the Senator or his aide about the subcommittee meeting, but not about the arrangements for private republication, the Court found that the subcommittee meeting easily met the *Kilbourn* test of acts "generally done in a session of the House by one of its members in relation to business before it." 408 U.S. at 624. The Court assumed that action taken in committee was legitimate legislative activity, without examining its relationship to pending legislation or ordinary committee business. Arrangements for private republication of the Papers were found not to meet the test because they were unrelated to the legislative process. 408 U.S. 625–26. The court warned:

"Legislative acts are not all-encompassing. The heart of the Clause is speech or debate in either House. Insofar as the Clause is construed to reach other matters, they must be an integral part of the deliberative and communicative processes by which Members participate in committee and House proceedings with respect to the consideration and passage or rejection of proposed legislation or with respect to other matters which the Constitution places within the jurisdiction of either House." 408 U.S. at 625.

Private republication, the Court found, was not central to Senate deliberations; consequently, a grand jury inquiry into arrangements for private republication did not threaten Senate independence by "impermissibly" exposing Senate deliberations to executive influence. 408 U.S. at 625.

In *Doe* v. *McMillan*, 412 U.S. 306 (1973), parents of children in the District of Columbia school system brought a class action alleging that the release and publication of a congressional committee report on the District of Columbia school system revealed embarrassing information about individually named children, infringed their right to privacy, damaged their mental and physical health, and harmed their reputations and future careers. The parents sought to enjoin further publication, and recover compensatory and punitive damages. The defendants, among others, included (1) the Chairman and members of the House Committee on the District of Columbia; (2) various committee staff members; and (3) the Superintendent of Documents and the Public Printer.

The District Court dismissed the complaint as to all defendants; the Court of Appeals affirmed; the Supreme Court affirmed in part and reversed in part, holding that the complaint was barred by the speech or debate clause "insofar as it sought relief from the Congressmen-Committee members, from the Committee staff, from the consultant, or from the investigator, for introducing material at Committee hearings that identified particular individuals, for referring the report that included the material to the Speaker of the House, and for voting for publication of the report." 412 U.S. at 312. These acts, and distribution of the report, the Court said, were "legislative acts." 412 U.S. 312. It recognized explicitly that, constitutionally, there was no judicial authority to oversee the judgment of the Committee with respect to the utility or necessity of including the names of particular children in the report. 412 U.S. at 313.

However, the Court refused to extend the privilege to non-legislator personnel who published the report for the purpose of informing the public about congressional business. Therefore, it found that the Superintendent of Documents and the Public Printer enjoyed no immunity to carrying out the directions given them to publish the report, although Congressmen and their staffs were immune from suit for ordering the publication that went beyond the requirements of the legislative function. In holding liable those who, at the direction of Congress, distributed actionable material to the public, the Court commented:

"To hold otherwise would be to invite gratuitous injury to citizens for little if any public purpose. We are unwilling to sanction such a result, at least absent more substantial evidence that, in order to perform its legislative function, Congress must not only inform the public about the fundamentals of its business but also must distribute to the public generally materials otherwise actionable under local law." 412 U.S. at 316–17.

The "informing function" of Congress was not undermined by the holding, the Court insisted, because congressional materials such as reports are available for inspection by the press and the public. 412 U.S. at 317.

The dissent in *Gravel* joined the *Doe* majority with Justice Douglas' concurring opinion emphasizing that.

"We all should be painfully aware of the potentially devastating effects of congressional accusations. . . . There can be no question that the [Senate] resolution authorizing the investigation and study expressed a legitimate legislative purpose. Nevertheless, neither the investigatory nor, indeed, the informing function of Congress authorizes any 'congressional power to expose for the sake of exposure'." 412 U.S. at 329, 330, (citing *Watkins* v. *United States*, 354 U.S. 178, 200 (1957).)

Three members of the *Gravel* majority, Chief Justice Burger and Justices Blackmun and Rehnquist, dissented. They argued that the speech or debate clause should be read to cover preparation, content, and publication of any committee report, once it is determined that it was properly authorized by Congress and had a valid legislative purpose. 412 U.S. at 331 *et seq.* Therefore· *Doe* v. *McMillan* suggests a restrictive view of what constitutes legitimate legislative activity in the context of private defamation actions. By distinguishing between the Congressmen and their staff, on the one hand, and the Public Printer and the Superintendent of Documents, on the other, the Court has made it clear that authorizing and requesting distribution of a privileged speech or document may not be made the basis of civil or criminal liability, while distribution by non-legislators may lead to liability because the privilege of the speech or debate clause does not apply.[5]

In the case at bar, Senator Proxmire resists liability for the press release on two grounds, one of which is compatible with *Gravel* and *Doe*. First, he argues that no liability can be imposed upon him for authorizing the release because the subject matter of the statement, appropriations and expenditures, is within his immediate jurisdiction as a member of the various subcommittees on appropriations. Hence, his conduct is absolutely privileged, as were the actions of the subcommittee members in *Doe*. Second, he insists that his authorization of the press release is immune because it is an exercise of the "informing function." Congress has enacted legislation to establish guidelines and mechanisms for distribution of various materials. The franking statute, 39 U.S.C. § 3210 (1970), promotes the "informing function" by authorizing free use of the mails. The statute specifically includes press releases and newsletters ". . . . which may deal with such matters as the impact of laws and decisions on State and local governments and individual citizens; reports on public and official actions taken by Members of Congress; and discussions of proposed or pending legislation or governmental actions and the positions of Members of Congress on, and arguments for or against, such matters." 39 U.S.C. § 3210 (3) (B). Moreover, Congress has established an administrative procedure for policing possible abuses of the franking privilege. See 2 U.S.C. § 501, *et seq.*

Lower courts have recognized the legitimacy of the "informing function" as a legislative activity in actions involving alleged abuses of the franking privilege. In *Hoellen* v. *Annunzio*, 348 F. Supp. 305 (N.D. Ill. 1972), *aff'd* 468 F.2d 522 (7th Cir. 1972), *cert. denied*, 412 U.S. 953 (1973), the district court held that the use of the frank to send constituents questionnaires which contained the defendant-Congressman's photograph was a legitimate mailing "upon official business" in the exercise of the "informing function." See *Bowie v. Williams*, 351 F. Supp. 628 (E.D. Pa. 1972). For these reasons, this court is constrained to agree with Senator Proxmire. The speech or debate clause of the constitution renders him immune from liability to Dr. Hutchinson for his authorization of the press release of April 18, 1975. That press release, in a constitutional sense, was no different than would have been a television or radio broadcast of his speech from the Senate floor.

C.

The remaining issue is whether Senator Proxmire's statement on the Mike Douglas Show, his newsletter references to Dr. Hutchinson's research and fundings, his comments to news reporters and in interviews either

---

[5] In other cases, the Court has shown a willingness to impose liability on those who act at the direction of legislators, while protecting the legislators themselves. See, *e.g.*, *Powell* v. *McCormack*, 395 U.S. 486 (1969), where certain House members, the House Sergeant-at-Arms, and the House Doorkeeper were sued for violating constitutional rights; House members held immune under speech or debate clause. Sergeant-at-Arms and Doorkeeper held not immune for carrying out House members' orders; *Dombrowski* v. *Eastland*, 387 U.S. 82 (1967), where legislators and their counsel accused of participation in conspiracy to violate constitutional rights, legislators held immune under clause, no immunity necessarily extended to their counsel; *Kilbourn* v. *Thompson* 103 U.S. 168 (1880).

mentioning Dr. Hutchinson by name or alluding to his work, were libelous or defamatory. Resolution of this issue depends on Dr. Hutchinson's position in his community, and the interest of the public in the research projects for which he had received federal funding.

In *New York Times Co. v. Sullivan*, 376 U.S. 254 (1964), the Supreme Court held that the First Amendment provides a conditional immunity from liability in libel actions brought by public officials. The Court ruled that to preserve free, uninhibited discussion of public issues, a newspaper could not be held liable for publishing a defamatory falsehood about a public official unless the plaintiff demonstrated with "convincing clarity" that the publication was made with "actual malice" that is, actual knowledge of falsity or reckless disregard of the truth. 376 U.S. at 279–80.

In *Curtis Publishing Co.* v. *Butts*, 388 U.S. 130 (1967), the Court extended *New York Times* to actions brought by "public figures," persons who are "intimately involved in the resolution of important public questions or, by reason of their fame, shape events in areas of concern to society at large." 388 U.S. at 164 (Warren, C.J., concurring). The test formulated in *New York Times* represents recognition that freedoms of speech and press are essential to open discussion of public issues, freedoms our founding fathers deemed fundamental for the continued existence of our governmental system. *New York Times* v. *Sullivan*, 376 U.S. at 270. The test recognizes that: "erroneous statement is inevitable in free debate, and that it must be protected if the freedoms of expression are to have the 'breathing space' that they 'need to survive' . . ." *Id.* at 271–72.

Soon after this extension, a plurality of the Court held in *Rosenbloom* v. *Metromedia, Inc.*, 403 U.S. 29 (1971), that the *New York Times* test applied whenever the publication concerned matters of general or public interest, without regard to the plaintiff's position in his community. 403 U.S. at 43. This holding was abandoned in *Gertz* v. *Robert Welch, Inc.*, 418 U.S. 323 (1974), where it was decided that a publisher is liable to a public figure "only on clear and convincing proof that the defamatory falsehood was made with knowledge of its falsity or with reckless disregard for the truth." 418 U.S. at 342. However, in the case of private individuals, a less demanding standard is constitutionally permissible. At least where the substance of the defamatory statement makes substantial danger to reputation apparent, states may define for themselves the appropriate standard of liability, provided they do not impose liability without fault. 418 U.S. at 347, 348. However, states may not permit recovery of presumed or punitive damages, at least where liability is not based on a showing of "actual malice" as defined by *New York Times*. *Id.* at 349.

It is not easy to determine whether a plaintiff is a public figure or a private individual. As one court has wryly observed, "Defining public figures is much like trying to nail a jellyfish to the wall." *Rosanova* v. *Playboy Enterprises, Inc.*, 411 F. Supp. 440, 443 (S.D. Ga. 1976). In a recent decision, *Time, Inc.* v. *Firestone*, 424 U.S. 448 (1976), the Supreme Court held that the plaintiff was not a public figure since she had not assumed any role of "especial prominence in the affairs of society. . . ." *Id.* at 453. The fact that she had held press conferences during a well-publicized divorce proceeding was insufficient to make her a public figure for the purpose of determining the constitutional protection afforded the defendant's report of her divorce.

The term "public figure" has been variously defined. In *Gertz*, the Court stated that "[t]hose who, by reason of the notoriety of their achievements or the vigor and success with which they seek the public's attention, are properly classed as public figures . . ." 418 U.S. at 342. Designation as a public figure:

". . . may rest on either of two alternative bases. In some instances an individual may achieve such pervasive fame or notoriety that he becomes a public figure for all purposes and in all contexts. More commonly, an individual voluntarily injects himself or is drawn into a particular public controversy and thereby becomes a public figure for a limited range of issues. In either case such persons assume special prominence in the resolution of public questions." *Gertz* v. *Robert Welch, Inc.*, 418 U.S. at 351.

The court added:

"Absent clear evidence of general fame or notoriety in the community, and pervasive involvement in the affairs of society, an individual should not be deemed a public personality for all aspects of his life. It is preferable to reduce the public-figure question to a more meaningful context by looking to the nature and extent of an individual's participation in the particular controversy giving rise to the defamation." Id. at 352.

Lower court determinations regarding the public figure status of a plaintiff in a defamation action have followed the Court's suggestion and examined the plaintiff's role in the controversy out of which the defamation arises. See, generally, Annot., 75 A.L.R. 3d 616 (1977). In *Rosanova v. Playboy Enterprises, Inc.*, 411 F. Supp. 440 (S.D. Ga. 1976), the court concluded that the plaintiff was a public figure for purposes of a libel action based on defendant's magazine article identifying him as a "mobster" because over the years he had voluntarily engaged in a course of conduct bound to invite attention and comment through his voluntary contacts with organized crime figures. In *Hotchner v. Castillo-Puche*, 404 F. Supp. 1041 (S.D.N.Y. 1975), the plaintiff was found to be a public figure for purposes of libel action based on defendant's book about Ernest Hemingway. Although the plaintiff's name was not well known in the community, he had successfully published a number of widely distributed works based on his relation with Hemingway, and was thus found to have injected himself into controversies surrounding the later years of the novelist's life, a matter of considerable public interest. In a number of other cases, and on varying facts, courts in different parts of the country have reached the same conclusion. *Guitar v. Westinghouse Elec. Corp.*, 396 F. Supp. 1042 (S.D.N.Y. 1975), *aff'd*, 538 F.2d 309 (2d Cir. 1976); *Buchanan v. Associated Press*, 398 F. Supp. 1196 (D.D.C 1975); *Fram v. Yellow Cab Co.*, 380 F. Supp. 1314 (W.D. Pa. 1974); *Meeropol v. Nizer*, 381 F. Supp. 29 (S.D.N.Y.), *pet. denied*, 508 F.2d 837 (2d Cir. 1974). The question whether the *New York Times* test applies to a case is one of law. "[I]t is for the trial judge in the first instance to determine whether the proofs show [plaintiff] to be a [public figure or a] 'public official'." *Rosenblatt v. Baer*, 383 U.S. 75, 88 (1966); *Rosanova v. Playboy Enterprises, Inc.*, 411 F. Supp. 440, 444 (S.D. Ga. 1976); *Hotchner v. Castillo-Puche*, 404 F. Supp. 1041, 1045 (S.D.N.Y. 1975).

Here, Dr. Hutchinson argues that he is not a public figure because he has never voluntarily exposed himself to extensive public attention, nor assumed any role of special prominence in the affairs of society, nor thrust himself to the forefront of public controversy. He contends that the media coverage of his research before the "Award" was limited to brief articles in largely local newspapers. Moreover, he argues that because of the information for these articles was solicited from him by the News and Publications' Department of Western Michigan University which provided him with 'forms' for reporting on his work to the media, he did not initiate media coverage and hence did not invite public attention and comment.

Senator Proxmire contends that in the area of criticism, the merit of publicly-funded studies, plaintiff has sought and acquired a public standing and reputation. He has published widely in the scientific community, claiming more than forty behavioral science articles. Except for the period 1960–61, he has been employed as a research scientist at various public institutions. Since 1966, his achievements, grants and studies have been the subject of media coverage. Defendant argues that this media coverage indicates not only that plaintiff is a public figure but that he solicited that status through press releases and interviews.

Given Dr. Hutchinson's long involvement with publicly-funded research, his active solicitation of federal and state grants, the local press coverage of his research, and the public interest in the expenditure of public funds on the precise activities in which he voluntarily participated, the court concludes that he is a public figure for the purpose of this suit. As he acknowledged in his deposition, "Certainly, any expenditure of public funds is a matter of public interest."

He is also, in the judgment of this court, a public official. *See generally Annot.*, 19 A.L.R.3d 1361 (1968) Although the Supreme Court has never articulated the limits of this classification, *Rosenblatt v. Baer*, 383 U.S. 75 (1966), offers some guidance. There, the Court held that the *New York Times* test was applicable to a libel action brought by a former supervisor of a county recreation area who was appointed by and responsible to three county commissioners. The alleged libel had criticized fiscal management under the plaintiff's regime. The Court stated:

"The thrust of *New York Times* is that when interests in public discussion are particularly strong, as they were in that case, the Constitution limits the protections afforded by the law of defamation. Where a position in government has such apparent importance that the public has an independent interest in the qualifications and performance of the person who holds it, beyond the general public interest in the qualifications and performance of all government employees, . . . the *New York Times* malice standards apply. . . . The employee's position must be one which would invite public scrutiny and discussion of the person holding it, entirely apart from the scrutiny and discussion occasioned by the particular charges in controversy. *Id.* at 86, 86–87, fn. 13.

In *Adey v. United Action for Animals*, 361 F. Supp. 457 (S.D.N.Y 1973), *aff'd*, 493 F.2d 1397 (2d Cir. 1974), *cert. denied*, 419 U.S. 842 (1974), the district court found that the plaintiff, a research scientist employed by NASA and involved in planning a space flight for a monkey, was both a public figure and a public official for the purpose of an action based on allegedly defamatory remarks about his treatment of experimental animals. In this case, Dr. Hutchinson held the important public position of director of research at the Kalamazoo State Hospital in Kalamazoo, Michigan; he was dealt with as a responsible public official by the federal agencies that funded his research; and he holds himself out as the President of a not-for-profit corporation that purports to act in the public interest. Therefore, at the times relevant to this controversy he held "a position in government * * * [with] such apparent importance that the public has an independent interest in the qualification and performance of the person who holds it. . . ." *Rosenblatt v. Baer*, 383 U.S. 75, 86 (1966).

This important fact appears from the affidavits, exhibits, and excerpts from depositions that support the motion for summary judgment; and consequently, the question arises: has Dr. Hutchinson made a sufficient

showing that there is a genuine issue of material fact with regard to actual malice on the part of Senator Proxmire; i.e., knowledge on his part of the falsity of what he said, or a reckless disregard by him of the truth, when he made the statements about which complaint is made? The showing of malice may not be presumed but must be proved by the plaintiff. *Time, Inc. v. McLaney*, 406 F.2d 565, 572 (5th Cir. 1969), *cert. denied*, 395 U.S. 922 (1969). A bare allegation of malice, standing alone, is not sufficient to withstand a motion for summary judgment. *Fram v. Yellow Cab Co.*, 380 F. Supp. 1314, 1335 (W.D. Pa. 1974); *Goldman v. Time, Inc.*, 336 F. Supp. 133, 138 (N.D. Cal. 1971).

Rule 56(e) of the Federal Rules of Civil Procedure requires a party opposing a motion for summary judgment to show specific facts, admissible in evidence, which establishes that there is a genuine issue for trial. Moreover, under *New York Times*, the standard of proof plaintiff must meet at trial is more than a preponderance of evidence; it is a showing of defendants actual knowledge of falsity or reckless disregard of the truth by "clear and convincing evidence." *Vandenburg* v. *Newsweek, Inc.*, 507 F. 2d 1024, 1026, 1029 (5th Cir. 1975); see *New York Times Co. v. Sullivan*, 376 U.S. 254, 279–80 (1964); *Gertz* v. *Robert Welch, Inc.*, 418 U.S. 323, 342 (1974).

"Knowledge of falsity" presumably means just what it says: subjective awareness by the defendant that his statements were false. "Reckless disregard of the truth," on the other hand, has been defined by several Supreme Court decisions to require that the defendant act with a "high degree of awareness of . . . probable falsity." *Beckley Newspapers Corp. v. Hanks*, 389 U.S. 81, 84 (1967); *Garrison v. Louisiana*, 379 U.S. 64, 74 (1964). In the leading case of *St. Amant v. Thompson*, 390 U.S. 727 (1968), the Court found the "reckless disregard" requirement unsatisfied where the defendant had published defamatory falsehoods about the plaintiff without personal knowledge of the matter published. The Court said,

". . . reckless conduct is not measured by whether a reasonably prudent man would have published, or would have investigated before publishing. There must be sufficient evidence to permit the conclusion that the defendant in fact entertained serious doubts as to the truth of his publication. . . . The finder of fact must determine whether the publication was indeed made in good faith. Professions of good faith will be unlikely to prove persuasive . . . where a story is fabricated by the defendant, is the product of his imagination, or is based wholly on an unverified anonymous telephone call. Nor will they be likely to prevail when the publisher's allegations are so inherently improbable that only a reckless man would have put them in circulation. Likewise, recklessness may be found where there are obvious reasons to doubt the veracity of the informant or the accuracy of his reports." 390 U.S. at 731, 732.

Measured by this standard, it is clear that Dr. Hutchinson's allegations of libel and defamation fall short. His arguments that he was subjected to these torts proceed, basically, along these lines: failure to investigate; unfair editing in disregard of the facts before defendants; and republication after plaintiff complained about the press release of April 18, 1975. From *St. Amant*, it is clear that failure to investigate is insufficient to establish reckless disregard of the truth. Moreover, the record shows that Mr. Schwartz, on behalf of Senator Proxmire, spent approximately forty hours over a four-week period gathering and reviewing agency documents regarding plaintiff and making a draft of his findings. During this time, he contacted various state and federal agencies to verify his findings and to inquire about the justification for the funding in question. Senator Proxmire and his administrative assistant, Howard Shuman, reviewed Mr. Schwartz's findings. Before publishing the release, Schwartz telephoned plaintiff to read him the text of the release and ask him if there were any factual misstatements. Dr. Hutchinson said that the intended release did not fairly evaluate his research, but corrected only a misspelling of his name.

The charge now being made that defendants' unfair editing in disregard of the facts before them is also insufficient to establish actual malice. Undoubtedly, editing involves making choices; but selective reporting will not support a finding of reckless disregard of the truth. Summarizing plaintiff's research for the purpose of making some statement about its federal funding will not rise to the level of falsification. In *Time, Inc. v. Pape*, 401 U.S. 279 (1971), a magazine reported as a charge by the United States Commission on Civil Rights an incident of police brutality which the Commission itself, in its report, characterized as the allegations of a civil rights complaint. Notwithstanding the fact that the reporters themselves were aware that the Commission attributed its account of the incident to a court complaint, the Court held that the failure to include such a secondary attribution in the article was not 'falsification' sufficient in itself to sustain a jury finding of 'actual malice'." 401 U.S. at 289. It would appear that an error in interpretation of ambiguous documents, such as the conglomeration of plaintiff's grants and publications, through the adoption of one of several rational alternatives, is insufficient to create a jury issue.

Moreover, Dr. Hutchinson's claim with regard to unfair editing and summarization of his research is not buttressed by Senator Proxmire's characterizations as "nonsense" and "transparently worthless" or the suggestion that the news release gives the false impression of $500,000 having been paid personally to plaintiff; and that he was making a fortune from government money. In *Greenbelt Cooperative Publishing Ass'n, Inc. v. Bresler*, 398 U.S. 6 (1970), plaintiff was a land developer who was seeking zoning variances from a town which was in turn attempting to buy land from him. He used his position as seller to strengthen his position in requesting the variances. Defendant-newspaper had reported third-persons' characterizations of plaintiff's conduct as "blackmail." The Court held that, as a matter of constitutional law, the use of the word "blackmail" in this context was not libelous:

"[E]ven the most careless reader must have perceived that the word was no more than rhetorical hyperbole, a vigorous epithet used by those who considered [plaintiff's] negotiating position extremely unreasonable." 398 U.S. at 14.

Here, too, it would appear that Senator Proxmire's statement, "the good doctor has made a fortune from his monkeys and in the process made a monkey out of the American taxpayer" is, at worse, no more than rhetorical hyperbole. Compare *Time, Inc. v. Johnston*, 448 F.2d 378 (4th Cir. 1971).

Defendant's republication of the allegedly defamatory remarks after plaintiff complained about the release also appear insufficient to raise a jury issue of actual malice. Defendants Proxmire and Schwartz believed the statements to be true when made and still believe them to be true. Nothing in either defendant's affidavit or deposition indicates that they ever entertained any doubt as to the truth of their statements.

The constitutional privilege of *New York Times* mandates summary judgment once it becomes clear that a plaintiff cannot establish the actual malice required for recovery in defamation actions of this nature. *Meeropol v. Nizer*, 381 F. Supp. 29, 32, fn. 1 (S.D.N.Y. 1974), *pet. denied*, 508 F. 2d 837 (2d Cir. 1974).

However, "'[o]n a motion for a summary judgment the burden of establishing the non-existence of any genuine issue of fact is upon the moving party, *all doubts are resolved against him*, and his supporting affidavits and depositions, if any, are carefully scrutinized by the court'." *Rose v. Bridgeport Brass Co.*, 487 F.2d 804, 808 (7th Cir. 1973) [citations omitted]. But the court has a special responsibility here to determine if there is any genuine dispute because of the danger that speech may be chilled by the mere fact of litigation. *Guam Fed. of Teachers, Local 1581, A.F.T. v. Ysrael*, 492 F.2d 483 (9th Cir. 1974), *cert. denied*, 419 U.S. 872 (1974); *Oliver v. Village Voice, Inc.*, 417 F. Supp. 235, 237 (S.D.N.Y. 1976). The court must make a threshold determination, before trial, whether there has been a showing of actual malice. *Bon Air Hotel v. Time, Inc.*, 426 F.2d 858, 864 (5th Cir. 1970); *Wasserman v. Time, Inc.*, 424 F.2d 920, 922 (D.C. Cir. 1970) (Wright, J. concurring), *cert denied*, 398 U.S. 340 (1970). "[I]n making this determination, the granting of summary judgment may well be the 'rule' rather than the 'exception'." *Oliver v. Village Voice Inc.*, 417 F. Supp. 235, 237 (S.D.N.Y. 1976); *Guitar v. Westinghouse Elec. Corp.*, 396 F. Supp. 1042, 1053 (S.D.N.Y. 1975), *aff'd* 538 F.2d 309 (2d Cir. 1976); see also, *Perry v. Columbia Broadcasting System, Inc.*, 499 F.2d 797 (7th Cir. 1974), *cert. denied*, 419 U.S. 883 (1974); *Cervantes v. Time, Inc.*, 464 F.2d 986 (8th Cir. 1972), *cert. denied*, 409 U.S. 1125 (1973); *Washington Post Co. v. Keogh*, 365 F.2d 965, 968 (D.C. Cir. 1966), *cert. denied*, 385 U.S. 1011 (1967).

But even if for the purpose of this suit it is found that Dr. Hutchinson is a private person so that First Amendment protections do not extend to Senator Proxmire and his administrative assistants, relevant state law dictates the grant of summary judgment. In a diversity action, under the doctrine of *Erie R. Co. v. Tompkins*, 304 U.S. 64 (1938), a federal court must apply the conflict of laws doctrine of the state in which it sits. *Klaxon Co. v. Stentor Elec. Mfg. Co.*, 313 U.S. 487 (1941). Thus, sitting in Wisconsin where the suit is filed, this court must look to the choice of law principles of this jurisdiction to determine what state law to apply. In *Wilcox v. Wilcox*, 26 Wis. 2d 617, 133 N.W. 2d 408 (1965), the Wisconsin Supreme Court abandoned the *lex loci delicti* approach to choice of law problems in tort cases and adopted the general approach of *Babcock v. Jackson*, 12 N.Y.2d 473, 240 N.Y.S.2d 743, 191 N.E.2d 279 (1963). It has since elaborated on the new method of analysis and adopted "choice-influencing" considerations which are "Predictability of results, Maintenance of interstate and international order, Simplification of the judical task, Advancement of the forum's governmental interests, Application of the better rule of law." *Conklin v. Horner*, 38 Wis.2d 468, 157 N.W.2d 579, 583 (1968); accord, *Heath v. Zellmer*, 35 Wis.2d 578, 151 N.W.2d 664 (1967). It is not certain what law Wisconsin would apply in this case, using these "choice-influencing" considerations; but it appears the option is logically limited to the law of two jurisdictions, that of, the District of Columbia, the place where defendants work and their allegedly wrongful conduct originated, or of Michigan, the plaintiff's domicile, where the injury presumably had effect. For application of the relevant law, the conduct consisted of (1) the April 18, 1975 press release and the newsletters to constituents; (2) the Mike Douglas Show appearance and the other alleged defamations, some of them unspeci-

fied. However, under the law of either jurisdiction, Dr. Hutchinson cannot recover in this case.

In the District of Columbia, an alleged defamatory publication must be construed in the sense in which readers to whom it is addressed would ordinarily understand it. "The publication is to be read as a whole . . . If after an examination of the entire article there is only one reasonable interpretation of its meaning, it is for the judge . . . to say whether or not the words are defamatory." *Johnson v. Johnson Publishing Co.*, 271 A. 2d 696, (D.C. Ct. App. 1970). Only if a publication is libelous *per se*, are questions of malice, truth, and privilege for the jury. Restatement (Second) of Torts, an authority that is followed in the District of Columbia, *Harmon v. Liss*, 116 A.2d 693 (D.C. Mun. 1955); Restatement (Second) of Torts § 569, comment b (Tent. Draft No. 21, April 5, 1975) suggests that the only effect of a finding that a publication is libelous *per se* is to place the burden of establishing truth or privilege on the defendant; and recognizes that liability may be imposed only on a showing that defendant actually knew of the falsity and defamatory nature of his statements, or recklessly disregarded the truth, or acted negligently in failing to ascertain the facts. Based on these principles, it is clear that in the District of Columbia, neither the press release and newsletters nor the statements attributed to Senator Proxmire or members of his staff constitute actionable libel or defamation.

This conclusion is supported by the unmet averments of Mr. Schwartz and those of persons in state and federal agencies with whom he spoke during his investigation of Dr. Hutchinson's federal funding; but particularly, by the recognition in the District of Columbia of a defense to an action for defamation based on the doctrine of fair comment. In *Fisher v. Washington Post Co.*, 212 A.2d 335 (D.C. Ct. App. 1965), an action by an art gallery owner against a newspaper based on allegedly libelous comments about the manner in which the gallery presented its paintings, the court held that the doctrine of fair comment was applicable. The court defined the doctrine:

"Fair comment or criticism on a matter of public interest is not actionable so long as the comment is not motivated by malice . . . So long as the comment is the speaker's actual opinion, based on fact, about a matter of public interest, the words are protected unless they are grounded in malice or go beyond a discussion of the public works or acts of the subject of the opinion . . . Fair comment is a complete defense . . . and the words are not made actionable by the fact that the complaining party is injured in his business reputation. . . . The fair comment defense goes only to opinions expressed by the writer and does not extend to misstatements of fact." *Id.* at 337.

In the case here, the fair comment doctrine is a complete defense to Dr. Hutchinson's action with regard to the statements contained in the April 1975 press release and the newsletters. The disposition of public funds is clearly a matter of public inerest; and the opinions expressed were based on facts researched by Senator Proxmire's assistant, the defendant, Mr. Schwartz. Under these circumstances, the release and newsletters did not have to include all the facts on which the opinions were based, "[s]o long as the facts are available to the public, the criticism is within the doctrine of fair comment." *Fisher v. Washington Post Co.*, 212 A.2d 335, 338 (D.C. Ct. App. 1965).

It is also clear that in the District of Columbia the brief and innocuous statement Senator Proxmire made on the Mike Douglas Show did not constitute defamation, nor did any of the other statements about which Dr. Hutchinson complains. The law of the jurisdiction requires that in a suit for defamation there be proof of certainty as to the person defamed before liability can be imposed. Restatement of Torts § 564(b) (1938). The person defamed need not be specifically named; but the surrounding circumstances must be such that there is no doubt in the hearer's mind as to the pesron's identity. *Harmon v. Liss*, 116 A.2d 693, 695 (D.C. Mun. App. 1955), citing Restatement of Torts § 564(b). In this case, the statement on the Mike Douglas Show did not name Dr. Hutchinson or even describe him with the clarity that would suggest a jury verdict against Senator Proxmire. The other statements were similarly innocuous.

Under the law of Michigan, Dr. Hutchinson fares no better. That state recognizes a rule of qualified privilege for all *bona fide* communications concerning any subject in which the party communicating has an interest, or in reference to which he has a legal, moral or social obligation to a person having a corresponding interest or duty. *Timmis v. Bennett*, 352 Mich. 355, 89 N.W.2d 748, 753 (1958); *Bufalino v. Maxon Bros., Inc.*, 368 Mich. 140, 117 N.W.2d 150 (1962). This rule was applied in *Timmis v. Bennett, supra*, an action by a police officer against an attorney for libel in a letter referring to conduct of the city's law enforcement. The court found that the rule included "statements made in good faith by a citizen . . . having, or claiming to have, special knowledge . . . bearing on [a] matter of public concern and communicated to others concerned or interested." 89 N.W.2d at 755. The court explained the procedural consequences of a finding of qualified privilege, saying,

"The meaning in law of a privileged communication is that it is made cn such an occasion as rebuts the *prima facie* inference of malice arising from the publication of matter prejudicial to the character of the plaintiff, and throws upon him the *onus* of proving malice in fact, but not of proving it by extrinsic evidence only. . . . The effect, therefore, of showing that the communication was made upon privileged occa ion is *prima facie* to rebut the quality . . . of malice [in law] and casts upon the plaintiff the necessity of showing malice in fact,—that is, that the defendant was actuated by ill will in what he did and said, with a design to causelessly or wantonly injure the plaintiff,—and this malice in fact, resting, as it must, upon the libelous matter itself and the surrounding circumstances tending to prove fact and motive, is a question to be determined by the jury. The question whether the occasion is such as to rebut the inference of malice if the communication be *bona fide* is one of law for the court, but whether *bona fides* exist in one of fact for the jury [citations omitted] *Id.* at 753–54; accord *Harrison v. Arrow Metal Products Co.*, 20 Mich. App. 590, 174 N.W. 2d 875 (1969).

Timmis indicates that the doctrine of qualified privilege applies in Michigan for the same reasons that the doctrine of fair comment applies in the District of Columbia. Thus, the burden is on Dr. Hutchinson to resist the motion for summary judgment by showing that in the trial of this case there will be evidence of malice in fact or ill-will. He cannot simply rest on his pleadings, but must make this showing once it is established that the occasion in question was privileged. In *Nuyen v. Slater*, 372 Mich. 654, 127 N.W.2d 369, 373 (1964), where summary judgment for defendant was affirmed, the Supreme Court of Michigan said that "[i]f the circumstances relied on as showing malice are as consistent with its nonexistence as with its existence, the plaintiff has not overcome the presumption of good faith [established by defendant's showing of a qualified privilege] and there is nothing for the jury." No such showing has been made here by Dr. Hutchinson with regard to the press release or the newsletter.

As to the statement made on the Mike Douglas Show, and those claimed by Dr. Hutchinson to have been made on other occasions, it appears that the law of Michigan, like that of the District of Columbia, requires certainly as to the person allegedly defamed before liability may be imposed. In *Lewis v. Soule*, 3 Mich 514, 521 (1855), the Supreme Court of Michigan said that:

"[T]he true test is . . . whether those who are acquainted with the person libelled, upon hearing the charge, are able to make the application. . . . Men generally talk, and write, to be understood; and when they design to speak of and concerning an individual, they either refer to him by name, or connect him with some fact or circumstances, by which those addressed, understood who is to be designated. That fact or circumstances must be known by those to whom the communication is made; otherwise, nothing is communicated."

V.

It follows, then, that in this summary judgment proceeding, the motion, pleadings, depositions, exhibits, and affidavits disclose there is no genuine issue of material fact to be resolved between the parties. The conduct about which Dr. Hutchinson complains is admitted by the defendant, Senator Proxmire. On the facts alleged in the complaint, indeed the only facts on which the plaintiff can base any claim for relief, it matters not whether he was a public figure, a public official or a private person. Therefore, this court concludes that defendant is entitled to judgment as a matter of law; and this is true whether the law applied to this case is that of federal jurisdictions, the District of Columbia where the conduct complained of originated, or that the state of Michigan where Dr. Hutchinson lives and the claimed injury presumably was felt. *Bon Air Hotel Inc. v. Time, Inc.*, 426 F.2d 858 (5th Cir. 1970); *Perry v. Columbia Broadcasting System, Inc.*, 499 F.2d 797 (7th Cir. 1974); *Washington Post Company v. Keogh*, 365 F.2d 965 (D.C. Cir. 1956); *Nuyen v. Slayter*, 372 Mich. 654, 127 N.W.2d 369 (1964).

Accordingly, summary judgment will be entered in favor of the defendant Senator William Proxmire and against the plaintiff Dr. Ronald R. Hutchinson. And since on the facts alleged a claim cannot be stated on which relief can be granted against the remaining defendant, Mr. Morton Schwartz, this court serves notice on the plaintiff that because of the inadequacy of the complaint, it will, on its own initiative, dismiss the suit as to Mr. Schwartz, unless a showing is made within 30 days that such dismissal should not be ordered. *Literature, Inc.* v. *Quinn*, 482 F.2d 372 (1 Cir. 1973); *Dodd v. Spokane County, Washington*, 393 F.2d 330 (9th Cir. 1968).

APPENDIX A

Senator William Proxmire (D.-Wis) announced on Friday, "My choice for the Golden Fleece Award for the biggest waste of taxpayers' money for the month of April goes jointly to the National Science Foundation, National Aeronautics and Space Administration and the Office of Naval Research for spending almost $500,000 in the last seven years to determine under what conditions rats, monkeys and humans bite and clench their jaws. From the findings of these studies it is clear that the Government paid a half million dollars to find out that anger, stopping smoking, and loud noises produce jaw clenching in people."

The Wisconsin Senator said, "This is the second in a series of 'fleece of the month' awards which will climax in a Biggest Waste of the Year Award.

"All this money was given to Dr. Roland R. Hutchinson of Kalamazoo State Hospital in Michigan. Last year alone the good doctor spent over $200,000 of which more than $100,000 were federal funds. And what are some of the other results reached by these research projects in the last seven years?

"Dr. Hutchinson told NASA that people get angry when they feel cheated and tend to clench their jaws or even scream and kick. NSF learned that Dr. Hutchinson's monkeys became angry when they were shocked and would try to get away from the shock. In addition, NSF was informed that drunk monkeys do not usually react as quickly or as often as sober monkeys and that hungry monkeys get angry more quickly than well-fed monkeys.

"The Office of Naval Research appears to have gotten the same type of so-called research as did the NSF and NASA.

"It is very interesting to trace the history of these extremely similar and perhaps duplicative projects. In 1967, NSF gave Dr. Hutchinson $44,700 to study 'Environmental and Physiological Causes of Aggression.' For two years, Dr. Hutchinson studied the biting reactions of monkeys when they received electric shocks. He also compared their reaction while being given a number of different drugs as alcohol and caffeine. In 1969, the NSF gave Dr. Hutchinson another $26,000 to continue these experiments. He received another grant, this one for $51,200 in 1970 from the NSF.

"By this time Dr. Hutchinson was ready to extend his work to human biting and jaw clenching. In 1970, Dr. Hutchinson received a grant which ran for five years from the ONR to continue 'research on subhuman primates to determine the environmental, physiological and biochemical factors responsible for the maintenance of aggressive behavior and systematic replication of results obtained in primates extended to human subjects.' Total funding from the Navy ran to $207,000.

"During this period, Dr. Hutchinson applied for and received a $50,000 grant from NASA to develop measurements of latent anger or aggression in humans by means of jaw-clenching. In addition, Dr. Hutchinson received his fourth NSF grant in 1972 for $51,800 in order to continue his experiments on monkeys and extend the work to human jaw-clenching.

"Dr. Hutchinson, who in addition to being Research Director at Kalamazoo State Hospital, is also an Adjunct Professor at Western Michigan University and President of his own non-profit Foundation for Behavior Research, has proposals presently pending before the NSF, the National Institute of Drug Abuse, and the National Institute of Mental Health to continue research on monkeys' drinking, drug and jaw clenching habits. If Dr. Hutchinson is successful in this new grantsmanship attempt, he would receive an additional $150,000 of taxpayers' money.

"The funding of this nonsense makes me almost angry enough to scream and kick or even clench my jaw.

"Dr. Hutchinson's studies should make the taxpayers as well as his monkeys grind their teeth. In fact, the good doctor has made a fortune from his monkeys and in the process made a monkey out of the American taxpayer.

"It's time for the federal government to get out of this 'monkey business.' In view of the transparent worthlessness of Hutchinson's study of jaw-grinding and biting by angry or hard-drinking monkeys, it's time we put a stop to the bite Hutchinson and the bureaucrats who fund him have been taking out of the taxpayer."

Proxmire said that the public is urged to write him in Washington with suggestions for the "Golden Fleece of the Month" for May.

TRANSFER OF NUCLEAR TECHNOLOGY CONFERENCE

Mr. HATCH. Mr. President, on April 7, 1977, President Carter unveiled his nonproliferation position which calls for a halt in U.S. nuclear waste reprocessing and the Clinch River, Tenn., breeder reactor demonstration plant programs. While agreeing with the President's goal, I have concluded, after careful review of his statement, that the President's methods are illogical and counterproductive.

The policy objective for the President's position is to prevent proliferation by eliminating all uses of plutonium as a fuel source for producing electricity. Yet in the same statement, the President acklowledged that many other nations, industrial as well as developing, must and will reprocess their nuclear wastes so as to recover and use the economically valuable plutonium as a future source of electrical energy. Many of these nations are already developing or negotiating to purchase breeder reactors that require plutonium to operate and breed more plutoninum than they consume while making electricity.

Thus, whatever economic and commercial sacrifices President Carter would have us make with respect to reprocessing and our breeder program, plutonium will become a routine and readily available energy source elsewhere in the world. Already France, Germany, Italy, England, Japan, and Russia have aggressive breeder programs. Reprocessing plants are being built or are completed in several European countries, Japan, Russia, South Africa, Brazil, and Pakistan.

Forty-one nations had high-level representatives at a nuclear technology conference in Persepolis, Iran, when President Carter announced his policy. They immediately held a closed door session and drafted a nine point statement "expressing alarm." That response was presented to our delegation and I ask unanimous consent that the text of the document be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

TRANSFER OF NUCLEAR TECHNOLOGY CONFERENCE—PERSEPOLIS, IRAN

"1. In a closed session yesterday delegates from 41 countries handed the senior U.S. delegate a nine point statement 'expressing alarm at Carter's 7 April nuclear policy statement'."

2. Text of the document given to U.S. delegate (apparently unsigned) is as follows:

(i) The essential point is that most countries look upon nuclear power as the only route to energy independence. For those countries which do not have large resources of uranium this independence will come only with the breeder reactor. The reprocessing of fuel and recycling of isotopes are essential to the operation of any breeder (or advanced converter), no matter what the type. Hence any suggestion that reprocessing and recycling are unacceptable strikes at the very root of this motivation for adopting nuclear power; and naturally is viewed with alarm.

(ii) Although President Carter has concluded that the U.S. can afford to defer the breeder, many other countries cannot afford such a course. They view the breeder as an imminent reality, and this view is supported by the rapid progress in LMFBR development in Europe. They want to make firm plans for a nuclear future now. The national investment required to establish a nuclear power capability is far too large a commitment to be made if its ultimate objective is in doubt.

(iii) In the interim until independence is achieved through the breeder, most countries are likely to take the view that uranium offers no more security than oil as an impartial fuel supply. Indeed, so long as uranium enrichment remains a near-monopoly of the U.S., it might be argued that the supply of enriched uranium is less secure than the supply of oil. In this circumstance, the implication of new restrictions on the reprocessing and enrichment technologies is again cause for alarm.

(iv) An implication that the U.S., through its enrichment, reprocessing and recycling policies will attempt to affect the course of implementation of those technologies throughout the world is another worry. The required pace of implementation will depend upon the rate of growth of energy needs in the various countries, upon the world resources of uranium and upon the policies taken by those nations which are in a position to export uranium. Most of the importing nations would like to determine their own courses of nuclear implementation—particularly the implementation of reprocessing and recycling without which their uranium feed requirements increase by 45 percent.

(v) The Carter statement is regarded by some as an implication of unilateral abrogation of international agreements. Dr. Sigvard Eklund, director general of the International Atomic Energy Agency, has cited article four of the non-proliferation treaty. This perception, on the one hand, weakens the confidence of other nations in the U.S. Promises of nuclear fuel supply, and on the other hand may weaken the effectiveness of the existing agreements and may even cause some NPT signatories to reconsider. Another possibility that has been mentioned is the independent development of enrichment and reprocessing capabilities by other nations.

(vi) Many feel that the restriction of reprocessing is not an effective deterrent to nuclear weapons proliferation. This leads to two concerns: That restriction of reprocessing is far too high a price to pay for a marginally effective safeguard: that reliance on that restriction will blunt the effort toward more effective means of proliferation control.

(vii) The emphasis in the Carter statement on exploring other breeder types and other fuel cycles tends to destroy the credibility of the technical basis for the statement. There are no fuel cycles which are consistent with breeding and which provide an effective technological barrier to proliferation, the so-called Taylor fuel cycle may have advantages of this kind, but only if reprocessing of fuel is restricted to locations considered "safe" and the resulting plutonium is burned or otherwise disposed of on that site or a similarly "safe" one.

(viii) Many nations feel that reprocessing of spent fuel is the only feasible route to safe ultimate disposal of radioactive wastes. Some are legally committed to that route.

(ix) Regardless of any further international actions by the United States to implement the points of the Carter statement the implementation of the domestic points will be regarded as a victory for the groups which oppose nuclear power. This will give them greater power in other countries, where they have already shown the capability of seriously impeding nuclear power projects.

Mr. HATCH. Mr. President, no rational person wishes to see civilian nuclear technology misused for military purposes—particularly by unstable, conflict-prone

nations. If the world is to avoid a holocaust, we need a policy that will attain the goal of nonproliferation. We cannot simply remove the power and influence of the United States from the struggle, particularly when to remove ourselves from this scene requires that we sacrifice our own interests in energy independency while foregoing an option that would reduce our own energy costs.

If nonproliferation is the goal let us set a policy that will achieve it, not one which we acknowledge to be stillborn. We should consider plans to provide the world leadership necessary to control the use, shipment and disposal of plutonium. Only through cooperative efforts to control the use of plutonium do we stand a chance of eliminating proliferation while achieving the enormous energy benefits of the breeder reactor and nuclear reprocessing. And it is only through continuing our own programs that we can provide the influence and leadership necessary to achieve this cooperation.

THE DILLINGHAM CLAIM

Mr. INOUYE. Mr. President, the Senate has recently confirmed Mr. Phillip Alston as new Ambassador of the United States to Australia. I wish him well in this new job and hope that he can further the close friendship, communication, and cooperative relationships that exist between our two countries.

The Senate knows the particular interest of my State and my own personal special interest in the Pacific area. It is with these interests and concerns in mind that I take this opportunity to wish him success in his new post.

In this context I would also like to mention a particular issue that has arisen in Australia that has caused me some concern.

Very briefly, the problem involves a unique kind of indirect taking, without just compensation, of the property of a U.S. private investor for the creation of a wilderness area by the Government of Australia. The company involved is Dillingham Corp. which is a 50 percent owner of an Australian joint venture which was established to mine industrial minerals on Fraser Island off the coast of Queensland, Australia.

The joint venture received all of the necessary authorization to mine from the Government of Queensland and export permits from the Federal Australian Government. When these permits were obtained, there was a thorough review of the whole operation, including environmental matters. The Federal Australian Government was fully aware that mining would have to be carried out over a long period of time to make it economically feasible.

After the authorization had been obtained and an investment of over $12 million put in place, an environmental inquiry was begun under subsequently enacted environmental impact legislation. The inquiry concluded that Fraser Island should be returned to a wilderness area and that this should be accomplished by the revocation of existing export permits and the denial of any future permits.

There is no market within Australia for the minerals taken from Fraser Island. Consequently, the Government decision to further the creation of a wilderness area by revocation of export permits completely destroyed the investment.

I do not take issue with the environmental decision to stop the mining and to create a wilderness area. However, it does seem that when a government takes private property, directly or indirectly, for the creation of a park or wilderness area, it is a matter of fundamental justice that the owners be paid just compensation. Reliance on the technicality of revocation of export permits is not proper when, in fact, the declared substance is the taking of private property for public use.

The precedent created by the revocation of previous assurances on which the investment was based, combined with the lack of just compensation, creates serious insecurity for all foreign investment in Australia. Australia needs investment from abroad to develop its economy and to promote employment for its people. I am hopeful that a prompt settlement of this problem will be a stimulus toward this objective.

I am submitting for the record a more detailed statement of the Dillingham claim and its background. I recommend it for review. The resolution of the difficult problem of investment relationships will surely mark a basis for strengthening and expanding the already deep and strong bonds that tie our two countries together.

I ask unanimous consent that the statement on the Dillingham claim may be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

THE DILLINGHAM CLAIM

A. THE DILLINGHAM CLAIM AGAINST THE GOVERNMENT OF AUSTRALIA

The Australian Government has revoked export permits commencing in 1977 of a mineral sands mining joint venture investment of Dillingham Corporation and Murphyores Holdings Limited. The permits were revoked in order to reestablish a natural wilderness environment on Fraser Island, the site of the mining operation.

The project was approved by Australian Government authorities as a 20-year project. The revocation renders the investment totally valueless and amounts to a taking of private property for public purposes without just compensation. A claim of $25 million was presented to the Australian Government on March 31, 1977.

This memorandum briefly describes the background and nature of the Dillingham claim.

B. THE JOINT VENTURE

In 1973, Dillingham Construction Pty. Ltd., a subsidiary of Dillingham Corporation, and Murphyores Incorporated Pty. Ltd., an Australian company, formed a partnership entitled D.M. Minerals for the purpose of mining rutile and zircon on Fraser Island, State of Queensland, Australia. Dillingham is a Hawaii corporation headquartered in Honolulu, Hawaii. The investment in Australia in plant, equipment and other expenses totals over $12 million.

C. OPERATING AUTHORITY

D.M. Minerals obtained the right to mine on Fraser Island from the Government of Queensland and currently holds twelve leases on Fraser Island which were granted between March, 1973, and July 4, 1974. These leases run for a period of nine years in some cases and 21 years in others. All 12 key leases were granted prior to July 4, 1974. Prior to the granting of the initial leases, extensive hearings were conducted by Queensland authorities resulting in the imposition of stringent conditions to ensure the environmental preservation of Fraser Island and D.M. Minerals has at all times acted in compliance with those conditions.

D. EXPORT PERMIT GRANTED

Under Australian law, the export of a variety of specified goods, including rutile and zircon (the raw minerals which were mined on Fraser Island) are subject to export licensing under customs regulations. This license was granted by the then Minister for Minerals and Energy. Consequently, beginning in August, 1974, D.M. Minerals reviewed its plan of operation over the life of its mining leases with the Department of Minerals and Energy.

A draft contract was submitted to the Australian Government on August 6, 1974 and conditional approval (conditioned on approved price and final documentation) was given on August 9, 1974. The Australian Government stated when final approval was granted on December 13, 1974, that blanket approval to export would be extended initially for twelve months and would then be renewed. The approval was expressly conditioned on fulfilling the environmental obligations under the mining leases thus indicating that the Government was aware of and approved the environmental arrangements under which the Partnership was operating.

On the basis of the conditional approval granted on August 9, 1974, the partnership proceeded with major capital expenditures needed to establish the mining enterprise. It was clear at all times to the Australian authorities that this investment was not aimed at fulfilling just one contract, but required many years of operation to constitute a sound and profitable use of resources.

E. ENVIRONMENTAL INQUIRY

In March, 1975, the Minister for Environment and Conservation of the Federal Australian Government announced the appointment of an Inquiry, pursuant to the Environmental Protection Act 1974 (which was enacted four days after D.M. Minerals had obtained final export approval and which emphasizes that the Australian Government was quite aware of the environmental sensitivity), to investigate and report on the environmental aspects of options for land use and development on Fraser Island. On April 15, 1975, the Minister wrote to D.M. Minerals asking whether the company would be "willing to suspend mining on Fraser Island voluntarily and/or to seek your initial mineral supplies from another source until the public inquiry is completed."

At this point, D.M. Minerals had already committed over $8 million to the project and had a firm contract to supply its New York purchaser beginning in June 1975 under which contract it would be liable in damages for failure to fulfill its obligations. Due to these factors, D.M. Minerals replied that it could not comply with the Minister's request.

The final Inquiry Report recommended that all exports of minerals extracted from above the high water mark on Fraser Island henceforth be prohibited. This recommendation followed the Inquiry's conclusion that Fraser Island should be returned to its nat-

ural state and that commercial activity on the Island, except for a minor amount of tourism and timbering, was inconsistent with this objective.

The Inquiry further recommended that the whole of the Island be recorded as part of the National Estate under the Australian Heritage Commission Act. The Report stated: "Fraser Island is of major environmental significance to the present community and future generations . . . the Island is undoubtedly a place worthy of conservation in its natural state for the benefit of the nation as a whole."

F. REVOCATION OF EXPORT AUTHORITY

On November 11, 1976, Dillingham Corporation was advised by the Acting Minister for National Resources that the Government intended to implement in full the recommendations of the Inquiry Report. The Minister revoked existing export approvals and stated that no minerals mined after December 31, 1976, could be exported. Thus the reestablishment of a wilderness area was not accomplished by the normal procedure of the formal use of eminent domain power requiring just compensation, but through the indirect technique of revocation of export permits for which it is said no compensation is required.

G. INVESTMENT VALUELESS

The revocation decision has the same effects as an eminent domain taking. A substantial and profitable business enterprise has lost its economic value. While D.M. Minerals is still legally entitled to work its existing leases, this right has been rendered worthless by the prohibition against export. There is no domestic market for either rutile or zircon and the success of the Fraser Island opertaion has depended exclusively upon the ability to export.

H. THE AMOUNT AND STATUS OF CLAIM

In November, 1976 the Government indicated that it would, without commitment, consider a claim put forward by D.M. Minerals. Australian counsel has advised Dillingham that there are no available legal procedures for asserting a claim as a matter of right and that the Government's voluntary consideration of the D.M. Minerals' claim is the only procedure available within Australia.

The $25 million claim is calculated on the basis of closedown costs, loss on disposal of capital equipment, losses on forced disposal third parties, value of ore reserves after deducting all operating expenses, and loss of profits in 1977. The valuation of the ore reserve was based on the net present value of projected cash flow using constant dollars for both costs and revenues and an eight percent discount factor. Some members of the departmental staff of the government have responded to the claim which, as noted above, was presented formally on March 31, 1977 by indicating that only an *ex gratia* payment for 1977 profits would be allowed. Australian counsel to the Company have advised that there is no remedy at law in Australia to compensate the partnership for its loss.

I. U.S. LAW

In expressing our concern to the U.S Government about the taking of Dillingham's investment in Australia without just compensation, we thought it appropriate to point out that under United States law, the revocation of export permits to reestablish a wilderness area, which had the effect of making valuable property rights worthless, would constitute a taking of property by the Government entitling its owners to just compensation as provided for by the Constitution. Under our law, the Government cannot escape from its obligations by using regulatory devices such as zoning or denial of permits to reduce the value of property rights so as to make later acquisition by the Government for park purposes less expensive. The law does not allow environmental considerations to infringe upon the fundamental right to compensation where private property is taken for public use.

APPENDIX: THE APPLICABLE UNITED STATES LAW

When the Federal Government or State Governments take property for their own use the Constitution clearly requires just compensation. It is equally the rule, long established by the Supreme Court, that just compensation is required when property interests are destroyed by governmental action which falls short of an actual taking if the property involved cannot be used for any other purpose. (*Pennsylvania Coal Co.* v. *Mahon*, 260 U.S. 393 (1922)).

While there are a limited number of situations where the use of the police power to regulate property uses does not give the owner the right to compensation, particularly if use endangers public health or safety or where the property may be put to other uses, the rules stated by Justice Holmes in the *Mahon* case is consistently applied when regulation involves the invasion of property interests for the creation of parks of wilderness areas.

For example, Federal statutes creating national parks or wilderness areas provide compensation where inconsistent uses must be eliminated (e.g. Cape Canaveral National Seashore Act, 16 USCA 459j-2(b)). Particularly relevant is the case that held that an owner of barges that travelled on lakes in what became a wilderness area, and which could not be either used for commercial purposes or moved from the lakes, was entitled to compensation. (*Pete* v. *United States*, 531 F.2d 1018 (Ct. Cl. 1976)). In the *Pete* case, the Court held

"The utility of the boats as property has been effectively destroyed, for the right to drift aimlessly in a landlocked lake is the equivalent of no right at all . . . Governmental action which interferes so extensively with an owner's right in his property constitutes a substantial, direct and immediate interference with . . . use and enjoyment of the boat, and is, therefore, a taking within the meaning of the Fifth Amendment." (Page 1035).

And, in *Union Oil Co.* v. *Morton*, 512 F.2d 743, (9th Cir. 1975), the Court found that the denial on environmental grounds of the right to build an oil drilling platform constitutes a taking requiring compensation.

Indirect takings also come within the scope of the compensation rule. A series of cases make it clear that where the Government attempts to reduce the value of property by regulation in order to make it less expensive to purchase that property for Governmental use at a later time, just compensation is required (e.g. *City of Plaintifield* v. *Borough of Middlesex*, 173 A.2d 785 (Sup. Ct. N.J. 1961)).

There can be no doubt that if the United States Government attempted to reestablish a wilderness area by revoking or withholding export permits, the legislature or the courts would require compensation.

SECTION 504 REGULATIONS

Mr. CRANSTON. Mr. President, on Friday, April 22, I wrote to Secretary of Health, Education, and Welfare Joseph A. Califano to express my thoughts on possible changes in the January 21 draft of the Rehabilitation Act section 504 regulations.

For the benefit of my colleagues who I know share my concern about prompt and effective implementation of the 504 regulations, I ask unanimous consent to have printed in the RECORD the text of my letter to Secretary Califano.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

COMMITTEE ON HUMAN RESOURCES,
Washington, D.C., April 22, 1977.

Hon. JOSEPH A. CALIFANO, Jr.,
Secretary of Health, Education, and Welfare,
Washington, D.C.

DEAR JOE: I want to stress as strongly as possible several thoughts with respect to any changes you may be considering in the January 21 draft of the Rehabilitation Act section 504 regulations:

We in Congress remain firmly committed to ending completely the present segregation of, and the present discrimination against, handicapped individuals in our society. Section 504—which, as you know, I coauthored with Senators Randolph, Stafford, Williams, and Javits—embodies that commitment.

Tough, effective regulations implementing section 504 should be issued now, and they should be fully and forcefully implemented so as to achieve the objectives of section 504 at the earliest possible moment. For far too long, handicapped individuals have been closed off from the mainstream of life's opportunities. Section 504, and the regulations you must approve for its implementation, are their way into our society. Every potential barrier should be cleared from the path of disabled Americans who are desperately and courageously fighting for the basic human rights and freedoms to which, as Americans, they are fully entitled.

Therefore, I categorically reject any notion that a "separate but equal" approach is an acceptable way of dealing with the civil rights of disabled persons. There is a fear that some such notion may be motivating some people in your Department. I call upon you to repudiate any "separate but equal" intent in the regulations you promulgate.

Access is the key to full participation in our society. Failure to achieve full access for all citizens to activities receiving Federal financial assistance is unacceptable to handicapped Americans, unacceptable to me, and I trust, unacceptable to you as well. Let me comment on one particular issue that has arisen due to reports—or rumors—regarding your proposed revision of the regulations: It is equally unacceptable for there to be any action that would automatically exempt planned but unbuilt structures from the requirements of full accessibility to all.

Finally, I view as unacceptable any attempt to load the regulations with avenues for waivers and exceptions that can serve only to generate paperwork and litigation at the expense of investigation, compliance, and enforcement activities.

I would urge this:

That the January 21 regulations be considered presumptively valid, and that you do not approve any changes except those needed to make sure that the goals of section 504 are in fact achieved.

The January 21 regulations that Secretary Mathews passed on to you represent years of discussions and negotiations among all interested parties. You are not writing on a clean slate. Given this background, I believe you must bear the burden of justifying not only to handicapped Americans, but to all citizens and the Congress, any changes that you make.

With best regards,
Sincerely,

ALAN CRANSTON.

HOSPITALS ARE NO PLACE FOR SICK PEOPLE

Mr. PELL. Mr. President, we in the Congress and many in the medical pro-

fession have a tendency to discuss the subject of health care in America as if we were talking about a massive and impersonal business with all of the dynamics of any large corporate force. We talk about planning and regulation and budgeting and manpower and even of elasticity, since we presume that marketplace economics prevail to some extent between patients and doctors.

It is important to temper this sort of systems analysis with the recognition that the basics of health care are still centered in the patient, and that "caring" is, as it implies, not simply ministering to an illness but actually being attentive and sensitive to a patient's conditions.

I would like to share with my colleagues a perceptive and thoughtful article by a Rhode Island physician, Dr. Arthur Kern, as told to Elisabeth Keiffer, which appears in the May issue of Good Housekeeping magazine.

Dr. Kern points out that technical proficiency in the provision of treatment is not sufficient to promote recovery and good continuing health. Hospitals should all carefully review their in-patient and emergency room procedures to be sure that patients are always treated as people instead of account numbers. Specifically, the patients bill of rights of the American Hospital Association and the American Civil Liberties Union's "The Rights of Hospital Patients" are valuable guides to reasonable and practical levels of true patient care.

I commend this provocative article to all of my colleagues, and to hospital administrators and doctors throughout America. I ask unanimous consent that it be printed in the RECORD.

There being no objection. the article was ordered to be printed in the RECORD, as follows:

HOSPITALS ARE NO PLACE FOR SICK PEOPLE

(By Arthur Kern, M.D., as told to Elisabeth Keiffer)

It's time hospital patients rebelled! If any industry treated its clients the way hospitals treat their patients, it would be out of business in no time.

Surprising thoughts from a doctor, you think? Well, until recently nothing in my years of practice had ever seriously shaken my faith in hospital care. Like most physicians, I thought of the hospital as an efficient, indispensable facility. I took pride in being on the staff as chief of dermatology in a first-rate teaching hospital in a state capital. But that was before I became a patient in that same hospital.

My quarrel is not with the medical care I received for an injured spinal disc. Except for one minor slip-up it was excellent and certainly helped my recovery. My quarrel is with the attitude, from doctors down to attendants, that the patients in their care—suffering human beings—are no more than bodies in the shop for repair. This attitude made me understand the puzzling behavior of a friend a few years ago. Hospitalized with a gallbladder problem, he took all he could for three days, then simply put on his clothes and walked out.

I came home after 10 days physically improved, but furious, disgusted, appalled. My first phone call was to a writer friend to ask if she would collaborate with me on an account of my hospitalization. I felt it should be written not because I, a physician, had been treated like any other patient—and I was—but because I wanted to speak for all patients, many of whose experiences could probably top mine.

* * * * *

It is cold, bleak and seven A.M. when my wife drives me to the emergency entrance of the hospital with which I am associated. My lower spine feels like a smoldering poker. Although my condition is far from critical, I am in considerable pain. But as I enter the shiny hospital doors I feel comforted for the first time in 48 hours. In just a few minutes the saviors within will be easing my pain and helping me to recover.

I look around the emergency room with new eyes. I see a metal desk, a metal chair, a metal file cabinet, but no human being. I am unable to sit, and stretching out on the floor seems undignified. So I stand and wait. And stand and wait. Perhaps it is really only a few minutes before a middle-aged woman arrives, arranges herself at the desk and, when she has reorganized everything on it to her liking, turns to look at me for the first time.

I give my name and add that I am there to be admitted. "I have no record of it," she says in a tone of utmost finality.

I tell her that I spoke with my doctor an hour ago and am following his orders.

"You'll have to go to the admitting office," she says firmly.

It takes the combined efforts of myself and my wife to persuade her that I am in no condition to walk that far. Grudgingly, she concedes that she can write up my admission papers.

With that victory won, I ask for a stretcher. Considering where we are, it takes a surprisingly long time to appear. Suppose this were a real emergency? I think. Gratefully, I ease on to the stretcher, only to find myself a moment later stashed against a wall somewhere down the corridor while my wife finishes the lengthy paperwork. In the next half hour, nurses, residents, attendants and technicians pass by and glance incuriously at me. I am no longer Dr. Arthur Kern, but just a suffering mass of human protoplasm. No one says good morning. No one offers a comforting word.

Then, without warning, two white-clad women swoop down. Swiftly, wordlessly, they strip off my clothes and cover me with a sheet. I am not modest, but it occurs to me that someone who is, might find being undressed in a busy corridor a painful introduction to hospital care. It is reassuring to see my doctor's face a moment later. "How is it, Art?" he asks. "Do you want some medication right away?"

I certainly do, but assuming I'll be in my room momentarily, I bravely say, "I can wait," and let him hurry off. A major blunder. Another half hour passes and a new figure in white looms up. Unlike the two before her, this one is friendly and talkative, but only to passersby. All she has to say to me is, "I'm going to take some blood."

Two hours later, after a trip to X ray, I am at last in a bed. The struggle has just begun.

An hour passes and I have seen neither a nurse nor the promised medication. I push the bedside button connected to a panel at the so-called nurses' station. In reality, this station is manned by young clerks. As a doctor I've always found these young women friendly and helpful. As a patient I suspect they have been specially trained never to betray a sign of compassion.

Fifteen minutes after my buzz the intercom responds with a toneless, "What can I do for you?"

"Medication for pain, please," I croak.

Anther half hour goes by. This time I press the "instant help" button. Fifteen minutes pass before the intercom again inquires coldly, "What can I do for you?"

I repeat my plea. Thirty minutes later, an RN appears to tell me I may not have any medication because my doctor has written no orders. Without orders, she adds, I cannot have even an aspirin.

"Damn it!" I shout. "I'm a physician. I'll write orders for aspirin myself."

She retreats, saying she'll try to locate my doctor. Instead, she manages to locate his medication order—which has been clipped to my chart for the last five hours.

Ritual, I soon learn, looms large in hospital procedure. Four times a day an attendant appears to stick a thermometer in my mouth and take my pulse. Since pain and muscle spasm are my chief complaints, my doctor has put me on a regimen of muscle relaxants and sleeping pills in addition to traction and physiotherapy. More often than not, the attendant has to wake me up to determine that temperature and pulse are, expectedly, normal. This is also true of my blood pressure which is, nevertheless, taken three times a day for the duration.

These tests aren't painful, but in my case, at least, they are certainly unnecessary and frequently annoying. If they could be performed less often in such cases, I muse, might not the attendant have a bit of free time to do something that would make the patient feel more warmly cared for—straighten up the bed, for instance—and less like a piece of machinery whose working parts have to be coldly checked regularly.

Hospital timetables also take a bit of catching onto. The key seems to be that they have nothing to do with the comfort of patients. Seven A.M.: patient is awakened for temperature-taking. Seven-thirty: flannel-mouthed, hungry patient is trying to forget his discomfort by dozing when the door bursts open and a disembodied hand tosses some towels and a facecloth in the general direction of a chair. Half an hour later, breakfast tray arrives. Eight-thirty: breakfast tray departs. Only then is patient handed the tossed linens, a basin and a toothbrush. Most people wash their faces and brush their teeth before breakfast, I believe. Couldn't they be allowed to follow their normal routines in that empty hour between seven and eight when the only diversion is the spectacle of the flying towels?

If one is not accustomed to eating dinner at 4:30 P.M., the meal schedule may also seem unfortunate. Unless patients expect visitors, they must look forward to a long, empty evening after this early dinner. However, it *is* convenient for the kitchen staff and the night nursing shift. In my case it makes little difference since I have minimal contact with my food. Three times a day an attendant deposits a tray by my bed, mutters, "You can manage, can't you?" and vanishes. Sometimes the tray is a foot above the level of my bed, sometimes below. Sometimes the side rail stands between me and the food. It doesn't really matter since I can neither sit up nor roll onto my side.

Breakfast and lunch are usually confined to whatever liquids I can reach and sip through a straw. Occasionally I make the mistake of painfully easing a small dish of something onto my chest and trying to shovel it into my mouth. Usually I miss and lie in or among bits of corn or string beans until my wife arrives. She feeds me dinner but the fact that the food reaches my mouth is a hollow victory.

In all fairness I should mention that patients have a choice of foods—a fact I don't discover for several days. Looking at the printed menu on my tray one afternoon, I see that nothing has been circled to indicate preference.

Prison-wise, by now, I make enquiries by by phone to the dietitian, rather than by buzzer to the nurses' station. The dietitian tells me that an attendant has left a menu in my room every morning, but that I have never circled my choices. With a little more sleuthing I find she leaves the menu *after*

I have been taken to physiotherapy and unquestioningly reclaims it before I get back to my room.

Years ago in hospitals, a nurse or nurse's aide would give a daily bedbath to an incapacitated patient. I believe it improved the morale as much as it sanitized the corpus. There is something enormously comforting in being bathed when you are ill or in pain. It proves another human being cares about you, for one thing. Routines are different now. Every morning, the attendant who leaves a basin and towel by my bed instructs me to wash all my parts I can reach. She adds that she will do my back and legs when she returns—by which time the water will be cold and scummy. I would like to follow her orders, but the parts I can reach are few. As a result I feel—and in fact I am—unclean for the duration of my stay. It seems to me the ultimate dehumanization.

So far, my complaints are not about anything seriously threatening to patient well-being. But things can happen in hospitals that are. Two days after I arrive my doctor says, "Did you know you have diabetes, Art? Your blood sugar was 148 on admission."

"Did you know that that blood was taken an hour after I'd eaten breakfast?" I reply.

He did not. He is discomfited and he will order a fasting blood sugar—the correct way to test for diabetes—done the following day.

Midmorning next day, I'm awakened from a doze by someone pricking my finger. On his next visit, Hal says, "Art, I'm afraid you really do have diabetes. Your blood sugar was way up again the second time."

"Sorry," I say, "but that wasn't a fasting blood sugar, either. The technician took blood after breakfast."

My doctor is much more upset at that moment than I am. He still believes in the infallibility of hospitals. We try it again a third time and this time we get it right. I do *not* have diabetes.

A cause I have espoused for many years is the fight against pollution. I have fought against pollution of our atmosphere, pollution of our water and pollution of our soil. It has never occurred to me before that another battleground might well be hospitals. My first skirmish is with my initial roommate who chain smokes despite the "No Smoking" sign in our room and the fact that there is a smoking area nearby for ambulatory patients and visitors. To my relief, he is discharged my second day.

Now, less heavily sedated, I become aware of the major hospital pollutant—noise. Do you think of hospitals as quiet, peaceful places? They are not. At least every 90 seconds during the day and a bit less frequently in the evenings there are announcements of one type or another over the loudspeakers in the corridor. They are so loud that the deafest soul could turn off a hearing aid and still receive the proclamations. A patient's only defense is to ask to have the door of his room closed. However, the attendants at the desk do not like closed doors and make sure they don't stay that way.

And what are these loud-spoken messages? They are addressed entirely to hospital personnel. They are paging workers on the floor, announcing that lunch carts are ready on the north side or that 244 needs to be taken off the bedpan. I enquire as to whether anyone uses "beepers," the small, relatively quiet receiving devices doctors carry when they are making rounds. Only interns, residents and key personnel in the cardiorespiratory team, I am told.

Why? Why must sick people be assaulted by irrelevant squawks? The final straw is to be waked at 4:30 in the morning by unintelligible sounds from the loudspeakers followed by: "Testing, one, two, three, four. Testing, one, two, three, four." It really happened.

We all know that sick people can be difficult to deal with. Illness, pain, confusion and fear are likely to make them irrational and overly emotional. Consider the added stresses that being hospitalized involves. You have been stripped of your identity along with your clothes. You must submit like a child to bewildering regulations and allow strangers to perform unpleasant intimacies. You are a helpless prisoner. It is not surprising that hospital patients frequently regress to childish behavior or blow their tops.

It is near the end of my hospital stay and I have done just that. Predictably, over a minor incident. Physiotherapy, to which I am taken every morning at nine, is the high point in my day. The soothing hot packs and massage are the only tangible evidences of healing I receive. I look forward to physiotherapy like a child to a birthday party. On this morning, no stretcher arrives to take me to physio. I buzz to ask why. "I'll check," the intercom responds indifferently.

I wait and fret. An hour lated I buzz again. "I'll check," the voice again replies.

By 11 a.m. I have given up hope, but as a matter of principle I buzz again. "Your physio has been cancelled," the intercom informs me.

"Couldn't you have told me that earlier?" I ask.

This time the voice has a sharp intonation. "Too busy!" it snaps.

That does it. Using my telephone, I ask to see the floor nursing supervisor. When she arrives I recognize her as the ghostly figure who hovers in my doorway every morning just long enough to say, "How are you feeling today?" and hear me say, "Better, thanks."
